

Hidden Billionaire Chapter 55 - 1 Million Bounty - C55 1 Million Bounty

A lot of readers left messages in Blue Bird's comments section and even mentioned Brother Tian.

"That person must truly be a big boss to be able to give a donation of one million yuan in one go."

"The rich really are generous when they make a move."

"Admirable!"

"That is what we call a true fan of Blue Bird. To have such a wealthy comrade, he sure does make us proud!"

Everyone was full of admiration for Brother Tian. All kinds of flattering comments filled the entire comments section.

Since there probably wasn't a tycoon like Wu Tian on the novel website, the users proceeded to make a big deal out of it.

In addition to the flattering comments for Brother Tian, there were also some readers who left messages for Diamond Old Wang.

"Since Brother Tian gave a million yuan to Blue Bird, shouldn't you follow along as well?"

"Didn't you just boast about your wealth just now? Why are you mute now?"

"He doesn't even dare to speak. It looks like he's been terrified."

Old Diamond King never intended to respond any further. Perhaps he became annoyed from getting called out by so many users, so he had no choice but to reply in the comments section: "You are ruthless. I admit defeat."

Seeing this message, the comments section exploded again:

"He really is a coward."

"You cowardly bastard, you have no qualifications to fight against Brother Tian."

"You even let down your name."

In the comments section, a large wave of hate comments, mocking and ridiculing Old Diamond King, erupted. Everyone was now laughing at the Old Diamond King, belittling him as worthless.

Looking at these messages, Wu Tian seemed to remain unfazed, not feeling a single emotion towards the users' behavior.

Just as he was about to exit the website, he suddenly received a private message from the author, Blue Bird.

He opened the mailbox and saw Blue Bird's private message: "Brother Tian, why did you donate so much money to me?"

Wu Tian replied, "Take it as me acknowledge your work. It'll hopefully serve as a form of encouragement for you."

Blue Bird: "Oh my god, one million yuan, this is way too much!"

Wu Tian: "Your book is worth this amount of money. Your potential is priceless, so just keep up with the good work!"

Blue Bird: "Brother Tian, I appreciate your encouragement and help, but you really don't need to spend so much money on me. I feel that I owe you too much now."

Wu Tian: "If you want to repay me, write a good book and present the best story to me and to all your fans."

Blue Bird: "Thank you. Thank you so much!"

Wu Tian: "Rest early, don't stay up late. Bye bye!"

Wu Tian left the website after sending the private message. With that, he proceeded to work hard studying before he eventually went to sleep late at night.

The next day at seven o'clock, he got up to train. He had always been very diligent in his training and studying — never slacking off.

"Boss." Just as he was practicing hard, Azure Dragon walked over and gave him a deep bow: "I really do admire your perseverance and determination from the bottom of my heart."

"Stop flattering me." Wu Tian wiped off the sweat on his forehead and continued practicing martial arts.

These were the moves and tricks that Azure Dragon taught him a while ago. They looked simple, but it would not be easy to truly comprehend them — as it requiring a long period of hard work.

"Boss, I'm not flattering you. Your perseverance is truly admirable," Azure Dragon said in a serious tone. "I thought you were just being impulsive and would give up after a few days of studying and training. I didn't expect you to become more determined, the longer you trained."

All this time, he felt that rich people like Wu Tian only knew how to live like a prince, never actually working hard to practice their martial arts.

However, after he got to know Wu Tian more, he realized that this boss was different from the others he had met. Unlike the others, he actually practiced hard during the day and even stayed up late at night to study.

He felt extremely fortunate to be working under such a boss.

"If my strength is the factor I'm lacking for my ambition, I can only study as hard as I can." Wu Tian stopped practicing and turned to Azure Dragon, "Come, test me."

"Alright!" Azure Dragon also wanted to probe out Wu Tian's recent progress in his cultivation, so he swung his fist towards him at an instant.

Seeing how Azure Dragon's fist was accelerating at him, Wu Tian avoided the attack by a hair's breadth — not wasting a single movement. At the same time, he countered with a kick aimed straight towards his opponent's lower body.

Azure Dragon, with his quick reactions, raised his leg and attacked back with all his strength.

With a dull thud, Wu Tian was forced to retreat repeatedly and finally collapsed powerlessly onto the ground.

