

GOF 1831

Chapter 1831: Identity Revealed

Li Xinghen immediately gave up fighting and fled back as fast as he could.

Or rather, he had temporarily retreated, but he didn't think he had lost. He only felt that Han Fei was digging his own grave. As soon as the battle began, he had used a secret method to increase his strength. It was impossible for him not to have any burden on his body. In the long run, this person's achievements and potential would be limited.

Because their strength was not on the same level, Li Xinghen had no desire to fight. He directly stopped and let Bei Xuanbing solve Han Fei.

Originally, Han Fei was the one who provoked them first.

Under such circumstances, Bei Xuanbing could have taken action. Just now, he just wanted Li Xinghen to fight Han Fei.

Now, seeing that Han Fei had unleashed the power of the Sea Establishment Realm, he certainly had plans to attack.

On the ships of the Infinity World, those who could come here were all the top Heavenly Talents of the Infinity World. Therefore, many people had already understood what was going on.

Only a few people were shocked. Even the strongest person below the Sea Establishment realm in the Infinity World was no match for Han Fei? This Avenger Pirates was really strong!

Someone was shocked. If the king didn't take action, wouldn't Han Fei be invincible below the Sea Establishment realm?

At this moment, everyone was staring ahead.

In their opinion, Han Fei had no chance of winning against Bei Xuanbing.

Someone shook his head. "This person will definitely die. He won't be able to survive."

Someone said solemnly, "Is this person using the legendary Yin-Yang Divine Eyes? If so... then he..."

Someone gasped. "Someone from the legendary Yin-Yang World has appeared?"

Bei Xuanbing stood proudly in the void and smiled. "I'm very curious. Only the Yin-Yang World has the Yin-Yang Divine Eyes, right? After 80,000 years, you're finally out."

Han Fei smiled. "Yes! It's time to come out and settle scores with you."

"Settle scores?"

As if hearing something funny, Bei Xuanbing said disdainfully, "Who? You? Boy, have you become a king?"

As he spoke, he raised his hand.

As he raised his hand, thousands of golden light spots appeared in the void.

Swish ~

The speed of those light spots was even faster than Li Xinghen's Infinite Phantom Silk.

Swish! Swish! Swish!

Han Fei's body moved in the void, and in an instant, there were hundreds of afterimages.

If the picture could be frozen in an instant, one could see that the golden light spots were small insects, but because they were moving too fast, no one could see it clearly.

"Huh ~"

Bei Xuanbing, who was attacking Han Fei, suddenly tilted his head and felt something unusual behind him. With a thought, an ice claw appeared in his hand, and he waved it four times.

Bam! Bam! Bam! Bam!

Although Bei Xuanbing attacked casually four times, the power that erupted was beyond everyone's imagination. The sea surface collapsed into a huge vortex.

Bei Xuanbing narrowed his eyes and said, "Interesting, but you're still not strong enough."

"Humph ~"

Bei Xuanbing snorted coldly and disappeared.

In the next moment, he appeared in a flash of light.

Han Fei wanted to use the Star Teleportation Technique, but he suddenly realized that his speed couldn't keep up.

Han Fei discovered that except for his eyes, neither his body nor his soul could keep up with the rhythm of Bei Xuanbing's attacks.

The moment Bei Xuanbing moved, Han Fei sensed it.

Bang!

Bei Xuanbing pressed his hand down, and an explosion sounded. In the void, a gray mist appeared. Han Fei was nowhere to be seen in the mist.

Bei Xuanbing was quite fast.

He dodged the gray mist immediately, but even so, his hand was still stained.

Bei Xuanbing frowned in disgust.

He was extremely disgusted. What the hell is this? Why is it so smelly?

Of course, as a king, Bei Xuanbing certainly couldn't show it openly.

With a wave of his hand, he dispersed the gray fog and then said indifferently, "The successor of the Yin-Yang World has appeared. Interesting. He has come out before he reached the Sea Establishment realm. It seems that the savage land is not a good place after all!"

At this time, Li Xinghen, who had just retreated, asked, "Junior Uncle, what is Han Fei's identity?"

Bei Xuanbing said indifferently, "He has appeared in the Martial Emperor City so many times. He can't hide it. When we reach the Martial Emperor City, we just need to buy an intelligence resource to know who he is."

...

While Han Fei was attacking the fleet of the Infinity World alone, the intelligence center in the Martial Emperor City suddenly released a heavy bomb.

The cause was that someone who had been robbed by the Avenger came to investigate Han Fei.

Originally, the news of Han Fei's identity could only be speculated from related news. If it was someone with ulterior motives, it wouldn't be difficult to speculate.

However, how could the result of speculation be as clear as a direct conclusion?

But just now, the intelligence center of the Martial Emperor City directly quoted the price for the information of the Avenger's identity.

The price was 500,000 ultra-quality spiritual stones per serving, or resources of the same worth.

500,000 ultra-quality spiritual stones was not a lot of money for the strong masters of the Heavenly Palaces who entered and left the Martial Emperor City and the thugs who lived in the Martial Emperor City. It was only slightly expensive.

It could be said that those who really wanted the information didn't care about the money.

Almost the moment this information was put up, more than 30 copies were sold.

Among them, none of the ten pirate groups were absent. They all bought this information.

Immediately afterward, those who had been robbed by Han Fei quickly bought it too...

As for the merman race, the hundred demon race, and the undersea human race, after knowing that a force was rising, how could they miss it?

Therefore, Han Fei sent someone to sell this information for 20 million ultra-quality spiritual stones.

In the blink of an eye, the trading center had earned 15 million yuan. They were about to get their cost back... This earning speed was really terrifying.

At this moment, many people were studying the information.

The intelligence contained a lot of information about Han Fei.

In the beginning, the intelligence summarized.

The leader of the Avenger Pirates, Han Fei, was the current successor of the Yin-Yang World who had disappeared for eighty thousand years. He had the Yin-Yang Divine Eyes and the Twin Divine Technique.

His identity was confirmed.

With just this sentence, the person who bought the information knew that it was worth it.

After the information came out, only an hour later, another piece of news suddenly came out.

The source of the news was the gambling house in the Martial Emperor City. Someone said, "The leader of the Avenger Pirates hunted four ships of the Infinity World alone and defeated Li Xinghen, the strongest person below the Sea Establishment realm in the Infinity World. Later, he fought with the king of the Infinity World, Bei Xuanbing, head-on and was defeated in one blow. Now he has escaped."

As soon as this news was out, half of the Martial Emperor City was in turmoil.

The Infinity World was an existence that even the ten pirate groups were unwilling to touch.

How dare an unknown pirate team rob them? And he even managed to run away?

Everyone felt that this person was really bold!

After this news appeared, in less than a hundred seconds, everyone in the Thirty-Six Mystic Worlds, the ten pirate groups, and the other various forces had a copy of the information about the Avenger.

At this time, the information on the Avenger had been sold for 25 million ultra-quality spiritual stones. The trading center had made a fortune.

Watching all this secretly, Song Kaiyuan and the others looked at each other in surprise. Is this the efficiency of the Martial Emperor City?

Song Kaiyuan said, "Lu Ran, collect the money and buy some information about the Avenger. Let's study it."

Lu Ran said in surprise, "We provided the information. Do we need to read it too?"

Song Kaiyuan said, "Of course. The information we give out may be interpreted in another way under someone else's organization. Therefore, we need to read it too. Go."

With that, Song Kaiyuan looked at Li Kaitian and said, "Go rent a private courtyard. Better find a spacious but low-key one."

An hour later.

When Lu Ran and the others came to a yard built near a downtown area in the west-central part of the city, Song Kaiyuan was lost for words. "Li Kaitian, do you have any wrong understanding of the word 'low-key'?"

Li Kaitian said, "Do you think it's easy to rent a house now? Most of the courtyards have been rented out. There are too many people coming this time! This lousy place costs 300,000 ultra-quality spiritual stones a month. It wasn't easy for me to rent it for two months with 500,000 ultra-quality spiritual stones."

Song Kaiyuan said, "It's the captain's money anyway. I don't mind."

At this moment, Lu Ran said, "Stop talking nonsense. Let's take a look at this information first! This is more complete than what I revealed!"

Everyone quickly looked at it. In addition to the first sentence that directly revealed Han Fei's identity, there was a series of descriptions below.

Han Fei: Male.

Bone age: Within a thousand years.

Realm: Half-King

Strength: He seems to have a strange secret technique that can unleash the combat power of the Sea Establishment realm in a short period of time. In his peak state, his strength is at least 80,000 waves. Both his speed and physique will be enhanced... The duration of the secret technique is estimated to be about ten to twenty seconds. Depending on the intensity of the battle, the duration will also change.

Characteristics: Good at disguise, Twin Divine Technique, knife technique, physique comparable to a king's (suspected to have the Indestructible Golden Body).

Great Dao: It is suspected that he takes many Great Daos at the same time, including the Great Dao of Yin-Yang, Great Dao of Strength, Great Dao of Time, Great Dao of Space...

Identity: Suspected to be the current successor of the Yin-Yang World, namely the current master of the Yin-Yang World.

Deed 1: Half a year after the riot in the Wild Abyss, he fought the Predators and officially founded the Avengers. At that time, Han Fei fought Mad Fourth King and was no match for him. However, in Mad Fourth King's presence, he broke through the ship array and killed more than ten Venerables.

Deed 2: He disguised himself as the Black Ghost and changed his name to Fan Datong... He abducted the Merman Royal Family's princess and seems to have a small world with him. The small world is suspected to be the Sea Quelling Painting...

Deed 3: ...

However, at the end of the intelligence, there was a message. "According to reliable information, Han Fei once said that the merman race can contact the world outside the Raging Sea. This news is still being confirmed.

When the information is complete, we will launch it immediately. At present, the incomplete supplementary information is worth 1 million ultra-quality spiritual stones..."

...

Chapter 1832: Fierce As A Tiger

Han Fei might be able to disguise himself, but it was impossible for others not to recognize any of the combat skills he had used after the series of battles in the Raging Sea.

Since Song Kaiyuan could guess Han Fei's identity, after giving the Martial Emperor City enough information, they could naturally deduce more.

At this moment, Han Fei's name immediately resounded among the strong.

After all, Han Fei's identity was eye-catching enough.

Han Fei's secret techniques, divine techniques, and the Indestructible Golden Body were all treasures worth coveting.

However, after reading this information, Song Kaiyuan's first reaction was, "No! Some information has been deliberately hidden."

Song Kaiyuan said, "This time, although we tried our best not to reveal our identities, as long as someone studies it, it's not difficult to discover. However, our identity is not mentioned in this intelligence."

Mushui Sisi said, "Maybe no one found it out? After all, we've disguised ourselves. Besides, anyone can be a pirate. Why can't anyone from our four heavenly palaces be a pirate?"

Song Kaiyuan shook his head slightly. "Coincidence? Even I can guess it, but those strong masters can't? The strong masters never believe in coincidences. We appeared and are so strong. It doesn't make sense that the Martial Emperor City directly ignored us. Besides, from what happened in the Thunder Fire World, they should be able to find the connections between the captain and Xue Zhan... but they didn't mention it at all."

Mushui Sisi asked, "Senior Brother, what do you mean? Are you saying that... the Martial Emperor City purposely hid some information?"

Song Kaiyuan said, "I even feel that the Martial Emperor City is protecting the captain. Such intelligence is really below the normal standard of the Martial Emperor City's intelligence."

Mu Xi said, "That must be because our identities haven't been discovered yet, right? If our identities are completely exposed, won't our four Heavenly Palaces and the Snow God's Temple become the target of everyone in the Raging Sea?"

Song Kaiyuan's eyes lit up. "That's right. Although in name, the five Heavenly Palaces are now related to the captain, this relationship is very likely to have been hidden by the Martial Emperor City. I even suspect that the information that the captain had once appeared in the Thunder Fire City has also been quietly hidden."

