

171 WILD OPINIONS

Nowadays, electronics were delivered on the day of purchase but of course, the customer could choose another day if he preferred so.

Lu Shu brought Lu Xiaoyu home and while they were at their door, Li Xianyi saw them and waved at Lu Xiaoyu, "Xiaoyu, come here, I bought you some good food today."

As he finished, he took out a bag of tidbits from his house for Lu Xiaoyu, insinuating a widening gaze from little fury. Why did this old man have so much good food? Little fury stared at the old man again as if he was a saint!

"What were you guys busy with today?" The old man gestured for them to come over.

But just then, the electronics delivery arrived. Lu Shu ran over to help with the moving and just when the worker wanted to tell Lu Shu he wouldn't be of much help, Lu Shu lifted the air-conditioner without effort and briskly walked into his house.

The worker was shocked. It was his first time bumping into something like this, "Young man, are you a metahuman?"

172 PARENT MEETING

The electronics at home were all replaced with brand new ones. The first device Lu Xiaoyu experienced was the television. Lu Shu had even subscribed to a cable television and changed the receiver, the cable tv also came with broadband and there was even wifi at home now.

Lu Shu was suddenly feeling blessed, and life had become more comfortable...

The electronics at home were all replaced with brand new ones. The first device Lu Xiaoyu experienced was the television. Lu Shu had even subscribed to a cable

television and changed the receiver, the cable tv also came with broadband and there was even wifi at home now.

Lu Shu was suddenly feeling blessed, and life had become more comfortable...

Letting Lu Xiaoyu enjoy her newfound happiness from the new television, Lu Shu went back to ponder the things he wanted to do in the future.

Training was definitely of top priority as only the strength from training could be beneficial in keeping a footing in this era, only then could Lu Shu settle down.

Just from the money-earning incident during the remains, he could not have accomplished that without strength. In other words, if he had followed the daoyuan class' training method, he couldn't have earned that sum of money.

173 NEW FRUI

Lu Shu was rather annoyed after he received Xi Fei's message. This was the first time he was informed of a parent meeting.

In the past when he was still at the orphanage, he would attend normal public schools. The teachers of the school knew about the situation of these students very clearly. Initially, these kids couldn't even afford to go to school and only with the help of an entrepreneur could they attend school. Prior to that, everyone had lessons in the orphanage by their own orphanage staff.

It was already a miracle to be able to sustain his good academic performance to get into Luo Cheng international school despite such circumstances.

Most orphans ended up as thieves and criminals. Their own character and upbringing were contributing factors but it wasn't fair to claim that society was not to be blamed

at all.

174 SEA OF CHI

Lu Shu felt that he had not seen a different prize in an extremely long time... It was stinky tofu everyday, so much that he had subconsciously treated this lottery as a tofu buying system!

But just as this fruit appeared, Lu Shu's surprise felt like a floodgate which just opened, and clear fresh water flowed through.

The mysteriousness of the refresher fruit aside, the celestial fruit was practical for training. This experience in the remains had taught him that training diligently was an act which complemented his development. The most effective was still annoying other people!

Lu Shu opened his system's inventory and saw the name of the fruit - Chi fruit.

He was stunned. He understood what a celestial fruit was, but what was a chi fruit?

175 I AM LU XIAOYU'S PAREN

Li Xianyi was angered and returned home without a word. Alone, Lu Shu was trying to understand the changes in his chi. He had no idea that the first breakthrough of vitality training was to unlock the sea of chi. But he had a feeling that the vitality was related to this sea of chi...

Lu Shu was shouting and training, and at the same time feeling the changes to his chi. The more he focused, the stronger his chi felt. The change was slow but he could definitely feel it.

At this time, he was thinking, what would happen if he ate more chi fruits?

Li Xianyi wanted to sleep at home, but how could he when Lu Shu was shouting outside?

The old man did not understand. Why did his master prank him in the past but now that he wanted to prank Lu Shu, it failed? What sort of luck did Lu Shu have?!

