

## Last Building on Earth Chapter 161-165

### **Chapter 161**

#### The Birth of a Unique Treasure

Wang Xuan's heart froze slightly and said, "Have you all seen the people above?"

Liu Weijie nodded and said, "As long as you are promoted to the real state, you will see it sooner or later..."

When he said this, there was a hint of doubt on his face, and said, "Wang Xuan, you said before that you only reached the perfect state, how can you be so powerful, do you have broken through the perfect state now?"

Looking at Wang Xuan, he didn't understand anything. He now believes that Wang Xuan really only broke through the perfect state not long ago, but why he is so powerful, there is only one explanation, that is, Wang Xuan is too talented, and he broke through the perfect state soon.

Wang Xuan shook his head and said, "Almost, did the person above you mean Rakshasa City?"

Yan Shouzheng said with a smile: "It's not just Rakshasa City, the five major forces in Insect Town are not as simple as they seem, including the leaders of the major forces, they are all designated, of course, we don't know the specific details, unless we can break through the state. ."

Xu Xuesong looked up at the sky and said, "It's getting dark, let's go back to Insect Town."

Liu Weijie said, "Yes, Wang Xuan, do you want to go back together?"

Wang Xuan shook his head, he still wanted to stay here for two more days, and strive to break through the state before the fifteenth of this month.

"Then we're going back to Insect Town. We've been here for five days, and we don't have enough supplies. We have to take the time to return to Insect Town before dark."

Liu Weijie added another sentence here: "Scorpion City is a little unsafe at night. It's better to find a better preserved building to rest."

Yan Shouzheng said with a smile: "Look at your unfounded worries, with Wang Xuan's strength, are you still afraid of these sand scorpions?"

Liu Weijie patted his forehead and said, "Yes, Wang Xuan, then let's go."

Xu Xuesong said, "Wang Xuan, when did you return to Bug Town? We'll invite you to drink."

Wang Xuan smiled and said, "Okay." It suddenly occurred to me that Zhang Taixiong was the last person who wanted to treat him to a drink, but unfortunately he was already dead.

"Fairy Wood"

After the two sides said goodbye, Wang Xuan watched Liu Weijie, Yan Shouzheng, Xu Xuesong and Tao Lin run towards the town of insects.

"Listen to them, Scorpion City is not safe at night..."

Wang Xuan looked up and looked around, and soon saw a relatively well-preserved building. It was a two-story building. He approached the building in a flash, and pushed open the hidden wooden door with metal tentacles. He didn't want the wooden door to be broken. Unbearable, when he was gently pushed, it fell and fell, setting off a cloud of dust.

Frowning slightly, this Scorpion City is indeed desolate. Although there are quite a few elites in Worm Town who hunt scorpions here, but because Scorpion City is too big, there are not many elites. According to what he knows, the Xuan Gang owns Counting the number of powerhouses in the state, the powerhouse powerhouses of the five major forces in the entire Insect Town are estimated to be around one hundred.

It is impossible for all of these 100 elites to stay in Scorpion City. At the same time, there are only dozens of people in Scorpion City, so the probability of encountering them is not high. Wang Xuan only encountered a few times this day. Because of this, this makes Scorpion City always have a desolate atmosphere.

Seeing that there was no movement in the two-story building, Wang Xuan let out a metal tentacle and stretched into it, and then walked in slowly.

There are also many broken walls in this two-story building, revealing large holes. Fortunately, most of the main body is still intact.

As the night slowly fell, the wind began to blow in the scorpion city, blowing small grains of sand, making a whirring sound, and the weather at night gradually became worse.

Wang Xuan released Xiaojiao and let it keep watch. He found a corner position that could cover the wind and sand, took out a blanket from the Xumi mustard space, spread it on the ground, and sat down on the blanket.

Now that both the intermediate and advanced nutrient solutions have been used up, and there are only sixty bottles of primary nutrient solution, Wang Xuan took out five bottles and drank them.

This kind of primary nutrient solution is simply better than nothing for him now, and it doesn't have much effect.

Even if you drink five bottles at a time, the effect is not as good as a bottle of intermediate nutrient solution.

He casually threw the five empty bottles aside, and watched Xiaojiao guarding the door. He wiggled his tail slightly and looked very alert, like a faithful guard.

Wang Xuan sensed that the Eye of Fear in his forehead was exuding a chill, which was the power of fear.

Thinking of the King of Fear, thinking of the disappearing Xiao Bichen, thinking of the death of Li Hao and Zhang Taixiong, if the people of Phoenix knew that they were with him, would they mistakenly think that it was related to him and put the blame on his own head?

Thinking of this, he had a headache and sighed slightly.

The sky outside was completely dark, but the wind and sand were getting stronger and stronger.

Wang Xuan frowned slightly, watching the wind pouring into the hole along one side of the wall, making a sound.

"It's so windy, no wonder these buildings in Scorpion City collapsed so badly."

With a grunt in his heart, Wang Xuan slowly closed his eyes. Since he entered Scorpion City, he still hasn't closed his eyes. He was tired for a long time. Now he is lying down. Although the wind is blowing outside, he still feels tired. Soon fell asleep.

I don't know how long it took, Wang Xuan woke up with a start, and immediately heard the whistling sound of the wind, and in the wind, there was a faint sound of the monster's screeching.

"Is it the sound of the sand scorpion?"

Wang Xuan remembered that Liu Weijie and Yan Shouzheng had said before that Scorpion City was not safe this night, so he stood up and looked outside through a hole in the wall on one side.

In the darkness of the night, it was dark outside, and the wind swept the yellow sand, roaring and raging, and the line of sight was severely obstructed. You could only see the dark shadow of the Mohu Lake moving in the distance. Light, because in the dark, this light flickers on and off, making it very conspicuous.

Wang Xuan couldn't help but widen his eyes. The black shadows of Mohu moving in the distance were all sand scorpions.

These sand scorpions seem to be hidden at the bottom of the yellow sand during the day, but now at night, in the howling of the wind, they are almost all dispatched. Swirling black water.

Although the wind was loud outside, there were too many sand scorpions whistling, and the sound of the wind could not completely cover up their voices. Wang Xuan was awakened, and he was able to see this astonishing scene.

Although Wang Xuan didn't take these sand scorpions in his eyes, he was still shocked when he suddenly saw the sand scorpions surging like a tide.

The little girl who was originally guarding the door retreated to his side. Although it was a mechanical beast, it possessed a certain wisdom and even had human-like emotions. At this moment, it seemed that he was afraid because of the scene in the distance.

Wang Xuan felt a slight change in the Eye of Fear in his forehead, absorbing a trace of energy faintly. Can this little girl really produce fear?

This unexpected discovery made Wang Xuan glance at Xiaojiao. It seems that although it has a mechanical metal body, it already has some characteristics of a living body in essence.

"Don't be afraid, I'm here." This discovery made him unable to regard Xiaojiao as a cold machine, and he couldn't help but whispered comfort.

Xiao Gu understood what he said, and immediately nodded slightly. Through the Eye of Fear, Wang Xuan could sense that the fear emanating from his body was greatly reduced.

"What is the flickering light in the distance? It seems that these sand scorpions are all converging in that direction... Is there any treasure?"

Wang Xuan concentrated his attention and looked into the distance, hoping to see clearly.

At this moment, from the flickering light in the distance, there was a long howl.

This is definitely not the sound made by sand scorpions, but the long whistling sound made by humans.

"Anyone there?" Wang Xuan was slightly startled, and immediately thought whether someone was besieged by a swarm of sand scorpions there?

Encountered by so many sand scorpions, even if a group of elites are there, they will be extremely dangerous.

Wang Xuan was wondering if he had heard it wrong, and there was an explosion sound in the distance. This time, he could be sure that there were people in the distance. This was the sound of an explosion made by throwing an explosive crystal.

With the sound of the explosion, a fiery red light suddenly appeared in the dark distance, followed by the fire, which turned into a huge flame.

Wang Xuan immediately recognized that this was the flame caused by the flame spar. He had used it once, and now there are seven flame spar in his Xumi belt.

This huge flame rose, and with the help of the wind, the flame burned more and more vigorously, tearing apart the darkness in the distance. Although it was far away, Wang Xuan or Mohu saw a figure flashing in the far distance, followed by another several loud explosions.

Looking at the looming figure flickering, there are not only people in the distance, but also a lot of people.

"What the \*\*\*\* are those, and there are quite a few people gathered here..."