Lu Ran's heart did a flip. "Later, I'll go to the intelligence trading center to check it out."

Song Kaiyuan said, "Go now."

It only took half an hour for Lu Ran to return, looking surprised.

As soon as Lu Ran entered, she said, "Brother Song is right. All the details and hearsay about the ship are completely untraceable. Even if you buy it with a lot of money, it won't be sold."

Song Kaiyuan narrowed his eyes and said, "That's right. However, why did the Martial Emperor City take the initiative to help the captain? Was it for the safety of our five Heavenly Palaces, or was it purely to help the captain?"

"That doesn't make sense! The Martial Emperor City was established later. When the Yin-Yang World disappeared, there was no Martial Emperor City." Mushui Sisi said.

Song Kaiyuan said, "That is... the Martial Emperor City doesn't want to see the humans of the Thirty-Six Mystic Worlds fighting each other."

Li Kaitian hurriedly stopped him. "Wait, why would the Thirty-Six Mystic Worlds kill each other after the captain was exposed to be related to us? The Yin-Yang World alone shouldn't have caused such a big trouble, right?"

Song Kaiyuan shook his head slightly. "This is a matter of taking sides. Hiss... Or is the information the captain gave us at the end actually true?"

Everyone looked at each other.

In fact, when Han Fei asked Song Kaiyuan and the others to sell his information, he gave Song Kaiyuan an additional piece of information that no one dared to think too deeply about.

The intelligence said, "In the Age of Doom, the gods fought on the other side of the sea. That battle swept across the world. For three consecutive years, the sky kept crying, and the Great Dao collapsed. And every time the Great Dao collapsed, it usually symbolized the death of a god. Since then, all races had no Dao, and all Daos returned to the void... After the death of the gods, a holy spirit carried the oracle of the Sea God Spirit and wrote a divine decree, ordering the sea race to slaughter all races and reopen the chaos. A large number of new gods who inherited the Great Dao would appear and become the only ruler of this world. Accompanying the appearance of the divine decree was a strange technique. The technique was unknown, but once mastering this technique, one could enter the monarch realm. Now this technique was obtained by Chun Huangdian. This person secretly connected to the outside world of the Raging Sea and cultivated in seclusion for many years. It was very likely that he was hiding his strength and waiting for a chance to sweep the Raging Sea in one fell swoop..."

At the end of this information, it indicated the source of the information, which was from the private conversation between Han Fei and the merman race's princess, Xia Xiaochan.

In the eyes of Song Kaiyuan and the others, Han Fei was deliberately framing Chun Huangdian.

After all, now that you kidnapped the merman race's princess, they would certainly hunt you down.

However, if it was really just a framing, the credibility of this information was not high. Even if Han Fei made up an awesome background, it was useless, right?

Song Kaiyuan looked horrified for the first time. "What the captain said is true... It seems that all the rumors about the Age of Doom are true. This is easy to understand... The Martial Emperor City is very likely to temporarily protect the captain and release this news to let some people investigate. They are secretly watching... Unfortunately..."

Everyone: "What's wrong?"

Song Kaiyuan said with an ugly expression, "Our intelligence was sold too cheaply."

After the information about the Avenger was released, everyone only spent 500,000 ultra-quality spiritual stones to understand the Avenger.

However, when they saw the last additional piece of news, the various races and pirates couldn't sit still anymore. The Mermen could connect to outside the Raging Sea? This news was released by the Martial Emperor City, so it must be very credible.

Instantly, the intelligence center of the Martial Emperor City was in an uproar.

People kept coming.

One customer after another was received. The usual big customers had now become ordinary customers.

Someone directly shouted, "Give me the additional information on the Avenger."

"Give me a serving too."

"And me."

...

If Han Fei saw this scene, he might cry!

He just wanted to cause trouble... Even without the inheritance of the Martial Emperor, he was prepared to come to the Martial Emperor City.

And his purpose in coming to the Martial Emperor City was to cause trouble!

To be precise, to cause trouble to Chun Huangdian...

If he guessed right, this guy would definitely be waiting for him at the entrance of the Wild Abyss. If he was lucky, he could escape. If he was unlucky, this guy might find him.

Han Fei hadn't transcended the king-level tribulation yet.

At this time, fighting Chun Huangdian was simply stupid. After all, how could an ordinary king cast a projection in the Yin-Yang World? Obviously, it was impossible.

Therefore, Chun Huangdian's strength might be higher than he imagined.

Since he couldn't beat him, he would let others fight and exhaust him. As long as that guy... didn't have the energy to cause trouble for him!

After the matter in the Martial Emperor City was over, he would go to the Snow God's Temple to pick up his clone, go to the Million Poison World to buy some poison, and immediately return to the Yin-Yang World.

As long as he avoided Chun Huangdian and successfully became a king, he might not be afraid of him when he appeared in the Raging Sea again.

However, Han Fei never expected that the news he released would be sold so ridiculously!

In just a few hours, more than a hundred servings of the additional information about the Avenger had been sold.

Just the supplementary information had been sold for more than 50 million ultra-quality spiritual stones. Besides, this thing was still being sold. It should be sold for 100 million a day.

At this moment, Song Kaiyuan looked awful. He had completely underestimated the power of Han Fei's information. They had only sold it for 20 million. If Han Fei knew this...

Everyone looked at Song Kaiyuan sympathetically.

Han Fei trusted him, so he asked him to handle this matter. But he obviously made a big mistake on this matter.

On the other side.

The Avenger appeared at the port of the Martial Emperor City. Many people at the port fell silent when they saw the Avenger.

Buzz!

Suddenly, the entire Avenger disappeared.

A man in a black robe and a woman in a red and white gauze dress walked over from the void.

"Hiss ~"

"It's the Avenger!"

"Who is this? Is there such a beautiful woman on the Avenger?"

Someone said in a low voice, "What the f*ck do you know? This woman is very likely to be Princess Mingzhu of the Merman Royal Family. She was abducted by Han Fei!"

Someone was shocked. "Then how do they dare to appear so blatantly? Aren't they afraid of being targeted?"

Someone sneered. "So what? This is the Martial Emperor City. Who dares to mess around in the Martial Emperor City?"

Someone sighed. "I want to join the Avenger. I wonder if I have a chance?"

"Heh! Brother, you're thinking too much. The Avenger makes enemies wherever it goes. If you get on the Avenger, I'm afraid you won't be able to get off."

Someone echoed, "That's right. Half of the ten pirate groups have a grudge against them. You can go if you want. I'm not going anyway."

However, the Martial Emperor City never lacked bold people.

Someone felt that since the Avenger could survive under such circumstances, its strength must be extraordinary, or Han Fei had special means.

Immediately, someone said, "Captain Han Fei, is the Avenger still recruiting? I'm an advanced Venerable and very strong. Do I have a chance to join?"

Han Fei was still playing cool when someone suddenly said this. He glanced over and said casually, "The Avenger only accepts Half-Kings or above, Heavenly Talent Half-Kings."

"Hiss ~"

Immediately, the people at the port were dumbstruck.

Everyone thought to themselves, You are a f*cking Half-King. Can you handle so many Half-Kings?

However, Han Fei ignored this person. He looked at the vast land in the sea, the boundless plains, and the towering black stone buildings in the distance...

Sea demons could walk on land. There were humanoid mermen staring at them, octopus monsters twisting their tentacles and looking at them curiously, and lobsters crawling on the ground...

At this moment, Han Fei felt that he had come to a monster concentration camp.

Chapter 1833: Martial Emperor City

The Martial Emperor City was full of all kinds of people, including humans and demons.

In the Martial Emperor City, Venerables were everywhere, and only a small number of explorers were there. The reason for the existence of explorers was that very few of them were Heavenly Talents nurtured by certain forces, and most were the descendants of the residents of the Martial Emperor City. There were humans, sea demons, and even mermen here.

In fact, after a series of unknown nurturing, these explorers were mainly responsible for the operation of the entire city after they became Venerables.

At this time, Han Fei saw a human woman wearing a kind of uniform. There was a "Martial" mark on her arm, and on her waist, there was a tag similar to the star token of the Scattered Stars Island.

Han Fei guessed that the token was used to identify people because everyone here had one.

This woman looked calm and ordinary, the kind that couldn't be found in the crowd. However, her strength had already reached the peak of the Venerable realm.

When Han Fei and Xia Xiaochan landed, the woman had already stepped forward, cupped her hands, and said neither humbly nor arrogantly, "Captain Han Fei, because you made a big deal in the Martial Emperor City, the city specially sent me to lead you into the city."

Han Fei raised his eyebrows. "A big deal?"

Han Fei didn't ask further. He had already guessed what the deal was.

Therefore, Han Fei just nodded slightly and said, "Then lead the way!"

The woman said, "Please follow me. Let's walk into the city. During this period, I'll explain some rules of the Martial Emperor City that need to be abided by."

Han Fei was walking on the sandstone road with cracking sounds.

Han Fei stepped on it on purpose, because it had been a long time since he walked on solid ground, especially in a place that looked like a primitive island. In some places, there were even muddy roads with waterholes.

The woman said, "It's not recommended to fly in the Martial Emperor City most of the time. You can walk with the Great Dao of Space. However, we don't absolutely forbid flying. If you encounter special circumstances and need to hurry up, you can fly. Of course, this is all monitored by the strong masters of the Martial Emperor City..."

They chatted on the side of the road as they walked towards the distant city.

The woman explained the rules of the Martial Emperor City skillfully.

First of all, perception was forbidden to use in the Martial Emperor City. If one scanned a person with his perception, it was fine if it happened once or twice, but if it happened too many times, he could complain to the managers of the Martial Emperor City.

Secondly, the Martial Emperor City encouraged everyone to speak out instead of using voice transmission. In order to ensure that the contents of the conversation wouldn't be overheard, everyone who entered the Martial Emperor City would be issued an identity card. If speaking required privacy, they could secretly activate their identity cards. If it wasn't very private, everyone could directly speak out.

Also, the Martial Emperor City refused discrimination. Discrimination was a sin. Any race was born equal. If anyone committed discrimination in the Martial Emperor City, they would be ruthlessly driven away. The result was very likely that they were dismembered on the sea.

In the Martial Emperor City, there was no specific currency. If there was, ultra-quality spiritual stones were used as currency. Everything could be converted into ultra-quality spiritual stones.

Of course, things like Chaotic Qi could also be used as currency. However, generally no one would use it.

This was because this was a paradise for thugs. "Venerables everywhere" was one of the characteristics of the Martial Emperor City.

It was inevitable that there would be occasional conflicts between the strong. Even so, private battles were forbidden. Once they were discovered, they would be severely punished! If the situation was serious, they would at least be expelled from the Martial Emperor City or even killed on the spot.

Therefore, if there were enemies in the Martial Emperor City, they would either leave the Martial Emperor City and resolve it themselves or go to the arena to fight to the death.

After briefly introducing the basic situation of the Martial Emperor City, the woman said, "Generally speaking, every day you stay in the Martial Emperor City, you have to pay 100 ultra-quality spiritual stones. However, the Martial Emperor City has a rule that anyone who spends more than a million spiritual stones in the Martial Emperor City can pay ten times less. Those who spend more than ten million spiritual stones here will be exempted from the stay fee, and they can even settle down in the Martial Emperor City. Of course, only five people can be exempted from the stay fee. If you want more people to be exempted, you'll have to spend more money..."

Chirp chirp ~

On the way, Han Fei saw birds and beasts of the Sky Clan flying past and was quite gratified. It seemed that the Sky Clan could still fly here. On the roadside, grass and wildflowers were scattered randomly.

Xia Xiaochan said, "They're just ordinary flowers and plants without any special power."

