

GOF 291

Chapter 291 Merciless Lobsters

In the level-two fishery, the dazzling sun covered the waves with golden radiance. It was quite a magnificent view.

It had been two months since Han Fei and Xia Xiaochan came to the level-two fishery. Since Qu Jinnan and Ling Yuan were with them, Han Fei could not explore the dangerous places.

But of course, there were still things they could do. Xia Xiaochan, for one, had discovered that there seemed to be something frigid deep down in the water that was colder than usual.

At this point, Xia Xiaochan was shaking her legs in the water on the back of the Giant Arowana. Not far away, tremendous amounts of seaweed were now turning into nets and now spears, catching a couple of Iron-Head Fish now and then.

Above the seaweed, Ling Yuan was fighting a gigantic lobster with two swords, which caused ear splitting sounds when they hit the lobster's pincers.

While kicking the water, Xia Xiaochan shouted, "Ling Yuan, you are an armorist, not a soul warrior. You can control your swords, but don't fight with your swords... Also, Qu Jinnan, are you trying to farm in the ocean by creating so much seaweed? A manipulator is supposed to restrict an enemy? What have you done? Providing a battle environment in favor of the enemy?"

Hardly had Xia Xiaochan finished when all the seaweeds were focused at the center and spread to that gigantic lobster. Very soon, the lobster was almost fully tied up by seaweeds. The lobster tried to break free, but the tensile seaweeds were stuck to its joints.

Clank, Clank, Clank...

Dozens of swords flew out of Ling Yuan's weapon box at a corner on the lobster's head, finally executing the creature. A moment later, the seaweeds changed into the shape of a human, and Qu Jinnan scratched his head awkwardly, "Senior sister..."

Xia Xiaochan waved her hands. "Go make food on the boat. I'll go to the bottom of the ocean and see what Han Fei is doing."

As it turned out, Han Fei found a habitat of Mantis Shrimp in the level-two fishery. It was a seabed full of pebbles and sand that was filled with holes.

Every time the fish passed by looking for food from the sand, a Mantis Shrimp would suddenly jump out of the hole and capture them.

At this point, sand and smoke was rising from one of the caves.

BAM!

The cave collapsed, and two enormous Mantis Shrimps were doing unspeakable things right next to each other.

Han Fei's face was gloomily. "Nine-Tailed Mantis Shrimp, that's enough! I've watched a long time! Are you done yet?"

The Nine-Tailed Mantis Shrimp waved its tails and tried to nuzzle him, but Han Fei simply kicked it away.

Han Fei said, "I'll give you another hundred seconds. If you're still not done, I'll cook you."

Suddenly, Han Fei turned around, only to see Xia Xiaochan staring at the Nine-Tailed Mantis Shrimp in confusion, her eyes widened.

Han Fei blushed. "Well... Actually, I'm only here to set up the Nine-Tailed Mantis Shrimp with a girlfriend. It will be over soon."

Xia Xiaochan said angrily, "You're really gross!"

Han Fei was speechless. Why am I gross? It's the Nine-Tailed Mantis Shrimp that's gross, alright? It must be because the creature has been single for too long.

Angrily, Han Fei punched out, and another Mantis Shrimp swam out of a cave in fury and slapped with a seal that was as huge as a mountain.

A moment later, Han Fei swam upward with a Mantis Shrimp almost four meters long. He couldn't stay here anymore. It was too embarrassing.

On the boat, Han Fei's teammates were all shocked to see him return with a Mantis Shrimp. Is it really appropriate to eat a Mantis Shrimp right in front of the Nine-tailed Mantis Shrimp?

Han Fei snorted. "You make better Mantis Shrimp. Ling Yuan, shell it..."

A moment later, the Nine-Tailed Mantis Shrimp returned. It lowered its head and trembled in fear when it saw the shell of the Mantis Shrimp on the boat.

Qu Jinnan suggested, "Senior brother, why don't you recall the Nine-Tailed Mantis Shrimp?"

Han Fei snorted. "No. I would rather let it watch this."

The Nine-Tailed Mantis Shrimp secretly peeped at Han Fei, feeling that it didn't deserve this because it had done nothing more than seek a girlfriend.

Not caring about any of that, Xia Xiaochan grabbed a piece of lobster meat and asked, "Are we going back tomorrow?"

Han Fei said, "We didn't find the place you mentioned anyway. We should head back now."

Then, he looked at Qu Jinnan and Ling Yuan. "Do you think you can make a breakthrough to be great fishing masters now?"

Qu Jinnan shook his head. "Senior brother, I think my body hardness is not good enough yet."

Han Fei waved his hand. "You can make a breakthrough now. Your body hardness is as good as a peak fishing master right now. However, breakthroughs require opportunities, and we can't look for them for you."

Ling Yuan nodded. "Thank you, senior brother and senior sister."

They had been hoping for a breakthrough for a long time, and they immediately started trying.

For other people, it might seem impossible, but in Han Fei and Xia Xiaochan's eyes, it was only natural. Those two wouldn't be geniuses at all if they couldn't become great fishing masters after a year of hard training with the help of cultivation arts and spiritual fish.

Although everybody had tremendous fun last year, they did everything they were supposed to do.

Le Renkuang could control a horrifying number of weapons and was almost as good as Li Hanyi now. After all, it was not an easy task to prune with Torrents of Knives and Swords.

Luo Xiaobai discovered a new ability. She could attach herself to plants and travel among them. It was really a marvelous skill.

Zhang Xuanyu was the most frequent visitor of the ocean. He had created two battle techniques himself, which were quite impressive, and needed to practice the techniques in the ocean.

It was needless to mention Xia Xiaochan, who spent half a year training during the last year. She had fully grasped her Wanderer Swimming Art, her heaven-level technique, making her the fastest of the team. Han Fei could barely catch her even with Little Gold and the Shadow Swimming Art.

As for Han Fei himself, he had made most progress in arrays in the past year.

He had imitated all the arrays listed in the Spirit Gathering Scripture. Although he had only grabbed the Spirit Gathering Scripture, he had learned the basics of other arrays in the book, such as Soul Trapping Array, Spiritual Energy Barrier, Stealth Array, Spiritual Explosion Array, etc., in more than thirty categories.

Of course, those minor arrays did not make Han Fei stronger, but they made him an expert with more capabilities.

Apart from the arrays, the energy inside Han Fei had been mostly digested. Though his level was not improved, his Indestructible Body was even sturdier. Not just his skin, but his internal organs were tough now too.

It was definitely a dangerous thing to make a breakthrough on the ocean, particularly for the rookies like Qu Jinnan and Ling Yuan.

Of course, there was nothing to worry about since Han Fei and Xia Xiaochan were here. Han Fei kicked the Nine-Tailed Mantis Shrimp and said, "Go and kill all the fish that attempt to draw clear."

Xia Xiaochan snorted. "It's really unlucky to be your spiritual beast!"

Han Fei chuckled. "You have no idea how happy it was just now."

Frowning, Xia Xiaochan asked, "We've been here for two months. Why did you not capture a contractual spiritual beast for them?"

Han Fei was lost for words. "Should we also help them to be Dangling Fishers? Certain things have to be done by themselves. When we capture the exotic contractual spiritual beasts, although Xiaobai led the way for us, we captured them by ourselves, didn't we?"

Xia Xiaochan thought for a moment. "That does make sense. Let's just give them the map that we marked and ask them to do it on their own."

Han Fei nodded unconcernedly and said, "We're going to the level-three fishery after we return, won't we?"

Xia Xiaochan stretched out her arms. "That's right! I'm dying now after a year of boredom."

As she spoke, Xia Xiaochan jumped backward into the water from the deck. Lying on the surface of the sea, she said delighted, "It's fun in the ocean... I'm not farming material."

Han Fei said, "Come here. You're jumping into the water when the food is ready?"

Xia Xiaochan proposed, "Let's make a breakthrough too! If everything goes well, Xiaobai and the rest of them are probably Dangling Fishers now."

In the next second, Xia Xiaochan flashed to the hotpot, making Han Fei lost for words. Do you have to flaunt that you can flash to another location?

Xia Xiaochan said, "For some reason, I always feel that my spiritual energy is redundant, and I want to consume some of it."

Han Fei was speechless. Are you flaunting your abilities again? Right then, spiritual energy suddenly surged out of Xia Xiaochan, with redness in the middle of it.

Han Fei's face changed greatly, and he rose to his feet immediately.

Not good. Why is she suddenly having an attack?

Chapter 292 Naked Meeting

Han Fei felt that his blood was freezing. Of all times to have a meltdown, she was having an episode at this particular moment? What was her problem exactly?

Xia Xiaochan was smiling a second ago, but one second later, her eyes were bloodshot.

Out of Han Fei's expectation, instead of attacking him, Xia Xiaochan flashed a hundred meters away and dove into the ocean.

His face changing greatly, Han Fei shouted, "Nine-Tailed Mantis Shrimp, protect them! Little Gold, attach!"

Han Fei dove into the ocean with a swoosh. He saw a red shadow blinking far away.

"Xia Xiaochan, wait..."

Both of them were extraordinarily fast. They could definitely leave regular great fishing masters dumbfounded!

As a hunter, Xia Xiaochan was adept at agility in the first place. Plus with her divine-level Wanderer Swimming Art, she was like a red lightning ball in the ocean when she rushed.

Although Han Fei's Shadow Swimming Art was only demon-level, it was divine-quality. Also, he had the boost of Little Gold. He was the only one who could catch up to Xia Xiaochan now.

One chasing the other, they penetrated through all the fish on their way. Too many fish were spun or knocked away by them, but by the time they realized what was going on, Han Fei and Xia Xiaochan were already gone.

"Huh?"

In no more than ten minutes, Han Fei suddenly stopped, because Xia Xiaochan was gone.

"Is she in stealth mode?"

Han Fei was quite grave because it didn't make sense. When Xia Xiaochan had an attack, she would usually go on a killing spree and would not hide.

But why had he lost her?

Han Fei looked around and noticed something wrong. He seemed to have reached a slightly dangerous treasure trove in the level-two fishery that Zhang Xuanyu marked on his map. However, they did not come here because the odds of discovery were not high.

