

GOF 1997

Chapter 1997 Hell Mode, Infinity Mirror

“Huff!”

Han Fei took a long breath. This insect sea was extremely difficult to explore. It wasn't easy to find the altar, let alone that the Insect Man was so hard to deal with.

Han Fei didn't dare to imagine if he didn't have the Vast Ocean Navigator, how long it would take him to find this place. It would be at least a few days. During this period, he was swallowing poisonous gas almost all the time, and he was also corroded by the corrosive insect liquid. If it were another king, even if he could barely reach the altar, he would be half dead first.

At that time, if that king fought this Insect Man, the difficulty of the battle would be like fighting a king in the top 30 of the Sea Establishment Realm in the Raging Sea. However, after the Insect Man swallowed a clone, his strength would soar to the top 10.

Fortunately, Han Fei reacted quickly and killed this Insect Man as soon as possible. Otherwise, if the Insect Man continued to swallow his clone, he would probably be ranked in the top three of the Sea Establishment Realm in the Raging Sea, which would be even harder to fight.

Han Fei was speechless. It was so difficult to start just for a mirror? What kind of f\*cking mirror was this?

At this moment, the Insect Man was annihilated. Han Fei thought that he had obtained the first treasure of this trip, a mirror.

Han Fei was quite careful when walking up the altar.

The altar was in the shape of a ladder with a total of 99 steps. At the center of the steps, there seemed to be a river left behind by a waterfall. Of course, the river was almost dry now. Occasionally, a drop of water could be seen falling from it. When Han Fei came to the bottom of the steps, he was surprised to find that there was a pool under the river. What flowed in the river was the Ground Veins Essence. There was even a pond more than ten meters wide under the altar.

How could Han Fei let this go? The Ground Veins Essence was so rare. He had once snatched more than 30,000 catties under the ground veins of the Forest of Terror. And Xue Fan must have got at least a million catties back then, which was why the Blood Sea Divine Wood City, which was full of Big Red Trunks, was created.

However, the Blood Sea Divine Wood City was about 300,000 kilometers, and the Ground Veins Essence had to nourish the ground veins and help all living beings cultivate, so it might not be enough.

But now Han Fei saw that there were at least a million catties in this pool.

Gulp!

Han Fei couldn't help but swallow and sigh. “No wonder countless people tried so hard to break into the Monarch Palace. This pool can completely shape the ground veins of a Sea Establisher's Origin Sea, and the quality of the Origin Sea could definitely be a level higher with the help of this batch of Ground Veins Essence.”

The old turtle also exclaimed, "As expected of the Monarch Palace. This is too extravagant. This entire insect forest probably relies on the endless Ground Veins Essence."

Reminded by the old turtle, Han Fei's heart did a flip. Yes, this insect tide forest was very big, and the Ground Veins Essence had created a perfect living environment for them. Therefore, there could be so many insects here.

However, Han Fei didn't care about those bugs at this moment. He used the Water Control Technique to absorb a large amount of the Ground Veins Essence and stuffed them into the Origin Sea. How to arrange it was a matter for the future. He would stuff the Ground Veins Essence into the Origin Sea first.

After Han Fei almost dug out all the soil here, he estimated that there were a total of 1.12 million catties of Ground Veins Essence.

This was understandable. Because the Ground Veins Essence belonged to the entire ground veins, it was impossible for it to stay here forever. Therefore, the amount of energy this small pool could accumulate should have been accumulated over tens of thousands of years.

Bada ~

At this moment, Han Fei saw a drop of Ground Veins Essence flowing down from the altar. Han Fei reached out and stuffed the Ground Veins Essence into his mouth. Although it was used to create Ground Veins Essence, it was extremely nourishing to the soul.

Unfortunately, Han Fei had no time to wait here. This was the first place he had encountered since he entered the Monarch Palace, and he had already obtained so much Ground Veins Essence. It was hard to imagine what other treasures there were.

