

GOF 971

Chapter 971: The Scattered Stars Fourth Unit – Blown Up

Han Fei was residing in the Scattered Stars Fourth Unit.

For the past three days, he devoted himself to discussing and researching refining with Guan Qingyan.

Bei Huo and others were very surprised to know it, exclaiming privately this was really not like something Han Fei would do.

At this moment, in the refining room...

Guan Qingyan had figured out a lot of things about refining in the past few days and had already taken Han Fei as a confidant. At this moment, he was sorting out the design of the refining platform.

However, in terms of a name, Han Fei called it a “refining furnace” so as to distinguish it from the sea demon’s Refining Divine Platform. Otherwise, someone might doubt his identity.

At this moment, Han Fei had stopped studying refining with Guan Qingyan because he found that the biggest problem was the array combinations.

Although he had already made clear the effects of the array combinations he wanted, it was extremely difficult to achieve them!

In his opinion, Old Jiang was the best array master on the Scattered Stars Island.

But Old Jiang had left, so he decided to solve this problem himself.

Therefore, he resumed his study of the Ocean Book, which he had put on hold.

Among the arrays, the most commonly used were killing arrays, defensive arrays, and some auxiliary arrays, such as the Breath Concealing Array, Stealth Array, Spirit Gathering Array, and Sound Insulation Array.

In fact, arrays were created out of necessity. If you had a certain need, you would try to work out a corresponding array.

For example, when Han Fei was on the fourth floor of the Scattered Stars Prison, he drew a new array, which then caused an explosion. In fact, that could be regarded as an innovative array.

At this time...

Han Fei was sitting cross-legged, and in his mind, the lines in the Ocean Book were uncovered one by one.

He was just simulating arrays, so he would not receive any substantive attacks.

This was the power of the Demon Purification Pot.

Although he had only read the Ocean Book once, the Demon Purification Pot had completely memorized it. Besides, through these lines, each array could be recorded.

“Killing array? No, it’s not what I want.”

“A maze array. Um, this maze is interesting, but it has nothing to do with refining.”

“The extended array of the Spirit Gathering Array, which gathers the essence of water? Oh, this array is good. I can use it to quickly restore the Infinity Water in the future.”

After studying for a full two days, Han Fei had studied about one-tenth of the arrays in the Ocean Book, but it would still take him a lot of time to use them proficiently.

Practice makes perfect.

Otherwise, it would be like learning to write an extremely rarely-used Chinese character. Although he could write it, he couldn't write proficiently.

As soon as Han Fei opened his eyes, Guan Qingyan looked at him. “Brother Han, have you made any progress?”

Han Fei shook his head slightly. “No rush. We need to be thorough. I guess it will take another month.”

Guan Qingyan nodded. Of course it would take time. He had been studying it for a long time, and no one knew better than him how difficult it was.

Although the concept of the refining furnace was proposed by Han Fei, it didn't mean he could also easily make it.

Otherwise, he would have made a lot of refining furnaces long ago to earn money.

Han Fei stood up. “Old Guan! Let's take a rest. Would you like some fruit?”

Guan Qingyan shook his head.

Han Fei shrugged. *Scientists are so boring!*

He picked a pineapple, a few peaches, a few loquats, and a bunch of mulberries from Forge the Universe. At the same time, he got himself a cup of sea bamboo drink and started eating and drinking.

He had barely eaten a peach and a loquat when Mu Jia'er and Bei Huo came in.

Mu Jia'er shouted, “Wow, what are you eating? Why don't you share?”

Han Fei rolled his eyes. “I'm eating my own food, OK?”

With that said, Han Fei grabbed a peach and threw it to Bei Huo. The latter took it, took a bite, and raved about the delicious peach.

As for Mu Jia'er, she had already sat opposite Han Fei, picked up an orange loquat, and took a big bite.

She didn't doubt Han Fei's taste in food at all. In this regard, Han Fei was professional.

Among the people Mu Jia'er knew, Han Fei was the one who knew best about food.

Mu Jia'er mumbled with her mouth full, “What is this?”

Han Fei responded casually, “It's just a low-level spiritual fruit, but it tastes good. It has no practical effect.”

Bei Huo smiled and said, "Han Fei, how is your research?"

Han Fei spit out the peach pit in his mouth and picked up a bunch of mulberries. "Not bad! I should be able to make a prototype in a month."

Both Bei Huo and Guan Qingyan's eyes lit up. Even Mu Jia'er was looking at Han Fei in surprise.

"So quickly?"

Bei Huo was a little surprised. *Has Han Fei tackled all the technical problems?*

Guan Qingyan was also stunned for a long time, thinking, *Didn't you just say we shouldn't rush? Can you really make a prototype in a month?*

Little did Guan Qingyan know that Han Fei still hadn't a proper concept of the time in this world.

Han Fei didn't even realize that even a Hidden Fisher could live for hundreds of years.

Therefore, one month, in Han Fei's view, was already a long time.

Bei Huo immediately said, "Great! No one will disturb you during this time. Jia'er, you'd better stay and study."

"OK, I will!"

...

20 days later...

Han Fei finally finished reading the Ocean Book.

Only then did he know how significant the Ocean Book was! This was literally the essence of an entire era. It contained tens of thousands of arrays, and Han Fei felt that it would take at least 3 years before he could fully master this book!

And it might take 5 years or even longer to truly understand everything contained in the book.

But he had found more than 100 arrays from the Ocean Book to support himself in completing the research on the refining furnace.

On the 27th day, Han Fei started drawing arrays.

BAM!

The refining room exploded.

Han Fei, Guan Qingyan, and Mu Jia'er sat in the messy room, staring at each other, their faces covered in black ash.

Mu Jia'er screamed, "Ahhhh, why did it explode?"

Han Fei scratched his head and said, "Don't panic. There must be something wrong. It's not a big problem!"

This explosion didn't cause much attention because Bei Huo told everyone not to disturb them.

Half an hour later...

BAM!

One hour later...

BAM!

Bam! Bam! Bam!

“Ahhhhh!”

In the Scattered Stars Fourth Unity, a group of people was sitting morosely in the outermost hall, having drinks.

“Boss Bei Huo, we can’t just let them go on like this! Shall we ask them to stop?”

“Yeah, Boss Bei Huo, how can we refine weapons if they go on like this?”

“Have they started experimenting?”

“Aren’t they in too much of a hurry? Forget it, I’ll go back to my team first!”

Bei Huo took a deep look at the innermost refining room and said leisurely, “Everyone, go back to your teams for the time being. I will notify you if anything happens.”

Inside the refining room...

Guan Qingyan exclaimed, “Brother Han, we don’t understand your array drawings!”

Han Fei said, “Look at the expanded views.”

Mu Jia’er added, “That’s not right! Why is this Spirit Gathering Array used in this place?”

Han Fei said casually, “It must be used here. This is used to extract the spiritual energy inside the weapon.”

Guan Qingyan questioned, “Brother Han, what about this one? Why does it need a defensive array?”

Han Fei explained, “To avoid the long-term use of the refining furnace causing damage to it.”

Sticking his head in and listening for a while, Bei Huo was quite relieved. This was the true future of refining! He’d better not disturb them. He would use the time to visit an old friend.

More than 20 days had passed.

During this time, the Scattered Stars Fourth Unit exploded countless times. Fortunately, each part of it was well-protected. Otherwise, the other six units would have come over and smashed the Scattered Stars Fourth Unit.

On a new day, a fruit platter was placed in front of each of the three.

Guan Qingyan had got used to the regular bickering of Mu Jia’er and Han Fei and would join the debate from time to time.

Guan Qingyan and Mu Jia'er looked at Han Fei seriously.

Guan Qingyan asked, "Brother Han, are you really going to do it?"

Mu Jia'er was nervous. "What if it blows up again?"

Han Fei smiled. "Aren't you used to explosions yet?"

Mu Jia'er took a breath. "Wait a minute. Let me... Put on a battle suit first."

In the next moment, Mu Jia'er fully armed herself. She put on a helmet and even covered her eyes. From now on, she only used her perception.

Guan Qingyan also put on a battle suit, his face tense.

Han Fei took out a large amount of Semi-Divine materials and started refining them. This time, he was going to make the refining furnace himself.

This was not as simple as making an ultra-quality spiritual weapon, or a Semi-Divine weapon. This was a refining furnace composed of multiple parts and with more than 300 processes.

Pieces of parts were refined by Han Fei. Every 30 seconds, one was done on average! Guan Qingyan and Mu Jia'er were shocked by his refining speed. Of course, they were using their perceptions to see.

They couldn't believe how fast it was happening!

For six full hours, Han Fei didn't stop.

The hearts of Mu Jia'er and Guan Qingyan almost jumped out of their throats, because a large independent refining furnace was about to be assembled!

After a while, Mu Jia'er looked at the refining furnace in shock. "Is... Is it finished?"

Guan Qingyan took a deep breath and couldn't wait to say, "Brother Han, come on, try it out."

Han Fei had already grabbed a few ultra-quality materials and began to melt the spirits and quench the liquid.

Several minutes later, the materials were poured into the refining furnace, and Han Fei was about to refine a long knife.

The refining furnace began to operate, and the spiritual fire was steaming.

Han Fei shouted, "Spirit melting and liquid quenching are not a problem."

In the furnace, spirit refining was in progress, and Han Fei was paying close attention to every step and making notes.

50 seconds later, there was no problem.

The fusion began.

The initial fusion had no problem.

The fusion was complete.

The spiritual energy was drawn out.

The array brand was completed and no change occurred.

Hearing that the array brand was completed, Mu Jia'er jumped up. "Ahhhh... We've succeeded."

Han Fei continued, "The second micro-refining begins... Spiritual energy compression is completed... Spiritual energy..."

Suddenly, Han Fei's eyelids twitched. It was stuck on the last step, which was to draw the spiritual energy out of the finished product. The Semi-Divine weapon began to shake...

Han Fei suddenly felt a chill down his spine and shouted, "Oh, no! Get ready..."

Boom...

The courtyard of the Scattered Stars Fourth Unit instantly turned to ash, and a pillar of fire rose into the sky.

Chapter 972: The First Refining Furnace of Mankind

Because of the explosion, Han Fei's hair all stood on end.

Mu Jia'er, was sitting on the ground 2,000 meters outside the courtyard of the Scattered Stars Fourth Unit, her mind blank.

She seems to be thinking, *Who am I? Where am I? What am I doing?*

Guan Qingyan was lying prone not far from Mu Jia'er, with his head stuck in a bush.

The two were thrown out by Han Fei from the pillar of fire. If it weren't for Han Fei's prompt response and the Coiled Turtle Array he set in advance, the two would have been seriously injured.

In a minute, a large number of masked people appeared from underground. They stood in the clearing, looking at the pillar of fire, staring at each other.

Someone was stunned. "What did the Scattered Stars Fourth Unit do?"

It was the Scattered Stars Second Unit that was responsible for alchemy, so they were the first who realized what had happened. "Whose furnace exploded? How was it so powerful?"

The mysterious Scattered Stars Sixth Unit was responsible for invention and creation. Someone shouted angrily, "F*ck! My new research was blown up! Who did this? Come out!"

The Scattered Stars Seventh Unit was responsible for hunting. They were all stunned. "Where is the enemy?"

The Scattered Stars Fifth Unit was the supervision department. They immediately identified the suspects and stared at Mu Jia'er and Guan Qingyan.

The members of the Scattered Stars First Unit all came out. Liang Tian said crossly, "Our secret realm has collapsed. Who did this?"

In the sky, Law Enforcers appeared one after another.

Someone shouted, "What happened?"

Someone's perception swept over. "The one in the pit, come out."

Han Fei, covered in black ash, flew out of the pillar of fire. He didn't wear a mask on his face and his clothes were all blown off.

Seeing a large group of people staring at him, he chuckled. "I'm sorry. We were doing very important research, and there was a slight error."

"Han Fei?"

Someone recognized him and was stunned.

Girls blushed. They didn't know Han Fei was so well-built and muscular! Oh, his body looked quite attractive.

