

GOF 871

Chapter 871: Rampant Bigshots

“Hahaha!”

Han Fei giggled like a fool. This technique was even handier than the Nine Mansions Dragon Seal. If the enemy was hit by this without being prepared, they would definitely be caught in an awkward position...

However, there was still a long way to go before he could completely grasp the technique. After he completely grasped it, he had no doubt that he could impose a pressure of millions of kilograms with the Law of Gravity.

Seven days passed.

Han Fei’s perception of the Law of Gravity reached ninety percent.

“Just as I expected, the further I go, the more difficult it becomes! I’ve been stuck at the last ten percent for a whole day!”

“Meow!”

“Han Fei, Han Fei, are you at home?”

Han Fei thought that it was time to meet up with everybody. Since he couldn’t completely understand the incomplete Law of Gravity for now, he might as well take a break.

He waved his hands and dispersed the clouds, only to see Big Yellow and Qing Chen on the wall.

Big Yellow asked, “Are you making breakfast?”

Qing Chen nodded quickly and added, “Are you?”

Han Fei took a breath and said, “Yes, come in!”

“Meow.”

After Qing Chen jumped into the yard, he found that the stone floor in Han Fei’s yard had been reduced to sand, with giant pits here and there.

He asked in surprise, “Huh, Han Fei, is it better to pave your yard with sand than with stone?”

Big Yellow gracefully paced on the sand and raised its paws now and then. “I don’t care for sand. It always sticks to my fur...”

Han Fei winced. *Have you forgotten your level? Are you really scared of sand?*

Taking out a giant pot and some seafood, Han Fei smiled and said, “Nothing. Just a change of taste. I’ve been training in seclusion.”

Qing Chen asked in surprise, “Have you got anything?”

Han Fei asked, pretending to be deep in thought, "What do you think of the gravity changes in the world? How can you change ten-times the gravity to a hundred-times the gravity? How can you perceive the changes?"

Qing Chen looked at Han Fei as if he were a fool. "Gravity? Why bother considering gravity when you can climb the Empyrean Waterfall?"

"Huh?"

Han Fei was surprised. "Does climbing the Empyrean Waterfall have anything to do with gravity?"

Qing Chen smiled. "Yes. You can sense the surging tides of gravity! The waterfall may seem regular, but you'll have different feelings if you use different speeds, paces and postures."

"Meow. I want to eat a big fish. Can you talk after we have breakfast?"

Han Fei was quite enlightened by what Qing Chen said. So, all he needed to do was to climb the Empyrean Waterfall?

Han Fei quickly moved his knife and made a hotpot.

Qing Chen and Big Yellow were about to dig in, when Han Fei said, "You have the food first. I'll go climb the Empyrean Waterfall."

Qing Chen shouted, "Don't be so hasty! You can climb it after breakfast."

Han Fei said without looking back, "I'm too hot-headed to wait!"

...

A moment later, Han Fei stood next to the lake. Before he started climbing, a voice had echoed in his head, *Do you have anything to barter with me?*

Han Fei thought for a moment. *Senior, I've run out of demonic stones. I'll see what I can do later!*

Hearing that Han Fei had nothing to offer, the big turtle fell into silence without bothering to give a reply.

Han Fei wasn't bothered. He did have a Phoenix Spirit Ginseng, but he couldn't possibly make exchanges with the old turtle in the early morning. He had to wait until the night!

With a thought, Han Fei unfolded his wings and rushed to the waterfall.

After a splat, Han Fei was smashed to the bottom of the lake.

He was quite embarrassed, wondering if anybody saw that. The momentum of the waterfall had to do with the altitude, water current, and water density of the waterfall. It was only natural that he was smashed into the lake when he bumped into it without being prepared or supported.

But that was only the first attempt. Han Fei, holding on to the rocks, quickly climbed against the waterfall.

In the process, Han Fei sensed that his body was blasted by an incessant power.

The power... I can simulate gravity. If I can manipulate gravity with the Law of Gravity, it can't all be the same...

No, there must be a way...

Han Fei felt heavy and lightheaded now and then. After all, the water currents weren't the same. The waterfall allowed Han Fei to perceive the changes in the power.

The tiny changes made it hard for him to adapt to the waterfall, as he couldn't predict the force that he would take...

This is how it works! I should be able to perceive 95% of the Law of Gravity!

Han Fei put on a smile, as Qing Chen turned out to be quite knowledgeable. The guy's suggestion was worth a day's hard thinking.

However, something seems to be missing. The imbalance of power should be mainly to prevent the enemy from getting adapted quickly. It'll be great if I can stay immune from the law! Is it possible for me to do that right now, or do I still need something?

Han Fei climbed all the way up to the top of the waterfall a moment later.

He had never paid much attention to the waterfall before, but at this moment, he grew curious about the source of the water.

After he reached the top of the waterfall, he found that there was an enormous cave up ahead, from which a torrent was gushing out.

Han Fei couldn't help but wonder where the cave led to.

Isn't it magnificent? The power of water is actually beyond our imagination. The torrent is not a huge tide or a river. You can't possibly cut it apart.

Qing Chen had finished his food at some point and came to the top too. He punched the fierce currents, forcing them to retreat. Of course, he was faced with even fiercer currents a moment later.

Qing Chen said, "The power of nature is horrifying. The most horrifying of all is the unpredictable changes. You can train your body twice as fast in this place. Why don't you give it a go?"

"Unpredictable changes?"

Han Fei was stiffened for a moment. Then, he suddenly grinned. "Thanks, Brother."

Qing Chen: "???"

Han Fei rushed to the cliff and leaped off from the sky.

Before Han Fei fell to the ground, Big Yellow had shouted, "Don't fall! Don't fall! You're scaring off all the fish!"

Han Fei: "..."

"Hula!"

The Phantom Glass Wings unfolded and raised two waves of wind, carrying Han Fei to his home in an elegant curve.

A moment later, his home was shrouded in clouds. All sounds were blocked too.

Han Fei grinned. "The most unpredictable change is when you don't even know how the gravity will change. In such a way, there's no way that your enemy can take precautions."

Han Fei turned his hand upside down, and the earth trembled under the terrifying force.

Han Fei closed his eyes and saw that he had perceived a hundred percent of the incomplete Law of Gravity. He instantly put on a smile, satisfied with the power of the law.

Han Fei cast the Law of Gravity on himself and instantly blushed. He staggered and couldn't control his body at all when he was pressed by tons of force.

Han Fei hurriedly restored the gravity. He sensed the force carefully and found that it was between two million to three million kilograms.

It was more or less the same power as what he had at this moment.

"As I expected, even I cannot resist the power of the earthquake, because it's irresistible."

"Overlord's Technique."

Boom...

All of a sudden, Han Fei's gate collapsed.

With a crash, the barriers that Han Fei set up were broken. He was so scared that he hurriedly canceled the Law of Gravity.

He heard all kinds of criticisms.

"Han Fei, see what you've done?"

"Han Fei, are you tearing the houses down?"

"Han Fei, stop right now! You'll collapse my house!"

"Meow! My fish are running off!"

Han Fei heard dozens of voices at the same time.

A thick vine extended from the void, with a few bright and beautiful flowers on it.

It was You Ye who had burst into an outrage. The girl was whipping him with a thick vine despite her usual gentleness.

Han Fei dashed to an altitude of a hundred meters.

Then, he saw the crack right in front of his house. He couldn't help but smack his lips.

He quickly roared, "Sorry, sorry... It was just a mistake I made during my training!"

Next door, Mrs. Yin said unhurriedly, "You'll repair the road. Next time you want to do anything dangerous, find an empty place first."

Nangong Xuan, who had been training in seclusion, cursed, "All the young people are troublemakers nowadays. If things go like this, the Empyrean Waterfall may collapse someday."

Han Fei dared not talk, as the thick vine was still chasing him! You Ye said angrily, "I lost half of my garden. You think you can escape?"

BAM!

Han Fei's little house was razed to the ground by the vine, which almost made Han Fei's blood freeze.

"Hey! Don't get so excited! You should be a graceful beautiful girl."

You Ye bellowed, "What do you think graceful means?"

Ten vines were summoned at the same time.

Seeing how angry she was, Han Fei took out his boat and flew away.

It was because he saw that an enormous cat was pouncing at him.

...

A moment later...

In the sky, Han Fei patted his chest and said in fright, "Those people are too violent. I can't stay in the Empyrean Waterfall anymore. Maybe I should stay at Zhang Xuanyu's place for a day or two."

Chapter 872: Return to the Scattered Stars Seven Units

Han Fei had intended to practice the Cosmic Sword Technique, but since even You Ye, who always had the best temper, was so infuriated that she wanted to kill him, it was impossible for him to stay at the Empyrean Waterfall anymore.

Han Fei searched for a moment and didn't find Zhang Xuanyu. It was said that he had set sail.

Han Fei didn't look for Le Renkuang either, who must be in the middle of a breakthrough.

As for Xiaobai, remembering how solemn and grave she always looked, Han Fei decided that he would rather pass.

Thinking for a long time, he didn't know where to go.

He thought that his strength had increased a lot. Although the Cosmic Sword hadn't acknowledged him yet, there was still a lot that he could do.

However, he had to polish it with real battles. Should he go to the Scattered Stars First Unit and see if there were any missions?

Han Fei believed that it was a great idea. The Scattered Stars First Unit was often responsible for the exploration of treasure troves. He'd be in for a treat if he found some relics.

Making a decision, Han Fei quickly turned the boat and flew to the Scattered Stars Seven Units.

A moment later...

Before Han Fei landed, he saw that Bei Huo was flying close with Guan Qingyan and Mu Jia'er.

Upon seeing Han Fei, Mu Jia'er waved her hand and shouted, "Liar, here, here..."

Han Fei: "..."

Inside the yard, Bei Huo looked at Han Fei with a weird expression and said thoughtfully, "Han Fei, you've been absent for a long time. Considering your rank, you owe us 1,082 refined ultra-quality spiritual weapons. Now that you're here, come with me!"

Han Fei instantly perspired. "No, wait a moment! I'm going to the Scattered Stars First Unit for missions."

Bei Huo chuckled. "That's fine. I'll talk to Liang Tian and let him spare your duty. The Fourth Unit has been swamped lately. We have to refine Divine weapons and a lot of ultra-quality spiritual weapons. Since you're fast, you should help."

Han Fei couldn't feel more beaten down. *Why should I help? I'm here for missions!*

He suddenly had an idea. "Well, Senior Bei Huo, there's something else I need to do. I..."

Pa!

Bei Huo laid his hand on Han Fei's shoulder. "Let's go! You think you can get away? You haven't been here since you came back. Do you feel you deserve your waist tag if you don't carry out your duty?"

Mu Jia'er secretly laughed and grimaced at Han Fei.

Guan Qingyan said casually, "Brother Han, we made a major breakthrough in the craft of Divine weapons. Based on Mu Jia'er's idea, we are able to manufacture some Divine weapons with the help of some array masters on the Scattered Stars Island."

Han Fei's face was grim. *Does this have anything to do with me?*

Han Fei didn't even have the time to enter the Scattered Stars First Unit before Bei Huo dragged him into the Fourth Unit. He pulled a long face.

If he had seen this coming, he wouldn't have come at all.

When he came to the Fourth Unit, he found that all the refining rooms were glowing and emitting heat. Everybody seemed busy.

