

His True Colors Novel Chapter 2051 - 2054

Chapter 2051

George Han nodded, turned the fairy god ring into a key again, and put it into the small hole of the stone gate.

As the key of the fairy ring became more bright red, the entire mountain was filled with water, and the stone gate was opened.

Long Po obediently retreated, leaving only George Han leading Amelia Su through the stone gate slowly and into the cave.

When the two entered, the fairy ring turned into a ring again and flew on George Han's finger, and Shimen closed again.

boom!

On the wall, the lights burst.

The jade brick stone wall in the cave is neat and bright.

The cave is ten meters long, and then it goes all the way down the stairs.

Under the stairs, there is an extremely wide underground space. The decoration is not too luxurious, but it is also unique. The whole body is wrapped in white jade and blue bricks, and there is a suspended ceiling of double cranes flying together on the top.

"Three thousand, there are murals." Amelia Su said, pointing to both sides of the wall with a strange voice.

George Han looked around. On the stone wall, many patterns were carved vividly. It doesn't matter if you don't look at it, George Han frowned.

In the floating sea, there is an isolated island, and there is an old turtle outside the island, drifting outside the island all the year round.

"So the old tortoise knows the road, is it because the old tortoise itself has a connection with the fairy island?" George Han muttered.

"It should be, just because it was called out by Mingyu, so we were preconceived." Amelia Su explained.

Yes, and because the old tortoise is a thing in the sea, it is normal to receive the order of the sea girl, but George Han and others did not expect that the sea turtle will be related to the fairy island.

“George Han, what do you think this is? It’s not what you said...”

“Tianlu Pixiu?” George Han was stunned, why is there a portrait of Tianlu Pixiu in the underground palace of Xianling Island? !

In the picture, a brave madly smashes various ships, and the small island behind him fights!

“Could it be that the master carved it before the Xianling Island accident?” Amelia Su asked strangely.

“No, you see, compared with the boat, the size of this brave is actually about ten times larger, but what we met today is nearly twenty times larger.” George Han denied.

“Then there are others?”

“It’s the same one. I remember that when I was playing against that big brave, his forefoot was missing a sharp finger, you see, there was also a missing brave. “George Han finished speaking, looking at Amelia Su and said, “I suspect it was painted the last time the Xianling Island had an accident. At that time, this Tianlu Pixiu hadn’t grown up.”

Besides, it was caused by Wang Yanzhi recently In the chaos of war, the master was dying, he had no chance to come in and carve these stories.

“Three thousand, I know the answer, this should be the Tianlu Pixiu saved by Xianling Island.” Amelia Su pointed to a mural in the distance in surprise.

On the mural, Tianlu Paixiu, who was only the size of a child, was treated by an old man because of an injury to his front finger, and the old man’s clothes had imprints of immortal characters on his chest.

On the other hand, Tianlu Paixiu held a small red stone in his mouth, bent his head and held it into the old man’s hand.

“I understand. Whenever there is a crisis in Xianling Island, Tianlu Paixiu will come to help, but it is a pity that this time, it came late, and also treated us as enemies.” George Han said.

Looking back, there was a small box in the distance with a slight red light. Amelia Su picked it up and opened the box. Inside was a small red stone, almost the same as the mural.

“Is this the bead?” George Han frowned and put the red stone into the space ring.

I don’t know if it’s useful, but what if it’s useful? !

“Dead Valley!” Amelia Su suddenly pointed to the innermost mural, and lost her voice in surprise.

George Han hurried away, but he couldn't help but frown. The mural was only an acre of open space, except that there was only one side of water slowly flowing in.

There are four characters under the mural: corpse water nourishes the sky.

What does it mean? !

George Han couldn't understand it, but thought the crooked water was a bit strange, but George Han couldn't tell what was strange.

After reading the mural, there was only one ice bed and a few large boxes left in the stone room. The ice bed was air-conditioned. George Han touched it, and instantly felt that his whole hand was almost out of consciousness. terrible.

