

GOF 711

### **Chapter 711: The Tsunami Jellyfish**

When Han Fei found the so-called Undersea Chimney, a heated battle was still going on there.

The Spirit Awakening Fluid was already gone. However, the place was strewn with dead bodies. The powerful sea creatures had left, leaving the common or rare creatures fighting each other and swallowing the remains.

The so-called Undersea Chimney was more like the crater of an undersea volcano. However, Han Fei didn't know what the Undersea Chimney should look like, because its upper level had been razed and there were rock pieces everywhere.

Han Fei's first thought after he came to this place was that he needed the spiritual energy.

Yes, so many sea creatures were dead in this place that the sea bed had almost been occupied. More and more regular creatures were joining every moment, adding to the chaos of the place.

Because too many creatures were dead, the spiritual energy here was particularly sufficient.

Han Fei glanced at his half million points of spiritual energy, which wouldn't be enough if he ran into any trouble. He needed at least a hundred million points of spiritual energy that could be readily available.

Here at the razed Undersea Chimney where thousands of bodies were gathered, Han Fei didn't think it was a problem to gather several million points of spiritual energy even though some of the spiritual energy had dispersed.

Han Fei didn't forget to look for Xia Xiaochan, but he couldn't find her without enough spiritual energy.

Otherwise, if anything happened and a battle took place, it would be hard for him to weather through rounds of battles.

After all, he was merely an intermediate Hanging Fisher, and he wasn't qualified to come to this place.

After confirming that no exotic creatures were around, Han Fei recalled the boat and jumped into the sea.

Almost in an instant, thousands of creatures went around Han Fei and bit him.

All kinds of auras, stings, needles and poisons were sprayed at him.

Two hundred Blue Sea Wandering Dragon Daggers burst out from Han Fei's body and constituted a sphere around him, revolving crazily.

"Absorb now!"

He couldn't control the Blue Sea Wandering Dragon Daggers for long, due to his spiritual power.

Considering Han Fei's current status, when the creatures lunged at him so crazily, he probably could only sustain for half an hour, maybe shorter.

So, Han Fei quickly sank to the bottom of the sea and stood on a Spirit Gathering Array. Immediately, he was surrounded by a storm of spiritual energy.

By common sense, the creatures above level-40 knew what was good and what was bad for them. At least in the level-three fishery, the sea creatures already knew to cherish their lives.

However, at this moment, the creatures were all crazy, and they were like moths darting at fire.

Han Fei was this fire. At this moment, spiritual energy was concentrated on him from all directions. Even though countless ultra-quality spiritual weapons were revolving around him, infinite creatures were still coming at him.

The center of Han Fei's eyebrows was flashing as a tremendous amount of spiritual energy flowed in. It was much faster than swallowing spiritual fruits. About 25,000 points of spiritual energy was absorbed every second.

However, after about a hundred seconds, Han Fei realized that he couldn't sustain the Ten Thousand Knives in One anymore, mainly due to the lack of his spiritual power.

Immediately, the seawater within a hundred meters became thick, and water blades were rolling. All the creatures within the range were ripped apart.

The Infinity Water was a valuable treasure, and Han Fei couldn't carry out its real value yet.

So far, Han Fei's only understanding of the Infinity Water was that it could transform seawater into blades.

However, the water blades were a lot weaker than the Ten Thousand Knives in One. At the same time, the Infinity Water consumed Han Fei's mental power too, although it posed a lesser burden than the Ten Thousand Knives in One did.

Unfortunately, Han Fei felt that his head was dizzy after a hundred seconds, because there were too many creatures around him! He had the Demon Purification Pot to absorb spiritual energy, but he couldn't resist the attacks of so many crazy creatures.

So, after absorbing four million points of spiritual energy, Han Fei fled from the Undersea Chimney.

Han Fei suddenly disappeared and reappeared in Forge the Universe in the next moment.

Looking at the spiritual energy in storage, Han Fei heaved a soft sigh, regretting that he shouldn't have been so extravagant back on the Scattered Stars Island.

When he tamed Snowmourn in the Snow God's Temple, he almost used up all the disposable spiritual energy in Forge the Universe. The rest of the ultra-quality spiritual stones only amounted to ten million points of spiritual energy in total, which wasn't nearly enough.

Han Fei put thirty spiritual fruits into his mouth and trained for two hours. After digesting those spiritual fruits, his spiritual energy in storage reached seven million.

Seeing that number, Han Fei instantly threw the Half-Mermaid's golden battle suit into the Demon Purification Pot.

A moment later, Han Fei reluctantly spent 2,500,000 points of spiritual energy to make a new battle suit.

<Name> Golden Battle Suit

<Introduction> This is a weapon forged with the Red Sun Mystic Crystals. It weighs 108,000 kilograms and contains a golden barrier that can bounce back half of the power when attacked.

<Quality> Semi-Divine Weapon

<Sealed Spirit> None

<Recastable>

<Unrefined>

Note: Because of the restrictions of its materials, it can only be reforged into a semi-divine weapon at best.

Sitting cross-legged and training for two hours, Han Fei opened his eyes and after a flash, he appeared at the bottom of the sea.

When Han Fei appeared, an insect nearby was so scared that it quickly slithered away.

Han Fei wasn't bothered. He spread out his senses and didn't find many unusual creatures nearby, so he summoned Little Black and Little White.

Because of the restraints on the Scattered Stars Island, Han Fei hadn't summoned Little White and Little Black for a long time except during the trip to the Snow God's Temple.

At this moment, Han Fei touched Little White's head and said, "Daughter, look for Xia Xiaochan and the Hexagon Starfish."

Little Black, on the other hand, swooshed out and bit through a fish. It even tore the fish apart.

Han Fei shouted angrily, "Get back. This is no time for fun. Don't run about."

Little White had already wandered several rounds. She aimed at the Undersea Chimney not far away first, before she turned to the depths of the sea.

Han Fei's heart became heavy, as Xia Xiaochan went to the deep sea.

Han Fei and other powerful creatures kept a distance from Undersea Chimney because the Spirit Awakening Fluid was already out and a lot of regular and rare creatures were gathered.

After all, even if the exotic creatures and Inferior Man-Fish were strong, they couldn't last for long in front of such an overwhelming number of enemies.

Even Han Fei had only endured ten minutes in this place with the help of the Ten Thousand Knives in One and the Infinity Water.

Han Fei looked back regretfully. If he weren't in such a rush, he could go there and absorb spiritual energy every six hours. Then, he would be able to get ten million points of spiritual energy in a day.

However, he had no time for that. It had already been six hours since he left the Scattered Stars Island, and even longer since Xia Xiaochan had an attack and ran to the depths of the sea, which must've been fifteen hours earlier.

In the dangerous Unknown Place, Han Fei didn't know anything about what was out there, and neither did Xia Xiaochan.

At a moment like this, he could only pray that Xia Xiaochan's episode was over and the Hexagon Starfish pulled her into a gate.

In that case, the odds were quite high that she could be found. In terms of escape and survival, the Hexagon Starfish was definitely a professional with all its arrays and legacies.

However, after swimming two hundred kilometers, Han Fei suddenly heard the sharpest noise in his ears. He grunted and scanned, only to discover that a transparent creature was charging at him in the middle of a tide from three thousand meters away.

Han Fei instantly spat out and blocked his ears with two handfuls of mud. He then swam forward as if nothing had happened.

However, the noise wasn't weakened by the blockage of ears at all. Han Fei vomited blood when he was a thousand meters from the source of the noise.

"Damn it. What's that? Little Black, kill it."

Naturally, the transparent creature couldn't discover Little Black, so it stopped shrieking after Little Black bit off half of its body. At this moment, Han Fei arrived and saw information in his eyes.

<Name> Tsunami Jellyfish

<Introduction> This is an exotic creature that can absorb sounds. It can turn sound into a sharp power that penetrates the enemy's mental barrier to wound or kill them. It then can absorb the enemy's spiritual power. When encountering an enemy, the Tsunami Jellyfish could mistake the enemy into thinking that it was somewhere else with the sound. It contains Shrilling Pearls that can increase spiritual power.

<Level> 46

<Quality> Exotic

<Spiritual Energy> 6,124 points

<Effect> It can increase spiritual power after being eaten.

<Collectible> Shrilling Pearls

<Absorbable>

Upon seeing the creature, Han Fei was intrigued. "Little Black, stop biting and keep it alive."

Han Fei simply grabbed the Tsunami Jellyfish. He wondered what would happen if he were to seal the Tsunami Jellyfish into his knife. Could it still unleash this high-pitched noise to disturb the enemy's mind?

Immediately, Han Fei took out the Blood-Drinking Knife and sealed the soul.

## **Chapter 712: Demonization Scroll**

*Shua!*

Han Fei slashed the Blood-Drinking Knife, which had a new sealed soul, at a sand lobster, which was stunned when the knife was still five hundred meters away. It failed to react until it was cut into halves.

Immediately, Han Fei's eyes glittered.

It was true that the sea was the place where one could really become strong. He had found a Tsunami Jellyfish only six hours after he left the Scattered Stars Island.

It was very significant. If the Half-Mermaid Heavenly Talent he fought had been stunned for a moment in battle, he would've cut the enemy into halves back then without taking any risk.

To some extent, it was even more practical and surprising than a thirty-percent increase of speed.

However, back on the Scattered Stars Island, Han Fei had never seen the Tsunami Jellyfish. Not even once.

It suggested that the Scattered Stars Island was rather barren in terms of resources. It was like a base in the Unknown Place, and those on the Scattered Stars Island were essentially staff in the base.

Only those who fought on the sea out there were real warriors who could grow fast.

The people who feared the intrusion of sea demons on the Scattered Stars Island every day were essentially office workers who were quite safe.

However, the consequence of being safe was slow growth.

An example was that they could never catch a Tsunami Jellyfish near the shore, because such jellyfish never went there.

Little White continued leading the way. After swimming another hundred kilometers, Han Fei saw an overwhelming number of squids that came at him like missiles.

Han Fei was lost for words. He didn't think those squids were hostile; it just so happened that he was in their way.

Han Fei quickly rose to the water above, as those squids would squirt poisons if they were alarmed.

If it were another time, Han Fei might have considered challenging them. After all, the Heaven Spirit Detoxifying Insect needed nutrition too. So far, it was still level-31 and hadn't reached level-32 yet.

However, he was in the middle of an emergency, and he didn't intend to waste his time here.

But the moment Han Fei swam up, he sensed that hundreds of winged fish were swarming at him.

Han Fei: “???”

In his senses, the mouths of the big winged fish were all several meters long, and their body was almost five meters long. Their fins were straight and looked like wings of a plane. They didn't look friendly at all.

Han Fei intended to dodge again. However, he was quite curious what the creatures were, so he didn't flee too far.

When those fish saw Han Fei, dozens of them left the shoal and simply lunged at him.

After Han Fei saw the information of the fish clearly, he was lost for words. Rays? They were more likely to be manta rays.

<Name> Flying Ray

<Introduction> This is an extremely fast ray that likes eating shrimps and squids the best. It has fins that look like sabers and wings. It can spew out Desolation Water that can quickly corrode the enemy. It's hard to escape from the Flying Ray when caught.