As for his old acquaintances...

Xie Qingqing and Gu Nan were seated at a corner of the refining hall. The two of them were talking to each other and making out when Han Fei came in.

"Ya..."

Both of them sat straight when they noticed that someone else came.

Gu Nan said solemnly, "Qingqing, I think this is a way to increase the odds of success in refining..."

Bei Huo looked at them as gently as before. "Gu Nan, have you finished your mission?"

Gu Nan choked for a moment and said, "Boss, I'm just taking a break... Fine! I'll get back to work."

Then, Gu Nan greeted Han Fei and said, "Welcome back. You've got a lot of things to do. Keep it up."

Han Fei: "..."

Xie Qingqing, however, asked in surprise, "Han Fei, you're back? Do you have any idea how many missions you owe? We've been covering up for you! No, I have to take a vacation. You'll work for me..."

Han Fei was quite frightened. *A thousand ultra-quality spiritual weapons? Even if I could craft two hundred of them in a day, it would still take me almost a week.*

No, I have to evade these responsibilities...

Suddenly, Han Fei had an idea. "Oh! Senior Bei Huo, I learned some weird arrays when I was on the sea. I even had a theory that we may be able to craft Semi-Divine weapons without the help of array masters."

Guan Qingyan looked at Han Fei. "Brother Han, what's your theory?"

Bei Huo was also curious. "What is it? Jia'er's solution is already a major breakthrough. Are you sure your idea can be better than hers?"

Han Fei nodded. "This is how it goes. Since arrays can be refined as items, why can't we imprint arrays on independent molds? In such a way, with the right materials and craftsmanship, it will be able to produce Semi-Divine weapons in a streamline way. They might not be as good as handmade ones, but they'll be Semi-Divine weapons anyway!"

Bei Huo asked in suspicion, "Huh? Your idea is very similar to the mechanism of the sea demons' Refining Divine Platform."

Han Fei was quite surprised. Did Bei Huo know of the Refining Divine Platform?

Shouldn't that thing only exist in the Ten Thousand Demon Valley? How did Bei Huo know that?

Bei Huo said, "However, it has a strict demand on arrays. If you can really craft one, you'll instantly be certified as a four-star refiner, if not a five-star one."

Guan Qingyan nodded. "Brother Han, I think it's a great idea. But wouldn't the array be extremely complicated?"

Han Fei smiled. "As I said, I've learned a lot of strange array techniques on the sea. Maybe I can have a try."

Mu Jia'er narrowed her eyes and said, "We're both four-star refiners."

Han Fei was stunned. "Both of you?"

Mu Jia'er nodded quickly. "Yes! Do you not know how long you stayed on the sea? It wouldn't make sense if we didn't become four-star refiners after such a long time."

Xie Qingqing was quite frustrated.

Han Fei cackled. "Well, I think I have to consider the problem and sort out my thoughts for a couple of days. Why don't I spend a few days in seclusion in the Fourth Unit and see if I can put my idea into practice?"

Bei Huo was stunned for a moment. "It's not easy to decline such a request."

Xie Qingqing instantly complained, "Hello? What about his refining duty?"

Han Fei said solemnly, "Sister Qingqing, You can never do enough refining. Only if you focus on improving your expertise in refining can you really become an expert. Are a thousand ultra-quality weapons really important? No, not at all, compared to a great speculation."

Han Fei solemnly walked into the cave. "Senior Bei Huo, I need to spend a few days in seclusion. Please don't disturb me!"

Bei Huo thought for a moment and slightly nodded. "Okay! Everything is fine as long as you stay here."

Guan Qingyan said, "Brother Han, I think we can discuss your idea."

Han Fei quickly stopped him, "No! I'm still sorting out my thoughts. We can discuss it after we're done."

...

Han Fei finally found a refining room. He closed the door after he entered.

Phew! You almost got me. You want me to work? No way! I need to study the Cosmic Sword Technique...

As for the arrays on the Refining Divine Platform, they were indeed worth studying. The arrays to refine demonic weapons and those of human beings were not the same.

However, the study would take a lot of time. Even though he had learned the arrays on the Spirit Gathering Scripture, it wouldn't be a simple task to craft a Refining Divine Platform that could build Semi-Divine weapons.

It would require the combination and connection of a hundred arrays. So far, Han Fei could only fuse a dozen arrays. The more arrays he were to fuse, the more factors he would have to take into consideration. The difficulty would soar exponentially.

Of course, if he didn't have to paint the arrays, but only needed to give the methodology, then it would be easy.

However, he didn't have to rush. Both Old Jiang and Jiang Qin had urged him to increase his strength. So, he shouldn't waste his time on array studies.

Therefore, Han Fei took out the Cosmic Sword instead of the Refining Divine Platform.

Activated by Han Fei's thought, a jade slip flew out of the Cosmic Sword. It was exactly the Cosmic Sword Technique that Shu Shan mentioned.

A moment later, information popped up in Han Fei's head.

Cosmic Sword Technique (Heaven-Level, Divine-Quality)

Introduction: A tough technique that can make use of the power of nature. This sword technique can cut the sky and the sea apart but cannot be used in defense. Whoever practices it must be fearless and unstoppable.

Deduced Art: Unknown

Deduction Cost: 0/50,000,000

Note: This sword technique is imperfect, in that it does not fully understand how to make use of power.

"Huh?"

After reading the Cosmic Sword Technique, Han Fei felt like it should've been a saber technique or a fist technique considering its features, but it turned out to be a sword technique.

Han Fei furrowed his brows. He had to learn the technique anyway.

He had picked up some techniques on the bow, stick, saber, seal and fist. It wouldn't hurt if he learned a sword technique.

What should his path be as a Law Enforcer? Han Fei didn't know the answer yet.

However, he had been getting in touch with a lot of top-notch battle techniques. It almost felt like something unknown was pushing him to do that.

Is it possible that my path is related to battle techniques?

No, no. I just happened to run into those battle techniques, and they happened to be not difficult to learn. Well, they're probably not related to my path. I have to keep looking and learning.

Han Fei glanced at the Cosmic Sword. For some reason, he despised it and didn't want it to acknowledge him as a master.

Never mind, I should wait a moment.

Chapter 873: Can You Repeat That?

The Cosmic Sword Technique was powerful in three ways.

Firstly, it could make use of the power in nature. The creator of the technique didn't have a full understanding of the power of nature, but it was already miraculous enough for ordinary people.

Secondly, it was unstoppable. In fact, Han Fei had already comprehended the idea of full offense and no defense when he learned the Sacrificing Punch. He also had the Art of Invincibility. So, it wasn't hard for Han Fei.

Lastly, the Cosmic Sword Technique's feature was speed, which was something that all swordsmen cared about.

Wuming's sword, for example, was faster than Han Fei even though he was carrying out the 64-Dimensional Fish Dragon Dance.

The same was true for Zhang Xuanyu's Momentary Time. Han Fei could deal with the Instant Mystic Spear, but not the Momentary Time, which could manipulate time in a small range. It was impossible for him to catch up.

There was also Ye Baiyu's pure speed. He was well-acknowledged to be the fastest in his generation. Han Fei had calculated that even though he used the Overlord's Technique and the Phantom Glass Wings, he couldn't be as fast as Ye Baiyu, unless the Agility of Wind could boost his speed by five times.

Taking all the three points into consideration, Han Fei actually only needed speed. He could already make use of the power of wind. After all, the Phantom Glass Wings weren't useless.

Three days passed.

Han Fei understood about seventy percent of the Cosmic Sword Technique.

It wasn't because Han Fei was smart, but because he knew a lot of battle techniques, and all battle techniques had something in common. When a person learned enough battle techniques, they could quickly pick up a new one.

Of course, he hadn't fully grasped it yet. Han Fei believed that he was fluent with the technique and wasn't too far away from fully mastering it.

It's a shame that I can't practice it in the refining room, or I'd definitely be more fluent with it. If I fight with Wuming more often, my expertise with the sword will surely be remarkable.

Han Fei was about to go out, when he realized that he couldn't just tell Bei Huo that he didn't figure out anything in the past days.

Therefore, Han Fei took out the Refining Divine Platform from Forge the Universe.

Thud!

When the Refining Divine Platform fell on the ground, Han Fei was dumbfounded to see the complicated patterns on it.

Are there array geniuses in the Ten Thousand Demon Valley too? How can they paint such complicated arrays?

Han Fei took out a bunch of skins and circled the four-meter-long Refining Divine Platform, studying it carefully.

One day passed.

Huh! I'm almost certain that there are three hundred interconnected arrays on the Refining Divine Platform. What a genius! It makes use of the spiritual energy inside the Refining Divine Platform to facilitate the fusion of the materials.

Wait, this is not good enough. There's still the gravity array to compress the materials.

Right! There's also a micro-refining array to polish the weapons again after the refinement.

Two days later...

Han Fei copied more than two hundred arrays to his fish skins and numbered them.

No, something is still missing. I don't recognize some of the arrays. But I can't tell them I don't have the core arrays if I give them the methodology and the framework!

Han Fei thought of a lot of arrays and analyzed them in his head.

Well, this array is meant to increase pressure from inside the mold. I think I can find a replacement for that.

Also, this step of micro-refining isn't really polishing. It simply compresses the materials more tightly and extracts the remaining spiritual energy inside the weapon. I can paint multiple Spirit Gathering Arrays for the same purpose...

...

On the sixth day since Han Fei entered the refining room.

Hum!

The door was opened. Hardly had Han Fei come out when he saw that Guan Qingyan was holding a fish skin in one hand and a brush in the other and painting something.

Han Fei was quite shocked. "Hey! Old Guan, are you trying to scare me? What are you doing here?"

Guan Qingyan put a smile on his rigid face. He laid down the fish skin and said, "I was waiting for you to sort out your thoughts. Since I had nothing else to do, I decided to study arrays."

Han Fei was lost for words. *I wasn't running anyway. Did you have to stand in front of my door?*

Han Fei heaved a sign. "It's more difficult than I thought."

Guan Qingyan became frustrated and thought that his wait was futile.

But then, Han Fei said, "I've been working devotedly for days without sleeping and eating. Thanks to my arduous efforts, I finally came up with a feasible solution."

Hum!

Guan Qingyan was quite shocked. *Didn't you just say that it was more difficult than you thought? Why is it feasible then?*

Guan Qingyan said, "Wait a moment. I'll call Senior Bei and the others. Let's talk later."

Then, Guan Qingyan spoke to his waist tag. In half an hour, Mu Jia'er, Bei Huo, Yu Xu, Li Feiyun and some other refiners came close.

Mu Jia'er said delightedly, "Where is he? Did he come up with anything? Does it work?"

The bigshots were all here. The people who were working walked out of the refining rooms too, wondering why two five-star refiners had come to this place.

A moment later, Han Fei was surrounded by dozens of people in the lobby of the Scattered Stars Fourth Unit.

Han Fei looked at those people in shock and then at Guan Qingyan. "Is there a misunderstanding? I simply have an idea. I never said I could carry it out!"

Bei Huo said, "An idea is precious enough when it comes to refining, not to mention one that's about Semi-Divine weapons."

Li Feiyun also nodded. "When you said you had an idea to manufacture Semi-Divine weapons, I had to come."

Yu Xu smiled. "Han Fei, you should be promoted as a four-star refiner. I've brought your certificate to you. As long as your plan works, this will be one of your rewards."