But the magic is that when the hand is pulled back, he suddenly feels the warmth of the room. The anti-Buddha does not need to feel its absolute coldness as long as it does not touch it.

Amelia Su opened the first box, which was full of various medical books.

Opening the second box contained various alchemy books, which made George Han very happy.

The third box and the fourth box are all kinds of rare and exotic treasures, which should be the wealth of Xianling Island.

As for the fifth box, it is a variety of seeds.

George Han was quite puzzled, why did he take the seeds? Could it be that Xianling Island still lacks supplies? !

This shouldn't be right? ! When entering the island, the plants on the island are magnificent and full of vitality, which is like a place lacking food and clothing?

So what will these seeds be? !

George Han didn't understand. It wasn't until after the inventory was completed that George Han unwittingly turned out an ancient book, and this guy finally understood that the fifth box of things was actually the most important thing in the five boxes.

Even, it will make countless people in the world ecstatic!

Chapter 2052

"I got rich, got rich, I got rich."

From the underground palace, George Han was arranged by Long Po to the bamboo house behind. At this time, Amelia Su was cleaning the room, although Long Po was already cleaned up in advance, but Amelia Su still boiled water and cleaned up. For Amelia Su, this is the home they might live in for a long time.

What kind of home is there without fireworks? !

Amelia Su had just boiled the water, and she couldn't help but roll her eyes out of the sky: "Knowing that you took two boxes of jewels, look at your little proud look."

"Wife, don't you understand? How much is the two boxes of jewels? The jewels I searched from Silong are dozens of times more than this, will I care? I care about these seeds." George Han made no secret of his complacency.

From a certain point of view, he has indeed made a fortune, and he has made a fortune.

"Seeds? Do you think we still lack food? Besides, for cultivation bases like ours, it doesn't really matter whether we eat or not." Amelia Su said contemptuously.

"Do you think it is the seeds for eating? You are wrong! These seeds are all kinds of miraculous medicines, and some necessary products must be used. For example, bitter cold fruit, or what kind of extreme ice fire grass, hehe, the seeds are there. Take it, everything is there." George Han was indescribably happy.

What is the most important thing about alchemy? One is technology, and the other is materials. In terms of technology, there are the secrets of the fairy island. The materials are ordinary ones I bought in the auction house before. I just wanted to practice some ordinary ones for the disciples. , I don't know that this ancient book not only has some magical methods to turn waste into treasure, but more importantly, high-level materials that are extremely lacking are also solutions.

At the beginning, a Wankuhanlian lotus could directly become a standard king, but the Wankuhanlian lotus, among these seeds, was only inferior!

What is this not to make a fortune? !

From a small farmer to a rich man in an instant!

Amelia Su was also stunned when he heard George Han's words such as Extreme Ice Fire Grass, because Extreme Ice Fire Grass and Bitter Cold Fruit are basically extremely precious materials in the Bafang world. Any one of them is enough to be replaced by tens of millions, even With hundreds of millions of amethyst, it can even be said that these things are priceless.

"Damn, wouldn't it be true?" Amelia Su, a gentleman, couldn't help but swear out of excitement, walked a few steps to George Han's side, and sat down.

After seeing the words in the ancient book, Amelia Su's eyes widened.

The couple now understand why Wang Chuanzhi would even do such a violent act of killing the master in order to get the position of the head.

For many people, this is indeed a great temptation.

“However, the above said that only the corpse valley is needed to let these seeds germinate. Damn, it is the corpse valley again?” George Han looked at Amelia Su depressed.

Why do you always mention the place of Corpse Valley? If it was such an important place, how could Wang Yanzhi let it go? !

“Why don’t you go take a look?” Amelia Su also felt that this fact was strange.

“Let them out first.” George Han said.

“I have already talked to Long Po, we may have other disciples.”

“En!”

Early the next morning, George Han released all the hundreds of people in the Eight Desolation World. During this period of time in the world, the Alliance disciples practiced day and night and made rapid progress, especially Ningyue and Fumang. One reached the middle stage of killing evil, and the other reached the middle stage of Kongtong.