Azure Dragon rushed forward to help Wu Tian up from the ground and asked with concern, "Boss, are you alright?"

"I'm fine," Wu Tian shook his fist in disappointment and sighed. "It seems like I still have much to learn."

"The boss has already made great progress. I only reached this level after training for more than 20 years."

"One day I will surpass you," Wu Tian gritted his teeth and continued to cultivate.

Halfway through practice, his phone's ringtone sounded. It was Lee Mu calling, asking him to go inspect Tianmu Technology and to discuss further regarding the investment.

With that, Wu Tian took a quick shower and got Uncle Fugui to drive him to Tianmu Technology.

The company, located in the hi-tech area of the city, built its office section in a very unique U-shape. Furthermore, the asymmetrical designs and warm color decorations created an atmosphere within the office that feels fresh and comfortable.

Wu Tian first took a walk around the company and found that all the employees acted very casual and friendly. Despite that, they did not laze around either as they were constantly busy with their assigned jobs.

After walking around, he found himself at the general manager's office and knocked on the door.

Walking into the office, he saw Lee Mu sitting at his desk, organizing some documents.

"Hello, Boss Wu," Lee Mu stood up and greeted. At the same time, he handed over the documents in his hand and explained, "This is our company's details, including various businesses and profits."

"Alright, I'll take a look first." Wu Tian took the documents and sat in front of the sofa as he looked through them meticulously.

Through the information he read from these documents, he found out that the management of Tianmu Technology was a little messy, and currently, the main way that they did their business was to make money through the city's network. As such, the profits were also very low, barely able to maintain the company's operations.

After understanding the general situation of the company, Wu Tian raised his head and looked at Lee Mu, "So far, your company is in a much worse situation than I had imagined."

"If it had gone well, I wouldn't have a need to go look for people to invest in my company in the first place," Lee Mu replied noncommittally.

"Alright, I appreciate your honesty." Wu Tian stood up and walked in front of the desk and stretched out a finger, "I plan to invest one hundred and fifty million yuan."

"One hundred and fifty million yuan?"

Lee Mu instantly beamed with excitement when he heard the amount of money Wu Tian was willing to invest in his company.

After all, the only thing the company is in need of right now is money.

As long as Wu Tian was willing to invest money, Lee Mu had the confidence to turn that money into a steady stream of profits.

"However, I want forty-nine percent of the shares in Tianmu Technology," Wu Tian added.

These words were like a bucket of cold water, instantly extinguishing the fiery smile on Lee Mu's face.

Lee Mu adjusted his glasses and reminded him, "We have 10 shares for our staff. If you want 49 shares, that would be equivalent to controlling the entire company."

"I know. I indeed want to control the company."

"That's impossible," Lee Mu refused decisively.

He naturally would not be willing to let the Tianmu Technology — that he had painstakingly built up from the ground — be taken control of by someone else.

"Though I may be in control, the power to manage the company itself will be given to you. That way, I won't have any direct management power over the company," Wu Tian made a concession.

However, this was not a concession. At this moment, Wu Tian was still a young bird in its best, and he did not have the confidence nor ability to manage a whole technology company.

"But..."

Before Lee Mu could refuse, he was interrupted mid-sentence by Wu Tian, "I have a lot of resources in my hands. If we cooperate, it would definitely be beneficial to Tianmu Technology in the long run."

Hidden Billionaire Chapter 56 - Buying Tianmu -

C56 Buying Tianmu

"What resources do you have?" Lee Mu asked in a skeptical tone.

Previously, he had people investigate Wu Tian, yet none of them could uncover his real identity. All he knew was that there were two good restaurants under his banner.

How much resources could a restaurant owner have? How could he help his technology company?

"Just now when I looked at the documents, I noticed that your company has a dispute with Tianyin Group. They're suing you for tort, aren't they?" Wu Tian asked with a wry smile.

"Yes!" When he mentioned this, Lee Mu was quite dejected.

The lawsuit against Tianyin Group had dragged down Tianmu Technology, causing the entire company to feel powerless in developing their leading businesses.

If the lawsuit is not handled well, it will definitely have a negative impact on the future development of the company.

"I can use my resources to settle this dispute for you," Wu Tian stated with a face full of confidence.