Han Fei swallowed. He had underestimated the refiners' persistence in refining. He was never a qualified refiner, and he never planned to distinguish himself in refining.

However, for some other people, especially for those lunatics in refining who considered it their life, they gave enough attention to any valuable guesses.

Taking a deep breath, Han Fei said, "Everybody, please come here and take a look."

Directing everybody to the table in the lobby, Han Fei took out three hundred fish skins and a weirdly-structured item that was in the shape of a cylinder.

Han Fei unhurriedly paved the fish skins on the ground and hung some of them on the wall.

He said unhurriedly, "Everybody, Mu Jia'er and Guan Qingyan have proposed the idea of creating arrays as part of a weapon to craft Semi-Divine weapons. It proves feasible, but it has high requirements on the arrays and the refiners. If the array master's work cannot be duplicated, I believe that the failure rate could be quite high."

Guan Qingyan nodded. "Exactly. The failure rate is very high. We're working on that."

Bei Huo shrugged. "It depends on the expertise of the refiners. Failures are inevitable."

Han Fei smiled. "Not exactly. The Semi-Divine weapons are based on ultra-quality spiritual weapons, whose quality is improved by some advanced materials or arrays. The key is arrays. Now, we're adding arrays to weapons, but if we change our mindset, we can totally imprint arrays on molds and then apply the molds to weapons. In such a way, the refiners won't have to study arrays."

Frowning, Yu Xu said, "That does make sense. Are all your designs meant to make the mold?"

Han Fei nodded. "Exactly! In order to make a mold, I have to elaborate on its mechanisms first."

Han Fei went on, "First of all, ignoring the arrays, the Semi-Divine weapons are essentially ultra-quality spiritual weapons, which too many people can craft. So, we can totally conduct the first two steps of the

refining procedure manually. When it comes to the third step, Spirit Polishing, we'll give the task to molds, which means we have to endow the molds with the ability to polish spirit..."

Like a chief scientist, Han Fei grabbed a fish skin now and then. "Look, this is the step of Spirit Polishing. We've gathered the essence of materials manually, and Spirit Polishing is meant to combine the materials. We'll use this array as the basis and that one as support. Then, after about 83 steps, the job will be done. Isn't it simple?"

Everyone: "..."

A dozen people nodded, but none found the task simple.

Han Fei said, "Spirit Polishing is simple. What's hard is to imprint the arrays. Human beings have five classes. We have to offer five different ways to fuse arrays according to the classes. I've given the illustrations here. However, I can only fuse a dozen arrays for now, which might not be good enough... Look, you have to direct spiritual energy into the weapon, not its outside. This step isn't too hard either, is it?"

Everyone: "???"

Han Fei took a deep breath and said, "Next step is the second polishing. I call it micro-refining. Blah, blah..."

Everyone: "???"

In the end, Han Fei pointed at the mold design he painted and said, "I've finally crafted his mold after days and nights of hard work... Blah, blah..."

Guan Qingyan looked at Han Fei with a stunned expression, wondering if he could say something else.

Eventually, Han Fei finished an hour of perfect interpretation, or so he thought. He had the Refining Divine Platform right with him. If he couldn't make a decent proposal with it, he would simply be too incapable.

When everybody was astounded and confused, Han Fei said slowly, "So, this is how it's done. I've given you the plan. Some of the arrays need more studying, but I'm incapable of doing that. So, I'm afraid that you'll have to work on it."

Everybody was silent for a long time.

Suddenly, someone said, "Well, Han Fei, I don't think I understood what you said. Can you repeat that?"

Han Fei: "..."

Chapter 874: Twisted Domain

Han Fei and the other refiners looked at each other in bewilderment.

In the end, it was Yu Xu who said unhurriedly, "There's no need to repeat. Those who can follow already understand, those who can't follow won't understand no matter how many times he repeats himself.

Han Fei's plan involves a lot of knowledge of arrays. Those who don't have enough knowledge can hardly comprehend a combination of three hundred arrays."

Li Feiyun nodded. "That's true. However, Han Fei, there are a few problems regarding your plan."

Han Fei grinned and continued immediately, "Do tell me, Senior."

Li Feiyun said, "In the phase of Spirit Polishing, I don't think using the absorption of these few arrays is enough to gather the essence of materials."

Han Fei nodded. "That's the key to Spirit Polishing. My current arrays aren't enough to solve the problem, but I'm sure someone can."

Li Feiyun nodded. "The combination of five classes is indeed tricky. Shouldn't there be more? You've only fused offensive arrays."

Han Fei smiled. "Of course there should be more. In my opinion, a standard weapon cannot meet everybody's requirement, so balance should be what we pursue. It should be good enough as long as it doesn't have obvious flaws in any aspect."

Li Feiyun nodded. "Okay, I'll personally take care of the matter."

Bei Huo asked, "What's the point of a second polishing?"

"To further stabilize the Semi-Divine weapons. That's a necessary step. Without it, it'll be impossible to craft Semi-Divine weapons."

Bei Huo thought for a moment. "It seems to be too simple."

Han Fei chuckled. "I can't paint a more complicated one!"

Mu Jia'er was stunned. "I don't follow."

Guan Qingyan was already collecting Han Fei's fish skins. "The design is flawless. If a mold can be created according to such a design, the odds of success will be almost a hundred percent. It's incredible."

In the end, Yu Xu laughed and said, "This method is not bad. Although a lot of parts of the plan require improvements, it works in general. We can try it later."

Then, Yu Xu threw the certificate of a four-star refiner to Han Fei. "With that design alone, Han Fei, you're already qualified as a four-star refiner."

Han Fei grinned. "What about five stars?"

Yu Xu smiled and said, "If you can craft the mold right now, I'll hand over a five-star refiner certificate to you immediately."

Han Fei waved his hand. "Never mind. I might as well wait!"

Han Fei thought to himself, *I can already craft Divine weapons, although I have to use the Demon Purification Pot. However, when it comes to the ultra-quality spiritual weapons, my odds of success are already a hundred percent.*

He would've been qualified as a five-star refiner if he could seal spirits without the Demon Purification Pot.

Yu Xu asked, "Han Fei, you were already qualified as a four-star refiner, weren't you? What else do you want besides the certificate?"

Han Fei said, "Can my duty of crafting more than a thousand ultra-quality spiritual weapons be waived?"

Immediately, Xie Qingqing and the others all looked at Han Fei suspiciously, wondering if he had come up with this plan just to evade his duty.

Yu Xu calculated for a moment. "Okay. A thousand ultra-quality spiritual weapons with sealed spirits are worth thirty to forty million points. I'll just free you from this duty."

Han Fei said again, "Well, I'm rather short on cash... It would be great if I could have a hundred thousand kilograms of spiritual spring instead, hahaha..."

"Pu!"

Yu Xu lost balance and would've fallen to the ground without Li Feiyun's support because of Han Fei's shocking request.

Bei Huo said quickly, "Han Fei, that much spiritual spring energy is too rare. Just drop it. Here's five million credit points. You can buy whatever you want from the Logistics Division."

Li Feiyun also said, "That's right. Your design is just a plan. If you can carry it out, you'll have the claim to a hundred thousand kilograms of spiritual spring. But it's not carried out yet. Also, you just got a four-star certificate and were freed from your duties of the past year. Bei Huo is already generous enough to give you five million points."

Han Fei secretly thought, *If you can craft a human version of the Refining Divine Platform, it will be invaluable... Never mind, I'm not a petty man. Five million credit points are good enough.*

Han Fei suddenly remembered that he had given five million credit points to Le Renkuang earlier, asking him to collect spiritual fruits for him. He wondered how the collection went.

Unfortunately, Le Renkuang was in the middle of a breakthrough. He'd better not interrupt him. He wasn't short of anything.

He asked Le Renkuang to prepare so many spiritual fruits exactly for the sixth level of the True Spirit Fishing Art.

Old Han had mentioned that he could get the sixth level of the True Spirit Fishing Art. Considering the pattern of the True Spirit Fishing Art, the deduction of the sixth level would require a billion points of spiritual energy, and the seventh level would probably require ten billion.

Han Fei felt a strong headache as he thought about it.

Since he couldn't get the spiritual spring, Han Fei instantly said, "Well, that's my plan. You guys can go back to work! I just remembered that there's something I need to do at the Empyrean Waterfall."

Bei Huo suddenly asked, "Huh? Weren't you going to the Scattered Stars First Unit?"

Han Fei smiled. "That was six days ago. I'm not needed anymore... Right, Senior Bei Huo, when you meet Senior Liang Tian, don't tell him that I was here. I'm too occupied to find him myself..."

Guan Qingyan shouted after him, "Hey, Brother Han..."

Han Fei said without looking back, "You can read and learn the design first. We'll talk next time!"

After Han Fei ran away, Bei Huo dismissed everybody and shook his head. "Han Fei is not focused on refining at all. However, he is quite smart to come up with such a systematic mold. He did not waste his talent."

Li Feiyun said casually, "It's a shame that we never looted a Refining Divine Platform from the Ten Thousand Demon Valley, otherwise... Huh, isn't Han Fei's idea very similar to the Refining Divine Platform?"

Yu Xu said casually, "Their ultimate purpose is undoubtedly the same. However, due to the difference between humans and sea demons, some of the steps must be different. The combination of the five classes, for example, is much more complicated than the Refining Divine Platform..."

...

In the sky...

Phew! I'm finally free! I'll never go back. Well, now that they've met me again, they probably won't blame me for my long-time absence anymore. I have to fight with Wuming to improve my techniques... Well, I also have to make exchanges with the big turtle.

On his way to the Emyrean Waterfall, Han Fei was going to have some spiritual fruits, when he was astonished by the changes in Forge the Universe.

"Hiss! Why is Forge the Universe bigger now?" Han Fei exclaimed.

Han Fei was stunned. Ever since the trip in the level-three fishery, Han Fei had never purposefully expanded Forge the Universe, but it was already twice as large as before.

When did this happen?

Han Fei had never noticed it because he hadn't been in Forge the Universe recently. He only spotted it a moment ago when he felt something wrong.

When Han Fei looked for the reason, he discovered to his surprise that the Star Shell had been moved to the top of this space at some point.

Huh? The Star Shell increased the space of Forge the Universe? I don't have to expand it with my spiritual energy?

Han Fei tried to retrieve the Star Shell, only to discover that it couldn't be taken out. It seemed that those shells would create a space of their own after they died.

This Star Shell had a coverage with a radius of twenty kilometers. Could Forge the Universe be expanded that big?

Han Fei was quite delighted. If that was the case, his spiritual energy could be saved. After all, the Star Shell wasn't as good as Forge the Universe, he only hoped that they could merge.

But it never happened to the Sea Swallowing Seashells before. Was it because the Demon Purification Pot was not interested in the tiny space in the Sea Swallowing Seashells?

Possibly... I guess the little calabash doesn't just eat everything.

...

At the Emyrean Waterfall.

When Han Fei returned, he found nobody outside at all. Wuming wasn't on the rock, Yue Shier wasn't having fish soup, Ning Jingyao wasn't sleeping on the rooftop, and You Ye wasn't tending to her flowers.

"Huh? Where is everybody?"

When Han Fei spread out his senses, he found that everybody was gathered at his place.