At this point, Han Fei sensed that the spiritual energy was more intense than before, and the water was colder.

A shoal of Dragon-Headed Fish was swimming by when they saw Han Fei. Immediately, they all jerked at him.

Han Fei did not know what to say about those stubborn fools.

He flapped his wings and got rid of the fish, before he descended deeper into the sea.

A moment later, Han Fei saw multiple Three-Headed Snakes at the bottom of the sea. He immediately turned grave, knowing that Xia Xiaochan was here.

Following the debris on the bottom, Han Fei discovered to his surprise, the entrance to an undersea cave.

This was a dangerous area full of Buddha Octopuses. Disguises had been set up here just like the sunken ship that Jiang Qin took him to earlier. Also, whoever set up the disguises set the entrance among the Buddha Octopuses, making it impossible for regular people to find.

If Xia Xiaochan hadn't cut half of the Buddha Octopuses, Han Fei didn't think that he would've found it.

However, what confused Han Fei was how Xia Xiaochan knew that there was an entrance in this place. Also, from the cold feeling he sensed at the entrance, Han Fei knew that there must be something freezing in the cave.

Dashing into the undersea cave without any hesitation, Han Fei immediately sensed that the water dropped by dozens of degrees.

After he descended twenty meters, the temperature was already below zero.

Han Fei even found plants in the cave. However, most of the plants were blue, and there were many broken icicles near the plants.

Han Fei found it amazing. It was common sense that water would turn into ice when the temperature was below zero. Although the salty water had a lower freezing point, it would still turn into ice when the temperature was too low.

“Huh? Wait. The temperature here is sufficient. Would spiritual energy influence the freezing point?”

Han Fei picked up a piece of ice and crumbled it to feel its temperature. Then, he looked around.

Was it a huge block of ice a thousand meters away?

Han Fei swam near, only to discover that it was Xia Xiaochan who was crouching on a gigantic piece of ice.

Not just that, Xia Xiaochan was glowing in redness at this point, and the heat she radiated was flowing like magma. Even though the ice was cold, Xia Xiaochan had burnt the shape of a human in it.

Han Fei subconsciously touched the ice, only to take his hand back immediately. The ice was almost as cold as the bones of the Blue Sea Wandering Dragon.

Han Fei whispered telepathically, Xia Xiaochan, can you hear me?

After Han Fei said that, Xia Xiaochan suddenly opened her bloodshot eyes. After a blink, she was gone, and Han Fei hurried to raise his sword.

BAM!

As he expected, Xia Xiaochan appeared behind him and cut Han Fei with her dagger.

Supposedly, Xia Xiaochan should be no match for Han Fei, but at this point, Xia Xiaochan was like a source of heat, and behind Han Fei was a huge glacier.

In between them, Han Fei was being both frozen and scorched.

For that reason, Han Fei was slowed down and thrown into the glacier.

Ice was consolidating on the surface of Han Fei's body at a visible speed, but he had no time to bother with that as Xia Xiaochan had stabbed him again. He couldn't be more careful.

Clang! Clang! Clang!

The chaotic battle began. Now, Han Fei was thrown to the glacier, and now, Xia Xiaochan had done the same. Those two left all kinds of cracks and holes in the glacier.

Of course, Han Fei had been mostly focused on defending himself, so he was the one that was terribly beaten in the battle.

At this point, they had fought their way into the glacier, digging a cave through the extraordinarily hard ice.

Han Fei was lost for words. What exactly was this girl's disease? It had improved her combat abilities by two levels.

However, Han Fei had guessed Xia Xiaochan's intention. She seemed to be trying to cool her weirdly feverish body with the coldness of the glacier.

Therefore, Han Fei kept digging the tunnel, taking them deeper and deeper into the glacier, until the tunnel behind them was refilled by water and frozen again.

Han Fei didn't know how long he had dug. But in the narrow space, he had been stabbed a thousand times while he cast the Divine Healing Technique on himself.

Suddenly, he trembled again as the temperature had dropped another time. He turned around, only to see a blue stone in the middle of the glacier.

Shoot... What is this thing?

Han Fei was immediately covered in ice, and he was slowed down. Xia Xiaochan, on the other hand, continued attacking Han Fei even though the red glow on her was slightly diminished.

In the last moment, the only thing that Han Fei could do was to pump the water nearby away with Forge the Universe and leave an appropriate amount of air for himself.

One day passed.

Xia Xiaochan woke up in coldness. She tried to open her eyes but failed because it was too cold. Immediately, she fused the Red Fire Tricky Lobster with herself.

During the fusion, Xia Xiaochan was stunned when she realized that she was much stronger than before. When did she become a Dangling Fisher?

Then, the ice was slightly melted, and she managed to open her eyes, only to see that Han Fei was right before her and was pressing her hands against the wall. Of course, Han Fei was now nothing more than a human-shaped ice sculpture at this point.

BAM!

Fire surged out, and Xia Xiaochan struggled to shatter part of the ice. But then she found that Han Fei was still frozen in the ice in the same posture with the same expression of speechlessness.

"Explode!"

Xia Xiaochan yelled, breaking the ice on them. But she screamed in the next second.

When the ice was broken, their clothes were broken too. Not just that, after the ice that covered Han Fei was frozen, his body was still rigid and he was still towering over Xia Xiaochan.

His eyes cramping, Han Fei simply pretended that he hadn't come back to himself yet and did not move.

Smack...

Han Fei was slapped in the face.

He burst into a fury. "Why are you slapping me?"

Xia Xiaochan shouted, "Don't look at me! Give me my clothes!" At this point, Xia Xiaochan was trying to conceal her body in flames.

Han Fei moved his eyes upward. "I didn't see anything. You were the one who led us to this place."

Then, Han Fei extracted two sets of clothes from Forge the Universe. But the clothes were burnt and then frozen into ashy ice again.

Han Fei: "..."

Xia Xiaochan: "..."

Han Fei said, "Wait, it's all because of that stone. When you had an attack yesterday, I had no time to deal with the stone."

In the space covering no more than one square meter, Han Fei breathed heavily and pointed at a blue stone a hundred meters away.

Xia Xiaochan said, her face completely red, "Keep your eyes closed."

Chapter 293 Advancement To Be a Dangling Fisher

Han Fei snorted, but he didn't refuse to close his eyes since he had seen everything.

A moment later, Han Fei felt that fire was rising, and Xia Xiaochan seemed to be digging a tunnel with her best moves. But she screamed when she reached for the stone.

Han Fei opened her eyes quickly, only to see that one of Xia Xiaochan's hands had been frozen into ice. The ice was quickly spreading on the surface of her body.

Greatly shocked, Han Fei flashed to Xia Xiaochan and reached for that blue stone.

But he was no luckier than Xia Xiaochan. Hardly had he touched the stone when he was completely frozen. He felt that his hand was wasted at this point.

"Come here!"

Thankfully, one second before Han Fei turned into an ice sculpture, the blue stone was stored into Forge the Universe.

But of course, the result was that everything in Forge the Universe was frozen except the spiritual spring.

In the outside world, Han Fei and Xia Xiaochan, two ice sculptures, stared at each other.

It took several minutes before the furious flames on Xia Xiaochan's body melted the ice on the surface.

After she was thawed, she flashed to Han Fei's back and said, "Don't look back, and bring out more clothes."

Han Fei was lost for words. Thankfully, the girls had stored all their clothes in his place, or he would have nothing to offer.

The glacier was less cold without the blue stone. Though there was still frost on their clothes, the clothes were not completely frozen.

A moment later, Zhang Xuanyu exclaimed and roared at Han Fei, "I paid two thousand mid-quality pearls for a map! And it's useless now! Han Fei, you're truly shameless to not tell me until this moment and even flaunt your map at me."

A moment later, outside of the glacier, Xia Xiaochan and Han Fei were both silent. The atmosphere was slightly weird.

After a long time, Xia Xiaochan said, "You can't tell this to anybody else. Just keep the stone to yourself. Don't take it out again." Han Fei was lost for words. "What if you have another attack? Earlier, you were like a fireball. You could've melted this glacier."

Xia Xiaochan's face was red. "You still can't tell anyone. You can give the stone to me and go away." Han Fei mumbled, "Hey! It's actually nothing. Neither of us are adults yet..."

"Pu..."

Han Fei was stabbed in the next second. But to their surprise, the dagger entered two centimeters into Han Fei's flesh.

"Ouch... Are you trying to murder your husband?" Xia Xiaochan glared at him. "Shut up! We've held our rite of passage at twelve... I... I didn't mean it."

Han Fei did not know what to say. He forgot that the age of twelve was the threshold for adulthood in this world because of the high death rate. Now that they were fourteen, it was true that they were no longer kids.

His face slightly changing, Han Fei asked, "When did you make a breakthrough?"

Xia Xiaochan slightly shook her head. "I already made it after I woke up."

Han Fei cast the Divine Healing Technique on himself. "Please don't stab me anymore. You can go back first. I need to make a breakthrough in that cave."

Xia Xiaochan was briefly stunned. "I'll wait for you here."

Han Fei said, "Why? You could just bring them to us in case anything happens to them up there. This place is much safer."

Xia Xiaochan hesitated for a moment but did not argue. Slightly overwhelmed by the embarrassing contact with Han Fei, she went back obediently as he instructed.

Han Fei returned to the cave just now and sat cross-legged, seeking a quick breakthrough.

He was rather panicked, wondering what he should do after he failed to resist Xia Xiaochan. The Indestructible Body couldn't block her dagger?

He complained to himself, what kind of Indestructible Body is this? It seems that I still need more training!

One hour passed.

After a crack, the spiritual spring in Forge the Universe was quickly dwindling.

Han Fei felt that his body was expanding, his veins were broadened, and his flesh and his bones had a sheen. His physical strength was increasing at an unbelievable speed. However, during this breakthrough, Han Fei sensed that the consumption of spiritual energy had significantly increased. He had calculated that 500,000 points of spiritual energy were enough for him to make a minor advancement in the level of great fishing master.

However, this time, the polishing of a minor level required 500,000 points of spiritual energy, and it consumed almost 1,500,000 points of spiritual energy for the whole level.

That was not counting the million points of spiritual energy consumed during the breakthrough. All things considered, he had consumed more than 2,500,000 points of spiritual energy when he became a Dangling Fisher.

