

GOF 1661

Chapter 1661: Clash of Races (1)

As the army set off, countless people scrambled to send them off.

Han Fei didn't take them to the passage on the Scattered Stars Island, but the one in the Ten Thousand Demon Valley. After all, he hadn't become a king yet, and there were some things he didn't want others to know.

At this moment, Luo Xiaobai was leading the army to set off.

Han Fei closed the sky curtain and appeared on the top of the Empyrean Waterfall. There was another person beside Han Fei.

This person was none other than Cao Tianzhi, one of the two remaining half Kings in the Yin-Yang World.

Han Fei said, "Everyone except you from the Cao family has gone over. This time, you have no choice but to pray that they don't die..."

Cao Tianzhi said with a sullen face, "I'm only a Half-King. Even if I go there, so what?"

Han Fei sneered. "I can tell at a glance that you're a half-king who hasn't transcended the Heavenly Tribulation... Not just you, Tang Yan can't pass it either. Be content! For your Cao family, this expedition is a great opportunity. Although I look down on the big clans, if there are no big clans in this world,

I won't bother to pursue the past."

Cao Tianzhi said, "Since Marshal Han has made this promise, I'll stay in Yin-Yang World and wait for the return of the expedition army."

"Um!"

The people of the Cao Family were all in Han Fei's hands, so Cao Tian didn't dare to do anything. Otherwise, what if Han Fei arranged some dangerous battlefields for the Cao Family? Therefore, he had to obey.

In Yin-Yang World, Cao Tianzhi couldn't use the people of the Thug Academy to threaten Han Fei. This was because in this operation, all the members of the Thug Academy were deployed and none of them stayed in Yin-Yang World!

After chatting with Cao Tianzhi, Han Fei came directly to the Cloud Whale's back.

Tang Yan said, "So Queen Life really doesn't allow Half-Kings to go over?"

Han Fei said, "You can wait a little longer... for the cage to be unsealed, or I become a king. To be honest, I don't mind having another king in the Yin-Yang World! But... the Yin-Yang World's luck and spiritual energy are probably not enough for two kings to appear."

Tang Yan said leisurely, "If you can break the Heavenly Dao Dharma Eye, aren't you afraid that I will snatch your opportunity to become a king?"

“Haha! You can have a try!”

With that, Han Fei stepped into the void and disappeared.

The Cloud Whale’s huge body turned over in the sky and continued to swim in the clouds.

Tang Yan, who was hiding in the Cloud Whale’s body, didn’t doubt Han Fei’s words.

‘The Han father and son weren’t so petty! However, Cao Tianzhi had better not stand in his way. Otherwise, if Han Fei didn’t slaughter him, Tang Yan would slaughter him!

In the demonic plant channel, when the Venerables entered, they were shocked. Their strength had been suppressed to that of a Hanging Fisher?

They had never felt so weak since they became strong, If someone attacked them at this moment, they probably couldn’t resist it.

Fortunately, everyone’s strength was suppressed to that of a Hanging Fisher. At this moment, Han Fei held the Sky Hanging Mirror and used it without hesitation.

In the sky curtain, Han Fei shouted, “Everyone, listen up. Because of the seal on the channel, your strength is temporarily suppressed to the Hanging Fisher level. Don’t panic. Also, when we reach Water-Wood World, the 25 squads will be temporarily broken up and integrated into the 11 divisions of the human race in the Water-Wood World. However, you must remember that in Water-Wood World, no matter who you are, even if they are in the Venerable realm, your supreme commander is Luo Xiaobai. She will preside over your division of labor! When the battle starts, Luo Xiaobai will be in charge of the expeditionary army.”

With that said, the sky curtain fell on Luo Xiaobai like a camera, and Luo Xiaobai looked up at the camera.

Beside Luo Xiaobai was the group of people from the Thug Academy.

Zhang Xuanyu couldn’t help but sigh. “I’m a little excited!”

Beside Zhang Xuanyu, Yi Xiyan snorted coldly. “When you get there, remember not to fall for any girls. Let me tell you, although they look pretty, they are already old enough to be your grandmother. Unlike me, I’m still young.”

Zhang Xuanyu :” ...”

Now that Yi Xiyan had grown up, she was slender and supple. Zhang Xuanyu couldn’t resist her charm anymore! So he reluctantly gave in.

However, along the way, Yi Xiyan had said this several times. This made Zhang Xuanyu even more curious... what the girls over there look like.

A bold person couldn’t help shouting, “Marshal Han, will we be bullied when we reach the Water-Wood World? I heard that there are Insect race, sky race, and demonic plants there... They are all natives.”

Han Fei immediately shouted, "I'm telling you that when you reach the Water-Wood World, you will go directly to the human race of the Water-Wood World. The commander, Luo Xiaobai, has already arranged everything for you. After you arrive, seize the chance to exchange experiences with them. For example, the Water-Wood World's bow technique is unparalleled. In addition, the Insect race is simple and honest, the demon plant race is easy-going, and the sky race is interesting. These are very friendly races. Don't pick fights and cause conflicts. If anyone messes up, be careful. Commander Luo will send you back to the Yin-Yang World!"

Luo Xiaobai looked at Han Fei, who was bragging at the Sky Hanging Mirror not far away, and really wanted to go up and kick him. Commander Luo? That sounds so embarrassing.

Old Jiang roared at Han Fei, "Brat, where did you arrange for us?"

Han Fei closed the sky curtain, turned around, and grinned. "I certainly will arrange a good place for you! Flying Feather Division of the human race, their Venerable Wushang Xue is on good terms with me."

Old Bai grunted. "That's good. We'll visit her when we get there."

However, Ning Jing was stunned. When did you get on good terms with Wushang Xue? It seems that you only know Wushang Xue among the Venerables in the Water-Wood World... Oh no, and Yi Yuchen... and Zhang Yao, whom you brought back.

Half a day later.

Buzz!

'The Water-Wood World, which had been preparing for days, had dozens of teleportation arrays set up at the passage. It was specially prepared for the people of the Yin-Yang World.

'When Han Fei came out of the teleportation array, he was stunned.

"Damn, so many people?"

Han Fei saw that the Sky Clan was flying everywhere

On the main trunk of the Cloud Sea Divine Tree it was densely packed with the insect race because they wanted to see what the people of the Yin- Yang World looked like!

And on the branches of the Cloud Sea Divine Tree, various treemen with messy branch heads were also watching.

However, how many treemen could stand on the tree?

Therefore, a lot of vines and branches were drooping in all directions... Anyway, they were all demon plants, so they didn't need eyes.

As for those who didn't occupy the best positions, they had already filled the surrounding branches and trunks, watching with their perception.

Of course, on the main road, it was the human beings from the eleven divisions of the Water-Wood World.

After all, Han Fei represented the Yin-Yang World.

Therefore, the Venerables of the eleven divisions were all waiting here.

Behind them were a group of explorers.

Just like the people from the Yin-Yang World, the people from the Water-Wood World had heard the stories from the Yin-Yang World for tens of thousands of years.

However, this was the first time they met on a large scale!

This was a historic meeting. At this moment, at least hundreds of thousands of eyes were gathered here, waiting for the people from the Yin-Yang World to come and talk.

Buzz!

The moment Han Fei appeared, the crowd burst into an uproar. All kinds of whispers and buzzing sounds were heard.

A member of the Sky Clan shouted, "Huh? Isn't that Han Fei?"

Abug hummed. "Ah! I haven't seen him for a long time. He seems to have become stronger!"

A Tree Demon mumbled, "He's still ugly! But he seems to be more majestic than before."

Han Fei's face was black. Isn't this f*cking welcome a bit too much?

Ning Jing appeared with Han Fei.

Seeing Ning Jing, countless people shouted,

"Messenger Jing!"

"Hi, Messenger Jing!"

"Hi!

Hearing the rumbling noises, Ning Jing immediately said, "Keep your voices down. Those big bugs, shut your mouths. Sky Clan, stop chattering."

Buzz—

'Then, Old Bai and the others appeared.

'The moment Old Bai and Old Jiang appeared, they were all stunned.

Old Bai took a deep breath.

The first to be caught in their eyes were the strange species. When they looked up, the dense insects were like stacked city walls, so high that they couldn't see the top.

However, Old Bai immediately discovered that there were many strong masters in the Water-Wood World!

'There were as many as 11 human Venerables in front of him, including more than 100 explorers.

'The number of Hidden Fishers here was almost comparable to the number of the expedition army coming from the Yin-Yang World.

"Wow! Look, there are so many humans."

"Wow! These people are as ugly as Han Fei!"

"No, there are beautiful ones inside. Look at that one, that one, and that one..."

Zhang Xuanyu, Yi Xiyan, Su Daiji, and company were all dumbfounded.

Zhang Xuanyu was shocked. F*ck, are they humans?

He immediately felt a sense of crisis. Those people were too handsome!

Also, those women... Holy sh * t, how can they be so beautiful? Each of them is comparable to Yi Xiyan!

Gulp!

And among Han Fei's team, the one who received the most attention was none other than Wang Dashuai.

An insect exclaimed, "Look at the fatty carrying the big iron block! He's so fat!"

Abug exclaimed, "I bet his stomach is comparable to that of an insect queen."

A member of the Sky Clan chattered. "Look, there are still people coming in from behind. Oh, they're so ugly. It turns out that there are only a few good-looking ones in the front."

Everyone from the Thug Academy: "

Chapter 1662: Clash of Races (2)

After all, the size of the exit was limited.

There were still people maintaining order in the passage, and people kept coming out from it.

Most of the newcomers were shocked.

For example, the first batch of people to come out was the team led by the Thug Academy. Except for the people from the Thug Academy, everyone who was related to Han Fei in the past was in this team, like the Hidden Fishers from the Skeleton Shore, You Lingyun, and the others.

Also, the people who once stayed in the Empyrean Waterfall, the Scattered Stars Fourth Unit, the Refining Hall... Jiuyin Ling, He Xiaoyu, and the other people from the Thirty-Six Towns.

All in all, those who were related to Han Fei were the first batch to come.

'There was no such thing as pulling strings. After all, Coming earlier or later didn't make any difference.

Of course, this was also related to Han Fei.

After all, Han Fei was very popular in the Yin-Yang World. They had a good relationship with Han Fei, so they certainly wouldn't deliberately alienate him. Therefore, Luo Xiaobai simply arranged these people to be together.

Among the 25 teams, Luo Xiaobai had absolute control of these teams through the commanders of the various levels of the Scattered Stars Island. Otherwise, such a huge army couldn't be managed by one person.

At this moment, Qing Chen, Youye, Nameless, Ning Jingyao, and the others finally reunited. They were chatting.

Ning Jingyao said, "Qing Chen, why are you in our team instead of staying with the people of your academy?"

Qing Chen grunted. "I can't help it. I'm isolated in the academy. Besides, since you're all here, why am I still there? Well, it's our turn soon. I'm really looking forward to it!"

Youye said, "Don't be stupid. Calm down. After all, this is their territory. Don't let them look down on us."

Wuming held his longsword and said coldly, "That's right. Don't let them look down on us."

A moment later.

Swish ~

'When Wuming and the others walked out of the channel, they saw light.

Upon closer inspection, everyone gasped. F*ck, what were those wall-like bugs?

Also, the dense branches and vines made it as if they had entered an undersea jungle.

"Hiss!"

Qing Chen took a deep breath. "There don't seem to be many humans... Is this the insect race?"

Youye asked, "Spiritual plants... Hiss, if I'm not mistaken, we're standing on a tree, right? How big is this tree?"

Immediately afterward, a burst of buzzing sounds filled their ears.

A buzzing voice said, "The one holding the sword is cool, but the thin one is skinny and ugly, much uglier than Han Fei."

Qing Chen looked around. Are they talking about me?