His house had been destroyed by You Ye's vine. It was still a pile of debris. Nobody ever rebuilt it as he was never back.

Han Fei was quite panicked to see so many people there. Did they know that he was coming back? Did they have to block him at home when he only caused a minor earthquake?

Then, Han Fei noticed something wrong. He saw that Du Jiangliu was floating in front of the Emyrean Waterfall with his head facing the sky. There was a weird, twisting space around him.

Is he becoming a Law Enforcer?

Han Fei changed his expression and became solemn. He felt lucky that he had returned in time, or he would've missed it.

Shua!

Han Fei landed, and You Ye and Ning Jingyao both looked back at him and shushed him.

Han Fei nodded, indicating that he wouldn't say or do anything.

In midair, the twisting force around Du Jiangliu became greater and greater. In the naked eye, his body had been twisted into plumes of smoke, which made him look like a monster.

Nobody talked in the next hour, not even Wang Dashuai or Bai Lu. They didn't even send a telepathic message to Han Fei.

Hum!

All of a sudden, spiritual energy gathered from all directions, and spiritual spring energy dispersed on the surface of Du Jiangliu's body into the densest spiritual energy cover.

The process lasted five minutes. In the meantime, Han Fei saw that Spirit Awakening Fluid flowed out of the lake into Du Jiangliu's body.

BAM!

Noises came from the sky, as if a mysterious power was descending.

The twisted void exploded, and Du Jiangliu declared proudly, "I'm a Law Enforcer now, with a Twisted Domain."

Chapter 875: Everybody's Reminder

Everybody put on a smile when Du Jiangliu became a Law Enforcer.

However, Han Fei noticed that not many of them seemed envious.

Those people who didn't live at the Empyrean Waterfall, on the other hand, all congratulated him.

Someone crossed their hands. "Congratulations on your breakthrough!"

Someone laughed. "Brother Du, congratulations."

Someone congratulated him and then left quietly.

Ning Jingyao, a local of the Empyrean Waterfall, roared, "Old Du, why is the law you possess so weird?"

Wuming said thoughtfully, "I feel like you can block my sword."

Yue Shier muttered "You're so awesome. I envy you."

Li Luoluo begged, "Old Du, show it to us! What's the use of the Twisted Domain?"

...

However, Du Jiangliu looked at Han Fei across everybody else. "Huh, Han Fei is back! I couldn't have become a Law Enforcer so easily without Han Fei or his brother."

Han Fei: "???"

Han Fei was stunned. When everybody looked at him, he said, "Wait... Why me again? I haven't been around for days!"

Everybody else looked at Han Fei weirdly too, and Ning Jingyao said, "Old Du, don't try to fool me. He only just came back. Why is your breakthrough related to him?"

You Ye suggested, "Zhang Xuanyu's move was quite interesting. I believe your breakthrough had more to do with that, right?"

Du Jiangliu said, "No, it was the earthquake that Han Fei caused. I was training in seclusion and understanding Zhang Xuanyu's Momentary Time, when the earthquake happened and shook my body. Then, I realized that the way to deal with the Momentary Time is twisting. Similar to Wuming's Sword Domain, I can control the space within a one-meter radius. You can't kill me or even hit me without breaking the Twisted Domain."

"You can do that?"

Everybody looked at Han Fei again, who was still dumbfounded. Someone became a Law Enforcer because of the earthquake he caused?

Seeing the passion in Du Jiangliu's eyes, Han Fei quickly said, "Old Du, don't look at me like that! I'm not gay..."

Du Jiangliu: “???”

Everyone: “???”

Du Jiangliu roared, “Come on, Han Fei, hit me as fast as possible.”

Han Fei was rather interested.

Twisted Domain? It was a chance for him to find out how strong a Law Enforcer was.

Wuming said, “You should’ve invited me to fight you. Han Fei isn’t as fast as me.”

Han Fei said angrily, “Nonsense, I’m very fast.”

Then, Han Fei unfolded the Phantom Glass Wings and activated the Overlord’s Technique. He swooshed into a streak of light and left two long trails in the sky.

Wang Dashuai smacked his lips. “My Junior Brother is very fast.”

Bai Lu also nodded. “Yes. The Phantom Glass Wings plus a secret technique... He’s truly fast.”

Even Wuming was also dazed for a moment. Han Fei had never shown that kind of speed earlier.

Shua!

A trail emerged in the sky, like a line on a piece of paper. The trail passed through the Twisted Domain. Then, Han Fei discovered, to his shock, that Du Jiangliu deformed his body and moved his belly half a meter away, dodging his attack easily.

“Come again!”

SWISH!

Han Fei moved quickly in the sky, and almost eight blurry shadows appeared everywhere around Du Jiangliu.

He flashed, and all the blurry shadows slashed at the same time. He believed that his opponent had to have a body to strike, however twisted it was.

However, what astounded Han Fei was that Du Jiangliu completely transformed. His head was twisted to his hands, and his elbows reached his toes. He looked like a fish skin.

All the eight attacks missed their target.

Han Fei was quite dumbfounded. “Are you kidding me?”

Du Jiangliu laughed. “What else have you got? Bring it out!”

Han Fei flew around Du Jiangliu like a wind.

Suddenly, Han Fei extended his hand into the void, and a dragon roared.

“Nine Mansions Dragon Seal.”

A giant seal emerged in the sky like a giant rock. In fact, Han Fei secretly turned his hand upside down and applied the gravity domain.

BAM!

Du Jiangliu's twisted face was filled with disdain at first. But then, he was smashed into the lake in the next second.

Han Fei chuckled and flew back to whatever was left of his house.

He remarked casually, "In order to break Old Du's twisted domain, all you need to do is to launch an area attack so that there would be no place for him to twist."

In fact, the Twisted Domain didn't transform the body but changed the space around it. It was just like space and time were warped around the sun.

Of course, Du Jiangliu's Twisted Domain was changing all the time. So, the normal attacks would miss the target even if they were aimed at him. Han Fei's gravity control froze part of Du Jiangliu's domain, and his attack fully covered that part, which was why he hit the target.

Everybody saw what happened.

Wuming nodded thoughtfully. "True. If I launch ten thousand swords, I don't think Old Du could dodge them."

Ning Jingyao also nodded. "Well, I have an area battle technique too."

Li Luoluo thought and said, "Can he dodge my vines and grasses?"

"Pu!"

Du Jiangliu rose from the lake awkwardly. "Well, Han Fei, where was that gravity technique from?"

Han Fei shrugged. "It's the seal technique that I practice!"

Du Jiangliu was quite grim. *Why are you capable of anything? Who would learn so many battle techniques?*

On the other hand, he said, "Your swords won't work. I can dodge all of them."

Wuming extended his fingers, launching a storm of sword auras towards Du Jiangliu.

However, Du Jiangliu didn't move at all. Wuming's sword auras were twisted in the weird domain and brushed past him without hitting him at all.

It was not until this moment that everybody realized what was going on.

Nangong Xuan remarked, "This technique is not bad. Few physical attacks can hit you. However, Han Fei's seal technique can unleash invisible gravity, which counters your technique."

Du Jiangliu nodded helplessly.

Someone had found a flaw in his technique after he had just become a Law Enforcer? He felt more or less sad.

As for Han Fei, he discovered something from the battle too.

The Law Enforcer could only master limited laws. For example, Du Jiangliu could twist the space within a one-meter radius, but that was the entire area under his control. He couldn't twist the forces such as gravity.

Similarly, Jiuyin Ling could seal the power of opponents of lower levels easily, but faced with opponents of her level, she could only seal part of their power. When faced with experts, she might not be able to seal them at all.

Having gained more understanding of Law Enforcers, Han Fei became more confident.

He'd be lying if he said that he didn't envy Du Jiangliu, who was almost invulnerable to physical attacks with his new technique. Wasn't that great?

Of course, Han Fei had his own laws, and they weren't weak at all. At least, they were much larger than Du Jiangliu's one-meter range. The Law Enforcers weren't as impressive as he thought! Essentially, they all had a special battle technique.

Han Fei couldn't help but look at Wuming, who already had a 300-meter sword domain. What would happen after he became a Law Enforcer?

Everybody finally dispersed at this moment.

You Ye looked at Han Fei and asked, "Are you going to rebuild your house? Do you want to decorate it with flowers? I bought a new flower from the market yesterday. It's quite beautiful."

"Well..."

Han Fei smiled awkwardly. "Okay, just wait for me to build my house first."

On the other hand, Li Luoluo, whose hair had turned blue at some point, emerged next to Han Fei and looked at him. "I think we should have a fight too. You might help me become a Law Enforcer."

Han Fei was amused. "How can it be so simple? It was just a coincidence..."

Li Luoluo snorted. "I'm just saying... Okay, I'm leaving. I don't want to help you rebuild your house."

Wuming, on the other hand, looked at Han Fei and said, "I feel like you came for me."

Han Fei thought, *Your feeling is right!*

He said, "Oh! It's no big deal. I've practiced a sword technique recently. Should we practice tomorrow?"

"Pu!"

"Cough, cough!"

Those who hadn't left yet all looked at Han Fei speechlessly. Why are you practicing sword techniques again?

Wuming was also stunned for a moment. "How many days have you practiced?"

Han Fei chuckled. "A number of days."

Wuming: "..."

Wuming was silent for a moment. "Fine then! However, Han Fei, the more battle techniques you have, the more messed up they tend to be and the harder it will be for you to find your path. You'll have to abandon a lot of things when you become a Law Enforcer."

Han Fei grinned. "I know! I know what I'm doing."

After everybody left, Wang Dashuai said, "Junior Brother, Wuming is right. You're already a Hidden Fisher. You need to start considering your path as a Law Enforcer."

Han Fei asked curiously, "Senior Brother, what's your path?"

Wang Dashuai said with an innocent smile, "Unparalleled."

"Well..."

Han Fei was stunned for a moment. "Why not invincible?"

Bai Lu snorted. "He wants to be invincible, but he isn't capable of that. I'm working on the same path... Right, Junior Brother, why don't you come for lunch?"

Han Fei hurriedly managed a smile. "No, thanks. I have to clean up the mess here and build a house."

Bai Lu didn't insist. She nodded and said, "Let your Senior Brother help you."

Wang Dashuai smiled innocently. "Okay."

Han Fei felt like Wang Dashuai was quite happy to work here. He shouted, "Qing Chen, Qing Chen!"

All of a sudden, someone landed from the sky like a big bird on the ruins of Han Fei's home.

Qing Chen chuckled. "What's up?"

Han Fei gave him a smirk. "I need you to help with the reconstruction. Free food. Are you in or not?"

"Yes, of course..."

Chapter 876: The Sea Demons' Assault

The night was quiet.

Han Fei snuck to the edge of the lake. Although he knew he probably had been discovered, he wasn't too bothered. After all, it was an unspoken rule that deals with the big turtle were allowed.

Besides, two men had become Law Enforcers recently, and the seal of the Empyrean Waterfall should be weakened.

As a contributor to their breakthroughs, it wasn't outrageous for him to get some Spirit Awakening Fluid, was it?

Senior, I've brought some good stuff to you!

The big turtle's voice echoed in Han Fei's head, *What is it?*

The Phoenix Spirit Ginseng.

Then, Han Fei bound a Sea Swallowing Seashell to the fishing pole and sank it into the lake.

