

GOF 1995

Chapter 1995 Hard Start, Don't Enter the Insect Nest (2)

At this moment, the Explosive Worms had almost surrounded Han Fei. Countless worms piled up like a mountain, as if Han Fei was pressed to the bottom of the mountain.

Besides, not only this calabash exploded, but two other calabash also exploded. It formed a bug tide, which was almost the same as the Ghost Aphids.

But the problem was that the Ghost Aphids were undead creatures, but the Explosive Worms were living creatures!

And other information that Han Fei could see appeared:

< Name > Ten-Thousand Wheel Leaf Worm

< Introduction > As a kind of insect born to serve as grass, the strength of the Ten Thousand-Wheel Leaf Worm is judged by the length of its life. The longer it lives, the more resilient it is, and the stronger its binding ability is. The Ten Thousand-Wheel Leaf Insect can turn into a soul binding thread, entangling and destroying others' souls.

< Level > 39

< Quality > Rare

< Realm > Awakening

< Contained Spiritual Energy > 1,248

< Battle Technique > Bind

< Collectable > None

< Unabsorbable >

When Han Fei saw the insect roll towards him, it suddenly disappeared in front of him. So it could turn into invisible threads to bind his soul.

"Explode!"

Han Fei detonated the Infinity Water without hesitation. He was so decisive and direct because he didn't know how big this forest was at all. Although he could run out with a leap now, what about the environment he would encounter later? Then would he continue to jump aimlessly?

Instead of that, he might as well detonate the Infinity Water. If the power of the Infinity Water was completely detonated, it was impossible for there to be any survivors within 50,000 kilometers.

Rumble! Rumble!

Han Fei didn't care about the Monarch Palace. If he was really pinned down by these things, he wouldn't be able to absorb enough spiritual energy unless he used the resources in his Origin Sea.

If it were an ordinary Half-King, he might have already been poisoned. This was because when a massive number of Explosive Worms corroded you at the same time, the speed at which you absorbed resources might not be enough for you to prevent these worms from corroding you.

Like a nuclear bomb exploding, Han Fei saw that the surrounding forest was flattened.

As Han Fei extended his hand and waved, the Infinity Water quickly returned to Han Fei. Han Fei didn't use it again, but directly extracted the water energy here to prepare for the recovery of the Infinity Water. In addition, Han Fei had already begun to accumulate spiritual energy. If this place was big enough, the Infinity Water definitely wouldn't be able to flatten it all.

When the aftershock of the explosion gradually subsided, Han Fei was completely fine. He re-examined the place and found that the explosion of the Infinity Water didn't shake this space at all.

In addition, this place was now full of poisonous gas. Perhaps because he had annihilated too many creatures, most of the bugs and poison had completely dissipated, but there were still some poisons that couldn't be vaporized by the explosion that were still spreading and interweaving here. In Han Fei's mind, the Nine Poison Treasure Silkworm had been swallowing, and Han Fei's body was spontaneously absorbing and adapting to these poisons.

After fusing with Little Black and Little White, Han Fei tried to perceive his surroundings with Little White's ability, but as in the Sea of Mist, he had no chance at all. Little White was also restricted.

In that case, Han Fei put away Little Black and Little White and set up a Soul Controlling Array for himself. He took out a bottle of antidote pills and swallowed dozens of them. He didn't want the Nine Poison Treasure Silkworm to sleep, nor did he want his resistance to poison to reach its limit.

Buzz!

Han Fei jumped and flashed with golden light. He went in a random direction and rushed more than 50,000 kilometers. As soon as he stopped, some dilapidated forest appeared, but most places had been charred.

"What a huge insect cave. Fifty thousand kilometers is not enough?"

When Han Fei was walking along the entire area of the explosion, he found that in the unknown forest, a dense tide of insects was heading towards the empty space that had just exploded. "F*ck..."

Han Fei couldn't have felt worse. There were still so many of them? Even if the Infinity Water exploded again, it probably wouldn't be able to kill them all!

The self-destruction of the Infinity Water only proved that there were too many insects here to kill. At this time, Han Fei certainly wouldn't be stupid enough to try to kill the insects again.

He knew that no matter what, it was impossible for him to stay here. Otherwise, it wouldn't be long before the insect tide covered the entire place, forming a sea of insects.