The woman said, "They are ordinary flowers and plants in the first place, but even ordinary flowers and plants are forbidden from being destroyed. If you destroy flowers and plants, you'll have to compensate. If no one saw it, it's fine, but the Martial Emperor City pursues nature. Someone once stomped and destroyed a large area of flowers and plants, and he only had two choices. Either re-plant these flowers and plants again, or die."

Han Fei: "???"

Xia Xiaochan: "???"

The two of them were speechless. There were many rules in the Martial Emperor City.

Han Fei felt that those who didn't know better would think that they had entered a completely controlled civilized society!

Han Fei asked, "What's your name?"

The woman said, "Sorry, I don't have a name. You can call me 3001, which means that I'm the number 3001 service personnel of the Martial Emperor City."

Xia Xiaochan couldn't help frowning. "How inconvenient is it without a name? You are already a peak-level Venerable, one of the top existences in the Raging Sea. There are very few people stronger than you."

The woman said, "In the outside world, I certainly have other code names. But in the Martial Emperor City, I am 3001."

Obviously, this woman wouldn't reveal any information except for her code name, so Xia Xiaochan didn't ask further.

Seeing that they were about to reach the giant magnificent city, Han Fei said, "Since you're here to welcome us, I guess you aren't just here to lead the way and explain the Martial Emperor City to me?"

The woman said, "If the two of you are willing, you can go to the intelligence center of the Martial Emperor City to exchange some information with the Martial Emperor City. We value every piece of information and will give a satisfactory price for it."

Han Fei smiled. "How much did I sell my last intelligence for?"

The woman said, "Twenty million ultra-quality spiritual stones."

Han Fei's eyelids twitched.

Xia Xiaochan almost gaped in shock. She had been in the Merman Royal Family for more than 20 years and only got ten million ultra-quality spiritual stones, but it was not even as much as the money Han Fei earned from a piece of information?

Xia Xiaochan couldn't help being a little confused. Had she been locked up for too long and couldn't keep up with the situation?

Han Fei tried to suppress the shock in his heart and asked with a smile, "Then how much did you sell that information for?"

The woman said, "Sorry, this is a secret of our intelligence center. However, I can tell you the sales on the surface. When I go to pick you up, the total intelligence sales on the surface are 76 million ultra-quality spiritual stones."

"F*ck..."

Han Fei finally couldn't hold it anymore.

This number really shocked him. He never expected it to be so easy to make money. Han Fei also didn't expect that a smart guy like Song Kaiyuan would sell his information at a low price.

As they said, the deal was 76 million on the surface. There must be other big transactions behind it! Wouldn't they sell it for one or two hundred million?

Han Fei could understand.

"On the surface" meant the number that everyone could guess. Because everyone knew it, there was no need for them to hide it.

However, he had already sold it. This price was completely beyond his expectations.

Han Fei estimated that even if he were here, he might have sold it for only ten million. He couldn't blame Song Kaiyuan for this.

Han Fei thought for a moment. "Okay, let's go to the intelligence center."

A moment later.

The woman took Han Fei and Xia Xiaochan to the gate of the Martial Emperor City.

At the city gate, someone would register.

After registration, a permanent identity token would be given. It could be worn on the waist, similar to a star token, but not as many functions as a star token.

At the city gate, there were two advanced Venerables guarding. One was a shrimp soldier of the Hundred Demon Clan, and the other was a Half-Merman.

Han Fei raised his head and looked at the city gate. The gate was more than 200 meters high, and the city wall was more than 600 meters high. This scene was spectacular, but it didn't surprise Han Fei.

Bada ~

Han Fei raised his head and saw that one or two drops of water would occasionally fall on the limestone on the city wall high above his head.

Han Fei even saw raindrops falling on the shrimp soldier's head, but he didn't seem to notice it. Han Fei couldn't help but think, Is this what natural means?

Han Fei and Xia Xiaochan entered the city gate. After passing through an invisible barrier, they looked at the door almost at the same time and saw a turtle sleeping. The turtle's aura was undoubtedly that of a Half-King.

Xia Xiaochan said, "I knew it. There must be a stronger gate-keeper at the city gate."

The woman said, "Actually, it doesn't matter whether there is a gate-keeper or not. With the barrier, even if someone commits a crime and wants to escape, the success rate has been nil."

Han Fei shrugged. "Okay, let's continue! Tell me what places in the Martial Emperor City are worth visiting. Oh, or rather, what large trading markets are there in the Martial Emperor City? The kind that can carry out large transactions..."

Chapter 1834: Information Trading Center of the Martial Emperor City

"Greetings, Your Highness."

Xia Xiaochan waved at a merman who bowed at her. She was speechless. This was already the eighth one.

Han Fei and Xia Xiaochan entered the city without hiding their identities at all. Therefore, many people recognized them, although they didn't know any of them.

Xia Xiaochan couldn't help patting her head. "Han Fei, are we too high-profile?"

Han Fei said, "I just want to be high-profile. It's best if Chun Huangdian can stand in front of me now! Believe it or not, I can spit at his face!"

3001 suddenly interjected, "By the way, spitting is forbidden in the Martial Emperor City."

Xia Xiaochan: "..."

Han Fei: "..."

...

In the intelligence center of the Martial Emperor City.

This place was like the Logistics Division of the Scattered Stars Island. The buildings were all big. Inside, there were nearly a hundred service desks.

Now, it seemed to be quite busy inside. There were people at all the service desks.

There were too many people here, so there were even small private rooms.

Han Fei looked around. The layout of this place was not as magnificent as the Logistics Division! There were black stones everywhere.

As soon as he came in, Han Fei heard someone say, "Give me the latest information about the Avenger."

As soon as this person said so, the hall suddenly fell silent. Many people turned around.

"Hiss! Han Fei, the leader of the Avenger Pirates?"

A merman was here. After seeing Xia Xiaochan, he immediately bowed. "Greetings, Your Highness."

Xia Xiaochan nodded indifferently. "You're welcome. Go about your business!"

"Yes, Your Highness."

Han Fei looked at Xia Xiaochan. "You're more popular than me!"

Xia Xiaochan rolled her eyes. "You can become a prince of the merman race. Then there must be someone saluting you too."

In the hall, only some people were stunned for a moment before the noise returned.

As long as one entered the Martial Emperor City, no matter how awesome he was outside, no one would be afraid. Anyway, fighting was forbidden here.

3001 said, "This way please! The intelligence center has arranged an exclusive reception room for you. The master of our intelligence center will personally receive you."

Han Fei's heart did a flip. To be able to manage such a large intelligence center, this person must have a powerful background.

Since this person wanted to spend time to receive him, it was obvious that the information had attracted their attention.

Or rather, the latter piece of information caught their attention.

As 3001 entered the room, many people in the hall outside immediately said in a low voice, "I'll buy later. I'll wait a while longer. Maybe there will be new information."

These people were all smart. Han Fei had personally come to the intelligence center. He must have some new information.

A moment later, Han Fei was taken to a place similar to a study in the intelligence center.

There were bamboo shelves and fish skin paintings everywhere. This room was not small. There were probably as many as a million fish skin scrolls.

When Han Fei and Xia Xiaochan came in, they saw a woman in a red robe reading a fish skin roll.

3001 quietly left after sending them in.

Han Fei and Xia Xiaochan's eyes were attracted to this woman.

This woman looked quite aloof. Her cold temperament was a little like Luo Xiaobai's, but even if she maintained her coldness, she had the charm of a mature woman.

When she saw Han Fei and Xia Xiaochan come in, the woman didn't continue to read, but put down the fish skin map and said to Han Fei and Xia Xiaochan solemnly, "Sit!"

Han Fei and Xia Xiaochan looked at each other and sat down.

What really surprised them was that they couldn't see through this woman!

Under such circumstances, this woman must be a king.

Han Fei didn't expect that the owner of an intelligence center in the Martial Emperor City had reached the Sea Establishment Realm? Then how many Sea Establishment Realm powerhouses did the Martial Emperor City have?

Seeing the two of them sit down, the woman in red said, "My identity is not a secret. I am Yan Meng, the owner of the intelligence center in the Martial Emperor City. Those who are invited here by me are usually people with great intelligence and are usually here to conduct large intelligence transactions."

Han Fei said, "Hasn't the information been sold?"

Yan Meng pushed the two fish skin maps on the table to Han Fei and Xia Xiaochan and said, "Take a look first."

Han Fei and Xia Xiaochan opened the first fish skin map in confusion. This fish skin map was the basic information of the Avenger as well as that of Han Fei.

The second one also recorded the basic information of the Avenger, but this one was much more comprehensive.

On it, it even recorded Han Fei's transactions in the Ten Thousand Treasure Pavilion in the Thunder Fire World. The auction, his first robbery, Xue Zhan, the snatching of the Wind Pearl, and so on.

When Han Fei was selling intelligence, he didn't expect the intelligence ability of the Martial Emperor City to be so terrifying! He didn't expect to find records of the things that he thought no one noticed.

Yan Meng said, "You've seen the intelligence capabilities of the Martial Emperor City. However, I didn't sell this information to the public. Otherwise, the Snow God's Temple and the other four heavenly palaces will definitely arouse the hostility of the other heavenly palaces. Although they won't be destroyed in the short term, it will definitely cause internal strife among the human race."

Han Fei narrowed his eyes slightly. "Why did the Martial Emperor City do this?"

Yan Meng looked at Xia Xiaochan and asked solemnly, "Does Chun Huangdian really have a monarch-level technique?"

Xia Xiaochan was not stupid. As a member of the Merman Royal Family, she certainly knew how powerful the Merman Royal Family was.

She knew that Han Fei's purpose was to push Chun Huangdian to the forefront, so that he would be questioned in the merman race and even the entire Raging Sea.

Although Chun Huangdian had protected her, he had also detained her for decades.

Besides, Han Fei couldn't touch Chun Huangdian by doing this. He would only cause him trouble. No matter how she looked at it, Xia Xiaochan felt that it was feasible.

Xia Xiaochan didn't even blink. "Of course, not only that, but I also suspect that he is hiding his strength."

Yan Meng asked again, "Do you have any evidence?"

Xia Xiaochan shook her head. "No!"

Yan Meng asked, "Then how do you know this information?"

Xia Xiaochan said, "I have my own way. Since the Martial Emperor City is so well-informed, you should know why my mother is still asleep, right?"

Yan Meng said, "This is a mystery."

Xia Xiaochan said, "That's the problem. I won't reveal more, but my mother's sleep is related to the world outside the Raging Sea."

Yan Meng tapped the wooden table and said lightly, "Are you selling this information?"

Xia Xiaochan shook her head decisively. "No."

Yan Meng nodded slightly and then looked at Han Fei. "There are rumors about the Sea Suppression Divine Oracle in our Martial Emperor City too. However, they are only rumors about the Age of Doom. And they don't mention any special techniques to become a monarch. How do you know?"

Han Fei smiled. "How much is the information we just provided?"

Yan Meng's expression was calm. "Five million ultra-quality spiritual stones."

Han Fei asked, "What about the question you just asked?"

Yan Meng: "50 million ultra-quality spiritual stones."

Han Fei's heart skipped a beat. He thought to himself, F*ck, rich people are really generous. 50 million?!

However, this magical technique was originally fabricated by Han Fei.

Han Fei could lie to most people, but he didn't want to lie to the Martial Emperor City. Otherwise, once he was exposed, it would be deemed as deliberately deceiving the Martial Emperor City.

Therefore, Han Fei sighed slightly. "It's a pity that my information comes from the river of time. The specific time was about 120,000 years ago. You asked me to prove it, but I can't prove it, nor can I judge the authenticity of this information. It seems that I can't get this 50 million."

Yan Meng's eyes lit up. "The river of time? We can also buy information about the river of time at a high price."