<Level> 46

<Quality> Rare

<Spiritual Energy> 4,366 Points

<Effect> It can increase your speed if it's eaten over a long period of time.

<Collectible> Blade Feather

<Absorbable>

Han Fei was lost for words. It was merely a rare creature, yet it was level-46?

There was also the Desolation Water. He didn't know what it was, but those Flying Rays shouldn't be swimming so fast with their mouths wide open all the time. So, their body must be discharging water in some way.

Han Fei spread out his senses again, only to discover that those fish didn't have stomachs at all. Behind their mouth was nothing but bones.

Han Fei was stunned. Were they zombie fish? Why would they eat if they didn't even have a stomach?

Han Fei slashed out the Blood-Drinking Knife. Instantly, half of the Flying Rays that lunged at Han Fei stopped although they were still moving with the current.

Han Fei killed five Flying Rays with one attack, and the remaining of them simply rushed back to their shoal.

Han Fei's face was dark. Was this expected of the Unknown Place? The chance of running into fish seemed a little bit too high. He hadn't even sped up yet, but he had met swarms of fish and exotic fish everywhere...

Two hours later, Han Fei's face became even darker. In the two hours just now, he encountered exotic creatures three times, shoals of fish seven times, glowing fish one time, and Skyward Razor Clams once... He even met a Flood Snake.

At this moment, Han Fei felt that his head became even larger, as he had encountered a Red Demon.

Yes, in Han Fei's senses, a Red Demon was sitting on the back of a lobster thirty meters away. It seemed to be in a different direction and couldn't have noticed him yet.

Han Fei considered if he should kill the Red Demon or not. On second thought, he thought he should.

He couldn't be forgiven for leaving the Scattered Stars Island without permission easily. He had to offer something more convincing, like battle credit.

Therefore, Han Fei cast a Stealth Array and a Concealment Array on himself.

He then slowly approached the target.

Han Fei didn't know the level of the Red Demon yet. If it was a big shot above level-50, he would just stand still and wait for it to move away. If it wasn't...

After recalling Little Black and Little White, Han Fei moved at a low speed, fearing that his action would affect the normal flow of seawater, so he simply floated along the water.

The Red Demon was holding a harpoon and looking around now and then, which surprised Han Fei.

"Huh? Why do I feel that this guy is on patrol?"

<Name> Red Demon (Regular Sea Demon)

<Introduction> This is an intelligent and bloodthirsty sea demon. It's of a lousy quality, so it's impossible what creature it deprives from. It's physically strong and can control some of the sea creatures. It has a life spear inside its body, which can be used to launch the strongest attack of the Red Demons.

<Level> 49

<Spiritual Energy> 7,705

<Demon Heritage> Level-Four, High-Quality

<Level> Transcended

<Companion Spirit> Silver Sting Lobster

<Unabsorbable>

...

Han Fei was greatly relieved to find that it was a level-49 creature.

Level-49 equaled that of a peak-level Hanging Fisher, but it wasn't weak at all. Han Fei couldn't have defeated it without using the last resorts if he were still a Dangling Fisher.

However, Han Fei was different from before. He was already an intermediate Hanging Fisher. He was three levels higher than when he fought the peak-level Hanging Fisher, including a major level.

Han Fei slowly unsheathed the Blood-Drinking Knife. The moment Han Fei released his killing intent, the Red Demon jerked and grabbed its harpoon, before it went straight at Han Fei.

“So you’ve found me? Heh, it’s too late.”

*Shua!*

Han Fei had already performed the Draw Technique in his best status. He had prepared for the attack for a long time.

The light of the knife leaped to the Red Demon instantly. The Red Demon slightly paused. Because of the pause, it lost the last chance of resistance.

The light passed and cut the Red Demon into halves.

Han Fei dashed at the target. This was the first time he had killed a Red Demon in the level of a peak-level Hanging Fisher in a head-on fight. His previous attack was very powerful and consumed thirty percent of his strength.

It meant that Han Fei could only perform three of these attacks under normal circumstances.

Han Fei quickly searched the Red Demon’s stomach, which was the place where the sea demons usually kept their treasure. As expected, he seized a Sea Swallowing Seashell. But it was sticky and Han Fei didn’t touch it at all.

The Companion Spirit had already disappeared. Han Fei simply threw the Red Demon’s body into Forge the Universe and glanced at its Sea Swallowing Seashell. Then, his eyes glittered.

He found a hundred kilograms of Spirit Awakening Fluid as well as a jade slip in the Sea Swallowing Seashell.

Han Fei grabbed the jade slip, only to discover that it was full of weird incomprehensible characters.

However, when Han Fei was about to throw the jade slip away, a piece of information popped up in his head.

“Demonization Scroll” (Demon-Level, Low-Quality)

<Introduction> This is a half-complete training method of sea demons. It can turn low-level or regular sea demons into elites with a 60% success rate.

Superseding Technique: Demonization Art

Deduction Cost: 0/5,000,000

Note: Can be fused.

“Hiss! This can be recognized too?”

Han Fei was briefly stunned. However, what surprised him most was not that the Demon Purification Pot could read the language of the sea demons on the Demonization Scroll, but the note that it could be fused.

*How can it be fused?*

*What can it be fused with?*

### **Chapter 713: Caught Up**

Han Fei wasn't surprised to take out a Sea Swallowing Seashell from the Red Demon's belly, whose quality was not very good.

He had even taken out a Sea Swallowing Seashell from a Half-Mermaid! However, there wasn't any good stuff in it except for the spiritual spring and a few pieces of materials.

However, this was the first time that Han Fei found something like this "Demonization Scroll".

Han Fei guessed that this "Demonization Scroll" couldn't be that great. After all, it was only a low-level cultivation method for sea demons and was only semi-finished.

What did this mean?

This meant that this Red Demon tried to break through the level-49 barrier to become a real sea monster by cultivating this technique.

But this couldn't be the Half-Mermaid's objective. Half-Mermaids were much better than Red Demons no matter in appearance or aptitude. They should disdain using the "Demonization Scroll".

Han Fei felt that Half-Mermaids should practice a higher level of cultivation method. The reason why they didn't bring their cultivation methods with them was... Who the f\*ck would take their cultivation methods with them?

They could just keep the contents of the cultivation method in mind. Why would they bother to keep the book itself?

Of course, it wasn't a problem for Han Fei. After all, all he had on him was the True Spirit Fishing Art, which could almost be found everywhere.

The True Spirit Fishing Art above level-6 was relatively rare.

But for the first five levels, to be honest, many people would rather switch to another technique than practice it.

At this moment, Han Fei saw the words, "Can be fused," again.

He had fused the three combat skills of the Sea Racing Art, Flying Fish Technique, and Shadow Swimming Art, which made the 64-Dimensional Fish Dragon Dance, a venerable-level combat skill.

What could he take to fuse with this "Demonization Scroll"?

Han Fei was pondering when he suddenly froze.

“Hmmm... The Fish Transformation Technique?”

“Fish Transformation Technique” (Demon-Level, Low-Quality)

Introduction: A semi-finished transformation-type combat skill. It can transform humans into fish, with a survival rate of up to 80%, and some humans transform into demons.

Spiritual Energy to Be Consumed: 100 million points

Deduction Result: Unknown

Remarks: Can be fused

Han Fei frowned. *Can the “Demonization Scroll” and Fish Transformation Technique be fused?*

The Fish Transformation Technique could no longer be deduced when deduced into demon-level, low-quality.

But now, it could actually be fused with another combat skill, a combat skill for sea monsters.

What did this mean?

The Fish Transformation Technique turned out to be a cultivation method for sea monsters?

Han Fei took a breath. This discovery was significant.

He obtained the Fish Transformation Technique in the Fiery Mountain and the combat skills and techniques there must have been left by humans.

Could it be that long ago, there were already sea monsters among human beings?

“No, I deduced the Fish Transformation Technique into demon-level, low-quality.”

Han Fei’s heart shivered. Suddenly, he discovered a secret.

Countless people had secretly studied the secrets of transforming into a fish. They thought that their research in this area had been quite deep. But in fact, what they had researched wasn’t the technology of transforming into a fish, but the cultivation system of sea monsters.

Therefore, they would turn into sea demons and could never transform back.

Some powerful people discovered this secret and tried to stop this kind of research.

That was why the people who researched or even practiced the Fish Transforming Technique were hunted.

Because, in the eyes of those powerhouses, if one practiced the Fish Transformation Technique, he had actually become a sea monster.

They no longer regarded those people as humans.

This also explained why many demonized humans would return to the ocean and then fight against the human race...

“Is this the root cause of the battle between sea monsters and the human race?”

Han Fei even suspected that there was no sea monster in this world. It was just that someone opened up this path, and some people had become sea monsters, forming a new race.

If his conjecture was true, then, in fact, the powerhouses or Heavenly Talents among sea monsters were actually descendants of human beings. They were just a branch of the human race.

Han Fei glanced at the "Demonization Scroll" and then at Fish Transformation Technique. He wanted to fuse them now to see what would happen.

However, the spiritual energy he had now was limited. The fusion was bound to consume a lot of spiritual energy.

And he was still in the deep sea, and there might be enemies around him. It was not the right time to do this.

Even if he fused the two techniques, he wouldn't practice the fused product.

After all, he didn't want to become a sea demon.

His original purpose was to possess a skill like Money King's seventy-two metamorphoses. But now, he knew it was impossible.

Perhaps, if he kept deducing the fused product, he might be able to switch between the identity of a human and sea monster perfectly, just like Yang Ruoyun did... But at least now he didn't want to try it.

*I'm a human being. I don't want to become a demon, let alone a fish demon.*

These thoughts flashed in Han Fei's mind. Since it was not useful, he simply gave it up temporarily.

But why were these Red Demons appearing here?

Besides, according to his observation just now, this Red Demon was patrolling for some reason.

Could it be that the sea area beyond 8,000 kilometers away had become sea monsters' territory?

Whether it was or not, other sea monsters might come here. His immediate priority now should be going to find Xia Xiaochan instead of staying in this damned place.

"Girl, let's go."

This time, Han Fei's speed was not fast because there were a lot of powerful creatures here. The strength he showed was not high enough to scare them away at all.

Less than half an hour later, Han Fei saw another Red Demon.

This time, this Red Demon was not alone but took two little Inferior Man-Fishes with him.

Han Fei frowned. Something was not right.

It had been only less than ten thousand kilometers. How come so many Red Demons and little Inferior Man-Fish were popping up?

Han Fei was waiting. If there was only one Red Demon and two little Inferior Man-Fishes, it was not a big deal.

Now, he had sealed the Tsunami Jellyfish into his Blood-Drinking Knife. As long as he took the opponent by surprise, he could easily kill them.

At this moment, Han Fei's 36 kilometer-long perception range played a big role.

He was already waiting for the Red Demon and Inferior Man-Fish on their way ahead, his body floating with the waves.

When the Red Demon and the Inferior Man-Fish appeared 800 meters away, Han Fei threw a dazzling knife light at them.