A moment later, Han Fei pulled the Sea Swallowing Seashell up, which was filled with five thousand kilograms of Spirit Awakening Fluid.

Han Fei said, *Senior, you know that I'm a poor man who doesn't have many good things. I'll come back later!*

Okay!

The Phoenix Spirit Ginseng, as a ginseng, was much more advanced than the Trivariant Golden Ginseng, but it was only exchanged for five thousand kilograms of Spirit Awakening Fluid. Good thing that he bought it at a low price. He didn't know what would happen if other people knew that Phoenix Spirit Ginseng could be exchanged for so much Spirit Awakening Fluid.

In the newly-built yard, Han Fei sat cross-legged.

Five thousand kilograms of Spirit Awakening Fluid wasn't enough. He wondered how much Le Renkuang had acquired. Seeing the five million credit points on his waist tag, Han Fei believed that he should exchange them for some assets in the Logistics Division.

He swallowed the fluid, and the upper limit of his spiritual energy and his body hardness changed slowly.

A moment later, Han Fei looked at his new stats.

<Owner> Han Fei

<Level> 52 (Junior Hidden Fisher)

<Spiritual Energy>: 4,619,667 (25,502)

<Spiritual Power> 3,395/3,395

<Perception Range> 31,999 Meters

<Spiritual Heritage> Level-Seven, Low-Quality

<Spiritual Beast> Twin Yin-Yang Spirit Swallowing Fish (level-46)

<Main Art> Divine Manipulation Technique, Volume Five of Void Fishing (Heaven-Level, Divine-Quality)

...

Han Fei felt bitter after seeing that.

It seems that the Spirit Awakening Fluid isn't as effective as before. Five thousand kilograms didn't even increase 1,500 points of my spiritual energy.

Han Fei heaved a sigh. He suspected that he probably could only level up to be an advanced Hidden Fisher even if he had a hundred thousand kilograms of Spirit Awakening Fluid.

He knew very well that the effect of the Spirit Awakening Fluid would decline as the taker grew stronger.

Maybe the decline wasn't too significant for others, but for him, further improvement was not so easy.

However, Han Fei wasn't frustrated. At least, the Spirit Awakening Fluid was still useful to him. By the time he became a Law Enforcer, the Spirit Awakening Fluid probably wouldn't work at all.

After a thought, Han Fei emerged in Forge the Universe.

He looked at the Star Shell that was floating in the sky and found that Forge the Universe was bigger, but not very significantly. *Forge the Universe must be swallowing the space inside the Star Shell*, he thought.

It would still take some time.

Besides, Forge the Universe was large enough for him to use. Han Fei didn't really care how much bigger it had turned...

The advantage of a larger space was that he could establish a garden without worrying that there was no place for his materials.

The Big Red Trunk, on the other hand, was a pickle. It was no longer useful to Han Fei anymore. Even its core could only be used to craft ultra-quality spiritual weapons rather than Semi-Divine weapons.

But he couldn't sell it either, or he would be announcing to everybody that he was the one who dug the Big Red Trunk out from the level-three fishery.

Also, Han Fei had given up the Million Knife Art and used the Infinity Water as a replacement. As a result, the Big Red Trunk and materials from the Ten Thousand Demon Valley were no longer useful.

Never mind. I'll just keep them here. They're all good items and may come in handy later.

...

On the next day.

Han Fei went to the Logistics Division early in the morning. He remembered that six-star ranks could get a hundred level-two Soul Crystals every month.

Le Renkuang gave him fewer than that, probably because he used some of them, and his stars were too low.

As for Xiaobai, Han Fei estimated that she didn't use them up either. However, as a manipulator, Xiaobai also needed a large number of Soul Crystals. She probably would save them even if she didn't use them up at this moment.

Nevertheless, Han Fei intended to ask them to leave the resources that they didn't use up to him in their next gathering.

In the Logistics Division, Han Fei said telepathically, *Le Renkuang, are you here?*

Receiving no response, Han Fei estimated that the guy was probably training somewhere.

Therefore, he walked straight to the counter.

"Hello, I'd like a hundred level-two Soul Crystals."

While talking, Han Fei pushed his waist tag to the receptionist, who asked in surprise, “Huh? A hundred?”

Han Fei nodded. “Isn’t that the maximum number?”

The receptionist nodded and looked at Han Fei in shock. “We must record the Soul Crystal transactions. May I ask about your duty?”

Han Fei shook his head. “I don’t have any duty.”

The receptionist asked again, “Then may I know which division you work for, or came from? We need to keep a record.”

“I used to be with the First Unit. Now, I live at the Emyrean Waterfall.”

“Cough, cough...”

The receptionist looked at Han Fei with widened eyes. “The Emyrean Waterfall?”

Taking a long breath, she said, “Okay, please wait for a moment. The Soul Crystals you ordered will be delivered to you soon. Is there anything else you want?”

Han Fei thought for a moment and asked, “Is there any way to improve speed? Battle techniques and spiritual fruits are all optional.”

“Huh?”

Stunned for a moment, the receptionist asked, “Well, there are indeed speed battle techniques. The best of them are heaven-level, high-quality. Would you like one?”

Han Fei said, “Let me take a look.”

A moment later, Han Fei returned the inventory to the receptionist. “Is there no other way?”

The receptionist shook her head. “Not that I know of. Some spiritual fruits may help, but they’re rare and not exactly effective.”

At this moment, the level-two Soul Crystals were delivered.

Han Fei collected the level-two Soul Crystals and left.

After he left, the girl immediately said to her waist tag, “Han Fei, from the Emyrean Waterfall, exchanged for a hundred level-two Soul Crystals at one time. He may have extraordinary soul power. Take note.”

...

After leaving the Logistics Division, Han Fei looked back.

He suddenly realized why those who had six or more stars could set sail individually.

The reason was that the Logistics Division, the Refining Hall, and the other facilities mostly targeted Hanging Fishers and junior Hidden Fishers.

When someone acquired six stars, there would be few things they needed in the Logistics Division.

Those people only needed special things, such as level-two Soul Crystals, Spirit Awakening Fluid, special spiritual fruits, top-level battle techniques, etc.

While Han Fei was thinking, someone roared, "Attention, everybody! The sea demons are attacking on a full scale! Return to your position!"

Boats were rising and flying everywhere, and the previously busy downtown instantly became empty.

That was exactly the Scattered Stars Island's attitude against enemies. Everybody was a soldier in moments like this even if they were on vacation.

What surprised Han Fei was that it had only been five months since the sea demons' previous attack. The Ten Thousand Demon Valley had launched a total war in the demon jungle, and it was launching another one?

Thinking about that, Han Fei dashed to his boat and returned to the Emyrean Waterfall.

The Emyrean Waterfall was a place for the exiled, but it didn't mean that the people at the Emyrean Waterfall did nothing more than talking and bragging every day...

By the time Han Fei returned to the Emyrean Waterfall, he found that the place was already empty.

Big Yellow, however, was running back and forth in midair.

"Meow!"

Seeing Han Fei, Big Yellow said, "They went to Big Yellow to catch fish and left me here for you."

Han Fei was quite grave. Another full attack! Even the Emyrean Waterfall was empty. However, he sensed that Du Jiangliu was still around.

Du Jiangliu looked up at Han Fei. "I've made a breakthrough. I have to stay and defend this place. You take Big Yellow with you."

Han Fei nodded. "Big Yellow, to the boat."

Shua... Shua... Shua...

Boats were traveling in the sky, and everybody was returning to their positions. It meant that the sea demon's assault was so surprising that few people on the Scattered Stars Island had reacted in time.

On the east coastline.

Countless boats were landing to different places. Han Fei and Big Yellow, standing on the boat, were both dazed.

"Big Yellow, do you know where we should go?"

Big Yellow replied casually, "It doesn't matter! We can catch fish anywhere we want."

Han Fei was stumped for a moment. "Can we do that?"

Big Yellow said lazily, "Of course! You can catch fish anywhere, but don't let me catch worms. I don't like worms, especially the squishy ones."

Han Fei couldn't help but ask, "Have you come here before?"

Big Yellow tilted its head and said, "Of course! I'm a great fish catcher! However, I don't need to intervene at all unless the people down below can't defeat their enemy."

Han Fei learned that Hidden Fishers and Law Enforcers were meant to deal with the sea demon experts.

That did make sense. The battles that involved Hidden Fishers were not limited to the shoreline at all.

Before Han Fei could think further, a boat had stopped next to Han Fei, and a rather charming woman looked at Han Fei and said solemnly, "I am Luo Yu from the Guild of Fishers. I need your assistance."

Chapter 877: Debut of the Phantom Glass Wings

Naturally, Han Fei didn't hesitate, as human beings were outnumbered by the sea demons.

Seeing that Han Fei was on board, Luo Yu simply controlled the boat to fly to the sea.

Han Fei closely followed her. As a Hidden Fisher, he was here to help with the battle, and he could fight anywhere.

After flying for about five hundred kilometers, Han Fei saw an overwhelming number of boats in the sky, and countless Hanging Fishers were working together to hunt the powerful creatures.

He also saw at least fifty Hidden Fishers who flapped their wings and flew in the sky.

Some were fighting the sea demons that glided to the sky, some were fighting on the surface of the sea, and some were fighting with their fishing poles as other people.

Because the sea demons had sent so many creatures to battle, they could easily hit their target. Even if they missed the target, they would still hit the creature behind it.

It was the first time that Han Fei had witnessed the Guild of Fishers' way of fighting. Those people were all using their fishing poles as weapons.

Han Fei saw that a Scorching Fire Fish was caught and cut in halves. He also saw that dozens of long swords were attached to someone's fishing hook and cutting the sea crazily. He also saw that someone was darting their hook like a sword and killing a creature with every attack.

Han Fei was quite surprised at their way of fighting.

He followed Luo Yu to the front line. Luo Yu didn't have time to talk to him. She simply recalled the boat, unfolded her wings, and slew a sea demon in the sky.

In terms of numbers, the sea demons had more experts than human beings did, by a margin of forty. Some humans were fighting two or even three enemies at the same time.

Also, Han Fei occasionally saw other top Half-Merman experts flying close from far away.

Han Fei looked at Big Yellow. "Big Yellow, can you do without wings?"

“Meow!”

Big Yellow said proudly with its head held high, “I have an awesome flying technique, but I can’t take any action just yet.”

Han Fei knew that Big Yellow was as powerful as a Law Enforcer, and all the people fighting here were the level of Hidden Fishers. The enemies must have Law Enforcer experts who observed the battle too.

Han Fei scanned with his senses and detected a Half-Merman fifty kilometers away, who wore a golden battle suit and held a golden harpoon. He didn’t do anything but simply watched.

Seeing that Han Fei was still on the boat, someone shouted, “Bro, come down here and help!”

Han Fei said to Big Yellow, “Then I’ll recall the boat. You can fly on your own.”

“Meow!”

Han Fei recalled the boat and quickly unfolded his Phantom Glass Wings.

The moment the Phantom Glass Wings unfolded, everybody who was fighting at the heights, including the sea demons, were quite shocked. Who was this guy? Why were his wings so weird?

“Han Fei?”

“The Phantom Glass Wings?”

“Hey! He’s a tough guy!”

Behind Han Fei, the Hanging Fishers who were killing enemies by fishing all exclaimed.

“He’s a bigshot!”

“He’s a tough guy!”