Han Fei shook his head. "I'm not selling information about the river of time unless one day I've already transcended the tribulation and become a king, and my strength is comparable to most kings in the Raging Sea."

Yan Meng nodded slightly.

This was completely understandable.

Since Han Fei's identity had been exposed, he had already become the target of public criticism.

She said, "Just now, your words about the river of time and 120,000 years ago were worth 5 million. If there's nothing else, this transaction is over."

Han Fei said, "Wait, I happen to have information to buy."

Yan Meng said, "Oh? Tell me about it."

Han Fei had earned 10 million ultra-quality spiritual stones just by saying a few words here. However, he didn't know how much it would cost to buy information.

Han Fei said, "I want to know why the kings in the Raging Sea can't enter the Yin-Yang World."

Yan Meng was stunned for a moment. "You don't know?"

Han Fei shook his head. "I don't know!"

Yan Meng's expression changed in an instant, and then she said, "Five million."

The corner of Han Fei's mouth twitched slightly, and he couldn't help but ask, "Does the intelligence center charge in millions?"

Yan Meng said, "There are different prices for different information."

Han Fei gritted his teeth and said, "Okay!"

Yan Meng said, "It's because of the Yin-Yang Great Millstone. A Yin-Yang Millstone was formed in the depths of the Wild Abyss. This millstone can't be walked on except for the people mastering the Great Dao of Yin-Yang. Otherwise, even if an emperor comes in person, he will be crushed by the power of the entire Wild Abyss. If it were 80,000 years ago, it might be possible to break in by force. However, as time passes, the Yin-Yang Great Millstone becomes stronger and stronger, and it can no longer be entered."

"Yin-Yang Great Millstone?"

Han Fei couldn't help but think of the millstone-like place he saw back then. So, was that thing the real reason why others couldn't enter?

Han Fei was puzzled. "Then why can someone project his projections into the Yin-Yang World?"

Yan Meng: "Two million."

Han Fei thought to himself, So much?!

Han Fei couldn't have felt worse. However, thinking that he had just earned ten million, he nodded. "Okay."

Yan Meng said, "The Great Dao of Space can change the shape of space. The Great Dao of Time can help one walk through time gaps. There are even ancient sacrificial methods that can ignore the Dao runes of space... However, the most common way is that the strong can use projections to achieve spatial

grafting and crossing. However, doing this will inevitably greatly reduce his strength. Even if one can bypass the Yin-Yang Millstone, he can only use projections that are much weaker than his original body.”

Chapter 1835: Super Resource Shop

At this moment, Han Fei was greatly relieved.

Even merely for the sake of revenge, Han Fei felt that the seven million ultra-quality spiritual stones were worth it.

At this moment, he realized that even Chun Huangdian couldn't go to the Wild Abyss at all. No wonder Chun Huangdian could come there back then. It turned out that it was a projection's projection, which was to use a series of projections to temporarily avoid the Yin-Yang Great Millstone. Therefore, when Chun Huangdian went there, his strength was only in the Explorer realm.

At this moment, Han Fei was relieved. Others couldn't go, but he could!

Unlike others, others couldn't cross the Yin-Yang Millstone, but he could use the Twin Divine Technique. His mist body wasn't afraid of the Yin-Yang Millstone, so he could return to the Yin-Yang World safely.

Han Fei said again, “The Wild Abyss should be connected to more than one place. I want to know what other secrets there are in the Wild Abyss.”

Yan Meng said, “The full value of this information is 30 million ultra-quality spiritual stones.”

Han Fei: “...”

Xia Xiaochan secretly clicked her tongue. Now, she felt that the ultra-quality spiritual stones in the doors of the big starfish couldn't even buy one-third of the information!

Han Fei's eyelids twitched.

He asked this question out of curiosity.

In the end, he was shocked. This was much faster than robbing money.

Han Fei immediately shook his head. “Forget it. It's too expensive.”

Han Fei wanted to ask if there was any news about the Demon Purification Pot's vine. However, on second thought, why should he ask about it?

He could just ask the Vast Ocean Navigator to point at the direction!

Besides, the Demon Purification Pot had to be kept a secret.

As for Han Fei, he came to the Martial Emperor City mainly to cause trouble. Now that the previous matters had been settled, there was no need to rush. Just wait and watch the show.

Han Fei said, “I have nothing to buy now.”

“Guards.”

Yan Meng called out, and Number 3001 came in.

She said, "Take them back and pay them three million ultra-quality spiritual stones."

"Yes!"

When Han Fei and the others left the house, a person quietly appeared in the house.

Yan Meng said, "What do you think of what he said about the prophecy?"

The man said, "It looks like the news was deliberately released to mess with Chun Huangdian. However, the information matches exactly what we know... He talked about the river of time, so the credibility of the news has increased. The Martial Emperor City has always been suspicious of Chun Huangdian's strength. Now, the mermaid princess has personally confirmed it, so the credibility is not low either. Regardless of whether the great monarch-level technique is real or fake, or whether the mermen can contact people outside the Raging Sea... even if it's fake news, this news is very valuable. At least, this news has provided us with ideas and get the people in the Raging Sea to prepare in advance."

Yan Meng nodded slightly. "I think so too. Raise the price of the information about the Avenger by 500,000 ultra-quality spiritual stones."

"Um..."

...

Out of the intelligence center of the Martial Emperor City, 3001 took out a map of the city and gave it to the two of them. "Please help yourselves. This is the city map of the Martial Emperor City. It marks some important places in the city. If you have time, you can take a look. I'll take my leave."

Han Fei took the jade slip, scanned it with his perception, and memorized the city map. Then he handed the map to Xia Xiaochan.

Xia Xiaochan said, "It seems that the Martial Emperor City doesn't want internal strife in the human race."

Han Fei said, "Even if the news is leaked, it's actually useless for others to know the relationship between me, the Snow God's Temple, and the other four heavenly palaces. There are only more than 30 years before the opening of the Monarch Palace. For them, the time is too short, which is equivalent to right in front of their eyes. The masters of the Heavenly Palace are already old. If they want to fight or kill, it won't be before the opening of the Monarch Palace. This is why I released the news, not entirely because the Martial Emperor City doesn't want to cause internal strife in the human race."

Xia Xiaochan nodded slightly and said in surprise, "This Martial Emperor City has a lot of facilities, which are a bit like the Scattered Stars Island."

Han Fei said, "There are only a few things that humans can do on land. No matter where they go, it's the same. This is not surprising."

Han Fei learned from the map that there were special auction houses, gambling dens, treasure pavilions, bookstores, super resource shops, refining workshops, cultivation towers, many inns, competition arenas, mission centers, and large itinerant cultivator markets... There were even medical centers. It could be said that they had all the necessary functions.

Among them, where was the most worth going?

Han Fei discovered that the super resource shops, mission centers, and the large itinerant cultivator market were all popular places. It must be worth going there.

Xia Xiaochan said, "Which one should we go to first? How about a super resource store? The introduction says that this place is exclusively operated by the Martial Emperor City. All kinds of good things are placed on the shelves for sale. The prices are clearly marked. If you have money, buy them. If not, you can still take a look at them."

Han Fei grinned and said, "Then let's go there! We're rich now anyway."

"Ga ga ga ~"

The two stood at the door of the intelligence center and saw a red-armored centipede five or six meters long crawling over.

When the centipede saw Han Fei and Xia Xiaochan, it was stunned for a moment. "Han Fei, the captain of the Avengers? Glad to meet you..."

The centipede propped up the front half of its body and spoke with its ferocious mouth. Its strength had reached the Half-King realm.

Han Fei was stunned. He didn't expect to chat with a centipede one day.

Han Fei nodded. "Do we know each other?"

The centipede shook its head. "No, no. However, the Avenger fought the Asura Pirates well. I admire you."

Han Fei: "..."

Han Fei didn't know how to communicate with this kind of insect Venerable. He nodded and left.

He was now a big shot who could defeat the top ten pirate groups. With his strength, he was an extremely powerful and glamorous figure even in the Martial Emperor City. How could others casually chat with him?

...

When Han Fei and Xia Xiaochan found this place, they found that the market was really big, covering an area of more than 500 kilometers.

Yes, Han Fei wasn't mistaken. In such a large field, there were all kinds of goods.

When Han Fei and Han Fei arrived, someone had already recognized them.

However, no one came to chat him up.

After all, there were many strong masters in the Martial Emperor City.

Han Fei was only a Half-King after all.

Although many people were amazed by Han Fei's identity and confidence, they were not very willing to befriend him.

After entering the supermarket, a Half-Venerable gave Han Fei and Xia Xiaochan a jade slip each and said, "Sir, this is the map of our shop and the shelves where resources are placed. If you like anything, just take down the jade slip label under the corresponding resources. At the settlement, the corresponding staff will send the products you choose to you."

Xia Xiaochan took a deep breath and said, "This is even bigger than the trading market of the Merman Royal Family. If I didn't know better, I would have thought this was the treasure house of the Martial Emperor City."

Han Fei reached out and closed Xia Xiaochan's mouth. "Don't be envious. The treasure house of the Merman Royal Family can't be worse than this. Okay, let's go take a look first. Oh, it seems to be in the skeleton area now..."

As soon as the two of them entered, they looked up.

The Ink Dragon Fish's skeleton was at the peak of the Venerable realm. It was hard and was marked with 100,000 ultra-quality spiritual stones.

Mystic Ice Serpent Teeth, Half-King realm, extremely sharp and tough, priced at 180,000 ultra-quality spiritual stones.

The Heartless Sea Horse Bone, a peak-level Venerable, could be used as medicine. It was extremely difficult to find. 160,000 ultra-quality spiritual stones.

...

This row of shelves had no end.

Han Fei looked around and saw the products of the highest price, which was a Half-King's bone and reached more than 1.2 million.

Suddenly, Xia Xiaochan shouted, "Han Fei, come and see."

Han Fei took a look and gasped.

The Ancient Black Turtle Shell Armor was in the Sea Establishment Realm. Its defense power was extremely terrifying and could withstand the bombardment of Sea Establishment Realm cultivators. It was an ultra-quality material for refining Sea Quelling Bizarre Treasures. This armor was a molting shell of the Ancient Black Turtle and was extremely difficult to find. It cost 3,980,000 ultra-quality spirit stones.

When he saw the shell, Han Fei's first thought was to use it for refining!

In this Raging Sea, in a battle of extreme strength, ultra-quality divine weapons were no longer enough. Sea Quelling Bizarre Treasures were extremely difficult to refine, so they were priceless.

Now, seeing that there was still a top material like the Ancient Black Turtle here, how could Han Fei not be tempted?

Han Fei just didn't have so much time to refine weapons... Otherwise, if Han Fei really studied refining, he might be able to refine this Sea Quelling Bizarre Treasure.

At this moment, the vines of the Demon Purification Pot returned one after another. They could also refine Sea Bizarre Treasures, but the consumption was too much.

In the past, Han Fei was relatively poor, or rather, he didn't have enough resources, so he didn't refine any Sea Quelling Bizarre Treasures. But now, he could get all kinds of resources in the Martial Emperor City. Why not?

Han Fei now had the shell of the White Armored Emperor, which was his best material, but it was probably only comparable to the Ancient Black Turtle Shell Armor.

Immediately, Han Fei pulled the jade slip down.

Xia Xiaochan was stunned. "Four million! Can you afford it?"

Han Fei smiled and said, "Don't panic. We have money. This is the material for refining Sea Quelling Bizarre Treasures. It's worth it."

Xia Xiaochan was stunned. "Can you even refine Sea Quelling Bizarre Treasures now?"

Han Fei said, "I can try! The main reason is that I have too many messy resources. If I can exchange them for such a treasure, why not?"