There was a hint of curiosity in Wang Xuan's eyes. The flickering light that appeared at the beginning, the faint glow, looked like some kind of treasure was born. In addition, the group of sand scorpions and the figures constantly appearing in the distance made him curious. I was completely inspired, and I had the idea of wanting to see what happened.

"No matter, let's go and see what's going on first. It happens that I still lack the energy to break through the state. Now that there are so many sand scorpions, I don't need to take the initiative to find them tomorrow."

Wang Xuan made a decision, and immediately summoned Xiaojiao to enter the fusion.

Xiaoguo jumped to attach to him, extending a layer of mechanical shell, forming a second layer of defense outside his metal gear.

Once rushed into so many sand scorpions, no matter how strong he is, it is impossible to block or dodge all the sand scorpions' attacks. The double defense can resist most of the power when he is attacked.

After the fit was completed, Wang Xuan looked back at the blanket spread on the corner of the wall. Thinking that the blanket was dirty, he abandoned it here, shook his body, and rushed out.

When he rushed out, the wind and sand came whistling and beating in his face. Wang Xuan was busy squinting his eyes, only to feel that the wind and sand were so big that he couldn't even breathe well.

He could only cover his face with his hands, kick with his feet, and accelerate toward the distance.

Originally, he thought that he would be besieged by the surging swarms of sand scorpions, but he never thought that these sand scorpions were just rushing towards the place where the violent flames and explosions were heard in the distance, ignoring him at all.

"It seems that there must be something there that is fatally attractive to them to make them not interested in me."

Wang Xuan rushed forward while thinking about it, and soon rushed into the group of sand scorpions, and ran wildly into the distance with these sand scorpions.

These sand scorpions continuously hissed and screamed, swaying the barbs behind them, like an army of scorpions, menacing.

Wang Xuan was much faster than them, constantly surpassing them. Some sand scorpions noticed him, and some thought about waving the barb to attack him, but just as he lifted the barb, Wang Xuan surpassed it and rushed to it. It couldn't catch up with Wang Xuan's speed at all.

As he got closer, the sound of the explosions that appeared from time to time became more and more intense. With the help of the flames burning violently in the distance, Wang Xuan finally saw that among the broken walls, he didn't know how many sand scorpions were attacking frantically. Between them,

explosions appeared from time to time, blasting these sand scorpions to shreds, and the broken limbs and visceral juice flew together.

Among these crazy sand scorpions, there are at least a dozen figures rapidly moving and attacking.

Each of them is a powerful and powerful person.

Between them, there was a behemoth shaking, making a huge screeching sound from time to time.

This is a super giant sand scorpion.

Ordinary sand scorpion is three meters long, and its body length reaches ten meters. If you count the barbs that are also ten meters long, it is twenty meters, and the height reaches four or five meters. It moves among the crowd, far away. From a distance it looks like a super heavy truck.

Suddenly seeing such a giant sand scorpion, Wang Xuan was taken aback, he hurriedly opened the eye of the illustrated book, and immediately captured its information.

"Name: Sand Scorpion Lord, Race: Scorpion Clan, Dangerous Degree: ★★★★★★ (six stars), Sand Scorpion Lord is the leader of the Sand Scorpion clan, it can command all sand scorpions, Sand Scorpion Lord likes genius treasures, it will sleep deep in the yellow sand where the genius treasure is buried, and sleep with the treasure, it will hardly appear, only when the genius treasure matures or some kind of treasure is born, it will appear, the powerful sand scorpion lord, The danger level reaches six stars, and it is one of the most dangerous types of scorpions in Scorpion City."

After sensing the information, Wang Xuan knew that this giant sand scorpion was the lord of all the sand scorpions, and the danger level was six stars, which meant that its strength surpassed its perfect state, and it was comparable to a powerhouse that had grown to a higher state. .

The appearance of the sand scorpion lord means that there is a treasure. Wang Xuan finally understands why there are so many high-level powerhouses here, and join forces to besiege and kill the sand scorpion lord.

The sand scorpion lord kept screaming, calling the sand scorpion army.

A large number of sand scorpions gathered here crazily, and surrounded the crowd who came here.

These people kept throwing explosive crystals and flame spar to defend against the frantically besieging army of sand scorpions.

At the very center, there are three figures, surrounding the screaming sand scorpion lord, constantly launching powerful attacks, seeing the huge wounds appearing on the surface of the sand scorpion lord's body, with juice flowing out along the wound.

The sand scorpion lord was injured, apparently because of them.

The sand scorpion lord who can hurt the six-star danger level, the strength of these three people is terrifying.

Wang Xuan slowed down, seeing this scene, his heart was slightly shocked.

Among the three, there was a woman who was Tang Ruoyu whom he had met several times.

Although Tang Ruoyu likes to be alone and is strong, but if he wants to fight against this terrifying sand scorpion lord, he also needs to join forces with others.

The hatching beast in her right hand, the white long sword, has changed a lot from the last time Wang Xuan saw it.

This originally slender white long sword has a width of ten centimeters and a length of about one meter five. It can be called a giant sword. The claws and the tail of the hilt also have snow-white tiger claws.

When Wang Xuan noticed her, he saw that she was holding a sword in her right hand and swung it fiercely. The two snow-white tiger claws wrapped around the sword came out through the sword. There was a faint sound of tiger roaring on the sword. There was a Menghu sleeping in this sword, and she was awakened at this moment.

The pair of snow-white tiger claws volleyed out, and with a snort, they grabbed one of the forelimbs that Lord Zhongsha Scorpion swung over.

The pair of tiger claws were too sharp, and the sand scorpion lord's forelimb shell couldn't resist it. Cracks appeared immediately, and the tiger claws caught it.

Wang Xuan noticed that there were many similar huge wounds from tiger claws on the body of the mad sand scorpion lord, which should be Tang Ruoyu's masterpiece.

To be able to fight against the six-star danger level Sand Scorpion Lord, Tang Ruoyu's strength, even if he didn't break through the state, at least was the peak powerhouse in the state.

The other two who teamed up with Tang Ruoyu to hunt the sand scorpion lord were both men, one was about twenty-seven or eighty-years-old, tall, handsome, with a yellow turban on his head, representing that he came from the "dynasties" of the five major forces.

His right arm and the right half of his body were covered with green vines~[www.mtlnovel.com](http://www.mtlnovel.com)~ These green vines were like strips of green pythons, extending down to his feet along his right arm and body, and then using With his right foot as the center, it stretched out along the yellow sand ground, crisscrossing and intertwining into a huge green ivy net.

The sand scorpion lord's feet on both sides were entangled by the green vines. Every time he lifted his feet and tore off a few vines, more vines were entangled, trapping it in place.

Wang Xuan can understand at a glance that these three people can surround the sand scorpion lord and cause him to be injured in many places. Because the green vines are entangled in the sand scorpion lord, it can only exert 50% of its great ability. It can be said that this Men are doing a great job.

In addition to Tang Ruoyu and this man, in the end there was a man of about thirty-seven or eighteen years old, hanging a metal plate, representing that he was from the "Justice League".

This man had fair skin and long beards. Although he was clean-shaven, he could still clearly see the faint black beards against the white skin.

His speed was very fast, constantly circling the sand scorpion lord, dodging the barbs that he was waving frantically to attack, and on his raised right arm, there was a strange beast lying on his back.

This alien beast is less than one meter long, blue and white, with fish scales, like a big herring, but it has bird-like wings on its back. When it is like gliding, the speed far exceeds that of ordinary powerhouses.

He flew into the air like a glider, and on the raised right arm, the beast with the body of a fish and the wings of a bird opened its mouth and spit out streaks of white light from it.

## **Chapter 162**

### **Mystery Mushroom**

This white light flashed, and wherever it fell, it exploded.

The sand scorpion lord had several broken shells on his body, which were blown apart by the white light.

The man understood that the shell of the sand scorpion lord was too hard to explode, so he controlled the hatching beast on his right arm, and the white light it spit out concentrated in one place and exploded continuously. No matter how hard the sand scorpion lord's shell was, it could not resist. It was blown apart gradually, and then a huge hole was blown up, getting bigger and deeper.

In addition to these three people, the remaining dozen people are slightly weaker. Wang Xuan saw the signs on their bodies, five from the "Dynasty", four from the "Justice League", and five from "Rakshasa".

Their strength is slightly weaker, and they dare not attack the sand scorpion lord in the center.

When Wang Xuan arrived, the speed slowed down, and he was immediately attacked by the sand scorpion.

Two metal tentacles stretched out, bowed left and right, and made two crisp snaps. The two sand scorpions who wanted to attack him were immediately smashed and their heads exploded, and two white scales appeared, submerging into his right hand.