Han Fei subconsciously swallowed. Cultivation seemed to be getting harder and harder.

Considering the spiritual energy absorption of the third level of Void Fishing, it would take five years for him to turn into a Hanging Fisher from a Dangling Fisher!

That was if he was training hard every day! If he dawdled every other day like he did, it would take seven or eight years!

Han Fei quickly looked at the spiritual spring in Forge the Universe. It was now no more than one foot deep and contained no more than five million points of spiritual energy.

Han Fei nearly wept. Back then, the spiritual spring had filled the whole Forge the Universe, but after only one year, there was only so little of it left.

It was not enough for the deduction of the fourth level of Void Fishing!

After another hour, Han Fei finally stabilized himself in his new level. Thanks to the tremendous spiritual energy, his body hardness slightly increased. He tried to take out the rod that he drew from the Rock-Holding Turtle.

The rod was much lighter this time. Earlier, it had felt like a mountain, but at this point, it felt like a huge rock at most. Han Fei even tried to practice his rod technique with it. When the rod hit the ground, it even caused cracks.

Not bad! I can lift it now, but it's still slow and unhandy. It would be great if the rod could be lighter...

At this point, Xia Xiaochan ran in from the outside and was briefly stunned to see Han Fei's rod. "Is this... THE rod?"

Seeing that Han Fei was fine, she focused her eyes on Han Fei's rod immediately.

Han Fei nodded. "I just tried it." Xia Xiaochan asked, "Can I try it?"

Han Fei extended his hand and loosened it.

Xia Xiaochan took it, but her face immediately changed. She held the rod with her whole body, but she was still falling.

She shouted quickly, "Take it away, now..."

Han Fei grabbed the rod and threw it into Forge the Universe. "This rod is quite heavy. It can be used to smash people, but not so convenient as a weapon. Huh? Why are you down here?"

Xia Xiaochan said, avoiding eye contact with him, "I'm just checking up on you. Let me stab you again."

Han Fei was amused. "Hey, Xia Xiaochan, enough horsing around." "Who's horsing around with you?"

As she spoke, she stabbed Han Fei with a similar force as her previous attack, but she only entered no more than one centimeter into Han Fei's flesh.

Han Fei grimaced. "Although I can heal myself, it's still painful!"

Xia Xiaochan glanced at him and said, "You deserve it."

The moment Han Fei returned to the boat, the Nine-Tailed Mantis Shrimp slipped over to him and rubbed Han Fei's leg with its hard head.

Han Fei kicked it away and looked at Qu Jinnan and Ling Yuan. "Both of you have made a breakthrough, haven't you?" Blinking her eyes, Ling Yuan said to Han Fei, "Congratulations on becoming a Dangling Fisher, Senior Brother Han Fei."

Han Fei smiled. A Dangling Fisher! He remembered how Xiao Zhan, a Dangling Fisher, crushed five genius great fishing masters earlier. Finally, he was a Dangling Fisher too.

From the top of the boat, Xia Xiaochan shouted, "Let's take off. It's time to go back to school."

Qu Jinnan quickly went to sail the boat, and Han Fei climbed to the top of the boat too. He looked at Xia Xiaochan and whispered, "Will you have more attacks after you become a Dangling Fisher?"

Xia Xiaochan turned her head at Han Fei. "Do you want me to have more attacks?"

Han Fei quickly waved his hand. "Of course not... I'm just worried that I might be unable to stand your stabbing if you have more attacks."

Xia Xiaochan put on a vague smile. "Good!"

Han Fei: "..."

Chapter 294 Map of the Level- Three Fishery

When Han Fei returned to the Thug Academy, he found that the plantation was quite lively.

When he was still far away, he heard Zhang Xuanyu shouting, "Bomb!"

Then, Le Renkuang shouted too, "Jokers!"

Han Fei and his teammates: "???" They entered the plantation, only to see Zhang Xuanyu and Le Renkuang playing poker with two girls. Han Fei recognized one of the girls to be Hu Keren, whom Zhang Xuanyu had taken away earlier.

At this point, their faces were covered with tree leaves. There was nothing but two eyeballs left on Le Renkuang's face.

Han Fei coughed and said, "Zhang Xuanyu, what are you doing here?" The players turned around and were surprised to see Han Fei and Xia Xiaochan. They immediately rose.

Zhang Xuanyu hurried to greet them. "Han Fei, you're back. How was your trip?"

While speaking, Zhang Xuanyu observed Han Fei up and down. He was truly surprised.

Near the table, Hu Keren and the other girl blushed. "We should go back for training." Then, both girls ran past Han Fei and slipped off.

Zhang Xuanyu asked with a big smile, "You're both Dangling Fishers now? Tsk, tsk... Qu Jinnan and Ling Yuan are great fishing masters too... It seems that the Thug Academy is even more powerful now."

Le Renkuang snorted and cleaned the leaves on his face. "You're finally back. I don't want to play poker ever again." Xia Xiaochan asked, "Who are the two girls?"

Zhang Xuanyu waved his hand quickly and said, "They're just poker friends..."

Han Fei whispered to him telepathically, Poker friends? Is the other girl also your...

Zhang Xuanyu immediately replied, "What are you talking about? Do I look like an uncommitted man? We're just poker friends..."

Gloomily, Han Fei ignored Zhang Xuanyu and looked at Le Renkuang. "Have you made breakthroughs too? Why are you both playing poker here?"

Le Renkuang mumbled, "We were just waiting for you... We had a breakthrough three days ago. After I just stabilized myself yesterday, this jerk asked me to play poker with him."

Zhang Xuanyu laid his hands on Le Renkuang's shoulder and said, "This is just a recreation, okay? You can't spend all your time in training, or you'll go crazy." Han Fei turned around and said, "Okay! Just keep playing your poker. I'm heading back."

Xia Xiaochan glared at Zhang Xuanyu, who became a Dangling Fisher earlier than she did despite his laziness. She didn't know what to say. Le Renkuang shouted behind them, "Hey, I'm coming! Han Fei, did you catch any fresh seafood? I'll give you a hand tonight. Let's make a decent meal."

In the evening, everybody was gathered at the dinner table.

Observing Qu Jinnan and Ling Yuan, Wenren Yu asked, "Qu Jinnan, is your body hard enough?"

Qu Jinnan replied respectfully, "Madam, Senior Brother Han Fei says that it's acceptable now."

Han Fei raised his head. "He's stronger than general peak fishing masters, but he's not as good as the experts who focus on body hardness."

Xiao Zhan hummed and said, "Jinnan's foundation is too weak. He can only make up for it slowly and have more exercises as a great fishing master. It won't be a problem later. On the other hand, when are you going to the level-three fishery?"

Han Fei blinked his eyes. "Sir, can you help fix my boat? My boat is almost falling apart after being smashed last time..." At this point, Old Bai sneered and said, "Go buy what you need in the Linglong Tower. Don't let the money that The Fish Dragons earn rot."

Han Fei shrugged. What good stuff could he possibly buy from the Linglong Tower?

Le Renkuang asked, "Mr. President, are we going to stay in the level-three fishery for a whole year? Will there be any holiday?"

"Pu..."

Old Bai nearly choked himself. He said angrily, "Holiday? You're not allowed to return in the next year."

Han Fei asked further, "But can you tell us more details about the level-three fishery, Mr. President?"

Old Bai grimaced. "You can consult Xiao Zhan for the details. The level-three fishery is a good place to grow up. No teachers will protect you there. If you can survive it, you will be basically qualified to graduate, but if you can't, hehe..."

Everybody was grave. Each of the first three brocade sachets was more difficult than the last.

As for this one, although they had been asked to spend one year farming, it was actually meant for them to consolidate themselves. As a result, they were in their best state after they became Dangling Fishers.

The key of the fourth brocade sachet, or the so-called "level-three fishery", was a nightmare for regular great fishing masters! The level-three fishery couldn't be simple. At first, everybody thought that they could traverse the level-two fishery easily, but it was much more dangerous than they expected.

Qu Jinnan and Ling Yuan listened in silence, unable to say anything. But they were secretly shocked. Ever since they were admitted, they had found that the higher level one was, the more difficult it would be to improve, and the higher the demand on spiritual energy would be...

They looked at each other in shock. At this point, they could only fight the common or rare creatures in the level-two fishery together. But what about Han Fei's team? They only came here a year earlier, but they were already going to explore the level-three fishery...

VIV

Their progress was astonishingly fast!

At night, Han Fei didn't discuss the plan in the level-three fishery with his teammates. He was in need of the fourth level of the True Spirit Fishing Art. Having failed to find it in the library, he could only ask for it from the president.

But when he was some distance from the library, Han Fei saw Old Bai, Xiao Zhan and Wenren Yu entering the library together. "Huh? Why are these three together?" Han Fei was slightly surprised. Generally speaking, Old Bai would sleep in the library, Xiao Zhan would be in his cabin, and Wenren Yu was usually nowhere to be seen. It was rare that they had a meeting like this late at night. Did they have a secret?

Immediately, Han Fei cast a Breath Concealing Array on himself. It was the first time that he had used it, but he was not worried that he might be seen through. After all, the worst he could expect was to be thrown out.

Han Fei quietly followed them and hid in a corner of the library like a thief.

Voices were spreading out of the library.

Xiao Zhan said, "Old Bai, those students are going to the level-three fishery. Are we giving them the map or not?"

Wenren Yu immediately gave a negative answer. "No. The level-three fishery is much more vast and dangerous than the level-two fishery, and our map has marked all the possible treasure troves on the map. If we really give them the map, what if they explore the treasure troves without any consideration for their own safety?"

Xiao Zhan disagreed with her. "However, no cultivator can make a name without the treasures they find by luck. We're no exceptions, are we? We can't be as strong as we are if we hadn't explored the dangerous places."

Wenren Yu said, "But some of the places on the map are too dangerous for them. It's downright stupid if you try something that you can't accomplish! Do you not know that all of them, including Luo Xiaobai, can be very hotheaded and reckless?"

Han Fei secretly mumbled to himself, Are you implying that we're stupid, Mrs. Wenren? That's unfair!