The reason he was so confident was that Tianyin Group was an enterprise that belonged to their Wu Family. To him, this matter could be settled with a single phone call.

"Boss Wu, Tianyin Group is a large company. How are you going to deal with them?" Lee Mu expressed his doubts.

Tianyin Group was indeed a giant company with many influences. Thus, they never really took Tianmu Technology seriously.

Even after spending half a year, his Tianmu Technology still wasn't able to settle the dispute between them. What could a mere restaurant owner like Wu Tian do to deal with them?

"I have my resources. One phone call is enough to settle your dispute with the Tianyin Group," Wu Tian shook his phone and said with a smile.

"Then I would like to see your 'resources' for myself," Lee Mu adjusted his glasses and said in a provocative tone. "If you can settle this dispute, I'll let you take control of my company without any hesitation."

He didn't think Wu Tian had the power to settle this dispute.

"Give me a few seconds," Wu Tian stated, taking out his phone to call his secretary Long Yun. He only uttered a few words into the phone before hanging up.

To the Wu Family, such a small matter was not even worth mentioning.

With Secretary Long's efficiency, she would be able to solve the problem perfectly in less than half an hour.

After only twenty minutes, Lee Mu received a call. Hearing the words spoken from the other party, he burst into pure joy.

"That's great! Tianyin Group has withdrawn its lawsuit against us. They've finally dropped the lawsuit!" Lee Mu shouted at the top of his lungs with great excitement after hanging up.

Just now, the legal authority had called, saying that Tianyin Group had withdrawn from the lawsuit and promising that they would no longer hold Tianmu Technology accountable in the future.

Needless to say, it was all Wu Tian's doing.

After his series of elation, he slowly raised his head and looked directly at Wu Tian in awe. "I really didn't expect you to solve a problem that has been haunting our company for half a year with a mere phone call."

"I told you... I have the resources."

"It looks like I have severely underestimated you. Your power is indeed astonishing." Lee Mu could not hide his exhilaration as he looked at Wu Tian with an astonished expression.

The fact that this brat in front of him could settle the dispute over Tianyin Group with a single phone call showed just how powerful the connections and resources behind him were.

Wu Tian went straight to the point. "Then what about the investment?"

"I'm a man of my words. You invest one hundred and fifty million yuan in my company, and I'll give you forty-nine percent of the shares," Lee Mu gritted his teeth and decided in an instant.

Although he felt bad about handing over the controlling share to Wu Tian...

The resources and strength behind Wu Tian, however, would end up as a great source of backing for Tianmu Technology. These kinds of benefits were definitely more important than money itself.

"I look forward to cooperating with you," Wu Tian smiled and took the initiative to extend his right hand.

"Same here," Lee Mu responded. Reaching out his hand to shake Wu Tian's, the two of them smiled at each other in tacit understanding.

In just half an hour, the two of them had reached an agreement.

Next, Wu Tian and Lee Mu proceeded to sign the official contract and a share transfer agreement.

As soon as he signed the contract, Wu Tian then transferred the first 50 million yuan into the company's account.

After investing in the account, Lee Mu brought Wu Tian and introduced him to the staff: "This is Wu Tian, Mr. Wu. From today onwards, he will be the big boss behind our Tianmu Technology. Let us give him a round of applause."

"..."

Under Lee Mu's lead, applause resounded throughout the office. However, it was obviously a perfunctory applause.

Lee Mu pressed his hand down, signaling everyone to be quiet. He turned around and said to Wu Tian, "Boss Wu, please enlighten us with a few words!"

"Alright!"

Wu Tian glanced at the employees and said, "As a greeting gift, I'll bless everyone with a total of five hundred thousand yuan."

"..."

The moment he said that, the office burst into thunderous applause.

If the applause from before had been a perfunctory one, then this time, everyone wholeheartedly applauded for their new boss.

"I hope to get to know everyone and work together to build up the company. As long as the company earns money, I guarantee that I won't treat everyone unfairly," Wu Tian said passionately like a real general.

"Alright..."

The staff applauded again.

After the applause, everyone expressed their opinions:

"Thank you, Boss Wu, for blessing us with your gift. We will definitely work hard to not disappoint you."

"Boss Wu is truly open-minded. With such a generous boss, we'll definitely work hard."