These people also noticed Wang Xuan and glanced at him in amazement. After all, everyone here is a team of several people, and almost no one travels alone, except for Tang Ruoyu.

Wang Xuan ignored the astonished eyes they looked at him. Although these dozen people were united together, it was still difficult to resist the sand scorpions coming from all directions like a tidal wave, so they could only keep throwing exploding crystals to resist.

Wang Xuan noticed that under the belly of the sand scorpion lord, there was a ray of light that flickered and disappeared, and he knew in his heart that the ray of light must be a rare treasure born this time,

but now it is protected by the sand scorpion lord under the belly, wanting to To get this exotic treasure, you can only kill the sand scorpion lord first.

The Eye of Fear in Wang Xuan's forehead felt the fear, and immediately began to quietly absorb the power of fear.

These sources of fear power include sand scorpions in all directions, as well as these dozen or so powerhouses, but their fear power is all but absent. The one who really released the powerful fear power was surrounded by everyone in the center. Sand Scorpion Lord.

Through the Eye of Fear, Wang Xuan felt the powerful sense of fear in the sand scorpion lord's heart.

Although it is a six-star dangerous monster, whether it is Tang Ruoyu, the twenty-seven- or eight-year-old man from "Dynasty", or the hatchling beast from "Justice League" is a man with wings of herring, The strength has reached the peak state of the state, and it can be said that they are only a thin line away from the state.

Wang Xuan thought of the "Rakshasa" Chen Daolin that he met in the tavern that day, and he should belong to the same level.

It can be said that as long as they go further, they are above the state.

The three joined forces, and Lord Sand Scorpion was full of wounds and could no longer resist.

Seeing that the sand scorpion lord could not resist, Tang Ruoyu and the three slowed down their shots. Killing the sand scorpion lord was not the goal. Their real goal was the treasure under the sand scorpion lord's body that released the rays of light.

Now they are starting to watch out for each other, preventing the other from attacking them, after all, they both want to have their own treasures.

Wang Xuan killed a few sand scorpions in a row, and slowly approached. He heard angry shouts in the distance, but five figures appeared in the distance and were rushing towards them.

These five people are wearing "Phoenix Badges", and they are from the "Phoenix".

They rushed here following the swarms of sand scorpions. Just like Wang Xuan before, these sand scorpions wanted to rush into this building to help the sand scorpion lords, ignoring them.

Unstoppable, they quickly approached the edge of the building, when they were attacked by sand scorpions.

Wang Xuan sees that the strength of four of these five people is only equivalent to the ordinary powerhouse. Among them, there is a short man who is stronger, much stronger than the normal realm, but it is not as strong as Tang Ruoyu and the three of them. peak level.

The short man also saw Tang Ruoyu and the other two men who were hunting the sand scorpion lord, with a surprised look on his face.

Although he knew that his strength was not as good as the three of Tang Ruoyu, he did not give up, but took the other four to approach slowly, looking for opportunities.

The thirty-seven- or eight-year-old man from the "Justice League", the hatching beast in his right hand flapped his wings, he jumped up and rose again, with the help of the buoyancy of his wings, he seemed to be floating in the air, and the herring in his right hand was different. The beast opened its mouth and emitted a white light.

This white light once again fell on the back of the sand scorpion lord who had been blasted with a huge hole. With the loud bang, the sand scorpion lord suddenly raised his head, almost stood up, and let out a painful roar.

It stood up, and the glow that was originally pressed under its belly lit up, and everyone's eyes were immediately attracted.

Wang Xuan was also busy looking over. At this time, he discovered that under the belly of the sand scorpion lord, the faint glow was actually a large mushroom.

This mushroom is about half a meter high and about half a meter in diameter. It emerges from the yellow sand, exuding a flickering glow. Although Wang Xuan doesn't know what it is, he can understand it just by looking at it. This must be some kind of genius treasure.

Busy opening the eyes of the illustrated book, wanting to capture the information about the mushroom gullible in the rays of the sun, the sand scorpion lord lowered his body again to cover up the mushroom gull.

His picture book eye could not capture the appearance of Mushroom Gu, and could not observe the data.

Screamed a pity, but saw Tang Ruoyu suddenly jumped forward, went around to its side, and swung the snow-white long sword in his right hand towards its side.

The man from the "Dynasty" also took action and determined the specific location of the mushroom. The green vines he controlled were plunged into the yellow sand, and gathered along the direction of the mushroom. He wanted to move this mushroom from under the yellow sand. Mushroom taken away.

The short man from "Phoenix" also jumped forward immediately. Although he was not as strong as the three, he was not far behind.

"My Healing Game"

Just as Tang Ruoyu swung out the snow-white long sword, Lord Sand Scorpion's barb appeared, fell into the sky, and hooked towards her.

Tang Ruoyu didn't dare to be careless with this barb blow, and Tang Ruoyu immediately shook the long sword. The two snow-white tiger claws attached to the sword flicked out through the sword, facing the hooked barb. A bump.

"Zheng", the barb was so powerful that the two snow-white tiger claws were shaken back, but with the snow-white tiger claws blocking, Tang Ruoyu had quickly approached the belly of the sand scorpion lord, and the snow-white long sword in his right hand suddenly thrown out by her.

At the hilt of the long sword, there is a sword whisker, which is extending in her right hand. She relies on this sword whisker to control the long sword from a distance.

With a snort, the flying snow-white long sword pierced into the belly of the sand scorpion lord. This belly was protected by a hard shell. The tiger claws she controlled earlier grabbed a huge crack, and the long sword pierced through the crack. She began to control the long sword, twisting and twisting inside it.

The sand scorpion lord roared and screamed, and he couldn't help but stand up again, and the mushroom Gu, who was releasing the rays of light under his belly, was exposed again.

The short man from "Phoenix" had already approached quietly, and when he saw Mushroom Gu's appearance, he immediately jumped forward, willing to take a risk, and rushed under the belly of the standing sand scorpion lord, thinking about it. To grab this mushroom solitary.

It's a pity that there are people who are faster. A few green vines suddenly stretched out from the yellow sand storm below, like big pythons, and they were about to entangle the mushroom.

The man from the "Dynasty" couldn't help showing a hint of joy on his face. Even a calm and determined person like him couldn't help but get excited.

At this moment, a few white lights appeared and fell on the mushrooms that he extended, and suddenly there was a loud bang. The lonely little men were bombed.

He let out a roar, the mechanical beast shell on the surface of the body and the third-order alloy equipment on the body were blasted, covered in blood, raised his head, his eyes were full of rage.

"Shi Jin!" The man who controlled the green vines roared angrily when he saw the "Justice League" man emitting white lights.

However, Shi Jin ignored his angry shouts, just turned his body, trying to seize this opportunity and grab Mu Gu into his hands.

Suddenly, green vines burst out, entangling one of his legs and dragging him backwards, preventing him from approaching Mu Gu.

"Chu Boyu, what do you mean?" Shi Jin also showed a trace of anger on his face, but saw that the sand scorpion lord who had stood up had fallen down again, and he had to retreat.

Chu Boyu sneered, and withdrew his right hand, all the green vines returned to his body, without him using the green vines to control the actions of the sand scorpion lord, suddenly the sand scorpion lord went crazy, turned his body, aimed at Tang Ruoyu, the huge barb swung out sideways.

Tang Ruoyu, who was controlling the snow-white long sword, saw that something was wrong and was busy retreating.

She has a distance limit on the control of the snow-white long sword, and when she retreats, the long sword retreats.

The sand scorpion lord screamed again, without Chu Boyu's green vines to suppress, its body turned on the spot, the barbs behind him swung wildly, and afterimages were drawn in the air, each attack speed is faster Surprisingly, even stronger than Tang Ruoyu, he could only dodge it. The short man from "Phoenix" was swept away by the barb after dodging a little later. Everyone only heard a "pop", and the short man even screamed. It was too late to release, and the whole body was beaten to pieces together with the alloy armor and the mechanical shell, and the flesh and blood flew.

The power of this blow was so strong that even Chu Boyu and Shi Jin changed their faces.

The other four "Phoenixes" who came along with the short man's face changed greatly, and he couldn't help but exclaimed.

This short man is the leader of the five of them. It can be said that they usually admire the strength of this short man. He is the most powerful among them.

The sand scorpion lord suddenly became powerful and killed the short man. The situation suddenly became a little chaotic. The surrounding sand scorpions rushed in frantically. The dozen or so people couldn't resist. Only the sand scorpion rushed out of their defensive line and charged towards Tang Ruoyu, Chu Boyu and Shi Jin in the center.

