

King of kings

1865

However, this robot threat was indeed extremely great.

Xu Qing'er said, "Old Ancestor Tang, what the Leader just said is actually still on the conservative side. The Leader said that the strongest dozen or so machine emperors have evolved to the 28th generation of the original power. However, according to my guess, the 29th, or even the 30th generation of pilots may have been born. Because, I've gotten unconfirmed information before, and it was 30 years ago. There are some robots, they seem to be looking for some genius, and there is also a subject that is being researched on how to shatter the void, and now that thirty years have passed, I don't know how well they are doing, or is it a false news."

Omi was startled, "Researching if to shatter the Void?"

Omi was a little shocked, oh my god, the robots had developed to the extent of wanting to shatter the void, this was reaching the level of returning to the ancestors.

If those robots were to really shatter the void, wouldn't they have entered the spirit world.

If the robots entered the spirit world, then with their intelligence and technology level, what would the robots become if they used the resources of the spirit world, that is, the geniuses, elixirs, pills, and magic tools of the spirit world, to develop technology? It was really unpredictable to anyone. Because now, robots could reach this level using just the resources of the mortal realm, and if they used the resources of the spiritual realm, it would be absolutely extraordinary.

"Is it really, the age of robots coming?" Omi not only asked himself.

Omi said to the human leader, "There's no rush for now, you guys can retire first, Xu Qing'er stay behind."

"Yes."

The Human Leader and the rest of the Vice Leaders and such retreated, leaving only Xu Qing'er behind.

Omi smiled, "Xu Qing'er, you are now eighteen years old again, what a feeling." Remember the website .kanshu8.net

"It feels a bit out of place, old arms and legs, suddenly becoming so flexible, as if I've been reborn as a body."

"Oh, you're considered reborn now, and since you're a descendant of the Xu Mei Qian family, I naturally won't treat you badly. Are you ready to follow me in the future? Farewell to the mortal realm henceforth, I'll take you to the spirit realm."

"Ah, really? Of course I will."

"Well then, go deal with your funeral, I thought you said that you were only just in a hospital bed with a tube ready to die."

"Uh, then I'll pretend that I'm already dead, and let those children and grandchildren of mine take care of the funeral for me."

Xu Qing'er walked out of the room and said to a nurse outside who had accompanied him here, "Go out to the front door and tell Xu Qing'er's relatives that, let's say, Xu Qing'er is gone and is walking peacefully."

That nurse didn't see that this eighteen-year-old beautiful girl was the one Xu Qing'er turned young.

The nurse was busy asking, "But, where is old lady Xu's body? His family can't see the body, can they?"

"Tell Xu Qing'er's family that Xu Qing'er's own body was taken away by Old Ancestor Tang."

"Yes." Only then did that nurse leave and come to the entrance of this building to tell the family members outside about this.

Xu Qing'er's children and grandchildren didn't suspect, after all, Xu Qing'er was originally waiting to die in the hospital, and only came back to this place after seeing Omi appear on TV, and now that she was dead, it made sense

It was just that, the remains were taken away by Old Ancestor Tang, feeling a little regretful, but it was also their grandmother's honor.

With that, Xu Qing'er's descendants went back to take care of their grandmother's funeral. Xu Qing'er was already gone in the eyes of their Xu family's descendants.

They wouldn't know that their grandmother was eighteen years old again, even if they met her face to face, they wouldn't believe it, they would think that she just looked like her.

At this moment, in the room, Yan Xinyi said, "Feng'er, aren't you going to kill those robots yourself?"

"Sensei, we're transmigratory ah, those robots can be extinguished with a thought, I really don't care to bully such a weak new species."

"A new species?"

"Yes, everything in the world, existence is reasonable, in fact, I'm a bit conflicted whether I should go against the world and remove those robots or not. This robot, the reason why it was born, is also in line with the development of the times, it belongs to a new species that has emerged, just like humans, and millions of beasts. Now that this new species has only just emerged, am I doing the right thing by beheading it in its cradle?"

"But if you think about it from the perspective of the human race, if you don't exterminate those robot species, these three billion humans will perish sooner or later ah."

Omi shook his head, "Throughout the universe, there are so many human species, how can we exterminate humans with robots? And it's very unfair to think from the robots' point of view that their new species has only been born and is about to die out."

"Windy, you don't want to exterminate those robots, do you? The humans here now are still counting on you to exterminate the robots and then return this world to them humans."

Omi thought about it and sighed, "Shizuo, to be honest, I really quite don't want to exterminate the robots, this extremely has become an extremely powerful species, what reason do I have to exterminate a new species that could potentially dominate the spirit world in the future? Now I'm here, so there's no way the three billion humans here will be exterminated by robots. We are supposed to be strong half-immortals, we shouldn't exist in this space and time and destroy the development of this time. It's already against the laws of the universe for me to save these three billion humans now, and it's even more against the laws of nature to exterminate a new species. If we didn't come to the mortal world this time, then, along with the development of time, the robot species, will definitely rule this technological world. There will even be robotic species entering the spirit world soon. In the spirit world, thousands of species, not one robot species short of a robot species. Why would I want to exterminate a newly born species?"

Yan Xin Yi nodded, seemingly feeling somewhat justified.

"If you look at it from the species' point of view, it's true that you can't go against the will of God and exterminate the robot species."

"So, I'd hate to get involved in an ant war." Omi said, "To Omi, going to exterminate robots is to stomp on a nest of ants, and the war between humans and robots in the mortal realm is a war between big-headed ants and little termites, regardless of whether they are big-headed ants or little termites.

"So, you really want to go to the other world and get some Returned Void powerhouses over here?"

Omi nodded, "Yes, we are half-immortals, we shouldn't interfere in the affairs of the mortal realm, so let them mortal humans handle it on their own. I will go to the other world and find a few of the strongest Returning Void experts, if the strongest Returning Void experts are unable to defeat the robot species here, then it means that the will of the heavens will allow this new species to rise, so I won't dare to disobey the will of the heavens."