176 DUMBSTRUCK!

The other parents were stunned by Lu Shu's youth, but his physique was already similar to that of an adult. Also, there were only parents here and no other students, so no one thought much about it. The glasses were also actually quite convincing.

Some parents were curious, "Did your child mention this Lu Shu? How powerful is he exactly?"

Actually, they didn't necessarily care about this 'Lu Shu', but it's just that at this juncture of either quitting or staying with daoyuan, they wanted to know how powerful their child could become. It was just like buying something; if something was really expensive and the buyer is tempted to buy it, he would ask someone else if it was worth it.

Lu Shu mentioned reservedly, "This Lu Shu is really powerful. My Xiaoyu said that Lu Shu sliced those skeletons like vegetables in the remain. How many pounds did a normal punch carry? A few hundred? Do you guys know how many pounds his punch weighs? A few thousand!"

177 ON WHAT BASIS

Xi Fei's voice was firm and resounding, as though there was no room for discussion. Instead of calling it a discussion, it was more like a notification.

The entire Luo Cheng international school was silent, probably because all the parents were facing the same dilemma and having the same difficulty in deciding.

The traditional mindset and the new era had collided, like how two trains were going to depart from the same station. Everyone had to make a choice in this new era, whether to maintain the original mindset or to step into a new journey.

The original mindset refers to a normal life. Meaning that once everyone made this choice, their child would continue studying, then find ordinary 9-5 jobs.

While the new journey could mean a different life, a different world, and even an unlimited amount of possibilities ahead.

Such choices were too common in life.

178 LET'S START A CHAT GROUP

This parent meeting had only one message from the start- for all the parents to go back and discuss with their children whether to quit or stay.

As the parents left, they all had a troubled expression, especially those of class f9...

But there were some exceptions. Some parents had already reached a consensus with their children as to whether to leave or stay. In comparison, these parents seemed more relaxed. Of course, some who had decided to leave were now tempted to stay after hearing the second lieutenant rank.

Being an officer meant that one would never go hungry and it would be easier to find a wife...

In the current world, traditional families all had a common mindset- that a stable job was better than any other job.

As Lu Shu left, he was still gleefully looking at the parents of the class f9, "Should we

start a group chat for parents? I see that many classes' parents have started a group chat, and it's extremely convenient."

179 A VISIT FROM JIANG SHUYI

When Lu Shu went to the yard to train on his sword again, Li Xianyi sensed that Lu Shu's chi was much stronger. He wondered why Lu Shu's chi strengthened so quickly.

As no one spoke about the chi fruit, who would've guessed? He could only assume that Lu Shu was talented and that he wasn't wrong about Lu Shu.

But he still had to remind Lu Shu regarding his control of chi, "Once there are signs of the chi trying to breakthrough, you have to suppress it. Back then, we didn't even sleep in order to suppress our chi. Our master would make us wake up after sleeping for a moment to continue to control our chi. That was a really painful period of time and I hope you're mentally prepared."

These words were still rather simplified. They weren't just not allowed to sleep, they didn't even dare exert strength in the toilet in case they lost focus and an exertion of strength would cause the sea of chi to unlock...

180 MILITARY SCHOOLS

Jiang Shuyi followed Lu Shu to his yard and on the way, he asked curiously, "You don't look too well, are you feeling uncomfortable somewhere?"

"I'm fine," Lu Shu wasn't uncomfortable but was constantly worried about his chi colliding into his sea of chi. It was tough.

In fact, Li Xianyi's sword of the will was much harder than the daoyuan class' training. Even the initial swordplay training was something many wouldn't be able to persevere through, not to mention the subsequent endurance game.

It was Jiang Shuyi's first time at Lu Shu's house, and seeing the plants in the yard gave him a feeling of comfort.

This yard was like a little utopia amongst the bustling city.

Entering the house, Lu Xiaoyu was still sleeping. It had become a routine for her to go back to sleep after eating breakfast and little fury must be playing somewhere.

Lu Shu put down his stuff, "what do you want to talk about?"