Wang Xuan killed a sand scorpion easily, rushed to the other side, and circled behind the sand scorpion lord, trying to seize the opportunity to capture the radiant mushroom.

Although he has not seen the information about this mushroom, what use is it, but it is a very rare treasure to be able to make everyone fight for it like this.

Tang Ruoyu swung his right hand, and the snow-white long sword in his hand swept out horizontally, and cut a sand scorpion that was pounced on him. Hold, then use it as a weapon and throw it at the mad sand scorpion lord in the center.

Shi Jin rose into the air again, gliding briefly in mid-air, and the hatching beast on his right hand fired white dots of light, continuing to attack the sand scorpion lord.

These white light spots exploded on the body of the sand scorpion lord. The sand scorpion lord screamed wildly. It was seriously injured, especially Tang Ruoyu's previous blow. Now it is attacking frantically. It seems ferocious and unstoppable. Back to light.

Tang Ruoyu and several people understood that they were delaying time, dodging as much as possible, and then giving the monster a fatal blow.

Wang Xuan wanted to approach from behind, but didn't want the afterimage above to flash, and the barb of the sand scorpion lord appeared, and volleyed it down towards him.

When he saw the scene of the short man being beaten up just now, he naturally understood the power of this barb.

Not daring to block hard, his body flashed, and he narrowly avoided it.

Without a sound, the barb plunged into the yellow sand, sinking deeply into it.

Seeing this, Wang Xuan seized the opportunity, waved his metal tentacles, and hit the barb's joints.

There are several cracks on the surface of the barb joint, which was left by Tang Ruoyu using the long sword and tiger claw. Wang Xuan's strike was very precise. The metal tentacle was drawn in one of the cracks, and only a crisp sound was heard. This crack Enlarged, the tip of the barb broke apart.

This blow caught the attention of the three of Tang Ruoyu. Whether it was Chu Boyu or Shi Jin, they all looked at Wang Xuan with vigilant eyes, and Tang Ruoyu also glanced at him. There was no vigilance in their eyes, but a hint of surprise. .

The barb broke, the sand scorpion lord screamed, Tang Ruoyu, Chu Boyu and Shi Jin seized the opportunity and shot at the same time.

Chu Boyu waved out green vines one by one and wrapped them around the feet of the sand scorpion lord on both sides.

Tang Ruoyu jumped up, the snow-white long sword in his hand shot, and slashed towards the head of the sand scorpion lord.

Shi Jin activated the hatching beast on his right arm and spit out white light, targeting the huge hole on the back of Lord Sand Scorpion.

The three shot at the same time, and they wanted to completely solve the sand scorpion lord in one blow.

Wang Xuan's Eye of Fear sensed a strong fear force, which was the fear from the sand scorpion lord.

Obviously it also understands that it is afraid of dying.

Although it is a six-star dangerous monster, the three people in front of it are too terrifying, and it has been seriously injured and cannot resist.

And those who were originally blocking the surrounding people suddenly gave up their resistance at this moment and turned back one after another. Everyone had only one purpose. When Tang Ruoyu and the three killed the sand scorpion lord, they would take action together and \*\*\*\* the sand scorpion lord hidden under the body. The solitary mushroom.

In the face of Yibao, everyone is jealous.

"Boom!" With an earth-shattering loud noise, a low house on one side suddenly rose from the ground, and a large amount of yellow sand rose into the sky.

When the incident happened suddenly, everyone was shocked. Even Tang Ruoyu, Shi Jin, and Chu Boyu, who had attacked the sand scorpion lord with all their strength, were affected, and it was inevitable that they would be distracted.

Wang Xuan released two metal tentacles, extending to the limit of six meters, and wrapped around the broken barb of the sand scorpion lord from behind. He wanted to grab it. Beneath the lifted low house, a big green scorpion jumped out from the bottom of the yellow sand.

This big scorpion is slightly smaller than the sand scorpion lord, but it is much larger than the average sand scorpion, with a body length of about seven or eight meters. With a scream, a strong man from the "Dynasty" was caught off guard. He was swept away by the barb, and was immediately beaten to pieces, blood flying.

While swinging its barbs, the big scorpion opened its mouthpiece, and a stream of green juice was ejected from it. It shot out like a sharp arrow and shot towards Shi Jin, who flew into the air.

Shi Jin was a little confused, knowing that the green juice was definitely dangerous, so he didn't care to attack the sand scorpion lord again, and was busy letting the hatchling beast on his right hand restrain his wings, and his body fell down, narrowly avoiding the green juice that was sprayed over.

Wang Xuan sensed the body of the sand scorpion lord, and the power of fear that was released was greatly reduced.

The appearance of this big green scorpion greatly increased the confidence of the sand scorpion lord, and he immediately lost his fear. With a wave of his forelimb, he blocked the snow-white long sword that Tang Ruoyu slashed over.

"Zheng", like the sound of gold and iron hitting, the two forelimbs of this sand scorpion lord are as hard as steel, although Tang Ruoyu cut a gap, but purely in terms of strength, she is not as good as this sand scorpion lord.

With a wave of his forelimbs, Tang Ruoyu and the snow-white long sword in his hand flew upside down more than ten meters away~[www.mtlnovel.com](http://www.mtlnovel.com)~Wang Xuan had just wrapped around the broken barb behind the sand scorpion lord. He didn't expect this big green scorpion to appear. The Eye of the Pokédex captured its message.

"Name: Lord of Green Poison, Race: Scorpion, Dangerous: ★★★★★★ (six stars), Lord of Green Poison is the leader of the Green Poison Scorpion clan, it is covered with highly poisonous and cannot be easily contaminated, it can The green poison is sprayed from the mouthparts and turned into a green poison arrow. Once hit, the green poison arrow can easily turn the enemy into a pool of pus. It is one of the most dangerous scorpions in the scorpion city."

After sensing this information, Wang Xuan knew that this was the Green Poison Lord. He had encountered the Green Poison Scorpion underground before. Obviously, it belonged to the same as the

Sand Scorpion Lord. It was one of the few scorpions in Scorpion City that had reached a six-star danger level. One, each has a strength that is almost beyond the powerhouse.

Instantly killing a powerful man from the dynasty, forcing Shi Jin to retreat, the green poison lord flicked his feet on both sides, and shot a green poison arrow again from his open mouth, this time targeting Chu Boyu.

Chu Boyu's expression changed. There was the sand scorpion lord in front and the green poison lord in the back. No matter how strong he was, he couldn't resist. He was busy jumping at full speed, narrowly avoiding the green poison arrow.

Although the sand scorpion lord was seriously injured, he seized the opportunity, moved his huge body, and slammed into it.

Chu Boyu was shocked and activated the strongest force, and countless green vines rose up and intertwined into a net, but unfortunately they were not able to completely block the sand scorpion lord.

The green vines were broken one by one, Chu Boyu groaned, was hit by the sand scorpion lord, opened his mouth to spurt blood, and fell out.

This is also thanks to the green vines that cancel out most of the strength, otherwise he will be seriously injured if he just hits this one.

### **Chapter 163**

Shocked by all parties

Wang Xuan has been using metal tentacles to wrap around the broken barb of the sand scorpion lord. He originally wanted to help the three to trap the sand scorpion lord together, but he did not want the appearance of the green poison lord to disrupt everything.

Seeing that the sand scorpion lord collided with Chu Boyu, he was also pulled to the point where he could not stand still and rushed forward. He immediately took advantage of the momentum to pull the metal tentacles, soared into the air, and landed on the back of the sand scorpion lord. He saw a huge giant in front of him. The hole is exactly the wound that Shi Jin continuously blasted out by using the white light.

Suddenly there was a flash of green light, and the green poisonous lord fired the green poisonous arrow again, the target was exactly him who had just landed on the back of the sand scorpion lord.

Seeing this, Wang Xuan jumped into the huge hole without hesitation, avoiding the green poisonous arrow, and the metal tentacles extended up along his right arm, merging with the flesh and blood of the right arm, turning into a giant monster with a length of more than one meter. Arm, strike down.

With a loud bang, terrifying power erupted from the giant arm of the beast, immediately piercing the huge hole, opening a gap in the belly of the sand scorpion lord and falling down.

Tang Ruoyu who fell out quickly stood up and wiped the blood from the corner of his mouth. Seeing this scene, he couldn't help but widen his eyes.

Wang Xuan's performance surprised her.