"Right, we have to follow Boss Wu and expand the company."

"It's our fortune to have a boss as generous as Boss Wu."

"..."

All the employees were now motivated by great passion. They each praised Wu Tian as a good boss and expressed that they would follow Boss Wu — working as hard as they can to meet his expectations.

"Alright, let's all go to work first. I'll split the five hundred thousand so that everyone will get their share." Wu Tian was very happy to see his employees being so passionate.

He actually used five hundred thousand yuan to buy out his employees' hearts.

As long as he could win over the employees, he could definitely help the company earn even more money. The five hundred thousand yuan will definitely not be in vain.

The staff returned to their posts and continued to work. Lee Mu then toured Wu Tian around the other parts of the company building.

As he passed the resting area, he noticed that one of the employees was playing a game he had never seen before.

Standing behind and watching the employee play for a while, he found it to be quite intriguing and seemed quite novel.

It was only after finishing the first round of the game that the staff noticed his surroundings.

Seeing Wu Tian and Liu Mu standing behind him, he quickly put away his phone and greeted them: "Hello, Boss Wu, Director Liu."

"What's your name?" Wu Tian asked the staff who were playing the game in a friendly tone.

"Zhou Cheng," The staff responded instantly with a look of worry, afraid of being punished and scolded.

"What game were you playing?"

"It's my newly developed mobile game."

"You developed it all by yourself?"

"Right." Zhou Cheng nodded heavily and explained, "I was bored a while ago and decided to use my free time to develop a game. Thus, I would end up testing the game whenever I'm free."

"You developed it independently?"

"Yes."

"Play a bit more. Let me see," Wu Tian instructed.

"This..." Zhou Cheng hesitated for a few seconds before finally nodded his head. Immediately he took out his phone and started to play the game again.

Wu Tian stood at the back and watched carefully. His eyes stared at the screen without blinking as if he was mesmerized.

Only when Zhou Cheng finished playing the game did Wu Tian regain his senses and nod in satisfaction, "Not bad, this game is very interesting."

"Then I'll go back to work first," Zhou Cheng said, immediately turning around and walking back into the office.

Watching the back of Zhou Cheng's figure as he left, Wu Tian could not help but say to Lee Mu, "That kid really does have talent."

Hidden Billionaire Chapter 57 - Develop Mobile Games Strongly -

C57 Develop Mobile Games Strongly

"We have a lot of people like Zhou Cheng in our company," Lee Mu stated, raising his head with a hint of pride.

All the programmers in the company had been carefully selected by him and had been supported on a high salary.

"Then has our company ever developed games before?" Wu Tian pinched his chin and asked thoughtfully.

"We did."

Lee Mu nodded and said with a disappointed expression, "Our company once wasted a lot of our sweat and tears in an attempt to develop this one game. In the end, it didn't pay off, so we had to temporarily run aground."

"That's because you didn't find the right entry point. For example, the game that Zhou Cheng was playing just now was not bad. If you put it into the market, it would definitely sell quite well."

"That game?" Lee Mu was quite surprised. He didn't expect Wu Tian to be interested in Zhou Cheng's game.

"I used to be a game addict too. From my point of view, his game definitely has the potential to go big in the gaming industry."

"Are you sure?"

"Of course I'm sure." Wu Tian thought for a moment and suggested, "How about this? Why don't you form a team with Zhou Cheng and a few other programmers to develop that game of his? Any opinions?"

"I can give it a try!" Although Lee Mu did not think highly of the game, he nevertheless dared to give it a try and was not worried about failure.

After all, Tianmu Technology already had a fault-tolerant mechanism. With that, they could afford to constantly explore and innovate within the limits of one's ability while learning from one's failures.

"Okay, tell Zhou Cheng to meet me at the office. I'll talk to him about the development of his game." After saying that, Wu Tian turned around and walked into the office.

He sat at the sofa for a moment, then saw Lee Mu come in with Zhou Cheng.

Zhou Cheng was a bright and handsome young man, only in his twenties.

"Take a seat."

Wu Tian pointed at the sofa and asked Zhou Cheng to sit down. He personally poured a cup of coffee and handed it over, "Here, have a cup."

"Thank you, Boss Wu." Zhou Cheng quickly stood up. Feeling flattered, he accepted the coffee cup with both hands.