Someone was speechless. *You call this a slight error? The entire Scattered Stars Fourth Unit has been blown up by you!*

Han Fei underestimated the power of the furnace explosion.

The whole Semi-Divine weapon refining furnace was made from a large amount of Semi-Divine weapon materials.

And with the same materials, dozens of Semi-Divine weapons could be refined. Therefore, the power of the furnace explosion was much more terrifying than the explosion of a single weapon.

The refining furnace was integral, so problems in any part of the furnace would cause the spiritual energy and energy to be unable to be released, resulting in an explosion. For example, if a tire was too inflated, it would easily blow out.

However, this was much more dangerous than a tire blowing up!

In the distance, big shots such as Bei Huo, Wang Xu, and Li Feiyun were hurriedly flying in this direction. Were they doing experiments? How come they blew up the Scattered Stars Fourth Unit?

Seeing Bei Huo, someone in the Scattered Stars Fourth Unit asked huffily, "Old Bei, how do you think we should solve this matter?"

Seeing this scene, Yu Xu sighed. "Han Fei, aren't you refining Semi-Divine weapons? Why was the explosion so powerful? It seems to be even more powerful than an explosion of a low-quality Divine weapon."

Bei Huo looked at Han Fei. "Han Fei, what happened?"

Putting on clothes, Han Fei said, "Don't panic. It's not a big problem. Just now, when the finished product was tested, there was an error in one link. I forgot a guiding array. However, there is no problem now. Wait, I will refine a new one right away."

Hearing that Han Fei was about to continue...

Someone immediately shouted, "Wait... Don't refine any longer, OK? You blew up the entire Scattered Stars Fourth Unit!"

Someone stepped back. "Wait, let's figure this out."

Han Fei rolled his eyes and said, "You simply don't know anything! I am contributing to mankind. Do you know what I am researching? If I succeed, the number of Semi-Divine weapons on the Scattered Stars Island will be as many as the number of dogs."

"What is a dog?"

"Uh... Nevermind... Anyway, I can't stop now. There's only one more step left."

Guan Qingyan stood up. "I can prove it."

A little bit guilty, Mu Jia'er also raised her hand. "I can prove it too."

Li Yunfei frowned and said, "Han Fei, are you sure you're almost there?"

Han Fei nodded. "This was just an accident. I missed a step. If you don't believe me, I will show it to you now."

A Law Enforcer asked, "Is it really that important?"

Bei Huo looked at the Law Enforcers and nodded. "Yes, very important. It'll bring a revolution to the Scattered Stars Island."

The Law Enforcers glanced at each other and seemed to exchange their opinions. In the end, one of them said, "Han Fei, are you sure you won't blow up anything again?"

Han Fei patted his chest. "Yes! Can I fall into the same pit twice?"

The Law Enforcer exchanged a look with Bei Huo and the others, and then said, "Since it is so important, you can continue refining it here. If there is a problem, we can take action in time."

The people in the other six units were dumbfounded. What are they talking about? Making a contribution to mankind? Seriously?

Han Fei stretched out his hand and took out a large pile of Semi-Divine materials from the hole that was exploded, which piled up like a hill.

"OK, Senior Yu Xu, have you prepared the five-star refiner certificate for me?"

Yu Xu smiled. "As long as you succeed, I will give it to you right away."

Han Fei smirked. "OK! Wait six hours for me."

Then he turned serious and pieces of materials floated in the air and started to fuse...

"Wow! He's refining so fast."

"Do all refiners refine like him?"

"Being a refiner seems to be more profitable than being an alchemist!"

“Does it only take him minutes to refine an ultra-quality spiritual weapon?”

Yu Xu said leisurely, “If this kid concentrates on refining, he is sure to make great achievements in the future!”

Bei Huo didn’t speak, thinking, *He certainly wouldn’t just concentrate on refining!*

Six hours later...

Under the public gaze, a peculiarly-shaped giant egg-like thing appeared in front of everyone. At this moment, it was being covered by spiritual energy and burning.

Han Fei took a breath and grabbed a few more ultra-quality materials. “Okay, I’m going to get started.”

As soon as he said so, the crowd immediately withdrew hundreds of meters away.

Only the Law Enforcers and Guan Qingyan were still there. After all, it was their collective brainchild.

After a while, Han Fei began to chant in a low voice, “The refining in the furnace has begun.”

There was no problem in the first 50 seconds.

The fusion began.

The initial fusion had no problem.

The fusion was complete.

The spiritual energy was drawn out.

The array brand was completed and no change occurred.

“The second micro-refining begins...”

When it came to this step, Mu Jia’er couldn’t help taking two steps back. The explosion occurred at this point just now.

Han Fei continued.

Spiritual energy compression was completed... The excess spiritual energy was successfully guided... The spiritual energy was blocked, and the product was going to be finished...

Seeing that the product was going to be finished, Guan Qingyan, Mu Jia’er, Bei Huo, Yu Xu, and Li Yunfei all held their breath.

Success or failure hinged on this one action.

When the spiritual fire in the refining furnace gradually disappeared, everyone saw that a long knife shining with a cold glint was floating quietly in the furnace.

Han Fei grinned. “We made it!”

Swish!

“Ahhhhh!”

Mu Jia'er jumped up excitedly and jumped onto Guan Qingyan's back.

The latter seemed unaware of her action, and a smile finally appeared on his cold face. *Yes, we made it!*

With a swish, Li Yunfei grabbed the Semi-Divine long sword in his hand and took out another Semi-Divine weapon with the other hand.

Clang~

The air wave shook, and the Semi-Divine weapon was unscathed.

Li Yunfei murmured, "Yes, we made it. We really made it!"

Yu Xu quickly grabbed the long knife, swallowed, and beamed with joy. "Yes, it's indeed a Semi-Divine weapon! Haha... Yes, yes, it's a Semi-Divine weapon!"

Bei Huo laughed. "Han Fei, well done!"

Then he quickly said, "Han Fei, try refining several other weapons, OK?"

Han Fei nodded.

This refining furnace could do much more than just refine Semi-Divine knives.

The five major professions of human beings were hunters, soul warriors, armorists, spirit gatherers, and manipulators.

They needed not only weapons, but also armour.

For different professions, weapons were divided into sticks, daggers, knives, swords, and shields.

Besides, since he could refine one refining furnace, he could refine many more!

Han Fei tried refining different weapons.

After a while, a big Semi-Divine shield was refined.

Mu Jia'er shouted, "I wanna have a try too!"

Han Fei moved his muscles and bones and said, "OK."

Mu Jia'er's refining speed was not as fast as his.

But this was not a problem. No one dared to make a sound. They were witnessing history, which was much more important than the research of the Scattered Stars Sixth Unit.

After a while, a pair of Semi-Divine daggers were refined.

Mu Jia'er happily held the daggers high. "Yes, I made it! Guan Qingyan, would you like to have a try?"

Guan Qingyan nodded hard.

Another moment later, a longsword and a long stick appeared one after another.

Guan Qingyan took a heavy breath and finally smiled. "Five weapons were all successfully refined and there was no danger of explosion. We... Succeeded!"

At this moment, Guan Qingyan grinned. He looked up at the sky, very happy, and a huge sense of accomplishment overwhelmed him!

Although he was not the lead designer, he still couldn't resist the joy of success.

The Law Enforcers also smiled happily. Except for one who stayed in place, the others left one after another wanting to spread the wonderful news.

Bei Huo laughed out loud. "From now on, the era dominated by ultra-quality spiritual weapons has passed."

The people of the other six units all came up to Han Fei.

"Congratulations!"

"Han Fei, good job."

"The explosion this time was worth it."

"The Scattered Stars Fourth Unit is awesome."

Yu Xu smiled. "Han Fei, your five-star refiner certificate will be delivered soon."

Li Yunfei let out a long sigh of relief. "It is imperative to reduce the prices of Semi-Divine weapons. Give me a moment. Let me summon all refiners to discuss the prices of Semi-Divine weapons."

With that, Li Yunfei looked at Han Fei and the other two. "Prepare to write a book on the refining furnace. This book will be circulated throughout the Thousand Star City!"

Chapter 973: Han Fei, Father of Semi-Divine Weapons

The appearance of the refining furnace for Semi-Divine weapons was simply unprecedented.

For a five-star refiner, if he had the right materials in his hand, it wouldn't be difficult for him to refine a Semi-Divine weapon.

The difficulty lay in how to use ultra-quality materials to refine a Semi-Divine weapon.

This was why the refining furnace was so special!

With such a furnace, ultra-quality materials could be used to refine Semi-Divine weapons! Wasn't this a great achievement?

At this moment, the three with Han Fei, together with the Semi-Divine weapon refining furnace, had been invited to the refining hall in the central city.

A large group of refiners who learned the news had already surrounded this place.

Li Yunfei said, "Everyone, please wait a moment. Let's wait for everyone to come."

In the most luxurious refining room of the refining hall, several people were discussing how to name this refining furnace.

This thing was created by Guan Qingyan and Mu Jia'er under Han Fei's leadership. So, the furnace would be named after these three people. This was a rule of the refining hall.

Yu Xu said with a smile, "Don't underestimate the naming of the furnace. The furnace will be named after you, which means that from today on, every time people use this kind of refining furnace, they will mention your names."

Li Yunfei said with a smile, "Han Fei, what do you think?"

Han Fei bared his teeth. "Is it that important?"

Bei Huo smiled. "It'll make you famous. The entire Thousand Star City will remember your name."

Han Fei glanced at Guan Qingyan and Mu Jia'er. In fact, Guan Qingyan had studied the furnace the longest. Of course, his contribution was definitely not as great as his.

As for Mu Jia'er, the concept of this furnace came from her, and she also made many suggestions in the research.

Before Han Fei could speak, Mu Jia'er said, "How about the 'Tri-Genius Refining Furnace', which represents the three of us?"

Everyone: "..."

Han Fei was completely speechless. This name sucked!

Han Fei curled his lips. "It might as well be called the Han-Guan-Mu Refining Furnace."

Everyone: "..."

Mu Jia'er's pouted. "Why am I at the end?"

Everyone rolled their eyes. Do you think your name should come first?

Guan Qingyan was silent for a while and said, "It sounds weird!"

Han Fei frowned. "Do you have any good ideas?"

Li Feiyun smiled. "It's easy. Why not the surnames? How about the 'Fei-Yan-Mu Furnace'?"

Everyone: "..."

Han Fei shrugged. "Well, Old Guan, you decide."

Mu Jia'er jumped in, "I think..."

"Shut up. Just eat the peach."

Han Fei stuffed a peach into Mu Jia'er's mouth. "It doesn't matter what the name is as long as people will remember the furnace was invented by the three of us."

Guan Qingyan said, "I think Senior Li's idea is good. Just call it the 'Fei-Yan-Mu Furnace'."

Li Yunfei smiled. "Haha, my suggestions are always good."

Yu Xu and Bei Huo scoffed.

After about half an hour, everyone had arrived. At this moment, the refining room was crowded with people and everyone was staring at the Fei-Yan-Mu Furnace.

When they got the news, to be honest, everyone was dumbfounded.

The array brand that Mu Jia'er proposed was already advanced enough. Although it was a bit troublesome, they could already refine Semi-Divine weapons with that brand.

However, when they were told that they didn't need to do anything except throw the materials into a furnace and add spiritual energy and energy and a Semi-Divine would be produced, they almost couldn't believe their ears. Was there really such a good thing in the world?

At this moment, someone asked, "Master Yunfei, is this the refining furnace that can refine Semi-Divine weapons?"

Li Yunfei said, "It just got a new name, the Fei-Yan-Mu Furnace. This furnace was developed by Han Fei as assisted by Guan Qingyan and Mu Jia'er."

Then Li Yunfei laughed. "OK, now is there anyone who wants to try it out? You, yes, you, the tallest one. Come and try this furnace out!"

Sun Jia was very excited, as he was only a three-star refiner. *Great! I'll be the first to try out this magic furnace!*

He said a little nervously, "Senior Li, I, I only have three stars. Can I?"