A Tree Demon shook its leaves. "I sensed the vibe of demonic plants from that girl. She must be a powerful human manipulator. She's not as pretty as us, but she's better-looking than men!"

Youye's face turned green. Did she have to compete with men in beauty now?

However, when Youye noticed the fairy-like Water-Wood Heavenly Human Clan... she gasped.

Especially the woman from the Water-Wood World! God, the skins, the figures, and the faces

Youye didn't know what to say. Do all the human beings here look like this? Why is there not a single plain-looking one?

Then, Jiuyin Ling, You Lingyun, He Xiaoyu, and the others walked out one after another.

'The moment Jiuyin Ling appeared, countless bugs shouted in shock, "This one is beautiful. This one is the most beautiful. It seems that there are also beautiful people in the Yin-Yang World. This one is even more beautiful than our people."

Abird said enviously, "It seems that in Yin-Yang World, only women at the Explorer level are beautiful, right?"

Although many people had exclaimed when they saw Luo Xiaobai and Yi Xiyan,

However, when the Insect Clan, the Sky Clan, and even the Water-Wood Heavenly Human Clan saw Jiuyin Ling, they couldn't help but be attracted by her extraordinary temperament.

Someone even sighed. Her temperament is even comparable to the queen. Who is she?

The eyes of the Venerables and explorers in the Water-Wood World were burning. With such a gorgeous face, Jiuyin Ling was definitely worth their pursuit.

'A Venerable even said to Han Fei via voice transmission, "Han Fei, can we propose marriage to the women from the Yin-Yang World?"

Han Fei grinned and replied, "Which one do you like?"

The man said, "There! The one in white?"

Han Fei's smile disappeared and he said coldly, "F*ck off! I brought my people here to fight a war, not to fall in love with you."

Seeing that Han Fei refused, the Venerable didn't take it seriously. He thought to himself, Han Fei, this ugly man, must've fallen for that girl too. So he doesn't allow me to pursue her. Humph!

More and more people came out of the exit.

'As the representatives of the human race, Wushang Xue walked out. Han Fei used to be in the Flying Feather Division of Wushang Xue.

'Wushang Xue looked at Luo Xiaobai and said, "The Flying Feather Division can accept 50,000 humans from the Yin-Yang World. The other ten divisions will each accept 20,000. Shall we set off now?"

Luo Xiaobai nodded and turned to Old Bai and the others. "President, please lead the team. As long as you follow the instructions of the teleportation array, there will be people guiding you along the way."

Old Bai grunted and turned around. "Follow me."

People were coming out of the entrance faster and faster. Shocked cries were heard almost every moment.

Han Fei greeted Luo Xiaobai and slipped away.

Half a day later.

Flying Feather Division.

Five squads, which meant 50,000 people, were stationed in the Flying Feather Division. Their residence was on an unoccupied tree. It seemed that the Flying Feather Division had specially vacated it. On every leaf they could cultivate.

There were no houses in the Sea of Clouds Divine Tree. They could sit on the leaves of the Sea of Clouds Divine Tree to rest. Even on the Scattered Stars Island, many people didn't sleep in houses. For example, the Dark Hunter Legion could sleep anywhere.

Only camping required living places.

Of course, when it came to the people of the Thug Academy, they had to have a house.

According to Luo Xiaobai's arrangement, almost every person who reached the Water-Wood World would be received one-on-one.

Although there were many people coming from the Yin-Yang World, there were also a lot of people here!

Each one from the Yin-Yang World could even be received by more than one person, but it was unnecessary.

Although the people of the Yin-Yang World were here to prepare for war, they had to familiarize themselves with the environment here. The Yin-Yang World and the Water-Wood World needed to know each other better!

According to Han Fei's guess, in the near future, the cage might collapse at any time. At that time, the Yin-Yang World and the Water-Wood World would collide, and even join forces!

In the future, the Yin-Yang World and the Water-Wood World might be invaded by other Mystic Worlds.

Therefore, the friendship between the two was very necessary!

At this moment.

The people from the Thug Academy were eating hot pot on the leaves, including Luo Xiaobai. At this moment, Luo Xiaobai didn't need to do anything. After all, there were people acting as guides for the people from the Yin-Yang World one-on-one.

This time, even Han Fei didn't expect the Water-Wood World to be so friendly!

He had thought that there might be fights between the two sides. After all, the people from the Water-Wood World would despise the ugly people from the Yin-Yang World!

Just like when he first came here, how many people despised him for his "ugly" appearance?

To Han Fei's surprise, the people from the Yin-Yang World didn't get angry when they were called ugly. Many people even admitted that they were ugly.

Zhang Xuanyu said, "Yi Xiyun, sit down. Why are you sitting so close to me at dinner?"

Yi Xiyan snorted and said, "I'm having dinner with you! What are you looking at?!"

Zhang Xuanyu flatly denied it. "Watch your tongue. Please don't ruin my image. I'm just appreciating... Hey, don't attack me. Do you think I can't beat you? Hey..."

While Han Fei and the others were eating hot pot, suddenly, Han Fei looked up at a leaf not far away. On that leaf, a black-cloaked man was sitting cross-legged.

The void trembled, and Wushang Xue appeared.

Wushang Xue looked at Han Fei. "Who is this?"

Han Fei said casually, "A grand venerable of the Yin-Yang World. There's no one in the entire Yin-Yang World that you need to suspect. Would you like to come over for a hot pot?"

Wushang Xue glanced at Han Fei and then at the black-cloaked man. "I can eat it myself."

The appearance of Wushang Xue made all the members of the Thug Academy look at the black-cloaked man.

Han Fei shrugged helplessly. "Junior Uncle Faceless, have you been exposed so quickly?"

"Hiss!"

"Junior Uncle Faceless?"

Yi Xiyan and company looked at each other. "Who is Junior Uncle Faceless?"

In fact, when this name was mentioned, other than Qu Jinnan, Yi Xiyan, and company, the others immediately knew who he was.

Jiang Qin, Yang Xie, Wang Dashuai and the others all stood up and bowed. "Greetings, Patriarch."

"Heh heh! Just now, I went to the Grand Void Illusionary Realm to take a look. I didn't expect to be discovered. However, there are indeed many strong masters here. This leader of the Flying Feather Division is not weaker than me!"

Han Fei said, "When you return to your peak state, it won't be a problem for you to suppress Thousand Star City again..."

"Heh ~ Fine, you eat. I'll continue to explore the Grand Illusionary Land."

After dinner.

Han Fei greeted Old Bai and the others, and then went to the side with Luo Xiaobai, Zhang Xuanyu, and Le Renkuang.

Han Fei said, "Xiaobai, it's not war time yet. Let's get familiar with the battlefield in the Water-Wood World first. At the same time, we'll announce the arrival of the Yin-Yang World to the White Shell Royal City. If any of our Venerables are disobedient in my absence... you don't have to tolerate them. With

Patriarch here, you can either fight or kill them. You have to establish absolute authority."

Luo Xiaobai nodded. "Okay, I'll wait for your news."

Zhang Xuanyu immediately said, "Feifei! Where are you going?"

Le Renkuang also said, "What do you want to do?"

Han Fei grinned. "I'm going to the White Shell Royal City."

Zhang Xuanyu :"

Le Renkuang:

Chapter 1663 Sneak In

According to Han Fei's plan, the most important purpose of the so-called "expedition" was not to fight a war, but to promote communication among the races of the two worlds.

The people from the Yin-Yang World were relatively weak, but they were the pioneers of the Yin-Yang World to get in touch with the outside world.

In any case, this trip was of great significance. Han Fei specifically communicated with Luo Xiaobai for this.

At this time, after arranging everyone, Han Fei left a projection and left. And this projection only had the strength of a Half-Venerable, which basically didn't affect Han Fei's real strength.

The White Shell Royal City was a million kilometers away.

Han Fei took out the Vast Ocean Navigator and searched for other entrances to the Lightning Prison.

In fact, if Han Fei wanted to go to the Lightning Prison, he could either kill a Heavenly Talent from the White Shell Royal City, disguised himself as him and sneak in, or find other entrances.

At first, Han Fei thought that he hadn't left the Water-Wood World for long, and it wouldn't be a problem for him to disguise himself as Zhang Xiaotian and sneak in.

However, Zhang Xiaotian was a reincarnated old man. God knew what was the relationship between him and the White Armor Emperor. If he was seen through, he probably couldn't escape.

As for the other Heavenly Talents, if they rashly said that they wanted to open a forbidden-level trial, it would attract attention. After all, not everyone was qualified to enter the forbidden-level trial. He had made a lot of preparations when he pretended to be the Fish Dragon King Therefore, after considering everything, Han Fei felt that it was better to find another entrance.

Was there only a small entrance from the White Shell Royal City to the vast Lightning Prison? Obviously not. Every space had its weak points.

It was just like the cage. The seal of the cage was strong enough, right? The stronger one was, the harder for him to enter. However, it was only a special kind of space. If one reached the peak of the space Great Dao, he could easily break through.

For example, Chun Huangdian had easily cast a projection into the Yin-Yang World despite the space barrier. It wasn't a problem for these powerhouses to pass through space barriers.

Therefore, Han Fei believed that he should be able to find a way to get in if he searched with the Vast Ocean Navigator.

Two days passed. Han Fei was getting farther and farther away from the White Shell Royal City.

In a mist near the cage seal, there was a dangerous place with a radius of about 50,000 kilometers.

Han Fei vaguely remembered that this place had once been marked as a forbidden place on the map given to him by Queen Life. Although it was far from the White Shell Royal City, it was even farther from the Sea Cloud Divine Tree, so Queen Life wouldn't explore it easily.

However, although Queen Life wouldn't explore such a place personally, it didn't prevent her from sending people to explore it! Therefore, it was marked on the map, indicating that this dangerous place might have been explored...

Han Fei was surprised. Was the Lightning Prison here?

Han Fei thought to himself, The Lightning Prison is such a weird place of thunder. It's so obvious. How can Queen Life not notice it?

Perhaps they hadn't finished exploring it!

Han Fei took out the Nine Palace Luck Ruler and activated it. When the ruler's marker fell on the "Ominous", Han Fei smiled. It seemed that it was not a problem.

Buzz!

As soon as he entered the forbidden area, the sea was full of turbulence.

This was a bit like the Abyssal Chasm in the level-three fishery, surrounded by a gale and a strange space.

This space was the same. After Han Fei entered it, he found that his perception was caught by the vortex here, and his perception couldn't get in further.

The old turtle said, "My perception was also sucked, but there are creatures here."

"Huh?"

It was only natural that there were creatures in the sea. However, there were very few creatures in such a dangerous place, unless they were completely adapted to the environment.

Han Fei didn't hesitate.

Although the sucking power of the vortex was very strong, it couldn't shake Han Fei at all.

After traveling more than ten thousand kilometers, when the vortex here had reached the level of a junior Venerable, something strange happened.

Boom!

There was a muffled thunder at the bottom of the sea, and an electric arc hit Han Fei from a distance.

No matter how fast Han Fei was, he couldn't be faster than a flash!

Therefore, even if the attack wasn't too powerful, Han Fei was still blown back more than a hundred kilometers.

When Han Fei stabilized himself, he was surprised to find that his left arm was completely cut apart. There was even a shallow white mark on the bones of his Indestructible Golden Body

"Electric arc? Hell... the electric arc tried to penetrate me? It can't be an electric arc. Besides, the attack is too powerful.

With a thought, Han Fei switched the Great Dao of Heaven Enlightenment to the Great Dao of Time.

Boom!

When the electric arc appeared again, a blue barrier suddenly appeared in front of Han Fei. At that moment, a huge flat fish thirty meters long appeared in Han Fei's eyes.

Information popped up in Han Fei's eyes.