"Have a seat."

Wu Tian sat opposite Zhou Cheng. He smiled and asked, "Are you interesting in publishing your game onto the market?"

"Of course! I've been dreaming of publishing my own game!" Zhou Cheng exclaimed in excitement. After all, his intention for developing his game was to ultimately publish it on the market through the company.

However, during the internal audit, Zhao Yiming, the vice president of the company, firmly objected.

As such, his game had already shattered into shambles before it had even reached the testing stage.

Even then, he was not willing to give up on his dream. Every day, he was still desperately testing the game in an attempt to improve it, and if he was given the chance, he would immediately push the game into the market.

"Well, the company intends to publish your game into..."

Before Wu Tie could finish his sentence, Zhou Cheng stood up and said excitedly, "Boss Wu, are you serious?"

"As serious as can be."

"Boss Wu, you really are my benefactor. Thank you, thank you so much!" Zhou Cheng bowed over and over to express his gratitude. He was so excited that tears were now flowing out of his eyes.

"Don't be happy too early." Wu Tian replied. Paused for a moment, he smiled and stated, "This game of yours is far from completion and needs to be optimized in all aspects. Thus, I will assign two other programmers to assist you. You will be the one to lead them in the development of your game."

"Thank you, Boss Wu."

"I'll give you guys a week to optimize the game and conduct an internal test."

"Don't worry, I promise I won't let you down," Zhou Cheng raised his right hand above his head and guaranteed with a firm tone.

"In addition, after this game enters the market, I will give you two percent of the profits as a share while the bonus will be counted separately."

"Thank you, Boss Wu." Zhou Cheng bowed once again to express his gratitude. At this moment, his entire being was filled with energy and determination to finish developing his game. At this point, he might explode from excitement at any moment.

With Boss Wu's strong support, in addition to his own programming abilities, Zhou Cheng could definitely make the game profitable in the market.

However, when he thought of Vice President Zhao, the smile on his face instantly sank, "Boss Wu, I'm afraid that Vice President Zhao will not agree to the development of this game."

It was precisely because of Zhao Yiming's rejection of the proposal of his game that led to the game's internal test being run aground in the first place.

"This Vice President Zhao you're speaking of is...?" Wu Tian was confused.

He didn't have a complete understanding of the structure of the company, he only knew that Lee Mu was leading several people to establish the company together.

"Vice President Zhao's name is Zhao Yiming."

Lee Mu quickly interrupted, "Similar to me, he's also one of the founders of the company."

"Does he not agree in the development of this game?"

"Yes." Lee Mu nodded and instructed Zhou Cheng, "You can go back to your work now. We will take care of the matter regarding Vice President Zhao."

"Alright!"

Zhou Cheng answered and proceeded to leave the office.

Lee Mu poured a cup of boiling water and handed it to Wu Tian. He then continued, "Zhao Yiming strongly opposes the development of this game. Previously, it was because of Vice President Zhao's objection that the game did not end up going through the testing phase."

"Why is Zhao Yiming so opposed to this idea?"

"The main reason is because his mind has become rigid over the years and is afraid of failure."

"Is that so?"

"In recent years, Zhao Yiming and I have built up a lot of different opinions regarding the way we handle things in the company. Since our management methods and philosophy differ from one another, we often argue about matters regarding the company."

"Where is he?"

"He's out on a business trip at the moment," Liu Mu replied, glancing at the time. "He might be back soon."

"Then I'll wait for him here." Wu Tian wanted to see this Zhao Yiming. If necessary, he would think of a way to help Lee Mu regain the full authority of the company management.

Technology companies such as their's falter in the face of power distribution and executive disagreements. Such issues would definitely pose a major problem for the development of the company.

"Boss Wu, why don't we go eat first? We'll wait as we eat," Lee Mu suggested.

"No need, you go ahead." Wu Tian, taking his seat on the sofa, picked up the magazine on the shelf and started reading it.

He waited for an hour before Vice President Zhao Yiming finally returned.

Zhao Yiming, already in his forties, looked old and decadent with his bald head.

After Zhao Yiming returned to the company, he rushed to the office of the general manager, "Lee Mu, I heard that you pulled in a powerful investor for our company."