Li Yunfei smiled and said, "I just want to pick a three-star refiner to operate it. If you can operate it successfully, then it proves that the Fei-Yan-Mu Furnace has no problem and can be mass-produced."

Li Yunfei was not joking.

Semi-Divine materials were hard to come by, so it was impossible to use only Semi-Divine materials to refine Semi-Divine weapons.

However, with the Fei-Yan-Mu Furnace, Semi-Divine weapons could be refined with ultra-quality materials.

Sun Jia went on stage.

In the crowd, there was another three-star refiner staring at Han Fei.

Han Fei noticed it. *Who is this guy? He looks a bit familiar...*

Then he remembered that this guy was the refine he saw the first time he went to the refining hall and paid to watch others refining weapons. The guy offered to teach him how to refine weapons back then...

And that person was shocked. This kid is really a genius! He wanted to teach him refining back then, but Han Fei said arrogantly that refining was simple, which pissed him off.

But now he was already a five-star refiner, while he only had three!

Seeing Han Fei looking at him, he quickly lowered his head and prayed Han Fei didn't recognize him!

On the stage...

Sun Jia took a breath, and Yu Xu said with a smile, "Concentrate and follow the normal procedures of refining an ultra-quality spiritual weapon. You just need to put all the materials in through this hole after spirit refining."

Sun Jia nodded solemnly and began to operate meticulously.

After all, so many people were looking at him! He must not make any errors!

Fortunately, everything went well, although it took a little longer. However, there was no problem with Sun Jia's operation. After a while, he poured the material into the mold.

The Fei-Yan-Mu Furnace immediately started to operate automatically, and spiritual energy gushed out.

Spiritual fire erupted, and at the moment the spiritual fire rose, the original dim lines on the furnace suddenly lit up and danced as if drawing a wonderful picture.

After more than an hour, when the spiritual fire was extinguished, a dazzling longsword was floating in the furnace. It was definitely not only an ultra-quality spiritual weapon.

"Wow! It's done?"

"So simple?"

"This is too simple, right?"

"Damn!"

"With the help of this furnace, the world will change!"

"Ultra-quality spiritual weapons may become the past. If everyone has a Semi-Divine weapon, the strength of mankind will be greatly improved."

Someone shook his head. "Don't be too optimistic. First of all, how many Fei-Yan-Mu Furnaces can be refined? Besides, it will definitely consume a lot of materials. And the human population is so large. Even if the furnace is operating day and night, I'm afraid it will take a long time to refine enough Semi-Divine weapons for all human beings, definitely not in only one or two years."

Li Yunfei said, "I know your concerns. This time, I've summoned you here to show you how to operate the Fei-Yan-Mu Furnace. Later, I will personally report to the marshal and then we'll use all the top materials on the Scattered Stars Island to make Fei-Yan-Mu Furnaces. Besides, this matter will be announced to the whole city three days from now."

Then he lavished his praise on Han Fei and the other two and dismissed the crowd.

Yu Xu handed Han Fei the five-star refiner certificate, and said to Guan Qingyan and Mu Jia'er, "You two can also obtain the five-star refiner certificate, but not now. You'll get it when all the Fei-Yan-Mu Furnaces are made."

Guan Qingyan nodded. "No problem."

Mu Jia'er didn't have any objection either. The two of them certainly couldn't be compared to Han Fei.

Han Fei smirked. "Senior Yu Xu, so... Do I only have a five-star refiner certificate?"

Yu Xu smiled. "The marshal wants you to meet him later."

Han Fei: "..."

To be honest, Han Fei didn't want to meet Xue Shenqi. Every time he saw the latter, he was straight-faced and put on the air of being important.

Yu Xu said, "Oh, by the way, the marshal told you not to meet him until you finish all your refining tasks."

Bei Huo added, "And don't forget to write the book. It's urgent."

Han Fei: "..."

Han Fei rolled his eyes. *Hey, I am a hero! I have made a great contribution to mankind! Why do you treat me like a robot on the production line?*

However, then he thought that as long as he didn't die, the entire Thousand Star City would be his. He was helping himself.

With this in mind, Han Fei felt much better.

In 8 years, many people should be able to get Semi-Divine weapons.

...

Three days had passed.

Han Fei and the others were making Fei-Yan-Mu Furnaces in full swing.

Mu Jia'er directly engraved "Fei-Yan-Mu" on the furnaces for fear that others didn't know their contribution.

On this day...

The news about the Fei-Yan-Mu Furnace was announced to the entire Scattered Stars Island.

The whole island was boiling.

After seeing the magic of the Fei-Yan-Mu Furnace, many people were amazed.

And Han Fei was given a new name: Father of Semi-Divine Weapons

Chapter 974: The Last Chapter Of This Volume

Central City- the mansion of the marshal.

Han Fei was looking at the huge map hanging in Xue Shenqi's room and exclaimed in his heart, *This sea chart even covers the Ten Thousand Demon Valley!*

“What? Interested in the Ten Thousand Demon Valley?”

Xue Shenqi finished handling some official business and then looked up at Han Fei.

Han Fei returned to his senses. “Ah! Nothing. I just feel a little curious about the sea demon’s territory.”

As if not hearing him, Xue Shenqi changed the topic bluntly and looked at Han Fei leisurely. “The appearance of the Fei-Yan-Mu Furnace is very timely. Well done! It’s quite similar to the sea demon’s Refining Divine Platform.”

Han Fei was slightly startled, and a look of surprise appeared on his face. “Oh? Really? I heard Senior Bei Huo mention it. However, I think the fundamentals of this kind of tool are the same.”

“Really?”

Without waiting for Han Fei’s answer, Xue Shenqi said, “You’ve fully controlled your strength, right?”

Han Fei nodded. “I’m almost there.”

Xue Shenqi nodded slightly. “Good. After finishing this matter, go to sea and stay on the sea for a year! Then, you can leave.”

Han Fei asked, “Shall I come back in a few years?”

Xue Shenqi replied, “If you can come back alive and if you still want to become a king.”

Han Fei shrugged. “Okay! I have counted the resources on the Scattered Stars Island. If all the resources are used to make Fei-Yan-Mu Furnaces, we can probably make 48, but I think you still have many resources on your hands, right?”

Xue Shenqi said indifferently, “Sure. I’ll take care of the rest. This time, you’ll be granted an eight-star rank. I hope you can reach the nine-star rank in a year. Other rewards are useless to you. Just give them to others. Okay, you can go now!”

Han Fei wasn’t given any credits.

Anyway, he didn’t need them now. The value of level-two Soul Crystals was far less than before. The only useful thing were spiritual life fruits.

However, he had accumulated as many as 100 life fruits on the ancient battlefield, so life fruits weren’t that attractive to him now.

As for combat skills, he had too many of them now.

He would take advantage of the next year to get himself prepared to go to the Thousand Star City! He didn’t know what would happen if he went there. After all, it was his enemy’s territory.

...

In a carnival shop.

Han Fei and the other three of the Thug Legends were talking.

Han Fei butted in, "So, Xue Shenqi must have a purpose. Since he didn't want to make more Fei-Yan-Mu Furnaces, I think he still wants to hone people with the ancient battlefield."

Luo Xiaobai shook her head. "It's more than that. Everyone wants Semi-Divine weapons. However, the Scattered Stars Island has a large population, not to mention the Thousand Star City. 48 furnaces are definitely not enough. Even if a refiner works day and night, he refines at most 20 Semi-Divine weapons a day. Even if 1,000 Semi-Divine weapons can be refined a day, it will take several years to meet the consumption of the Scattered Stars Island, which will create a great sense of competition. And I guess there may be conditions to get a Semi-Divine weapon."

Le Renkuang added, "I heard an announcement that 480 pieces can be refined in one day."

Zhang Xuanyu nodded. "I've also heard that."

Luo Xiaobai said, "The Scattered Stars Island needs this kind of mechanism. In the beginning, Semi-Divine weapons were not popularized. Otherwise, the people on the island wouldn't have been motivated! I think the marshal is prolonging the time in order to prepare for the war in 8 years. During these 8 years, he wants to keep everyone in a state of tension."

Hearing what Luo Xiaobai said, Han Fei immediately figured it out. If everyone on the Scattered Stars Island got a Semi-Divine weapon, it should be when the people were most confident, and when their combat power reached the peak.

He had to admit that this was a good plan.

If it were him, he would have made all Semi-Divine weapons at once and given one to each person.

Realizing that Xue Shenqi was very good at dealing with sea demons, Han Fei felt relieved.

Han Fei tossed his head and said, "OK, enough with this topic. I'll finish my book on refining in a few days, and let's go to sea after I give it to the refining hall, OK?"

Zhang Xuanyu immediately said with excitement, "Okay! I can't wait. Our strength has improved a lot and it's the right time for us to go to sea."

Over the past six months, Han Fei had been trying to control the strength he had gained. Because the power gained from the Source Water was like a catalyst, catalyzing his strength to the peak that he could currently achieve.

And the strength of the other three was indeed improving by leaps and bounds.

They had experienced the ancient battlefield, the underground city, and the Bone Yard, and had obtained many opportunities. Old Han also gave them some opportunities. Besides they were in no shortage of resources. It would be strange if they didn't make progress!

Because Han Fei had been trying to control his strength and didn't make progress in cultivation this half a year, they were in the same realm now. They were all advanced Hidden Fishers and Luo Xiaobai was even close to her peak state.

Of course, in terms of combat power, the three of them were still inferior to him. However, if he fought the three of them alone and didn't use the Void Lines, it might take him quite a while to defeat them.

...

Five days had passed.

This day, on the roof of the Refining Hall on the west side of the Scattered Stars Island.

“Hoooooo!”

A loud roar resounded in all directions.

Many passers-by and the people in the opposing Logistics Division all raised their heads, thinking which idiot was yelling on the roof!

When they looked up, however, they were surprised to find it was Han Fei.

Someone shouted at the roof, “Master Han Fei, why are you on the roof?”

Han Fei laughed out loud. “Everyone, don’t miss the chance. Today, I, Han Fei, appeal to everyone to consider learning to refine. Although the Fei-Yan-Mu Furnaces can refine Semi-Divine weapons, the number of Semi-Divine weapons is still limited, but I can tell you that I’ve improved the refining technique. Perhaps in the near future, you can also refine your own weapons... Now, I have put my book on refining in the refining hall for everyone to study for free... Okay, that’s all.”

Han Fei finished speaking in one breath and flew to the south on the Wind God Boat with a swish.

He had made an appointment with Luo Xiaobai and the others to assemble on the southern coast.

The Ten Thousand Demon Valley was to the west of the Scattered Stars Island. The Pearl Sea was to its north, and the ancient battlefield was to the east and the north of it.

But they hadn’t explored south of the Scattered Stars Island yet.

Han Fei shouted on the roof of the refining hall because Bei Huo and Yu Xu asked him to do so. According to Yu Xu, with the birth of the Fei-Yan-Mu Furnace, fewer and fewer people wanted to learn to refine.

Development needed talents, so they asked Han Fei to do some promotion.

After Han Fei left, many people rushed to the refining hall. This caught the people in the refining hall completely off guard. Seeing this scene from a distance, Bei Huo and the others were very satisfied.

However, the next moment, the smile froze on their faces.

Someone in the crowd said, “For free? Really? Great! Let’s take a copy first.”

Someone smiled. “Yes, I can pass it on to my son. When it’s time for him to go to the level-three fishery, maybe I can make two ultra-quality spiritual weapons for him.”

Someone sneered. “Do you think it’s so simple? It costs a lot of money to become a refiner!”

Some people were disdainful. “Practice with common materials first! Common materials are worthless.”

Someone agreed. “Even if I can’t become a refiner, I heard the refining technique is heaven-level. I can sell it anyway.”

Bei Huo: "..."

Yu Xu: "..."

Li Yunfei: "..."

...

The third day after Han Fei and the others left the Scattered Stars Island.

In the sky, the Cloud Whale whooshed over, with a lot of people on its back.

The 36-town competition was held every five years. It was only two years since the last batch of people came. Why did this group of people come at this time?