With that, Han Fei held the jade slip of the Ancient Black Turtle in his hand without hesitation and said, "Let's go and continue shopping. We're rich now. Let's see what we can get."

Han Fei didn't know that when he was holding the jade slip of the Ancient Black Turtle, a king looked over.

The king murmured, "Interesting."

Chapter 1836: The Shocked Heavenly Master and the Princess

In the super resource store, there were mainly spiritual fruits, spiritual liquid, demonic plant materials, demonic beast materials, weapons, ores, and various body materials of marine creatures.

Han Fei had always been very interested in spiritual fruits.

However, when Han Fei looked at the shelves of spiritual fruits, he found that all kinds of spiritual fruits were sold together. The minimum sales quantity was 100 pieces. Besides, these were not ordinary spiritual fruits, but extremely difficult to find.

For example, the Dragon Blood Fruits that Han Fei got from the auction in the Thunder Fire World. Wow, there were more than 20 of them here.

Of course, the price was not cheap.

The price of 20 Dragon Blood Fruits reached 2 million.

Han Fei narrowed his eyes. He couldn't afford all these!

Considering the great body tempering effect of the Dragon Blood Fruit, even if he cultivated the Purity Mystic Body, a Dragon Blood Fruit could support him for three days of cultivation.

Han Fei gritted his teeth and took the Dragon Blood Fruits' jade slip.

After all, Han Fei only had one left. With these 20, he could have at least two months of explosive cultivation!

A moment later, Han Fei and Xia Xiaochan walked to the shelf of the Demon Essence Pills and then Xia Xiaochan couldn't walk anymore.

Han Fei asked, "Is this demonic origin beneficial to your cultivation?"

Xia Xiaochan nodded. "There is some demonic origin of the merman race here, but it's actually called the Merfolk's Pearl in the merman race. For example, this Merfolk's Pearl in the Half-King realm can increase my strength by about 5%."

"Hiss ~"

Han Fei asked in surprise, "Doesn't it mean that swallowing ten pieces can increase your strength by 50%?"

Xia Xiaochan looked at Han Fei as if looking at a fool. "How can it be so easy? Of course, the more I absorb, the less useful it will be. However, there is only one Half-King-level Merman Demon Essence here. As for the peak-level Venerable-level Merfolk's Pearl, its effect on me is not very obvious."

Han Fei immediately beckoned, and an intermediate Venerable waiter immediately landed from high in the shop.

"What can I do for you?"

Han Fei pointed at the Half-King-level demonic origin and said, "How many of these do you have here?"

The waiter was stunned for a moment. Perhaps he recognized the two of them and he quickly said, "Please wait a moment. I'll check the inventory."

After only three seconds, the man reappeared in front of Han Fei and the others and introduced, "You two, we've got a total of 57 Merfolk's Pearls in the Half-King realm here. How many do you need?"

"Cough ~"

Han Fei and Xia Xiaochan were dumbfounded. They looked at each other. F*ck, there were as many as 57 Demonic Origin Pearls that cost 1.28 million? This meant that 57 Half-Kings of the Merman Clan had died!

Xia Xiaochan was also stunned. She looked at Han Fei and said, "I don't need that much, and we can't afford it, right?"

Han Fei's body began to heat up, and he immediately said, "No! Are we the kind of people who lack money? I have a total of 31 million. How many do you want?"

Xia Xiaochan swallowed. She calculated and quickly concluded, "Ten. Ten merman Half-King pearls can definitely increase my strength by more than 30%."

Han Fei knew how important this 30% was. He immediately said, "Buy!"

He looked at the waiter and said, "We want ten."

The waiter's heart did a flip. What a spendthrift. There were very few people who would buy a single piece of these resources, let alone ten. This person was really rich.

However, just the Half-King merfolks' demonic origin pearls would cost 12.8 million. All the ultra-quality spiritual stones Xia Xiaochan had were not enough.

Of course, if Xia Xiaochan was willing to sell other things, it would definitely be enough.

However, how could Han Fei let her spend this money?

The waiter reacted quickly and said, "Please wait a moment."

Then, in less than three seconds, he returned with ten jade slips in his hand.

At this moment, Han Fei was already holding a handful of jade slips. There were only two or three people shopping near Han Fei and Xia Xiaochan. When they saw this scene, they were dumbfounded.

Someone secretly exclaimed, "This guy is f*cking rich!"

A guy in the clothes of the Fierce Wind Pirates swallowed crazily. F*ck, how many people would I have to rob to buy these things?

However, Han Fei looked at Xia Xiaochan and said, "Let's continue shopping."

Xia Xiaochan couldn't help but feel a little guilty. She secretly said to Han Fei, "Still shopping? We've almost spent 20 million ultra-quality spiritual stones. I'm afraid I will spend all your money."

Han Fei smiled. "Don't panic. I know what I'm doing. The total number of ultra-quality spiritual stones on me and you is more than 40 million. And there are still 20 million on Song Kaiyuan's side!"

Xia Xiaochan said, "Fortunately, we put the big starfish into the map. Otherwise, he wouldn't have been able to walk."

Han Fei smiled and said, "He hasn't digested the power in his body yet... Now it's not the time for him to covet these"

Han Fei and Xia Xiaochan chatted and continued to sweep the shelves.

They had only walked less than ten kilometers...

Suddenly, Han Fei's eyes fell on one of the shelves.

On the shelf, it read:

The Azure Dragon Tendon, a Sea Establishment realm refining material for a Sea Quelling Bizarre Treasure, was extremely rare. This Azure Dragon Tendon came from a Sea Quelling realm Azure Dragon

summoned by the Dragon-Subduing World 30,000 years ago. It was priced at 2,080,000 ultra-quality spiritual stones.

“Gulp ~”

Han Fei couldn't move at all. A Sea Establishment realm tendon? This was a perfect match for his Void Lines!

Han Fei immediately waved at the waiter who was patrolling in midair just now. “Come here.”

Seeing that Han Fei wanted to buy something again, the waiter was shocked. This is a big customer!

Even though the service staff in the Martial Emperor City was required not to show their emotions, at this moment, he couldn't help but feel his heart thump. After all, they got a commission for selling things.

“What can I do for you?”

Han Fei pointed at the azure dragon tendon and said, “Let me ask you, how many of this tendon do you have?”

The waiter immediately said, “Please wait a moment. I'll be back soon.”

Three seconds later, the man returned.

However, this time, he followed someone back.

It was a Half-King.

The Half-King said with a smile, “Sir, I'm No. 203. You can call me 203. Even in the inventory of our Martial Emperor City, there are only three Sea Establishment Realm Azure Dragon Tendons.”

Han Fei frowned. “Not enough.”

203 seemed to understand and immediately smiled. “I wonder if you're interested in those in the Half-King realm?”

Han Fei shook his head. “No.”

Xia Xiaochan couldn't help looking at Han Fei. “Are you going to make a fishing pole?”

Han Fei smiled. “It's very useful for me. I'll tell you later.”

203 said, “Mr. Han Fei, in fact, if you can accept the tendons of other creatures, such as the tendon of the Sea Swallowing Demon Whale, the tendon of the Mountain Sea Divine Turtle... If you can, we can provide you with a total of 21 tendons in the Sea Establishment Realm.”

Han Fei's eyelids twitched. “Are their qualities similar to that of this Azure Dragon Tendon?”

203 replied, “They're about the same. They're all tendons of creatures in the Sea Establishment realm. However, they might not have peeled off after the Sea Establishment creatures died. Some of them were sold by the Sea Establishment creatures themselves, and some were obtained after they shed their

bodies. But most of them are similar in nature. In terms of price, they're all within the range of 200,000 ultra-quality spirit stones."

Han Fei said, "Give me eleven."

203 smiled happily. He flipped his hand and a string of jade slips appeared in his hand.

He said, "I'll choose eleven of the best quality for the two of you. There are prices on them. You can take a look. When you pay the bill, you can check the real things. If you don't like any of them, you can choose not to buy it."

Han Fei nodded slightly. "That's good."

Han Fei was about to take Xia Xiaochan to continue shopping, when 203 said, "Mr. Han Fei, this should be the first time you've come to the Martial Emperor City. Perhaps you don't know that if you spend ten million ultra-quality spiritual stones in our shop, you can get a 5% discount. If you spend twenty million, you can get a 10% discount. The upper limit is 30%."

Han Fei's eyelids twitched, meaning that it was most worthwhile to buy 60 million? The actual payment only needed 42 million!

How could Han Fei resist it?

Even Xia Xiaochan narrowed her eyes.

The two of them definitely had 42 million ultra-quality spiritual stones.

Han Fei smiled. "That's not bad. Let's continue shopping."

203 smiled and said, "Take your time. I'll serve you at any time."

Han Fei had just taken two steps when he suddenly turned around and asked, "By the way, does your shop collect resources?"

203 immediately smiled and said, "Sure. Most of these resources were collected by us. In the Martial Emperor City, except for the auction house, the price of resource recovery is basically the same, with the difference of less than 10%. The recovery price offered by our super resource store is quite reasonable."

Han Fei's heart did a flip. "That's great!"

Han Fei and Xia Xiaochan had already decided to spend 60 million here today. After all, although the things here were good, not everything was good enough!

After looking around, Han Fei found that there seemed to be a lot of materials in the Sea Establishment Realm here. How many kings had died? Uh, plus molting... However, how many times could a king molt in his life?

If he wanted to buy them all, hundreds of millions wouldn't be enough.

Therefore, Han Fei summoned 203 again.

As if knowing that Han Fei would summon him, 203 appeared in front of Han Fei in an instant.

Han Fei said, "Are there any maps here? It will be more convenient for us to find what we want to buy."

203 smiled and said, "Yes. I didn't show it to you before because most guests like to see products with their own eyes and don't like to read the product catalog."

Han Fei said, "You should have told me earlier! Give me the product catalog. How long will it take for me to check all the products one by one?"

203 was already prepared and handed Han Fei and Xia Xiaochan a jade slip each. Then, he quietly left without disturbing them.

When the two of them were quickly browsing the jade slip, their expressions kept changing. They were clearly shocked.

Xia Xiaochan said, "Han Fei, I found a treasure."

Han Fei said, "I found a treasure too."

Xia Xiaochan said, "I found another treasure."

Han Fei said, "Me too. I found something better."

...

Chapter 1837: A Transaction by Hundreds of Millions

The two strolled and chatted.

Finally, Xia Xiaochan said, "The essence blood of a Merman Emperor, 9.8 million per bottle. God, I want this."

Han Fei said, "A sixth-grade soul pill worth five million. After taking it, it can produce chaotic power. It's said that it can increase the power of the soul by ten percent. Unfortunately, you can only take one."

Xia Xiaochan said, "Huh? The Deep Sea Nether Spring I saw can also improve and stabilize the soul. One catty is only ten thousand ultra-quality spiritual stones."

The two of them chatted, feeling that the resources of the entire shop were already theirs.

After a long time, the two of them slowly came back to their senses.

Han Fei's body heated up and he felt that his nose was about to bleed. If possible, Han Fei really wanted to take all these resources.

However, after they calmed down, the two of them discovered that they couldn't be too crazy when buying things. They calculated for a moment and realized that if they wanted to buy everything here, even a billion wouldn't be enough.

Therefore, in the end, the two of them surrendered to money.

After half a day, it was already late.

The number of customers in the shop gradually increased, although cultivators never cared about day or night.

However, at night, people would always seek excitement, especially in the Martial Emperor City.

At this moment, the auction was about to start.

The restaurants were open for business, and there was a steady stream of people in the mission center.

There were several times more people in the super resource stores where Han Fei was.

Ring! Ring! Ring!

While many people were choosing resources that they thought would be of great help to them, they heard jingling sounds.

Then, a man and a woman were walking over holding a lot of jade slips in their hands.