"This is Wu Tian." Lee Mu pointed at Wu Tian and introduced, "Not only does he have extraordinary strength and an abundance of resources, but he even invested a hundred and fifty million yuan in our company, ultimately becoming our controlling shareholder."

"Hello, Boss Wu. It is a pleasure to meet you."

After listening to the introductions, Zhao Yiming hurriedly shook hands with Wu Tian and greeted, "I heard that you helped our company resolve the dispute with the Tianyin Group?"

"It was nothing."

"I hold great admiration and respect for you. I didn't think that the moment you arrived at our company, you would be able to solve such a big problem for us."

"Right now, there is no longer a difference between us. I am also a part of the Tianmu Technology," Wu Tian reminded him with a smile.

"Right, right!"

Zhao Yiming slapped his forehead, "In order to welcome Boss Wu to our company, I will treat you to a meal."

"No need." Wu Tian waved his hand, "I was waiting for Vice President Zhao to come back to discuss the company's new project."

"What new project?"

"I plan to launch the game that Zhou Cheng is currently developing."

"No." Hearing this, Zhao Yiming's face instantly collapsed. He then said with a determined tone, "I don't agree with the development of that new game."

"And why is that the case?"

"I just don't agree."

"It seems that Tianmu Technology is no longer up to you to manage, right?" Wu Tian asked in a domineering tone after seeing the unreasonable side of Zhao Yiming.

Wu Tian's attitude towards others changes according to their attitude towards him — something known as mutual respect.

Hidden Billionaire Chapter 58 - Struggle for Rights -

C58 Struggle for Rights

"I am the founder of Tianmu Technology, I have the authority to decide matters within the company," Zhao Yiming declared with his head held high, full of tenacity.

"The decision is in Lee Mu's hands."

"That's right." Zhao Yiming nodded and changed his tone, "Boss Wu, you have invested in our company and have been a shareholder as a result. That, however, doesn't mean that you can directly interfere with our business affairs."

"I simply want to make money for the company."

"You're just messing around," Zhao Yiming, his teeth chattering, spoke with an irritated tone.

*

Seeing that the two were about to argue, Lee Mu quickly went up and reminded Zhao Yiming, "President Zhao, don't forget your status in the company."

"He's simply an investor while I'm one of the company's founder. According to the contract, he has no right to fire me," Zhao Yiming exclaimed arrogantly, not put Wu Tian in his eyes whatsoever.

"President Zhao, don't go too far. Wu Tian is our investor... our boss," Lee Mu cleared his throat and warned.

Zhao Yiming was getting more and more preposterous by the second. He was no longer as humble as he was when he founded Tianmu back in the day.

"Cut the nonsense. With me here, none of you should even think about developing that game," Zhao Yiming directly said those harsh words.

"You..." Lee Mu was speechless.

Getting Wu Tien to invest in their company certainly was not an easy feat; thus, Zhao Yiming's words were like a slap to his face.

Neither of them spoke.

The atmosphere in the office was clearly tense.

If it had been any other investor, they would have been enraged by this unreasonable argument, withdrawn their money, and left the company by now.

On the contrary, Wu Tian remained calm. He pondered for a moment, then said to Zhao Yiming, "There's no use arguing here. Then, how about this? I will be the one who invests in Zhou Cheng's game. If the game makes money, the money will be given to the company. But if the game loses money, I'll bear the expenses."

"Are you sure?"

"I'm sure."

"Alright, in that case, I have no objections," Zhao Yiming agreed decisively.

The reason why he refused the idea before was because he was worried about the company losing money. Therefore, he naturally had no objections to this kind of business that did not pose the company any risks.

"Don't be happy yet, I still have other conditions," Wu Tian's tone changed. "If I can't make money from this game, I won't be involved in the company's business in the future. On the contrary, if I can make at least thirty million yuan from this game, you will lose the authority to manage the company in the future, what do you say?"

"This..."

"Scared?"

"Alright, I agree to your condition," Zhao Yiming finally agreed after a moment of thought.

Having seen Zhou Cheng's game before, he knew that kind of game would only make them lose money, let alone earning thirty million yuan in profit.

"Deal!" The corner of Wu Tian's mouth raised into a pleased smile. "Then I'll sign an agreement to prevent you from taking back your words."

Under the witness of Lee Mu and the company's legal department, the two of them immediately signed the agreement.