The knife light immediately appeared 5 meters away from the Red Demon, and in an instant, an extremely sharp whistling sounded in the brains of the Red Demon and the two little Inferior Man-Fish.

The Red Demon's body froze. He didn't even know what happened when he was hit by the knife light. The next second, he died.

An Inferior Man-Fish was also killed by Han Fei on the spot. The other Inferior Man-Fish, not in the attack range of the knife light, survived.

However, Han Fei was only 800 meters away from him. He rushed out and reached the Inferior Man-Fish in an instant.

When the Inferior Man-Fish saw Han Fei, his eyes were filled with shock and consternation.

Unfortunately, it was too late for him to fight back and he was killed by Han Fei with a single blow.

Han Fei searched their bodies and didn't find any Sea Swallowing Seashells in their bodies, so he simply let the two Inferior Man-Fish's bodies sink to the bottom of the sea.

Their death couldn't be kept a secret. If this place was really sea monsters' patrolling area, then sooner or later it would be discovered that the Red Demon and the Inferior Man-Fish were missing.

Once their corpses sank to the bottom of the sea, they would be swallowed by marine creatures soon. It would be more convenient than throwing them in Forge the Universe.

Of course, Han Fei left their harpoons. After all, a harpoon represented that he had killed an Inferior Man-Fish.

But he didn't throw the body of the Red Demon because he wanted to create an impression that the Red Demon was not killed, but was just missing.

Ten minutes later, Han Fei killed a Tooth Grinding Shark. Suddenly, an unexpected situation appeared in his perception.

In his perception, there was a human fishing boat traveling in the sky above the sea, seeming to be looking for something.

Han Fei perceived and found that it was actually a six-star expert.

*Swish!*

Han Fei immediately hid in Forge the Universe. His Concealment Array and Stealth Array might not be able to help him hide from the eyes of a six-star expert, so Forge the Universe was the safest.

Han Fei was shocked. Was the Scattered Stars Island reacting so quickly?

It had been only less than four hours and they had already chased him all the way here?

In Forge the Universe, Han Fei frowned. It seemed this time, he would have to face not only the crisis in the ocean, but also the investigation from human beings.

He felt quite stressed and was determined to find a way to find Xia Xiaochan as soon as possible.

If he guessed right, after hearing Gong Wenhai's report, they must have sent someone to chase Xia Xiaochan. However, they should not have a tracking capability as strong as his. He had Little White to lead the way, but what did the Scattered Stars Island people have?

Suddenly, Han Fei's eyes flickered, and he looked at his waist tag.

*Yes! I'm already thousands of kilometers away from the Scattered Stars Island, how am I still being tracked?*

Han Fei immediately pulled off his waist tag and threw it into Forge the Universe. Did this waist tag have a positioning feature?

If so, Xia Xiaochan would be in danger.

#### **Chapter 714: Sea Monsters' Lair**

Above the sky.

When Su Mo received the order to arrest Han Fei, he learned that the Undersea Chimney was the last place he had been seen.

In fact, it made no difference whether he knew it or not. Xia Xiaochan disappeared in the Undersea Chimney, so Han Fei's first stop must have been there.

However, when Su Mo rushed to the Undersea Chimney, he saw densely packed sea creatures gathering there, which sent a chill down his spine. Although he was going to be a Hidden Fisher soon, he was still scared by that sight.

And Han Fei, although he was a Heavenly Talent, was only an intermediate Hanging Fisher. He didn't think Han Fei could handle this.

So Su Mo headed forward all the way.

Just now, when he sensed that someone was perceiving him, he knew it must be Han Fei.

Quickly rushing over, Su Mo found that there was no one there.

At this moment, he was flying above the sea in a daze, "Huh! How could there be no one? Even if it was a Red Demon or a Half-Mermaid, at least they should've shown up!"

"No, I heard that Han Fei is quite proficient in arrays. Did he use a Concealment Array?"

Su Mo clenched the spear in his hand. Han Fei was a Heavenly Talent, so he must not take him lightly.

Besides, based on the known intelligence, Han Fei could even beat a peak-level Hanging Fisher.

According to intelligence, Han Fei had already killed peak-level Hanging Fishers, who were actually quite outstanding among their peers.

However, after investigating every corner within a radius of tens of kilometers, Su Mo still didn't find anyone.

After staying for a full half an hour, Su Mo suspiciously steered the fishing boat away...

...

Han Fei was sitting cross-legged in Forge the Universe. Just now, he also found 100 kilograms of Spirit Awakening Fluid in this Red Demon's Sea Swallowing Seashell.

"Wow! Does every Red Demon take so much Spirit Awakening Fluid with them?"

Han Fei was overjoyed. 100 kilogram of Spirit Awakening Fluid was quite valuable!

At the price of 5,000 points of credits per kilogram, from every Red Demon he killed, he would get 500,000 points of credits. Was there anything more profitable than this in the world?

Even if he refined weapons in the Refining Hall every day, he wouldn't earn as many credits as killing two or three Red Demon in the waters outside of the Scattered Stars Island!

"Huh! Could it be this group of Red Demons looted the Undersea Chimney with Xia Xiaochan and her team?"

The Undersea Chimney had just been looted and these Red Demons were so close to it. Besides, these Red Demons had Spirit Awakening Fluid on them, so they were very likely to have joined in the looting.

Otherwise, he really couldn't figure out why each of these Red demons had 100 kilograms of Spirit Awakening Fluid on them.

But why was it 100 kilograms? No more, no less, as if he had been allocated a fixed amount.

Han Fei licked his lips. "Whatever. Let me drink it first. Since I can't go back now, I should increase my strength as quickly as possible."

This time, Han Fei didn't feed the Spirit Awakening Fluid to his beasts.

Last time, he fed them more than 2,800 catties, but none of them reached level-40.

Han Fei guessed, on the one hand, it was because his beasts were too high-leveled, so the amount of Spirit Awakening Fluid needed was huge.

On the other hand, he had too many, four in total. After the Spirit Awakening Fluid was divided evenly, the amount for each beast was not much.

Although he could feed all the Spirit Awakening Fluid to a single one, such as Little Black or Little White, this was bound to cause an imbalance in power. Each beast had their own abilities, and he didn't want to favor one more than another.

Therefore, Han Fei began to pour the Spirit Awakening Fluid into his mouth frantically.

It tasted slightly sweet and sour. For some reason, Han Fei felt as if he were drinking Yakult.

When Han Fei was swallowing the Spirit Awakening Fluid, the black light appeared in his mind again.

Han Fei immediately stopped swallowing, closed his eyes, and perceived it. *What is that? Where's the black light from?*

Since it was black, why did he think it was a beam of light? It was really strange, but the thing just passed away in a flash, and he couldn't study it at all.

Seeing nothing happen, Han Fei continued to swallow.

Then he found that his upper limit of spiritual energy began to decrease a little bit, from 11,228 points to 11,001 points. After swallowing more than 50 kilograms of Spirit Awakening Fluid, the upper limit began to slowly rise again.

When Han Fei drank all 200 kilograms of Spirit Awakening Fluid, his upper limit of spiritual energy had become 11,608 points but his level was still 44 and his upper limit of spiritual energy had only increased by 400 points.

Han Fei frowned. "This thing doesn't work well at improving my level!"

In a short while, although his strength hadn't improved much, he had drunk a lot of Spirit Awakening Fluid, which was equivalent to 1 million points of credits, and ordinary people might not be able to save so many points after working hard for four years.

Han Fei moved a little bit. His physique seemed a little better, but only slightly.

"That's not right! Cao Qiu improved his strength a lot by drinking Spirit Awakening Fluid. Why doesn't it work on me?"

Han Fei was confused. It had been less than half an hour. Has the person outside left?

Forget it, he'd better wait a little longer.

Although it was important to find Xia Xiaochan, it would waste even more time if he got caught.

After eating a spiritual fruit, Han Fei found that after drinking the Spirit Awakening Fluid, even if he ate a spiritual fruit, the spiritual energy in his body was not conflicting, so he immediately ate a dozen more.

He stopped until he felt the spiritual energy in his body became a little unstable.

At this moment, it had almost been half an hour. Han Fei appeared in the sea again.

In the sea, a Snake Pattern Fish was taken aback by Han Fei's sudden appearance and quickly ran away, Han Fei just ignored it.

He found no one in the sky, nor did he perceive any Red Demons or Inferior Man-Fish, so he called out Little Black and Little White.

“Girl, let’s keep looking.”

It took them a full two hours, and the sky was already dark. The moon was shining above the sea, and in the deep sea, Han Fei was swimming and searching.

Suddenly, Little White rushed in a certain direction.

Han Fei’s eyes lit up. “Did you find something?”

After a while, the first thing that Han Fei perceived was the wreckage of a large ship. Half of the big ship was buried in the mud on the bottom of the sea, and half of it was exposed.

Even so, it still looked huge. It seemed to be a cruise ship, much bigger than ordinary fishing boats.

Seeing the cruise ship, Han Fei rushed over.

Han Fei thought it must be the Hexagon Starfish who hid Xia Xiaochan inside his gates and found a random spot to hide. It must be so.

However, after rushing about a kilometer, Han Fei stopped abruptly.

Han Fei: “???”

His face changed slightly. He perceived the existence of Half-Mermaids.

Moreover, not only did he perceive the Half-Mermaids, but there seemed to be a Half-Mermaid perceiving him.

*Swish, Swish, Swish~*

At this moment, Han Fei felt a chill down his spine. From that shipwreck, 8 little Inferior Man-Fish, 5 Red Demons, and 2 Half-Mermaids suddenly rushed out.

The leading Half-Mermaid led the crowd and rushed straight in Han Fei’s direction.

Han Fei glanced at Little White. *I asked you to find Xia Xiaochan! Why did you bring me into sea monsters’ liar?*

But immediately, Han Fei discovered that something was wrong.

Little White’s perception couldn’t be wrong. Could it be that Xia Xiaochan was caught by these sea monsters?

Unfortunately, he had no time to investigate what was inside the sunken ship now. There were 15 sea monsters here and he certainly wouldn’t stay!

He immediately put away Little Black and Little White, had Little Gold attach to him, and activated the 64-Dimensional Fish Dragon Dance to run away.

Han Fei was not running for his life. If Xia Xiaochan was caught by these sea monsters, the only way to rescue her was to kill these sea monsters first.

If there were only two or three Red Demons, Han Fei might be able to take them by surprise.

But now, there were two Half-Mermaids and five Red Demons here.

If he guessed right, these Red Demons were all level-49, of the same level as the two that he had just killed. But if they were of peak-level, their combat power would be way stronger than that of those two.

Even though Red Demons were a lot weaker than Half-Mermaids, they would be comparable to ordinary peak-level Hanging Fishers. He didn't think he could beat five peak-level Hanging Fishers alone. Even if he could, it would be a lucky victory.

Han Fei was running as fast as he could and took out the enhanced version of Poison God.

There was no need to arrange arrays or use the Infinity Water. Those sea monsters were chasing him, so their route was consistent with his. He just needed to control the seawater and let the Poison God spread slowly, and they wouldn't be able to escape.

Han Fei scattered a catty of Poison God along his route and slowed down.

