

King of kings 1481

Chapter 1481

"Fifth Uncle, nothing is impossible in this world, and anything is possible as long as we feel it. We can not only become the head of the family in the Tang family, we can also become the lord in Tianbao City." Omi said.

"Oh, Omi, you're too young, after all, you've just arrived in the Spirit World, you haven't understood the cruelty of the Spirit World yet." Tang Jingtian said with a smile.

Omi didn't bother to say anything else, in short, Omi believed that he could have everything.

Tang Jingtian took out a bag and took out two pieces of crystal clear white jade from the bag and said, "This is a first class spirit stone, a gift from me to you."

"Thank you, Fifth Uncle." Omi was reaching out to take them, but Tang Jingtian hesitated, "If I give them to you now, you definitely won't be able to refine them, they won't be of any use to you, so I'd better keep them for you first, lest someone know to rob them."

"Uh, Fifth Uncle, it's fine, I'll be careful."

"Forget it, I'll give you another storage bag." Tang Jingtian took out another bag, put the two spirit stones into the bag and handed it to Omi.

Omi took the bag and tied him inside his clothes, so that no one would see him and no one would know that he was carrying a storage bag.

"From now on, you will live here for the time being, during the day you can go to the Tang family's ancestral land to absorb the spiritual energy of heaven and earth, this is important for you to enter the first stage of body refinement, regarding the Micro Spirit Pill, I will help you strive for it as much as I can."

"Thank you, Fifth Uncle."

"Usually try not to leave the Tang family range." Remember the website .kanshu8.net

"Good."

That night, Omi ate dinner and returned to his room.

Omi sat on his bed and took out those two spirit stones.

Omi held the spirit stones in his hand and tried to see if he could refine them.

Omi transferred that golden hint of immortal energy in his body, through his meridians, into his palm.

Suddenly, Omi noticed that the two spirit stones in his hand were significantly smaller than they were just now, and what was even more incredible was that the spiritual energy of heaven and earth from the spirit stones surged into his body from Omi's palm.

"Refined, Fifth Uncle said that I can't refine this spirit stone yet, but I used my body's Immortal Qi and refined a circle in the blink of an eye. Haha, this is really great."

Omi was overjoyed, when he was on Martial Island, when the last bit of his spirit was transformed into immortal Qi, the Nine Dao Demon King didn't know how much he could help Omi, leaving him to explore how to use the immortal Qi on his own.

It was simply effortless to use this Immortal Qi to refine spirit stones today.

Omi immediately calmed down and continued to use his Immortal Qi to refine the spirit stones.

About two minutes later, the two egg-sized spirit stones in Omi's hands had become the size of soybeans, and the smaller parts were all transformed into spirit qi and inhaled into Omi's body.

With another blink, the final soybean-sized spirit stones also turned into aura and entered Omi's body.

"Haha, two first-class spirit stones, I actually refined them in only about two minutes. Heavens, that's too fast, Uncle Five said that with his current strength, it would take him half an hour to refine these two spirit stones, hehe, this thread of immortal energy in my body is really good stuff."

Omi felt that his body immediately changed after absorbing the two spirit stones, feeling that his flesh had become sturdier and stronger.

Only, just two spirit stones were not enough for Omi to step into the first stage of body refining.

However, Omi had such a fast refining speed, why would he worry about not being able to step into the first stage of Body Refining.

Omi only needed to find a way to get some more spirit stones, elixirs and the like, and then he would be able to step into the first stage of Body Tempering.

In the future, it wouldn't be difficult at all for Omi to refine furiously all the way and turn into a powerful Immortal Cultivator.

Omi slept with joy.

The next day.

"Omi, it's time to get up." There was a shout from Uncle Five outside.

Omi looked and saw that the sky was not even light yet.

"The early morning is the time when the spiritual energy of heaven and earth is at its peak, I'll take you to the family ancestral land right now to absorb the spiritual energy of heaven and earth."

"Good." Omi immediately climbed up.

I don't know if the Immortal Qi in Omi's body would be able to speed up Omi's speed of absorbing the spiritual Qi of Heaven and Earth as well.

After Omi got up, he immediately followed Tang Jingtian and went straight to a certain place in the Tang family.

"Why do you want to go to the ancestral land to absorb the spiritual energy of the heavens and earth?" Omi asked.

"Because of the Tang family's ancestral land, that place has the most dense Heaven and Earth aura, and Heaven and Earth aura is only easier for the human body to absorb when it reaches a certain concentration, and is inhaled through the breath and pores of the entire body. Usually in other places, the concentration of Heaven and Earth Spiritual Qi is too low, making it difficult to absorb."

"Oh."

"In our Tang family, any child who hasn't stepped into the first stage of body refinement will go to the ancestral land every day to absorb the aura, and even those who have stepped into the first stage of body refinement, if they don't have other better resources, they usually go to the ancestral land, because this heaven and earth aura is free."

Soon, Omi arrived at the Tang Family Ancestral Land.

Sure enough, there were hundreds of youngsters between eight or nine and fourteen or fifteen or fifteen or sixteen years old sitting in the Tang Family Ancestral Land right now, closing their eyes and absorbing the spiritual Qi of Heaven and Earth in the air.

Tang Jingtian said to Omi, "You also find a place, go in and inhale, let every pore of your body open up and breathe, generally speaking, the more genius and magnificent the generation, the more heaven and earth aura he can inhale."

"Good."

"Then I'll leave first, and you'll be back when the sun is halfway up."

Tang Jingtian left first after bringing Omi to his ancestral land.

Omi found a random open space to sit down and prepared to absorb the spiritual energy of heaven and earth.

At that moment, a young man of about thirteen years old behind Omi said, "Hey, are you the one that the Ninth Elder brought back yesterday?"

Omi looked back at the young man and said, "Exactly, what advice do you have?"

"Oh, nothing to instruct, just a casual question, by the way, I advise you to find a place to sit over." The teenager said.

"Why should I look past a place, this place, isn't it whoever comes first, whoever occupies the seat is the one who gets it?"

"That said, but it's also the case ah, the seat you're sitting in now is the exclusive seat of Tang Baimiao, Tang Baimiao is the youngest son of the Third Elder of the Tang Family, you better not offend him."

"Why can't you offend him, just because he's the third elder's bullshit son?"

"Shh, you keep your voice down."

"Why should I keep my voice down, is it because of a little kid that I, Omi, don't even have the freedom to discuss?"

"Speechless to you, Tang Baimiao's third brother, has already assessed to enter the Flying Cloud Sect, he is only 16 years old this year, he has already reached the fifth stage of body refining, I heard that he is very well-fed in the Flying Cloud Sect, he mixes well with the children of many big families, you are looking for death, how dare you offend Tang Baimiao. This talent of Tang Baimiao's three, in the future he will definitely have a very high status in the Tang family, there is no benefit to offending him at all."