And Qin Shuang has also improved, she mainly played with Nian’er, but even so, Qin Shuang with outstanding talent has reached the middle stage of killing evil, breaking through extremely fast.

For many other disciples, the worst is also in the Dao Realm, and most of them are in the middle of the Holy Realm.

Important disciples such as Shi Yu and Qiu Shui have reached the ethereal state.

Ten days outside, but decades in the Eight Desolation World, although their talents are average, they have plenty of aura inside, and the improvement is also considered to be great. Moreover, during this period of time, Jianghu Baixiaosheng has also specially formulated corresponding plans for the alliance.

Fu Mang led the backward male disciple as the Red Blood Hall, and Ning Yue led his disciple as the heroine, and the two were the leaders of the alliance.

This arrangement is very clever. It can ensure that Fu Mang has someone to take, and Ningyue’s power will not be dispersed. At the same time, if something happens, it can also check each other.

When a group of people came out, they were surprised and dumbfounded when they saw Xianling Island.

Some people don't even think that they have changed places, because the beauty here is not like the Bafang World, but more like the Bahuang World.

George Han took Long Po to meet everyone. Although Long Po was a servant before, George Han revoked her status, requiring everyone to respect Long Po enough, and sent someone to serve her. , For George Han, the only surviving Longpo might be the only totem of Xianling Island in the past.

After settling everyone in, George Han took Amelia Su, hugged Han Nian, and followed Long Po, all the way through the backyard, and walked about ten meters in the opposite direction of the weak water.

Suddenly stopped in a very dry clearing.

“Island owner, this is Corpse Valley.”

Chapter 2053

George Han looked at the dry clearing in front of him, it was almost completely cracked.

Because of the extreme lack of water, the cracks are almost as wide as two fingers.

George Han's head is big, but he doesn't talk nonsense, picking up the bucket and directly carrying water.

But after nearly an hour or so, with George Han's physical strength and endurance, he at least picked dozens of buckets of water to irrigate the ground, but when George Han looked towards the ground, he was speechless to the extreme.

The ground is still dry and unchanged!

“It's my damn thing, it's such a thing? The land has been dry for too long? It needs water too much?” George Han touched his head, very depressed.

However, George Han decided to change his approach.

After all, if the drought is too long and there is too much water shortage, a few buckets or even dozens of buckets will not solve the problem. Irrigation is necessary to stop the drought.

Thinking of this, George Han looked for a lake behind the island, and then slacking off with a spell, directly passing the water in the lake through the energy belt, as if entering a gully, and flowing into the corpse valley in the distance.

George Han used a lot of energy, and the water flow was extremely fast, but an hour later, something that made George Han extremely dumbfounded happened.

The large area of water in the lake was transported by George Han to the Shi Valley. The entire lake even reached the bottom because of the lack of water, but the Shi Valley was exactly the same as it had never been irrigated before.

It's still very cracked and extremely dry!

This is a ghost, a lake has been sucked dry, but it still does not dry well? Is it such an exaggeration?

"Is there such a shortage of water here?" George Han asked strangely, touching his head.

Amelia Su also felt that something was wrong with this. To a certain extent, the field lacked water, but it was not lacking in this way. It is necessary to know that the area of the lake is at least ten times or even more times that of this land, but with so much water irrigated, even if the dead valley is not completely dried up, it will not be reflected at all.

"It has been decades since Master passed away, and there has been no one to take care of it, so will it be really scarce, or else, find some more water?" Amelia Su said.

It makes sense to think about what Amelia Su said. George Han didn't think about it anymore, and flew into the air to get a bird's eye view of the nearby water source.

In the end, he set his sights on the only water source a few hundred meters away from the corpse valley.

There is still a lake over there, but it is at least four times larger than the previous lake, so even if it is the only one, it will definitely not be a problem to use the lake here for irrigation.

As he thought of it, George Han was not polite this time, using all his energy to directly move the entire lake's water to the field.