A huge hole was punched through from the back to the stomach, and the sand scorpion leader made an earth-shattering roar from the mouthparts that were opened, which was a real fatal blow.

Wang Xuan fell from its tattered belly, and the rays of light flickered in front of him. It was the big mushroom solitary rooted in the yellow sand.

Before he could think about it, he stretched out his left hand and grabbed the big mushroom in his hand.

I don't want this big mushroom to suddenly go up and pull out two roots from the yellow sand, which are like human legs. With a flick of the roots, it rushed into the belly hole of the sand scorpion lord above, and followed The hole in its back came out, trying to escape.

It happened suddenly, Wang Xuan never thought that the big mushroom would move on his own, and the speed was not slow. He was busy looking up, but saw that Shi Jin appeared at the edge of the hole in the back of the sand scorpion lord, just in time. Facing Da Mushroom who was rushing up, he stretched out his left hand to grab it.

Suddenly, green vines appeared one by one, and Chu Boyu, who was injured and fell out, appeared again, with blood hanging from the corners of his mouth. He controlled a large number of vines in the air and tied Shi Jin's whole body.

Shi Jin stretched out his arms with all his might, and pulled the vine to the end. A few inches away, he watched the big mushroom jump out of the hole from his hand.

"Chu Boyu—" Shi Jin's face was contorted with anger, he gritted his teeth, and these three words seemed to come out of his throat.

However, Chu Boyu ignored his roaring and screaming, while controlling the vines to trap Shi Jin, while controlling the green vines, he wanted to entangle the big mushrooms who rushed out.

This big mushroom is very flexible. With two roots propped up to the side, it jumped out diagonally, avoiding the green vine, and suddenly a metal tentacle appeared in the hole below, like a python.

Big Mushroom Gu just jumped diagonally to avoid the green vines, and could no longer dodge the metal tentacles entangled below.

Wang Xuan emerged from the hole, stretched out his left hand, grabbed the struggling big mushroom, opened the space of the mustard seed, and stuffed it inside.

At the same moment, a white scale appeared, submerging into the white light of his right hand.

This is the white scale of the sand scorpion lord. The energy contained in it is extremely powerful. It is absorbed by his white scales, and the energy fluctuates violently immediately, and it seems to burst open.

He understands that the energy he needs to break through the state is finally enough.

It's just that the white light in the right hand became quiet after the violent fluctuations. It seems that if you want to break through the state, not only can you get enough energy to break through, but there are obviously other conditions.

At this moment, Wang Xuan didn't have the energy to think about it. With a flick of his body, he drilled out from under the body of the sand scorpion lord, and he saw a huge emerald green figure facing him. A poisonous green arrow made of venom shot him in the head.

The green poison lord appeared, and the green poison arrows were fired from the open mouth. The speed was so fast that the scalp was numb, and this speed was enough to threaten the powerhouse at the peak of the state.

Startled, he was busy tilting his head, and the green poisonous arrow nearly flew past his helmet, followed by a green barb.

This time, Wang Xuan had no choice but to use his right arm, the giant arm of the beast, to meet him.

One after another blue dim light appeared from the giant arm of the beast, and he understood that his own strength was not enough to fight against the barbs of a powerful master who could instantly explode, and he could only borrow the energy of blue crystal scales.

"Boom", the barb confronted the giant arm of the beast head-on, two terrifying forces collided, and the barb swung by the green poison lord was bounced back by an even more terrifying force.

Seeing this scene in the eyes of Tang Ruoyu who had just rushed towards here at full speed, her eyes shrank slightly, and a strange color flashed inside.

To be able to smash the barbs of the Green Poison Lord back like this, the strength is no less than that of the Green Poison Lord. Purely in terms of power, even the powerhouse at the peak of the state cannot do it.

Although Wang Xuan shook off the barb, he was not relieved. He only felt a violent shock in his right arm and bursts of numbness. A crack immediately appeared on the surface of the giant arm of the beast where the barb was drawn, and there was faint green blood. seeped out.

This half-metal, half-flesh monster arm was injured for the first time.

Wang Xuan was startled, knowing that the barb contained a highly poisonous poison. Now that the giant arm of the beast was injured, the poison had penetrated into the blood.

The blood oozing out now has a faint green color, obviously poisoning.

Being blocked by the green poison lord, Wang Xuan failed to escape immediately. Chu Boyu appeared above the body of the sand scorpion lord, his face was indifferent, he stared at Wang Xuan, and with a wave of his right hand, green vines came along. Extending over the corpse of the sand scorpion lord, it appeared in a fan shape around Wang Xuan, trying to entangle him.

He and Tang Ruoyu and Shi Jin fought desperately. It can be said that he was busy in the middle of the night, and then he trapped the sand scorpion lord. Seeing that he was about to succeed, he was cut off by Wang Xuan. Not only the sand scorpion lord's white scales were snatched by him. Now, even this exotic treasure, Mushroom Gu, has been taken away by him.

Chu Boyu was angry to the extreme.

This mushroom solitary is very important to him, so he does not hesitate to tear his face with Shi Jin, who has a good relationship on weekdays, and even kills people.

Wang Xuan knew something was wrong when he was blocked by the green poison lord. He waved his left hand, and a metal tentacle flew out, instantly reaching the six-meter limit. The metal tentacles were entangled.

The barb bounced back, and when he pulled his left hand, the metal tentacle was pulled straight. With this strength, he suddenly rose up from the ground, like wings on his back, and instantly flew above the head of the green poison lord.

The green vines that were fanning out were all emptied.

Chu Boyu opened his eyes wide, showing an incredible look.

Wang Xuan's quick response made him take a deep breath.

"Good boy!" He couldn't help but snort, and it was too late to control the green vines to entangle them in the air, but when Wang Xuan reached the top of the green poison lord's head, he quickly loosened the metal wrapped around its barbs. The tentacle, the body fell down, fell steadily on the back of the green poison lord, stepped on it for two steps, and reached the neck of the green poison lord, and the metal tentacle waved out again, and entangled the green poison lord from behind. its neck and head, thereby stabilizing its body on its back.

Not to mention that Chu Boyu was stunned, even Tang Ruoyu, Shi Jin, who had just arrived, and more than a dozen people around them were all unexpected.

Everyone saw that Wang Xuan fell on the back of this green poison lord, and they would definitely jump down again, so as to seize the opportunity to escape. Tang Ruoyu and Shi Jin had all figured out how to encircle them. They also spread out and surrounded them.

But Wang Xuan didn't want to escape at all, but stepped on the back of the Green Poison Lord when he was bold enough to wrap his neck and head.

The green poison lord screamed in anger, turned his body like a madman, and set off a large amount of yellow sand, and the open mouth began to spray green poison arrows like crazy, stronger than Tang Ruoyu, Bai Jin and others also dodged, it was almost unbearable. Don't get close.

The barb behind the green poison lord tilted up and hooked down viciously towards Wang Xuan, who was standing behind his neck.

Wang Xuan had long guessed that the green poison lord would have this hand, so while wrapping his neck, he turned his head back, saw the barb flashing, his whole body tensed, he flashed to the side, and with a sigh, he fell down. The hook fell against his body and hooked firmly into the back of the neck of the Green Poison Lord.

This barb was so powerful that it directly cut open the shell on the back of the green poison lord's neck, hooked it in, and couldn't pull it out for a while.

The green poison lord is in severe pain, and the barb contains poison, hooks into its flesh, and the poison penetrates. Although it has a strong anti-poison ability, it is not completely immune, and the flesh on its neck begins to slowly seep. Green juice came out, melted and festered.

This time it was even more mad, and it rushed towards the group of people facing it.

Wang Xuan steadied his body with the metal tentacles. Seeing that the poison was so powerful, a hole in the neck and neck of the Green Poison Lord had rotted in a short period of time. When he looked at the right arm of his demon beast, the wound that had just appeared was not. Healed slowly, and there was no sign of poisoning and festering.

"So that's it, I never thought that my monster arm had the ability to actively detoxify." He thought that the blood that had actively oozing out of the wound just now had a faint green color, which was obviously to expel the invading toxins. The poison he had just received was equal to Solved automatically.

The Green Poison Lord himself was hooked by his own barbs, and the flesh on his neck melted and festered. His pain was piercing his heart.

Two exclamations sounded in succession, and a perfect powerhouse from the "Justice League" and a perfect powerhouse from "Rakshasa" dodged a little late, and were bumped head-on by it.

These two people screamed, they were just ordinary powerhouses, how could they resist the power of the six-star dangerous green poison lord, they were knocked to pieces and killed immediately.