Old Bai, however, interrupted them. "Stop fighting. The level-three fishery is a place where all the young geniuses of the 36 towns and even the Thousand Star City gain experience. Too many Dangling Fishers are out there. Let's not give them the map and ask them to fight the Heavenly Talents of other towns first. Besides, there are too many dangerous places. Do you really think they wouldn't encounter any?"

Han Fei swallowed hard in the dark. Earlier, Ren Tianfei had left him a map, but the map was very complicated and only had one mark where he had hidden his treasures. There were no other marks at all...

If he could acquire Old Bai's map and check it against the map he had, wouldn't it be easy for him to find the place where Ren Tianfei hid the treasures?

Han Fei was overjoyed by the thought of that. He was determined to get the map.

He was not scared of the dangers in the level-three fishery, not when Ren Tianfei's treasures were waiting for him to unearth.

Of the thousands of treasure troves, one solely belonged to Han Fei. He smiled so hard that he wondered if he could fall asleep tonight...

Han Fei immediately set Little Black and Little White free.

Han Fei said, "Little Black, see where the map is kept... Don't make any mistakes!"

At this point, Xiao Zhan and Wenren Yu had agreed with Old Bai that they would not give Han Fei the map. Both of them left the library.

None of them seemed to have noticed Han Fei, which made Han Fei rather proud of the array that he had learned.

A moment later, Old Bai left the library too, and Han Fei's eyes glittered, knowing that it was his time.

Wasting no time, Han Fei immediately stole the map.

Little did he know that Old Bai, Xiao Zhan and Wenren Yu were standing on a tree a thousand meters away facing the library. Xiao Zhan asked, "Old Bai, did you hide it too well? Let's hope that the boy doesn't miss it!"

Wenren Yu said, "Han Fei can't be that stupid. If he can't find a map, can we really trust them to explore the level-three fishery?"

Old Bai chuckled. "That boy is rather clever, but his Breath Concealing Array is truly lousy. It's not half as intricate as his Spirit Gathering Array."

Very soon, Han Fei came out with a map. He even kissed it. There was no telling how he would react when he learned that he was actually tricked.

Chapter 295 About the Level- Three Fishery

That night, Han Fei sneaked out and made multiple copies of the map. At that moment, Han Fei felt that the whole world belonged to him.

The next morning, Han Fei ran into the library. "Mr. President, rise and shine!"

"Do you think I'm dead?"

Old Bai walked out of the library and said gloomily, "Why are you screaming here instead of making breakfast?"

Han Fei grimaced and asked, "Mr. President, do you have the fourth level of the True Spirit Fishing Art?"

Old Bai said angrily, "Are you really going to practice to the end of the True Spirit Fishing Art?"

Han Fei said, "I don't have much time. What else should I practice if not the art I'm most familiar with?"

Old Bai stared at Han Fei and returned to the library. Soon, he came out with two books and threw them to Han Fei.

Old Bai said with mixed feelings, "Though the True Spirit Fishing Art is a regular art, all the fishing arts have been written and compiled based on this art. These are the fourth level and the fifth level of the art. You can take them..."

Han Fei was briefly stunned. "Mr. President, what about the sixth level?"

Old Bai replied casually, "I knew you would ask. The sixth level is rare, because it's not created for ordinary people. But of course, you may find it in the Thousand Star City from those who like to collect unique copies of books."

Then, Old Bai looked at Han Fei and said, "However, I need to remind you that you might not find the seventh level and above of the True Spirit Fishing Art even in the Thousand Star City. So, you can still change your art while you still can."

Han Fei raised his eyebrow. It seemed that the higher the level was, the less cheap the True Spirit Fishing Art was. It would be hard for him to find the higher levels.

Han Fei thought to himself, The deduction of the fourth level required ten million points of spiritual energy, so the fifth level would probably require a hundred million... As for the sixth level, he would probably be a dominator of the Thousand Star City after he could even reach the sixth level...

He immediately smiled. "That's fine. I'll pick up a different art by then."

Han Fei walked away with a smile. On his way, he browsed through the True Spirit Fishing Art. Very soon, the fourth level of the art popped up in his head.

<Existing Art> True Spirit Fishing Art (incomplete)

<Level Four> Hook Battle Technique (incomplete)

Note: This generic ancient art is now incomplete after the passage of time Repairing it will cost 10,000,000 points of spiritual energy.

Superseding Art: Void Fishing

<Level Four> Killing Hook Skill

Completion: 0/10,000,000

"Huh? Killing Hook Skill? Why is it not the skill of Thousand Kilometer Fishing?"

Han Fei then continued reading.

<Existing Art> True Spirit Fishing Art (incomplete)

<Level Five> Foot Distance Art (incomplete)

Note: This ancient generic art is now incomplete after the passage of time. Repairing it will cost 100,000,000 points of spiritual energy.

Superseding Art: Void Fishing

<Level five> Void Breaking Technique

Completion: 0/100,000,000

Han Fei felt a strong headache. Just as he expected, the deduction of the fifth level alone required 100,000,000 points of spiritual energy. Where could he find so much spiritual energy?

Han Fei smiled bitterly. The spiritual energy back in the Fire Cloud Cave seemed plenty enough, but it contained only twenty million points of spiritual energy, which meant that he needed five such spiritual springs for one deduction.

When Han Fei was deep in thought, Zhang Xuanyu appeared out of nowhere and laid his hands on Han Fei's shoulder. "Han Fei, let me tell you. I've found a treasure!"

Han Fei asked, not entirely interested, "What treasure can you find in the town? The good stuff is in the ocean!"

Zhang Xuanyu chuckled. "Are you silly? Shouldn't we get a map of the level-three fishery before we explore it? I've bought one with two thousand mid-quality pearls! Hundreds of dangerous places have been marked on it! Am I not good?"

Han Fei raised his eyebrow and looked at Zhang Xuanyu in shock, wondering if he could tell Zhang Xuanyu about his map that had much more detailed marks.

Han Fei decided not to tell him and simply show the map before their departure. He was sure that the man would be stupefied.

Somewhere not far away, Xia Xiaochan and the rest of them had prepared their luggage.

However, Han Fei's eyes cramped when he saw the pot three meters in diameter next to Le Renkuang that was filled with all kinds of spiritual fruits and seasonings.

Han Fei was lost for words. "Are you going out to gain more experience, or are you going on a vacation?"

Le Renkuang chuckled. "We're going to be away for a year! Shouldn't I carry enough of them with me? I would've carried more if the Sea Swallowing Seashell were bigger."

Han Fei was lost for words, as the man was talking as if he had a Sea Swallowing Seashell. Han Fei would've turned a blind eye to Le Renkuang if he hadn't acquired a spacious Sea Swallowing Seashell from Sun

Ye...

However, before Han Fei complained, Xiao Zhan had criticized him from far away, "Le Renkuang, are you going on a vacation? Why don't you just kill yourself with food?"

Le Renkuang scratched his head pitifully. "That's not a lot at all! It's only enough for a month, if I eat it frugally, or my life will be tough!"

Xiao Zhan almost burst into laughter. "Wait... Who told you that you will be teleported to the same place?"

"Huh?"

Everybody was stunned. What was the meaning of that? Would they be teleported to different places like the trip in the Fiery Mountain?

Xiao Zhan said, "The level-three fishery is a dangerous training field. If the teleportation can be oriented, would I have kept you so long? I could've organized a thousand people to explore the level-three fishery together, and no treasures would be left for you at all."

Le Renkuang exclaimed, "Are we not going to be together?"

Xiao Zhan was rendered speechless. "Of course not! The level-three fishery is a life-and-death experience for anyone. If the teleportation is oriented, why do you think I and Mrs. Wenren do not go with you?"

Han Fei was dumbfounded. They would be much more dangerous if they were dispersed after teleportation.

He knew that he was not weak, but his team had better comprehensive abilities with all the five classes. After all, everybody had their own specialties.

Wenren Yu came too. Looking at the hotpot ingredients all over the ground, she shook her head. "I forgot to tell you that although the level-three fishery is huge, a lot of people from the 36 towns go there, and it's not unusual for ruthless fishers to kill each other for treasures."

Xiao Zhan said, "The level-three fishery is much more dangerous than the level-two fishery apart from other adventurers. You need to deal with everything above and in the water. Who's going to cook for you?"

After a pause, Xiao Zhan went on, "Also, the level-three fishery is open to the Thousand Star City too. Anybody not stronger than a Hanging Fisher is allowed to go there. So, since you killed Sun Ye, Han Fei, someone from the Thousand Star City will definitely try to kill you."

Le Renkuang was shocked. "Then what should we do? Those guys are really strong." Xiao Zhan snorted. "What are you scared of? The level-three fishery is too big. You think you can just run into them?"

Han Fei did not consider it a big deal. He was confident as long as the enemy could not kill him with a simple slap. After all, he was now a Dangling Fisher, and he could always escape.

Luo Xiaobai asked, "How can we reunite?"

Wenren Yu shook her head. "It's barely possible, unless you're terribly lucky. But of course, you might encounter each other on the dragon boat..."

"The dragon boat?"

Seeing that everybody was at a loss, Wenren Yu shook her head. "We're not asking you to go today. Today, we're having a special lecture on the things you should remember in the level-three fishery."

Xia Xiaochan said unhurriedly, "I knew that it couldn't be so simple! Le Renkuang, you've picked your spiritual fruits for nothing."

Le Renkuang said bitterly, "I'm really unlucky!"

Han Fei, however, asked curiously, "Sir, what's a dragon boat?"

Pacing before them, Xiao Zhan said, "The things I'm going to talk about concerns your life. So, make sure they're etched in your head."

"Firstly, the dragon boat, which is the only safe area in the level-three fishery. It's thousands of meters in width and length."

"On the dragon boat, nobody is allowed to attack one another, and adventurers can trade with each other, take a rest, or hire other people."

Everybody was shocked.

Han Fei exclaimed, "Thousands of meters in width and length? Sir, you must be bragging!" Xiao Zhan snorted. "You think I'm bragging?" Han Fei swallowed. What kind of boat was that? It was more like a spaceship when its size could be calculated in kilometers instead of meters!

Xia Xiaochan counted her fingers and asked, "More than three thousand meters wide and thirty thousand meters long... How huge must that be?"