“I didn’t expect that such a brutal man would help the Guild of Fishers.”

Luo Yu was surprised too. She didn’t expect that the person that she invited for help at random would turn out to be Han Fei.

Without a word, the moment Han Fei showed the Phantom Glass Wings, three sea demons already came for him.

Han Fei detected two beginner sea demons and one mid-level sea demon. None used a golden harpoon, which suggested that they were no Heavenly Talents.

At that moment, Han Fei grinned. “Only three? Do you have no respect for me at all?”

Shua!

In the sky, Han Fei moved like a streak of light. When he was several dozen meters from the enemy, an enormous scorpion phantom and a water statue punched him.

Shua!

Han Fei disappeared and emerged behind one of the Half-Mermen, leaving a glow behind him in the air.

Pu...

After only one attack, the sea demon was cut into pieces by Han Fei.

|

Han Fei blinked in the void so fast that, even though the mid-level sea demon blocked Han Fei's three attacks, the other Half-Merman was cut into pieces by Han Fei with one attack too.

"Hehe!"

The last Half-Merman roared, "This man is ferocious! Come and help!"

Han Fei could understand the sea demons' language. He sneered. *Do you think anybody can help you? Do you have no respect for the Phantom Glass Wings?*

Shua! Shua!

Two wind blades were slashed out, and the Half-Mermaid blinked again. At the same time, the Void Lines caught the Half-Merman precisely.

The Half-Merman felt a life crisis in every direction. He had no idea where to run.

"Blood Escape!"

"Escape my ass!"

Before the Half-Merman could escape, he had been tied up by the Void Lines.

"Puchi!"

Han Fei slashed and executed him.

Not that Han Fei didn't want to control the Half-Merman, but he couldn't reveal his trump card just yet. If the Half-Merman fell under his control so quickly, it would raise a lot of people's attention.

Han Fei grinned. "No Immortal Seals and no Dying Strikes? I can kill as many people like him as there are!"

Han Fei was saying that for the Sea Spirit sea demon far away to hear, as he was quite confident of his progress and eager to fight a real expert.

In only three seconds, three sea demon experts had perished, which shocked Luo Yu and other people.

Someone laughed. "As expected of the genius who has acquired the Wind God Pearl after sixty years. Smelly fish, you think you can conquer the Scattered Stars Island? In your dreams!"

Luo Yu quickly said, "Stay focused! Don't be distracted!"

The people on the boats were so excited to see Han Fei brutalizing the sea demons that they almost wished that they could fight alongside Han Fei.

Someone roared, "Let's work harder! The more enemies we kill, the easier the battles behind us will be."

Han Fei had killed three enemies in one clash, so he naturally attracted the sea demons' attention. Two of them came again.

Both of them were quite extraordinary. One of them was a high-level sea demon, and the other was a peak-level one.

Also, both of them wore golden armor and carried Semi-Divine weapons, which meant that they had Immortal Seals and Dying Strikes.

But so what?

Han Fei put on the Feather Suit of Wind.

Without using the Overlord's Technique, Han Fei collided with the high-level sea demon purely with his physical strength.

Clang~~~

The noise spread out, and Han Fei was knocked hundreds of meters back. He felt that his arms were sore.

The strength gap between me as a junior and the high-level demon is truly huge. Also, the guy didn't use the Sea King's Secret Technique at all.

Han Fei estimated that the high-level sea demon had a force a million kilograms higher than his own, which wasn't too big. It was just an indirect proof that he had greater potential than his enemies did.

The peak-level sea demon sniffed and stabbed his harpoon through the void.

"The Air Breaking Strike?"

Han Fei blinked away. Even his remaining shadow in the sky was smart enough to dodge the attack.

Shua! Shua!

Zila... Clang, clang...

After two flashes, Han Fei left two saber auras in the sky and launched them to the sea demon.

Han Fei's pupils contracted. He didn't have much advantage when his Semi-Divine weapon crashed with another Semi-Divine weapon. However, Han Fei was so fast and the Blood-Drinking Knife was so sharp that he left two wounds on his enemy.

"Humph! You're too weak to kill me. You're asking to be killed, human!"

Shua! Shua!

Han Fei moved unpredictably, making it impossible for the enemies to locate him.

The sea demon pointed the harpoon at the sky, and a round pillar of water rose around him. Han Fei happened to flash into the pillar of water.

"Hey! You're smart enough to know that I'm approaching you!"

Behind him, Luo Yu blocked the other enemy and roared, "Careful! I'm here to help you!"

However, Han Fei wasn't affected at all in the pillar of water. The Feather Suit of Wind could even block the Desolation Gales and Desolation Water. It could certainly weather through this.

Han Fei turned his hand upside down and imposed gravity. Then, the sea demon fell straight to the sea, before the Void Lines caught up to him.

When ten Void Lines were activated, an assortment of pictures popped up in Han Fei's head. Some were from the Ten Thousand Demon Valley, and some were battles against humans.

However, Han Fei had no time for that. He waved his hands and unleashed an immense power from the sky, knocking down the high-level sea demon who was stabbing a harpoon at him.

"My technique can move a mountain and astound the soul. Let's see if you can take it!"

BAM!

The sea demon was knocked down by Han Fei. Then, Han Fei performed the Draw Technique and cut off half of the sea demon's head.

Shua!

After another flash, Han Fei caught up to the other sea demon and stabbed him in the neck.

Luo Yu, who had just rushed close, was astounded by what she saw.

Han Fei was in a disadvantageous position a moment earlier. How did he kill two experts in the blink of an eye?

The enemies weren't beginner sea demons, but a high-level one and a peak-level one!

Han Fei was stunned for a moment, as he remembered that the sea demon captain didn't use his Immortal Seal! So, a terrifying force emerged from him and smashed Han Fei.

Shua! Shua! Shua!

Han Fei flashed quickly with the Phantom Glass Wings and pulled Luo Yu away, and the Dying Strike missed Han Fei.

On the other hand, Han Fei had approached the high-level sea demon who walked out of the void.

"Humph!"

Exactly at this moment, Han Fei felt a strong pressure. He didn't think and simply activated the Overlord's Technique.

Ignoring the Sea Spirit expert, Han Fei laid his hand on the chest of the high-level sea demon and slit his throat with the Blood-Drinking Knife.

Then, Han Fei flashed and appeared a hundred meters away.

The humans and the sea demons alike were astounded by the battle.

Luo Yu's eyes bulged. "The Phantom Glass Wings are truly awesome!"

Chapter 878: Clash With Sea Spirits

Han Fei quickly flew back.

Five of his identical images, caused by the flash effect of the Phantom Glass Wings, lingered in the sky. However, under Han Fei's control, those clones vanished one after another, as if they were simple blurry shadows.

In fact, they were not. Han Fei was only playing a trick. He didn't want to inform other people that the blurry shadows could launch attacks.

"Meow!"

Big Yellow had been observing the battle, and wasn't surprised at Han Fei's ferocity at all.

Was there anyone at the Emyrean Waterfall who was not ferocious? Even though Han Fei was a newcomer, the fact that he was relocated to the Emyrean Waterfall suggested lots of things.

Big Yellow even thought that Han Fei could deal another couple of enemies at the same time. That was its impression on the capabilities of the guys at the Emyrean Waterfall.

However, Luo Yu and the other people felt differently. They found that Han Fei was not just strong, but even monstrous.

A junior Hidden Fisher had killed three sea demon experts in one clash!

Then, he flashed and killed a peak-level sea demon captain as well as a high-level sea demon Heavenly Talent.

How long had it been?

The battle had only just begun, and he was already on a killing spree?

Luo Yu and the others didn't know Han Fei's cost. If Han Fei told them that he hadn't used twenty percent of his energy before he used the Overlord's Technique, they probably would be scared to death.

"Meow!"

Big Yellow quickly grew into a super cat dozens of meters long. It glared at the Sea Spirit far away and declared brutally, "Hey, you fish over there, come and let me taste you."

Han Fei rolled his eyes. "Hey, Big Yellow, don't be rash! That's a Sea Spirit sea demon! Can you defeat it or not? If anything happens to you, it will be hard for me to survive Mrs. Yin's beating."

"Meow!"

A meow echoed in a range of dozens of kilometers, and Big Yellow said in despair, "I'm an awesome cat! That fish is strong, but he's no match for me."

A Hidden Fisher was appalled. "Is this creature a Law Enforcer?"

Someone rolled their eyes at him. "Of course. You don't know Mrs. Yin's cat? It once tore apart many Sea Spirits."

When the big cat emerged, the Sea Spirit put on an awful expression, as Han Fei was moving at a high speed again.

Pu... Pu... Pu...

In the blink of an eye, another three sea demons were slashed by Han Fei.

Someone said, "Thanks, Brother Han."

Han Fei, who had been well-acknowledged as a top Heavenly Talent, could easily kill any sea demon of his level. As a result, his enemies were all retreating.

"Don't back off! Kill him!"

A roar came from the void, and another Sea Spirit was rushing close.

Han Fei narrowed his eyes and stood still, before he put a few spiritual fruits into his mouth.

He looked at Luo Yu. "Why are there so many Sea Spirits on this battlefield? We have a long coastline. Why are they all gathering here?"

Luo Yu's expression changed greatly. "I'm not sure. The east coastline is the usual battlefield. Don't worry. I've sent alarms. The Law Enforcers are coming."

Han Fei narrowed his eyes. "If I hadn't come, you wouldn't have had any Law Enforcers with you, right?"

Waving her fishing pole like a sword and cutting off the elbow of a sea demon, Luo Yu finally responded, "Yes. Some Law Enforcers passed by, but they left after seeing Mrs. Yin's cat."

Han Fei snorted and looked at the Sea Spirit that was only several dozen kilometers from him. He swallowed and shouted at Big Yellow, "What's his level?"

Big Yellow meowed and dashed thousands of meters forward. "Beginner! I don't think I can defeat two fish! Han Fei, come here and help me. We each will take care of one of them."

Luo Yu said quickly, "Wait, the Sea Spirits are all equal to Law Enforcers!"

Han Fei ignored Luo Yu. He was quite excited at this moment, and he landed on the surface of the sea from the sky, with a thousand weird water blades emerging around him.

"Chila!"

Han Fei rushed forward on the surface of the sea, and the Infinity Water crushed all the enemies in his way into pieces.

The Sea Spirit bare his fangs and glared. "You dare to fight me as a human Hidden Fisher?"

"Hula!"

The Phantom Glass Wings were flapped, launching two wind blades.

The wind blades grew bigger on the way and became dozens of meters long. All the sea creatures in their way hurriedly fled.

Luo Yu was lost for words, as the guy was truly a maniac. *You are just a junior Hidden Fisher. Even if you are a Heavenly Talent, there's no need to challenge a Sea Spirit, right?*

Luo Yu said telepathically, *Ten seconds! Law Enforcers are coming in ten seconds!*

Luo Yu's thought was that Big Yellow could take care of one of the Sea Spirits and she and Han Fei could hold the other for ten seconds. Little did she expect Han Fei to charge forth.

Han Fei grinned. "Got it."

Hum!

Han Fei accelerated again and activated the Agility of Wind, moving no slower than the Sea Spirit on his opposite side.

The splashing water caused by the wind under Han Fei's feet went hundreds of meters away.

"Draw!"

Faced with a Sea Spirit, Han Fei did not dare to underestimate the enemy at all.