Tang Ruoyu vibrated the snow-white long sword while dodging, and two snow-white tiger claws grabbed out from the side. With a click, the tiger claws broke through the hard shell of the green poison lord and fell in. She used the two tiger claws to connect the sword behind. The sword whiskers on his body were pulled hard, and his body swept up from the ground, rushing towards the back of the mad green poison lord.

Knowing that she couldn't come up, Wang Xuan waved his right hand and retracted the giant arm of the beast. The metal tentacles wrapped around it were scattered and turned into a thick tentacle that was six meters long. smoked it.

Although he was a little curious about Tang Ruoyu, he could not care about pity for Xiangxiyu at this time. This blow used enough power, and there were blue light flashes on the surface, which had activated the energy of blue crystal scales.

If you want to fight against a peak powerhouse like Tang Ruoyu, you can only borrow the power of blue crystal scales.

In his forehead, the Eye of Fear is continuously absorbing the power of fear around him, whether it is the two powerhouses who were killed by the crash, or the living beings and the swarms of sand scorpions around him. It releases a powerful fear energy, and this fear comes from the depths of people's hearts. Even the peak powerhouses like Tang Ruoyu, Chu Boyu and Shi Jin can't say that there is absolutely no way to face such a green poison lord. Half a trace of fear.

In the same way, he also felt the fear of the green poison lord, and his heart suddenly moved.

Tang Ruoyu let out a muffled groan, and had to slash the snow-white long sword in his right hand, and the tiger claws at the hilt appeared, blocking it against the metal tentacles.

There was a crisp snap. Although she blocked the metal tentacles, the power of the blue crystal scales contained in the metal tentacles exploded. She only felt that the snow-white long sword in her right hand suddenly weighed more than a thousand fish, as heavy as being pressed by a mountain. , failed to mount the back of the green poison lord and fell down.

Just as the green poison lord turned around, she was hit by a solid, and with a grunt, she rolled over and fell out.

Tang Ruoyu was knocked into the air, and Shi Jin took advantage of the hatching beast's wings to rise into the air, and white lights appeared one after another, rushing towards Wang Xuan frantically.

Chu Boyu controlled the green vines and began to appear from all directions, trying to entangle the steps of the crazy green poison lord and trap it here.

Although he and Shi Jin hated each other very much, for the sake of Mushroom Gu Yibao, the two joined forces again at this moment.

Wang Xuan knew if he could escape, so he activated the "Eye of Fear" with all his strength, and a crack appeared in the middle of his forehead. The crystal-shaped Eye of Fear turned around and emerged from it, and the power of fear spurted out in an instant. cover this circle.

Everyone suddenly felt like falling into an ice cave.

"Go!" Wang Xuan magnified the fear of the Green Poison Lord infinitely. Through the Eye of Fear, he imposed his consciousness on the Green Poison Lord, and wanted to make it run towards the distance at full speed.

He didn't know if he could succeed or not. This was the first attempt. This method could not be used to deal with human powerhouses.

Before being underground, the sealed King of Fear could even control Xiao Bichen and his consciousness in this way. Naturally, he has not yet reached the level of the King of Fear, so he can only try this green poison lord.

Not wanting to try this, the green poison lord, who was shrouded in fear, sensed a consciousness in the dark, and let it rush towards the distance at full speed regardless of everything.

In the midst of endless fear, it is in a state of panic, and it has no calm judgment of its own.

The green vines that Chu Boyu controlled were pulled by it, and they suddenly broke one by one.

He was not anxious, and immediately started it with all his strength. He wanted to give birth to more green ivy to entangle the green poison lord who was running wildly. There is a huge fear, it seems that as long as he takes one step forward, he will fall into the bottomless abyss and die without a place to be buried.

In the midst of consternation and horror, a metal tentacle appeared and volleyed over.

Wang Xuan, who was originally standing on the back of the Green Poison Lord, fully activated the power of the "Eye of Fear", and Shi Jin, who was gliding into the air, launched a series of white light attacks.

Wang Xuan immediately extended the metal tentacles that wrapped around the Green Poison Lord, and slid down the Green Poison Lord's back, avoiding all the white light attacks.

This large amount of white light exploded on the back of the green poison lord, and a loud explosion suddenly sounded.

Although the Green Poison Lord's back was blasted with green juice and its outer shell was shattered, it seemed to not know the pain and just ran wildly into the distance at full speed.

Wang Xuan, who slid to the side of the Green Poison Lord, still controlled the metal tentacles with his left hand to wrap around the Green Poison Lord's neck. He hung himself beside it, and with a wave of his right hand, the six-meter-long metal tentacles volleyed out and moved towards the Green Poison Lord. Chu Boyu, who still wanted to continue the attack, drew it.

And Shi Jin, who was gliding in the air, wanted to continue his attack, but he didn't want to shiver all over his body. Even the herring beast lying on his right hand trembled, and his wings slammed down. Without any leverage, he fell straight down. .

Chu Boyu was forced back by Wang Xuan's metal tentacles, and the green poison lord rushed out with all his strength, and rushed out more than ten meters in an instant~[www.mtlnovel.com](http://www.mtlnovel.com)~ immediately shook them off.

Purely in terms of the speed of the rush, they couldn't catch up with the six-star danger level Green Poison Lord.

What's more, under the control of Wang Xuan's Eye of Fear, the green poison lord at the moment can be said to have drained all the potential in his body, desperately running towards the distance.

Wang Xuan forced Chu Boyu to retreat, so that he had no time to activate the green ivy to affect the green poison lord. The metal tentacle in his left hand was retracted and returned to the green poison

lord's back. From a distance, it looked like he was riding this huge The giant scorpion ran wildly in the yellow sand.

When Tang Ruoyu, who fell out, got up, Wang Xuan was already 50 meters away, riding the green poison lord.

Chu Boyu and Shi Jin were chasing at full speed, but the distance between the two sides had widened to twenty or thirty meters.

As for the dozen or so powerhouses from the "Dynasty", "Justice League", "Rakshasa" and "Phoenix", the speed is even slower. Swarms of sand scorpions are attacking frantically, not to mention chasing the green poison lord. It's almost impossible to protect yourself, and you can only join forces to think about killing the blood and escaping from here.

Now they also understand that although this mushroom is a genius and treasure, it has no relationship with them.

They all watched everything that happened today. They felt their heart skip a beat when they saw Wang Xuan's performance, and doubts appeared in their eyes.

They all have an idea, who is this young man, and how did such a powerful person appear in the "Xuan Gang"?

Being able to use the green poison lord as a mount, even Tang Ruoyu, Shi Jin and Chu Boyu, the three peak powerhouses, were unable to intercept him.

If they hadn't seen it with their own eyes, no one would have believed it to be true.

## **Chapter 164**

### Hatching Corpse Ru

Although Tang Ruoyu was more than fifty meters behind, he was obviously very unwilling and immediately chased after him.

Wang Xuan looked back at Chu Boyu, Shi Jin, and Tang Ruoyu who were chasing after him, feeling a little excited.

He did not expect that the power of the Eye of Fear would be so incredible, it would not only seriously affect the peak powerhouses like them, but even seize the opportunity to use the green poison lord.

"Sure enough, I guessed it right. It is much easier to control and enslave this relatively low-intelligence monster. This Green Poison Lord is a monster with a six-star danger level. stronger."

"If my Eye of Terror can go a step further, can I use this type of monsters in groups? That's amazing."

Wang Xuan finally understood why the Great King of Fear could rule the Scorpion Legion.

Chu Boyu, Shi Jin and Tang Ruoyu at the back were in hot pursuit. Under the night, Wang Xuan rode the huge green poison lord and ran all the way to the distance, followed by Chu Boyu and Tang Ruoyu who were slowly being left behind.

Wang Xuan sat down and rested directly on the back of the green poison lord, watching a large hole rot in the back of its neck, and then stopped festering and slowly recovered.

Obviously, this green poison lord has a strong anti-poison ability, and now he has finally neutralized the poison and began to recover.

In the back of the green poison lord, Chu Boyu and Shi Jin originally ran side by side, but soon the two of them also separated. Shi Jin took advantage of the particularity of hatching beasts and ran in a straight line, quickly surpassing Chu Boyu.

Tang Ruoyu was at the back because he started the last time.

The scorpion city under the night, the wind howls, Wang Xuan is constantly destroying the eye of fear in his forehead, stimulating the potential of the green poison lord as much as possible, making it faster and faster, among them Shi Jin is the fastest running. The distance from the green poison lord changed from 20 to 30 meters to 50 to 60 meters, and soon became 100 meters away, then 200 meters away, and finally was swept by the wind and sand and disappeared into the darkness in the distance.

