

GOF 1991

Chapter 1991: Man-eating Red Mist Sea

Perhaps because it wasn't time yet, the entrance to the Monarch Palace hadn't been opened. During this period of time, Han Fei didn't know if it was the hunting feast of all the Half-Kings who came to explore the Monarch Palace or the hunting feast of the native creatures here, but there was inevitably a crazy battle.

After everyone left, Han Fei wandered deeper.

Han Fei wondered if he would encounter Sea Establishers from other Heavenly Palaces, the Hundred Demon Clan, and the Undersea Human Clan here. This was because these people were conceited about their strength and would often go to the center.

The closer he got to the center, the higher the probability of encountering them. At least, that was what Han Fei thought. As for where the center of this sea area was, he just needed to look at the surrounding environment.

In the environment, the more red there was, the closer to the center.

Without thinking, Han Fei flew thousands of kilometers away.

However, as soon as Han Fei appeared, he saw a burst of black poisonous stingers shooting at him. Han Fei took a look and found that it was just an advanced Venerable sea urchin. How dare it even attack him?

Han Fei didn't even bother to respond. How could an advanced Venerable understand the speed of a Sea Establisher?

"Humph ~"

As Han Fei snorted, the terrifying pressure crushed the sea urchin into a pancake, and even its soul and body exploded. It was deader than dead.

Han Fei didn't pay much attention to it. He just thought that the abnormal movement in the Monarch Palace had a certain effect on these marine creatures, making them crazy. They could feel how terrifying he was before, but now they couldn't?

In fact, as Han Fei expected, some creatures still dared to attack him.

Of course, not all of them chose to attack him. Perhaps it was because some creatures were too excited and crazy.

However, none of these creatures that took the initiative to attack Han Fei were in the Half-King realm. Perhaps he hadn't encountered them, or maybe the Half-Kings had a certain level of consciousness.

Anyway, after Han Fei went deeper into this place for another million kilometers, he found that the further he went, the fewer creatures would attack him.

At this moment, a broken crab lay at Han Fei's feet.

In the environment he was in, the overall color was already red, which meant that most of the colorful colors in the early stages had disappeared. The remaining colors were mostly red or similar colors. The color was dark and looked very dim, like a neon city in the mist.

In the depths of the red mist sea, there were many strange rock walls.

Han Fei grabbed the Vast Ocean Navigator, looking for the most suitable entrance for him.

However, the Vast Ocean Navigator didn't move. Seeing this situation, Han Fei curled his lips and sat cross-legged. Before the entrance came out, it was meaningless for him to search blindly.

As for the central area, he should have already arrived. As for why he didn't meet any other kings, maybe they didn't come in at all, or maybe perception didn't work in this place, but he just didn't meet any of them.

In fact.

Outside the Red Mist Sea.

At this moment, the Half-Kings of the various Heavenly Palaces in the Thirty-Six Mystic Worlds were entering the Monarch Palace.

It was impossible for them to form groups to explore the Monarch Palace. Even if they wanted to, it wouldn't be now. Instead, they would form groups inside the Monarch Palace in the form of humans, sea demons, mermen, Merman Royal Family, and undersea humans. At this moment, the only thing everyone needed to do was to find the entrance.

Therefore, the ships of the Thirty-Six Mystic Worlds were relatively scattered, because this time, not only did Half-Kings enter the palace, but many masters of the Heavenly Palaces also wanted to enter the Monarch Palace.

For example, when the Snow Lady came to the sea of red mist, she didn't stop at all and shouted, "Everyone, follow me in. After entering the red mist sea, disperse and find the entrance."

"Yes, Master Snow Lady."

In the Million Poison World's side, Huang Jie also led the Half-Kings into the red mist sea.

Huang Jie said, "All of you, listen to me. There are many strange poisons here, but don't be greedy. Your purpose of this trip is not to collect poison, but to become a king. Once you reach the Sea Establishment realm, you will have 100,000 years or even longer to study poison. You have to be clear about your priorities."

"Yes! Patriarch."

As for the Supreme Clearness and Infinity's side, their momentum was much greater. Supreme Clearness and Infinity set off with Golden Crow, Dream Weaving, Five Elements, Mad Corpse, and other Heavenly Palaces.

On the surface, it seemed that Supreme Clearness and Infinity, as the leaders of the Thirty-Six Mystic Worlds, were taking care of the other Heavenly Palaces, but in fact, they just wanted to make these Heavenly Palaces submit to them.