On the Cloud Whale's back.

A four-star Hanging Fisher said, "You are the luckiest group of people in the history of the Scattered Stars Island. You know, just half a year ago, a big war broke out between humans and sea demons. We killed more than 5,000 sea demons in the Sea-Demon realm..."

"Senior, what is a sea demon? And what is the Sea-Demon realm?"

The man was annoyed. "Don't interrupt me. Just listen to me..."

The four-star Hanging Fisher told the story about the war between the Scattered Stars Island and sea demons. Hearing the legend-like story, these young people were all excited.

The Hanging Fisher said, "Because of this war, we humans get some breathing space and don't have to worry about the attacks of sea demons every moment. Besides, Marshal Xue agreed to open up the 5,000 kilometer sea area near the Scattered Stars Island for the first time..."

A young man said, "Senior, how come it's only 5,000 kilometer? The level-three fishery extends hundreds of thousands of kilometers. 5,00 is too small, right?"

The Hanging Fisher scowled. "You know nothing at all! Do you know how large the previous limit was? 200 kilometers. Now it's 5,000, and you complain it's too small? A random creature in the outer waters can kill you. Where do you think this is?"

Suddenly, another young man asked, "Senior, do you know Han Fei?"

The Hanging Fisher paused and couldn't help but look up at the starry sky. "He's a legend!"

Someone asked, "Who is Han Fei?"

The Hanging Fisher smiled and said, "He's a lunatic who broke into the Dark Hunter Legion twice and wandered alone in the outer waters for a full year and survived when he was only a Hanging Fisher; a monster who killed countless strong masters on the ancient battlefield; a peerless Heavenly Talent. In the last 60 years, he is the only one who has obtained a Wind God Pearl; and he's also the only genius who made Semi-Divine weapons with ultra-quality materials in the history of the Thousand Star City..."

The Hanging Fisher got more and more excited as he spoke, and he blushed from excitement!

He calmed down for a while before continuing. "There are too many rumors about Han Fei! When you hit the Scattered Stars Island, others will tell you about him... OK, now I want to tell you about your waist tags and job assignment..."

In the crowd.

He Xiaoyu sighed. "Sure enough, he is famous now!"

Another pair of men and women also sighed and looked at each other.

...

It was the same river and the same place, but different people.

The Command Center, Trans-Island Inspectors, Fisher's Union, Dark Hunter Legion, Logistics Division, Guard Group, Law Enforcement Group, Pioneer Group, Refining Hall, Alchemy Union, and many other units were welcoming the newcomers.

"Where is Fei Yang? Where is Fei Yang?"

"Is Xu Shen here?"

"He Xiaoyu, who is He Xiaoyu? Come here."

"Who is Wang Baiyu? Come here and let me take a look at my new team member."

"Qu Jinnan and Ling Yuan, where are you two? Come here, don't keep me waiting."

"The Pioneer Group needs new members, preferably two-star rank. Liberal wages and benefits."

"Does anyone want to join the Dark Hunter Legion? Come join the Dark Hunter Legion."

"The Fishers' Union is recruiting. Sign up and it won't affect your jobs."

"Refining apprentices needed. Work part-time, and no experience is required. It won't affect your main profession. 100 high-quality pearls every month."

After a moment.

A girl frowned and looked at the two people in front of her. "Are you guys only advanced fishers? How did you get a three-star rank?"

Ling Yuan frowned. "What? Are you doubting our strength?"

The girl sneered. "Did you bribe people to get here? Do you know where you are going?"

Qu Jinnan asked dully, "Where?"

The girl coughed and said, "Ahem, listen, I'm Wu Xiaoxiao, captain of the 37th team of advanced inspectors, Eighth Battalion, Third Column, Skeleton Shore. I'm here to receive two three-star new members... I didn't expect that you would only be advanced fishers."

Qu Jinnan smiled. "You may not be able to beat us..."

Bang... Bang...

Wu Xiaoxiao just wanted to teach this arrogant boy a good lesson when she looked at the crowd in surprise. "Why is Door-Carrying Marshal here? Isn't he already a Law Enforcer? Is he here to pick up someone?"

Wang Dashuai who carried a big blue door attracted the attention of many people. He was looking around. "Little Junior Brother, Little Junior Sister... Who are Qu Jinnan and Ling Yuan?"

Wu Xiaoxiao: "..."

Chapter 975: One Year Later

A full year and a half had passed since the war on the ancient battlefield.

The Scattered Stars Island had slightly relaxed the entry standards of the schools in the 36 towns and the seven academies in the Thousand Star City.

At the same time, they allowed some of the peak-level Dangling Fishers in the level-three fishery to enter the island.

Although they just relaxed the standards a little bit, it resulted in hundreds of thousands of people swarming into the Scattered Stars Island all at once.

After all, the population under the rule of the Thousand Star City was too large.

Because of the participation of these people, those who were originally stationed on the Scattered Stars Island could go a little deeper into the waters around the island to hunt.

This year had the most breakthroughs with the people on the Scattered Stars Island.

Because there was no invasion of sea demons, the strength of human beings grew quickly. At least, many peak-level Dangling Fishers made breakthroughs and became Hanging Fishers.

Of course, that was because offshore waters were relatively safe. Humans only faced the danger from the ocean and didn't have to deal with the intrusion of sea demons.

However, in the sea area 200,000 kilometer away, there were still many sea demons.

Although the Ten Thousand Demon Valley suffered from a heavy blow, causing the sea demon's battle line to draw back, due to the danger and vastness of the ocean, humans still couldn't set foot in the farther deep seas.

During this year, some people quietly rose, and some people's stories had also been passed on by word of mouth.

In fact, in the ocean, any battle could become a legend.

For example, someone discovered a little secret realm today. As long as the explorer survived, people would have one more topic in the carnival shop.

Or someone had found a certain strange creature somewhere. They would exaggerate the hunting process, which could also become a piece of talk.

Anyway, the carnival shop was a place for people to drink and brag. Every day, there were countless stories left here.

But sometimes, sad news could also be heard there.

For example, a team went to sea but never came back...

A certain human being was found to have a problem and was arrested by the Scattered Stars Prison...

Someone was fighting against sea demons in the outer waters...

And among them, one story went like this:

It was said that several mysterious people appeared in the outer sea. They were very elusive, and in just one year, no fewer than 100 sea-demon dens were sniped by them.

Some people said that they were actually Law Enforcers.

Some people said that they were from the Emyrean Waterfall. After they were allowed to leave the waterfall, they went to sea to kill sea demons to vent.

Someone said that he was saved when he was exploring in that sea area, and the one who saved him was Han Fei. He recognized him because of his Phantom Glass Wings.

Anyway, there were many sayings about those mysterious people, and everyone had their own version of the story.

...

This day.

The sky was clear and cloudless.

About 600,000 kilometers away from the Scattered Stars Island, in a deep-sea valley, four people were lying in a sandpit.

Le Renkuang said, "Feifei, it's been three days. Why haven't those sea demons come out yet?"

Luo Xiaobai assured him, "Don't worry. This secret realm isn't large. Maybe there is something in it that attracts them."

Zhang Xuanyu played with the sand in boredom and said, "Why don't we just go in and kill them?"

Han Fei was chewing dried fish and said lazily, "No rush. This time, these sea demons have a Sea Spirit powerhouse as the team leader, and there are a large number of them. If some of them die in the secret realm, there will be less pressure on us! Let's wait two more hours. If they still don't come out in two hours, let's go in."

Not long after, a Sea Spirit-level sea demon appeared in a seemingly normal stone in the valley.

The sea demon looked around and didn't find anything wrong, so he casually waited for the sea demons behind to come out.

Han Fei grinned. "OK, let's get him."

Swish, Swish, Swish, Swish...

The four of them launched an attack at the same time, regardless of the other sea demons. As long as they resolved this Sea Spirit first, the rest could pose them no threat.

The Sea Spirit was startled.

But instead of turning his head, he directly activated his secret method, launched Sea God Descends, and released his Associate Spirit.

However, a large number of vines rushed out of the ground, and a thorn light appeared on his back instantly, not allowing him to escape. At this time, space here had already been distorted.

“Humph! Are you only Hidden Fishers? Die!”

Ignoring Zhang Xuanyu’s spear, the sea demon activated a flash-type combat technique similar to Flying Flower Demon Flash. However, space was distorted, and he was stabbed in the shoulder by Zhang Xuanyu’s spear.

“How is this possible?”

“Hooooooo!”

As soon as the Sea Spirit flashed out, a pair of Phantom Glass Wings appeared in the place where he was about to reach ahead of him.

Dazzling fist marks illuminated the seawater that was shrouded in darkness.

“Blood Burning!”

The Sea Spirit still tried to resist only to find the power of this Hidden Fisher actually reached 2 waves.

BAM!

This person was directly blasted into a big black hole.

Hum!

This Sea Spirit didn’t even have a chance to activate Sea God Descends before he was sucked into the big hole.

A cold blade of light stretched out of the big black hole and pierced the Semi-Divine battle suit on his body.

“Parasitic Technique!”

Then something began to sprout inside the Sea Spirit. Horrible vitality erupted from his body, and seaweed grew wildly in his wounds, mouth and nose.

“Three Tremors to the Sea.”

Boom... Boom... Boom...

The ten-meter space around the Sea Spirit was shaking, and each time it shook, it contained a horrible power.

Being shocked three times in a row, the Sea Spirit had its five internal organs shattered and his bones broken.

Han Fei didn't even launch an attack. The other three had cooperated to kill the sea demon. Since the moment Zhang Xuanyu's spear pierced the Sea Spirit's body, the latter had no power to fight back.

The Sea Spirit tried to use the power of the law, but his law was the sound wave. Subject to a series of attacks, he had no chance to use it.

Besides, his Associate Spirit didn't listen to his call at all as if being controlled by others.

So what else could he do?

He tried to use the Immortal Seal.

However, at the moment his heart was pierced through, a terrifying soul power took over its body. At that moment, this Sea Spirit's soul was controlled and he died without even having the chance to use the Immortal Seal.

And as soon as he died, his Associate Spirit, a big jellyfish, was held by Han Fei with the Void Lines and cut into pieces.

The battle ended within three seconds. A Sea Spirit-level powerhouse was easily killed by Han Fei and his companions.

Swish!

When the second sea demon came out of the secret realm, he happened to see this scene, and Han Fei even beckoned at him, "Surprised?"

After slaughtering more than 30 sea demons in a row, they were sure the remaining 20-odd sea demons should have died in the secret realm.

This time, the harvest was quite abundant. They obtained three full Sea Swallowing Seashells, which contained more than 100,000 catties of spiritual spring, a mid-quality Divine weapon, a bottle of medicine, nearly a hundred spiritual fruits, and dozens of combat skills.

However, they didn't take these spoils seriously.

For human beings, the fastest way to grow was to obtain resources in the ocean. And they had done things like today dozens of times and had long been used to it.

Three hours later...

The four of them came out of the secret realm. Most of the secret realm was destroyed. It looked to be the residence of a prehistoric sea demon, and they didn't find anything here.

Luo Xiaobai said, "If we don't go to the Ten Thousand Demon Valley, many things here are actually of little use to us unless we find a large secret realm... However, these are extremely rare. Shall we return to the Scattered Stars Island?"

Han Fei nodded slightly, then shook his head. "Xiaobai, don't you feel that something is wrong?"

Luo Xiaobai took a look at Han Fei and thought for a while. "Yes, there seems to be something wrong. If I were that Sea Spirit, I would find a way to bring the prehistoric creature inside back to the Ten Thousand Demon Valley. This would be better than killing it."

Han Fei nodded. "Yes, but the ancient sea demon inside is dead. We can't know its intentions now..."

Zhang Xuanyu said, "Will there be any clues in the resources we just seized?"

Luo Xiaobai nodded. "Wait, let me check it."

Le Renkuang said, "I think it's simple! If we met someone from ancient times, we would also treat him as an enemy."

After a while, Luo Xiaobai shook her head. "I found no clue. There are only simple resources."