Ten seconds later.

Perceiving that the sea monsters passed through that area defenselessly, Han Fei smiled.

One second!

Two seconds!

...

### **Chapter 715: Bloody Battle with the Half-Mermaids**

Han Fei was escaping, but his speed became slower and slower.

Han Fei couldn't help but sigh. Cao Qiu, Cao Qiu! Although this guy seemed stupid, he was actually extremely dangerous.

Poison God was just like a loop-hole in a game. If he used it well, his survivability would be greatly enhanced.

Eight minutes after the sea monsters passed through the Poison God area, Han Fei had stopped running. The distance between the two sides was only about 2,000 meters.

When the two Half-Mermaids in the lead had already realized that there was something wrong with them, Han Fei already started fighting back.

However, the Half-Mermaids and the Red Demons were racing too fast just now, so although they felt unwell at the moment, they hadn't realized what exactly had happened to them.

When Han Fei had turned around and rushed towards them, however, the two Half-Mermaids suddenly turned pale.

At this point, they had certainly figured out what happened.

"Roar... Roar!"

“Howl...”

The two Half-Mermaids began to roar. But when they looked back, they found that except for the five Red Demons who had followed, the little Inferior Man-Fish had already begun to vomit while clutching their stomachs.

While vomiting, they were a little manic and began to bombard each other indiscriminately.

The two Half-Mermaids tried to run, but after only less than a kilometer, they felt that their stomachs and belly were about to explode.

It was not that they didn't want to run, but they couldn't run at all. This poison was really terrifying, and just in such a short period of time, it had already drained out a few percent of their combat power.

“Roar!”

Hearing their howls, Han Fei sneered. *No one shall leave today!*

In a flash, Han Fei had swept over more than 2,000 meters and had activated the Draw Technique. The horrible knife light shot out and appeared in front of one of the Half-Mermaids in an instant.

“Hoooooo!”

Suddenly, the white flame enveloped the Half-Mermaid. This guy quickly summoned three battle suits in a row and a big shield.

*Crack, Crack, Crack!*

*Clang!*

Han Fei was a little surprised. How did this Half-Mermaid react so fast? Hadn't it already been deeply poisoned?

This Half-Mermaid blocked the Draw Technique, but was still sent flying by Han Fei's knife light, and began to vomit hard.

The other Half-Mermaid was also enveloped with white flames at this moment, but he still took out a golden harpoon, which made Han Fei's pupils constrict.

*Is this a Heavenly Talent?* he wondered.

Han Fei didn't expect that there would be a Heavenly Talent here. However, even so, this guy's mouth began to overflow with unknown substances at this moment.

However, this opponent seemed to still have the power to fight. The golden harpoon in his hand was thrust straight into the sea and the spiritual energy and demonic energy shot out like an invisible dragon. At the same time, the Half-Mermaid raised his speed to the extreme and pounced on Han Fei.

*Swoosh!*

Han Fei put on his semi-divine battle suit and swung the semi-divine Golden Seal in his hand at the Half-Mermaid, which had turned into a big-seal phantom.

“Humph! I don’t believe you can still maintain your peak combat power after swallowing the enhanced version of Poison God!”

*Clang!!!*

The sea exploded, and within a kilometer radius, raging waves rolled and ripples shook.

Han Fei was sent flying upside down, with a trace of blood oozing from the corner of his mouth.

This time, he deliberately didn’t use the Majestic Mystic Spell. It turned out that the strength of this Half-Mermaid had been reduced by at least 30-40%. Otherwise, under the opponent’s full blow, he shouldn’t have only been slightly injured.

“Tell me where the person you caught is?”

Han Fei stomped and jumped up again. The big seal phantom appeared in the sky, seawater was rolling to the sides, and spiritual energy was burning like fire. A blaze of light broke out in the dark sea.

“Kill!”

The Half-Mermaid only said “kill”, and a huge scorpion, piercing the air with its tail at a terrifying speed, appeared in front of Han Fei in an instant.

Caught off guard, Han Fei only had the time to block with his battle suit.

*BAM!*

Han Fei was stabbed and fell into the bottom of the sea. On the seabed, dust billowed and it was muddy.

The Half-Mermaid was shocked. *This man’s battle suit is so strong! It can actually resist my full blow. Isn’t it comparable to my golden battle suit?*

“Puff!”

The Half-Mermaid felt that his internal organs were rolling, and he could no longer help it and directly had diarrhea.

In the next second, a knife light suddenly appeared in front of his eyes and swept across his neck.

He activated his Amulet but it couldn’t stop Han Fei. After all, this Half-Mermaid had no combat power left now.

The Half-Mermaid couldn’t believe he died in this way. It was not that he couldn’t fight, but that his combat power was plunging every second. After two consecutive full blows, he no longer had the power to fight again.

Han Fei slashed the sea demon, pulled off its golden battle suit and golden harpoon, and threw them into Forge the Universe.

As he issued an order in his heart, the Infinity Water appeared. If this Half-Mermaid had an Immortal Seal, he would continue to poison him until he died.

Not far away, the Half-Mermaid that had just been defeated had summoned his Associated Spirit and was escaping.

“Sacrificing Punch!”

Han Fei certainly wouldn’t let him escape. Although the Half-Mermaid was poisoned, his Associated Spirit was not, so he had to kill him.

A punch was blasted, and the scarlet fist mark shot a dazzling light across the bottom of the sea with an indomitable momentum.

Han Fei didn’t look at the Half-Mermaid anymore, because five red lights suddenly appeared in his field of vision.

“Majestic Mystic Spell.”

Han Fei took a sip of Candle Dragon Blood and stepped on the Coiled Turtle Array, and the Golden Seal appeared in the sky.

He had recognized that the red spears were the life spears of Red Demons, which were their dying strikes.

Han Fei had already seen the power of the dying strike of a level-49 creature when he was on the Skeleton Shore.

At that time, if it hadn’t been for Cao Qiu’s fist marks that had removed most of the power of the red spear, he might have been badly injured.

Now there were five life spears. Obviously, these Red demons knew they couldn’t resist Han Fei anymore, so they tried to die here with Han Fei.

“Overlord.”

The semi-divine Golden Seal was smashed out and directly hit the bottom of the sea. Unfortunately, he wasn’t proficient enough at wielding a seal, so the seal failed to block the life spears.

At this time, the Overlord appeared. He carried a large shield in his hand, on where there were nine defense arrays.

*Crack!*

*Crack!*

*Crack!*

...

After seven arrays were broken in a row, the five life spears were blocked.

Now it was Han Fei’s turn to attack. The Draw Technique shot out and directly killed two Red Demons.

On the other side, the Half-Mermaid was hit by the Sacrificing Punch and left a thousand-meter long mark on the seabed, stirring up billows of dust.

Han Fei waved casually and the Golden Seal returned to his hand with a swish. Then, Han Fei turned around and used this strength to hit a Red Demon who was trying to escape.

At the same time, Han Fei rushed forward and 200 Blue Sea Wandering Dragon Daggers came out through his body, encircling the two Red Demons that had almost vomited their guts out.

Han Fei's mouth bulged up, and like rinsing his mouth, his cheeks vibrated and he spat out a big mouthful of blood.

All this only took less than five seconds. The Infinity Water was shaking. The escaping Half-Mermaid Heavenly-Talent was going to be devoured by the enhanced version of Poison God and could no longer pose him any threat.

Fortunately, this Half-Mermaid didn't launch a Dying Strike. Otherwise, it would delay him some time.

After killing it, Han Fei summoned Nine Tails, who grabbed onto the Red Demons and Half-Mermaids that Han Fei had just killed with its nine-star chain. Then Han Fei quickly rushed towards the Inferior Man-Fish in front.

In his perception, those Inferior Man-Fish were still ten kilometers away.

Their speed was not as fast as the Half-Mermaid's and the Red Demon's. Moreover, their toxic resistance was obviously not high. So, before he reached them, they had almost all died.

When Han Fei arrived, only three of these Inferior Man-Fish were still struggling. The others had completely collapsed, their skin cracked and they were vomiting blood and gore.

As Han Fei issued the order in his heart, the surrounding seawater rolled up, and the Infinity Water burst out, reaping their lives completely.

In fact, he didn't have a particularly big aversion to the sea monsters, so he just killed them without torturing them.

Now all of the 15 sea monsters had been killed.

Han Fei got a total of 7 Sea Swallowing Seashells. None of those Inferior Man-Fish had any Sea Swallowing Seashells.

Han Fei took their harpoons. As for their corpses?

Han Fei didn't want to keep these poisoned corpses. Otherwise, they would pollute Forge the Universe!

Han Fei didn't even look at the 7 Sea Swallowing Seashells he had got. He swallowed several mouthfuls of Candle Dragon Blood and hurried towards the sinking ship.

It was a race against time. The fighting here just now hit the seabed several times and caused a lot of vibrations. The two full blows of that Heavenly Talent also made a big noise.

After a while.

Han Fei's perception swept through every corner of the sunken ship, but no one was found!

Han Fei went in, rummaged around, and even searched a rotten hall in the shipwreck where the sea monsters were just now.

Here, there were still some half-eaten big fish and crabs, etc. Obviously, the sea monsters were eating here just now.

Han Fei muttered, "Sure enough, a sea monster is still a sea monster. Even if they transform into a human form, they still eat raw food..."

There was disgust on Han Fei's face. There were no other creatures here.

Han Fei spread his voice across the entire shipwreck tentatively, "Master Hexagon, can you hear me? Did you hide in some array? It's Han Fei... Master Hexagon?"

However, no one responded. With a flash between his brows, Little Black and Little White appeared.

"Girl, isn't she here? But your mommy isn't here... Did you make a mistake?"

But Little White swam directly out of the boat. At this moment, Han Fei suddenly put away Little Black and Little White.

He had Nine Tails attach to him, held the Golden Seal in his left hand, the Blood-Drinking Knife in his right hand, put on a gold battle suit, and stepped on the Six Spirit Armor.

"It's you?"

### **Chapter 716: It's Better to Be in the Sea!**

Han Fei was caught up after all. He thought that this six-star-ranked powerhouse had run away, but who knew that he would appear again at this moment!

He must have been attracted here by the battle just now.

Su Mo didn't enter the sea directly. To be honest, he was really taken aback.

Just now, he passed by this place too. However, he only perceived a group of sea monsters, among them there were even Half-Mermaids. As a peak-level Hanging Fisher, he dare not attack them!

However, when he came back, the sea monsters were gone?

Then to his shock, he found that two Half-Mermaids, five Red Demons, and eight Inferior Man-Fish were killed.

At first, he thought it was done by someone who was also sent to arrest Han Fei!

But when he dove into the sea, he found that all of these sea monsters were poisoned. Their corpses were so poisonous that no creatures in the sea ate them.

At that time, he remembered the information about Han Fei being good at using poison.

Then he came face to face with Han Fei.

Han Fei stood in the bow of the boat with a cold look, asking, "Are you here to catch me?"

