

# King of kings 1141-1142

## Chapter 1141

But what can regenerate the warp? Omi didn't know, but Omi believed that there must be something in the world to regenerate the meridians.

After another month, Little Fire and Black Jiao returned.

"Has Chenchen woken up?"

"Awake, in the imperial study."

The Fire Demon Beast and Black Jiao immediately came to the imperial study and saw Omi.

"Brother Chen, you're awake."

"Little Fire, Little Black, you're back, hehe, I heard that you went to look for the Emperor Worm for me, did you find it?" Omi asked.

: "Brother Chen, of course, I'm a diamond head, look, we've caught more than ten emperor worms for you."

After saying that, Little Fire opened his mouth and spat out a small bottle.

Omi said, "Thank you, but unfortunately, emperor worms are of no use to me anymore."

"Ah, didn't they say that the Emperor Worm can repair your meridians?" First web site m . kanshu8.net

"That was before, but it doesn't work now, my meridians are ruined and can't be repaired."

"Then what?"

Omi smiled, "It's fine, one day, I can find something that regenerates the warp veins, there's no wonder in the great world, there must be treasures that regenerate the warp veins, all right, thank you."

At this time, Black Jiao said, "Brother Chen, you said warp regeneration ah?"

"Right."

“Brother Chen, when you talk about warp regeneration, I do recall something, we, the Jiao Dragon clan, have been able to regenerate our warp veins since ancient times, and the dragon tendons and veins are the most powerful ones.”

Omi was busy saying, “You Jiao dragons can regenerate your meridians?”

“Yes, if my warp veins are gone, I can regenerate them, we dragons are born with this advantage, of course, I haven’t become a dragon yet, but I have some of the traits of a dragon now.”

Omi said, “Great, then I wonder if it’s possible for me to regenerate my warp veins as well.”

“Brother Chen, it’s impossible for you humans to regenerate warp veins.”

Fire Demon Beast said, “Brother Black Jiao, since your meridians can be regenerated, can you pull out some of your meridians for Brother Chen, since your meridians can be regenerated anyway.”

Black Jiao said, “It’s not that I don’t want to ah, but it’s useless to pump my meridians to Brother Minister, I’m such a huge body, every one of my meridians is like a water pipe, if I were to be sold as a water pipe in the world, it would be the most expensive water pipe in history ah.”

The Fire Demon Beast snorted, “Alright, just be stingy, it’s not like all the meridians in your entire body are this big, there must be small ones too, for example, the meridians on your lifeblood, I think it’s about the same.”

“Little fire, you.”

“Don’t you?”

The Black Jiao snorted, “Fine, if I want it, I’ll draw it for Minister, it’s fine to turn into a eunuch jiao for the sake of Minister, but I’ll click you off first so I have company.”

The Fire Demon Beast shuddered.

Omi said, “Alright, you two stop it.”

Fire Demon Beast said urgently, “Brother Chen, I’m serious, Brother Black’s meridians, although they are not dragon veins, but at least they are very strong meridians, far more powerful than human meridians, let’s smoke a few out and fill you up well, this world, isn’t science developed? Even the human spine can be replaced, why not replace a few meridians? According to what I’ve learned, ninety percent of the human body’s meridians are performed by a few of the main meridians. Although I don’t know if I can match the meridians of Jiao, but I guess it’s better than nothing, big brother Black.”

/>

The black jiao helplessly said, "Yes somewhat reasonable, I'm indifferent anyway, I'm ready to turn into a eunuch, but can you let me have one last ruff before I draw."

Omi's eyebrows furrowed, this black jiao.

Fire Demon Beast said, "Big Brother Black, I'm just joking with you la, the meridians on your lifeblood may not be just right ah, this will be decided when the time comes."

Omi didn't say anything, yes somewhat reasonable.

Since the meridians were destroyed, could they be replaced with Black Jiao's meridians? The jiao was able to evolve into a dragon, and although it couldn't match the dragon veins, it was at least far superior to the strength of the human meridians. Of course, whether or not it could be matched and what the consequences were, that was left aside, at least theoretically, the possibility of switching to the black jiao meridians existed. In another world, it would be impossible, but in this one, where human structure was so finely studied and scientific, surgery was completely incomparable in another world, perhaps, it really was possible.