Han Fei smiled and said, "Forget it, let's go back to the island! No matter what, sea demons won't be able to attack the Scattered Stars Island in the foreseeable future. And it's time for us to go to the Thousand Star City."

Zhang Xuanyu jested. "Xiaobai, You're going home soon. Are you excited?"

Luo Xiaobai said indifferently, "No."

Zhang Xuanyu curled his lips. "You're so boring. Are there many beauties in the Thousand Star City? Mmm..."

Chapter 976: Tricked by the Performance

Two days after Han Fei and the others left, a scarlet figure appeared outside the secret realm.

If Han Fei were here, he would have definitely recognized this person. It was none other than Chixue Huan who was cheated by him...

At the moment, Chixue Huan's face was gloomy.

He said coldly, "The same fighting style. The same parasitic spiritual plants. It must be Han Fei and his team again..."

A Half-Merman respectfully said, "Master Chixue, these people are too elusive. Every time, they finished the battle quickly and killed everyone. We can't just let them go on like this!"

This was not what Chixue Huan cared about, as the mission this time was so secretive. How did they know of this place? Did they just happen to meet these sea demons?

Or... Did they have a special ability to track sea demons?

Chixue Huan's eyes turned cold. "Follow them."

“Huh? Master Chixue, their whereabouts are erratic. How can we follow them?”

Chixue Huan said coldly, “Don’t they like hunting us? In that case, let me be the bait.”

...

Five days had passed.

The Thug Legends didn’t return to the Scattered Stars Island in a hurry.

They were 600,000 kilometers away from the island, so it would take at least ten days to return even if the Wind God Boat flew at full speed! Besides, they were not in a hurry to return, so they took their time fishing, eating hot pot, and having fun.

They had put their contractual spiritual beasts in the sea to let them have fun.

All of Han Fei’s contractual spiritual beasts had reached level-49. Little Black and Little White had even reached level-53.

This was the result of countless battles over the past year. Han Fei didn’t deliberately use the Spirit Awakening Fluid to catalyze them. Obviously, contractual spiritual beasts had their own cultivation too. Combat experience, talent, and devouring other creatures could all play a role in enhancing their strength...

Normally Han Fei would just let them cultivate on their own, but when they needed a boost, he would throw tens of thousands of kilograms of Spirit Awakening Fluid on them to help them with their breakthroughs.

During this period, Han Fei entered the Soul Sea once, when he made the breakthrough and became a peak-level Hidden Fisher. However, after many attempts, he was still forced out by that terrifying force after eating a lot of primitive soul beasts.

In the Soul Sea, Little Black and Little White upgraded by two levels, but except that, nothing happened.

And Han Fei had also tried the integration skill of Little Black and Little White.

Fusion made Little Black and Little White become one, while integration made Little Black, Little White and him become one, turning him into a kind of fish.

The biggest advantage of this skill was that he could become a fish.

Besides, Han Fei could borrow Little White’s treasure hunting ability, but it was actually unnecessary because Little White could find treasures herself.

However, this integration skill had a weak point. When he integrated with Little Black and Little White, the two’s immortality ability would disappear.

If they encountered uncontrollable danger and were killed, Little Black and Little White might truly die.

Of course, Han Fei, after the integration, would possess great power and wouldn’t easily die, but he still didn’t really like this skill.

If he had to become a fish, he preferred the Three Transformation Wondrous Book. However, now he was going to the Thousand Star City, so there was no such need.

Le Renkuang mumbled, "My Spiritual beasts and contractual spiritual beasts are growing up really slowly! My Spiritual Clam is only level-46. When will it break through level-50?"

Zhang Xuanyu rolled his eyes and said, "Go easy on it... It takes time for them to grow. Anyway, I'm not in a hurry."

Luo Xiaobai said, "Yes, no rush. Be it a spiritual beast or a contractual spiritual beast, it needs time to grow up. It's not that they grow up too slowly, but we grow too fast."

Le Renkuang said, "Shall we make the breakthrough and become Law Enforcers?"

Han Fei was surprised. "Can you become a Law Enforcer now?"

Le Renkuang sighed. "I'm almost there, but I'm a little bit uncertain about my way."

Han Fei rolled his eyes. "Humph, your way is eating."

Zhang Xuanyu nodded hard. "Exactly, eating is your greatest pleasure in life. I feel that this path will definitely be carried forward by you."

Le Renkuang said helplessly, "I'm still thinking about whether to take the path of Ultimate Defence... Eating is just my hobby."

Luo Xiaobai chuckled. "Your hobby is what you really want in your heart."

Le Renkuang: "..."

Zhang Xuanyu smacked his lips and said, "Anyway, my way has long been set, and I can become a Law Enforcer at any time."

Luo Xiaobai agreed, "Me too."

Han Fei added, "Me too."

Le Renkuang asked with a doubt, "Do you really think that I can take eating as my way?"

The three all nodded.

Han Fei patted Le Renkuang's shoulder and said, "Don't forget you once defeated 17 people alone by eating."

Le Renkuang took a breath. "Huh, you're right."

He immediately said, "Then let's go! Stop chatting. Let's go back to the Emyrean Waterfall to make the breakthrough and become Law Enforcers! There are still 300,000 kilometers to go, come on."

When they were about to go back, Little White suddenly jumped out of the water and swam to Han Fei's side.

"Dad! There are sea demon experts, more than 3,000 kilometers away."

Han Fei's heart did a flip. "Are there many of them?"

Little White blinked a few times. "Yes... Many."

Han Fei's eyes lit up. "Hey, did you hear her?"

Zhang Xuanyu was overjoyed. "Are they Sea Spirit experts?"

Han Fei nodded. "Yes, they must be Sea Spirits, maybe even stronger."

Zhang Xuanyu said, "Great! Junior Sea Spirits are too weak for us now."

Han Fei grinned. "That's what I think. If we kill one more now, we'll have less trouble later. God knows when we will come back from the Thousand Star City."

Le Renkuang nodded. "OK, let's fight one last battle before we leave."

Luo Xiaobai agreed, "OK, we'll go back after this battle."

...

One hour passed.

Han Fei said, "I feel it, 300 kilometers away, about 50 sea demons. Huh? More than ten Half-Mermen? It seems that their mission this time is very important!"

Luo Xiaobai frowned. "How did so many get so close to the Scattered Stars Island? You know, there are often Law Enforcers patrolling about 200,000 kilometers away from the island."

Zhang Xuanyu licked his lips and said, "Perhaps they found some large ruins here?"

Han Fei shrugged. "It's okay. No matter what their purpose is, a Sea Spirit and its followers can't pose a great threat to us. Shall we still follow them or directly rush up and kill them?"

Luo Xiaobai said, "Follow them. If there is a secret realm, we can take the secret realm at the same time."

Le Renkuang nodded. "Although we have accumulated a lot of resources this year, they're not even worth mentioning in the eyes of the big clan people from the Thousand Star City. We'd better get more resources."

Han Fei nodded. "Okay! Then follow them."

After following these sea demons for about half a day, Han Fei said in surprise, "What are they looking for? A secret realm? But why is it taking them so long?"

The other three's perceptions couldn't go that far, but Han Fei could perceive clearly! Led by a Sea Spirit, after all this time, the sea demons still couldn't find the secret realm. There seemed to be... Something wrong.

And Han Fei's perception and attention were all placed on the sea demons in front. He didn't notice that in the sea, there was a mass of red seaweed approaching in their direction.

At this moment, it was less than a hundred kilometers away from where Han Fei was.

Suddenly, Han Fei frowned. "Xiaobai, let's stop following them and just rush up and kill them. I feel that something is wrong."

Luo Xiaobai glanced at Han Fei in surprise. "Shall we just retreat? Anyway, they're just some sea demons."

Han Fei said, "Let's retract our contractual spiritual beasts first."

Swish! Swish! Swish!

Rays of light entered into their bodies.

They were all experienced soldiers. They knew once they felt that something was wrong, they must take it seriously.

Han Fei just wanted to say let's rush up and kill them when a red light suddenly pounced at them.

Han Fei shouted, "Retreat!"

The other three all backed up as quickly as they could. "Damn, it's a trap."

Han Fei didn't panic. He stretched out his palm and Infinity Water darted at the red light.

Explode!

Boom...

Han Fei didn't hesitate at all.

Being able to quietly enter the range of his perception, avoid Luo Xiaobai's dangerous premonition, and being so close to him, this guy couldn't be easy to deal with.

The terrifying explosion set off rolling waves, like a mushroom cloud rising, and the red light was directly torn apart.

At that moment, all four of them activated their secret methods.

Except for Han Fei, they had all fused with their spiritual beasts and appeared in mid-air.

"Huh? You detonated a high-quality Divine weapon? I didn't expect you to be so rich."

Under the impact of the detonation, Han Fei and the team were sent flying more than 10 kilometers away, and a huge deep pit appeared on the sea surface because of the explosion.

Then a set of bright red armor appeared. Immediately afterwards, Chixue Huan walked out of the surging wave.

Chixue Huan looked a bit discomfited, but he wasn't severely injured.

Han Fei narrowed his eyes. "The seventh member of Eight Wings of Blue Feather, Chixue Huan."

Luo Xiaobai and the others instantly became serious.

This time, it was different from before. The Eight Wings of Blue Feather were peak-level Sea Spirits, who were completely different from ordinary Sea Spirits.

In Han Fei's perception, the Sea Spirit and dozens of Sea Demon-realm powerhouses who seemed to be looking for something were also rushing in this direction and were coming soon.

Han Fei sneered. "Nice, I was actually fooled by your performance."

Without using the voice transmission, Han Fei directly said, "I'll resolve Chixue Huan and the other Sea Spirit. The rest are yours."

Chapter 977: Punishing Saber

With a thought from Han Fei, the Infinity Water gathered, and he turned his hand over to retract it.

He knew this would be a tough battle.

Apart from Chixue Huan, the remaining dozens of sea demons were not easy to deal with either.

Fortunately, the Thug Legends were all peak-level Hidden Fishers.

"Huh! Is that a high-quality Divine weapon? Can it actually reassemble automatically? However, in terms of power, it is an ultra-quality Divine weapon at best. Are you going to use this to deal with me?"

Han Fei licked the corner of his mouth. "Who said I'm going to fight you?"

Chixue Huan's eyes narrowed slightly. *Huh? Is there someone else here?*

Impossible.

He was sure Han Fei was deceiving him. If there were a stronger master around, he would have discovered that person long ago.

Chixue Huan grinned. "Do you think I will be fooled by you?"

Another Sea Spirit expert, leading a large force, had already appeared hundreds of kilometers away. Chixue Huan didn't mind Han Fei holding off longer. That way, they would only die faster.

Buzz~

A phantom image of a mountain suddenly appeared.

Chixue Huan's eyes narrowed slightly, but then his face changed drastically. "Who is it?"

Swish!

As the mountain disappeared, a blood-red long knife appeared in front of Han Fei, drifting in the air.

The knife was actually talking. "Master, you summoned my original body. Are you in big trouble?"

Chixue Huan's face changed drastically. *A talking knife? What the hell is this?*

Han Fei pointed to Chixue Huan. "Kill him."

After that, behind Han Fei, the Phantom Glass Wings spread out.

"Agility of Wind."

With a swish, Han Fei disappeared.

Luo Xiaobai and the others also flew in the direction of Han Fei. They weren't afraid of fighting a Sea Spirit.

However, to be on the safe side, they would leave the Sea Spirit to Han Fei.

Behind them...

Chixue Huan stepped forward, his four fingers turning into shadows, trying to penetrate the void and directly destroy Han Fei.

However, Punishing Saber cut across the air. The terrifying power slashed directly into the void, shattering that blow.

Punishing Saber snorted. "In front of me, do you still dare to be distracted? Die!"

Hum!

A huge knife light broke the void, and the terrifying power swept across at an unimaginable speed! Chixue Huan was shocked. "What the hell are you?"

He threw a mid-quality Divine harpoon at Punishing Saber, but the next second, the harpoon broke inch by inch, and the horrible thundering sound shook within hundreds of kilometers.

