

King of kings 1067–1068

“Bang, bang, bang!” Omi blinked and slapped three times with Mu Qian.

“Boom!” Omi was still defeated, his body clattered and flew backwards into the secret passage, the sword in Mu Qianji’s hand also buzzed, it seemed to have received some shock from Omi, it seemed that Omi still had the ability to hurt her.

The hostility in Mu Qianji’s body surged wildly, her figure moved and entered the secret passage in the blink of an eye, continuing to pursue and kill Omi, the stronger Omi was, the more excited her sword became.

As soon as Mu Qianji entered the secret passageway, his feet stepped on something, and that thing clicked, immediately buckling Mu Qianji’s feet. Then, before Mu Qianji could react, the entire secret passageway, a shadow rolled in on all sides, one by one, one by one, like a lock, clicking, clicking, clicking, clicking, I don’t know how many thousands of locks were on it. This mechanism was really too profound, too.

In one fell swoop, Mu Qianji was trapped in one heavily rolled up mechanism lock after another.

When Omi saw that Mu Qianji was trapped in the organ locks, he became anxious inside and shouted, “Don’t.”

Old Lord Riverside and the others were busy coming out and laughed, “Half success, it only takes five minutes, it’s enough to kill the witch, and after five minutes, the organ locks will all be combined and there will be a fatal blow that will kill her completely, hahaha.”

Omi was incomparably nervous, but when he really wanted to see Mu Qianji die, Omi panicked.

From the outside, the mechanism lock was a big, big circle, while inside, there was only about a meter of space.

Right now, Mu Qianji had been stabbed several times on his body.

Mu Qianji’s hands and feet were buckled, and in such a narrow space, his Burial Moon Sword couldn’t exert any power at all, and the material of this organ lock was also made of a kind of extraterrestrial meteorite, which was incredibly tough. The countless flying swords were as dense as a meat grinder, and anyone who came in would not be able to escape. It was just as the old ruler on the river said, it would only take five minutes before he would not be able to hold on to death. Remember the website .kanshu8 .net

Mu Qianji was only a moment ago, already covered in wounds, she was tired of dealing with the flying knives that were as dense as a meat grinder, there was no spare time to break the organ locks, besides, the organ locks were also incomparably tough, it wasn't something that could be broken just by wanting to, unless the strength reached not a level anymore, beyond the unity realm, it might be possible to escape in this situation.

"Hahaha, hahaha!" Old Man River and the others let out a loud laugh, only two minutes had passed and Mu Qianji had already been hit by dozens of slashes.

However, at that moment, Omi roared, "Stop, stop for me."

Omi saw that Mu Qianji was really going to be killed and immediately panicked.

"Brother Tang, you're crazy, there's a witch inside, and now the witch is about to die, we should be happy, what's wrong with you?" The old man on the river was puzzled.

Omi bellowed, "Open the mechanism lock for me and let her out."

"Brother Tang, you."

"Open it." At that moment, Mu Qianji was stabbed in the shoulder again, and at this rate, five minutes later, it would not be far from death without dying, and five minutes later, the organ locks would be completely combined and there would be one more most deadly blow, Omi could no longer imagine if Mu Qianji would still be alive at that time.

Old Lord Riverside snorted, "Brother Tang, I'm not afraid to tell you that no one has been able to unlock this mechanism lock at all, it's ancestral and has never been unlocked for hundreds of generations."

"If you don't unlock it, I'll kill you." Omiton stabbed at the old man on the river's neck, but didn't penetrate.

"It's useless for you to kill me, this is the world-famous 'Heaven's Fury Organ Lock' that has no solution." The old ruler of the river said, those who knew a little bit about organs knew that there was no solution to the Heaven's Fury Organ.

"Open it." Omi bellowed

, he only knew that Mu Qianji wouldn't last long.

The old man on the river sneered, "Even if I had the ability to unravel it, I'm afraid it would be hours, even days, months later, and the witch, she'd be dead in five minutes, Brother Tang, do you really want to do such a thing as making an enemy of the whole world?"

Omi said, "I just want her alive now, I don't care about anything else."

The old ruler on the river said, "Okay, I can stop the flying dagger lock in the mechanism lock, but I have no way to stop the combination of the mechanism lock, there is still a minute left for the mechanism lock to be completely combined, at that time, there is still the strongest and deadliest strike I can't stop, anyway, this Heaven's Fury mechanism lock, not to mention me, my grandfather's grandfather can't even solve it, you can see for yourself." After saying that, the old gentleman on the river inserted an object the size of a match into one of the locks of the mechanism lock, and suddenly, the flying daggers in the center of the mechanism lock, like a meat grinder, stopped.