The Sea Spirits were as strong as the Law Enforcers. If the Law Enforcers mastered laws, there was no reason why the Sea Spirits couldn't...

However, Han Fei wasn't worried, as different Law Enforcers mastered different laws.

Jiuyin Ling's seal was indeed tricky. However, he could resolve Du Jiangliu's Twisted Domain even though it was immune to physical attacks.

The Law Enforcer suddenly took out a harpoon. Han Fei knew it wasn't good the moment he saw the harpoon, as it was a Divine weapon rather than a Semi-Divine one.

The Draw Technique was launched at the Sea Spirit, who pointed at the weapon with a terrifying force that was mixed in a ferocious tide.

Pu... Pu... Pu...

However, to the Sea Spirit's astonishment, the tide was cut apart by the blade, which pressed on without being stopped at all.

"Huh?"

"Sea God's Strike!"

Crack... Bam...

The surface of the sea dented in a 300-meter radius. Han Fei and the enemy were both flung a thousand meters back.

"Cough..."

Han Fei vomited blood. The enemy was stronger than he expected.

“Just as I thought, the Sea Spirits who know how to fight and those who don’t are vastly different.”

He had caught a Wind Sky Wing and fought a Clam Girl before. But one of them was a coward and the other could only launch mental attacks.

In this battle, even though he was using his full strength, he was the one who got injured first.

Little did he know that his enemy was much more shocked than Han Fei was.

How is it possible? How can a Hidden Fisher be so strong even if he uses a secret technique? Huh? What are his wings?

In the rear, Luo Yu and the others were all shocked. Could Han Fei really win against a Sea Spirit?

Someone fended off a sea demon and exclaimed, “That’s too unbelievable! Is he really so strong?”

As for the Hanging Fishers, their senses weren’t keen enough for them to see the fast battle. However, the rising air and tides dozens of kilometers away informed them how horrifying the battle was!

In particular, the big cat’s talons were already red. It was hard to be ignored.

“That fish over there, behold my Soul Swallowing Technique!”

The cat opened its mouth and swallowed the enemy’s soul. If the Sea Spirit weren’t protected by a Water Cage, he might have been swallowed by Big Yellow.

On Han Fei’s side, he was competing with the Sea Spirit in terms of speed. He could tell that the Sea Spirit intended to fight a melee battle against him.

“Damn! You want to approach me? This isn’t the time!”

“Approach...”

“Hula!”

When he launched the Sacrificing Punch, Han Fei quickly flashed in the sky and put a mouthful of Candle Dragon Blood into his mouth.

He had a bad feeling, as there wasn’t much Candle Dragon Blood left after he killed the Clam Girl. It would run out if he had another mouthful of it.

The Sacrificing Punch could automatically lock onto the target, making the Sea Spirit quite shocked.

“This can’t be the power of a Hidden Fisher! But so what? Tide body!”

Hualala...

A giant tide rose from the surface of the sea.

Han Fei’s eyes glittered. He knew that his enemy was dead for sure.

Wait! That’s the law he has mastered! He has turned into water... However, unlike the normal water transformation, this tide is exactly his body. But is the tide immune to the Sacrificing Punch?

Boom!

The terrifying force of two waves left a hole thirty meters in diameter on the tide. Then, the Sacrificing Punch didn't stop there but raised high tides on the sea.

However, the giant tide didn't turn back into the Sea Spirit. Instead, it transformed into countless chains that darted towards Han Fei.

"Damn it! The Law Enforcers are really tricky!"

SWISH!

Han Fei kept flashing in the sky. At the same time, he launched his Cosmic Sword and cut a few times.

However, probably because the Cosmic Sword hadn't acknowledged him yet, it wasn't exactly destructive even though it was quite hard.

"You've turned into water? Hehe... Would you like some poison?"

In the next moment, the Infinity Water was transformed into water and swept out, and ten kilograms of Poison God dissolved in the tide.

Hulala...

The Sea Spirit was gathered in the water and retreated quickly. At the same time, the water chains kept hunting Han Fei.

Han Fei grinned. *It seems that you're not a great Law Enforcer either. Water transformation? Hehe... How did the Poison God taste?*

Chapter 879: Nine Undersea Chimneys

Han Fei retreated and put spiritual fruits into his mouth.

The Sea Spirit was indeed strong. Even though Han Fei was as strong as him with the Overlord's Technique, it was not his own power and the battle was much more exhausting to him.

Also, his Sacrificing Punch had only mildly hurt the enemy.

He could tell that because he felt that the enemy's heartbeat was fast and unstable.

Han Fei roared, "Big Yellow, how is it going? I can't hold him for long."

Big Yellow meowed and said, "Hasn't the battle just begun?"

Han Fei became gloomy. *It has just begun? I've used half of my ultimate tricks, and there's no telling if my Law of Gravity works on this guy.*

If he were to finish the rest of the Candle Dragon Blood, he thought that he could manage to fight for a while longer.

Immediately, Han Fei grinned and said, "Go back to where you came! When human experts come later, you won't be able to escape."

The Sea Spirit sneered and pushed a ball of water out.

Han Fei's pupils contracted. "Poison God?"

The enemy sneered. "You should've attacked me. If you had, I wouldn't have had a chance to push the poison out, and you could wait for your reinforcements to arrive. However, what can you do right now if I'm going to take down these people?"

While talking, he charged at the human army.

Han Fei's expression quickly changed. If the guy went over, no humans could resist him, and the defensive line would collapse in a few seconds. In that case, even if any Law Enforcers did come, the guy could still march to the rear of the defensive line, which would collapse as long as he survived a few seconds.

BAM!

Han Fei stood on the surface of the sea in the guy's way, before he sneered. "Fine, didn't you want to find a melee battle with me? I'm right here. Come and fight me."

In the rear, Luo Yu and the others all changed their expressions.

She didn't even have a chance to send a telepathic message, because all the sea demons were trying to break through the defensive line with the help of the two Sea Spirits.

The humans were outnumbered in the first place, and they were losing the battle.

"Explode!"

Someone detonated himself and perished with two sea demons. He didn't have a choice. After all, the sea demons were attacking vehemently, and he was already exhausted.

"Son of a bi*ch, you think you can break through the human's defensive line? Blood Boiling..."

Hum...

After the first person ignited his blood, dozens of other humans followed his example and increased their strength.

BAM!

Another person detonated himself, pushing the battle to the most heated phase.

Han Fei secretly cursed. He had no time to bother with anything else except the Sea Spirit. He watched the enemy turn into a tide a thousand meters away, while he unleashed the Infinity Water as thousands of blades.

Five hundred meters...

Three hundred meters...

Luo Yu roared, "Han Fei, retreat right now!"

Han Fei turned a deaf ear to her, and black and white light surfaced in his eyes.

He also put a peppermint into his mouth.

A hundred meters...

Han Fei extended his hand. "You think you're the only one who has a tide? Nine Mansions..."

Hooooooooo...

The dragon roar echoed, and the Nine Mansions Dragon Seal arrived with a tide. The terrifying power that Han Fei launched covered a radius of a hundred meters.

Hum...

The surface of the sea was shivering. The Sea Spirit didn't expect this to happen at all, as the Law of Gravity wasn't an ability that a Hidden Fisher should be able to grasp.

However, during that moment, a force equaling two waves came from the void and unbalanced the tide he transformed into.

The moment the gravity field appeared, ten Void Lines were split up into thirty and caught the enemy.

Han Fei unfolded the fish skins in his hands, and the light was so dazzling that nobody could open their eyes in a thousand meters.

The other array completely blocked everybody's senses in the same range.

At that moment, dozens of Han Fei's clones appeared in the light, and he was holding Snowmourne.

With the Yin-Yang Divine Eyes, Han Fei saw a quickly spinning heart.

The Sea Spirit was frightened. "This is the power of laws, and a way to control the soul? Who are you exactly?"

Han Fei grinned and put on a creepy smile. "Gotcha."

Pu!

He flashed and shattered a water ball that nobody else could have recognized in the tide.

The water ball was exactly the heart of the Sea Spirit.

"Cough, cough!"

On his shoulder, the two giant eyeballs from his spiritual beast were angry. "I'm hurt every time I come out."

Han Fei grinned. "That can't be helped. You're too strong. I certainly have to count on you in these critical moments!"

When he stabbed Snowmourne, he was also hit by the tide. He would've been heavily wounded if he didn't have a tough body, the Divine battle suit, and Little Fatty's help.

Little Fatty had lost yet another three tentacles. It would have to rest for a while.

It occurred to Han Fei that Little Fatty and his other beasts couldn't keep up with his level anymore. The enemies that he encountered were irresistible to Little Fatty.

Damn it, no wonder they say Heart Nurturing is necessary. It's more about nurturing the contractual spiritual beasts, right?

Boom!

The arrays were broken, and someone emerged hundreds of meters above Han Fei, shocked by what he saw.

Han Fei was standing on the surface of the sea and stuffing spiritual fruits into his mouth. His body was bent and he was breathing heavily.

On Han Fei's opposite side, the dead body of the Sea Spirit was floating on the sea, with a giant hole on his chest.

The newcomer took a deep breath. "Have you killed a Sea Spirit?"

Many people heard his question.

The humans all roared and fought hard, and the sea demons began to flee in whatever ways possible.

The Law Enforcer snorted. "You want to run? Do you really think you can?"

He flashed and chased after the sea demons. Who could've thought that Han Fei would kill a Sea Spirit in ten seconds?

"Meow! That fish over there, don't run! I'm going to eat you! Huh, do you want this fish?"

Han Fei coughed and said, "No, but I'll take his battle suit and weapons."

Big Yellow wagged its tail and walked on the sea. "I don't want the iron garbage at all."

Han Fei slowly retreated the Void Lines and took some of the pure soul back. It was a tiny amount, but better than nothing. He wouldn't eat the fish, but he wouldn't refuse some of the soul.

But in the next moment, Han Fei saw that Big Yellow opened its mouth and swallowed the whole soul.

Baji! Baji!

Han Fei was lost for words. As expected of a Soul Swallowing Cat! It had swallowed the soul of a Sea Spirit so easily...

In comparison, the tiny bit of soul that he absorbed with the Void Lines wasn't worth mentioning.

He looked at his own stats.

<Owner> Han Fei

<Level> 52 (Junior Hidden Fisher)

<Spiritual Energy>: 4,325,681 (25,508)

<Spiritual Power> 3,499/3,499

<Perception Range> 31,999 Meters

<Spiritual Heritage> Level-Seven, Low-Quality

<Spiritual Beast> Twin Yin-Yang Spirit Swallowing Fish (level-46)

<Main Art> Divine Manipulation Technique, Volume Five of Void Fishing (Heaven-Level, Divine-Quality)

...

Han Fei realized why he failed to absorb much of the soul. It seemed that he had reached a bottleneck.

But he wasn't too bothered, as the Void Fishing Art was already incredible enough. If he could kill a few more Sea Spirits, wouldn't his soul power rise quickly?

A moment later, all the sea demons that could escape had escaped. Those which failed to escape were slain by the Law Enforcer.

Half of them luckily survived. After all, it was impossible for a single Law Enforcer to surround all the sea demons and kill them.

Once the sea demons dispersed, the creatures that they drove lost control and fled too.

Han Fei had a few spiritual fruits and flew in the sky. Then, a Law Enforcer came close slowly. "Han Fei?"