< Name > Thunder Emperor Belt

< Introduction > This is a kind of creature that grows up abnormally. Because it has been absorbing the power of thunder for a long time, its soul and body were scattered when it was young, but it survived by a fluke. The Thunder Emperor Belts intelligence is not high, but it is very aggressive. It likes to fight and likes thunder. Because its speed is as fast as thunder, its sharp blade can break ultra-quality Divine weapons.

< Level > 84

< Quality > Legend (Upgradable) < Realm > Dao Entering

< Spiritual Energy > 3,825,45

< Battle Technique > Rumbling Flash

< Collectible > Thunder Bone, Shadowless Scales, Swift Eyes, King Tendon

<Absorbable>

< Remarks > The Thunder Emperor Belt is extremely rare. Among the countless species in the sea, its speed can enter the top ten thousand.

Han Fei was surprised to see this information. Is this a f*cking intermediate Venerable? An intermediate Venerable can cut my flesh? It's hard to imagine how much combat power its speed has brought it!

It could be seen that when the speed reached a certain level, the combat power could soar.

He couldn't cut open his Indestructible Golden Body purely because of his realm.

After all, in a sense, Han Fei's Indestructible Body was comparable to a king. If it could be cut apart by a mere intermediate Venerable, how strong was that intermediate Venerable?

"Chi la "

The moment the Thunder Emperorbelt encountered the time barrier, it twisted its body and immediately prepared to dodge. However, Han Fei cast the Void Lines immediately.

The Thunder Emperorbelt turned into an electric arc and escaped again. Han Fei didn't even have the time to shout as he activated the Great Dao. "All laws forbidden in this space."

That was not enough. Han Fei stomped, and the space around him shortened. "Hiss -"

At that moment, after Han Fei did so many things, the Thunder Emperor had run dozens of kilometers away the moment he attached the Void Lines to it.

"Roar!"

The Hundred Beast Soul Devouring went straight to the soul of the Thunder Emperor Belt, causing its body to freeze.

Han Fei cast all the Void Lines on it and caught it, without giving it any chance.

"Huff!"

Han Fei was slightly relieved.

It seemed that this thing was only fast, but not as fast as the speed of light... If it was just the normal speed of lightning, Han Fei would be much faster than it was now.

After all, the normal lightning speed was only several hundred kilometers per second.

This was a Venerable-level sea beast that was good at speed. Its speed was much faster than the theoretical speed of lightning, at least ten times faster, but it was still within an acceptable range.

If it hadn't met Han Fei, if it hadn't been so bloodthirsty, it wouldn't have ended up like this.

The old turtle said, "Well! I haven't seen this creature before. It's as fast as a bolt of lightning. If it grows up, its strength must be unimaginable. Unfortunately, you caught it."

Han Fei thought to himself, Now that the Demon Purification Pot's small vines are still incomplete, I can't continue to synthesize new contractual spiritual beasts... So, I'll use this Thunder Emperor Belt for Little Gold's improvement!

Little Gold and the others could continue to fuse. For example, the Nine-Tailed Mantis Shrimp was also forcibly fused into nine tails by him!

As for the Thunder Emperor Belt, although it was also a legendary creature and could grow, it wasn't domesticated. Therefore, Han Fei didn't care.

After going another eight thousand kilometers deeper into the dangerous place, Han Fei sensed that the vortex attraction force here had reached the level of an intermediate peak-level Venerable.

In other words, only intermediate peak-level Venerables could come to this place. Generally speaking, it might require advanced Venerables.

Obviously, if the creatures living here wanted to resist the power of lightning and quickly escape the suction force of the vortex, they either had extremely fast speed, such as the Thunder Emperor Belt, or had enormous strength to escape the suction force.

Ding ding ding!

At this moment, Han Fei was standing above a vortex.

This was the path pointed out by the Vast Ocean Navigator, which meant that he should be able to enter the Lightning Prison from

here.

Han Fei couldn't help guessing that there were countless vortexes here... Could it be that every vortex here led to a different place? Of course, this was just Han Fei's guess.

After all, there were hundreds of such powerful vortexes on his way!

At this moment, Han Fei didn't panic. The Nine Palace Luck Ruler's "Ominous" result might be very dangerous to others, but it was nothing unusual for him.

Without hesitation, Han Fei jumped into the vortex.

When he entered the vortex, the crazy suction force caused Han Fei's blood to flow faster, and the Qi and blood in his body began to spin like blades.

If it were someone else, even an advanced Venerable might have been minced by the flesh and blood in their body.

Han Fei instantly understood why such a place was rarely explored!

Buzz!

When Han Fei began to spin with the vortex, the space at the bottom of the vortex was opened by the vortex. It was equivalent to a teleportation array that sent him out of this space.

Buzz!

When the suction force disappeared, Han Fei saw nothing but darkness. Han Fei was surprised to find that there was an endless void here. However, on the other side of the void, Han Fei saw a white spot.

Needless to say, it was the exit.

Boom Boom Boom ~

Han Fei entered the white light spot.

Instantly, dozens of lightning bolts struck down at Han Fei.

But Han Fei was overjoyed. He took a long breath and said, "I'm in!" The old turtle said, "Why don't you find a place where the power is slightly weaker and let my Gui Sanqing's body come out?"

Chapter 1664 Lightning Prison

Boom Boom Boom ~

Having experienced the Lightning Prison once, Han Fei knew that this was an excellent place to cultivate. As long as he could withstand the lightning strikes here, his physique would be improved a lot!

The power of lightning that Han Fei had sensed was equivalent to that of an advanced peak-level Venerable.

Perhaps the direction given by the Vast Ocean Navigator was a place suitable for Han Fei to cultivate. Therefore, as soon as he came out, the old turtle wanted Han Fei to find a safe place.

Han Fei also needed the old turtle's help. He couldn't help but ask, "Old Yuan, are you going to use Gui Sanqing's body from now on? It seems that its potential is not great, right?"

The old turtle said, "Before I meet the most suitable Turtle Clan, I'll have to use it. Otherwise, if I really go to the outside world, won't I be at the mercy of others? I also have a way to quickly cultivate. In the future, when I find a Turtle Clan with greater potential, I can possess them."

The corners of Han Fei's mouth twitched. He was indeed a devil! This old turtle always wanted to possess other people's bodies...

However, in terms of cultivation speed, possession was indeed the fastest.

Of course, Han Fei knew that possession was not without risk. Other people's bodies were ultimately other people's bodies. If possession was so useful, then immortality would be a joke, and the Longevity realm would be meaningless...

Half an hour later, Han Fei braved the lightning along the way and sent the old turtle to a place whose lightning power was only at the level of an intermediate Venerable.

Boom Boom Boom ~

As soon as the old turtle came out, he and Han Fei were bombarded by hundreds of bolts of lightning
Buzz!

After a few breaths, the old turtle returned to its original form.

An array appeared on the turtle shell.

Then, as if attracted by the turtle shell, many lightning bolts struck the turtle shell, and the old turtle seemed to be relieved. Seeing this scene, Han Fei's eyelids twitched. As expected of an emperor.

Gui Sanqing's body was only at the Half-Venerable level, but it had reached the peak of the junior Venerable not long after it was possessed by the old turtle!

At this moment, the old turtle was swallowing lightning crazily. This growth speed was probably not slower than his!

Ignoring the old turtle, Han Fei said, "I'm going to cultivate until I reach the peak."

One month passed.

He went nearly 20,000 kilometers deep into the Lightning Prison. There were thousands of lightning strikes here, and spirit gathering arrays that kept popping up and disappearing like raindrops.

Under the lightning strikes at the peak-level Advanced Venerable level, Han Fei's body surged with countless electric currents, and the flesh on his body scabbed and fell off again and again.

The surrounding Spirit Gathering Arrays maintained the supply of spiritual energy, supplying the consumption of Han Fei's body during the baptism of lightning. In fact, half a month earlier, Han Fei's body had almost been repaired, and he was almost at his limit.

In fact, the lightning in the Lightning Prison was very different from the lightning that fell from the sky.

For example, when Han Fei deduced the Void Fishing Art, the power of lightning contained the power of the Great Dao.

In a sense, it was a much weaker heavenly tribulation.

However, the lightning in the lightning domain lacked the power of the Great Dao. Therefore, Han Fei spent a whole month cultivating.

Crack!

Hearing a crack, Han Fei suddenly opened his eyes.

At this moment, Han Fei felt that the accumulated power in his body had a vent. It was like a river overflowing, opening a new water channel! The power of a peak-level Venerable was spreading throughout his body!

At this moment, although Han Fei was still bathed in lightning, his flesh, blood, soul, and bones were transforming at the same time.

In other words, at the moment Han Fei broke through to the peak of the Venerable level, his flesh and blood finally caught up with his soul and bones.

At this point, there was only one thing that Han Fei could do: truly unify the three! Let flesh and blood nourish the bones, and let the soul seep into the bones.

This step was also what Ren Tianfei was doing.

Boom Boom Boom ~ After an hour of bombardment, his realm finally stabilized.

Han Fei immediately looked at his personal information.

Owner: Han Fei

Level: 89 (Peak Venerable)

Chaotic Qi: 957

Spiritual Power: 147,211

Perception Range: 50,000 kilometers

Strength: 16,132 Waves

First Spiritual Heritage: Unknown

Second Spiritual Heritage: Unknown

First spiritual beast: Twin Yin-Yang Spirit Swallowing Fish (level 78)

Second spiritual beast: Emperor Sparrow (level 70)

Main Art: The Seventh Level of Void Fishing, Void Descending Art (King Level, Divine Quality)

“Huff “

Han Fei’s eyes glittered.

As he expected, peak-level and advanced Venerable were completely different.

His spiritual power had increased by more than ten thousand, and his strength had increased by 1,500 waves.

What surprised Han Fei was that Little Black and Little White had also grown by one level!

However, this was not the key...

After breaking through to the peak of the Venerable level, Han Fei’s strength soared. Earlier, Han Fei had only narrowly reached the level of a fake king... But now, he had completely reached the level of a fake king, or even stronger. Han Fei was not overjoyed.

Reaching the peak-level Venerable realm was just a matter of course for him.

In fact, the fusion of flesh, blood, bones, and soul should be a matter of course too. Ren Tianfei had once said that when these three were perfectly compatible, he would immediately become a Half-King.

Han Fei looked up, only to see bolts of lightning striking down one after another. He thought to himself, Is there a better cultivation environment than this? Why don’t I try to fuse the three now?

Han Fei immediately sat cross-legged in the Lightning Prison and let the lightning strike down.

When Han Fei tried to invoke the power of the three, he felt that his blood was boiling, his bones were itchy, and his soul was pricked.

“Cough ~”

Han Fei subconsciously coughed, and blood oozed out of his mouth.

Han Fei looked up at the lightning in the sky.

Immediately, Han Fei took a deep breath and said, “This lightning is actually useless for the last step of cultivation?”.

The old turtle who was still in contact with Han Fei said, “The combination of these three powers is disrupted by the power of thunder. You can try it... in your calabash space.”

Han Fei thought to himself, That’s all I can do! This is related to me becoming a Half-King... If it’s possible, I’ll be able to reach the peak-level Venerable and the Half-King realms at the same time!

Creating an array for himself and buying himself three seconds, Han Fei immediately entered Forge the Universe.

Forge the Universe was very quiet at this moment. Only Little Black and Little White were swimming in the pool. The Nine-Tailed Mantis Shrimp and the others had all been thrown into the Corpse Nurturing Ground by Han Fei.

Han Fei could only cultivate with his own resources!

Fortunately, he kept a Sun-Moon Shell from the Zhang family's resources. It was full of spiritual fruits, spiritual spring, and spiritual stones.

Han Fei sat cross-legged again.

A moment later, the feeling came back!