After collecting the essence of the ground veins, Han Fei felt that even if he expanded his Origin Sea by a hundred thousand kilometers, the Ground Veins Essence would be enough.

Therefore, Han Fei didn't feel the insect tide forest was very dangerous anymore. After all, it wasn't beyond his ability. He could still get through the black vortex entrance!

Han Fei stepped onto a step in one go and found that nothing was wrong. Han Fei still waited for a while every floor he passed and didn't rush forward because of Han Xuan's warning.

Han Fei didn't encounter any trouble even when he reached the last floor. In the end, he directly reached the top of the altar.

Han Fei was relieved. It seemed that not all altars were mysterious.

When Han Fei reached the last floor and looked at the bronze mirror, the bronze mirror suddenly faded, and the surrounding world changed as if it were a dream space.

The insect tide forest disappeared, and then Han Fei's eyes lit up. Above his head was a flawless mirror, and under his feet was also a flawless mirror.

Around him, mirrors appeared one after another, and in the mirrors, he appeared one after another.

Clank.

Han Fei couldn't have felt worse. He should have guessed it. How could there be an ordinary altar in the Monarch Palace? He hadn't even taken a good look at the bronze mirror before he appeared in this world full of mirrors.

"F\*ck..."

Han Fei appeared in the mirror, surprised. Because there were mirrors everywhere, Han Fei saw himself no matter from which angle he looked. "Gulp -"

was

Han Fei swallowed. As far as he could see, he was swallowing in all the mirrors. He even felt that the person in the mirror seemed to be standing outside. "Hey ~"

"Hey, hey, hey, hey ~"

Han Fei just shouted, but this "Hey" came from all the mirrors in all directions.

"Hiss -"

Han Fei's eyes widened. What the hell is this? Why can those "Han Fei's in these mirrors shout too?

Han Fei told himself that there must be a secret about this place. Since there must be an answer or something he needed to find here, he had to try to break this space.

Han Fei waved his hand and slashed at one of the mirrors, trying to destroy the mirror and see what was wrong with this world. However, when Han Fei casually slashed out, he felt a headache because he saw countless knife lights attacking him from the mirrors.

"Son of a b \* tch!"

Han Fei didn't dare to be negligent. Although he didn't understand what was going on, he immediately punched out to block the knife lights. In an instant, fist shadows filled the sky and blasted saber beams in all directions. But what happened next made Han Fei break into a cold sweat. The fist shadows filled the sky and blasted out in the mirrors too. For a moment, all he could see was saber beams and fist shadows.

"F\*ck!"

Han Fei's current strength was no longer weak. Although he only used 30% of his strength, countless 30% of his strength was superimposed and blasted everywhere. It wouldn't be easy for him to withstand it!

At this moment, Han Fei had two choices. One was to resist the knife lights and fist marks that filled the sky, and the other was to reverse time to the moment just now.

Han Fei decisively chose to reverse time. After consuming a few wisps of the Chaotic Qi, Han Fei successfully returned to his original state. Seeing the calm space, he was relieved.

His reflections in the mirrors were also relieved.

Han Fei couldn't help but curse, "Why are you relieved? I was the one who was beaten."

“Why are you relieved? I was the one who was beaten.”

“Why are you relieved? I was the one who was beaten...” “Why...”

For a moment, the entire space was filled with this voice. Han Fei shut up, thinking to himself, Fine, I’ll just keep quiet!

Han Fei suspected that if he wanted to get the bronze mirror, he had to pass this trial. If he couldn’t pass this trial, what would the consequences be?

However, Han Fei suddenly thought of something. Can’t I f\*cking reverse time and go back to just now? This should be a way to pass the trial, right?

Han Fei was overjoyed and immediately activated the Chaotic Qi. Blue light circulated on his body, and he tried to reverse time and return to before he fell into this place.

However, after consuming ten wisps of Chaotic Qi in a row, Han Fei found that he was still in the same place.

“Hiss”

“How is it possible? Time reversal can be used just now, so in theory, this place doesn’t block the Great Dao of Time! Why can’t I get

out?”