Mu Qianji immediately fell down, she was already covered in blood, dozens of flying knives were inserted into her body, blood was clattering from every wound, it seemed, she no longer had the ability to resist.

This Heavenly Severing Mechanism Lock was too terrifying, it was something that had been handed down from a long, long time ago, from the ancestors, and no one in this world had been able to unlock it yet.

"Mu Qianji, how are you?" Omi shouted.

"Hahaha, hahaha." Mu Qianji's voice was weak as he let out laughter.

Old Lord Riverside said, "Thirty seconds left, the organ locks are completely combined."

In a hurry, Omi immediately applied his Bone Reduction Technique, he shrunk his body to the smallest size, almost as big as a teddy bear, it was evident how much damage Omi had done to himself, but Omi was already desperate.

Old Lord Riverside and the others were shocked to see Omi shrink himself to such a small size.

In less than thirty seconds, the organ locks would be completely assembled, and at that time, the deadliest blow would be shot at Mu Qianji, but Mu Qianji was now completely powerless to resist that deadly blow.

After Omi shrunk his body, he was deadly and kept squeezing his body into the organ lock through the small hole where the organ lock was connected.

"Mu Qianji, wait for me, I will definitely not let you die." Omi said as he squeezed in.

With ten seconds left, the gaps between the organ locks were getting smaller and smaller, Omi's body was being squeezed to burst, his bones were about to crush and shatter, but he still squeezed in regardless of his life.

"Ten, nine, eight, seven, six."

Mu Qianji was lying in the tiny space at the center of the mechanism lock, and when she saw Omi squeeze in regardless of his life, her eyes seemed to flicker, as if, as if it had touched something inside her.

Omi gritted his teeth without any hesitation as the mechanism lock closed tighter and tighter.

Suddenly, Mu Qianji cried and roared, "Get out, what are you doing in here."

"Five, four, three, two, one."

Finally, the organ locks were completely combined, and after the combination was complete, there would be not a single gap, like a completely sealed space.

Fortunately, Omi's entire body finally squeezed into the core space of the organ lock at the moment the complete combination was completed.

And at the same moment, the strongest and deadliest strike of the Organ Lock was delivered.

Omi didn't have time to think about it and immediately rolled up and blocked in front of Mu Qianji.

"Swoosh!" Three thumb-thick arrows shot into Omi's heart.

Omi fell down, and Mu Qianji cried out and jumped up, holding Omi in his arms, "Why are you so stupid, why." Mu Qianji let out a loud cry.

1068

Omi looked at Mu Qianji, smiled slightly, touched Mu Qianji's face and said, "You, you, have you finally regained yourself?"

"Mhmm, I've recovered, I've completely defeated the demonic mind, why are you so stupid." Mu Qianji cried out.

"Because, because, I said that I will always be with my sister ah."

"No, you're not allowed to die, ooh, why did you leave when I recovered, why, I didn't allow you to die." Mu Qianji cried out.

Omi had three thumb-sized sharp arrows inserted into his heart, plus the fact that he had used the Bone Reduction Technique in order to come in, and was almost crushed by the machine lock to crush the bones of his entire body, so Omi's entire body had cracked, and there was no possibility of living with any more sharp arrows inserted into his heart.

Omi's mouth was oozing blood, which came from the heart, Omi raised his hand with difficulty, wiped Mu Qianji's tears, and smiled, "It's good that you're fine."

"Omi, I order you, get better immediately, do you hear me, woo," cried Mu Qianji.

Omi said with tired eyes, "Don't be silly, you and I both know that I've been wounded so badly that there's no way back to heaven. Perhaps this is the best way to end it, I can go down and stay with them."

"No, don't, oooh, I'm to blame, I'm to blame." Mu Qianji said in pain.

"Sister, you must promise little minister that you will do everything you can to leave this organ lock, and never give up, okay?"

"You're dead, let me live, I can't do it, it's all because of me, I have to be there for you." Remember for a second to read the book

"No, you're making it worthless for me to die, promise me, sister."

"Oooh, I don't want to!! don't want to, woo-hoo."