The man looked ordinary, but he had an extraordinary temperament. As for the woman, she was so beautiful that she looked like a celestial being.

“Huh? Are they... Han Fei from the Avenger Pirates?”

“And the princess of the Mermaid Royal Family?”

“Is he Han Fei who dares to attack the Infinity World’s fleet head-on?”

Someone said, “Didn’t he run away?”

Someone sneered. “What do you know? He defeated Li Xinghen and escaped safely from Bei Xuanbing.”

Someone exclaimed. “It’s all because of the Twin Divine Technique of the Yin-Yang World. It’s said that the Twin Divine Technique is the best escaping technique in the Raging Sea. It’s normal that he could escape.”

Someone sighed. “It seems that the Yin-Yang World is really going to reappear in the Raging Sea. Otherwise, why would Han Fei dare to make such a big fuss?”

However, Han Fei and Xia Xiaochan didn’t care what these people were discussing.

The two of them carried a pile of jade slips, their minds filled with the value of these things.

The checkout room was huge.

This was because some things were very large. For example, the shell of the Ancient Black Turtle that Han Fei wanted had to be checked on the spot. Once the product left the shop, no matter what the problem it had, it had nothing to do with the super resource store.

Han Fei threw the pile of jade slips over.

Soon, someone was responsible for the delivery of the products.

The waiters lined up and gave Han Fei resources.

Someone exclaimed, "Isn't that the shell of the Ancient Black Turtle? That thing has been hanging there for hundreds of years. How can it be sold today?"

Someone was puzzled. "Isn't it said that the Ancient Black Turtle Shell Armor is extremely difficult to refine? The one from the Thunder Fire World said that the armor comes with a Heaven and Earth Spirit Array. If you're not careful, the array will be destroyed. What's the use of buying this thing?"

Immediately afterward, someone suddenly exclaimed, "What is that green fan? Could it be the leaves of the Divine Demon Vine?"

"Hiss! It's the Divine Demon Vine Grass Leaf, which costs 3 million ultra-quality spiritual stones per leaf. There are a total of nine leaves! How rich is this guy?"

Gulp!

Many people swallowed hard.

The value of these two things alone had already exceeded 30 million ultra-quality spiritual stones. The two people simply had money to burn!

Han Fei couldn't pretend that he understood it at first glance. He had to check the products.

Han Fei knocked on the armor a few times with an ultra-quality divine weapon. Then, he cut the leaves of the Divine Demon Vine a few times before putting them into the Sun-Moon Shell.

There were 20 spiritual fruits like the Dragon Blood Fruit.

Although this also caused a small uproar, it was far smaller than the previous two.

However, when the Half-King's demonic origin appeared, the sea demons and even the mermen exclaimed.

"Half-King demonic origin? No, they're Half-King Merfolks' Pearls... If I remember correctly, each of them will cost more than 1.2 million ultra-quality spiritual stones. Besides, if one hadn't had a top cultivation technique, the Half-King Merfolks' Pearls wouldn't be of much use, so the princess wants to buy them. If it were someone else, the effect would probably be greatly reduced."

Immediately afterward, everyone became more and more shocked.

"Oh my god! Sixth-grade soul pills? There are only three of them in the resource store. Each of them is worth five million, which can buy a Sea Quelling Bizarre Treasure."

"The essence blood of a Merman Emperor. This thing has been hung there for more than 900 years with the price of 12 million. Now, is it finally sold?"

"Are those Azure Dragon Tendons? Oh my god, a dozen? Why does he want to buy so many of them? To weave a net?"

More and more people were watching the checkout.

Even if it was just to see the rich people burn money, it would be worth it.

Xia Xiaochan asked Han Fei via voice transmission, "Do we really have enough money?"

Han Fei said, "Don't panic! Enough! Definitely enough."

203 handled the checkout for them himself, and Han Fei even felt the gaze of a king.

203 bid one by one.

Ancient Black Turtle Shell Armor, 3,980,000.

Dragon Blood Fruit, 2 million.

Ten Half-King Merfolks' Pearls, a total of 13.1 million.

A bottle of the essence blood of a Merman Emperor, 9.8 million.

11 king-level tendons, a total of 23.06 million.

Three sixth-grade Soul Pills, a total of 15 million.

500 catties of Deep Sea Nether Spring, a total of 5 million.

Nine leaves of the Divine Demon Vine Grass, three million per leaf, a total of 27 million.

...

Then, 203 looked up at Han Fei and said with a smile, "Captain Han Fei, the total amount is 98,940,000. I'll give you a 30% discount, so the total price is 69,250,000."

"Hiss ~"

Gulp!

"This is what rich people should be like!"

"His wealth is comparable to that of the top ten pirate groups!"

Someone sneered. "Not only won't they lose, but the top ten pirate groups won't be so rich. Their money has to be distributed to so many people."

Someone snorted. "What do you know? Which commander of the ten pirate groups has less than a hundred million?"

Han Fei had no time to listen to these people's discussion. When he paid, his face turned green... He accidentally overbought! There were 27 million more than 42 million.

This was the biggest deal Han Fei had ever made.

Han Fei said, "Can I trade with ultra-quality spiritual weapons?"

203 was stunned for a moment and then smiled. "Of course. However, it has to be at least an ultra-quality spiritual weapon. Our super resource store doesn't accept anyone below the quality of an ultra-quality spiritual weapon."

Han Fei nodded slightly. With a thought, in front of him, with clangs, a large number of glittering ultra-quality divine weapons were piled on the ground like a mountain.

There were as many as 3,000 of them.

203 didn't expect Han Fei to take out so many ultra-quality divine weapons at once! Even the Thunder Fire World couldn't take out so many ultra-quality divine weapons at once!

It must be noted that the refinement of an ultra-quality divine weapon required a professional refiner to refine it for a few months. Some weaker refiners even needed years, decades, or even hundreds of years to refine it. Who wouldn't be shocked when Han Fei casually took out more than 3,000 pieces?

However, 203 was very happy that Han Fei used ultra-quality divine weapons to trade.

These Sea Establishment materials were too difficult to sell.

However, ultra-quality divine weapons were too easy to sell. Besides, the purchase price was not high. The average price was less than 25,000 ultra-quality spiritual stones.

So they could earn much more than simply selling Sea Establishment realm materials.

Before the appraisers, who had already been prepared, began to appraise the ultra-quality divine weapons, he suddenly saw a middle-aged man appear at the trade scene.

As soon as this middle-aged man appeared, 203 and the others immediately cupped their hands and bowed.

"Master King Yue."

The man nodded slightly.

Xia Xiaochan said to Han Fei via voice transmission, "Bai Yue, known as King Yue. I only know that he is one of the kings of the Martial Emperor City."

Bai Yue glanced at Xia Xiaochan and said, "I'll personally check these resources!"

Buzz!

All kinds of ultra-quality divine weapons flew past. It only took Bai Yue half an hour to finish counting them.

Then, he took a deep look at Han Fei and said, "There are a total of 3,000 pieces. The total price is 24,000 ultra-quality spiritual stones per piece. Any objections?"

Han Fei shook his head. "No."

Han Fei didn't take out some common weapons in the first place. He only took out these 3,000 weapons that he thought were of average quality.

Of course, they were still all ultra-quality divine weapons.

Bai Yue said, "If there's no other deal, we will pay you another 3.45 million ultra-quality spiritual stones, and this deal will be over."

Han Fei nodded slightly. "That's good. I wonder what the collection standards of the resource shops are?"

Bai Yue said, "We won't accept resources below the peak of the Venerable realm unless they are extremely special. Of course, the other shops on the island will very likely accept them. However, in the Martial Emperor City, resources below the Venerable realm are not circulated. Some ordinary resources are very cheap. The valuable ones are all good."

Han Fei nodded slightly. "Got it. Deal over."

Bai Yue nodded slightly.

In the next moment, he disappeared.

Today, everyone present was stunned. Han Fei and Xia Xiaochan had almost bought a hundred million worth of resources. What were they going to do? To become kings?

Chapter 1838: Martial Demon Cave

This time, Han Fei paid a heavy price.

Although Han Fei had a lot of resources, they couldn't withstand such consumption.

Han Fei planned to keep many resources and take them back to the Yin-Yang World.

However, when he was shopping in the super resource store, he really couldn't control himself.

For example, when he saw the leaves of the Divine Demon Vine, Han Fei knew that the leaves were made of precious Divine Demon Threads. If he used them to refine battle suits, he could even refine a Sea Quelling Bizarre Treasure-level battle suit.

To put it bluntly, it should be easy to refine nine sets of battle suits with the nine leaves, which equaled nine sets of Sea Quelling Bizarre Treasures!

Also, the sixth-grade Soul Pill... If this thing was to be auctioned, the price might be 5 million higher than now.

There were still some in the resource store because the resource store had a rich variety of items. It was a high-end store, so such high-end things couldn't be lacking.

Of course, among these things, the first things Han Fei could use were the 11 big veins.

Those were the tendons in the Sea Establishment Realm!

Using them to refine the Void Lines, its power was enough to shake Sea Establishers. To deal with a Half-King? There would almost be no miss.

The news that Han Fei and Xia Xiaochan spent billions in the resource shop spread throughout the entire Martial Emperor City in a moment.

After all, they spent too much money!

Although the Martial Emperor City was said to have countless treasures, it was rare for someone to spend billions like Han Fei.

Even the leaders of the ten pirate groups had never spent so much money before.

Of course, the main reason was that these things were useless to them. They didn't know how to refine weapons or refine pills... As for the things like sixth-grade soul pills that could increase their strength, they had already bought a lot.

At this moment.

Not long after Han Fei left the resource store, he saw Li Kaitian.

Seeing Han Fei, Li Kaitian immediately greeted him, "Captain, I heard that you came to the island and the resource store... Old Song was afraid that you didn't have enough money, so he asked me to send you money."

Li Kaitian immediately took out a Sun-Moon Shell and handed it to Han Fei.

Then, he looked in the direction of the resource store and asked tentatively, "Have you finished buying?"

Han Fei said, "If I wait for you to deliver me money, I would have been detained for a long time. Is there 20 million here?"

Li Kaitian nodded. "Captain, is your information true? We could've asked for more, but we didn't know it!"

"Heh!"

Han Fei said impatiently, "Forget it. I've already been to the intelligence center. It can't be much higher. Let's go back first. The Martial Emperor's inheritance will open in two days. Let's go back and study it."

"Hey! Captain, what did you buy? We haven't visited this resource store yet. It's said that the things inside are quite expensive, easily charging hundreds of thousands."

As soon as Li Kaitian said so, someone exclaimed not far away, "Look, that's the Avenger, Han Fei. He just bought a hundred million worth of goods from the resource store."

"Wow, a pirate captain is indeed extraordinary."

Someone greeted Han Fei, "Captain Han Fei, is the Avenger still recruiting?"

Han Fei said casually, "No."

The man only felt it was a pity, but he didn't take it seriously.

However, Li Kaitian was stunned. What did he mean by buying goods worth a hundred million? Was the captain that rich?

Li Kaitian still remembered that Song Kaiyuan and the others discussed that Han Fei might have 30 to 40 million ultra-quality spiritual stones.

Logically speaking, this money should be enough.

Song Kaiyuan only asked him to deliver Han Fei money just in case. However, he bought a hundred million? Was twenty million really a lot?

Han Fei asked, "What are you waiting for? Lead the way!"

Night fell. In the sky above the Martial Emperor City, there were no clouds or mist. One could still see the moonlight and the stars.

Just as Han Fei and the others were about to reach the rented yard, suddenly, Han Fei glanced at a figure in the distance.

The figure didn't intend to hide but appeared in front of everyone in an instant.

Li Kaitian was still dumbfounded. Who the f*ck is this?

However, Xia Xiaochan's face changed.