Su Mo's forehead was sweaty. "Han Fei, it's not just your business to find Xia Xiaochan. As early as the moment Xia Xiaochan disappeared, someone was already looking for her. Why don't you come back with me! Going to sea without authorization is prohibited. But since you've killed so many sea monsters, it should be able to make up for your error. And I'll intercede for you."

Han Fei sneered. "Make up for my error? Humph... Are they trying to find Xia Xiaochan or catch her? Why do they only believe the words of the two people in the Dark Hunter Legion?"

Su Mo frowned. *Han Fei went to sea without authorization... He might not plan to go back at all!*

"No matter what the result is, you should wait till Xia Xiaochan returns, right?"

Han Fei said lightly, "Their ability to find people is not as strong as mine."

Su Mo was stunned for a moment. "No, there are Hidden Fishers looking for her."

Han Fei trembled slightly, and then said angrily, "Damn it, are there even Hidden Fishers on this hunt? Do you want to kill Xia Xiaochan?"

Su Mo quickly shut up. He spilled the beans just now, so he quickly remedied, "No, they just want to find her. How is it possible for the Hidden Fishers to attack Xia Xiaochan?"

Han Fei smiled contemptuously. "She is my girlfriend. I'll find her myself. I don't believe you... So, are you going to fight against me or let me go?"

Su Mo swallowed slightly. If he hadn't seen these corpses, he definitely would dare to fight Han Fei.

However, after seeing the horrible corpses of those sea monsters, he didn't dare to do it at all!

Although Han Fei was only an intermediate Hanging Fisher, his strength was ridiculously strong! He fought against 15 sea monsters alone and killed them all. More importantly, he didn't seem injured at all. How could he possibly defeat this guy?

Su Mo hesitated and didn't know how to answer him. He was at a loss whether he should leave or stay.

Han Fei said, "Just tell them you didn't meet me. I won't tell others even if I go back in the future. Now I'm leaving, but if I meet you again, I will kill you!"

Su Mo gritted his teeth, immediately got on his fishing boat, and flew away.

He thought to himself, *Come on, judging from this bastard's strength, how is it possible for a Hanging Fisher to capture him? At least, it should be a Hidden Fisher!*

Su Mo could feel Han Fei's fighting spirit. If he fought against Han Fei, the one killed would probably be him. He didn't want to get himself in this trouble.

At least Su Mo could be sure that Han Fei was only charged with going to sea without authorization. However, Han Fei absolutely didn't betray the human race. Otherwise, why did he kill 15 sea monsters in one go?

Thinking of the sea monsters, Su Mo smiled. Yes, he could bring back the corpses.

Then he just needed to tell the leaders that he didn't find Han Fei, but found the corpses of the sea monsters he killed.

This could fully prove Han Fei's strength, and convince the leaders that even if he found Han Fei, he wouldn't be able to bring him back.

This also indirectly proved that Han Fei didn't betray human beings, but was simply searching for Xia Xiaochan.

In this way, the leaders probably wouldn't make him continue to look for Han Fei.

As for whether Han Fei would return in the end, what did it have anything to do with him? He just wanted to stay comfortably on the Scattered Stars Island.

Han Fei secretly breathed a sigh of relief when Su Mo left his range of perception.

A peak-level Hanging Fisher with six stars was extremely strong.

If he did fight against him, it would be difficult to solve him.

After all, he had just finished a big battle, exhausted and injured, and his combat power was probably only about 70% of its peak state.

Seeing Su Mo leave, Han Fei didn't immediately release Little Black and Little White, although Little White seemed to find something just now.

It was not the time to do it. He had just killed a Half-Mermaid Heavenly Talent, who definitely had a life tablet. It would be impossible for the death of a Half-Mermaid owning a semi-divine weapon to go unnoticed.

He certainly wouldn't believe that there wouldn't be sea monsters coming to investigate.

So, after thinking about it, Han Fei summoned Little Black and Little White again.

"Girl, indicate a direction."

Little White spun for a while and aimed at Han Fei's front left.

With a flash between Han Fei's brows, he put away Little Black and Little White and rushed out of the sea. Then he took out the Wind God Boat and raced away more than 3,000 kilometers in one go. After that, he plunged into the water and then entered Forge the Universe.

...

He needed to recover. After throwing a Divine Healing Technique on himself, he started to check the 7 Sea Swallowing Seashells he just got.

First of all, each of the five Red Demons' Sea Swallowing Seashells contained 100 kilograms of Spirit Awakening Fluid. Han Fei had already guessed it, so he was not surprised at all.

At the same time, Han Fei found another "Demonization Scroll", which was almost exactly the same as the previous one. It seemed that this thing was a common item in the sea monsters' world.

In addition, he found a new sea monster combat technique called “Basic Combat Skills for Mermaids” in a Red Demon’s Sea Swallowing Shell. However, it was only spirit-level, so Han Fei just threw it aside without even looking at it.

However, to Han Fei’s surprise, he found some top-quality pearls in these Sea Swallowing Shells. These pearls were not many, but including the ones he got from the two Red Demons he killed earlier, there were less than 100,000 in total. Did sea monsters also use top-quality pearls as currency?

Han Fei thought about it. The sea monsters were living in the sea, and their ability to dig out pearls should be much better than humans’. If top-quality pearls were their currency, they must be damn rich.

Could it be that they didn’t take their properties with them because of something?

As for the rest of the contents, it was all top-quality materials, but no special materials. Han Fei didn’t check them one by one and just threw them directly into Forge the Universe.

When he got enough spiritual energy in the future, returned to the Scattered Stars Island, and cleared up this misunderstanding, he would go to the Refining Hall to refine weapons and would surely earn a lot of points

After checking the Red Demons’ Sea Swallowing Shells, he began to check the two Half-Mermaids’ Sea Swallowing Shells.

Among them, Han Fei discovered 1,000 kilograms of Spirit Awakening Fluid and two sea-monster combat skills in the Half-Mermaid Heavenly Talent’s Sea Swallowing Shell.

One was called, “Sea Spirit Three Consecutive Stings”, a demon-level, mid-quality combat skill.

The other was called the “Sea King’s Secret Method”, which was a heaven-level, mid-quality combat skill.

Han Fei didn’t have the slightest interest in the “Sea Spirit Three Consecutive Stings” because it was too low-leveled.

But the “Sea King’s Secret Method” attracted Han Fei’s attention. This was a secret method and its level was not low. Han Fei certainly wanted to check it out.

However, Han Fei was speechless after reading it.

It turned out that this so-called “Sea King’s Secret Method” was why these Half-Mermaids were enveloped with white flames in combat. They actually used this method to summon the so-called “Sea King’s” fighting will.

Therefore, the white flame was not a flame at all, but a will, a will that he didn’t know where it came from.

The sea monsters believed that this was a gift from the king of the sea race, and it was the power that the king of the ocean bestowed on them after they prayed.

Han Fei was shocked. This secret method could double the sea monster's combat power, with almost negligible side effects. It somewhat resembled his Majestic Mystic Spell. And all he needed to do was just eat more and replenish more energy.

"No wonder the Half-Mermaids all have that white flame. It has turned out to be quite powerful."

However, it didn't seem to be useful to him. After all, this was for the special body structure of Half-Mermaids.

In addition to the "Sea King's Secret Method", Han Fei was attracted by the more than 3,800 kilograms of Spirit Awakening Fluid, 1,200 catties of spiritual spring, more than 30 mid-quality spiritual stones, and 12 high-quality spiritual stones.

"Wow! So rich?"

Han Fei swore that this was definitely the richest Half-Mermaid he had ever met. He was even a bit jealous of this Half-Mermaid.

"Why were the Heavenly Talents I met before not as rich as this one?"

Then he figured it out. Those Heavenly Talents were either in matches or exploring secret realms. Who would carry so much money with them?

This time, Han Fei had obtained 5,300 kilograms of Spirit Awakening Fluid, 2,100 catties of spiritual spring, 33 mid-quality spiritual stones, 12 high-quality spiritual stones, and 120,000 high-quality pearls.

And this was just what he earned in less than 5 hours after going to sea.

"Sure enough, it's better to be in the sea!"

### **Chapter 717: Full Speed Ahead**

Han Fei wasn't a fool. Getting as much as 5,300 kilograms of Spirit Awakening Fluid only from this single group of sea monsters certainly would make him think.

Was there really so much Spirit Awakening Fluid on sea monsters?

Not necessarily.

These sea monsters must have just robbed the Undersea Chimney, so even the Red Demons had Spirit Awakening Fluid on them.

When Le Renkuang contacted him, he said he was going to deliver supplies.

Supplies needed to be delivered. What did that mean? It meant that the amount of these supplies must be huge.

Therefore, Han Fei had a guess. The amount of Spirit Awakening Fluid produced by the Undersea Chimney might exceed his imagination and might reach tens of thousands of kilograms or even hundreds of thousands of kilograms.

Or there might even be other things besides the Spirit Awakening Fluid.

Otherwise, it couldn't explain why two Half-Mermaids with a group of Red Demons and Inferior Man-Fish could have so much Spirit Awakening Fluid!

However, no matter what, Han Fei was going to use the Spirit Awakening Fluid on himself this time.

First of all, because the number of mid-quality spiritual stones and high-quality spiritual stones was too small, after conversion, there were only about 7 million points of spiritual energy. And it was even less for the 2,100 catties of spiritual spring, amounting to only about 2 million points of spiritual energy.

Therefore, this time he actually only got less than 10 million points of spiritual energy, but he obtained quite a lot of Spirit Awakening Fluid, and Han Fei felt that he might be able to upgrade to a peak-level intermediate Hanging Fisher this time.

Han Fei looked at the Spirit Awakening Fluid in front of him, took a deep breath, and started swallowing it frantically.

He desperately needed to become stronger now. There couldn't be just a bunch of sea monsters here. The war had just ended. Maybe he just met a handful of sea monsters.

Perhaps he hadn't met the other sea monsters, but most of them should be in the nearby waters.

Even for that small bunch of sea monsters, he used the enhanced version of Poison God and caught them off guard, but he still lost nearly 30% of his combat power.

If the number of opponents doubled, or the number of Half-Mermaids increased, the result may be completely different.

"Gulp, gulp!"

The Spirit Awakening Fluid entered his throat and immediately disappeared without a trace as if it had turned into nothingness. He wondered if it dissipated in his limbs, or turned into some kind of power that existed in his body in another form.

When Han Fei swallowed more than 200 kilograms, the black light appeared again.

This time, Han Fei didn't take it seriously.

Every time this phenomenon appeared, it was fleeting and never affected him. Even the Demon Purification Pot didn't respond, indicating that it couldn't be a big problem.

His upper limit of spiritual energy was slowly increasing.

Han Fei felt that his body changed from the initial feeling of being bathed in a spring breeze, gradually to being numb, and his bones, flesh, blood, and meridians... All seemed to have a bright luster.

When Han Fei swallowed about 600 kilograms of Spirit Awakening Fluid, he broke through level-45. However, this wasn't a breakthrough in realm. Therefore, his body didn't have any change except that his upper limit of spiritual energy reached 12,000 points.

When Han Fei finished more than 2,100 kilograms, he broke through level-46, and his upper limit of spiritual energy reached 13,000.