Xiao Zhan sneered. "Huge? There are a hundred such dragon boats in the level-three fishery."

Le Renkuang was dumbfounded. "So many?"

Wenren Yu smiled. "It's not a lot, compared to the vastness of the level-three fishery... If you want to return to the Blue Sea Town later, you will have to take the teleportation array on the dragon boat."

Luo Xiaobai took a deep breath and asked, "Madam, is there anything apart from the dragon boats?"

Chapter 296 Before Departure

Everybody had been excited and ready to go, but they did not know that the level-three fishery was so different from the level-two fishery!

The enormous boats thousands of meters long alone were fascinating enough.

Wenren Yu smiled. "Secondly, apart from the dragon boats, there is another kind of boat in the level-three fishery, named ghost boat."

"Ghost boat?"

Zhang Xuanyu exclaimed, as the name did not sound pleasant at all!

Wenren Yu nodded and said, "The ghost boats are boats that are devoted to pirating. Remember, anybody who meets outside of the dragon boat is stronger than great fishing masters, and the commanders of ghost boats are mostly Dangling Fishers, who hide their boats in the Sea Swallowing Seashell and attack when there is a chance. They're ruthless and greedy! If you run into them and can't defeat them, it's the smart choice to abandon your boat."

Luo Xiaobai asked, "Do those people usually hide in the water?"

Wenren Yu shook her head. "That's not certain. They might be in the sky too."

Xiao Zhan added, "Right, I need to remind you that those on the ghost boats are mostly mercenaries for hire on the dragon boat. So, do not trust or hire a stranger on the dragon boat unless it's necessary."

Everybody nodded. Based on what Xiao Zhan and Wenren Yu said, the dragon boats must be a complicated matter that required extra attention.

Xia Xiaochan asked, "What if we're in conflicts with someone on the dragon boat?"

Xiao Zhan replied quickly, "Don't do anything until you leave the boat. Every dragon boat is supervised with experts at the level of Hanging Fishers."

Luo Xiaobai asked, "Hanging Fishers? What if the Hanging Fisher is the one looking for trouble?"

Xiao Zhan said with a smile, "There are too many people on the dragon boat, and any Hanging Fisher would be found out if they ever set the adventurers up. They would be in a lot of trouble, so they usually won't do anything."

Han Fei frowned. "But what if the Hanging Fishers look for trouble after we leave the dragon boat?"

Xiao Zhan was lost for words. "You think the Hanging Fishers have nothing better to do? That's not a possibility. The Hanging Fishers who supervise the dragon boat cannot leave the boat easily, or a barrier will be triggered and they will be killed."

Han Fei was greatly relieved. He couldn't be more careful. After all, a Hanging Fisher was the strongest among a bunch of great fishing masters and Dangling Fishers, and they could kill anyone they wanted.

At this point, Old Bai walked to them slowly and continued, "Don't worry about that. You'll know more about the dragon boats and the ghost boats after you reach the level-three fishery. However, the greatest danger in the level-three fishery is the level-three fishery itself."

Wenren Yu nodded and said, "It's much more likely for a regular adventurer to be killed at the bottom of the ocean than in a battle. Different from the level-two fishery, the level-three fishery has too many dangerous areas." Zhang Xuanyu licked his lips and said, "But no matter how many people die, more people will continue the hunt for treasures."

Old Bai smiled and said, "Of course. How can a cultivator achieve anything if we don't explore the treasure troves? That being said, you'd better not visit the special places that are too risky."

Le Renkuang mumbled, "But we don't know what places are too risky!"

Old Bai yelled at him, "You'll know the perilous places after you go there."

Then, Old Bai drove everybody away. "GO now, little magnates. You've made a lot of money last year, haven't you? Go buy a decent boat, one that will not sink easily..."

Luo Xiaobai said, "Mr. President, we can't do anything if we have a boat but no Sea Swallowing Seashells!"

As if he had expected someone to say that, Old Bai searched his pocket and took out three Sea Swallowing Seashells.

Zhang Xuanyu's eyes immediately glittered. "Wow! Mr. President, you are too generous. Thank you very much. Haha..."

Le Renkuang rubbed his hands. "Mr. President, you are the best!"

Xia Xiaochan was confused. "Why are there only three? Four of us don't have a Sea Swallowing Seashell!"

Old Bai glanced at Han Fei. "Didn't you kill someone from the Sun family? Where is his Sea Swallowing Seashell?"

Han Fei blinked his eyes, feeling thousands of Iron-Head Fish raging in his heart. You're taking my trophy away so easily? I feel that I'm disrespected!

Xia Xiaochan, however, extended her hand and said, "I want Han Fei's."

Han Fei didn't know what to say. "Okay. You're truly good at exploiting me, sir."

That being said, Han Fei gave Xia Xiaochan the Sea Swallowing Seashell, not considering it a big deal.

Old Bai sneered. "I exploit you? Do you not remember what you did?"

Han Fei was rather panicked. Did the old man know that he stole the map? Would the old man ask it back?

Ignoring him, Old Bai simply went on. "You have the Sea Swallowing Seashells now, and you can buy your own boat. What else do you need? Spiritual weapons?"

Rubbing his hands, Le Renkuang asked in wild joy, "Mr. President, you're going to distribute spiritual weapons too?" Han Fei was also stunned at the president's generosity. Although he was not short of spiritual weapons, he certainly wouldn't refuse more of them, especially when it was free.

Xia Xiaochan's eyes glittered. "I would like a new dagger." "Tsk!"

Old Bai looked at her in disdain, "Of course you want that. Whoever doesn't have a spiritual weapon, raise your hand."

Immediately, all the five of them raised their hands.

Then, the rest of them looked at Han Fei, obviously asking him why he raised his hand.

Holding his head high, Han Fei said, "I'm in need of spiritual weapons too."

BAM!

Han Fei was kicked away by a shoe, and old Bai yelled, "You get the hell out of here."

Then, Old Bai frowned and asked, "You didn't acquire any spiritual weapons in the Fiery Mountain? Don't keep it to yourself. It's just a weapon."

Zhang Xuanyu shook his head. "I didn't get anything except a magic rod in the Star Spark Pavilion."

BAM!

Zhang Xuanyu too was kicked away. He sat down right next to Han Fei, dumbfounded.

Han Fei looked at him in despite. "Mr. President is right! You shouldn't have kept that rod to yourself!"

Zhang Xuanyu trembled in fury. He was better than this shameless guy who pretended that he had no spiritual weapons anyway.

Old Bai asked, "Le Renkuang, you didn't find any spiritual weapons?"

Le Renkuang's eyes cramped. "I... I still need a sword."

"Get lost!"

"Okay!"

Everyone: "..."

Le Renkuang quickly ran to Han Fei and Zhang Xuanyu and sat down next to them.

Han Fei: "???"

Zhang Xuanyu: "???" Luo Xiaobai said, "I picked speed."

Xia Xiaochan said, "I picked a boost that can improve my speed."

Behind her, Han Fei, Zhang Xuanyu and Le Renkuang looked at each other in a daze.

Han Fei asked, "You can pick a boost?"

Zhang Xuanyu was dumbfounded. "There are seeds in the Star Spark Pavilion? Did she pick the seeds for farming?"

Le Renkuang said, "How would I know? There were so many stars. I only picked a saber." Old Bai and Xiao Zhan both looked at Wenren Yu, and Wenren Yu snorted. "You two come to me tonight."

Then, Wenren Yu threw a book at them and said, "It contains the commonly-seen fish in the level-three fishery. Take a look for yourself."

The next day, those five people were about to set off, and Xiao Zhan and Wenren Yu saw them off with Qu Jinnan and Ling Yuan.

Xiao Zhan said, "On the same day one year later, I will welcome you at the gate of the school."

Wenren Yu threw a jade slip at each of them and said, "This is a technique of self-explosion. The spiritual weapons in the level-three fishery are not valuable. When your life is at risk, you can detonate those spiritual weapons, and it may save your life."

Everybody was surprised. Self-explosion? They didn't know that it was possible.

Wenren Yu said, "Let's hope that you will never have to use it. Be careful!"

Luo Xiaobai said solemnly, "Sir and madam, we're leaving."

Han Fei said, "Goodbye! I'll bring local specialties to you when I return."

After they left, Xiao Zhan said to Qu Jinnan and Ling Yuan casually, "You will embark on this journey too, but you have to travel to the level-two fishery first. You will have half a year to prepare yourselves."

Xiao Zhan went back.

Scratching his head, Qu Jinnan said innocently, "Ling Yuan, I'm slightly anxious."

Ling Yuan patted Qu Jinnan's shoulder heavily. "Don't be. I've got you covered."

On the way, after they just passed the iron bridge, Han Fei suddenly burst into laughter. "Come here! I've got some gifts for you!"

A moment later, Zhang Xuanyu exclaimed and roared at Han Fei, "I paid two thousand mid-quality pearls for a map! And it's useless now! Han Fei, you're truly shameless to not tell me until this moment and even flaunt your map at me."

Chapter 297 Embarked On A New Journey

They embarked on a new journey of cultivation... No! To be precise, for Han Fei and the others, the trip to the three-level fishery should be considered an adventure.

For some people, adventure meant danger.

But real strong masters never feared danger. Even ordinary fishers wouldn't be afraid of death, not to mention those who were already peak-level great fishing masters!

Xia Xiaochan changed to a new pair of daggers. In fact, she was not short of daggers as Han Fei had made two more for her. But hunters couldn't have too many daggers, just like weapons to armorists.

And Luo Xiaobai got the first weapon in her life, a long whip, a spiritual weapon. She got a spiritual weapon from the beginning and her starting point was very high. But even if Luo Xiaobai didn't use the spiritual weapon, she was still very powerful.

At this moment.

The five of them stood in front of the Linglong Tower.

Luo Xiaobai said, "As far as I know, the most expensive fishing boat in the Blue Sea Town costs 100,000 mid-quality pearls. However, in terms of quality, it is not as good as Han Fei's white fishing boat."

Han Fei was stunned. "Really? Is my boat worth so much?"