This was the first time Han Fei couldn’t reverse time.

Han Fei immediately wanted to tear open the void and enter the river of time.

However, the void here couldn’t be torn open at all. It was as if he was already in the void and the void couldn’t be opened again.

“Damn, I’m trapped!”

Chapter 1998 Lost?

“F\*ck, I knew that the Monarch Palace was dangerous, but I didn’t expect it to be so dangerous. How long has it been? I’ve already encountered such a trap?”

Han Fei’s heart sank. The difficulty of the Monarch Palace far exceeded his imagination. He had thought that it would be difficult, but he didn’t expect it to be so difficult from the beginning. It was only the first day he came in! And this was what he encountered? If it were another king, he might have died.

However, it was useless to complain here. In this world filled with mirrors, the only thing he could do was not to attack. Once he attacked, he would only beat himself. Fortunately, time could be reversed here. Otherwise, he would have been beaten up by himself just now. Who would believe this?

Now, what gave Han Fei the greatest headache was looking at these mirrors. This was because when he looked at any mirror, there was actually not only one him in the mirror, but countless of him. This was because all the scenes reflected by the mirrors were the same.

As a result, wherever Han Fei looked, he saw countless mirrors and countless himself.

Fortunately, he had the Twin Divine Technique. After confirming that he couldn't run out in a short time, the first thing Han Fei thought of was the Twin Divine Technique. His black-mist body was pure black and could even absorb light. Therefore, when Han Fei's black-mist body appeared, he looked at the mirror again, only to see nothing inside.

"Huff!"

Han Fei secretly heaved a sigh of relief. Fortunately, he had many means. Otherwise, he really wouldn't know what to do.

The white-mist body was still standing where he was, not moving at all, mainly because he was too lazy to move. This was because every time he moved, his reflections in the mirrors would move too. This feeling was very strange.

ors

Han Fei left where he was with his black-mist body. The first thing he did was not to find the way but to look in the mirror.

Han Fei walked around one of the mirrors and found that it was a four-sided mirror. On the back, left and right of the mirror, there were mirrors, even above and below. Countless mirrors overlapped here. To be honest, even Han Fei, who was already a king, couldn't tell the difference because this mirror didn't have an obvious frame at all.

Han Fei pondered for a moment. Since the black-mist body couldn't be reflected in the mirror at all, it shouldn't be a problem for it to destroy the mirrors, right?

This time, Han Fei only used less than ten percent of his strength, so even if there was still an invisible counter-attacking force, he could easily withstand it with his body.

However, when Han Fei slapped the mirror, his face immediately changed. It was as if he had slapped a godly weapon. He couldn't even shake it. Instead, it produced a huge force that shook the void.

Although the mirror couldn't be shaken, the crazy attacks from all directions didn't appear. Therefore, this mirror could only refract power, but it couldn't refract anything it couldn't refract.

Han Fei grinned. "Quite tough, huh?"

Han Fei went up and struck the mirror with full strength. With the power of his black-mist body, Han Fei could exert the strength of at least 200,000 waves.

However, the mirror still didn't move at all, but the energy ripples caused a reaction in the void and were reflected.

Buzz!

Swish! Swish! Swish!

Instantly, countless energy ripples hit him. Han Fei knew that something was wrong and shouted in a low voice, "Twin in one."

After his twin bodies fused, Han Fei immediately used the Time Reversal Technique. Otherwise, when all the ripples shook down, he would feel as if he had been hit by the shock wave caused by countless black-mist bodies. This was even more terrifying than Han Fei's previous attacks.

When the light reversed, Han Fei was relieved again. This time, he didn't intend to attack. He could tell that this place couldn't be broken with strength at all. It seemed that in this space, this mirror was actually an invincible existence.

Activating the Twin Divine Technique again, Han Fei's black-mist body fumbled out. He was trying to find a way out. Because there were mirror images everywhere, it was really difficult to distinguish the route. After searching for a long time, not only did Han Fei not find the way out, but he couldn't even find the way back. Everywhere he looked was empty. He had already collided with the mirror hundreds of times.