His blood was boiling, his bones were itchy, and his soul felt like being pricked by needles. That feeling was very uncomfortable, and his soul was itchy and painful, making Han Fei almost unable to concentrate...

However, this little pain was still bearable.

This time, without the interference of the lightning strikes, Han Fei finally felt that his flesh, blood, and soul were being sucked and shivering...

During the cultivation, Han Fei didn't dare to move at all.

Han Fei discovered that his Indestructible Body was also undergoing changes. It was as if every inch of it was being polished again... His bones were affecting his flesh and blood with the soul power.

At this moment, Han Fei realized something.

When he finished this step, he didn't need to consume additional energy. His body could be reassembled instantly even if it was shattered!

Yes, reassembly, not rebirth!

This was clearly different from the Blood Rebirth of a Venerable.

In terms of being reborn with a drop of blood, after he mastered it, he could be reborn with every drop of flesh and soul, unlike ordinary Venerables who needed to hide the power of rebirth in a wisp of soul and flesh.

rec

Besides, Han Fei's recombination was a recombination where all his body parts could sense each other even if they were thousands of kilometers away! In a battle, unless the opponent crushed his flesh and bones bit by bit, it was impossible to kill him.

Of course, although this recombination ability was much more powerful than Blood Rebirth, if his opponent was much stronger than him, he still couldn't escape the opponent's suppression.

Therefore, this technique wasn't invincible.

However, this method greatly ensured Han Fei's survival rate.

After a long time, Han Fei suddenly had a strange feeling as if one of his finger bones could escape from his body. Han Fei suddenly woke up.

"Huff!"

Han Fei immediately looked at his finger bone. With a thought, a bone popped out of his right finger.

Han Fei felt that his consciousness could be completely injected into this finger bone.

At the same time, Han Fei also felt that this finger bone seemed to be indestructible!

At this moment, the old turtle suddenly said, "It seems that you've understood the true meaning of cultivation!"

Han Fei was stunned. "What do you mean?"

The old turtle said, "It can be said that this is the longest time you are immersed in cultivation in seclusion. For three months, your mind has been completely focused on cultivating..."

"Pfft!"

Swish ~

Han Fei jumped up and widened his eyes. "How long? How long have I been cultivating?"

The old turtle said leisurely, "Three months! To be precise, three days and three months."

Han Fei: "..."

Chapter 1665 Half-King

When Han Fei heard the old turtle say that he had been in seclusion for three months, he was dumbfounded. He thought that it would take him half an hour at most, but three months had passed? Are you kidding me?

Han Fei said with a black face, "Old Yuan, are you sure you didn't lie to me? Did I really cultivate in seclusion for three months?"

The old turtle said, "Of course. However, only less than six days have passed in the outside world."

Han Fei was shocked. Even if he was in Forge the Universe, so what? It took him three months to polish a section of a finger bone? It was just a section, not a whole finger stone! How long would it take to polish all the bones in his body?

According to this speed, it would take him 52 years to polish all his bones!

In an instant, Han Fei understood why Ren Tianfei stayed in the Central Holy City every day... Because this guy was polishing his bones. God knew how long he had been polishing his bones.

Logically speaking, Ren Tianfei's talent should be weaker than his. After all, Ren Tianfei didn't have an emperor's Great Dao as his meridian. Even he needed 52 years to cultivate from a peak-level Venerable

to a Half-King. Then, it could be imagined that it would take others several hundred years to cultivate the Indestructible Overlord Body!

“Hiss!”

Han Fei gasped and then looked at his resources.

However, his eyelids twitched. He had consumed about 2% of his resources. In order to refine a section of a finger bone, he consumed as much as 2% of his resources?

Gulp!

Han Fei swallowed. The last step of the Indestructible Body must be very powerful! If a finger bone consumed so many resources, how much power would it increase? When Han Fei took a closer look, he found that his strength had increased by 10 waves.

Yes, Han Fei saw it right. He spent three months polishing a section of an Indestructible Finger Bone and increasing his strength by 10

waves.

Han Fei frowned.

Was this number small? In fact, no.

If the power of a small piece of finger bone could increase his strength by 10 waves... Then, after the whole body was tempered, his strength would increase by 2,000 waves at least!

With his current strength and the power of 2,000 waves, he could almost sec-kill all power-type Half-Kings.

Han Fei was slightly surprised. Anyway, the battle in the Water-Wood World hadn't started yet... Why not give Luo Xiaobai and the others more time?

The communication between the Yin-Yang World and the Water-Wood World was definitely a process for the strong masters on both sides to grow rapidly.

Just like when he first came here, if he hadn't remembered to transcend the tribulation and explore in the outer sea, he would definitely have gone to the human beings of the Flying Feather Division to learn the bow technique...

At this moment, although the resources on him weren't enough for him to cultivate, he could still cultivate as much as he could! Every time he tempered a piece of bone, his strength would increase by 10 waves! This was also an improvement after all... Besides, in addition to the increase in strength, this Indestructible Finger Bone must have other powers!

Therefore, it wouldn't be a loss if he delayed for a while longer! Besides, three months, in his opinion, was like only half an hour. Why didn't he simply take three months as half an hour?

After thinking it through, Han Fei felt that even if he exhausted all his resources, it would only take him more than three years to complete the cultivation.

Twelve years later, about seven months passed in reality...

Han Fei suddenly woke up from his cultivation.

For him, it seemed that only a few hours had passed.

When Han Fei woke up, he didn't know whether to cry or laugh. With the resources of a whole Sea Swallowing Seashell, plus the resources that he had stored in Forge the Universe, he couldn't even finish tempering his two arms?

Now, Han Fei discovered that one of his arms was very powerful, and his other arm... Oh, no, his other hand was tempered by less than half...

Han Fei couldn't help but ask, "Old Yuan, how long have I been cultivating?"

The old turtle roared, "Less than eight months."

Han Fei: "..."

Han Fei glanced at his information, only to find that his strength had been increased by 482 waves.

"Huh... Wait..."

Han Fei was a little surprised.

His soul power had also increased by nearly 3,000 points.

This surprised Han Fei. Not only did the cultivation of the Indestructible Overlord Body not consume the power of the soul, but it could even improve it so much!

Ka ka ka ~

Han Fei subconsciously clenched his fists, only to hear a crisp sound.

After the joint movement, Han Fei felt that his arm was extremely powerful now!

Han Fei was silent for a moment and was surprised. "I fused a lot of soul power into my bones. Is it the soul power?"

off, but no blood flowed out. The arm floated in the air, but he could still control it.

Han Fei flexed his fingers and clenched his fists.

It felt like his arm had never left his body.

"Huh! The body disassembling technique? How did you cultivate the body disassembling technique? Is your body already so strong?"

The old turtle was stunned. Although he knew that Han Fei was in seclusion, he didn't know what Han Fei was doing.

At this moment, the turtle couldn't have looked

Han Fei was also puzzled. "What do you mean by the body disassembling technique?" The old turtle said, "Generally speaking, this is a great technique that only body refiners can practice. And to practice

it, one needs to be at least a king, and not a new king... Only a king who has had a lot of related experiences can practice it! After practicing this technique, one's physique will be extremely strong and it'll be extremely difficult to kill him."

Han Fei raised his eyebrows. "Really? I'll be happier if you say only an emperor can cultivate it. I thought I had got some awesome technique..."

In fact, Han Fei thought to himself, That's right. No matter how strong the Indestructible Overlord Body is, it's still a body-tempering technique at the Venerable level. Can it be stronger than a king-level body-tempering technique?

Although he said that, Han Fei was still quite excited. At least, he had mastered a king-level technique! When he really reached the Sea Establishment Realm, he would be much stronger than others!

Buzz!

Han Fei left Forge the Universe and reappeared in the Lightning Prison. He had no choice. His resources were exhausted, and he had to come out...

If he had known this, he wouldn't have given all his resources to Luo Xiaobai! He had thought that these resources weren't very useful... He didn't expect that he could continuously break through to the peak of the Venerable realm and the Half King realm!

It seemed that no matter what, he needed to prepare enough resources.

Han Fei was not in a hurry to find the old turtle. Instead, he took out the Nine Palace Luck Ruler and the marker began to spin. A moment later, when the marker fell on "Greatly Ominous", the corners of Han Fei's mouth twitched. It seemed that robbing the White Shell Royal City was a bit difficult!

However, since it was "Greatly Ominous" not "Impasse", it meant that he still had a chance...

Han Fei couldn't help but smile. It seemed that the chess piece that he had buried was about to take effect!

A moment later, when Han Fei found the old turtle, he found that the old turtle was two thousand kilometers ahead of where he was before. The old turtle's strength had reached the intermediate Venerable level from the peak of the junior Venerable level. Also, it seemed that he would make another breakthrough soon!

Han Fei asked in shock, "How can you cultivate so fast?"

The old turtle said, "Is it fast? My secret technique of swallowing energy is not a joke. It's just that Gui Sanqing's talent is too poor. If my original body were here, with this space, my strength would have recovered to the peak of the Venerable realm."

Han Fei curled his lips. "Okay, stop bragging. Let's go. I'm going to the White Shell Royal City to do something."

"Cough, cough ~".

The old turtle asked in surprise, "White Shell Royal City? How did you go there?"

Han Fei smiled. "Make a guess?"

The Lightning Prison, in Han Fei's view, was a place of pure cultivation.

Han Fei had no intention of going further.

Han Fei's current goal was the White Shell Royal City! Of course, it was not to cause himself trouble...

A moment later, Han Fei braved the lightning and came to the edge of the Lightning Prison under the guidance of the Vast Ocean Navigator. The entrance to the White Shell Royal City was here.

The forbidden-level trial ground couldn't be opened until it was reviewed. Only when a Heavenly Talent wanted to enter the city would the city be opened.

Buzz!

Han Fei activated the Twin God Techniques.

The probability of Han Fei being discovered was extremely low now when he used the Twin Divine Technique.

Unless it was the White Armored Emperor himself on the other side of the entrance... It was difficult for anyone to find him.

Even if the other party was Hai Tinglei, he wouldn't be able to discover Han Fei.

Buzz!

Han Fei's black-mist body quietly disappeared into the entrance.

Han Fei was relieved to see that nobody was guarding this place.

It seemed that nobody was guarding the forbidden-level trial ground!

Han Fei looked at the most difficult of the four forbidden-level secret realms in the White Shell Royal City, the Godfiend Sea secret realm.

Yu Tianxin once told him that the Godfiend Sea might be connected to the Wall of Death.

He said that the seal was damaged and then repaired by the White Armor Emperor. A big demon tried to rush out but was killed by the White Armor Emperor.

"Haha, since I can't break the seal of the forbidden area and enter the White Shell Royal City from inside... Then, I'll let you open this passage from outside!"

With this in mind, Han Fei didn't even use the Nine Palace Luck Ruler and directly entered the Godfiend Sea secret realm.

For Han Fei, he knew very well what was inside the Wall of Death.

With Han Fei's current strength, he wasn't afraid of beating the Black Evil Conch King.

Could a mere Godfiend Sea do anything to him?

Chapter 1666 Godfiend Sea

Godfiend Sea.

This trial ground should correspond to the Explorer realm. As a place personally sealed by the White Armored Emperor, it shouldn't be simple.

When Han Fei entered this so-called Godfiend Sea, he was surprised to find that this was clearly the Raging Sea in the cage!

Yes, this turbulent sea area was filled with chaotic spiritual energy and energy, accompanied by the scourge of the Desolation Water. Generally speaking, it was difficult to survive here unless one was an Explorer. Just

like in the Immortal City, the humans needed to set up a large guardian array on the island they lived on.

Han Fei spread out his senses and didn't find any creatures. If it was just the Raging Sea, this place couldn't be a forbidden-level secret realm.

What was slightly better than the Raging Sea was that the spiritual energy here was more sufficient, about five times more.