"Promise me, you must, must, try to live, please, please, please." Omi's hand tightened its grip on Mu Qianji's hand, as if he was about to snap, as if he would die in peace if he didn't promise.

When Mu Qianji saw that Omi was about to break his breath, he cried out and nodded his head.

Omi's entire body loosened up, and the hand that was holding onto Mu Qianji suddenly lost strength and dropped down.

"No!" In the narrow space of the organ lock, Mu Qianji's heart-rending cries could be heard.

And outside.

Old Lord Riverside, Nan Shan Yun, Liu Qian, Gao Feng Shui, the four of them looked very happy.

"Finally, we've taken this witch, hahaha."

"Now even Omi is locked up inside, what should we do?"

"Hmph, Omi sought his own death, there's no one to blame, but at the moment when the organ lock just closed, I felt that Omi blocked the most deadly arrow for Mu Qianji, which means that Mu Qianji was only locked in the organ lock and didn't die. With her strength, as long as it takes ten days and half a month, it's not like there's no way for her to forcefully destroy the structure of the organ lock and thus escape."

"Ah, what then?"

"That damned Omi, psycho, there would have been a death for Mu Qianji, this son of a bitch."

"There's no need to rush, have you all forgotten the double insurance Chiyama Twilight? We're going to put this lock into Chisan Kure. Whether Mu Qiji dies inside or not, she's finished!

up."

"Then what are you waiting for, hurry up and do it, the four of us will be able to lift the mechanism lock together, and within minutes we will be able to go over the back of the Thousand Mountain Twilight."

"Fine, do it."

The four peak powerhouses immediately carried the mechanism locks.

The mechanism lock was like a very large ball in size before it was completely combined, but after it was completely combined, it would be a small ball less than two meters in diameter, so the four of them resisting the mechanism lock was equivalent to ease.

And at this moment, within the organ lock, there was also the faint sound of Mu Qianji's cries.

A few minutes later, they climbed over to the back of the mountain, and at a glance, the back of the mountain seemed to have the same scenery as a sea market lip building, and in this sea market lip building, one could see a mountain range that was connected one by one, and on the mountain range were all one graves. This sea market lip building, which looked both real and unreal, was spread across the entire mountain slope.

"One, two, three." The four of them suddenly cast the mechanism lock into the mountain slope of Thousand Mountain Twilight, and in an instant, they saw that mechanism lock being sucked into the illusory and real sea market lip building by a force.

Liu Qian smiled, "Now, keep that witch alive or dead, hahaha."

"Since ancient times, some daring people have entered Thousand Mountain Twilight, but only a handful of them came out, and those who came out were insane and died soon after."

"That witch is locked in a machine lock, never to be able to come out, the few who have come out since ancient times have only gone in a little bit, and then regretted running out, only for a minute or two, that witch, will die, hahaha."

"We've gotten rid of the witch, let's announce this to the world as soon as possible, so as not to make some people in the martial arts world panic."

"Then, what did Omi say?"

"Just the same, this man was a genius, but Naomi was seduced by the beauty of the witch, and since he's dead, let's give the world a better reputation and say he sacrificed himself to ensure the witch was locked in the mechanism lock."

"Alas." The four of them sighed and flew away.

Mu Qianji hugged Omi, weeping, but at that moment, she felt the entire space distort, her arms were very long and very short at once, and the Omi she was holding in her arms was also distorting her body in various ways.

This feeling was like using the back reflection of a stainless steel spoon to see things, she was not physically uncomfortable, but everything just seemed so distorted and deformed.

What Mu Qianji didn't know was that Thousand Mountain Twilight was a five-dimensional space that was both real and unreal, a junction point connecting two parallel worlds. One of these two parallel worlds was the current world, and the other was, the world before they crossed.

These two parallel worlds, of which the world of Earth, was a few hundredths of the other world.

Omi and Mu Qianji were locked in the mechanism lock, and now the mechanism lock was thrown to the junction point of the two worlds, which was Thousand Mountain Gure, and this junction point was a multi-dimensional space, so Mu Qianji felt like his body was deformed. It was as if the banana drawn on the paper was in a two-dimensional picture, but if this banana was moved to a three-dimensional space, what they saw was not a surface, but a three-dimensional one. Now, however, they were suddenly in multi-dimensional space from three-dimensional space, so what their eyes saw was completely different from when they were in three-dimensional space.

Mu Qianji soon felt dizzy in his head, his eyes were very tired, and then, he was unconscious.