Han Fei discovered that he only had two choices now. One was to kill in the insect tide and find a way. Han Fei could totally do this himself. However, Han Fei remembered what Han Xuan said. The things in the Monarch Palace were generally not meaningless. In such a large sea of insects, was there any treasure here? If there was no treasure, why did they barge in? To fight the insect tide? To court death?

In the Monarch Palace, countless people had obtained opportunities from it, which meant that this was very likely a test. For example, a strong cultivator wanted to find a disciple and pass on his abilities.

If it was the second one, then there must be something waiting for him in the insect tide forest. The insect tide might be a test to make you panic.

However, the insect tide here was not very strong. This meant that although there were billions of insects here, the people who came were at least Venerables. If they were lucky, there was still a chance of survival.

However, because Han Fei was the first to come here, he simply turned a multiple-person mode that should have been explored by countless people into a single-person mode, so the difficulty soared.

Han Fei quickly made up his mind. God knew how many insects there were here, but at least these insects couldn't hurt him. Even if he continued to blow up the Infinity Water, he could still kill countless insects.

Therefore, Han Fei didn't care where the way out of the Insect Tide Forest was. He held the Vast Ocean Navigator and used the third pointing ability without hesitation.

In that direction, Han Fei directly flashed tens of thousands of kilometers away.

Sure enough, as soon as Han Fei appeared, he was surrounded by a surging insect tide, worms, beetles, threadworms, ten-thousand-wheel leaf worms, and many other insects that Han Fei didn't read the information about. These insects almost crushed Han Fei's face.

Buzz!

The halo of time appeared, and anyone who touched it was annihilated. However, Han Fei only stayed for a short time. As soon as the insects within hundreds of meters withered, Han Fei had already disappeared.

The Vast Ocean Navigator's continuous directing could only last for six to eight seconds, and this was when the destination was certain. If the destination was not certain, or it was not in this space, the Vast Oceanquake Navigator could only be used once.

When Han Fei saw the Vast Ocean Navigator move, he knew that there must be a treasure protected by these insects hidden in the so-called Insect Tide Forest.

Because of the reaction time of the Vast Ocean Navigator, Han Fei had to pause every time he appeared to let the Vast Ocean Navigator repoint the direction, so Han Fei could barely maintain the frequency of two leaps in one second.

After six seconds, Han Fei should be close to the place indicated by the Vast Ocean Navigator.

Buzz!

When Han Fei appeared again, he suddenly found that his vision was broadened. And when he took a closer look, there was not even a bug where he was.

Looking around, Han Fei found that more than 20 kilometers behind him was the place where the insect tide surged.

“Have I entered a seal?”

Han Fei’s first thought was that he had found the key place. Because this was the place guarded by the insect race, there were no insects here.

Han Fei walked deeper into the seal. After walking for more than three hundred kilometers, at the end of his vision, an altar-like place appeared. However, the thing placed on the altar was very strange. It was like a bronze mirror, polished to the point of perfection.

And under the altar stood a black-clothed man holding two scimitars, half of his face covered.

Han Fei was shocked to see this person. He knew that the real test was coming. The insect tide might not be the key, but this person and the mirror behind him were the root of the problem.

Han Fei was only ten kilometers away from the man, and the man seemed to sense that someone was coming and slowly raised his head.

Han Fei narrowed his eyes. Since this was the most suitable place for him to come, there must be a reason. There was no energy flowing in this person’s body at all, but the sense of threat he brought to Han Fei was not weak. He was not particularly strong, but he was definitely not weak in the Sea Establishment realm.

Han Fei asked, “Are you a human or an insect? Can you speak?”

Because what he saw were all bugs, Han Fei had this bold guess. After all, the Insect King was also a bug and could transform into a human.

However, the man didn’t respond but slowly drew his scimitar. With a swish, Han Fei saw two wisps of smoke appear in front of him.

Subconsciously, in front of Han Fei, the Embroidery Needle stood firmly on the ground.

Clang!

The crisp sound was the collision of weapons. A ripple spread out.

Chapter 1996 Hard Start, Don’t Enter the Insect Nest (3)

Up close, there was no data in Han Fei’s eyes, which meant that this person was not a bug.

However, this person’s appearance was very strange. He seemed to be covered in tattoos, which should be some kind of runes. Especially his face, there was almost no normal skin, only dark green runes. Han Fei blocked the power of the double knives. In the first moment, he activated the Void Lines, intending to control this person with the Void Lines.