Punishing Saber laughed. "What am I? I am Yin-Yang Soul Quelling Knife. You blocked my blow? Not bad! Tsk, no wonder Master summoned me out."

...

Now the battle became easy for Han Fei because he just needed to resolve a junior Sea Spirit.

Even without Devil Change, Han Fei had already had almost two waves of power. And with Devil Change, his strength could even reach 16 waves. A golden fist mark shot out, shaking the sky.

Seeing this scene, the Sea Spirit was shocked. *Is Han Fei so strong?*

"Secret method, Sea God Descends."

Boom!

The Sea Spirit was sent flying 100 meters by the punch.

Han Fei sneered. "No wonder you can resist my blow. It turns out that you're an intermediate Sea Spirit."

During this year, Han Fei had discovered some secrets about sea demons. In the realm of Sea Spirit, the pure power of a junior Sea Spirit was about 3 waves, and an intermediate one was at least 5 waves or more.

Therefore, when they used Sea God Descends, their strength could only increase by three times at most.

This was like his Devil Change, which could increase his strength by 10 times in the beginning, but with the growth of his strength, now it was only 8 times.

Han Fei guessed when he became a Law Enforcer, this multiple would probably become 6, or even 5.

This was because after one grew stronger, if the secret method still improved his strength that much, his body might not be able to stand so much energy.

This meant that the stronger one grew, the less effective the secret method would be to him. Of course, in the realm of Law Enforcers, a secret method could still be very useful.

When he became an Explorer, he might need a corresponding level of combat skill. Otherwise, Han Fei guessed that Devil Change would only improve his strength by less than 2 times.

And the strength of this intermediate Sea Spirit that he was facing probably had 5 waves of strength. After he activated Sea God Descends, his power should be about 15 waves, a little weaker than his. However, the difference was not great.

Swish!

Han Fei punched out, again and again, the golden fist marks shook the void, and the Void Lines swept across the sky.

On the other side, numerous giant vines emerged from the sea, and Luo Xiaobai used the Grand Spirit Summoning Art to summon dozens of different forms of spiritual plants, directly enclosing everything within the radius of a kilometer.

Zhang Xuanyu's attack was the most direct and violent in this battle. Whenever he used the Momentary Time, a sea demon would die. No sea demon in the Sea Demon realm could resist a blow from Zhang Xuanyu.

The battles on the three battlefields were so fierce that the surging waves almost hit the sky.

At the moment when the Void Lines appeared, the Sea Spirit felt the danger and activated his law.

His law turned out to be blood-sucking. He was trying to draw the blood out of Han Fei's body.

For others, this law was very strong.

Unfortunately, his opponent was Han Fei. Han Fei forcibly suppressed the turbulence of his blood.

"How is it possible? You are only a Hidden Fisher. How can you resist the power of my law?"

Han Fei grinned. "It's been a long time since the last time I broke out with all my strength. Let me show you how it feels!"

Swoosh!

Han Fei accelerated, activating both the Agility of Wind and Devil Change, and the Sea Spirit couldn't catch up with him at all.

Boom!

Han Fei's figure seemed to disappear. When he reappeared, he was already on the side of this Sea Spirit, and the latter attempted to dodge him.

However, a terrifying gravity suddenly descended, causing his body to sink.

Han Fei punched his abdomen. At the same time, all 10 Void Lines fell on him.

At this moment, Han Fei no longer needed to control the Void Lines separately. In the past, he didn't have enough soul power to control the enemy entirely.

But now, his soul power was almost limitless, and it was definitely not something an ordinary Sea Spirit could handle.

Boom!

With another punch, this Sea Spirit was directly sent flying into Luo Xiaobai's battlefield.

And over there, seven or eight sea demons were already dead. Seeing the savior come, a sea demon immediately roared, "Master, this mist is a poisonous illusion."

However, the sea demon had just finished speaking when he found that his master had pierced his body with a harpoon.

Han Fei was about to go over when suddenly his body softened, and he quickly summoned a large amount of spiritual energy and crushed many energy fruits, which all flew towards Punishing Saber.

Punishing Saber and Chixue Huan were fighting in full swing, and one after another waves rolled up five to six hundred meters.

Han Fei hurriedly put a few energy fruits into his mouth before he sighed. "How long has it been? The consumption is too much. I should have summoned Water Luster. After all, the sea is her territory."

Han Fei thought that Water Luster's combat power was not as strong as that of Punishing Saber, and thought that Punishing Saber could kill Chixue Huan with a few slashes, but it seemed that he was wrong.

Then he continued to fight the other Sea Spirit. In order to prevent the other sea demons from escaping, Han Fei directly activated the law of gravity, summoned the Void Chains, and had Little Gold attach to him, who immediately activated Lightning Blade.

Zhang Xuanyu used Soul Explosion, and Le Renkuang brandished his knife. At this time, the battlefield was like hell, and most of the sea demons were killed in an instant.

And the rest only lasted a moment.

In the distance, Chixue Huan launched a secret method, and scarlet seaweed instantly covered everything in a radius of 3,000 meters.

"Spirit Entangling."

Han Fei took the Sea Spirit and flew across the sky, rushing towards that area.

However, the intermediate Sea Spirit instantly died as soon as it entered the area covered by the scarlet seaweed. Only at this moment did Han Fei discover that there were countless red lines in the void.

"Puff... Puff... Puff..."

The sea demon's body was cut into countless pieces.

"Chop!"

At that moment, Han Fei's spiritual energy was drained again, and he immediately took out a large number of energy fruits, and spiritual energy to refuel.

However, at that moment, the sky darkened, and the void cracked as if it was cut open by a knife, and it was pitch black inside.

Boom...

All the scarlet seaweed shattered, and a red light disappeared between the sky and the earth. An arm flew into the sky and then fell into the sea.

When the waves subsided, Han Fei grabbed the arm and asked, "He escaped?"

Punishing Saber shuddered. "Yes! That sea demon is a bit special, not an ordinary creature. He has almost entered the same realm of an Explorer. However, his right arm won't regenerate."

Han Fei was speechless. *So you failed to kill Chixue Huan? You almost drained up my energy several times, but still didn't kill him?*

Punishing Saber seemed a little embarrassed. "Master, I didn't drain up your energy because I feared you wouldn't be able to fight at all if I did so."

Han Fei said casually, "I see. It doesn't matter. No big deal."

When the knife returned, however, Han Fei almost cried. *Why didn't you just use up my energy and kill Chixue Huan?! Do I lack energy? I needed you to kill him!*

Le Renkuang swallowed. "Oh, Chixue Huan is one of the Eight Wings of Blue Feather, and you actually fought him?"

Han Fei said lightly, "It's not a big deal. He is not even an Explorer, don't underestimate our own capabilities."

Chapter 978: Senior Brother Has Prepared A Gift For You

Chixue Huan had never expected that Han Fei would have such a powerful helper!

Little did he know that Han Fei couldn't release all five legendary creatures in the Sea Quelling Painting once.

Otherwise, Chixue Huan would have had no chance to escape at all.

Now Han Fei planned to go home. Otherwise, if Blue Feather came in person, he would be dead meat.

...

100,000 kilometers off the coast of the Scattered Stars Island, the four of Han Fei were sailing in the sky and the Wind God Boat streaked the sky.

From time to time, someone would appear on the sea. When they discovered the four of them, they immediately exclaimed, "Oh, it's The Four!"

As early as when the team of four entered the ancient battlefield, some Law Enforcers had noticed them.

At this time, Han Fei's goal was the huge sea fortress on the ancient battlefield, which was a bit similar to the Pearl Diver's Port in the Pearl Sea. However, the scale was much smaller.

After all, the Pearl Sea was much less dangerous, and even Hanging Fishers could go there.

While the ancient battlefield was very dangerous and Hanging Fishers wouldn't even be able to survive there, the sea fortress was much smaller.

However, no matter how small it was, it was still a well-developed base, which was as big as half a dragon boat. There were some shops on it, which were mainly resource stores, spiritual energy shops, spiritual fruit shops, refining halls, and auction houses.

When Han Fei's team approached, they met an acquaintance, Ye Xingchen, whom Han Fei had once met.

Ye Xingchen was standing at the top of the fortress, looking somewhat crossly at the four of them. Last time, he talked too much, which caused Han Fei to rob an Undersea Chimney. So he didn't want to see Han Fei at all!

Of course, he knew he couldn't mess with these people.

Ye Xingchen wasn't surprised at Han Fei's achievements at all. It was said he even destroyed two of the sealing stones of this ancient battlefield.

At the top of the fortress, Han Fei stood in midair. "Senior Ye, what a coincidence!"

Ye Xingchen took a look at them and was a little surprised. "You four's cultivation speed is really fast! No wonder people call you four little dragons in the waves!"

Han Fei was taken aback. "Four little dragons in the waves? What?"

Ye Xingchen curled his lips. "People gave you this nickname because you killed a lot of sea demons in the deep sea."

Then Ye Xingchen said solemnly, "Han Fei, let me ask you something... What was it like in that hole?"

Han Fei was confused. "Which hole?"

Ye Xingchen said grumpily, "Which one can it be? The one in the ancient battlefield!"

Han Fei said in surprise, "Don't you know? That hole leads to the underground city!"

Ye Xingchen nodded. "I know it leads to the underground city. However, the danger inside seems to be beyond our imagination. In just one year, more than 100 Hidden Fishers have died inside."

Han Fei asked in surprise, "What realm were they in?"

“The lowest ones were intermediate Hidden Fishers. Of course, they were mostly advanced Hidden Fishers.”

Han Fei said, “Didn’t they get any advice? My suggestion was that it is best for peak-level Hidden Fishers or above to go in. There is a river in it, and once one crosses that river, it is extremely dangerous.”

Ye Xingchen nodded slightly. “Someone also suggested that to me. But it’s a pity that such a wonderful place of practice doesn’t come in handy.”

These Hidden Fishers would go to the battlefield in the future, and it would be a waste if they were dead now.

Han Fei immediately said, “You should have already known the situation inside. But there are too many Law Enforcer-level creatures in it. Advanced Hidden Fishers had better not force their way in.”

Ye Xingchen nodded slightly. “OK! I see... Did you come here on purpose, or what?”

“We are just passing by. We are heading for the Scattered Stars Island.”

Ye Xingchen raised his brows. “Oh? Are you leaving?”

Han Fei nodded. “Yes, if we don’t leave now, we’ll be sent to attack the Ten Thousand Demon Valley.”

Hearing this, Ye Xingchen curled his lips and thought, *It would be nice if you could take the Ten Thousand Demon Valley down.*

Han Fei thought for a moment and said, “Well, by the way, I have something to tell you, Senior. I think the Ten Thousand Demons Valley is too quiet. They seem to be brewing something big. I planned to tell the marshal this, but now you can tell him for me.”

Ye Xingchen turned serious. “Okay, I see.”

...

The Scattered Stars Island, Skeleton Shore.

800 kilometers in the outer sea, seaweed spread. These seaweeds were a little different, looking a bit threatening and containing a lot of spiritual energy.

Above the seaweed, a total of 14 people were fighting.

All the creatures attracted by the spiritual energy were imprisoned by this piece of seaweed. So, the group of people above the seaweed were killing very easily!

Among them, a little girl seemed to be dancing on the seaweed, carrying an armor box on her back, and sword light flew out of the armor box from time to time. The weapons flying out whirled around like they were dancing.

Looking closely, this girl used seven swords in total. Every time a sword drilled into the seaweed gap, it would chop a certain creature into pieces.

After about half an hour, a voice rang, “Okay, everyone, get ready to take off.”

Wu Xiaoxiao shouted, "Fly to the sky."

A bulky man shouted, "Fly to the sky."

After everyone flew to the sky, the large piece of seaweed gathered and turned into a human. The person stepped on two flying swords and leaped onto a fishing boat.

Wu Xiaoxiao couldn't help but exclaim, "The Thug Academy is full of monsters! Qu Jinnan, do you want to go out with me?"

Qu Jinnan blushed immediately. "Sister Xiaoxiao, don't... Don't make fun of me."