In the air, a huge water ball was slowly lifted from the lake, and then crashed into the Corpse Valley.

The name of nature porter, George Han does his part!

With the falling water directly filling the corpse valley, George Han helplessly Chong Amelia Su joked: "This is already the only water source nearby. If this water rat can't get enough to eat, it can only Use the weak water over there to water it."

Amelia Su smiled helplessly: "What? Are you going to destroy it if you don't get it?" The

weak water will melt away even the stones, not to mention the small fields in the land. The soil, this weak water came, it is estimated that the dead valley is gone.

But just when Amelia Su's voice fell, the other two stared at each other.

The flood of water in the sky fell into the corpse valley, but disappeared into the dry ground with a bubble, leaving nothing left.

And that bubble, in George Han's eyes, was even more fucking like a mockery.

In my mind till now, there is still a sound of water running!

"It's a nanny!" George Han felt his face fierce and painful. Is it possible that he really forced himself to die with him with weak water?

"How could this happen?" Amelia Su also frowned.

Obviously, at this point, it is no longer the problem of a long drought and lack of water, but that there is a strange problem in this corpse valley.

Because up to now, the water in the two lakes has gone down, not to mention that the corpse valley can be wet, but at least it is not as it is now, it has not changed at all, and even the place where the surface is directly exposed to water is still rubbed into dust.

"Or George Han, try weak water?" Amelia Su suddenly looked at George Han.

George Hanyi was taken aback: "Do you really want me to take revenge?"

"Do you remember those murals?" Amelia Su said.

Speaking of the mural, George Han thought about it carefully, and seemed to understand that Amelia Su's words were not a joke. The water on the mural was strange when two people looked at it.

It's just that at that time, two people couldn't tell why the water on the mural was strange.

Now think about it, maybe those strange waters have something else to say.

Thinking of this, George Han ran directly to the weak water spring, but after several attempts, there was no way to take out the weak water.

It is naturally impossible to use ordinary equipment. Using energy, those energies hitting weak water is like a punch hitting cotton, and it doesn't work at all.

"Three thousand, I heard that weak water is not stored in the Three Realms, not in the Five Elements, so our ordinary spells can hardly have any effect on it." Amelia Su said at this time.

Not in the Three Realms, out of the Five Elements? !

“But since it exists on Xianling Island, it shows that the people on Xianling Island can move it.” George Han frowned.

Amelia Su agreed with George Han, but how did the people on Xianling Island move the water? !

George Han and Amelia Su suddenly fell into contemplation. After a while, the two looked at each other in amazement, and their eyes were tacitly locked on the fairy ring in George Han’s hands.

“Try it?” George Han looked at Amelia Su and said softly.

Amelia Su frowned and nodded.

George Han directly hit the fairy ring with energy, and suddenly, the red mass in the fairy ring suddenly twisted, and when it emerged from the ring, it was already red. .

One mind!

George Han suddenly stabilized his mind, directly controlled the red light, and then stretched the red light toward the weak water in the valley.

As the red light gradually rises, those weak waters have also undergone amazing changes at this time.

The red light slowly wrapped the weak water, following George Han’s thoughts, directly rose into the air!

“Successful?” Amelia Su looked at George Han with joy, her eyes full of admiration.

Serious George Han is so handsome!

George Han was not talking nonsense, carefully controlling the weak water, and then sent it all the way to the Corpse Valley.

As the red light withdrew, a splash of weak water poured down on the corpse valley.

The couple stared at the Corpse Valley without blinking their eyes, waiting for what it would be like!

And at this time, the weak water splashed finally made official contact with the dry ground of the Corpse Valley! !

Chapter 2054

When the weak water hits the ground, it will quickly soak the sinking ground along those gaps like the previous water.

Everything is almost exactly the same as the spring water just now!

Soaked again? !

The couple looked at each other, is it possible that they guessed wrong? !

But if this is not the case, what else can it be?

At this moment, Amelia Su suddenly pointed to the ground with excitement: "Three thousand, look at it!"