Han Fei saw many arrays in this area. He was surprised to find that these arrays were all absorbing energy like spirit gathering arrays.

Swish!

Suddenly, Han Fei slightly tilted his body and felt a force brushing past him. What entered Han Fei's eyes was a space crack.

However, this was clearly different from spatial cracks. After all, this power flashed past Han Fei, which meant that it was actively attacking Han Fei!

"Fuse!"

In the secret realm, Han Fei was not afraid of being discovered by the White Armor Emperor.

However, after the fusion, Han Fei was surprised to find that there seemed to be invisible shadows appearing in the void. Furthermore, these shadows were all strange-shaped.

Swish! Swish! Swish!

Something weird suddenly jumped at him like a bolt of lightning.

In Han Fei's eyes, this gave him a familiar vibe. At this time, in front of Han Fei, several invisible shadows appeared at the same time, and there were thick and thin spatial cracks appearing beside Han Fei.

However, the power of these space cracks wasn't very strong.

Han Fei flicked his finger and bounced off an invisible figure.

As soon as the black shadow bounced away, Han Fei saw a big horn-like thing stabbing at him. And in the real world, a space crack that instantly appeared slashed at Han Fei.

“Huh?”

Han Fei suddenly thought of something and said in surprise, “Old Yuan, why do I feel that... this is the combat style of the Unicorn Rhinoceros? And the one just now... is a bit like the Thunder Leopard’s Thunder Soul

Claw.”

As soon as Han Fei said so, he twisted his body slightly and stomped, and a Coiled Turtle Array appeared.

Clang! Clang! Clang!

Han Fei looked back and found that hundreds of cracks appeared at the same time. This technique was exactly like the Monkey King’s Three Thousand Stick Technique!

Immediately, Han Fei seemed to have discovered something. This Demon Sea was probably connected to the territory of the Demon Beast Union in the cage.

However, for some reason, this Godfiend Sea and the people on the other side seemed to be separated by an invisible space film. Both parties seemed to only sense each other and could attack... However, they

couldn’t see each other.

The old turtle said, “You might be in an overlapping space. It seems that someone is right next to you... You can sense him, but you can’t see him... You can only attack each other through the space cracks.”

Han Fei asked in surprise, “If there is a problem with this space, will it be broken?”

The old turtle shook his head and said, “Theoretically, it won’t. It’s like two pieces of fish skin stuck together. The space here is thicker than the space in other places and not easy to break through. This White Armor

Emperor used this overlapping space to absorb the power of the other space for his own use... He’s quite a genius.”

The corners of Han Fei’s mouth twitched. Genius? He just stole something through space...

However, Han Fei had to be cautious.

It hadn’t been long since he left the Demon Beast Union. Now, he was surprised to find that the Demon Beast Union actually had a space overlap with the White Shell Royal City... How could he not worry?

The White Armor Emperor was a real king. If he could really break into the cage from here, who could be his opponent in the entire cage?

Therefore, with a thought from Han Fei, the Infinity Water floated out, and thousands of blades began to cut the water.

On the other side.

In a forbidden area between the Demon Beast Union and the Forest of Terror, a group of demon beasts was shouting.

Arhinoceros roared, "Not good! Someone is here! It must be a monster from the outside... Thunder Leopard, go to the island and inform the experts to come."

An ape screamed, "This man is extraordinary. He didn't even move when we attacked him together... It seems that we can't hurt him at all..."

A little wolf shouted, "Look, there are more space cracks here... Is the person on the other side trying to break out of the cage?"

"Wait a minute ~"

The ape roared, and all the beasts gathered together, only to find that the spatial cracks kept producing and a line of words appeared in the void.

It read, "I'm the Bull Demon King. Tell Little Thunder Leopard to find Old Sheep. Hurry up!"

Instantly, the demon beasts were stunned.

The Bull Demon King was very famous!

He killed seven sea demon Venerables in a row, which shocked the entire Demon League. Who didn't know this?

The little wolf said, "Is this guy a swindler? Why is Grand Venerable Bull Demon King on the other side of the cage?"

The rhinoceros pondered and said, "How did he know Thunder Leopard? He can't see us, can he?"

The ape said, "If he is an outsider, he shouldn't know Venerable Sheep, right? Is he really the Bull Demon King?"

The Thunder Leopard said, "Whatever, I'll go back and call for reinforcements. With Venerable Sheep's extraordinary means, he can definitely tell who this person is."

On the Ten Thousand Beast Island.

Sheep Shenji stood on the platform of the Grand Splitting Canyon, looking into the distance.

This was Sheep Shenji's inherited habit, looking into the distance...

Suddenly, a lightning bolt cut through the sky. It was Venerable Thunder Leopard.

Bear Handsome roared, "Lightning! Why are you running?"

Lightning said, "Old Sheep, there's news about the Bull Demon King. He seems to have left the cage."

"What?"

"Huh?"

"What happened? Lightning, make yourself clear."

"What? Didn't he go to the Immortal City?"

The old sheep was also dumbfounded. Why didn't I calculate anything?

Lightning said, "I just got the news from the space valley... Someone appeared in that place again. This time, it's suspected to be the Bull Demon King. He even asked for a meeting with you."

Fierce Lion shouted, "Seriously? Aren't there enemies in the space valley?"

The old sheep thought of something. "Let's go and take a look."

Two hours passed.

When Sheep Shenji and a group of Venerables came to the space valley, Han Fei's heart stirred. He saw some people coming.

Pinching his fingers to calculate, Han Fei grinned. Infinity Water stirred the void, and words appeared in the cage. "Old Sheep, it's me."

Everybody gasped.

Niu Dali carved words first. "Can you see here?"

Han Fei replied, "You're Niu Dali. I can see you vaguely... If I've guessed right, Fierce Lion and Bear Handsome are here too."

Fierce Lion was about to write when Bear Handsome shouted, "Come on, ask him how to get out..."

With two bangs, the two of them were slapped away by the old sheep.

The old sheep's eyes flickered. After a minute, he confirmed, "It's him."

"Huff!"

Bear Handsome said in a hurry, "Then ask him how to get out. Come on."

Fierce Lion roared, "Hahaha! It seems that there is indeed a way out of the cage... Damn it, I don't have to stay in the cage anymore."

However, in the next moment, words appeared in the void.

Han Fei said, "This place is connected to a forbidden-level secret realm of a Sea Demon Royal City outside. There are real kings here. Be careful. In addition, the fake king of the Forest of Terror has died, and 36

Venerables have died. You can try attacking them."

The people on the old sheep's side looked at each other in shock. Are you kidding me? If there was such a big commotion in the Forest of Terror, how could we not know?

The old sheep trembled and secretly calculated.

After about a minute, he suddenly opened his eyes. "It's true! The fake king of the Forest of Terror has indeed disappeared."

"What?"

The others all exclaimed.

The four major powers were called the four major powers because each party had a fake king!

However, the old sheep continued, "However, the Forest of Terror is easy to defend but difficult to attack. Their fake king has never been of much use. Those few Half-Kings are already a headache."

Old Sheep wrote, "How did you get out?"

Han Fei said, "It's a long story. By the way... I need you to do me a favor later. I'll lure the king of the Sea Demon Royal City over. I need you to confront him for a while and create a chance for me. Remember, stay far

away. Once you attack, escape. You're no match for the king!"

"Okay!"

Buzz!

Han Fei simply collected the Infinity Water.

Although he could chat here, he couldn't open the cage yet.

Besides, stirring the void in the Godfiend Sea was also a risk. If he attracted the White Armored Emperor's attention and was discovered by him... he wouldn't be able to escape!

After Han Fei disappeared.

iu Dali frowned. She was only an intermediate peak-level Venerable. She didn't have much say on this matter.

Fierce Lion shouted, "Old Sheep, why didn't you ask me how we can get out?"

Bear Handsome also said, "Old Sheep, since we've confirmed that the man is the Bull Demon King, why did you finish the conversation so quickly?"

Old Sheep said unhurriedly, "The Bull Demon King must've taken the risk to talk to us... Besides, it's useless to ask him now. When we can get out, we can all go out. Okay... Niu Dali, retreat. Fierce Lion and Bear

Handsome are with me. But if anything goes wrong, retreat first. Let me see how powerful a sea demon king is..."

Chapter 1667 Taking the White Armored Emperor's Treasure

Han Fei didn't expect that he could talk to people in the cage here.

Of course, this kind of conversation could only be done by the strong. Those who were weak couldn't cut the space here through the void cracks, let alone cut them into words...

After informing the old sheep, Han Fei stopped communicating. After all, cutting the void would damage the surrounding arrays.

In the end, Han Fei sneered. So the Godfiend Sea was not as dangerous as he thought. Perhaps, in the beginning, there might really be strong masters in the cage trying to escape from here. However, as the cage seal

was continuously being strengthened, this possibility became extremely low.

This Godfiend Sea was indeed dangerous and challenging for explorers. Perhaps the White Armored Emperor cultivated here when he was weak.

Although they couldn't see each other through the space barrier, it was easy to judge whether the opposite part was an enemy or a friend... For example, Old Sheep could calculate it. Therefore, the sea demons that

appeared in the Godfiend Sea would only be besieged by countless demon beasts of the Demon Beast Union...

When Han Fei was in the Demon Beast Union, apart from staying on the Ten Thousand Beast Island, he had only stayed in the Life-and-Death Gorge. At that time, he didn't even take a look at the Forest of Terror, so he

didn't know that there was a space valley!

Thinking about this strange space, Han Fei suddenly remembered the multidimensional space theory. It was said that space was actually a way of stacking the universe strings. You thought you were lying on a large

lawn, but this place might actually be a busy market or a battlefield...

It was useless to think too much. Han Fei was now thinking of a way... to enter the White Shell Royal City!

After chatting with Old Sheep, Han Fei had already come up with a plan. He could use Old Sheep and the others to attract the attention of the White Armored Emperor, and then he would have a chance to plunder the

White Shell Royal City...

There were many ways to break the seal on the array, so Han Fei certainly couldn't break the array left by the White Armor Emperor himself.

There was so much violent energy here that it was easy to guide it to corrode one or two of the core arrays here. Once the array was damaged, the other arrays would be unstable and broken. Therefore, he just needed

to destroy some of the arrays.

Han Fei reached out and grabbed, stirring the Desolation Water in this space.

Han Fei kept brushing the array seal with the power of the Desolation Water. After a while, with buzzs, the space trembled.

Buzz!

Seeing this scene, Han Fei knew that it was enough. He immediately activated the Twin God Technique and left his black fog body outside.

Han Fei stepped out of the Godfiend Sea and appeared at the crossroad of several forbidden-level secret realms.

Sure enough, only two seconds after Han Fei came out, the void trembled, and a man in a silver battle suit appeared. It was none other than the White Armor Emperor.

The White Armor Emperor didn't find Han Fei lurking on the stone wall. He stepped into the Godfiend Sea directly.

In the next moment.

With a buzz, the entrance to the forbidden-level secret realm was opened, and Hai Tinglei appeared. Following him were two advanced Venerable-level sea demons.

One of them asked, "Grand Venerable Tinglei, what happened?"

Hai Tinglei looked straight at the Godfiend Sea ahead and said, "The king is here... Come with me into the Godfiend Sea."

However, what he didn't know was that when he led his men to the Godfiend Sea, Han Fei had secretly left through the seal.

After leaving the forbidden-level trial field, Han Fei could truly fly freely...

At the first moment, Han Fei issued an order in his heart and activated the Vast Ocean Navigator.

After a while, Han Fei found a mountain in the White Shell City and found an undersea volcano that was covered in rock fire.

There, a huge shell was nesting in the cave. And the direction the Vast Ocean Navigator pointed at was in the huge shell.