"No, I'm serious!"

Bang!

Someone slammed her armor box on the ground. "People in the Thug Academy don't date outsiders."

Wu Xiaoxiao narrowed her eyes. "Ling Yuan, there are only two of you in this session. Do you mean Qu Jinnan is yours?"

Ling Yuan's face blushed slightly. "I heard that our academy recruited a new Junior Sister. Jinnan, what do you think?"

Qu Jinnan felt a chill down his spine. "Forget it, forget it... I think it's fine to be single."

"Huh?"

Qu Jinnan shook. "Uh! I mean, Ling Yuan, you are pretty good."

"Hehe!"

Gu Daliang laughed out loud. "Haha! You two are just like Captain Han and Xia Xiaochan. I heard that this is the same case with the Door-Carrying Marshal and his wife."

Qu Jinnan almost cried. *I've tried resisting, okay! But it was useless!*

Qu Jinnan hurriedly said, "Let me recover for a while and we can continue."

Suddenly, someone flew over, and everyone greeted him respectfully, "Captain."

You Lingyun said, "You don't need to call me Captain anymore. My transfer order has already been issued. Xiaoxiao, your application to go home has also been approved... But, are you sure you want to go home?"

Wu Xiaoxiao grinned and said, "I'm going to become a Hidden Fisher soon. You know, I am timid, so I don't want to go to the ancient battlefield. Our town is too short of teachers. I am going to go back to become a teacher, safe and comfortable!"

You Lingyun nodded. "Well, that's good. In this way, you don't have to face crises all the time."

Then You Lingyun turned to Qu Jinnan and Ling Yuan. "Nan, Ling Yuan, Han Fei and the others came back an hour ago. However, I think they won't stay long. Are you going to see them?"

Qu Jinnan and Ling Yuan exchanged a glance and said in unison, "Yes, of course."

On the way back, Wu Xiaoxiao said, "Hey! I heard that they killed countless enemies outside. Unfortunately, we are not the same level as them."

Gu Daliang nodded. "Yes! Would you like to meet them?"

Wu Xiaoxiao rolled her eyes and said, "No, but I hope I can meet them again one day in the future! However, I think it's not likely."

...

In the depths of the Twisted Jungle.

Mu Qingchuan was making dumplings, and Chu Linyuan was kneading noodles. The atmosphere was harmonious.

Mu Qingchuan smiled and said, "President, would you like to try some other dishes? I think braised pork in brown sauce is also good."

Chu Linyuan nodded. "President, I always feel it's a bit weird to match dumplings with hot pot."

Old Bai said leisurely, "No, it's not weird at all! After this meal, you can go to that place!"

Suddenly, Mu Qingchuan paused. "Haven't Dashuai and Bai Lu already gone there? Do we also need to go there?"

Old Bai nodded slightly. "Yes, our Thug Academy has too few students."

Hum!

At this time, the spiritual barrier opened, and Han Fei roared, "Old Bai, we are back."

Le Renkuang added, "President, is there anything to eat?"

Zhang Xuanyu sighed. "Oh, I can finally get a good sleep."

Chu Linyuan was surprised. "Wow, there you are. It just so happened that Qingchuan and I made some dumplings. Let's eat together!"

Mu Qingchuan smiled and said, "Xiaobai, what did you get this time?"

Luo Xiaobai bowed and said, "The harvest was quite fruitful."

Old Bai sat up straight with a swish and then looked at the four of them, saying, "Well, our school funding has been a bit tight recently. I heard that we have taken 10 new students, and as Senior Brothers and Senior Sisters, shouldn't you donate something to our school?"

Everyone: "..."

Han Fei rolled his eyes and said, "Can't The Fish Dragons feed them?"

Chu Linyuan smiled and said, "Don't pressure them, President. We have the stock. But they are going to the Thousand Star City and need resources."

But then he said with a smile, "But Junior Brothers and Junior Sister, you can share some of your combat skills, the more the better."

Luo Xiaobai was surprised. "Doesn't our school only want quality combat skills?"

Mu Qingchuan said with a smile, "Different combat skills have their own advantages. Please give us a copy of your combat skills. They will be used by your junior brothers and sisters."

Han Fei took out a Sea Swallowing Seashell and said, "Take this. There are more than 2,000 combat skills inside. All cheap stuff that nobody wants."

Seeing this, Chu Linyuan and Mu Qingchuan didn't speak anymore and lowered their heads to continue to make dumplings.

Old Bai leaned back on the recliner and grunted. "OK, let's talk after dinner."

...

Hum!

The spiritual barrier shook again, and Qu Jinnan and Ling Yuan ran in. When the two saw everyone, they immediately shouted cheerfully, "Hi, Senior Brothers. Hi, Senior Sister."

Seeing that Qu Jinnan grew much taller than before, Han Fei said in surprise, "Oh! You look much stronger now, Nan!"

Han Fei patted Qu Jinnan on the shoulder.

Zhang Xuanyu stared at Ling Yuan in shock. "Who is this girl? It can't be Ling Yuan! She is much prettier than Ling Yuan!"

Ling Yuan rolled her eyes. "Senior Brother Yu, move aside."

Zhang Xuanyu: "..."

Han Fei put his arm around Qu Jinnan's shoulders and said, "Xiao Nan! I've prepared a gift for you."

Qu Jinnan's eyes lit up. So Senior Brother Han has not forgotten us! He couldn't help but say with joy, "Thank you, Senior Brother Han."

Ling Yuan couldn't help being curious. Han Fei prepared gifts for them? That's not Han Fei's style!

Han Fei stuffed the Sea Swallowing Seashell from his hand into Qu Jinnan's hand and said, "Xiao Nan! To enrich your knowledge, I have specially prepared more than 2,000 combat skills for you. Copy them tonight and take your time to read them, but remember to return it to me tomorrow!"

Everyone: "..."

Chapter 979: Purpose Of The Thousand Star City

The dinner lasted for about an hour, and Han Fei did give Qu Jinnan and Ling Yuan some things, but they were all ordinary things. He wanted to give them some more valuable things but Old Bai stopped him.

In the words of Old Bai, no strong person could become strong solely with the help of others. If they needed resources, they could get them from the ocean themselves.

After dinner, in Old Bai's room....

At this moment, Old Bai had put down layers of seals, and the four of Han Fei sat across from Old Bai.

They knew that they were going to the Thousand Star City, but they didn't know why they were going there...

The Unknown Place was already very vast. If they wanted to practice, they could just go to the outer sea.

They could finish exploring all the areas under the jurisdiction of the Yin-Yang World as long as it took enough time. It didn't seem necessary for them to run to the Thousand Star City.

Of course, Han Fei and the others had a rough idea of the reason, which was, Old Bai still wanted to rebuild the Thug Academy in the Thousand Star City. This was the only reason they could come up with.

At this moment.

Old Bai said leisurely, "You're going to become Law Enforcers soon, right? But don't make the breakthrough and become Law Enforcers in the Empyrean Waterfall."

Han Fei was puzzled. "Huh? Why?"

Old Bai said lightly, "It won't make much difference whether you do it there or not... Besides, if you make that breakthrough in the Empyrean Waterfall, it is easy for you to go astray and be affected by the laws there."

Han Fei thought about the Deep-Sea Giant Demon underneath. Maybe that was the reason?

However, judging from Old Bai's expression, he seemed to know the secret of the hole under the Old Turtle...

Han Fei asked, "President, you mean, we should make the breakthrough in the Thousand Star City?"

Old Bai nodded. "Xiaobai should know that in the Thousand Star City, there are several special places to do so."

Everyone immediately turned their eyes to Luo Xiaobai. What special places? Did Old Bai want them to make the breakthrough there?

Luo Xiaobai nodded slightly. "The Three Sacred Sites of the Thousand Star City, the Monument of God, the Sky Meditation Garden, and the Ideal Palace. No one has ever explored these three places thoroughly. They have been sacred places since the Thousand Star City was founded."

Han Fei and the other two looked at each other in confusion. What the hell were these places? Their names sounded so creepy... Would they be as dangerous as the Bone Yard?

Le Renkuang said, "Their names don't sound like they belong to this era!"

Zhang Xuanyu nodded. "Monument of God? Who does it commemorate? A Sea God?"

Han Fei remained silent. Judging from the statue of the Sea God in the Sea Quelling Painting, there might be many Sea Gods. They were more like existing to compete for the power of human belief.

Luo Xiaobai said, "I don't know. According to my grandfather's grandfather, these three places have been known about since the beginning of the Thousand Star City. Besides, there is very little information about these places. Even the big clans don't know much about them."

Han Fei looked at Old Bai and said, "President, do you want us to make the breakthrough in these places?"

Old Bai nodded. "It doesn't matter if you become Law Enforcers or not. Even if all four of you become Law Enforcers, you are just Law Enforcers. The Thousand Star City has an abundance of these..."

Hearing it, they all rolled their eyes. Come on, they were talking about becoming a Law Enforcer! At least it was better than a Hidden Fisher, right?

Old Bai said, "Let me put it this way! Some things may involve ancient times and the Age of Doom. I think you should know a little bit... About them."

Han Fei nodded. "In the Age of Doom, stars fell, and the water of the sea swept across the mountains and land. This is what I knew when I was exploring some ruins."

Old Bai looked at Han Fei and said slowly, "Do you know what they mean about the stars falling?"

The four shook their heads. They thought it was a meteor passing by. Otherwise, what did it mean?

Old Bai chuckled. "The Age of Doom. Why was there doom? Have you thought about the reason?"

The four still shook their heads. Who would know this?

Old Bai said leisurely, "I also learned about it occasionally by some coincidence. It's said that before the Age of Doom, that age was called the Age of the Gods..."

"The Age of the Gods?"

The four of Han Fei exclaimed. Wow, the name was really domineering.

Han Fei was excited. Even in the Age of Doom, there were Sea Quelling Bizarre Treasures and the Snow God's Temple. Then how glorious and splendid would the Age of the Gods have been?

Old Bai glanced at Han Fei. "The stars falling does not refer to the stars in the sky. It is very likely referring to the death of these gods."

"Wow..."

The four all gasped.

Zhang Xuanyu asked, "Do the gods refer to kings?"

Old Bai shook his head slightly. "I don't know. I am not from that era. However, you should know what happened after the Age of Doom: the Sea Clan rose. In the ocean, endless creatures are growing, squeezing the living space of human beings."

Le Renkuang's face trembled and he said, "But, what does this have to do with our going to the Thousand Star City?"

Old Bai sneered. "Do you know why the Thug Academy broke out in an all-out war with the big clans in the Thousand Star City more than 30 years ago?"

Han Fei was surprised. "Wasn't it because of the Sea Quelling Painting?"

Old Bai sneered. "The Sea Quelling Painting has always been there, although it was part of the reason, but not that important. Do you know what was left behind after the death of the gods in the Age of Doom?"

Han Fei took a breath and said, "The Heavenly Palace?"

Old Bai was taken aback for a moment. "Huh? Is there some information about this in the Sea Quelling Painting?"

Han Fei smiled and said, "Do you forget where the Sea Quelling Painting originates from?"

Luo Xiaobai looked at Han Fei. "Where is the Heavenly Palace?"

Han Fei shrugged. "I don't know. It should be above the Thousand Star City!"

"Haha!"

Old Bai sneered. "Nonsense, you know nothing about it at all. If the Heavenly Palace is just above the Thousand Star City, someone would have flown up already!"

Han Fei asked, "Then where?"

Old Bai narrowed his eyes and said, "If I'm not mistaken, it is an ancient mysterious place hidden in an independent space. The level of that place is much higher than the Thousand Star City."

Han Fei knew this very well. The Heavenly Palace ruled the entire Thousand Star City and the thirty-six towns, but it should be empty now, except for some puppets guarding it, which were all Explorers!

Old Bai said, "So far, I know that three people have been to the Heavenly Palace."

Luo Xiaobai asked in suspense, "Which three?"

Old Bai took a meaningful look at Han Fei. "Ren Tianfei who took the Sea Quelling Painting out of the palace, the previous marshal of the Scattered Stars Island who had lost control over himself, Han Guanshu... And, one of our Thug ancestors."