When he drank more than 4,800 kilograms, he suddenly found out that: the effect of Spirit Awakening Fluid was slowing down rapidly. Because of the suppression of his realm, Spirit Awakening Fluid could not continue to improve his level temporarily.

Then he discovered that the touch of black matter seemed to be the bottleneck of his breakthrough. It was presenting his strength from continuing to increase.

“What is this?”

Han Fei frowned. This black dot was appearing too frequently. What on earth was in his body?

If it was something bad, why didn't the Demon Purification Pot show the slightest response?

Han Fei stopped drinking. Perhaps he needed to consolidate his base now?

He didn't know whether he could continue to make breakthroughs without limit if he kept swallowing Spirit Awakening Fluid. If he could, wouldn't it mean that whoever owned enough Spirit Awakening Fluid could get stronger and stronger, so strong that no one could beat him?

Besides, it was said that Spirit Awakening Fluid itself was actually used to tap into one's own potential.

Was it a wrong method to use the Spirit Awakening Fluid to crazily increase strength like this?

Han Fei hadn't confirmed it, so he wasn't sure.

He looked at his data.

<Owner> Han Fei

Level: 46 (Intermediate Hanging Fisher)

Spiritual Energy: 5,300,556 (13,999)

Spiritual Power: 1,801/1,801

Perception Range: 17,999 meters

Spiritual Heritage: Level-5, High-Quality

Spiritual Beast: Twin Yin-Yang Spirit Swallowing Fish [Level-38]

Main Art: Void Breaking Technique, Volume Four of Void Fishing (Demon-Level, Divine-Quality)

...

Han Fei's pupils constricted suddenly. Has his spiritual power's bottleneck been broken? Why didn't he even feel anything?

He was overjoyed and took out 20 level-two soul crystals, which Le Renkuang gave him.

It seemed to have taken Le Renkuang a lot of time to collect the 56 level-two soul crystals. Although it was still far from the 5 million points of credits Han Fei gave him, given that this thing's sales were restricted, it must have taken Le Renkuang a lot of effort to collect them.

After half an hour.

Han Fei opened his eyes slowly and frowned.

The effect of this spiritual power breakthrough wasn't so obvious. Perhaps it was because he drank too much Spirit Awakening Fluid.

Or maybe there was also a bottleneck in his perception range. Therefore, his spiritual power stopped at 1,852 points and no longer increased. At the same time, his perception range stopped at 19,999 meters.

However, Han Fei smiled. Even if he reached the bottleneck, so what?

His current perception range had reached 20 kilometers. With this range of perception, once he stood on the Skeleton Shore, he would be able to detect the whole shore.

As for the remaining 500 kilograms of Spirit Awakening Fluid, he planned to feed it to Little Black and Little White.

After they drank the remaining Spirit Awakening Fluid, Little White's body was exuding a holy brilliance. But this brilliance only lasted for a while before it disappeared, and Little White didn't even reach above level-39.

"It seems that the output of Spirit Awakening Fluid should be more than what I imagined. Without tens of thousands of kilograms, it seems a little unrealistic to build my strength with Spirit Awakening Fluid."

This was the case even for him who had special opportunities. How long would it take for others to earn points to buy enough Spirit Awakening Fluid?

After making sure that it had been nearly an hour, Han Fei appeared directly in the sea.

Then he spread his perception around.

Soon he found two Inferior Man-Fish within his perception range. They seemed to be patrolling or investigating.

"Sure enough, the corpses were discovered."

It had been discovered that he had killed those sea monsters. Although he had run more than 3,000 kilometers away, some Inferior Man-Fish still came to patrol.

Setting up a Stealth Array and a Breath Concealing Array, he summoned Little Black and Little White.

"Little Black, go kill them."

If it were Red Demons, Han Fei would definitely not order Little Black to kill them.

But since it was just Inferior Man-Fish, Han Fei felt like taking the chance to test the current strength of Little Black and Little White. Even if Little Black didn't kill them at once, he could make up for it.

Although this place would be discovered soon after killing the Inferior Man-Fish, he must do it.

In the water, Little White's tracking ability was unparalleled. But outside the ocean, her tracking ability would be greatly reduced.

After all, she was a fish. Out of the water, although she could still survive, her traceability was compromised.

Besides, unless she floated to an altitude of 1,000 meters or even higher, she couldn't avoid the perception of sea monsters.

Half-Mermaid's perception range was not small at all. But at an altitude of several kilometers, how could Little White still trace them?

The two Inferior Man-Fish were less than 10 kilometers away from them. Little Black pounced on the closer one, while Han Fei slowly moved between the two so that he could pursue it quickly.

The Inferior Man-Fish were not weak except for their relatively low-level demonic heritages, small perception ranges, and low intelligence.

The Inferior Man-Fish who was targeted by Little Black leaned forward and swam slowly in the water. From time to time, he scratched his arm and shoulder with his webbed claws.

Because of the incomplete evolution of the Inferior Man-Fish, there were pointed and long fins on their arms, so Little Black had to swim around to choose a suitable place to bite.

In the end, Little Black chose the neck. In his view, that place was the most vulnerable.

The Inferior Man-Fish seemed to feel that something was wrong and looked back, but saw nothing.

However, when he turned his head, he suddenly felt the water rippled in front of him. He had just wanted to shout when his neck was bitten through by a big mouth.

Even Han Fei was scared of Little Black's sharp teeth, not to mention that he had aimed at the most vulnerable point of the Inferior Man-Fish.

Han Fei couldn't help thinking, *Little Black is a born hunter, a hunter more terrifying than human hunters...*

If Little Black could reach level-49 or 50, he would become a real ocean killer. By then, even Half-Mermaids would be no match for him, let alone Inferior Man-Fish, and he might even be able to attack Hidden Fishers.

The other Inferior Man-Fish didn't notice his companion was killed at all. Han Fei sneered. It seemed that the Inferior Man-Fish's perception range was not large, definitely smaller than 5,000 meters.

That being the case, Han Fei didn't have to be so scrupulous. After Little Black killed the second Inferior Man-Fish, Han Fei didn't even bother to search for their Sea Swallowing Shells but just asked Little White to lead the way.

However, almost every thirty or fifty kilometers, he would meet an Inferior Man-Fish.

After killing more than 20 Inferior Man-Fish in a row, suddenly, a scream spread across hundreds of kilometers.

"Damn it!"

Han Fei was discovered. After swimming less than 800 kilometers, he was discovered.

Han Fei shouted, "Little White, go forward at full speed!"

### **Chapter 718: A True Warrior!**

This time, Han Fei didn't even bother to be invisible and immediately started to rush forward.

Although Little White was not as fast as Little Gold, she could actually catch up with Han Fei.

Han Fei rushed shoulder to shoulder with Little Black and Little White, leaving three lines of water streams behind them.

Because their speed was too fast, trails thousands of meters long were left in the water.

Han Fei no longer hid his trace, so his position was immediately discovered.

So, the first to appear were dozens of Inferior Man-Fish. Then, more and more Inferior Man-Fish appeared, and some of them appeared directly in front of Han Fei.

"You want to force me to kill? Fine!"

Every time Han Fei who was still rushing forward waved the Blood-Drinking Knife in his hand, knife light flickered and, carrying seawater, slashed at one Inferior Man-Fish.

The knife light was accompanied with extremely powerful Invincible Fighting Intent and killed an Inferior Man-Fish in the blink of an eye.

However, at this time, Han Fei's heart did a flip.

Did the Invincible Fighting Intent weaken?

No, he became stronger.

Old Bai used to tell him that the Invincible Fighting Intent he comprehended didn't belong to the category of knife intent, but more of a human will. As his strength grew stronger, this invincible will would not be able to keep up with his pace of strength improvement.

At that time, Han Fei didn't take it seriously, thinking: being temporarily invincible was good too!

But now, when he launched an attack, he found that the Invincible Fighting Intent had not been strengthened with the improvement of his realm.

This showed that the power of his Invincible Fighting Intent temporarily stopped increasing.

Although the Inferior Man-Fish still couldn't resist him, it was a fact that he made no progress. Han Fei finally admitted this fact after killing more than 20 Inferior Man-Fish.

Han Fei could perceive that now he seemed unable to break out of the encirclement. In all directions, including right in front of him, Inferior Man-Fish were ceaselessly pouncing towards him.

Han Fei suddenly stopped, flipped the Blood-Drinking Knife into his body, and put away Little Black Little White.

Han Fei stood proudly in the dark sea and his fists gradually glowed with gold.

At this moment, Han Fei felt his blood was boiling, and countless images faintly appeared in his mind. Those were exactly the images in his mind when he was practicing the Art of Invincibility. At this moment, when he discovered that his Invincible Fighting Intent had weakened, they appeared again.

As soon as these images flashed, Han Fei felt agitated. It seemed that a beast was awakening.

“Even if the Invincible Fighting Intent won’t progress further, nothing can stop me.”

Han Fei knew that within a radius of thousands of kilometers or even tens of thousands of kilometers, layers of traps must have been laid down. The sea monsters were determined to catch him at all costs.

“Humph!”

“Hoooooo!”

Han Fei put on the semi-divine battle suit. When the first Inferior Man-Fish came, a bright golden light blasted out, and a powerful and invincible will gathered on the fist mark.

*Boom!*

The Inferior Man-Fish, like a cannonball, left a white mark in the sea and directly shot into the seabed a kilometer away.

*BANG!*

The bottom of the sea was shaking, dust was rolling, and rocks were cracking.

Immediately, from a long distance, spiritual-energy spears shot through the air. Balls of spiritual energy, like water pressure cannons, shot towards Han Fei, and harpoons in the sea reflected glaring cold gleams.

*BAM, BAM, BAM...*

Han Fei activated the Art of Invincibility. With his body as the center, gleams overflowing from the golden fist mark scattered in all directions.

In the dark sea, cold gleams, water pressure cannons, golden fist marks, barrier-breaking water marks, impact ripples... Fighting effects emerged endlessly and ripples were layered.

None of the Inferior Man-Fish who were almost at the same level as Han Fei or even slightly higher leveled than him could survive his punches.

The broken bodies of the Inferior Man-Fish were constantly thrown onto the seabed. The roar sounded tens of kilometers across the bottom of the sea.

The Inferior Man-Fish was roaring sharply, rushing up fiercely. In the distance, Red Demons and Half-Mermaids were coming quickly.

When the first Red Demon appeared on the battlefield, the place where Han Fei was, within a radius of 3,000 meters, was almost covered with Inferior Man-Fish. Their bodies were all broken and they were all

vomiting blood. Some had their internal organs broken, some had their heads bleeding, and some were even directly blasted to death.

This was the third time Han Fei drank Candle Dragon Blood. Every time, at least 100 Inferior Man-Fish were buried to the bottom of the sea forever.

The deafening noises and horrible impacts of the battle had even attracted the attention of some human masters.

They were still thousands of kilometers away. Some of them had noticed the abnormal movement of the Inferior Man-Fish, and some people perceive a battle taking place from the weak vibration frequency of the sea.

Anyway, no matter how it was discovered, there were already five or six people who started to rush in the direction where Han Fei was.

After a while, some of them met in the sky.