Han Fei secretly cursed. Why did you set up a seal on your own home?

The reason why Han Fei went to the White Shell Royal City was to loot their treasure trove... Who could have known that the White Armored Emperor would seal the treasure trove?

With this seal, as long as Han Fei broke through it, even if he snatched the White Armored Emperor's treasure, he might be caught and killed.

While Han Fei was hesitating, the old turtle suddenly roared, "Turtle Shell Sky Sealing Technique."

Instantly, this space was sealed. Although it looked normal, what happened here couldn't be sensed from the outside world anymore.

The old turtle said, "Be quick."

To be honest, Han Fei had never visited a king's cave before. Taking this chance, he must snatch all the White Armor Emperor's treasure! But the old turtle really impressed him this time.

The moment Old Yuan took action, Han Fei activated the “Knock on the Heavenly Gate”, piercing through the seal top down. Han Fei’s current strength had already reached the top of both the Yin-Yang World and the

Water-Wood World below the king realm!

The White Armor Emperor was powerful, but he never expected that someone would rob him of his treasure when he was away from the city...

Breaking the seal with a spear, Han Fei used the Near at Hand Technique...

Han Fei was surprised. The giant shell was still alive?

Han Fei had no time to think. He simply transformed into a white mist and quickly entered the shell, and his black-mist body chose to retreat immediately.

When Han Fei landed in the shell’s mouth, he found that he had entered a small world.

This small world was hundreds of kilometers wide. This size stunned Han Fei!

In this small world, countless resources were placed in an organized way...

There were places where high-quality demonic stones and ultra-quality demonic stones were stored; there were tons of weapon materials, which were at least high-quality Divine-level materials; there were spiritual

springs...

Just like his Forge the Universe where the spiritual spring was made into a river, the Spirit Awakening Fluid also filled a big pool. In addition, there were various kinds of spiritual fruits, which were piled up like

mountains.

In fact, there were many things here of no use to the White Armor Emperor. Most of them should be used to reward his subordinates.

The old turtle’s first reaction was, “Hurry up, take away all the demonic heritage essence. This thing is as valuable as the Earth Vein Spring Water. Not only can it restore vitality, but it also contains a lot of Chaotic Qi.”

This pile probably weighed a million kilograms.

“Wow, it seems that there are good things in the wasteland!”

Han Fei didn’t ask what the demonic heritage essence was at all... Where Old Yuan pointed to, where he popped up and stuffed all the demonic heritage essence into the Forge the Universe.

Then, ultra-quality demonic stones, high-quality demonic stones, Spirit Awakening Fluid, Divine Weapon materials, spiritual spring, cultivation techniques, spiritual fruits, weapons... Anyway, Han Fei was frantically

stuffing everything he could into Forge the Universe.

Although it was quite enjoyable, Han Fei was still lost for words. This hundred-mile area was too big! Even though he was very fast, he only collected less than one percent of the resources here in a hundred seconds.

When he saw the old turtle roll up countless resources with a black fog and run into Forge the Universe, Han Fei summoned a void hand and kept grabbing...

Han Fei also discovered that the old b*stard, the White Armored Emperor, had cut a large piece of the Blood Sea Divine Wood branch and stored it here.

Godfiend Sea.

When the White Armor Emperor appeared, he could vaguely see a figure standing on the other side of this space.

This wasn't the first time the White Armor Emperor met these people. However, they were hostile from the beginning and he couldn't chat with them at all.

He also tried to break through the space here... However, even if he broke through the void with the power of a king, he still couldn't break through this space. Instead, he would be shaken by the power of the void.

The White Armor Emperor had tried for hundreds of years here but still failed to break the seal.

However, it was not like he had gained nothing here.

A tremendous amount of violent energy would continuously gush out of the void here. The more this energy accumulated, the more intense the energy in this Godfiend Sea would be. Harvesting the energy here once

every few hundred years, it was greatly beneficial to his realm before becoming a king.

Even people like Hai Tinglei and Changshui Qin didn't know that before the White Armored Emperor became a king, he relied on the power of the Godfiend Sea to grow rapidly...

At this moment, Hai Tinglei stood respectfully behind the White Armored Emperor and said, "My king, there seems to be someone in the depths of the void, and he is quite strong."

The White Armor Emperor said indifferently, "Yes! But this space can't be broken. The reason why they appeared should be that the seal has aged... It seems that I need to repair it for a while. It will be done soon."

But when the White Armor Emperor was repairing the array, he saw words appear in the void. "How dare you absorb the spiritual energy of my world? Don't let me find a chance to break the seal... Otherwise, I'll kill

you."

This was the first time Old Sheep took the initiative to talk to the White Armored Emperor. He had seen it more than once.

However, Old Sheep knew very well that the White Armor Emperor was an enemy, but the White Armor Emperor didn't know.

This time, the old sheep pretended to be a king. The words he wrote made the White Armored Emperor narrow his eyes.

Seeing these words, Hai Ting frowned, and the White Armor Emperor snorted and pointed his finger at the void. "Then I hope you can break the seal soon!"

The repairing speed of the array wasn't slow, or to be exact, it only took half an hour.

In the cage, Bear Handsome was still talking. "Old Sheep! we just need to... say a few words like this? Didn't Brother Bull ask us to hold him off... so that he can do something big?"

The old sheep said leisurely, "It's almost about the time. If we continue to hold him off, he will be suspicious. Then we'll have to fight him... Do you want to fight a king?"

Bear Handsome said, "But we've never fought a fight! What if we can last two rounds?"

The old sheep said indifferently, "How many rounds can you last in my hands?"

Bear Handsome scratched his head. "Well, forget it... After all, half an hour has passed. It should be enough."

In the White Shell Royal City.

The White Armored Emperor left the Godfiend Sea and said to Hai Tinglei, "For some reason, the other party's experts are paying attention to the Godfiend Sea. Arrange for someone to stay here and check in every

once in a while to prevent any accidents."

Hai Tinglei cupped his hands. "Yes!"

As they talked, they left the forbidden-level trial ground.

The moment the White Armored Emperor left the Godfiend Sea, his face suddenly changed.

In an instant, he appeared above the volcano. Behind him, a giant shell appeared and closed.

"How dare you! Who dares to break into my residence?"

Chapter 1668 Lurking

Han Fei kept collecting the resources...

At first, Han Fei used the absorption power of Forge the Universe. Later, he cooperated with the old turtle and grabbed the resources with the void hand... Then, he used the Sea Quelling Painting to store them in the

Sea Quelling Painting!

After Han Fei looted ninety percent of the resources in this place, he thought to himself, The White Armored Emperor is not back yet? I have to leave quickly!

Therefore, Han Fei punched the shell, intending to blow it away.

However, Han Fei discovered, to his shock, that his power disappeared from this space without causing any damage to this giant shell.

The old turtle said, "It's a space-type living shell... This is a large Star Shell. For ordinary void shells, they will only die when the small world or space in them collapses... You can only crush them with a space technique! Normal power doesn't work on them."

"Is this the Star Shell? Can it be taken away?"

The old turtle: "..."

The old turtle said leisurely, "Yes, but only when you are outside."

Han Fei was speechless. "Then why did I come in when I was outside? I could've just moved the whole shell away."

The old turtle sneered. "How can it be so simple? To take away a Star Shell... First of all, you need to master a certain space technique to grab its original body out of the void. Secondly, if you want to use a Star Shell,

you have to make it recognize you as its master."

Of course, if he just wanted to destroy it, he could detonate the remaining spiritual spring and demonic stones here. Although it might not be able to destroy this small world... the huge explosion power could damage

this small world and prevent it from continuing to grow.

Han Fei smiled. "Can a small world be damaged?"

The old turtle said, "Even the Origin Sea can be shattered, so why can't a small world? To put it bluntly, if you were in the King Realm, it wouldn't be difficult for you to take away this Star Shell... Unfortunately, you

aren't a King, so you can only come in to snatch the resources. Besides, this Star Shell isn't alive. It contains a wisp of the White Armor Emperor's essence blood and soul, but it was covered by my Turtle Shell Sky

Sealing Technique. Otherwise, the White Armor Emperor would have known it."

Han Fei immediately sneered. "Blow up one Star Shell? That's not appropriate. With so many resources, I should blow up the entire White Shell Royal City!"

Han Fei chatted with the old turtle while collecting some scattered resources.

At this moment, Han Fei's black-mist body had found a protective umbrella, and he could leave at any time.

Suddenly, the old turtle said, "The White Armored Emperor is back."

Han Fei threw out a mass of spiritual spring and detonated it.

Although Han Fei couldn't take the Star Shell away, there were still some residual resources here. He couldn't leave them to the White Armor Emperor!

The moment the White Armor Emperor left the forbidden-level trial field, he came to the Star Shell, destroyed the Turtle Shell Sky Sealing Technique, and rushed into the Star Shell in the next second.

However, as soon as he entered, there was a violent explosion, and a phantom dissipated in this world.

"Thief, leave your life!"

Bang!

"Shell Shakes the World! Void Barrier!"

Han Fei thought that he was fast enough!

From the moment the old turtle said that the White Armored Emperor was back, Han Fei only detonated the spiritual spring, but the White Armored Emperor caught up with him.

Fortunately, at that critical moment, the White Armor Emperor failed to really seal him.

Bang!

A loud noise echoed in the White Shell Royal City.

Almost at the same time, everyone looked at the void.

The White Armor Emperor's voice echoed in the void, "Hai Tinglei, seal the entire royal city immediately. No one is allowed to leave the city."

The White Armor Emperor was angry.

He only caught a glimpse, but unfortunately, he didn't see anyone.

He was a king, but someone had stolen his countless treasures and detonated tremendous resources right under his nose!

As a result, the Star Shell was in a mess, and only less than 1% of his resources that he had accumulated for tens of thousands of years were left!

Even a king would go crazy, right?

On the other side.

After a lot of difficulties and going through several masters, Yu Cailing finally broke through the barrier of the Law Enforcer realm and became an Explorer with the technique left behind by the Fish Dragon King.

Yu Cailing, who had reached the Explorer level, could immediately find a new master.

However, when she reached the Explorer realm, she could have more choices. In this realm, she could explore outside or continue to cultivate in the royal city.

For example, Lan Xue'er, who was with Yu Cailing, also made a breakthrough to become an Explorer with the resources left behind by Han Fei. However, her resources were not as good as Yu Cailing's, so she chose to

continue looking for masters...

And for sea demons, your master could almost own you and could do whatever he wanted to you.

Lan Xue'er was used to it.

But Yu Cailing not. She had several masters because she was unwilling to cooperate.

Fortunately, she could be said to be talented in this realm.

It couldn't be said that she was very talented, but many people knew her. At this moment, Yu Cailing had basically settled in the royal city.

Now Yu Cailing had nothing to worry about after the Fish Dragon King died.

As long as she cultivated slowly, with the cultivation method left behind by the Fish Dragon King, she might not be able to become a Venerable, but it was completely possible for her to become a peak-level Explorer or

even a Half-Venerable!

At this moment, Yu Cailing had just returned home from the trial field when Lan Xue'er came to visit.

Yu Cailing was puzzled. "Xue'er, didn't you go to the trial?"

Lan Xue'er chuckled. "Sister Cailing, all you know is cultivation... In fact, sometimes being flexible is a good choice. I'm here to tell you that I'm about to break through to be an intermediate explorer!"

"Huh?"

Yu Cailing looked at Lan Xue'er in shock. "So fast?"

Yu Cailing smiled charmingly. "You know... half a month ago, my master explored a secret realm and got a lot of benefits. He gave me some of them, which worked very well."

Yu Cailing narrowed her eyes and said, "Humph! Your master is not a good person."