As for the other party, his double knives avoided the Embroidery Needle and slashed at Han Fei.

The two of them chose different attacking methods. What shocked Han Fei was that the Void Lines were ineffective, which meant that this person might not even have a broken soul.

Almost at the same time, blue light circulated on Han Fei's upper body, and two terrifying knife lights cut into time but didn't touch Han Fei's head.

With this blow, Han Fei retracted the Void Lines, and the other party turned into a cloud of black smoke and retreated.

In the first clash, neither of them gained any advantage. Since the other party didn't even have a remnant soul, he was like a puppet. However, this kind of character wasn't afraid of death and had no emotions. His combat style continued his original body's combat style and was extremely powerful.

Han Fei quickly judged the other party's strength. Judging from the strength displayed in this blow, the other party's strength was less than 200,000 waves. However, this person was fast and could turn into smoke. His way of using the double knives was unique.

That was all Han Fei could see from this blow.

The two separated as soon as they touched, but then, the weirdo seemed to sense Han Fei's strength. He clasped his hand and drew a strange seal in the air, and then a tide of bugs crawled out of the ground.

Originally, there were no insects in this area. Han Fei had thought that it was because of the special environment here. Now it seemed that this was not the case, but because this person could control insects. The reason why he didn't let insects enter this area was probably to protect the bronze mirror on the altar.

At this moment, with an intruder like Han Fei, who was not weak, he used the method of insect control. So, this person's main ability was insect control?

Although Han Fei didn't want to deal with a lot of insects, it didn't mean that he was really afraid of insects. In addition to detonating the Infinity Water, Han Fei had many other means.

Han Fei reached out and grabbed, producing a void crack.

Bang!

Instead of fighting with this space crack, Han Fei crushed the void crack in the next moment. The surrounding dozens of meters exploded, and void turbulence wreaked havoc here.

As Han Fei opened his hands, the Infinity Water continued to turn into blades, which, coupled with the void storm, slashed the storm here bigger and bigger.

Han Fei grinned. "Unfortunately, your insects are too low-level. If their strength could reach the Law Enforcer realm, I wouldn't have been able to kill them so easily."

Buzz!

However, the strange man clasped his hands, and the countless insects that were surging over were crazily intertwined and turned into hundreds or thousands of human figures. And their appearance was very similar to the strange man in front of Han Fei.

"What's this?"

Han Fei was surprised. After these interweaving insects turned into human forms, their strength soared. In the blink of an eye, thousands of Explorers had appeared here, and these people were still trying to fuse with each other.

Han Fei's heart sank. If this went on, wouldn't they become Venerables soon?

Buzz!

Han Fei directly projected a Sea Establishment realm clone, and his clone casually slashed in the void.

Bang! Bang! Bang!

In the blink of an eye, dozens of Explorers were cut into pieces. But at the moment these insect people were cut into pieces, a large amount of corrosive liquid of insects floated in the void towards the pile of insects.

Han Fei realized that behind the insect pile, a powerful Insect Man might be born.

Han Fei knew that he couldn't give this weirdo a chance. Otherwise, it wasn't impossible for so many insects to fuse and create another Sea Establishment realm powerhouse.

Therefore, Han Fei's original body immediately took action, trying to take the initiative to find and kill the strong master who was fusing in the insect pile behind.

However, the strange person in front of him seemed to erupt with all his strength, turning into a black mist that enveloped him. And in the black mist, in the blink of an eye, thousands of knives slashed at Han Fei. The speed was so fast that Han Fei felt as if Xia Xiaochan was attacking.

However, it was precisely because Han Fei and Xia Xiaochan had fought too many times that he was very used to this explosive power. Besides, this person didn't have a soul. How could he block his Great Dao of Time?

In the black fog, a blue light curtain appeared unknowingly. The moment the light curtain appeared, Han Fei could clearly see a black shadow in the black fog, holding double knives and slashing crazily. Clang! Clang! Clang!

Han Fei was like an iron wall, instantly slashed hundreds of times, but he also used the time of being slashed hundreds of times to lock onto the black shadow. With a flip of his hand, he launched an Immortal Fiend Saber. Faced with such an enemy who could control billions of insects, if Han Fei dared to be negligent, when the insects fused with each other and turned into a super powerhouse, it would be even harder to fight.