“Brother, where is the battle?”

“I don’t know! Were you attracted here too?”

Someone appeared in the sky. “Who the hell is so powerful as to fight in the sea?”

Someone stood on the bow of the ship, holding a bow and shooting an arrow several kilometers into the sea, and said, “Someone is fighting. Let’s go help him.”

When these people rushed to the location of the battle, they were all astonished.

“Only an intermediate Hanging Fisher?”

On the seabed.

Han Fei fought four Red Demons alone, yes, four.

At this moment, Han Fei had activated the Majestic Mystic Spell, and his body was glowing with golden light and twisted and turned deftly under the four Red Demons’ attacks. The golden fist marks kept bombarding the opponent, making muffled thunder-like noises.

With each hit, water waves dozens of meters high gushed out.

Perceiving the arrival of human beings, Han Fei directly spread his voice out, “My friends, can you help me kill some Inferior Man-Fish?”

These people were all shocked. They had already perceived that there were no less than 300 Inferior Man-Fish that had died under the sea. And this guy who killed them was only an intermediate Hanging Fisher?

At this time, someone came from the sky. Seeing this scene, he frowned.

The incoming person directly transmitted his voice to Han Fei, *Han Fei, before the Half-Mermaids arrive, come back to the Scattered Stars Island with us.*

Han Fei smashed the Golden Seal in his hand at a Red Demon's forehead, directly knocking him out. Then his backhand threw a golden fist mark out, blasting a crab into the distance.

Han Fei's eyes were cold. "Are you here to catch me too?"

Some people were hunting at sea. At this time, a six-star killer had taken action. He had jumped into the sea, attracting dozens of Inferior Man-Fish attacks.

Someone was asking others, "This guy is called Han Fei, an excellent Heavenly Talent. Why do you want to catch him? What did he commit?"

The person who was asked had fused with his spiritual beast, jumped into the water, and came into combat with the sea monsters.

While fighting, he answered, "Han Fei broke into the Dark Hunter Legion and went to sea to find someone without authorization."

Someone gaped in surprise and asked, "An intermediate Hanging Fisher broke into the Dark Hunter Legion? Are you kidding me?"

Someone said, "He did that with the Door-Carrying Marshal. Now, do you still think he can't make it?"

The other people were all speechless. What is the identity of this guy? How could he do that?

Someone shouted, "It's not the time to talk about it. Hey... Han Fei, why are you still fighting down there? Before the strong enemy arrives, run!"

Han Fei responded, "I'm working on my combat skills. Just a moment."

Han Fei was working on his combat skills indeed. He hadn't practiced the Art of Invincibility well enough. Since he practiced it on the Steps into the Sea, he had made no progress in the art.

At this moment, Han Fei ignored an attack from behind and punched out with a boom, blasting a Red Demon directly in front of him. The terrifying power suddenly exploded and crushed the Red Demon's body.

This scene shocked everyone. God, this intermediate Hanging Fisher was even more powerful than a peak-level Hanging Fisher!

Plus the two people who came to catch Han Fei, a total of eight human experts came.

Among the eight people, only one was of five-star rank, and the others were all of the six-star rank. Except for Killers, no one else could move freely at sea. This was the title above the "Hundred People Slash" and the title itself represented strength.

Even if the people of the five-star rank were only one step from entering the six-star rank.

The eight people were almost equivalent to eight peak-level Hanging Fishers. For a time, the Inferior Man-Fish had no power to fight back at all.

However, Han Fei perceived that a Half-Mermaid had already appeared who was sprinting towards him.

"Hoooooo!"

Han Fei grabbed a harpoon with one hand and punched out with the other, and the fist mark directly blew up a Red Demon's head. With a casual wave, he retracted the Golden Seal, and a large seal phantom smashed on the other Red Demon's chest.

*Boom!*

Gritting his teeth, Han Fei glanced at the eight people, especially the two who came to catch him, and decided to continue fighting.

Of the four Red Demons, only one survived. Han Fei threw out dozens of punches in a row which bombarded them like a madman. The energy in his body poured out and directly blasted seven or eight holes in the body of the Associated Spirit of the Red Demon.

*Boom...*

As the last golden fist mark was thrown out, a strange power seemed to be fused with the fist mark.

*Swish!*

The fist mark blasted through the seawater, and in the next second, the Red Demon exploded directly.

Han Fei looked down at his fist. Now he seemed to feel something.

Someone was so excited at the fighting scene that he couldn't help exclaiming, "A true warrior!"

### **Chapter 719: Flying Skateboard?**

Han Fei grabbed a ball of Candle Dragon Blood again and stuffed it into his mouth. This was the fifth time he had drank Candle Dragon Blood.

He finally knew why the Unknown Place was dangerous.

Could it not be dangerous? The outer sea area was almost like the backyard for the sea monsters, and the Inferior Man-Fish were almost endless.

When someone perceived the Half-Mermaids, he immediately transmitted his voice to Han Fei, *Kid, are you crazy? Are you practicing combat skills here? Do you know that if you don't leave now, you won't be able to leave when more Half-Mermaids come?*

Han Fei thought quickly and found he miscalculated the number of sea monsters, and someone had already arrived at this moment. If he continued to practice the Art of Invincibility, the art's astonishing power might cause doubt.

So he immediately rushed straight to the sea surface like a torpedo!

Han Fei yelled out, "Thank you for your help... But I will not return to the Scattered Stars Island."

The two six-star powerhouses flew directly to Han Fei. "Han Fei, it's not your business to find Xia Xiaochan."

Han Fei sneered. "If you're reliable, you won't let Xia Xiaochan run away. It's not that I look down on you, but except me, no one can find her."

A man said, "The waist tag has a positioning function."

Han Fei asked, "Then can you find my position now?"

The man was speechless at his question. No, they couldn't position Han Fei at all.

In fact, they weren't fools. Even if Xia Xiaochan dumped her waist tag, how could they lock onto her position?

The other people who came to help hesitated. "Damn, shall we intervene or not?"

The other man who came to catch Han Fei said, "Everyone, please take action and help us catch Han Fei. Don't worry. He didn't commit a serious crime. He was just too worried about his girlfriend to keep sober."

Han Fei said angrily, "I'm sober. Don't force me to fight you."

Everyone was speechless. There are eight of us. Do you think we're afraid of a fight against you?

*BAM! BAM! BAM!*

While they were confronting in the air, three Half-Mermaids jumped out of the water. In the distance, there were another two Half-Mermaids jumping out of the water.

Coming with them were five or six Red Demons, and hundreds of Inferior Man-Fish.

Everyone turned pale and the six Killers were not going to intervene in this matter.

On one hand, they had witnessed how strong Han Fei was.

This kind of Heavenly Talent must have an extraordinary background, and offending him would do no good to them.

Besides, this guy even dared to confront the law enforcement team. With such a fierce temperament, he was definitely not a pushover. If they came to attack him, what if he took revenge on them in the future?

Immediately, someone shouted, "Let's go. It'll be too late when they form an encirclement."

These people controlled their fishing boats, flew into the sky, and sped up to leave.

Seeing this scene, the two members of the law enforcement team cursed secretly.

However, it was not a good time to capture Han Fei. The two of them also immediately manipulated the fishing boat, preparing to escape first.

However, when those people's fishing boats flew into the sky, the Half-Mermaids and the Red Demons on the sea suddenly flew up too.

This scene stunned Han Fei.

"F\*ck! Can they fly?"

Yes, Han Fei saw that under these Half-Mermaids and Red Demons' feet, there seemed to be a water-shaped skateboard, which looked exactly like a surfboard.

They actually used these boards like skateboards as they flew up.

Of course, those Inferior Man-Fish didn't have this ability. They could only run on the surface of the sea, condensing spiritual energy spears in their hands, and flinging them at Han Fei.

The people of the law enforcement team shouted, "Han Fei, escape the sea monsters' hunting first. You don't know anything! How can you set foot in the outer waters now?"

With that, the two of them rushed away.

However, there were also Half-Mermaids chasing while they were escaping, but Han Fei didn't pay attention.

Five Half-Mermaids were flying on their skateboards and were rushing towards him. Among them, some had performed the "Sea King's Secret Technique."

Han Fei spat. How can surfing be compared with my Wind God Boat?

The next moment, the Wind God Boat changed into a red ray and disappeared into the sky.

*BAM!*

Like a thunderbolt, a conical cloud wrapped around the Wind God Boat, breaking through the sound barrier in the blink of an eye, flashing across the sky like a meteor.

The Half-Mermaids watched this group of people fly away and roared angrily.

Only at this moment did Han Fei understand why Hanging Fishers were called "Hanging" Fishers. When they flew into the sky, sea monsters couldn't do anything to them.

The Half-Mermaids were very powerful in the sea, but they couldn't fly before reaching certain levels.

Although they could use some methods, for example, the skateboard, they still couldn't fly. Although the speed of the skateboard was fast, it was no match for human beings' fishing boats.

This was why the Hanging Fishers dared to patrol in the sky.

However, there were also set backs. Hanging Fishers must resort to fishing boats if they want to go to the outer area of the Unknown Place.

If their fishing boats were destroyed, they would only end up being besieged and killed by fish tides and sea monsters if they didn't have an extraordinary ability to hide.

...

In fact, Han Fei only flew thousands of kilometers away before jumping into the water again.

"Girl, can you still perceive your mommy's position?"

Because the searching was interrupted, after the trace disappeared, it took Little White a full half an hour to reorient herself.

Han Fei walked out of the array and looked around, guessing.

If Xia Xiaochan ran into the deep sea by herself, it would be almost impossible for her to break through the sea monsters' territory.

Therefore, Han Fei still believed that Xia Xiaochan must be in the door of the Hexagon Starfish at this moment.

It was a pity that he didn't fight to his heart's content just now. He failed to fully arouse and stimulate the fighting spirit of the Art of Invincibility.

After the fighting spirit was gone, it wouldn't be re-stimulated in a short period of time.

Han Fei simply set up a stealth array for both himself and Little White and then began to swim on the bottom of the sea very slowly.

Even when he encountered Inferior Man-Fish, he didn't kill them.

He had tried it once, and it proved that under siege, it was almost impossible for him to break through the encirclement.

In this case, he could only take them by strategy.

Han Fei couldn't help sighing. If only he could become a fish. Then he wouldn't need to be so cautious about being discovered by the sea monsters.

However, Han Fei immediately gave up this thought. If he became a fish, didn't it mean that he had become a sea monster?

He would rather be a human being. Being a sea monster meant that he would become an enemy to all mankind.

He moved extremely slowly, and it took a full eight hours before he completely walked out of the sea monsters' encirclement.

Several times during the period, Han Fei entered Forge the Universe to avoid discovery.

This made Han Fei sigh... He was still not strong enough! If only he could get another 10,000 kilograms of Spirit Awakening Fluid. If only he could get a few hundred million points of spiritual energy.

...

Two days later.

"Gulp!"

Han Fei swallowed a spiritual fruit in two mouthfuls. In the past two days, spiritual fruits hardly left his hand. For one thing, he needed to heal his injuries, and for another, he wanted to reserve spiritual energy. He wouldn't directly use spiritual fruit until he had to, because it was too wasteful.