Although he couldn't see the three of them, Wang Xuan knew that the three of them would definitely persevere and still drive the Green Poison Lord to run wildly into the distance.

After running for an unknown amount of time, Wang Xuan heard a loud noise coming from the mouthpiece opened by the green poison leader, and green juice seeped out from the gap in the shell on his back.

Suddenly, the Green Poison Lord fell to his knees, and because the speed of the rush was too fast, the back half of his body tilted up and turned forward.

Wang Xuan was busy putting away the metal tentacles, kicked his feet, and jumped out diagonally.

With a loud "bang", the green poison lord fell heavily into the yellow sand facing him and hit a low wall, which collapsed suddenly.

The existence of this dignified six-star danger level, one of the strongest monsters in Scorpion City, fell to the ground at this moment, and didn't even have the strength to get up. Wang Xuan saw that in its open mouthpiece, there were constantly Juice flows out.

After running all the way in the middle of the night, almost all the potential in its body was drained, and now it finally couldn't hold it anymore and fell down.

Wang Xuan sensed the sudden decline of the fearful power in its body, and immediately saw it rolling on the ground, the barb behind him was pulled out from the back of the originally festering neck, raised high, and wanted to attack him. .

Wang Xuan immediately opened the Eye of Fear again and activated the power of fear in it. The fear felt by the Green Poison Lord increased again. This deep-seated fear made its raised barb immediately retract back. The body that stood up slumped down again, and its head was lowered. Under the power of fear, it shivered slightly, which was a gesture of surrender.

Originally, Wang Xuan used the Eye of Fear to suppress it and wanted to kill it, but now he ran wild in the middle of the night, he should have thrown away Tang Ruoyu and the three, the green poison lord was useless, and was about to attack, but now he looked at it low With his head bowed in submission, he suddenly changed his mind.

If he can really subdue it, it would be more useful than killing it. Now that he has absorbed enough energy from the hatching beast, he is also not lacking in the energy of the white scales of the Green Poison Lord.

Open the Eye of Fear on his forehead, use the power of the Eye of Fear to communicate with the Green Poison Lord, plant the seeds of fear in his heart, and make him completely surrender to himself.

The Eye of Fear on his forehead was faintly glowing with crystal luster, and the power of fear enveloped the Green Poison Lord in front of him.

A look of satisfaction appeared on Wang Xuan's face.

This green poison lord is the leader of the green poisonous scorpion. If it can be completely surrendered, he can summon the green poisonous scorpion.

This green poisonous scorpion is a stronger monster than the sand scorpion. The danger level has reached five and a half stars, and it is even stronger than the general powerhouse. If there are groups of green poisonous scorpions, it will be a powerful force. .

Although I don't know if it is useful now, but at least this is a hole card of my own, maybe I will use it anytime.

After a long time, Wang Xuan waved his hand slightly and said, "Go, if I need you, I will call you."

He used the power of the Eye of Fear to plant a seed formed by a ray of fear in the heart of the green poison lord, and he could use this seed of fear to summon it no matter how far away.

This is also one of the abilities of the Eye of Fear, but for the current Wang Xuan, it is not easy to plant such a seed of fear. After completing it, he felt a little tired, and the Eye of Fear, which was faintly glowing in the middle of his forehead, was much darker.

The green poison lord received his order and turned around immediately. It looked exhausted and slowly crawled into the distance. After a while, it disappeared into the wind and sand in the distance.

Waving his hand to drive away the green poison lord, the eye of fear on Wang Xuan's forehead slowly closed, the skin on his forehead returned to normal, and with a flick of his body, he disappeared here.

Afterwards, he came to a relatively well-preserved stone house about a kilometer away, and released Xiaojiao to patrol around. .

So many elites want to \*\*\*\* this big mushroom solitary, what kind of genius treasure is it? What's the use?

Wang Xuan was very curious.

The Eye of the Book of Illustrations caught this big mushroom solitary, and immediately, some information appeared in his mind.

"Name: Hatching Corpse, a very rare foreign object, it can only be born in a special environment where a powerful hatching beast dies. On the hatching beast's corpse, it has various special effects. Its meat can be used to stimulate the hatching beast and awaken the sleeping hatching beast, and the most precious thing in the hatching corpse is a drop of essence liquid at the core of its umbrella cover. The essence of the dead powerful hatching beast is where it has been condensed over countless years. Of course, not all hatching corpses have this drop of essence liquid, only the essence liquid condensed after a long time makes hatching corpses possess a certain spirituality. , the hatchling corpse that can move freely has this drop of essence liquid. This kind of essence liquid is the essence left by the dead and powerful hatching beast. Once swallowed, it can strengthen the hatching beast and have a certain probability of inheriting the dead hatching beast. Special abilities, of course, because the dead hatching beasts are different, the essence of each hatching corpse is different, and the special abilities that can be inherited are also different."

Sensing this information, Wang Xuan showed a surprised look on his face. He didn't expect that this mushroom, who seemed to be able to release the rays of light, had such a strange name. Moreover, it was a mushroom that grew out of the corpse of a hatching beast.

"Only when a powerful hatching beast dies, can this hatching corpse appear on its corpse. In the core of the corpse canopy, there is still a drop of essence liquid, and this drop of essence is the essence of the dead hatching beast... .."

Wang Xuan looked at this big mushroom in the Xumi mustard seed space, and finally understood why Tang Ruoyu, Shi Jin, and Chu Boyu were so crazy about wanting to \*\*\*\* it. This is indeed a treasure.

"The meat of the hatching corpse can be used to stimulate and awaken the hatching beast. Those adults who cannot break through cannot wake up the hatching beast in the body. If you eat a piece of meat, it will not be able to awaken the hatching beast. state?"

Wang Xuan was excited. This hatching corpse is not small and can be shared with many people. If this information is true, then he can completely let everyone eat it, and then wake up the hatching beast and break through the perfect state. The powerhouses also hope to eat this meat to further awaken the hatching beasts, in order to break through and be promoted to a stronger level.

This is another important reason why Tang Ruoyu and other powerful people are so eager to get this hatching corpse.

However, Wang Xuan has assimilated with Warcraft. It can be said that Warcraft is himself. Naturally, there is no need to wake Warcraft again. Eating this meat is useless to him.

What he really likes is the drop of essence liquid in the hatching corpse.

"This hatching corpse can move and escape. Obviously, there must be essence liquid in the canopy. I just don't know what kind of corpse grows on the corpse of the hatching beast. If I eat it, can I inherit the special characteristics of this hatching beast? It seems that in Scorpion City, some kind of powerful hatching beast died there, and it is possible to give birth to this hatching corpse."

Wang Xuan thought while observing, and first made sure that the surrounding area was safe. Then Tang Ruoyu and others were thrown far away, and they should not be able to find it for the time being. After that, he calmed down. The hatching corpse was taken out.

This hatching corpse has a certain spirituality because it contains that special drop of essence liquid, and it knows how to escape, but after being placed in the Xumi mustard seed space, the hatching corpse's image has lost some of its spirituality, and its two roots no longer swing.

Although it stopped moving, Wang Xuan didn't dare to be careless. If it was pretending to be dead, trying to deceive himself, and letting it go sluggish, it would be a big joke.

Use the metal tentacles to wrap it tightly, and then carefully cut it away from the center of the umbrella cover.

The hatching corpse, which was entangled in the metal tentacles, began to struggle, and the two roots kept shaking.

"Sure enough, it really pretended to be dead just now. It is indeed a treasure of heaven and earth. If I hadn't seen it with my own eyes, it would be hard to believe that a mushroom can have such wisdom."

However, his eyes of fear did not feel the fear of this hatching corpse. Obviously, it is not a real creature. These actions can only be said to be a simple instinct.

As the umbrella cover was slowly torn apart by him, the rays of light inside gradually grew. In this night, although there were walls blocking it, there were holes in the walls, which could not completely cover the rays of light.

Wang Xuan understood that in such a dark night, someone in the distance would definitely see the glowing rays of light here.

"Not good, I'm afraid others will see..."

Wang Xuan was afraid of attracting Tang Ruoyu and others, but he couldn't care less at this moment. He saw that the glow was getting stronger and stronger, rising and filling the whole dilapidated house. In this dazzling glow, he finally opened the mushroom in the center of the solitary umbrella cover, a drop of rolling liquid was seen.