Yu Cailing said, "Sister Cailing, that's all a man can think about. In fact, we're not exactly beautiful. It's difficult for us to really rise if we don't try our best to improve ourselves. By the way... I heard that another war

broke out on the front line! A brand-new human race appeared on the Cloud Sea Divine Tree... a rather ugly human race. When the war breaks out, my master may have to join the army. It's definitely much better to

stay with a Heavenly Talent than to go to the front line alone!"

Yu Cailing said, "I heard about it. However, no soldier hasn't been recruited yet. I'm going to continue the trial."

"Alas..."

Lan Xue'er heaved a long sigh. "Sister Cailing, you're just a little bit stubborn. If you can sacrifice your body, with your talent, you'll definitely grow much faster than me."

"Got it. You can go back! I'll consider it..."

After Lan Xue'er walked past, Yu Cailing quietly looked at the direction where Lan Xue'er left. After about ten seconds, she let out a sigh of relief, shook her head, and continued to cultivate.

Boom!

A violent explosion resounded throughout the White Shell Royal City.

Immediately afterwards, the White Armor Emperor's angry voice echoed.

"Hai Tinglei, seal the entire royal city. No one is allowed to leave."

For a moment, countless people looked around in panic.

Immediately afterward, a violent earthquake took place in the White Shell Royal City, which lasted for hundreds of seconds.

Yu Cailing, like most ordinary people, went out to see what happened.

Someone exclaimed, "Hiss, it's the king's voice. What happened to make the king so angry?"

Someone was shocked. "Living in the Royal City, we've gotta be careful. Master Hai Tinglei wants to seal the city. He must be searching for something. Be careful. Don't get ourselves implicated..."

Someone sneered. "Who cares what happened? What does it have to do with small potatoes like us?"

What Yu Cailing didn't know was that a shadow was lurking in the shadow in a corner of her residence.

The old turtle said, "This chess piece is still alive... | have to say, you're quite lucky."

Han Fei replied, "You don't understand the tragedy of small potatoes. In order to become stronger and rise, they will try their best to survive... Therefore, I'm not surprised that they survived these trials in the White

Shell Royal City."

Then, Han Fei said, "Old Yuan, it shouldn't be too loud this time... That explosion didn't even blow up the Star Shell!"

The old turtle said, "That's because you took away too many resources... Otherwise, the Star Shell would've been damaged."

Han Fei grinned. "It's okay. I haven't left the White Shell Royal City yet. I'll detonate it again."

The old turtle had nothing to say to Han Fei. He was truly bold! Did he think he had money to burn...

The old turtle asked, "When will this chess piece be used?"

Han Fei thought for a moment and said, "Let's wait! It's best that she doesn't know anything. I can cultivate for a few days while they search the royal city. I'll come out when this matter quiets down. Old Yuan, help me

keep an eye on Yu Cailing. Also, once the White Armored Emperor relaxes, tell me...".

Chapter 1669 Han Fei Appeared

The search in the White Shell Royal City lasted for three months.

Han Fei was lost for words. This White Armored Emperor was even more persistent than human beings.

However, the home of a king had been emptied. How could he not be obsessed?

This time, even a minor character like Yu Cailing was investigated three times, and Yu Cailing's residence was also searched.

The old turtle said that the White Armored Emperor even removed the seal on everybody's residence and scanned it dozens of times himself.

Han Fei felt lucky.

Fortunately, he had a treasure like the Demon Purification Pot that even a king couldn't find. If Yu Cailing didn't know he was hiding here, no one could find him.

Han Fei was still cultivating, but outside, the war between the Cloud Sea Divine Tree and the White Shell Royal City was in full swing. Since Han Fei left the Cloud Sea Divine Tree almost five months ago, the people of

the Yin-Yang World gradually got used to life on the Cloud Sea Divine Tree.

As soon as they went out, everyone used teleportation arrays. Looking at the coordinates on the teleportation array, they could know the direction. The four battlefields were all visited by the humans from the

Yin-Yang Heavenly now.

Under Luo Xiaobai's deliberate arrangement, the human experts led the human Hidden Fishers to rotate the battlefields. At the same time, while learning the Water-Wood World's combat skills, Yin-Yang World also

provided combat skills and teamwork.

In the eyes of Luo Xiaobai and the others, the humans on the Cloud Sea Divine Tree lacked the sense of cooperation.

Even though the people here also practiced the five major professions, perhaps because they had lived with other races for too long, they were unfamiliar with teamwork.

During this period, Yin-Yang World and Water-Wood World had an exchange battle. From a Hidden Fisher to an Explorer, they competed in the arena. In the end, a surprising result came out: Yin-Yang World won the

match of all realms.

Especially the Law Enforcer and Explorer realms, the powerful combat power of the human race was fully revealed.

Unlike the humans in the Yin-Yang World, although there were four battlefields in the Water-Wood World, they still had Queen Life and the Cloud Sea Divine Tree.

However, the people on the Scattered Stars Island only had one island. If they couldn't defend it, they would die together.

Therefore, the determination of the people from the Yin-Yang World that fought to the last person... shocked many people from the Water-Wood World.

It was not that there were no strong masters in the Water-Wood World, but the living conditions on both sides were different. The people of the Yin-Yang World were more aggressive and crazy.

Not only that, on the human side, the disciples of the Thug Academy were also participating in the arena battles. In addition, a large group of descendants of big clans had been raised with a massive amount of resources.

Besides, most of the people who participated in the arena were the elites of the big clans and the seven major sects. If they lost, they would probably be scolded to death...

This battle lasted for more than three months. After only three months, the strong masters of Yin-Yang World appeared in any place on the four battlefields.

On the battlefield, the soldiers of Yin-Yang World were also really brave.

The resources in the Water-Wood World were too abundant. In terms of spiritual energy, they were almost twice as abundant as those in the Yin-Yang World. Besides, as long as one killed an enemy on the battlefield,

all the gains would belong to him. This was different from the Scattered Stars Island. After all, the Scattered Stars Island was more disciplined. Although the spoils of war didn't have to be handed over, they were mostly

used to exchange for the resources one needed.

But in the Water-Wood World, everything was much more free.

After all, there were more races here.

Many people went to the market to exchange for various resources. The four major races of the Water-Wood World, those insects, and the sky race, had accumulated a lot of things!

Therefore, on the street, the people of Yin-Yang World were literally in a shopping paradise.

What? You want to forge weapons but have no materials? Then trade with the insects!

What? You lack spiritual fruits? Trade with the demonic plants!

What? You feel that you don't have enough combat skills? Trade with the human beings of the Water-Wood World for combat skills!

The soldiers of the Yin-Yang World were mainly from the Scattered Stars Island, the Thousand Star City, and the 36 towns.

The people on the Scattered Stars Island had the habit of exchanging resources with the Logistics Division. Over the years, there were fewer and fewer resources in the sea, and they couldn't go to sea at will.

Therefore, their access to resources was actually very limited.

As for the cultivators from the Thousand Star City and the 36 towns, they were either frequent visitors to the Thousand Star Proving Ground or the level-three fishery. Ordinary cultivators in the Thousand Star City

rarely obtained the qualification to go to the small worlds in the Star Beads. Even the children of the big clans had very few opportunities... And how much resources could ordinary cultivators from the 36 towns obtain

in places like the level-three fishery?

Therefore, in the Water-Wood World, these people were like fish in water.

The Dark Battlefield Port, the most dangerous place in the Water-Wood World, now became the residence of the descendants of the big clans. As the saying went, the talented were bold, and some Heavenly Talents

could do whatever they wanted here.

The Fiery Sea had always been a place of challenge. Now it was almost occupied by the Heavenly Talents of the seven major sects. Especially a young swordsman from the Heavenly Sword Sect, he fought ten alone.

Since the people from the Yin-Yang World came, the sea demons of the same realm finally knew that these humans from the Yin-Yang World were indeed very powerful!

The humans of the Water-Wood World had completely accepted the humans of the Yin-Yang World.

The bugs that liked to gossip couldn't help but sigh. The human race of the Yin-Yang World was really powerful!

For example, during a battle in the Fiery Sea, a human from the Yin-Yang World was locked in a pitched battle with a sea demon. In the end, the human was defeated, his body was pierced, and his legs were broken.

Under such circumstances, the man hugged the sea demon and detonated himself!

This scene was very shocking.

These touching scenes completely won the respect of the major races of Water-Wood World.

There was also something commendable about the Water-Wood World.

The bow technique of the human race in the Water-Wood World was very powerful. The combat skills of the various races were also strange and impossible to guard against. Also, perhaps because of the nourishment

of spiritual energy, the Water-Wood World humans were generally faster...

Therefore, this joint operation ignited the soldiers' morale.

The White Shell Royal City kept putting pressure on the front line. At first, the royal city sent 3,000 law enforcers and 100,000 sea demons at the level of Hidden Fishers.

However, the sea demons didn't take the initiative to attack. After all, they found that since the people of Yin-Yang World came, the battle had been intensified. Some sea demons were even speechless.

These beasts

were too damn good at fighting.

Most of the conflicts between the two parties were just tentative.

The sea demons also wanted to know how many humans from the Yin-Yang World had come.

In fact, there were countless strong masters in the Water-Wood World. The 250,000 soldiers of the Yin-Yang World were scattered on various battlefields, but they didn't contribute much to the increase in number.

However, this didn't stop the probing army of the White Shell Royal City. They set up small battlefields again and again, hoping to test the strength of the Cloud Sea Divine Tree... and to see how many human beings

the Yin-Yang World had sent as reinforcements?

Flying Feather Division.

Wushang Xue directly asked Luo Xiaobai, "The White Shell Royal City is provoking us. Should we respond?"

Luo Xiaobai said, "No! This kind of test doesn't have any significance for the final battle. Slow down the pace of the battle and use a year to gnaw away these people."

Wushang Xue was surprised. "In this way, it won't be able to show your role. Perhaps it will enhance the morale of the army of the White Shell Royal City."

Luo Xiaobai said indifferently, "Morale can be boosted soon, but it can also be thwarted soon. Now is not the time to start a large-scale war."

Wushang Xue: "Wait for what? Wait for Han Fei to attack?"

Wushang Xue had long known that the body Han Fei left behind was just a projection or a clone. And this clone had never fought and had been sitting cross-legged.

One year later.

Han Fei had been cultivating in Forge the Universe for a full twenty years.

For a time, he wanted to consume all the Chaotic Qi. However, when he thought that the Chaotic Qi... might be extremely useful for becoming a king, he held back.

Now, Han Fei was not in a hurry at all.

If they didn't fight, it would be a good chance for the people of Yin-Yang World to communicate in Water-Wood World. In this way, it could facilitate the cultural communication of the two worlds.

Han Fei didn't need much time. He only needed another year.

Now, Han Fei's arms had been tempered, and one of his legs was almost tempered.

This speed was extremely fast and consumed a lot of energy. Almost 10% of the energy-type resources he looted from the White Armor Emperor had been consumed.

About three months later, the front line finally asked for reinforcements from the royal city.

Last time, the White Armor Emperor increased the number of soldiers. Han Fei knew that everyone had been seen through by the White Armor Emperor.

Yes, the White Armor Emperor didn't believe that anyone could escape from the White Shell Royal City in such a short time.

He believed that the person who looted him was still in the royal city!

Therefore, Luo Xiaobai and the others thought that the army was testing the power of the Yin-Yang World, but Han Fei knew that it was the White Armor Emperor tempting him to leave!

If he really left, the White Armored Emperor might not necessarily discover him, but Han Fei didn't want to bet on it. He would come out after he became a Half-King.

On this day.

After Yu Cailing returned from the trial, Lan Xue'er came again. She said, "Sister Cailing, I heard that you're going to the front line to kill enemies?"