In fact, once they entered the Red Mist Sea, they would still go their separate ways. Only when these people entered the Monarch Palace would they have a chance to gather again. However, this method was extremely unwise in the eyes of some independent Heavenly Palaces. The treasures were limited, the resources were limited, and it was so dangerous in the Monarch Palace. Who would take the resources they snatched? Now they seemed to be harmonious, but it was unknown if they would get along the whole time.

Wu Duishou from the Supreme Clearness World, Li Xinghen from the Infinity World, and these seed-type powerhouses all had the potential to become kings. Each of them took many treasures with them.

This time, they ignored Han Fei and had no intention of hunting him here. Even Bei Luo Chen didn't intend to do so.

This was because the range of this red mist sea was too large. Who knew from which side Han Fei would enter? Even if their perception range was very large and they could find Han Fei, so what? They had seen Han Fei's speed more than once.

On the side of the Hundred Demons and the undersea human race.

A king leader said almost the same thing, "Those who enter the Monarch Palace don't have to fight fearlessly. Finding a way to become a king is the only thing you need to consider. Becoming a king is more important than anything."

In the dark, from all directions of the Red Mist Sea, teams of itinerant Half-Kings rushed in from time to time.

There were even some extremely strange humanoid creatures rushing in. If Han Fei were here, he would definitely recognize that they were from the giant beast race.

On the Merman Royal Family's side.

Xia Hongzhu stood quietly outside the Red Mist Sea. Her power passed through the red mist and collided with an invisible force in the depths of the Red Mist Sea.

Buzz!

A violent wave immediately swept across the Red Mist Sea, and furious waves surged above the sea.

Xia Hongzhu couldn't help retracting her power, and she said, "I can't tell what kind of power it is, but it may not necessarily be a living creature. It seems that this Monarch Palace is real and quite difficult. I suspect that Sea Establishers won't be able to explore the entire Monarch Palace and control all the treasures in it."

Chun Huangdian: "I don't know. I've never been there."

Li Qingdi said, "It's indeed dangerous inside. The last time I entered, I encountered a severed hand. At that time, I thought I was already the strongest in the Sea Establishment realm, but I could only have a narrow escape from that hand and almost died."

Xia Hongzhu couldn't help looking at Li Qingdi. "A severed hand?"

Li Qingdi said, "Yes! A severed hand that can attach to others."

While Xia Hongzhu was in a daze, a big ship came over. It was a battleship from the Martial Emperor City. The Martial King stood at the bow, but before he said anything, a king shouted, "All Half-Kings, follow me into the Red Mist Sea."

The Martial King didn't seem to care much about this. Instead, he looked at Xia Hongzhu from a distance.

When the Martial King saw Xia Hongzhu, he couldn't help narrowing his eyes and nodding at her. "Greetings, Your Majesty."

"You know me?"

Chun Huangdian looked at the Martial King and said leisurely, "This person is the Martial King. He built the Martial Emperor City and can suppress the Raging Sea alone. No Sky Opener here is his match."

Xia Hongzhu nodded slightly and then said, "If you hadn't wasted a hundred thousand years, you might not be weaker than him."

...

After the Half-Kings of the major powers entered the Monarch Palace one after another, after only a hundred seconds, one of them died. This person was from the Thunder Fire World. Lei Qing looked at the broken jade slip in his hand and couldn't help cursing, "I told you to be careful, b * stard."

Red Mist Sea.

As Han Fei expected, at this moment, more than 4,000 people had broken in. With the addition of itinerant cultivators and people from the Martial Emperor City, it was certain that there would be more than 5,000 people.

It was unknown if these people were hunting or being hunted. They had no goal. They only knew to rush into the depths of the Red Mist Sea. Along the way, some people were lucky and didn't encounter strong enemies in the Half-King realm. Some were unlucky and didn't see through the creatures' disguises and were killed on the spot.

For example, there was a Lobster Demon who was holding a spear full of energy and was very vigilant.

He crossed a winding sea grass and had already killed a sea urchin, a centipede, and an octopus.

Just when he thought that there was no danger around, he temporarily stopped on a colorful stone pillar. Suddenly, a black light enveloped him.

Crunch ~

This shrimp soldier didn't even know how he died. If he was still alive, he would see that a certain section of the sea grassland he passed through bared its fangs and brandished its claws. It was clearly an algae centipede, and it was still chewing.

There were many situations like this.

After waiting for about six hours, the Vast Ocean Navigator finally turned.