Everyone immediately looked at Han Fei, then at Old Bai, and finally looked at Han Fei.

Han Fei was speechless. "I... Old Han told me nothing about it!"

Le Renkuang asked, "Who is Ren Tianfei?"

Old Bai said, "You don't need to know who he is. You just need to know that after he came out of the Heavenly Palace, he was besieged by the big clans of the Thousand Star City, so he scurried off like a frightened rat, and almost died. It was the same case for Han Guanshu, Han Fei's father. Even our Thug

ancestor was the same... Do those big clans care about the Sea Quelling Painting? No, what they really care about is the Heavenly Palace.”

Han Fei’s heart did a flip. *Shit, it seems that all three have something to do with me!*

Old Bai said, “It seems that I want you to go to the Thousand Star City because I want you to rebuild the Thug Academy, but more importantly, I want you to find a way to enter the Heavenly Palace with the pretext of rebuilding the Academy. Why do I refuse to ally with the seven major sects? Because once we become allies, there won’t be any secrets among us.”

Luo Xiaobai frowned. “But even if we find a way to enter the Heavenly Palace, won’t we follow in the footsteps of those three seniors?”

Zhang Xuanyu and Le Renkuang both nodded.

Even the Venerables couldn’t resist them, and their Thug Ancestor was even killed. Who could handle this? Now, they weren’t even Law Enforcers yet.

Old Bai smiled mysteriously. “No, because your strength is too weak, even if you find a way to enter the Heavenly Palace, you won’t be able to enter it. So you can keep this secret and wait for the chance to enter it in the future.”

Han Fei glanced at Old Bai. “President, why don’t you go find it?”

Old Bai rolled his eyes and said, “We? Do you think the big clans will let us? Do you really think they are stupid?”

Han Fei thought, *But after all these years, they still failed to annihilate the Thug Academy, didn’t they?*

Suddenly, Han Fei’s heart flipped. *The Thug Academy must still have a trump card!*

Yes, it must be so.

Old Bai took out a puppet back then.

Was that puppet a clone of the Thug ancestor or something? If this is the case, the Thug Academy should still have a trump card that no one knows about...

Otherwise, the big clans in the Thug Academy would have annihilated the Thug Academy long ago.

Sure enough, Old Bai said, “As long as the strongest ones of the Thug Academy don’t return to the Thousand Star City, the big clans won’t dare to act rashly. However, we also can’t go to the city to find a way to enter the Heavenly Palace.”

Han Fei asked, “Can we?”

Old Bai nodded. “You are special! Xiaobai is from the Luo Family. And your background is even more complicated. They dare not touch you or indulge you. With the Thug Academy and your dad in check and balance, your safety will be guaranteed.”

Zhang Xuanyu said, “What about Kuangkuang and I?”

Old Bai said leisurely, “You two are not important.”

Zhang Xuanyu: "..."

Le Renkuang: "..."

The two were speechless.

Not important? Once again, their young hearts suffered a blow that they should not have suffered at their age!

Old Bai said, "OK, you will be faced with a lot of difficulties in the Thousand Star City this time. But they won't dare attack you openly... So, rest assured to rebuild the Thug Academy. Anyway, play it by ear in the Thousand Star City. You three can go now. Han Fei, wait a moment..."

Chapter 980: Old Bai's Instructions

When they left, Han Fei asked in surprise, "President, why do you have to tell me alone?"

Old Bai looked at Han Fei. "Don't make breakthroughs too fast. When you become a peak-level Law Enforcer one day, where will you go?"

Han Fei pondered for a while and decided not to tell Old Bai about the matter of the Water-Wood World for the time being. So he said, "When the time comes, Old Han will find a place for me."

Old Bai nodded slightly. "OK! You can't make the breakthrough within the power of the Thousand Star City. From the moment you got the Sea Quelling Painting, there were countless people watching you all the time. Now that your father has a plan for you, you can just let nature take its course... However, you'd better find a way to the Heavenly Palace before you become a peak-level Law Enforcer... Otherwise..."

Han Fei: "???"

"Otherwise, the big clans in the Thousand Star City will threaten your life. After all, there is more than one Venerable in the Thousand Star City."

Han Fei nodded. "Understood."

Old Han was a potential threat to the Thousand Star City. He had now appeared, and on the surface, this game had reached a stalemate, creating a short-term balance.

Han Fei had thought that the ultimate goal of their chess game was the Sea Quelling Painting, but it seemed that he was wrong. The real point of the chess game should be either to become a king or to uncover the mystery of the Heavenly Palace...

With this in mind, Han Fei felt so pressured.

He had to find a way to enter the Heavenly Palace, go to the Water-Wood World once he became an Explorer, and attack the Ten Thousand Demon Valley, but there were only eight years left...

Han Fei sighed. "President, what else do you want to tell me?"

Old Bai took out four small bottles and said, "These are Heaven Heart Pills, one for each of you, and there are two pills in each bottle. Heaven Heart Pills can help you when you're making the breakthrough

to become an Explorer. In the words of Old Jiang, this pill can not only increase the probability of breakthrough success by more than 30%, but will also allow you to comprehend your own way.”

Hearing this, Han Fei quickly grasped the bottles in his hands. In any case, these were really precious.

It could not only raise the probability of breakthrough success, but also help one understand his way, which was extremely precious.

Old Bai rolled his eyes and said, “Hey, calm down. It’s of no use to you for the time being. By the way, after going to the Thousand Star City, you can accept disciples. Find our academy some good talents.”

Han Fei pointed at himself and said in astonishment, “Us? Accept disciples?”

Old Bai said lazily, “Yes, do you have a problem with that?”

Han Fei said, “Isn’t our task to find a way to enter the Heavenly Palace? How do we have the time to find disciples?”

Old Bai sneered. “The Thousand Star City has more than these three places worth exploring. There is a place called the Thousand Star Proving Ground, where the disciples of the seven major sects and the children of the big clans in the Thousand Star City train themselves.”

“Really?”

Old Bai stood up and said, “The Thousand Star Proving Ground is a trial place that comprises thousands of secret realms. According to the degree of danger, there are different levels. From easy to difficult, there are 10 levels. Basically, each sect or clan controls dozens or even hundreds of secret realms. We shall try to control some too.”

Han Fei exclaimed, “Wow, you mean the secret realms are just out there, waiting for others to take them?”

Old Bai sneered, took out a Sea Swallow Seashell, and handed it to Han Fei. “Open it when you are going to the Thousand Star Proving Ground.”

Then he said, “You’ll find out by yourself. Okay, I’ve told you all that you need... Remember, when you arrive in the Thousand Star City, you must be strong, strong, strong. You can kill anyone who dares to provoke you. Set off tomorrow morning!”

...

The next morning...

Qu Jinnan and Ling Yu were sitting in the plantation, with a lot of jade slips in front of them. The two of them didn’t do anything last night but copy these jade slips. At this moment, their minds were chaotic, full of messy combat skills and techniques.

However, although Han Fei seemed to be mean to them, many of these jade slips were heaven-level combat skills and techniques.

At least, Qu Jinnan and Ling Yuan felt that starting today, they didn’t need to go to the Logistics Division to buy combat skills ever again.

At the same time, the two of them couldn't help but wonder how many people had Senior Brother Han Fei robbed to get so many combat skills and techniques?

Eating a pot sticker, Han Fei walked into the plantation and said with a smile, "Xiao Nan, Ling Yuan, how is your work going?"

The two raised their heads numbly, and Ling Yuan said, "Senior Brother, it's almost done. You are going to leave, right? Go ahead. Don't be late."

Qu Jinnan nodded. "Yes, Senior Brother, we're almost finished."

Han Fei touched his nose. *Huh? Are they driving me away?*

Han Fei said leisurely, "I think the outer sea is too dangerous, so you need to get used to it in advance. Come on, let me train you a little in the Twisted Jungle!"

Qu Jinnan and Ling Yuan trembled, looking at Han Fei helplessly.

Ling Yuan complained in her heart, *Are you a monster? Before leaving, you "trained" us and we were almost tortured to death! Not again!*

Luo Xiaobai said, "Alright, Han Fei, just let them go. They've done a good job. If nothing else, we should go now."

Ling Yuan and Qu Jinnan breathed a sigh of relief: Senior Sister was their savior!

Han Fei laughed. "No! I haven't finished my breakfast yet."

Half an hour later...

Chu Linyuan and Mu Qingchuan sent the four of Han Fei outside the spiritual barrier.

Chu Linyuan warned, "Junior Brothers and Junior Sister, this journey will be dangerous for you. Take care. However, don't be afraid. The Academy is behind you."

Mu Qingchuan smiled and said, "Linyuan and I had planned to go with you, but we're assigned with some other tasks. So you can only count on yourselves in the Thousand Star City."

Luo Xiaobai nodded. "Senior Brother, Senior Sister, don't worry about us."

Han Fei grinned. "Senior Brother, you can rest assured. I'll take note of whoever provokes us. You will avenge us later, right?"

Chu Linyuan: "..."

Then Han Fei shouted towards the yard, "President, we are leaving!"

Old Bai said indifferently, "OK! Remember to recruit some good students."

...

Not long after the four left, Chu Linyuan said to Qu Jinnan and Ling Yuan, "Little Junior Brother, Little Junior Sister, we'll have to leave everything here to you now. Improve your strength soon and go to the Empyrean Waterfall when you can."

Ling Yuan said in surprise, "Senior Brother Chu, Senior Sister Mu, are you leaving too?"

Mu Qingchuan said softly, "Yes, we all have our own affairs to tend to. You two are the representatives of this generation of the Thug Academy on the Scattered Stars Island. When you grow up, you should take care of your Junior Brothers and Junior Sisters. This is not a light burden."

Qu Jinnan took a breath and said seriously, "Senior Brother, Senior Sister, We will try our best."

Qu Jinnan, the innocent boy, felt that he was suddenly shouldering a heavy responsibility.

But Ling Yuan was thinking, *Why did Chu Linyuan and Mu Qingchuan leave too after the four others went to the Thousand Star City? It seems like they are planning something together, but the two of us are excluded from it.*

The Thug Academy seems to have some secrets. What on earth was the story behind this?

...

Out of the Twisted Jungle.

"Meow..."

Han Fei heard a meow as soon as they came out of the jungle. It was Big Yellow.

Sure enough, Big Yellow was crouching on the road. By the side of Big Yellow, Li Luoluo and Qing Chen were looking at them.

Big Yellow rolled his round eyes. "Han Fei, give me a male cat and a female cat."

Han Fei rolled his eyes. "You want to give birth to kittens again? What if you kill them again?"

Big Yellow turned his head and said, "No, I'll train them and make them strong. Then they can make babies, and babies will make babies. In this way, I can gradually change their genes."

Han Fei's eyelids twitched. Wow, Big Yellow has tried really hard to find himself a wife. He even planned to manipulate their genes! Poor cat.

With a thought from Han Fei, two cats, one male and one female, appeared, and they were immediately grabbed by Big Yellow with his paw.

Han Fei turned his eyes to Li Luoluo and Qing Chen and asked with surprise, "Why are you two here?"

Qing Chen said with a smile, "Brother Han, I heard that you are going to the Thousand Star City? Haha... Let's go together."

Li Luoluo threw four waist tags over. "I want to go too. For the time being, the number of Law Enforcers on the Scattered Stars Island is enough. I heard that the Thousand Star City is very interesting. I haven't been there yet, so I am going to go with you too."

The moment when Han Fei grabbed the nine-star waist tags, Xue Shenqi's phantom appeared. "Take away the waist tag. Take care..."

Xue Shenqi was as cold as ever, and he was gone after saying these words. And the four of Han Fei were thinking who were Li Luoluo and Qing Chen working for?

As for Big Yellow, he had been watching Han Fei leave. In his heart, Han Fei was his good friend! In Big Yellow's memory, no one else knew that he was a cat the first time they met him.

Therefore, seeing Han Fei leave, Big Yellow was a bit sad.