After looking back, the dry ground of the Corpse Valley began to rise from the bottom of some flowing water continuously. The soil in the inner layer also began to moisten slightly.

George Han was also ecstatic.

The originally cracked dry land gradually recovered its cracks, and the soil began to get wet due to the timely replenishment of water.

After a while, the dry land disappeared, and replaced by a wet and fertile land.

"George Han, it succeeded." Amelia Su was immediately excited like a child, hugged George Han directly, dancing and dancing.

Although Nian'er didn't know what was going on, she still jumped and shouted with her mother, holding her father in her arms, anyway, for the children, joy was fine.

"Plant something!"

After the joy, George Han put down an extremely ice fireweed seed.

This thing can only grow in ten thousand years of ice, but the growth cycle takes almost ten thousand years to germinate and ten thousand years to take root. Therefore, extremely cold grass is a very valuable alchemy material.

George Han intends to try the water.

After packing up their things, the two couples took Han Nian to play in the backyard.

Time always flies quickly with family accompany, three days passed in the blink of an eye.

In the past three days, the league disciples have never stopped, except for the necessary exercises, the rest are men and women weaving.

The alliance needs to grow, and there are so many people, which means that you must always leave and enter the island, so ships are necessary. To live on the island, the

conditions need to be better, so cleaning and refurbishment of the fairy island are also necessary.

In the three days of George Han, he would go to the Dead Valley to see if the extreme ice and fire grass had sprouted, and then he took his wife and children to enjoy the fun of “the country I laid for you”.

Early this morning, when George Han went to Corpse Valley again, his whole body was boiling.

In the corpse valley, a small sprout emerged from the soil.

This also means that the predictions and judgments of George Han and Amelia Su are correct!

Until now, George Han finally understood the true value of Corpse Valley.

It can simulate various ecological environments, so that various plants can grow on their own under its protection, and because of this, there are various seeds in the underground palace.

On the seventh day, George Han was completely excited after receiving the fiery red extremely ice-fire grass.

On the spot, dozens of cherished varieties were taken out, all planted in the corpse valley, and then obediently waiting for them to mature.

Of course, George Han was not idle either. In the days he was waiting, George Han used this extremely ice and fire grass, and according to the method recorded in the book, paired with the Shuanglong Ding to start his own alchemy journey.

In order not to make himself laugh generous, George Han specially went to the underground shrine to refine during this period, and experimented with the lowest level of refinement.

After N explosions in the underground shrine, George Han’s first pill that can be seen at least in appearance was released.

Then, the second one, the third one...

Until another seven days later, George Han had completely mastered many techniques and methods of alchemy according to the teachings in the book and a lot of experiments.

On the ground of the Underground Shrine, many low-level finished pills were also placed.

“As long as these things are practiced, they can even be batched in the future. This basically solves the daily use of most of the disciples. However, these are not enough.”

High-level pills can not only make everyone more confident in the alliance, At the same time, using it as a reward can also make everyone more motivated.

“It’s up to you.” George Han fixed his gaze on the extremely ice fire grass.

However, before refining this, George Han returned to the Corpse Valley and harvested several top-quality materials that he had planted before.

Then, he began to continue his next big plan.

Having already had a wealth of previous failure experience, George Han changed his alchemy site to a special alchemy room on Xianling Island, and started his own “great plan.”

This tossing took a full month.

In this month, great turbulence and changes have taken place in the Bafang world.

Yaoshen Pavilion’s bizarre defeat in Qinglong City made the Yaoshen Pavilion under development irritated with a blank face. After the execution of Fu Ye, the “culprit”, Yaoshen Pavilion decided to wash away the shame in its own way. .

In just one month, the Yaoshen Pavilion expanded from the south to the north, and it launched a more direct attack on those who refused to obey. Many sects were directly destroyed to kill chickens and monkeys. For a time, many sects changed their colors after hearing about the Yaoshen Pavilion.

But Yaoshen Pavilion was obviously dissatisfied with this.

And Fujia also ushered in the “spring” moment.