He also occasionally fed Little White!

After all, unlike him, Little White had to deal with the spiritual energy conflicts caused by different spiritual fruits. Only by solving it could the spiritual energy could really become hers.

Besides, in the past two days, Han Fei encountered powerful exotic creatures more than once and tried to catch them twice.

On one occasion, he was noticed by the creature, which then ran away.

On the other, he had just started catching the creature when the Inferior Man-Fish were attracted over, and in the end, he could only slip away.

Now, Han Fei saw a big crab with a green jade-like body running past him, but he couldn't move.

That was because he was using this big crab to avoid the Half-Mermaids above his head.

"F\*ck, they have been chasing me for two days. Why haven't they given up? These sea monsters are too stubborn! I did nothing but kill some of your kind!"

Han Fei slowly breathed a sigh of relief when the Half-Mermaids above his head swam away, and let Xiaobai continue to lead the way.

After swimming for more than 300 kilometers, however, Little White stopped.

Han Fei took a closer look and found that he actually ran to a place full of Sea Vine Grass. The place was covered by seaweed. Han Fei perceived that there was a green octopus hidden in the seaweed 800 meters away.

He saw colorful sea urchins lying on the seaweed, and some stones, which were actually crabs in camouflage.

Han Fei found something different about this place. The flowing of spiritual energy here was strange.

"Has the amount of spiritual energy contained in the Sea Vine Grass decreased?"

"No, there is a lot of spiritual energy here. Why doesn't the Sea Vine Grass absorb it?"

"Huh! A defense array?"

"No, it's a maze."

Although Han Fei was still not very proficient in arrays, he was way better than before. He was sure that someone was hiding here, draining the spiritual energy of the Sea Vine Grass to set up a maze.

Han Fei smiled. "Nice, I finally got you..."

### **Chapter 720: Turned into a Crab and Ran Away**

Han Fei didn't destroy the maze. He activated the Eyes of True Vision and finally found an extremely inconspicuous array eye according to the way the spiritual energy flowed.

When Han Fei went into the eye of the array, the array itself didn't respond.

Han Fei grinned. The Hexagon Starfish was good at setting up arrays indeed.

Normal people would probably think this array was abandoned a long time ago when they got no response after finding the array eye.

But since Little White came here, Han Fei knew that the Hexagon Starfish must be under the array.

It took Han Fei a full half an hour to discover that it was a multi-layered array. The outer maze was just a disguise, and the real array was actually located in the Sea Vine Grass.

When Han Fei chopped up a piece of Sea Vine Grass, another array eye was exposed.

*Whoosh!*

Han Fei appeared directly in a secret realm from the Sea Vine Grass.

What surprised Han Fei was that this secret realm was filled with spiritual energy, and even had spiritual springs, and there were many purple spars protruding from the ground as if he had walked into a prehistoric underground cave.

“Master Hexagon, here I am.”

Han Fei perceived around and found a piece of sand shaking in this small secret realm that was less than 3,000 meters in radius, and a tentacle emerged from the ground.

The tension in Han Fei’s heart immediately slackened. As expected, the Hexagon Starfish was here. Luckily, he was safe.

The Hexagon Starfish crawled out of the sand and shouted directly at Han Fei, “Starfish plans to spend the rest of his life here, and Starfish is not going out again.”

Han Fei was speechless. “Are you out of your mind? If this array is broken by others, then you’ll be like a rat in a hole and will only end up being caught. Where is Xia Xiaochan? Come on, let her come out. Is she ok?”

Han Fei glanced at the Hexagon Starfish and suddenly said, “Huh! You broke through, and broke through three levels in a row?”

Before Han Fei asked in detail, the Hexagon Starfish froze, and then with a swish, tried to run to the entrance of the cave.

But Han Fei had already pinched a stone in his hand. “You don’t want your essence blood?”

But the smile on Han Fei’s face was gone. *Why is the Hexagon Starfish running?*

Then he heard the Hexagon Starfish sob. “It wasn’t Starfish who lost her, but she dumped Starfish! It has nothing to do with Starfish!”

Han Fei scowled. “Come here. Tell me where Xia Xiaochan is! Why are you not together?”

The Hexagon Starfish floated in the water feebly. “She turned into a crab and ran away.”

“What?”

Han Fei was dumbfounded. “Turned into a crab?”

“Yes, she turned into a big crab and ran away.”

“Xia Xiaochan turned into a big crab?”

Seeing the Hexagon Starfish nod, Han Fei frowned. Xia Xiaochan must have used Metamorphosis Water to turn into a crab.

Han Fei walked over and dragged the Hexagon Starfish over, saying, “Hey tell me what happened in the Undersea Chimney!”

The Hexagon Starfish didn’t know how he got here... All he remembered was that he was freaked out and ran wildly for his life.

The Hexagon Starfish said, “They just fought! They ran out to fight every day. This time, they went to snatch the Spirit Awakening Fluid, and... Then they started fighting each other.”

Han Fei was stunned. “Wait, what do you mean by ‘fighting each other’? Who fought whom?”

“Xia Xiaochan first fought fish, then mermaids, and then people. And then, Xia Xiaochan went mad and fought everyone she saw... Fortunately, she didn’t fight Starfish. Otherwise, I would already be a dead starfish.”

Han Fei’s face was black. “Fighting fish or mermaids is normal! But why did she suddenly fight people?”

The Hexagon Starfish’s big eyes rolled around. “There was a woman who seemed to have sprinkled something on Xia Xiaochan, and then she went crazy.”

Han Fei’s heart did a flip. “Make it clear, which woman? What did she sprinkle on Xia Xiaochan?”

Han Fei had a bad hunch. *So Xia Xiaochan went mad not because of Spirit Awakening Fluid, but because of a man-made cause?*

The first person Han Fei suspected was the woman named Shui Ran. She was Xia Xiaochan’s captain and one of the team leaders this time. She was most likely to frame Xia Xiaochan!

The Hexagon Starfish rolled his eyes and said, “Those women all look the same, Starfish couldn’t tell who was who.”

Han Fei said with a cold face, “I’ll give you another chance to organize your language. Which woman was it?”

The Hexagon Starfish was anxious. “Starfish doesn’t know! Starfish only knows that woman, she, she, she... She had a finger chopped off by Xia Xiaochan.”

“What?”

Suddenly, a wave of water shook up around Han Fei.

“Yang Ying?”

Han Fei suddenly remembered when he broke into the Dark Hunting Legion a few days ago, besides the captain Shui Ran, there were only Gong Wenhai and Yang Ying left in Xia Xiaochan’s team.

At that time, Yang Ying also showed him her hand, accusing Xia Xiaochan of chopping off her little finger.

At first, Han Fei thought that only Gong Wenhai slandered Xia Xiaochan because he was so mad about Xia Xiaochan's rejection of him.

But now it seemed that it wasn't the case. Yang Ying also framed Xia Xiaochan. However, weren't they all from the Dark Hunter Legion? Why did she frame Xia Xiaochan?

Han Fei immediately asked, "Then do you know why the woman did it?"

The Hexagon Starfish rolled her eyes. "I don't know. Starfish doesn't know."

Han Fei had been staring at the Hexagon Starfish. Having been with the Hexagon Starfish for so long, he knew once the starfish used his brain, his eyes would roll around. At this moment, his big eyes were turning faster than a top. Therefore, he simply squeezed his essence blood. "Master Hexagon, a lying starfish is not a good starfish."

The Hexagon Starfish almost cried. "Well, well... Maybe Xia Xiaochan got more Spirit Awakening Fluid than her, which Starfish helped her get."

Han Fei frowned. The Hexagon Starfish had upgraded by three levels in a row, which was strange indeed! Little Black and Little White were also mysterious creatures, but they hadn't reached level-40 yet although they had drunk so much Spirit Awakening Fluid.

But the Hexagon Starfish suddenly changed from level-43 to level-46! This speed was faster than riding a rocket.

Whether it was Little Gold, Nine Tails, or Little Fatty, after level-38, a few hundred kilograms of Spirit Awakening Fluid wouldn't be enough to make them level up.

The Hexagon Starfish was level-43 before, so how much Spirit Awakening Fluid did this b\*stard have to swallow before reaching level-46?

Han Fei said coldly, "You mean, that woman was jealous that Xia Xiaochan had gotten so much Spirit Awakening Fluid, so she framed her?"

The Hexagon Starfish yelled, "I don't know! She did it anyway."

A cold gleam flashed in Han Fei's eyes. At first, he thought only Gong Wenhai framed Xia Xiaochan and planned to kill him once he met him at sea.

But now, Yang Ying was also on his death list, right at the top.

However, Han Fei didn't have the time to solve Yang Ying now. The woman only had two choices now. One was to pray that he could not find Xia Xiaochan or die outside, and the other was to quickly find a way to slip away while he was not on the Scattered Star Island.

At this moment, Han Fei's top priority was to continue looking for Xia Xiaochan. Since the Hexagon Starfish said that Xia Xiaochan turned into a crab and ran away, it meant that Xia Xiaochan had come to herself.

Han Fei asked, "How did you get here? Xia Xiaochan turned into a crab and brought you here? When did Xia Xiaochan sober up?"

This time, the Hexagon Starfish replied very quickly. He said, "She was crazy only for a moment, and after fighting a lot of fights, she passed out. Then I put her into one of my gates. Then, we were chased by a group of sea monsters for a long time. That's why I'm here."

Han Fei said, "So you brought her here? Then when did she turn into a crab and run away?"

"As soon as she woke up, she became a crab. She stayed here for a day in the shape of a crab, and then she said she wanted to go out to have a look... Starfish certainly didn't want to go out! Then... Then, she didn't come back."

"Wait, wait a minute... You said Xia Xiaochan became a crab after she woke up? It's so safe here. Why did she become a crab?"

The Hexagon Starfish's big eyes rolled around. "I don't know!"

Han Fei really wanted to slap the stupid Hexagon Starfish. *What the hell do you know? All you know is to drink Spirit Awakening Fluid! Except for that, you know nothing.*

Han Fei stared at the Hexagon Starfish. "Hand over the Spirit Awakening Fluid."

The Hexagon Starfish's eyes paused and immediately rolled again. "Starfish has drunk it all, without a single drop left."

Han Fei sneered. "OK, open your door and let me go in and take a look."

The Hexagon Starfish was certainly unwilling to do this. Han Fei grabbed him with a hand. "Do you want to become a pentagon starfish? Hey, the Spirit Awakening Fluid belonged to Xia Xiaochan, and you just temporarily kept it. However, you secretly drank tens of thousands of kilograms, and still you want to pocket it all?"

"Starfish didn't drink tens of thousands of kilograms..."

Han Fei scoffed. "If not, how could you leap three levels in a row?"

The Hexagon Starfish's big eyes kept rolling. "Starfish only drank about ten thousand kilograms..."

"F\*ck!"

Han Fei just wanted to pat this guy to death. *Damn it, "only" drank about ten thousand catties? Isn't that enough for you?*

Han Fei said with a cold face, "I'll count to three. Are you taking what's left out or not?"