Luo Xiaobai shook her head. "It's not that your boat is valuable, but that your boat was made in the Thousand Star City. Such a fishing boat is rare to see in the Blue Sea Town, so it's very expensive."

Han Fei shrugged helplessly. I want to repair the ship!

Suddenly, Han Fei brainstormed an idea! Am I stupid? Although my ship was not made by me, I can make one myself!

Han Fei's breathing suddenly became short. If I find a lot of high-level materials to refine a fishing boat at the spiritual-weapon level, then I'll be able to sweep away all obstacles in the fisheries and do whatever I want in the future!

It didn't take them long to buy fishing boats. After saving money for more than a year, they were all rich now. Han Fei, as the wealthiest one among them, spent 100,000 mid-quality pearls without blinking an eye.

...

At the far north end of the Blue Sea Town, this was an island where Han Fei and the others had never been. The same as the Hanging Island where the Thug Academy was located, this island didn't have many people come here in normal times.

However, anyone who entered or exited this island was at least an advanced great fishing master.

In the center of this Floating Island, there was a huge building. It was a magnificent palace, surrounded by large pillars tens of meters high, and the pillars were carved with seaweed, fish, and shrimp relics.

There was a glow of blue light coming from the building.

In front of the building, dozens of guards were all advanced great fishing masters, each holding a long spear, wearing armor, and looking solemn.

Han Fei and the others just wanted to go in, but two guards crossed their spears and stopped them. "The teleportation fee to the level-three fishery is 5,000 mid-quality pearls per person." Everyone was stunned. So expensive?

Just when they were still surprised that the toll was so expensive, a familiar voice rang behind them. "It's not expensive. In the level-three fishery, danger and opportunity coexist, and the teleportation fee is just a symbolic screening condition."

They looked back, only to see that Li Hanyi and more than a dozen other people had come.

Le Renkuang was furious. "Lin Shengmu, how dare you still appear in front of me?"

Lin Shengmu glanced at Le Ren Kuang indifferently. "We were enemies but not now. The talents and adventurers from all the 36 towns will gather in the level-three fishery. You should forget what happened before. We are now comrades-in-arms."

Le Renkuang said angrily, "My ass! I don't have a sinister 'comrade-in-arms' like you..." Xiang Zuozuo curled her lips. "Fatty, do you have to hold such grudges? We just stripped you, hung you up, and beat you up. What's the big deal?"

"Shut up."

Le Renkuang's face was all dark. Seeing him so angry, Han Fei couldn't help but wonder how the battle was. Unfortunately, he missed a big show!

Zhang Xuanyu said lazily, "Gee! You are all Dangling Fishers now. Not bad!"

Xiang Zuozuo snorted coldly. "Earlier than you! I heard that you guys only made the breakthrough in these past two days."

Zhang Xuanyu didn't explain. "Little Zuozuo, if you're beaten to tears in the level-three fishery, don't ask me for help!" "Get lost!"

But Luo Xiaobai said, "The teleportation is random. Our chances of meeting them are slim."

Han Fei nodded. "I hope we won't meet in the level-three fishery because if we meet, I don't know whether to rob you or not..." Li Hanyi said indifferently, "You can certainly try."

In fact, things like peaceful coexistence, harmony, and a win-win situation would never exist between cultivators. Anyway, Han Fei would never believe that this group of people would become his allies in the future...

Everyone handed in the toll and then entered the building

Then they saw an empty giant space. In the center of it, a dark-blue spiral passage was twisting, which looked extremely eerie.

Han Fei exclaimed, "Is this the teleportation array?"

Luo Xiaobai said indifferently, "After entering, we will have to fight separately. Keep safe!"

Zhang Xuanyu sighed. "I hope so, but there is simply no safe place in the level-three fishery"

Xia Xiaochan said, "As long as you don't court death. I don't want to come back a year later and find you are gone."

"One year later?"

Li Hanyi and his teammates were stunned and stared at them in surprise.

Li Hanyi was shocked. "You are going to stay there for a year?"

Xia Xiaochan proudly said, "What's the matter? What's the point of going there if we can't even stay for a year?"

Everyone was speechless. Are these guys crazy?

Lin Shengmu shrugged. "Good luck to you. I hope I can still see you in a year." Le Renkuang scoffed. "What do you mean? Are you cursing us?"

Lin Shengmu smiled. "Of course not."

At this moment, a guard in front of the teleportation array shouted, "Be quiet. Remember to take out your fishing boat within one minute upon entering the array."

Everyone quieted down.

Zhang Xuanyu patted Han Fei on the shoulder. "See you inside."

Luo Xiaobai said, "Remember, don't rush about."

Le Renkuang said, "Remember to come to the Dragon Boat to find me!"

Xia Xiaochan rolled her eyes at him. "There are so many dragon boats. Let's take a chance! Take care."

After they bid farewell to each other and parted, Han Fei sighed. I'm going to start a treasure hunt alone again.

However, he didn't think Xia Xiaochan and the others would be in danger. Especially Xia Xiaochan, if she went crazy in the level-three fishery, no one would be able to handle her!

When Han Fei stepped into the teleportation array, it was all dark and his body seemed to be dragged forward by a force.

One minute later.

His horizon suddenly widened, and he saw huge clouds and the boundless sea at a glance.

However, as far as he could see, there was no fishing boat on the sea a thousand meters below him.

"Shit, why am I in the sky?"

Han Fei quickly took out the fishing boat and steered it to descend slowly. When the fishing boat descended to the height of 100 meters, Han Fei finally saw the sight of the sea.

The huge sea was like a smooth mirror. Even if the sea was churning in meters-high waves at any time, it didn't affect the flawless purity.

On the sea, fish leaped out from time to time.

Han Fei saw thousands of golden fish jumping on the water. When that kind of fish jumped, its body appeared like an arc, like a crescent moon, which was really beautiful. At the moment of entering the water, its body stretched instantly.

Han Fei smiled. "Is this the Crescent Moon Fish?"

A string of data flashed in front of his eyes.

<Name> Crescent-Moon Fish

<Introduction> Jumps like a crescent moon, as fast as the Golden Silkworm. It spits Golden Sword Qi to fight its enemy and can swallow the moonlight to temper its bones, which can be used in refining.

<Level> 31

<Quality> Regular

<Contained Spiritual Energy> 484 Points

<Edible Effect> Long-term consumption can enhance spiritual energy

<Collectable> Moon Bone

<Absorbable>

Han Fei was overjoyed. I've finally seen some new marine life! The level-three fishery stretched tens of thousands of kilometers and there must be no fewer than 10,000 species of fish here! "Haha... Treasures, I'm coming!"

Chapter 298 Humming Fish

Perhaps because he was in a new environment, but Han Fei felt that the air smelled really fresh. The sky was as cyan as jade and the sea was as blue as sapphire! All he could see was the vast blue sea.

"Hum..."

Han Fei had just landed the fishing boat on the surface of the sea, and humming sounds came from a near distance.

"Huh? What sound is it?"

Han Fei poked his head out, only to see a few colorful fishes, like butterflies, covered in red and white, and less than half a meter long, sticking their heads out of the sea one after another.

Data appeared in front of his eyes.

<Name> Humming Fish

<Introduction> It's a common fish that tends to move in schools and is inedible. They will make a crisp and pleasant sound... Their skulls can be used as a musical instrument.

<Level> 31

<Quality> Regular

<Contains Spiritual Energy> 462 Points

<Effect> Inedible

<Collectable> Music Skull

<Absorbable>

Han Fei thought it was incredible that there was such a special fish! They could make a sound and their heads could be used as a musical instrument? That was awesome!

The Humming Fish didn't seem to be afraid of humans. Seeing Han Fei looking at them, they also gathered around. Like a group of curious babies, they stared at Han Fei curiously with their big watery eyes as they made humming sounds.

At first, there were only three or two Humming Fish and they were scattered. However, because Han Fei didn't have any aggressive behavior, more and more Humming Fish came over. Only a moment later, hundreds or even thousands of Humming Fish appeared in front of Han Fei.

"Hum... Hum..."

At first, Han Fei thought the Humming Fish were very cute. However, when thousands of Humming Fish gathered around, it was not cute at all.

At this moment, Han Fei only felt that his brain was hurting, and his head was vibrating.

Han Fei picked up his fishing rod, poked a few Humming Fish, and pressed their heads into the water. But as soon as the fishing rod was retracted, they popped up and made more violent sounds.

“Shit... Go away! Go away... You’re too noisy!”

Han Fei struck the sea surface with his fishing rod and drew a splash of water in the water, frightening the Humming Fish.

Han Fei laughed as he watched the Humming Fish escape. “You coward fish.”

Han Fei was not in a hurry to fish. He took out two fish-skin maps and read them.

However, before he could open the maps, the humming sounds came again.

“Damn! Are they back?”

Han Fei poked his head out, only to find that the sides of the fishing boat were densely covered with Humming Fish.

This time, the humming sounds became louder and louder, and Han Fei checked around the fishing boat and found that there were Humming Fish all around. These guys huddled together, head to head, opened their mouths, and were humming at the fishing boat. This creepy scene stunned Han Fei.

“Fuck off! I have no time to play with you.”

Han Fei took out his rod, stirred around the fishing boat, and the schools of fish retreated again.

But before Han Fei sat down again, these shameless things came again. “Go to hell...”

Han Fei was speechless. Were the fish crazy? If the level-three fishery is full of all these annoying things, how could he embark on this adventure?

When a Humming Fish was killed, to Han Fei’s surprise, it began to become chaotic. These Humming Fish began to flop and jump on the surface of the sea.

And their humming voices seemed to be magical, like a 3D stereo, echoing in Han Fei’s ears.

After a while, the sea was shaking. The intermittent tremor of the sea caused by the high-frequency humming sound caused Han Fei’s fishing boat to shake violently as if it were equipped with a large electric motor.

This kind of sound wave came from the outside to the inside, and Han Fei felt that his head was being pricked by needles and he had a sharp pain in his brain. “Million Knife Art... Kill...”

As the Blue Sea Wandering Dragon Daggers shuttled in the sea, Han Fei even summoned Nine Tails, and the nine-star chain was churning wildly in the sea. In a moment, a large number of Humming Fish were shredded.

While Han Fei thought he had scared them away, the humming sounds rang again.