According to the agreement, if Zhou Cheng's gaming profit could exceed thirty million yuan in half a month, Zhao Yiming would no longer have the right to manage the company.

On the other hand, if the game does not earn thirty million yuan within the allotted time, Wu Tian will no longer interfere with the company's affairs.

This was a wager agreement on the fight for control over the company.

After signing the agreement, Wu Tian assigned two assistants to Zhou Cheng. He had the three of them form a team to specifically optimize and test the game.

Wu Tian also stayed at the company, following the progress of the game in real time. Furthermore, he arranged for people to prepare the release of the game onto the market.

After working hard for several days, Zhou Cheng and his two partners finally managed to optimize the game's effects and achieve a first-rate experience.

The game is then tested within the company.

Including Wu Tian, Lee Mu, and all employees of the company, everyone began to play this mystery game.

Everyone's job was to find any kind of bugs or loopholes within the game. Whoever found a bug would receive a bonus of two thousand yuan which motivated the employees to do so.

After the internal test and optimization, the game was now almost complete. With that, the integration of the brand-new mobile mystery game was finally completed.

The game was named Zhou Cheng Mobile Game and was pushed into the market for public testing.

The success of the game depended on the feedback given by the players from the game's early access.

With Tianmu Technology's limited resources, however, the early access of the game's releases could only be promoted on the official account as well as in the media. As such, the number of beta testers were very limited.

If you want more people to know about the game, you will naturally need a bigger platform to promote it on.

At the moment, Seafood TV was a pretty large streaming platform.

After discussing with Sun Sheng, he decided to advertise Zhou Cheng's Mobile Game on the Seafood TV banner.

After talking about the advertisements, Wu Tian dialed Huang Lan's number, "Elder Sister Lan, do you have time tonight? I'll treat you to a meal."

"There are no benefits in this world without reason." Huang Lan saw through Wu Tian's thoughts immediately, "Say it, is there something you need my help with?"

"Not only is Sister Lan beautiful, she's also quite intelligent."

"You really know how to talk. Tell me, what is it?"

"It's like this. I recently developed a new mobile game called, Zhou Cheng Mobile Game, and I want you to help me promote it..."

"No way!" Huang Lan decisively rejected his request without waiting for Wu Tian to finish his sentence. "I'm a singer. Promoting a Mobile Game contradicts my position."

"Why don't you play that game first?"

"That should be fine."

"I'll send you the link. Download it yourself." Wu Tian hung up the phone and sent the download link over.

After sending the link, he opened Seafood TV and entered Huang Lan's live streaming room.

Seeing her live stream, Wu Tian could see that her stream was advertising the Zhou Cheng Mobile Game. Similarly, she was also promoting the game herself in her live stream.

This woman... Although she said she would not help, to think she is actually advertising the game personally.

Wu Tian watched the live stream for a while before he started to play game himself.

To be honest, this mystery game was really quite good. He was soon addicted to the game and enjoyed playing it.

Though he was indeed immersed in the game, he still did not disregard his other responsibilities and goals.

After playing a few games, he began studying and practising martial arts. A busy person he was.

When he finally went to school the next day, he was criticized by Teacher Mu Ran once again for his absence at school.

"Student Wu, why did you skip classes these few days?" Mu Ran scolded with a stern face, her beautiful face now full of anger.

"Teacher Mu."

Wu Tian scratched his head in embarrassment and explained: "I've been working on a small business recently, so I can be considered to be practising the knowledge I've learned. Besides, I have also been keeping up on my own studies, not falling behind."

"You are self-studying at home?"

"Right."

"Then what have you been learning recently?"

"Management and finance courses."

"Fine." Hearing this, the anger on Mu Ran's face dissipated a little, and she began speaking sincerely, "The classes you've studied at home are not bad, but you still need to continue attending your classes."

Every time she questioned Wu Tian before, she found that the boy could always answer her questions.

He was even proficient in the things she had not taught him in class yet. Furthermore, his ability to learn in advance was indeed commendable.

"Teacher, I understand." Wu Tian looked up at Mu Ran and lowered his head obediently.

When he looked down, he noticed that Mu Ran's dress was torn. Though he wanted to notify Teacher Mu, he did not think it was appropriate to do so at the moment.