Chapter 1992: Neon Wall in Blood Light Bay

Han Fei followed the Vast Ocean Navigator and came to a strange place. There was a crack no more than a kilometer long and only seven or eight meters wide at the surface of the ground. It was very inconspicuous.

Even Han Fei's casual slash would leave a crack more than this size, so under normal circumstances, even if someone noticed it, they might not go deep into it.

But the Vast Ocean Navigator was pointing at this place. Han Fei didn't hesitate to enter it. As soon as he went down a hundred meters, he saw a dark red color on the rock walls on both sides.

However, on this dark red rock wall, there were also some strange green and yellow glimmers.

Less than a thousand meters down, suddenly, a snake head emerged from the rock wall. To be precise, it didn't look like a snake, but more like dead wood at the bottom of the sea, a rotten black block. If Han Fei hadn't seen its information, he would have thought it was a stone pillar smashing at him.

Information popped up in Han Fei's eyes.

< Name > Blood Light Rock Python

< Introduction > Living in a place full of blood and corroded by filthy blood all year round, it grows extremely fast, but it also dies extremely quickly. Its life may only be more than 500 years. Its blood contains poison. If infected by the poison, one's vitality will flow away, his body will decay, or his blood will melt, so it can't be underestimated.

< Level > 89

< Quality > Legend

< Realm > Half-King

< Chaotic Qi Contained > 48 wisps

< Battle Technique > Blood Explosion, Dimensional Devour, Blood Soul Devouring

.....

< Collectible > Blood Poison, Soul Devouring Eye...

< Absorbable >

"Huh?"

Han Fei slashed back, and the knife light illuminated the area. How could a mere Half-King withstand the suppressing pressure of a king?

With a single slash, the Blood Light Rock Python was minced into pieces. The Void Lines quickly buckled down and absorbed the Chaotic Qi.

Because this Blood Light Rock Python could only live for 500 years, it had very little Chaotic Qi. Han Fei didn't think it was a big deal that it became a Half-King with such a short lifespan. Maybe it was because of its talent or the unique environment here.

Also, what kind of blood was this so-called filthy blood? Was the background of this entire area red actually because it was stained with blood?

After quickly absorbing the Chaotic Qi of the Blood Light Rock Python, Han Fei didn't think too much but continued to rush deeper.

After another kilometer or so, a transparent spinach suddenly emitted a red light. Each leaf had seven spikes, and countless leaves came at him together, just like the Big Red Trunk he met back then.

"Hmph!"

With a thought from Han Fei, the Infinity Water turned into ten thousand knives and followed him. Wherever it passed, the wind blew away and the spinach grass leaves were all shattered.

However, this spinach seemed to be the beginning. It seemed to have opened a switch for Han Fei. After completely crushing it, strange bergamot tentacles appeared, so did red magma burst fruits and blood-colored giant rock moths.

Almost in the blink of an eye, several powerful creatures attacked Han Fei. These attacks were completed in an instant, because before he met them, Han Fei didn't know where they were or how they would attack.

Of course, with Han Fei's strength, no matter how well these creatures hid themselves or how strong their attacks were, it was impossible for them to work.

As for these creatures, although their lifespan was not long, they more or less contained some Chaotic Qi. After this wave, his Chaotic Qi quickly soared.

After only half an hour, Han Fei's Chaotic Qi exceeded 50,000 wisps for the first time. Yes, in terms of the number of Chaotic Qi, Han Fei had already caught up with the number of Chaotic Qi when the old turtle opened the sky.

Although Han Fei didn't know how much Chaotic Qi people like Bei Luochen and He Daoyuan had when they opened the sky, he didn't think it should be much. But he wasn't sure. If they absorbed it slowly with time, they might have forty or fifty thousand wisps.

After half an hour.

Han Fei didn't know how far he had gone, but at this point, fewer and fewer normal creatures attacked him. Han Fei felt a strong blood Qi, and he could feel that this blood Qi was not good and tried to drill into his body.

How could Han Fei let them do that? The surface of his body was shining with golden light, constantly repelling the erosion of the blood Qi.

“Bo ~”

As if passing through a certain barrier, the strange and disgusting creatures around him disappeared almost instantly. Or maybe, he got rid of them.

However, this place was even worse. Han Fei saw stone pillars of different shapes like Gobi stones one after another. And here, not only was the blood energy rich, but there was also a large amount of death energy.

“Undead creatures?”

Han Fei was shocked. It was impossible that there were no undead creatures under such a strong death energy.

As soon as Han Fei stood still, he saw spirals appearing around the neon rock wall in all directions. But these spirals were not vortexes in the water. Han Fei saw soul shadows one after another.