"Brother Chen, don't hesitate, it's better than doing nothing at all, right, we still have the Emperor Worm, after replacing Brother Black Jiao's meridians, then take the Emperor Worm, two-pronged approach, I think, it will definitely work."

Omi looked at Black Jiao and asked, "I'm willing to give it a try, but I'm afraid of aggravating Little Black."

Black Jiao smiled, "Brother Chen, if you're a brother, don't say such polite words, I'm ready to become a eunuch for you."

"Alright then, let's give it a try, but don't worry, the meridians used on me are probably just capillaries on your body, so maybe they won't do you any harm."

"I know lah, I'm just trying to humor you guys, don't you know that I've always been a very humorous auger?"

Little Fire shook his head, "I don't know, I only know that you're horny."

Omi immediately ordered to go down and find the most professional and powerful expert in this area in the entire world to perform an operation on Omi, the operation consisted of, replacing the meridians of Black Jiao.

One month later.

"Brother Omi, thirty of the world's greatest and most powerful experts are here, ready to perform the operation on you at any time."

"Good, I want to meet them first."

“They are at Wangjing City, waiting for you to receive them.”

Omi soon met the thirty most professional doctors in the world.

“See Senior Tang.”

“Doctors, there’s no need to be polite, please get up.”

“Thank you, Senior Tang.”

Omi poured a cup of tea for each of them, they were all flattered, in fact they all felt very honored when they learned that they could serve Omi.

Omi asked, “You all know about me, I’m going to replace the Black Jiao’s meridians, what do you think of the feasibility? From your professional point of view.”

“This.”

“It’s fine, tell it like it is.”

“Senior Tang, from our professional point of view, this is a bit of a fantasy.”

“Uh, so, I’m not allowed to replace the Black Jiao’s meridians?”

“No, no, no, you misunderstand us, we mean, how can a human warp be exchanged with a foreign object? It doesn’t match at all.”

“You don’t have to worry about that, my meridians are ruined anyway, so it’s better than nothing. I’m just asking you guys, this surgery, what’s the success rate?”

“Senior Tang, if we just replace it, this has a 100% success rate, but we can’t be sure, it will definitely work, after all, it’s not even from the same species.”

1142

“Alright, let me bear the consequences alone, let’s prepare for surgery.”

A day later, Omi began the surgery.

Of course, before the surgery, the doctor extracted a number of meridians from Black Jiao’s body, and to Black Jiao, it was really just a few capillaries that didn’t have any effect at all, even if they wouldn’t regenerate, they wouldn’t affect Black Jiao any.

In this way, Omi’s operation to replace the meridians lasted for seven days.

Of course, it originally didn't take that long, but it took extra time in order to be the best and most perfect.

After replacing the meridians, Omi didn't stay in the ward, and went straight back to Wangjing on a flying ship, with thirty doctors going back with him, in case there was any need.

"Brother Chen, how are you feeling?" Little Fire asked.

Omi had a lot of duct tape wrapped around him at the moment, after all, he had changed his meridians and had openings all over his body.

"I don't know right now, but I can start taking the Emperor Worm."

Omi took out the bottle containing the emperor worms.

"Brother Chen, there are a total of eighteen Emperor Insects, you can eat one a day, and if it's not enough, I'll catch it again." Remember the URL .kanshu8.net

Omi said, "When did the emperor insects become so abundant."

"Brother Chen, the reason Emperor Insects are rare is because they are hard to catch, but in front of me, this problem doesn't exist, I burrow into the rocks and I can catch as many Emperor Insects as I want, and if I really want to catch more, dozens of them can still be caught."

"Alright, thank you."

"Minister, then you rest well."

In the blink of an eye, another week had passed.

The bandages on Omi's body could also be removed.

After the bandages were removed, Omi's wounds everywhere on his body were also healed, almost no traces could be seen, the doctors were envious, this was the difference between a strong man and an ordinary man, it seemed that the body of a strong man could not be measured against the body of an ordinary man, perhaps, in the body of a strong man, different blood types could be mixed together while an ordinary man could not.

Omi changed his clothes and recovered as before.

"Senior Tang, how are you feeling now?"