“Hum, Hum, Hum...”

“Hum...”

Han Fei drew a long face and was very angry! I’ve just come to the level-three fishery and what welcomed me was these crazy fish?! Shit! “F*ck you...”

Han Fei put away the maps and chose to fly the fishing boat into the sky. Okay, you win. I give the sea to you, OK? This was the first time that Han Fei had ever met a fish he didn’t know how to deal with!

After flying out more than five hundred miles in one breath, Han Fei let the fishing boat land again.

Fortunately, this time he didn’t encounter a horrible fish like Humming Fish.

Han Fei held the fishing rod and waved the hook out with a “swish”.

Han Fei did not continue to look at the map but to check the situation underwater. After all, he was not familiar with the environment here. The fish here were all level-30 or above, so he’d better explore it first.

He wouldn’t hesitate to take an adventure, but he still had to be careful.

After a year of practice, Han Fei had borne in mind the third piece of the God Scaring Painting. Now his scope of spiritual perception was 250 meters.

He spent most of his time studying the arrays. Otherwise, if he concentrated on practicing the God Scaring Painting, at this moment, his scope of spiritual perception would have exceeded 500 meters.

Underwater, as soon as the fish hook was dropped, he saw some finger-shaped shellfish. These shellfish had a tentacle placed outside the shell and moved forward by spraying water.

He didn’t need the Demon Purification Pot to give him any information. He had read about this creature in the book Wenren Yu gave him.

This shellfish was called Razor Clam, but although it was seemingly small and vulnerable, it was actually a level-10 creature. Once in danger, thousands of razor clams would gather and turn into a huge stone. And there would be barbed thorns sticking out of the shell for defense.

Then Han Fei saw some palm-sized prawns. Their bodies were arched but there were two tentacles nearly half a meter long on their foreheads.

These were Red-Browed Prawns. When they were swimming, their two “red eyebrows” were dancing in the water, which looked beautiful.

In addition to Red-Browed Prawns, there were some common creatures such as Butterfly Star Worms, Snow Snails, Gluttonous Fish and so on. Because the biological species were too complicated, Han Fei just recognized a few hastily and didn’t pay any more attention to them.

The first thing Han Fei did was put the hook into the water, trying to test the depth of the sea. However, the hook quickly went 500 meters deep without touching the bottom of the sea.

Much large fish had appeared around, and these creatures were the main threat in the level-three fishery.

When the hook was 800 meters deep, it finally reached the seabed.

Huh, a random place is more than 800 meters deep. The water depth of a thousand meters must be normal in the three-level fishery.

Han Fei was thinking about the depth of the water, but suddenly saw a big fish of four or five meters long casually swimming past.

“Huh? Black-Moon Sickle Fish?”

This was a black, yellow, and white fish with an erect, flat body and a beak-like mouth. Its back was different from other fish. Other fish had dorsal fins, while this fish’s dorsal fin was a sickle-shaped scimitar, which was extremely sharp.

When Han Fei saw this fish, the first thing that came to his mind was Horned Sickle Fish. The two were so similar, except that the size of the Black-Moon Sickle Fish was dozens of times the size of the Horn Sickle Fish.

Han Fei changed the fishing hooks and lines into the water and had them approach the Black-Moon Sickle Fish with the Winding Snake Technique. But when Han Fei was launching the Flash Hook Technique and Thousand Twining, the fish swished away and suddenly slipped tens of meters away.

“Shit... Is the fish so smart?”

Han Fei was surprised, but then he saw the Black-Moon Sickle Fish flash past, cutting the fish line with the sickle on his back.

Han Fei was shocked. I have already concealed the fishing line with the Water Vein Technique! How could the fish discover it? But Han Fei certainly wouldn’t let it destroy his spiritual weapon-level fishing line.

Just when the sickle cut across the fishing line, he instantly activated the Thousand Twining, but this fish was too big, before it was tied up, it slipped away again.

“Ha, it’s interesting! No wonder it’s said that the fish in the level-three fishery are very smart. It seems that they are really smart!”

Han Fei was not discouraged. Although this fish ran off, he still had many others to catch.

So Han Fei changed his strategy. I can’t catch the fish, but I can still fish them!

The fish hook of the Blue Sea Wandering Dragon Pole turned into a small fish with forearm length. It was controlled by Han Fei to dive into the sand and rocks on the seabed, pretending to be foraging.

As far as Han Fei perceived, there were no less than 30 kinds of creatures interested in this spiritual energy fish.

“Haha, a fish is a fish. How can you be smarter than me?”

Chapter 299 A Ghost Boat

Han Fei just wanted to explore the depth of the sea, but as he explored, he began to fight a battle of wits and courage with the fish in the level-three fishery...

At this moment, Han Fei was manipulating the spiritual energy fish to escape, which tried to drill into the seabed rock but deliberately slowed down.

On the sea.

Han Fei chuckled. "I don't believe you won't take the bait..."

Han Fei was grinning; however, his face turned black before the smile lasted ten seconds.

Han Fei was happily controlling the hook. However, a pair of pincers suddenly stuck out of the mud. The seabed became turbid and his fish hook was caught by the pincers.

Han Fei was annoyed. Hey, I'm fishing! Don't disturb me!

However, in a twinkle, while the fish hook was caught, Han Fei tied up the pair of pincers with the Thousand Twining technique.

"Up."

The fishing rod was bent, and the fishing line being rapidly retracted let out a muffled sound on the seabed. The fish that were about to make a sneak attack on the spiritual energy fish immediately fled one after another.

After a while, a broad-tailed shrimp burst out of the water. At the moment it jumped out of the water, dozens of shrimp thorns shot out like sharp arrows.

Han Fei did not block them, letting the shrimp thorns fall against his body, making clinking sounds.

"Hey! You sent yourself to me. Don't blame me."

Dozens of Blue Sea Wandering Dragon Daggers plunged into the shrimp's belly. In the blink of an eye, the shrimp was frozen on the spot.

Data appeared in front of his eyes.

<Name> Scare Shrimp

<Introduction> A common shrimp, aggressive in nature. They often hide in sand and stone to ambush their prey. They have 11 shrimp thorns on their bodies, which can be used for refining.

<Level> 32

<Quality> Regular

<Contained Spiritual Energy> 502 Points

<Edible effect> Long-term consumption can enhance Qi and blood

<Collectable> Shrimp Thorn

<Absorbable>

Han Fei knocked on the shrimp shell. This shrimp was different from crayfish and mantis shrimp. Its body length was no more than three meters, its butt was particularly wide, its head was comparatively small, and its double pincers were under its abdomen. He could catch it so easily because its pincers had been bound.

Han Fei was amazed. The world was full of wonders. He wondered how the shrimp tasted.

Han Fei immediately threw it into Forge the Universe, but just as he threw it in, it happened to be thrown on the extremely cold stone and was frozen into an ice sculpture in the blink of an eye.

“Huh! Didn’t I put a box over this stone? Doesn’t it work?”

With that stone, everything in Forge the Universe would be frozen into ice sculptures.

Han Fei had used the Blue Sea Wandering Dragon Bone to refine a small box to put the stone in.

But at this moment, he found that within three meters of the box, frost began to condense.

“This stone is a bit peculiar. If it is put together with the Fire Element Crystal I got from the Fire Cloud Cave, will they blow up my Forge the Universe?”

Han Fei smiled. He now owned two strange stones, but he didn’t know when they would come in handy. He put the box containing the Fire Element Crystal close to the extreme cold stone and the frost gradually faded a bit.

After doing this, Han Fei didn’t rush to go fishing. Even if he caught all those fish, it was not of much use to him now.

After ascertaining the situation of the seabed, Han Fei put away the fishing rod and took out the two maps again. Ren Tianfei’s map was relatively rough and seemed only to draw the general outline of the level-three fishery. There were no obvious landmarks and it was difficult to distinguish.

The map of Old Bai, on the other hand, was very detailed, marking thousands of dangerous places. Every dangerous place was marked out with a small dot and a small part of them were even marked with names.

Han Fei’s eyes darted back and forth between the two maps.

“Ren Tianfei, you old bastard, didn’t you know how to paint? What the hell is this? Now I have to find similarities between these two pictures, which are almost completely different...”

Han Fei pressed his finger on the map of Old Bai and checked the small spots horizontally one by one, while muttering.

“Sea Grassland, Purple Tree Jungle, Two-Line Rock... Undersea Deserted City... Valley of Ten Thousand Smokes... Huh...”

Suddenly, Han Fei rubbed his eyes and he seemed to have discovered something. On the map of Old Bai, he saw a spot called “Abyssal Chasm”.

Because this place was a crack, it was an icon of a crack. On Ren Tianfei’s map, Han Fei also found a similar crack.

“Haha! That’s it.”

Han Fei looked excited. How difficult was it to find a dangerous place in the waters of hundreds of thousands of kilometers? But as long as the general direction was right, it was only a matter of time to find it!

Following the mark of “Abyssal Chasm”, Han Fei headed for the northwest corner. He roughly calculated the scale of the map and then was stunned.

“Fuck, no one has said how big the three-level fishery is! How am I gonna locate it?”

Han Fei complained while looking at the maps. In the end, he set a range, which was roughly somewhere between 20,000 and 50,000 kilometers away from the Abyssal Chasm.

Han Fei put away the map and looked up gloomily at the sky.

He was very melancholy!

It’s only an inch-long distance on the map, but I’ll have to search for nearly ten thousand kilometers. Are you kidding me?

The ordinary fishery only stretched a few thousand kilometers but also had hundreds of dangerous places.

Here, an inch on the map would be tens of thousands of kilometers, where there must be thousands of dangerous places.

Han Fei yelled, “Ren Tianfei, you old bastard, I will definitely hammer you to death when I see you in the future.”

As soon as Han Fei shouted so, with a loud bang, something broke through the water. And then, a sledgehammer shadow tens of meters in size smashed at him.

“Shit... I was just kidding... Ahh!”

Han Fei looked dumbfounded. What the f*ck happened?!

With a flash in his hand, the Water Stirring Seal was thrown out. The two shadows both tens of meters in size collided with each other and there was a loud noise.

Boom...

Han Fei’s fishing boat was shaken aside more than ten meters.