Swish ~

Like arrows, they shot straight at Han Fei. When the spirals shot over, Han Fei felt that they were nailed directly at his soul.

However, no matter how strong this spiral was, it was only in the Half-King realm, so it was still ineffective against him. Han Fei even grabbed a spiral that brushed past him.

When he took a closer look, information popped up in his eyes.

< Name > Sea Leech Soul Conch (Undead)

< Introduction > Sea Leech conchs, corroded by the death energy, gradually transform into undead creatures. Their bodies are twisted like sea slugs and nailed conchs. They can attack the soul. If one was touched by them, his soul will be damaged.

< Level > 89

< Quality > Exotic

< Realm > Half-King

< Undead Energy > 58 wisps

< Battle Technique > Spiral Soul Stab

< Collectable > None

< Unabsorbable >

Han Fei was speechless. The creatures in the Half-King realm he met just now were ugly, but they were at least alive. But this one didn't even have Chaotic Qi. It was a waste of his time.

The Infinity Water formed a blade barrier in front of Han Fei and pushed forward.

Bang! Bang! Bang!

Along the way, the neon stone pillars were collapsing, and the Sea Leech Soul Conchs were shattering. None of them could cross the killing range of the Infinity Water.

However, this was not the end. This kind of Sea Leech Soul Conch was only a very ordinary creature. It was only because it was born in this special place that it had reached the terrifying strength of a Half-King.

If this place wasn't special, even if the conchs could reach the Half-King realm in five thousand years, there wouldn't be so many of them.

But behind this conch, there were even more dangerous existences. They were densely packed ant-like small insects. As soon as Han Fei saw them, he felt a headache. These things were like the Marching Sea Leeches back then.

"Hmph!"

"How can an ordinary creature withstand the suppressing pressure of a king? Break..."

At that moment, Han Fei released all his power and was surrounded by arrays. Although they were not as powerful as the Thousand Opportunities Divine Ghost Compass, they couldn't be underestimated.

Puff, puff, puff!

The countless tiny insects the size of a thumb were annihilated when they collided with Han Fei's protective arrays. Information popped up in Han Fei's eyes.

< Name > Ghost Aphid (Undead)

< Introduction > A kind of undersea worm, corroded by undead creatures and collectively transformed into Ghost Aphids. This worm's saliva is extremely corrosive. Even a Sea Quelling Bizarre Treasure can be slowly corroded by it.

< Level > 70

< Quality > Exotic

< Realm > Dao seeking

< Undead Energy > 1 wisp

< Battle Technique > Ghost Aphid Food

< Collectable > None

< Unabsorbable >

Being attacked by so many strange creatures in a row, Han Fei was speechless, especially the Ghost Aphids, which were far stronger than the creatures he met just now. Even if the Infinity Water turned into a Million Knife Dragon Roll, it was impossible to completely block these Ghost Aphids.

The arrays outside Han Fei's body were almost instantly covered by the Ghost Aphids. As the Ghost Aphids were annihilated, his hundreds of arrays were melting at a visible speed.

This was the time to compete in endurance. He wanted to see if these Ghost Aphids would be exhausted first, or if his spiritual energy would be insufficient to withstand the devouring of the Ghost Aphids.

"Pu! Pu! Pu! Pu!"

Han Fei's suppressing power and killing array appeared at the same time, and the Infinity Water was strangling crazily. The crack was already turbid.

After half an hour, Han Fei was slightly moved. He couldn't imagine how many Ghost Aphids there were. There must be billions of them!

Even he couldn't go on like this. Not only that, but the use of the Infinity Water would consume soul power.

Han Fei couldn't help but look pained. He raised his hands. "Heaven Enlightenment Divine Technique."

Buzz!

As the healing divine light descended, the entire abyss suddenly lit up. With continuous sizzling sounds, countless ghost leeches were purified after Han Fei consumed more than 800 years of vitality.

While Han Fei was casting the Healing Divine Light, someone happened to pass by the entrance. Since the person dared to appear in the deepest part of the cave to find the entrance, he was undoubtedly a Sea Establisher.

The person who came had a big-headed doll sitting on his shoulder. It was the Thousand Puppet, the spiritual beast of Hong Yue from the Mad Corpse World.

The Thousand Puppet said, "There seems to be a battle inside."

Hong Yue said, "The more dangerous it is outside, the safer it is inside. It seems that this is not a safe place. This road is good. I don't know who is so lucky to find this place. Let's go and take a look."