Han Fei nodded.

The man smiled. "Nobody could've thought that you were able to kill a Sea Spirit! I am Ye Xingchen, one of the three leaders of the Guild of Fishers. You will be rewarded for your contribution."

Han Fei grinned. "I hope so. I used something very precious in this battle. It wasn't easy for me to make the decision..."

Ye Xingchen understood him perfectly.

That was natural. It was certainly impossible for a Junior Hidden Fisher to kill a Sea Spirit without something to help, unless one of them was crazy.

Nevertheless, he would not underestimate Han Fei, as not every Hidden Fisher could kill a Sea Spirit even if they had something to help them. They probably would've been killed instantly.

Ye Xingchen said, "You'll receive a lot of rewards. You'll get ten million credit points for killing a Sea Spirit, as well as his battle suit and weapons. Unfortunately, he probably didn't carry many good items to battle. Whatever he has is yours."

Han Fei smiled. "Senior, what happened here exactly? Why did the sea demons attack suddenly?"

Without keeping it a secret, Ye Xingchen explained casually, "Human beings and sea demons found a place of relics at the same time. When they explored the relics, something happened and the relics collapsed, revealing seven Undersea Chimneys. Another one will probably emerge in the southeast. On the east coastline, two Undersea Chimneys have already popped up, but considering the signs, a third one may show up anytime."

“Seven plus two... Nine?”

Han Fei gasped up. *Are Undersea Chimneys so ordinary? So many of them had appeared at one time?*

Han Fei remarked in surprise, “This is huge!”

Ye Xingchen grinned. “You don’t say. There’s no telling how the Pioneer Group did that.”

“The Pioneer Group did it?”

Ye Xingchen nodded. “Okay. No enemies will probably come to this part of the sea. Another Law Enforcer is on his way. I have other things to do. Until next time.”

Chapter 880: If You Don’t Take Now, There’ll Be Nothing Left

“The Pioneer Group? Is Sister Qin related to this?”

After Ye Xingchen left, Han Fei searched the Sea Spirit’s body and found a Sea Swallowing Seashell. Then, he discovered more than thirty thousand kilograms of Spirit Awakening Fluid in it.

He was quite shocked. Didn’t they say that nobody went to battle with good stuff? Why did this one carry some?

More than thirty thousand kilograms! To be more exact, Han Fei believed there had to be around thirty-five thousand.

He must’ve looted it recently before he came to battle. He didn’t expect that he would be killed here, but looks like I’m the one who gets it in the end!

Han Fei almost couldn’t stop himself from smiling. He had truly become rich. With the thirty-five thousand kilograms of Spirit Awakening Fluid, he could become an intermediate Hidden Fisher.

Big Yellow turned into a little cat again and looked at Han Fei curiously. “Why are you so happy?”

Han Fei instantly dropped his smile and looked at Big Yellow as well as Luo Yu who was going to take the body of the Sea Spirit away. He looked up at the sky and said casually, “Big Yellow, it’s not easy for human beings to survive in this chaotic world that’s savaged by sea demons. Difficulties and hardships are what we must live with...”

Luo Yu was stunned. Why was Han Fei suddenly being sentimental?

Also, the life of human beings wasn’t really that hard, was it?

Then, Han Fei suddenly became solemn. “As part of humankind, I’m grieved to see all this. I can’t sleep in peace unless the ferocious sea demons are annihilated!”

The people who listened to Han Fei’s speech were all touched.

Someone remarked, “It seems that Han Fei isn’t as bad as he’s said to be. He’s a good guy!”

Someone nodded. “Yes! The Dark Hunter Legion must’ve been smearing him. They’re horrible!”

Someone said, “Is that the devotion of a top-level expert?”

Someone was excited. "He's a role model to all of us!"

Suddenly, Han Fei flapped his wings and looked at Big Yellow. "Big Yellow, battles are going on in the front line. I can't sit by. As a cat, you should enjoy your life and have as many fish as possible. You shouldn't come with me."

Luo Yu was moved. "Han Fei, the battles ahead are too dangerous for us..."

The more she talked, the lower her voice became, as she realized that Han Fei had already killed a Sea Spirit.

Han Fei looked back at Luo Yu. "I'm always ready to sacrifice myself. You and Big Yellow can stay and hold this defensive line. I'm willing to risk my life."

As he talked, he dashed to the sky and summoned the Wind God Boat, moving straight ahead.

Han Fei secretly chuckled. *Are you kidding me? Two Undersea Chimneys have already appeared, and a third one is coming. Who can refuse that?*

If he could kill one Sea Spirit, he probably could kill another one, as long as the enemy had enough Spirit Awakening Fluid with him...

But of course, his most important task was to look for the third Undersea Chimney that hadn't shown up yet.

Beating the Sea Spirits wasn't nearly as important as that. As a Hidden Fisher, he would rather not confront them if he had a chance.

In the rear.

Big Yellow squatted on the surface of the sea and looked at where Han Fei went. "What was he talking about? I wasn't going to follow him!"

Luo Yu said solemnly, "Han Fei is a respectable man."

...

After flying for three thousand kilometers, Han Fei saw nothing except the sea creatures that were swimming to the Scattered Stars Island. There was no sign of the two Undersea Chimneys that had already shown up.

Immediately, Han Fei dove into the water and summoned Little White and Little Black.

Little Black went on a rampage against the sea creatures around, as it was hungry.

Han Fei, on the other hand, petted Little White. "Daughter, can you find a lot of Spirit Awakening Fluid? Like, really a lot. I won't take it if it's too little..."

Little White wandered around and didn't seem to find any target.

Seeing that, Han Fei said, "Daughter, don't worry. I'll take you two thousand kilometers ahead."

A moment later...

In the water.

Han Fei asked, "How is it going? Did you find anything?"

Little White circled for a while and then wavered, looking left and right in turns.

"No need to rush. We'll go another two thousand kilometers forward."

This time, Little White finally confirmed something. Although it occasionally looked left, it looked to the right most of the time.

Han Fei instantly understood that there was probably a lot of Spirit Awakening Fluid on either side.

He couldn't help but ask, "Little White, which side has the stench of battles and blood?"

This time, Little White looked at the left side without hesitation.

"Got it."

Han Fei grinned. It meant that a huge battle was probably going on at the Undersea Chimney on the left side.

Immediately, Han Fei boarded on a boat and moved to the right side with Little White.

He didn't want to get involved in the fight. He would rather wait for the new Undersea Chimney to appear and then secretly fetch all the Spirit Awakening Fluid.

In any case, someone had to get the Spirit Awakening Fluid. It would be better for him to take it than to let it go to sea demons.

After rushing for almost five thousand kilometers, Han Fei didn't see any sea demon experts around.

He estimated that the new Undersea Chimney probably hadn't emerged yet. When it emerged, it would probably cause noises that would attract experts.

At the bottom of the sea, Han Fei asked, "Daughter, how far away is it? Are there sea demons around?"

Little White moved its body, which made Han Fei frown, as that was an implication of yes.

However, Little White was already focused on one direction. Since they had already traveled ten thousand kilometers, Han Fei believed that he would arrive at the destination in another ten thousand kilometers at most.

If there were sea demons around, he could always circumvent them. Could they find the location faster than Little White?

An hour later, Han Fei returned to the old route after taking a turn.

In the water.

"Daughter, how far away is it? Is it longer than the distance we've already traveled?"

This time, Han Fei saw Little White wagging its tail. Also, he heard a vague voice in his head that seemed to be trying to tell him something.

Unfortunately, the voice was too vague for Han Fei to hear.

However, Han Fei did confirm that the new Undersea Chimney must be within five thousand kilometers.

After two thousand kilometers, Han Fei was no longer flying in the sky, because he found that many creatures were gathering at one location.

Damn it, I can't let those sea creatures beat me to it.

Han Fei invoked the Phantom Glass Wings and moved at a high speed.

The Infinity Water was turned into a giant sword and enshrouded Han Fei.

Han Fei held Little White and Little Black in his arms. All the aggressive creatures in his way were too scared of the Infinity Water to approach him.

There were a few powerful exotic creatures that attempted to attack Han Fei.

"If you stand in my way of seeking fortune, I'll just kill you."

A shark was torn apart by Han Fei and collected in Forge the Universe for cooking later.

However, Han Fei found that more and more creatures were gathering. There weren't just fish and lobsters, but also worms, snakes and even plants.

Damn it! I will not share! The Undersea Chimney is mine!

After rushing for hundreds of kilometers, Han Fei discovered that several Red Demons and Half-Mermen were fighting.

I'm screwed, the location is exposed. The Undersea Chimney is exposed!

The sea demons stopped when they saw Han Fei. Their first thought was not to kill him but to escape.

"You want to inform the others? Not a chance!"

Han Fei activated the Overlord's Technique and rushed forward like a ray of light.

He killed seven Red Demons and three Half-Mermen in only a hundred seconds.

One of the Half-Mermen seemed rather strong and tried to use Blood Escape.

However, Han Fei simply shot the eighth arrow of the War Soul Art with the Wandering Dragon Bow and blew it up.

"Heh! What are you thinking? You think I'll let you walk away?"

After taking care of the sea demon, Han Fei reached his destination three hundred kilometers later. He found that an Undersea Chimney was rising at a visible speed.

Han Fei said to Little White, "Daughter, keep an eye out for me. If anything here is as dangerous as Big Yellow, bite me."

Chomp!

Han Fei: “???”

Han Fei was stunned. “Where is the danger? How far away is it?”

Then, Little White looked at the rising hill.

Han Fei was surprised. “There are dangers inside the Undersea Chimney?”

Immediately, Han Fei made up his mind. Even if there were dangers, so what? Could he let go of the Undersea Chimney because of the dangers?

Certainly not. He would never refuse the meat being fed to his mouth.

Han Fei instantly locked down the area in a three-meter radius with the Infinity Water. Whoever trespassed would die.

“Nine-Tailed Mantis Shrimp, get up and work! Dig into the hill!”

Han Fei didn’t know if digging would work. However, he sensed that dozens of creatures were digging twenty meters down the hill. So, he might follow them until the method proved ineffective.

The Nine-Tailed Mantis Shrimp was smart enough to crawl into a lobster cave and tied up the lobster.

That lobster was only level-49. Even though it was exotic, it couldn’t resist the Nine-Tailed Mantis Shrimp’s Void Chains!

Also, Han Fei closely followed it and condensed the Infinity Water into a huge drill.

Han Fei was smart enough to use the Infinity Water as a driller. He dug into the hill crazily.

He was going to dig to the center of the rising hill, when he had a sense of crisis.

He had a feeling that a terrifying danger would happen if he dug further.

Immediately, Han Fei triggered a thought and controlled the Infinity Water to dig in another way.

He also deployed the Overlord, split some of his soul, and installed an ultra-quality demonic stone in the Overlord.

He intended to go inside together with the Overlord.

Nobody could get treasures without taking risks. He had a lot of ways to protect himself. The Law of Gravity alone could keep many Sea Spirits occupied for a long time.

Suddenly, Little White bit him again.

Han Fei didn’t know what to say. “Daughter, is it more dangerous inside, or is it outside?”

As it turned out, Little White looked towards the outside.

Han Fei instantly took a deep breath, knowing that someone must’ve come. He had to loot the Undersea Chimney before it was too late.