Omi shook his head, "It still feels the same as before."

"You can't feel the meridians?"

Omi closed his eyes and felt carefully, but, couldn't feel the meridians.

"Can't feel it."

The doctor sighed, "Senior Tang, so to speak, this surgery is a failure."

Omi smiled, "Don't worry, my intuition tells me that the surgery was a success, alright, thank you."

"You're welcome."

After that, Omi took one Emperor Worm every day.

Although Omi couldn't feel the meridians, Omi also didn't feel any discomfort, this was especially important, in Omi's medical concept, this meant that the surgery was successful, as to why he still couldn't feel the meridians, this was because, after all, the meridians weren't human, they didn't connect so easily, but the lack of rejection showed that there was hope to connect them.

Of course, it was estimated that the reason for the lack of rejection was related to the emperor insect, the emperor insect was the best treasure to repair the meridians, whether it was a human meridian or another creature's meridian, the emperor insect was the bridge to connect it.

After eighteen days, all of Omi's emperor worms had been eaten.

However, Omi still didn't feel the meridians.

Omi was a bit

Panic.

"Fuck, don't tell me I've really failed, right?" Omi secretly said.

At that moment, in his mind, a sudden flash of light came to Omi's mind, and Omi smiled, "Looks like I still need a little outside stimulation."

Thus, Omi opened the flying ship alone and flew deep into the sky, then Omi leapt down from the sky.

Omi's purpose in doing so was to stimulate his body to react and also be able to stimulate his meridians.

If he couldn't react in time, he would definitely fall to his death.

If he didn't want to fall to his death, only the meridians would function.

No one else knew about Omi doing this, so it would be impossible for anyone to save him.

Omi was also adventurous enough.

Omi's body was in the sky, falling faster and faster, and in the end, it had almost fallen to the ground.

"No more, if the meridians don't connect, I'm really going to fall to my death."

"Ahhhh." Omi shouted, seeing as he was getting closer and closer to the ground, the meridians weren't working, and his body would definitely fall into cookies.

Omi's mind suddenly thought of the scene where Mu Qianji was burned alive, and a boundless hatred sprang up from deep within.

"Ahhhh."

"Bang." Omi landed heavily on the ground, he was kneeling on one knee and braced his hands on the ground, the ground was also smashed out an utter.

Omi stood up violently, his feet bounced, and his entire body shot into the air, feeling full of power.

Yes, Omi's entire body erupted with an infinite amount of power under that hatred within him, which seemed to have rushed through a barrier, and then the meridians opened up.

"Hahaha, hahaha." Omi let out a maniacal laugh, he was finally no longer useless, his meridians were not just restored, they were simply enhanced a thousand times. If the previous meridians were a plastic pipe, then the current meridians were steel pipes. The feeling of being filled with power after clenching both fists was too good.

Omi landed on the ground again and practiced on the ground, every move was so powerful, Omi didn't say anything else, with the change of meridians, his martial arts skills were more than a level higher than before.

Coupled with Omi's self-created martial art, Endless, the strength was simply violent.

"Phew, very good, with the strength of my current meridians, even if I use Life Blood Hidden again, it probably won't even shatter that easily. However, Life Blood Crypt isn't a good thing, so don't use it if you can, and if I use it too much, it will slowly degrade even if I change to a stronger meridian. Moreover, Life Blood Cain is bound to put me in a coma, and I don't want to be in a coma again."

This truth Omi knew, even if he turned into a 'steel tube', if he didn't take good care of it and hurt it over and over again, even the strongest steel tube would crack.

Omi returned to Wangjing City and was flying back.

"Tzichen, your meridians?" When everyone saw Omi fly back, they were busy asking in surprise.

"Yes, my meridians are open, and Black Jiao's meridians have completely merged with my body." Omi said to everyone.

"Wow, so how do you feel now?"

Omi clenched his fist and smiled, "Absolutely powerful burst."

"Wow." Everyone was envious.

"Hahaha." Omi laughed, looked at Black Jiao and said, "Little Black, thank you."

"Come on, Brother Chen, don't be so sentimental."

"Okay, then, we're almost ready to return to the other world, my hatred is still unresolved." Omi said with a bite.