Fortunately, Han Fei was used to collisions. He turned his black-mist body into a black mist and walked around the mirror. Finally, on the second day, Han Fei failed to find his white-mist body.

However, it didn't matter. Now that the two were closely connected, he just needed to know that his white-mist body was still there. If it didn't work out, when he fused his twin bodies, they would still be together, so Han Fei wasn't very nervous.

Han Fei was sure that a day had passed, so he immediately took out the Vast Ocean Navigator and asked it to find a way out for him.

However, the Vast Ocean Navigator began to spin crazily, but the needle was circling around as if it had failed.

Han Fei thought to himself, So, the way out is actually in the mirror?

Han Fei was sure that the Vast Ocean Navigator wouldn't be affected by the mirror no matter what, so its movement meant that it knew how to get out, and the way was in the mirror.

Han Fei thought to himself, This is nonsense. I can probably guess that I've fallen into the world of the bronze mirror. If I want to get out, I can only go out of the mirror. But the problem is, how can I get out of the mirror? Therefore, Han Fei recited silently, "Point to the treasure or secret place here."

However, just like before, the Vast Ocean Navigator was still spinning randomly.

"Huh!"

The old turtle said, "Well, why do I have a feeling... Are you sure that you are your original body?"

Han Fei's heart skipped a beat when he heard that. He couldn't help but ask, "What do you mean?"

The old turtle said, "There are countless mirrors here. The you in the mirrors can attack you physically. Then, is the you in the mirror real or fake?"

Han Fei's eyes widened. The old turtle's idea was too terrifying. If what the old turtle said was true, it was hard to say if he was himself.

But Han Fei thought for a moment. If he could fight his white mist body instead of in the mirror, did it mean that he was real?

As he was thinking, the Vast Ocean Navigator began to spin again.

“Hey, hey! I didn’t ask you to spin!”

Han Fei made a mistake by accident just now. He didn’t know where he had gone. Although he wasn’t far away from the white-mist body. Under the refraction of so many mirrors, it was probably difficult for him to find the white-mist body in a few seconds. Besides, he could just let the Vast Ocean Navigator point at the real him.

Unfortunately, the three chances he had today had been used up in this short period of time. Han Fei had no choice but to go back.

The third day.

As soon as Han Fei could use the Vast Ocean Navigator, he took it out. He thought to himself, if the him in the mirror is real, is their Vast Ocean Navigator also real?

Han Fei asked, “Where is my original body?”

But this time, something that made Han Fei’s blood run cold happened. The Vast Ocean Navigator continued to spin randomly, pointing to everywhere, as if his real body was everywhere.

“Son of a b \* tch!”

Han Fei couldn’t help but curse. Is the Vast Ocean Navigator broken? What the f\*ck is going on? If the me in the mirror is all my original body, what am I?

But Han Fei didn’t panic but asked, “Where is my only original body?”

However, the result was the same. It seemed that what appeared here was all his only true body. Suddenly, Han Fei activated the Twin Divine Technique again. Han Fei asked where his black-mist body was, but the Vast Ocean Navigator was still spinning randomly.

Even Han Fei began to doubt if he was real. This space made him doubt himself.

Clash –

Han Fei sat on the ground and leaned against the mirror. The black-mist body and the white-mist body faced each other. The black-mist body looked at the white-mist body and was speechless. If he did this to his enemy, it would definitely be terrifying because the enemy might not even know where his original body was.

The white-mist body and the black-mist body both looked at themselves in the mirror aimlessly.

“Huh!”

But suddenly, the black-mist body and the white-mist body exclaimed almost at the same time.

At that moment, Han Fei couldn’t help but think of his green jade bridge. He remembered how he stood on the top of the bridge and looked at the bottom of the bridge, where there was another him looking at him.

For some reason, this feeling suddenly appeared just now.

“Is this mirror space related to a Dao?”