The strange man tried to avoid the Immortal Fiend Saber, but he was slowed by time. He knew that he could only take it head-on.

Ka ka ka ~

Seven void cracks appeared around this person, and a massive number of large worms drilled out. The power of the Immortal Fiend Saber was naturally terrifying. However, this space was immediately filled with large worms, and colorful Sky Bull Beetles also appeared. With just one impact, hundreds of thousands of large worms and colorful Sky Bull Beetles were reduced to powder.

WO

The strange man was retreating. Tens of millions of insects in front of him blocked in front of him, just to block Han Fei's blow.

"Hmph!"

Han Fei's Great Dao was completely activated. He turned into a golden light and jumped in front of the strange man. He poked his two fingers and All Great Daos in One Sword stabbed at the strange man.

The latter was still expressionless. Even though he was about to be crushed by Han Fei, he threw the two knives in his hands away, which then slashed back. The runes on his arms flashed, and his hands turned into two hundred-meter-long super worms like bobbit worms.

Looking from afar, they looked like two azure dragons going to sea.

However, how could he block Han Fei's All Great Daos in One Sword? The two fat insect arms exploded in an instant, and his body was shattered by Han Fei's sword.

As for the knives flying back, Han Fei counterattacked with the Yin-Yang Reincarnation Blade and sent them flying.

But Han Fei didn't look good, because the man shed his shell like a bug in front of him when he was about to die.

At this moment, black smoke gathered, and the strange man appeared again. However, beside him, an identical figure appeared. It must have been fused from insects.

Then, Han Fei saw a disgusting scene.

The strange man suddenly opened his mouth wide and swallowed the identical Sea Establisher.

"This is indeed an Insect Man."

Han Fei couldn't have felt worse. After the weirdo ate the Insect Man, his strength doubled. As he waved his hand, two scimitars returned.

When he looked at Han Fei again, Han Fei's heart sank. This insect sea was completely his territory. He could have as many clones as he wanted. If he could keep eating like this, how strong would he become?

At this moment, the ripples and storms in the void were endless, and the waves of insects were destroyed one wave after another. The Immortal Fiend Saber was still blocked by the insects. Although it moved slightly forward again, it failed to reach Han Fei.

Han Fei took a deep breath. "In that case, let's decide the winner."

Just as Han Fei was about to use his full strength, he suddenly heard the old turtle say, "Wait a moment, the mirror seems to be looking at you."

"Huh?"

Han Fei felt a chill down his spine. Was the mirror looking at him?

When Han Fei looked back, he saw that the mirror was facing him indeed. "Is something targeting me?"

Han Fei's heart sank, and he didn't continue to reveal his trump card. If something was really staring at him all the time, it was unwise to expose his trump card now.

At this moment, the Insect Man continued to attack, which was completely different from the previous person. This person was faster, had stronger explosive power, and his strength reached more than 300,000 waves.

Of course, although he was still not a match for him, if he kept swallowing, God knew how strong he would become.

Therefore, Han Fei knew that this had to be a quick battle.

At this moment, the Immortal Fiend Saber had just attacked and All Great Daos in One Sword had cut off one of the Insect Man's shells. The power of the Yin-Yang Reincarnation Saber was still there. Han Fei's heart stirred and he couldn't help but look at the sea of insects where the Immortal Fiend Saber was. As he issued an order in his heart, the Infinity Water exploded again.

Rumble! Rumble!

The terrifying ripples blasted the billions of insects into nothingness, and the Immortal Fiend Saber escaped from the sea of insects.

The man seemed to know what Han Fei was up to and intended to retreat to the sea of insects. However, Han Fei took out the Embroidery Needle and rushed to the altar, ignoring the man.

Seeing that Han Fei didn't care about him at all, the runes on the insect man's body immediately lit up, and his speed soared to the extreme.

He immediately blocked in front of Han Fei with a swish.

Han Fei, on the other hand, had already expected this scene. The Embroidery Needle in his hand was already ready, and he launched the Knocking on the Heavenly Door and shattered the body of the Insect Man.

How could Han Fei be at ease if the Insect Man wasn't dead?

Just as the Insect Man turned into smoke, before the original body in the smoke could escape, the Immortal Fiend Saber slashed over, and the Yin-Yang Reincarnation Saber returned too.

"Pfft!"

"Puff"

At this point, the insect tide stopped, and the Insect Man was finally annihilated by Han Fei's attack