Before Han Fei could stand firm, a spear burst out of the water. The shadow of the spear shot out like a dragon, chilly and breathtaking

Clang...

Han Fei blocked the attack of the spear with the Water Stirring Seal again. But under this blow, Han Fei heard a crack and another crack appeared on the seal.

In an instant, two figures jumped out of the water.

No, to be precise, it was three. Just when Han Fei was knocked into the air, the air was cut through and a sharp blade fell on him.

“Hunters?”

Han Fei immediately put away the Water Stirring Seal. Two Blue Sea Wandering Dragon Daggers appeared in his hands and he smiled.

“Come on, let’s fight! Let’s see who’ll win...”.

Han Fei was not afraid at all. So far, the only hunter he feared was Xia Xiaochan.

The hunter seemed to be very disdainful of Han Fei. So, he thrust two daggers at him. At the moment when the daggers almost touched Han Fei, he suddenly slightly moved his body. The daggers that were supposed to pierce into his chest hit his shoulder.

But Han Fei’s Blue Sea Wandering Dragon Daggers plunged directly into the other’s abdomen.

The next second, there was a muffled groan in the air and a fuzzy figure seemed to try to evacuate.

“You want to leave? Too late!”

“Attach.”

Swish...

The nine-star chain darted at the injured hunter, but a green vine suddenly shot out from the water, pulling this man away from Han Fei abruptly.

At this moment, Han Fei had a sledgehammer under him and a spear beside him. Ignoring the hunter, he shot out nearly thirty Blue Sea Wandering Dragon Daggers in an instant, and the nine-star chain also seized the opportunity to buckle the bow and drag him out of the air.

BAM...

Clank, Clank, Clank... Han Fei landed on the deck, and the two who attacked him were also pulled away by the vines, and this round of fighting was over. The next moment, a small fishing boat appeared on the sea more than ten meters away. Han Fei waved his hand and the Blue Sea Wandering Dragon Daggers flew back, disappearing into his body in an instant, which stunned the four people on the opposite side.

They were shocked. This guy who had just become a Dangling Fisher easily blocked their sneak attack and even injured one of them in a flash. His strength scared them!

Han Fei narrowed his eyes. This must be the ghost boat that we were told about. Did I run into it so soon?

But these people were really strong! When they launched an attack at him, he almost didn’t have the time to react. Besides, they were really impressive in both strength and cooperation! If he made the slightest mistake just now, he would be in serious trouble.

At this moment, there were four people standing on the bow of the fishing ship, three men and one woman. One skinny young man was clutching his abdomen at the moment and he was obviously the hunter who attacked.

Han Fei asked with a smile, "Hi, why did you attack me?"

Chapter 300 Be Tricked

On the sea, the atmosphere between the two fishing boats was a bit strange. As the breeze blew gently across the sea, the two sides stood facing each other.

Being outnumbered, Han Fei was not afraid at all. He wanted to get some information about the level-three fishery from the other side.

The four on the ghost boat were hesitating. By right, they should retreat immediately if their attack failed. This was the iron law of the level-three fishery.

However, Han Fei was alone but had dozens of spiritual weapons, which they really coveted. Since they had an advantage in numbers, they were reluctant to give up their prey.

Seeing that the other party didn't speak, Han Fei asked again, "Why don't you speak?"

There was a moment of silence on the other side, and the spear-bearing man said, "Brat, you are very strong, but unfortunately, you are alone. We can let you go but you've gotta hand over 10 spiritual weapons."

"Hahaha..."

Han Fei laughed out loud. "Haha... Sorry, I can't hold back... Did you ask me to hand over 10 spiritual weapons to you?"

The man frowned. This boy is too arrogant! Does he have some sort of trump card or what?

The burly man with the hammer snorted. "You are only one person. Once your spiritual energy is exhausted, how can you survive the level-three fishery? Be smart! Hand them over."

Han Fei grinned. "Do you really run a ghost boat? Did I come to the wrong place? It's said that people who run a ghost boat are extremely dangerous but why are you so goofy?" The faces of all four of them changed slightly. How dare this brat!

The hunter said to his teammates via voice transmission, Don't underestimate him. This guy is very strong. He must be a strong soul warrior from some town.

The female manipulator behind also transmitted her voice, His contractual spiritual beast is also very powerful, with strong combat and control powers.

The spear-bearing man said expressionlessly, Let's retreat. Wait for another chance.

The four of them chose to leave temporarily. In a place like the level-three fishery, what mattered most was not age but strength.

Many people didn't understand this rule, so they died here.

There was even a law here, which was that the younger a fisher was, the stronger they were. Those who could come to the level-three fishery at a young age must be exceptionally strong. Once confronted by such a character, the consequences would be terrible.

“Retreat!”

Han Fei had prepared to confront them a bit longer, but their fishing boat disappeared instantly. The four of them plunged into the sea almost at the same time and ran away.

“Shit, cowards!”

Han Fei certainly wouldn’t just let them go. How could he let them come and go so freely? So he also put away the fishing boat and plunged directly into the sea.

These people were only Dangling Fishers. If these people could jump into the water of the level-three fishery, so could he.

Under the sea, Han Fei was surprised. He was only a second behind them, but they had already swam away hundreds of meters.

“Hum...”

Han Fei activated the Shadow Swimming Art and chased after them. What makes you think you can just run away after sneak attacking me?

Han Fei’s speed was very fast. It could be said that even Zhang Xuanyu, who got the Golden Water Silkworm, could only match Han Fei in speed. Of course, he couldn’t be compared with Xia Xiaochan who was a hunter.

Han Fei didn’t need Little Gold to attach to him. He swam casually in the sea and even had time to avoid some fishes pouncing on him.

Ahead, the four people were nervous. How did he catch up? We don’t want to fight you! Come on, give us some face!

Han Fei transmitted his voice to them, Don’t run! I still have a lot of questions to ask you! How can you just leave your customers behind?

The four people were speechless. Shit, who the f*ck is this guy? We’re really unlucky to have run into him!

Han Fei continued, Hey! I can let you go, but can you answer a few questions for me? Do you know where the Abyssal Chasm is?

Han Fei just wanted to ask them some questions. After all, these guys were not weak and it would not be easy to kill them.

However, when they heard “Abyssal Chasm”, they suddenly accelerated and started escaping desperately. Han Fei was stunned. Did I say something wrong?

To Han Fei’s surprise, he found that the four of them had started running separately. Was he so scary?

However, without any hesitation, Han Fei began to chase the female manipulator. The reason was simple. Manipulators were relatively weak! If he had to choose one to fight from his classmates, he would certainly choose Luo Xiaobai. So, his choice was simple

After chasing her for dozens of kilometers, Han Fei was about to catch up with her but suddenly found that the manipulator had led him to run into a school of fish.

A string of data flashed in front of Han Fei's eyes and he was speechless. Is this woman looking for death?

<Name> Spiked Armor Fish <Introduction> A common fish, having hard armor, having three spikes on the back, which can be freely retracted or issued and can be used for refining. <Level> 32

<Quality> Regular

<Contains Spiritual Energy> 512 Points

<Edible Effect> Long-term consumption can enhance Qi and blood

<Collectable> Mystic Spike

<Absorbable>

Han Fei sent her a message through a voice transmission, Hey, don't court death! I'm not going to kill you, OK? I really just want to ask you a few questions...

But the woman suddenly disappeared with a swish.

"F*ck..."

Han Fei was speechless. I've been tricked! Bastard! This woman set me a trap! She must have some mysterious way of escape, so this school of fish is prepared for me.

BAM!

Han Fei bumped into the school of Spiked Armor Fish.

In an instant, thousands of black spikes like steel cones darted at Han Fei.

At that moment, Han Fei felt as if tens of thousands of Iron-Headed Fish were galloping in his mind. There were so many traps in the level-three fishery!

"Blade Storm."

Han Fei immediately held two daggers, surrounded by dozens of Blue Sea Wandering Dragon Daggers on his side, and he formed a small storm in the Spiked Armor Fish school, drilling a channel out forcibly.

But even so, there were still countless sharp spikes hitting Han Fei's body. Although they couldn't break his defense, it really hurt!

Half an hour later, Han Fei finally ran out of this school of fish, and his body was all black and blue.

At this moment, the female manipulator had already escaped.

Han Fei gnashed his teeth. “Good, very good! Don’t let me see you again! Otherwise, I’ll kill you all.”

Han Fei’s body gradually became translucent. Although the half-stealth effect of the Mist Hidden Grass was not perfect, with it, he could at least avoid nearly half of the fish in the sea.

Han Fei was not in a hurry to return to the sea surface. Now that he had been here, he would stay here a little longer. Anyway, this was his first time in the level-three fishery. He wanted to know more about it.

When Han Fei dove about 500 meters deep, a few black shadows darted at him with a swish in the gloomy water. Han Fei chopped at them with a Blue Sea Wandering Dragon Dagger. However, with a shrill, muffled collision sound, he was knocked flying.

“Huh? What a strong force!”

Han Fei’s eyes widened when another black shadow pounced at him, which was almost merged with the darkness.

<Name> Anti-Heaven Blade

<Introduction> Its whole body is pitch-black with blades on it, which are extremely sharp. It has a very low sense of presence, with a special skill, Rolling Blade.

<Level> 34

<Quality> Rare

<Contains Spiritual Energy> 1,064 Points <Edible effect> Enhance physical fitness and strengthen the hardness of one’s spiritual energy protective cover.

<Collectable> Rolling Blade

<Absorbable>

Han Fei was shocked. Could the hardness of a spiritual energy protective cover be strengthened by eating fish?

Looking at the Anti-Heaven Blade Fish that continued to dash at him with rolling blades, Han Fei immediately filled the Blue Sea Wandering Dragon Dagger with spiritual energy, which instantly gave a dazzling glow. Rip... Crack...

With blade breaking sounds, the Anti-Heaven Blade Fish was chopped into two pieces by Han Fei.

Han Fei grabbed it and threw it into Forge the Universe.

Not far away, when the other Anti-Heaven Blades saw this scene, they suddenly turned around and fled.

Han Fei was speechless. Are the fish here all that smart? Your companion was killed by me! Don’t you have any desire for revenge?