Han Fei looked at the coquettish face and the mocking smile. He was immediately in a bad mood. Even if he had just spent a hundred million, he still felt bad.

Han Fei said indifferently, "Long time no see! Why? Are you going to attack me in the Martial Emperor City?"

The man opposite him chuckled. "I didn't expect a little guy to reach such a level in such a short time. It's a little beyond my expectations."

Han Fei sneered. "There are still many things you didn't expect ... We haven't settled our scores yet. You killed me once, remember?"

Chun Huangdian held his head high and smiled with his hands behind his back. "With your current strength, you're not qualified to settle scores with me. Let's talk after you transcend the heavenly tribulation!"

Then, Chun Huangdian looked at Xia Xiaochan and said, "Little Princess, all these years, I indulge you squandering resources and exploring secret realms and holy lands. Is this how you repay me?"

Xia Xiaochan blushed, but she still raised her head and said, "Don't think I don't know... You have an ulterior motive. You taught me and gave me resources just to wake up my mother. I'm just too weak to wake her up. Otherwise, why would you nurture me?"

Chun Huangdian said leisurely, "What you said makes me really sad. It seems that women betray easily. Now that your man has come to you, you betrayed us without hesitation although you are our princess!"

Li Kaitian listened on the side and felt the sweat on his back dripping down. He secretly swallowed.

Judging from the conversation between the two of them, the person in front of him should be Chun Huangdian from the Merman Royal Family. It was said that he was one of the top ten kings in the entire Raging Sea.

Han Fei said, "Do you have anything else? If not, get out of the way. I don't have time to talk to you."

Chun Huangdian's lips curled. "Sure enough, now that you are in the Martial Emperor City, your tone becomes so tough. However, do you think you can stop me by making up some groundless information?"

Han Fei said, "We'll see when the time comes. You'd better not give me a chance to grow up... Otherwise, I'll let you know what regret is."

Chun Huangdian chuckled. "Let's wait and see."

With that said, Chun Huangdian still had his hands behind his back. In two steps, he disappeared from the street.

After Chun Huangdian left, Han Fei still looked awful.

Han Fei secretly wondered if he had underestimated Chun Huangdian. It seemed that the information alone was not enough.

Xia Xiaochan said, "Don't worry. At least in the Martial Emperor City, he won't have a chance to do anything."

Han Fei nodded slightly. "OK! Forget him. Let's see how to deal with him after we get the Martial Emperor's inheritance."

The next day.

Han Fei's deeds continued to spread in the Martial Emperor City.

The news about the Oracle and Chun Huangdian had finally spread throughout the Martial Emperor City.

When the news spread, the entire Martial Emperor City was in an uproar. For a moment, the strong masters in the Martial Emperor City changed their opinion of the merman race.

In the past, although the merman were powerful, they weren't strong enough to dominate the Raging Sea. However, after this news spread, the merman's image in everyone's hearts changed a little.

Song Kaiyuan and the others went out to shop early in the morning to get some information about the Martial Emperor's inheritance.

Han Fei didn't go out again.

At this moment, Han Fei could feel the arrival of his clone, which meant that Xue Zhan had come. However, this was normal. The Heavenly Talents of the Thirty-Six Heavenly Palaces must have all come for the Martial Emperor's inheritance. If Xue Zhan didn't come, it would be strange.

However, this time, Han Fei had to find a way to withdraw his clone. After all, without a clone, Han Fei's strength was not at its peak.

The next morning.

Han Fei used the one day in Forge the Universe to refine all ten Azure Dragon Tendons. This was the only way Han Fei could quickly improve his strength.

As for the other resources, he would refine them one by one when he had enough time.

Today was the day the Martial Emperor's inheritance was opened.

Song Kaiyuan and the others had already quietly returned to their camp. And Han Fei relied on intelligence to go straight to the mountains in the south of the city.

In the lush mountains, there was a flat valley. On the plain here, there was a black mist. When Han Fei saw the black mist, his pupils were constricted slightly.

“Huh? Why does this look like the star sea mist of the Thousand Star Proving Ground?”

At this moment, there were more than 23,000 people standing in the square, from junior Venerables to Half-Kings.

Among these people, there were very few junior and intermediate Venerables, but most of them were advanced Venerables and peak-level Venerables.

Even so, there were more than 23,000 Venerables here!

This number made Han Fei realize that there was no shortage of Venerables in this world! The Venerables in the entire Raging Sea were probably several times more than this.

When Han Fei and Xia Xiaochan arrived, they immediately attracted the attention of countless people.

Among them, many people frowned when they saw Han Fei.

For example, the Golden Crow World, the Medicine King World, the Dream Weaving World, the Spirit Refining World, the Infinity World, the Asura Pirates, the Crimson Fire Pirates, the Predator Pirates, the Fierce Wind Pirates...

These people were all enemies of Han Fei.

Han Fei had robbed too many people from the Thirty-Six Heavenly Palaces. In the Land of King Death, he had robbed almost every world.

On the Snow God’s Temple’s side, Ice Snow Chuling looked at Han Fei who had appeared openly. After hearing what Han Fei had done in the past two days, countless pirates were tempted to rob him.

On the Devil Girl Pirates’ side, Long Wu, Zhenzhu, and a group of Venerables who had interacted with Han Fei looked extremely complicated.

Back then, they didn’t expect this guy to be so terrifying. The Avenger actually dared to provoke others everywhere and even attack the fleet of the Infinity World alone? He was simply a lunatic!

Han Fei ignored these people and stared at the black fog in front of him, saying casually, “So that’s it?”

Chapter 1839: Battle for Luck

Everyone looked at Han Fei and Xia Xiaochan in a different light because they all knew their identities.

One was the commander of the Avenger Pirates. It was said that he had the combat power of the Sea Establishment Realm and had already fought many kings. Except for being defeated by Bei Xuanbing, he had never been defeated.

One was the princess of the Merman Royal Family, whose identity was very noble. She lived a pampered life in the Merman Royal Family and was a high and mighty existence. Not to mention whether she was strong or not, whoever touched her would probably be hunted by the entire Merman Royal Family.

At this moment, more than 20,000 people were gathered here just to participate in this so-called trial of the Martial Emperor's inheritance.

According to the information Song Kaiyuan had obtained, the Martial Emperor's inheritance was just a test and didn't involve the participants fighting each other.

It was said that the Martial Emperor's inheritance had four major tests: luck, challenge, comprehension, and life and death test.

However, the message didn't specify the process.

At this moment, when everyone saw the black mist seal that appeared in the day, they could roughly guess that the trial should be in this mist.

Swish! Swish! Swish!

When everyone gathered, eight Sea Establishers appeared in the air with swishes.

Among them, Han Fei found that he knew two of them. They were Yan Meng from the intelligence center and Bai Yue from the super resource store.

Han Fei didn't know where the other six kings came from, but he estimated that they were all Sea Establishers from the Martial Emperor City. Han Fei didn't believe that there were only eight kings in the Martial Emperor City.

However, the Martial Emperor City was only this big, so they didn't have to send all the kings over. With these people maintaining the order and explaining the rules, it would be enough.

Among these eight people, there was a rather elegant young man wearing a light green robe and holding a paper fan in his hand. His elegant and cultured temperament was very eye-catching.

Xia Xiaochan said, "I know this person. He's Zhang Luotian from the Martial Emperor City. His weapon is the Sky Feather Fan. It's said that his strength is ranked in the top ten of the Sea Establishers in the entire Raging Sea."

Han Fei's heart did a flip. The top ten? This person must be powerful.

Han Fei couldn't help but ask, "Can Bei Xuanbing enter the top ten?"

Xia Xiaochan shook her head. "No."

Han Fei immediately understood.

In this case, the top ten were really powerful. Although he was only fighting Bei Xuanbing with his black-mist body, and his strength wasn't at its peak, it wasn't something ordinary Sea Establishers could defeat with one blow.

Of course, Han Fei didn't know how powerful the top ten were... However, if even Bei Xuanbing couldn't enter the top ten, even if he transcended the tribulation and became a king, he shouldn't be able to reach this level.

After all, they had been in the Sea Establishment Realm for tens of thousands of years. It was impossible for them to be surpassed by a newcomer so easily. Otherwise, what was the point of the existence of the Sea Establishment Realm?

Zhang Luotian said, "Everyone, welcome to the millennium banquet of our Martial Emperor City. The Martial Emperor's inheritance is the only inheritance since the establishment of our Martial Emperor City. So far, no one has been able to complete the inheritance trial 100%. The rules are the same as before, with a total of four rounds of tests. The person with the best result in the trial can propose three conditions to the Martial Emperor City that are within our ability. If one's result of the trial reaches 95%, he can accept the real Martial Emperor's inheritance... Now, the trial will begin in half an hour..."

Han Fei didn't know the contents of the test, but with so many people here, he didn't have to panic. After all, he wouldn't be worse than most people.

After half an hour, the trial officially began.

Zhang Luotian and the others closed the way and nodded slightly. "The first round of the test is a pure competition of luck. In a while, after entering this black fog, anyone who can obtain the golden bead from the black fog will be qualified to carry out the next round of the test. Remember, you can't snatch the golden bead. Don't compete for it needlessly. In the black fog, everyone will be covered in a mist. Therefore, you won't recognize each other, and at the same time, you can't attack others. The entire trial process will last for a day. After obtaining the golden bead, you will be expelled out by the black fog. When the black fog disappears, those who haven't obtained the golden bead will be eliminated."

As soon as Zhang Luotian said so, the black fog automatically spread out.

The eight kings shouted at the same time, "The trial begins."

Swish! Swish! Swish!

More than 20,000 people flew into the depths of the black fog like moths to a flame.

Of course, some people, such as Han Fei and Xia Xiaochan, just walked casually into the depths of the black fog.

Han Fei said, "If the result can be determined soon, it won't take a day."

Han Fei thought that he had never lost a battle of luck. When he was in the Yin-Yang World and the Water-Wood World, his luck was very good. Everyone who knew him knew that he was lucky.

However, what troubled Han Fei was that his clone Xue Zhan would probably gain nothing.

After all, he and Xue Zhan were the same person. Theoretically speaking, he would only get one golden bead.

Before Han Fei entered the depths of the black mist, he saw a person looking at him. When he took a closer look, he saw that it was Li Xinghen.

Li Xinghen said casually, "I'm very curious about how much your secret technique will consume you. However, you can't just rely on secret techniques to become stronger. I'll wait for you in the fourth round."

With that, Li Xinghen walked into the depths of the mist.

Not far away, there was another person looking at Han Fei. That person looked quite ferocious and vicious and had braided hair. He was clearly very fashionable.

The man said, "Han Fei, right? I'm Wu Duishou from the Supreme Clearness World. We both walk the path of invincibility. Nice to meet you!"

Han Fei glanced at him and rolled his eyes. "I hope you die soon. If you die, I won't have any opponents."

With that, Han Fei and Xia Xiaochan swaggered into the depths of the black mist.

Wu Duishou smiled and didn't seem to care, but his eyes lit up. He thought to himself, The master of Yin-Yang World? Him?

Taking a hundred steps forward, Han Fei felt that he was in the starry sky.

At this moment, Han Fei looked aside and found that Xia Xiaochan had disappeared.

In Han Fei's vision, he could clearly see that there were several people nearby who were also at a loss.

When he looked up again, he saw a shooting star cutting through the sky.

Before Han Fei moved, he saw the people around rush at the shooting star with a swish.

Han Fei shook his head speechlessly. Wasn't it said that it depended on luck? It was useless to snatch it. Therefore, Han Fei didn't intend to do such a meaningless thing.

When they were outside, Zhang Luotian had told them that the Martial Emperor's inheritance had a degree of completion.

Han Fei couldn't help thinking, How to measure the degree of completion in this competition for golden beads?