Yu Cailing nodded. "I feel that my strength has improved greatly, and I need actual combat to achieve a breakthrough in the realm. This time, I heard that 300 explorers, 5,000 law enforcers, and 200,000 soldiers will

be selected... Therefore, the status of each explorer is very important. We can try."

Lan Xue'er immediately said, "Sister Cailing, do you know the situation on the front line? Most of the people who went to the front line died. Although the number of soldiers doubled this time, and there were over 200

explorers more... the soldiers sent over last time were killed in only one year. I'm afraid it won't be much better this time, right?"

Yu Cailing smiled casually. "Xue'er, I'm different from you. People like us have to take a bet!"

After Lan Xue'er left, Yu Cailing was about to get rid of the wild thoughts and enter a cultivation state.

Suddenly, a voice rang in her ears, "Yu Cailing, you will die if you go to the battlefield this time. You'd better stay!"

Buzz!

Yu Cailing was refreshed. She wanted to shout, but her soul trembled and she seemed to be rendered speechless.

"Heh heh, don't make any unnecessary movements. Keep cultivating. I can sense your mental waves."

"Who are you?"

Yu Cailing replied quickly after the initial shock.

Han Fei grinned and said, "Me? I'm the Fish Dragon King! Why don't you remember? The essence blood of you and Lan Xue'er is still in my hands."

Yu Cailing's pupils were constricted. "Didn't you die?"

Han Fei imitated the Fish Dragon King's tone and said, "Die? How can I die so easily? Those are just a show."

Yu Cailing was shocked.

At the same time, she was also desperate!

If the Fish Dragon King wasn't dead, she wouldn't be free. What should she do?

Seeming to know what Yu Cailing was thinking, Han Fei chuckled. "Yu Cailing, don't say that I didn't help you. I can help you make a breakthrough... But you need to tell others that you're going to cultivate in seclusion

to make a breakthrough..."

Yu Cailing was not stupid. Could the Fish Dragon King really be so good? Besides, he suddenly appeared secretly. Did he do something?

At this point, Yu Cailing was horrified. Could it be that... the person the King was looking for... was the Fish Dragon King? What did he do to make the King so angry?.

Chapter 1670 Explosion of the White Shell Royal City (1)

Han Fei's sudden appearance disrupted Yu Cailing's original plan.

Yu Cailing didn't know that Han Fei was the Fish Dragon King, and she thought that the Fish Dragon King was still alive... This situation was very strange!

Even if the Fish Dragon King pretended to die, what was his purpose? Why did he come to her at this time? Just to help her make a breakthrough?

Sure enough, Han Fei said, "I don't care what you're going to do in the future, but in the next two years, you must make a breakthrough in seclusion."

Yu Cailing said, "Master Dragon King, you should know that no matter what reason I have... unless I go out to fight, I have to go to the trial field every month, right? If I don't go to the trial field for four months, it will be

regarded as that I want to challenge a forbidden-level trial field! At that time, the challenge will be compulsory."

Han Fei thought to himself, Damn, how did I forget this?

It was exactly because he didn't know this rule that he entered the forbidden-level trial field...

Han Fei thought of something. "Of course I know. I mean apart from the trials... you'll have to spend all your time in seclusion. Hehe, to avoid some problems, I'll use some means on you."

Yu Cailing felt that a mass of soul had entered her mind. Although her soul tried to resist, she was completely powerless against the terrifying soul.

Yu Cailing was horrified. "Master Dragon King, what are you doing?"

Han Fei said casually, "As long as you're obedient, I can guarantee that you'll make a breakthrough within two years. I can also give you some resources for your cultivation."

"Master Dragon King, what do you want to do?"

Han Fei said, "You don't need to know what I want to do. You just need to know that no matter what I want to do, the only thing you can do is to obey. Otherwise, you will die!"

What can Yu Cailing do?

At this moment, she had no choice but to obey.

She could confirm that the weird soul in her head could easily control her and even kill her. Therefore, she couldn't tell the secret that the Fish Dragon King was still alive and was hiding in her residence!

The only person who cared about Yu Cailing's cultivation in seclusion was probably Lan Xue'er.

During this period, Lan Xue'er came once.

Yu Cailing said that she felt that she was about to make a breakthrough, so she probably couldn't go to the front line to fight. She needed to consider going to the front line after the breakthrough.

Although Lan Xue'er was a little puzzled, she didn't doubt her.

After all, she was too familiar with Yu Cailing. Among the people in the Ice God Strait, only she and Yu Cailing had survived.

Therefore, she cherished this friendship.

The second batch of soldiers left the White Shell Royal City twenty days after Yu Cailing went into seclusion.

On this day, the old turtle said, "The White Armored Emperor still hasn't given up! He personally glanced at everyone who went out today. Although you shouldn't be afraid of being seen by him... this person is quite

meticulous."

Han Fei smiled. "Good lord, so what? Even if I finish my cultivation, do you think I'll leave?"

The old turtle: "..."

Another year later, it was said that there were three large-scale battles between the White Shell Royal City and the Sea Cloud Tree.

Seven or eight Venerables from both sides had died. As for the explorers, more than 300 had died. And hundreds of thousands of ordinary soldiers had died.

During the ninth month of Han Fei's cultivation here, the conditions for entering the White Shell Royal City were relaxed... In addition, a large number of Law Enforcers and Explorers were brought back from the sea.

Obviously, the White Shell Royal City didn't expect that the Cloud Sea Divine Tree would fight so hard this time! More than half of their second batch of soldiers were killed!

This finally made the White Armor Emperor's heart ache.

Han Fei was refining his spine.

In Forge the Universe, 30% of White Armor Emperor's energy-type resources had been consumed .

Han Fei still had his head and seven spines that hadn't been tempered yet!

At this moment, the White Armor Emperor seemed to have given up searching for Han Fei! With the power of the old turtle's soul, they found some information. And this information was that the White Armor Emperor

was preparing to launch a super war.

Generally speaking, every thousand years, the White Shell Royal City and the Cloud Sea Divine Tree would start a great war, mainly to show the strength of the two sides and prove that they were still the overlords of

their respective waters, the strongest enemies of the other party...

This time, the White Armored Emperor was going to mobilize more than half of the people in the White Sea Royal City at once. All Venerables would go to the battlefield. The White Armor Emperor wanted to see by

himself why the Cloud Sea Divine Tree had been growing stronger and stronger in the past two years.

If a war broke out, some people might die.

However, both sides were afraid that too many strong masters would die. Therefore, they would stop at a proper time.

The White Armor Emperor had the same idea this time.

Perhaps, Queen Life just wanted to see... how his injuries were recovering?

Besides, the White Armored Emperor was also wondering if the person who sneaked into the White Shell Royal City this time had anything to do with Queen Life. Or, was that person related to the people on the other

side of the Godfiend Sea?

This time, there were even more people participating in the battle.

Yu Cailing was selected to participate in the battle. After only two months of preparation, the whole army was ready to set off.

But Han Fei still had 11 head bones that hadn't been tempered yet... This made Han Fei very worried, knowing that he had to take action!

Although he was still a little bit away from becoming a Half-King, he definitely couldn't let these people launch an all-out attack.

Han Fei knew that in every big war per thousand years, ten or so Venerables would die.

If it weren't for the suppression of kings, more Venerables would die.

As for the death of ordinary powerhouses, the White Armor Emperor didn't care at all.

Therefore, there would be countless casualties.

Han Fei remembered that Shu Xiaoman once told him that once in a big battle, they were ambushed by a strong master, and nearly a million insects died, losing a lot of Insect Queens, which caused the strength of the

insect race to drop by several levels!

Han Fei thought that there were only 250,000 people here from the Yin-Yang World. If they fought a battle of this level, they would lose at least seventy or eighty thousand!

But these people were all seeded players of the Yin-Yang World. Seventy or eighty thousand dead? This was something Han Fei couldn't accept.

Therefore, Han Fei came out of seclusion.

The old turtle said, "You're still in the royal city. If you attack now, the White Armor Emperor will definitely seal the royal city again. At that time, he won't let you go even if he has to risk his life."

Han Fei grinned and said, "It's not important. As long as he can't catch me, even if I'm trapped here, so what? This is a war of races... I stand on the human race's side and am natural enemies with sea demons. Even if

the White Armored Emperor wants to fight, he has to ask for my permission..."

On this day, Changshui Qin personally presided over the royal city, Hai Tinglei supervised the army, and the two Half-Kings of the White Shell Royal City came out at the same time.

Hai Tinglei ordered, "All soldiers in the White Shell Royal City, gather outside the Sky Trial Ground in half an hour. Anyone who violates the order will be executed."

The Sky Trial Ground was located in the sky above the White Shell Royal City. Basically, it had always been guarded by sea monsters.

As soon as Hai Tinglei issued the order, the entire White Shell Royal City was filled with people, and water marks cut through the seabed and rushed towards the trial field.

Yu Cailing said, "Master Dragon King, I have to go. Otherwise, someone will definitely notice something."

Han Fei smiled. "Wait."

Yu Cailing was scared. What was the Fish Dragon King trying to do?

"Master Dragon King, what do you want to do?"

Han Fei grinned. "Well, it's still too early. Let's wait for half an hour."

In a moment, within a hundred seconds, as many as 50,000 people had gathered outside the training ground in the sky. It must be noted that there were only 100,000 people in the entire White Shell Royal City. Now,

50,000 people had gathered.

There were still people on their way.

More than ten thousand people came one after another. This was the number of soldiers the White Shell Royal City sent this time.

They didn't all go because they were afraid that someone would sneak up on them.

Of course, it didn't matter if the White Armored Emperor didn't care. If he was like Xue Fan, willing to sacrifice the entire Blood Sea Divine Wood City to become a king... if he had the courage, the Cloud Sea Divine

Tree would have long been destroyed!

Suddenly, Han Fei said, "Go! Find Lan Xue'er. Don't blame me for not reminding you. Try to stay close to the strong."

Yu Cailing was stunned, but she didn't think much about it.

In her opinion, no matter how strong Han Fei was, he was only a Half-Venerable now. No matter how fast his cultivation speed was, it was impossible for him to break through to the Venerable realm in a few years.

Besides, even if Han Fei became a Venerable, so what?

Amere Venerable couldn't shake so many Venerables in the White Shell Royal City! Besides, with a king here, Han Fei couldn't do anything, right?

A moment later, Yu Cailing found Lan Xue'er.

Seeing Yu Cailing, Lan Xue'er's master, a handsome Half-Mermaid, grinned and said, "Huh! You made a breakthrough with your own strength? Not bad. However, Yu Cailing, you'd better follow me this time. This is a

great war per thousand years. If you don't have me protect you, you may be sent out to fight..."

Yu Cailing frowned and remembered Han Fei's words that stayed close to the strong. Here, there happened to be a Venerable standing in front of a group of Heavenly Talents.

Yu Cailing hummed softly, which made Lan Xue'er raise her eyebrows. Did Yu Cailing change her personality?

Lan Xue'er's master was also stunned, but then he licked the corners of his mouth and thought to himself, These women from outside are really afraid of death! If it weren't for this Thousand-Year War, I might not have

been able to take this woman down!

Buzz!

A giant shell appeared in the sky.

The White Armor Emperor stood on the giant shell with his hands behind his back.

He said, "The soldiers of the Royal City... a thousand days one nurtures his soldiers and all for one day's battle! The battle of a thousand years is coming. In this battle, someone will rise and someone will die. This is a

test for you. If you survive this battle, it will be the pride of your life... Huh?"

The White Armor Emperor suddenly lowered his head because he sensed a slight spatial vibration. However, in the past two years, the White Armor Emperor had been unusually vigilant. Who dared to break the void

when he was giving a speech?

When the White Armor Emperor lowered his head, he saw a familiar face appear in the crowd.

"Han Fei?"

However, Han Fei raised his head, smiled at the White Armored Emperor, and grinned. “Bang~”.