In the starry sky, stars fell one after another.

However, none of them aroused Han Fei's interest.

In the outside world.

Swish! Swish! Swish!

One trial-taker after another appeared in the wilderness outside. These people were holding dazzling golden beads in their hands.

If Han Fei were here, he would definitely find that this thing was clearly a Star Bead, from the Thousand Star Proving Ground in the Yin-Yang World.

In the galaxy, Han Fei raised his head because he saw a shooting star flying towards him.

Han Fei's heart flipped.

Just now, Zhang Luotian said that once he got the golden bead, he would appear in the outside world.

However, at this moment, Han Fei didn't quite understand, so he didn't raise his hand. When the golden light smashed at him, Han Fei tilted his body slightly and quickly scanned it with his perception.

At that moment, Han Fei finally saw it clearly. This was clearly a Star Bead! He had taken so many Star Beads, so he couldn't be wrong. The one just now was a seven-star star bead.

Han Fei frowned slightly. Why were there Star Beads here? Could it be that the Thousand Star Proving Ground in the Yin-Yang World actually imitated the Martial Emperor's inheritance?

However, after missing the seven-star star bead, Han Fei didn't regret it at all. It was just a seven-star star bead. In the Yin-Yang World, he didn't even bother to pick it up.

Six hours later.

More than 20 Star Beads flew past Han Fei one after another. Han Fei didn't take any of them, because there wasn't even a nine-star star bead here. The highest was only eight stars.

"Can I only wait for my luck?"

Han Fei was puzzled.

At this moment, Han Fei's Great Dao changed, and he recited silently, "Here, luck is all on me!"

Han Fei was just testing it out with common sense.

However...

Swish! Swish! Swish!

In the sky, tens of millions of golden meteors smashed at Han Fei.

"F*ck!"

Han Fei was stunned and said in surprise, "A meteor shower?"

Apart from Han Fei, in the starry sky, countless people looked up.

Someone was surprised. "Well... there are so many golden beads. How can we not get any?"

Someone was shocked. "Is this grand occasion caused by someone?"

Someone was shocked. "Hiss, am I so lucky to trigger a rain of golden beads?"

Many people rushed to Han Fei.

Most people thought that this was a natural phenomenon, and those who saw it should have a share.

However, a few people looked horrified and murmured, "There are people with great luck here who can attract Star Beads like rain. Who is it?"

As for Han Fei, the protagonist of this incident, in the face of such a violent storm of Star Beads, his body was moving extremely subtly.

Han Fei activated his soul with the microscopic technique and swept the space.

Swish! Swish! Swish!

When the dense Star Beads passed him, Han Fei didn't attack for dozens of seconds. Seeing this scene, the others who came were all shocked and in disbelief.

"Hiss! This wonder is actually for one person?"

Someone made up his mind and stepped forward to snatch the golden beads.

However, a scorching flame accidentally shattered. His body and soul were suddenly penetrated.

Many restless people were so frightened that they didn't dare to move.

Just as more and more people were watching, suddenly, Han Fei extended his hand into the void and encountered the first nine-star star bead.

However, just as Han Fei almost touched the nine-star star bead...

Suddenly, Han Fei secretly pinched his fingers with his other hand. He immediately looked at the sky, where there was a dazzling Star Bead, and a gentle starlight appeared silently.

Han Fei immediately retracted his hand and grabbed a bead that was not golden but shining with white light.

Chapter 1840: Beat Me

The moment Han Fei held the bead in his hand, he saw golden light pouring into it. The white bead changed color, turning golden, and a ten-star symbol appeared on it.

This was the first time Han Fei had seen a ten-star symbol.

Even in the Yin-Yang World, he had never seen a ten-star Star Bead!

Besides, when Han Fei took the Star Bead, a voice seemed to appear in his mind, "Luck Trial, 100% completion."

Swish ~

Before Han Fei was surprised, the star sea space in front of him disappeared.

Han Fei's eyes suddenly widened. It was the valley field he came from.

After coming out, Han Fei looked down and found that the Star Bead in his hand no longer had a star-level symbol. It seemed to have been hidden.

Although he was surprised that he got a 100% trial result, Han Fei still looked around and searched for Xia Xiaochan.

Seeing that she hadn't come out yet, Han Fei glanced at the others.

Han Fei saw Song Kaiyuan, Jian Hui, and Cang Hongyu from the Dragon-Subduing World, but he didn't see others he knew here.

At this moment, people appeared in this open space from time to time.

Half an hour later, Xia Xiaochan appeared in the open space with a swish.

As soon as Xia Xiaochan came out, she walked around and found Han Fei.

Immediately, Xia Xiaochan ran to Han Fei. "Nine stars. I wonder if this is the highest or the lowest?"

Han Fei noticed that there were eight Half-Kings here. He said with a smile, "I'm also a nine-star. Even if it's not the highest, I don't think anyone among these people has a bead higher than the nine-star level."

What was the identity of the Martial Emperor City?

Han Fei wasn't sure yet.

In short, the completion rate was not set by these people. It seemed that it was judged by another power. Therefore, he only needed to go all the way down the trial. There was no need to shout the result out now.

While Han Fei and Xia Xiaochan were discussing that they had only obtained nine-star star beads, Zhang Luotian and the other Sea Establishment Kings were also secretly discussing.

Zhang Luotian said, "She has got a nine-star star bead. As expected of the princess of the Merman Royal Family. Han Fei is also quite good. Unfortunately, he is still not perfect yet."

Yan Meng said, "Ten-star is a legend. We've never seen it before. In this competition of luck, the top Heavenly Talents should all be nine-star. I wonder... how many nine-star Heavenly Talents there are this time?"

Bai Yue said, "This is just the first trial. There are many latecomers. Let's wait and see."

Suddenly, someone asked, "What are Han Fei and Xia Xiaochan doing?"

Everyone saw that Han Fei and Xia Xiaochan had taken out a big pot, which was stuffed with the flesh of a king and was cooking.

All the kings: "..."

The kings were speechless. You're eating on such a serious occasion? Is this really appropriate?

However, Song Kaiyuan and the others who had eaten Han Fei's hot pot couldn't help but turn green when they saw Han Fei take out the big pot. Come on, Captain, can you still eat on this occasion?

Half a day later.

"Slurp! Ah ~"

Han Fei took a bite of the shrimp meat.

At this time, many people had come out.

Many Venerables were stunned to see Han Fei and Xia Xiaochan eating.

Someone was lost for words. "They must be deliberately interfering with our thoughts."

Someone exclaimed, "Are they cooking the flesh of a king? That's too extravagant!"

Most people smelled the rich fragrance and had to stabilize their minds and close their sense of smell in case their minds were disturbed.

During this period, Han Fei was surprised. For some reason, his clone, Xue Zhan, also came out.

This meant that Xue Zhan had also obtained a Star Bead.

Ice Snow Chuling was also very confused. She looked at Han Fei and then at Xue Zhan, thinking, Isn't this said to be a test of luck? How can a person have two different results?

One day passed.

More than 17,000 people came out of the black fog.

In other words, in the first round, theoretically the simplest test, more than 6,000 people were eliminated. This was just the first round.

Buzz!

Zhang Luotian raised his hand, and the black fog slowly disappeared. The remaining more than 6,000 people appeared in another open space.

Most of these people didn't look good.

Those who could come to the Martial Emperor City to participate in the trial of the Martial Emperor's inheritance were at least carefully selected. Many people felt that they had great potential, but they were eliminated.

Among the eight kings, someone shouted, "Those who are eliminated leave within a hundred seconds."

Buzz—

After the eliminated people left, not far in front of everyone, four doors appeared in a row, existing in the form of void vortices.

These gates were of different colors.

When the vortex spun, it caused strange light ripples. It looked white, blue, red, and dark red.

Zhang Luotian nodded slightly at the other kings and then said, "In the next trial, most of you will be eliminated. However, it doesn't matter if you are eliminated. Once you feel that you are in a life-and-death crisis and have no way to survive, remember to crush the golden bead in your hand. Otherwise, you may really die."

Everyone couldn't help but look at the golden bead in their hands.

At this moment, the golden beads had already fused with their spiritual will. With a thought, they would appear completely in their hands.

What made them look solemn was that there was a chance of death in the second trial. But with this golden bead, it shouldn't be a problem.

However, there were still some people who were puzzled by the four doors. Someone said, "Masters, which door should we enter?"

This time, it was Yan Meng's turn to speak. She said, "You need to ask the golden bead in your hand which door you should enter. Take out the golden pearl first. If you sense which door is most attractive to you, go to that door."

Everyone hurriedly tried, and someone immediately received feedback.

"Mine is the first white door. It's summoning me."

"I'm also the first door."

"Huh? I'm the second door. I only took a four-star golden bead. I thought it was very low. It seems that it should be better than the first door."

"Yes! I'm also the second door."

"Huh? Are yours both the second door?"

Just as most people were summoned by the first and second doors, someone suddenly said, "Look, Nangong Yu from the Dreamweaving World is walking towards the third door."

"Hey, Li Xunfeng from the Wind Slaying World is also the third door."

"What! Jian Hui from the Supreme Mystic World is actually the fourth door."

At this time, the difference of one door represented the difference in talent, luck, and the quality of the Star Bead in the eyes of the trial-takers.

Xia Xiaochan looked at Han Fei and said, "I can sense the third and fourth doors, but I feel more attracted to the third door."

Han Fei held the Star Bead. He only felt the summoning from the fourth door, but not the third.

However, the two of them saw that Li Xinghen, Wu Duishou, Jian Hui, Song Kaiyuan, Li Xunfeng, Wu Hao, and Cang Longyu had all gone to the fourth door.

Han Fei couldn't help but say, "Your talent and bloodline are much stronger than theirs. Therefore, their connection to the third door should be very strong too. However, because they were summoned by the fourth door at the same time, they chose the fourth door. If I'm not wrong, this second checkpoint is also used to eliminate people. When the time comes, if there's really danger, crush the Star Bead. Don't hesitate."

Xia Xiaochan nodded. "Let's go! I'll choose the fourth door too."

Han Fei nodded slightly, but he casually glanced around.

Now that he had taken a ten-star star bead, shouldn't he have some special treatment? How could he be differentiated from those taking a nine-star star bead?

Unfortunately, there were only four doors. Han Fei had no choice but to enter the fourth door.

Apart from the Thirty-Six Mystic Worlds, the merman race, the hundred demon race, and the undersea human race were in a similar situation to the human race. Those who could enter the fourth gate were extremely rare.

In the Raging Sea, there were a total of 167 people who entered the fourth door.

This number was too small among the huge number of 23,000 trial-takers. It was not even one percent. Among the Heavenly Talents, it was one in a hundred.

Last time, when Han Fei and Xia Xiaochan entered the black fog, they were separated. This time, they entered the door hand in hand. However, when Han Fei appeared in this door world, he was separated from Xia Xiaochan again.

However, Han Fei didn't really care.

Few people could resist Xia Xiaochan when she used full strength.

Han Fei observed his surroundings and found that there was a calm lake in front of him.

There was only a crescent moon in the sky, and there were no ripples on the lake under his feet. Only when he stepped on the water would there be a few ripples.

Han Fei wanted to release his perception, but he immediately discovered that his perception range was only a thousand kilometers.

“Wait a minute ~”

Han Fei was stunned for a moment and immediately found that something was wrong. It was not that his perception range was only a thousand kilometers, but that this world was only a thousand kilometers.

In the middle of the water, Han Fei saw a young man.

The young man was sitting cross-legged on the water like a statue. He looked very ordinary and had a square face and a burly figure. At this moment, he was very quiet as if he was meditating.

However, when Han Fei came here, the young man suddenly opened his eyes. “There you are! If you beat me, this level will be cleared. However, I won't hold back.”