This drop of liquid seems to be formed by pure rays of light, crystal clear, this mushroom solitary body can release rays of light, and the source is due to this drop of primordial liquid.

Wang Xuan understood that this drop of primordial liquid was condensed by the essence of the primordial essence left behind by a powerful hatching beast that once died. Once consumed, it would not only strengthen his own magical beast, but could even inherit the characteristics and power of this powerful hatching beast.

This ray of light is too dazzling. In the night of this scorpion city, it can spread far into the distance, but I don't know what it will bring. Later, things change. Wang Xuan didn't dare to hesitate. He was busy lifting the torn mushroom up and tilting it down. , the drop of essence liquid filled with glow rolled down, and he opened his mouth to catch it.

This drop of essence liquid fell into his mouth and immediately went down his throat, all the way along his right shoulder to his right arm, and then into his right hand, where it was absorbed by the white light in his right hand.

This white light originally contained a blue crystal scale and a black energy that belonged to "gluttony", but now there is this drop of primordial liquid full of rays of light.

As the essence liquid was swallowed, the hatching corpse Ru really lost its spiritual energy, the glow on the surface disappeared, and the flesh seemed to be dry.

The glow that filled the room also disappeared, Wang Xuan let out a sigh of relief, and stuffed the rest of the hatching corpse back into the Xumi mustard seed space. In this short period of time, the white light in his right hand fluctuated violently.

The primordial liquid released a strong glow, covering his right hand with white light, and through the skin of his right hand, the glow loomed, and it was very obvious in this dark room.

The radiance of the rays of the sun was not even able to completely cover the flesh of his right hand.

Wang Xuan narrowed his eyes, feeling the drastic changes in the white light with his heart.

This primordial liquid released powerful energy and was merging with the white light. After that, a strong and pure energy surged out and spread to his whole body, starting to strengthen his body.

His original physical strength was due to the strengthening of the blue crystal scales, which surpassed the average powerhouse and could reach the middle powerhouse level. Strengthen his body.

The bones all over his body are making a slight crunch, and the density of his flesh and bones is increasing, making his body stronger and able to withstand stronger bursts of power.

This primordial liquid can not only strengthen the magical beast, but also strengthen his physical strength. The most important thing is that it contains the special power of the powerful hatching beast that has died.

This is what Wang Xuan is most looking forward to.

In the end, what is this powerful hatching beast that once died in Scorpion City, and can he inherit its power?

With the continuous fusion of the primordial liquid with the demon beast, the endless energy was released, and the drop of primal liquid became smaller and smaller within the white light, and the strengthening of his body gradually came to an end.

Wang Xuan felt that his body was getting stronger, and the power in his body was also improving. If his body had undergone the strengthening of blue crystal scales before, without borrowing the energy of blue crystal scales, his strength was equivalent to that in the perfect state. Medium level strong.

Then, after experiencing the enhancement of the Primordial Liquid, even without the help of the energy of the blue crystal scales, he has the confidence to fight against the powerhouse at the peak of his state.

When the energy of the primordial liquid was exhausted, there was a faint glow in its core. When the radiant light was unwrapped by the primordial liquid and released in white light, Wang Xuan shook his right arm, and his right hand holding it tightly, the white light in his right hand seemed to expand in a circle when he sensed it, and a special energy appeared from it.

Sensing this special energy, Wang Xuan's spirit was lifted. He understood that this must be the original characteristic of the powerful hatching beast that died.

Now this original feature is being fused with his magical beast. Once the fusion is successful, his magical beast will be equivalent to obtaining the original feature of the hatched beast that died.

It is not easy for the magical beast to fuse with the original characteristics in this primordial liquid. Wang Xuan sensed it carefully and carefully controlled the violently fluctuating white light ~www.mtlnovel.com~ to fuse with the special energy in it.

This fusion caused a faint pain in his right hand that was about to be swelled and torn.

This hatchling beast that once died was extremely powerful. Even if it had already died, the essence of its original essence was still extremely powerful. Now Wang Xuan wanted to rely on the beasts to devour and fuse it, and bear the burst of energy of this essence. The process was extremely dangerous. He dared not be distracted in the slightest.

During this fusion process, the two metal tentacles on his right hand automatically extended out, reaching the limit of six meters. What appeared inside was no longer a blue light, but a flickering glow.

I don't know how long it took, the wind and sand that was whistling outside gradually became smaller, and a figure suddenly appeared in the distance.

This is a man of about thirty-seven or eighteen years old, with a long beard and sweat on his forehead. On his right arm is a herring beast, but this herring has a pair of bird-like wings and looks very strange. .

There is a metal plate hanging around his neck, which is Shi Jin, the peak powerhouse from the "Justice League".

He chased after most of the night and never gave up. He was so tired that his forehead was covered in sweat. At first, he was almost desperate. Suddenly, he saw a strong glow in the distance. He was immediately attracted and rushed towards here at full speed.

When he approached, he found that the glow in the building was so dark that it was almost invisible, and he could only faintly sense a trace of it.

"Damn, could it be merged by him? Impossible, definitely not, maybe he doesn't know what it is and it's possible..."

Shi Jin immediately comforted himself, and with the hope of what to do, he ran at full speed and approached the house where Wang Xuan was sitting quietly.

## **Chapter 165**

### Ghost Car

In the distance on the other side of the house, a figure also appeared. He was about twenty-seven or eight-year-old, with a tall stature. At the moment, he was sweating profusely, covered with sand and dust, and looked very embarrassed.

He was exactly Chu Boyu from "Dynasty", and he also arrived.

With green vines wrapped around his right arm, he also quietly approached from the other side.

Shi Jin approached the house ten meters and stopped, raised his right hand, and the herring beast lying on his right arm was his hatching beast, the "Kun beast".

The beast opened its mouth, and suddenly spit out white light one after another, shooting towards the house.

He didn't dare to enter the house, in case he was caught in a plot, and decided to blow up the house first, so that the people inside would have nowhere to hide.

The white light fell on the house, and the rumbling explosion sounded continuously.

Chu Boyu stopped on the other side, controlled the green vine, and extended toward the house along the ground.

The originally dilapidated house collapsed in this continuous explosion.

Inside, a giant mechanical dog rushed out, raised its tail, raised its paws, with flames lingering on it, and posed an attacking posture towards Shi Jin.

This mechanical giant dog is the little boy.

Shi Jin ignored the little girl who was showing his teeth and claws at him, and just stared at the house that was collapsing in the big explosion.

The house collapsed and the dust was flying. Under the watchful eyes of Shi Jin and the other side, who quietly approached Chu Boyu, a figure finally appeared, pacing and walking out slowly.

It was Wang Xuan who came out.

Seeing Shi Jin appearing ten meters away and Chu Boyu on the other side, Wang Xuan looked calm, and then looked into the distance, Shi Jin and Chu Boyu both appeared, Tang Ruoyu had no reason not to come.

"Don't run?" Chu Boyu let out a sneer, quickened his pace, and began to approach, the green vines on the ground immediately accelerated and swept up along with his speed, intertwined with each other, more and more, and soon formed a net of power and might horrible.

It is also a hatching beast that has grown to the perfect state, and the power that his hatching beast can display is much stronger than the general perfect state.

Wang Xuan understands that Chu Boyu must have obtained some kind of opportunity, otherwise it is just a hatching beast, and it is impossible to control so many vines and spread to such a wide area.

The existence of peaks in each state has its own special features that cannot be underestimated.

Shi Jin cooperated with Chu Boyu, approached from the other side, and shouted: "Boy, hand over that Mushroom Gu, everything is easy to say, otherwise you don't want to leave here alive today!"

Wang Xuan shook his head and said, "I'm sorry, you are a step late."

Chu Boyu was shocked, suddenly angry, stomped his feet, jumped forward, waved his right hand, and a dozen green vines that stretched past burst out together, like strips of green giant pythons, frantically besieging Wang Xuan.

For hatching the corpse, he is bound to win.

Shi Jin raised his right arm, the beast lying on his arm opened his mouth, white light flickered inside, but did not spit out immediately.

He is proficient in long-range attacks, and he is looking for the most suitable opportunity to give Wang Xuan a fatal blow.

Wang Xuan stretched out his right hand, and two metal tentacles stretched out, launching a "spiral strangulation". The two metal tentacles rotated with each other, producing a terrifying tearing force, and swept away the dozen or so green vines that were attacking wildly.

"The First Cause of All Realms"

"Spiral Strangulation" swept these vines, making a terrible sound, and the green vines were smashed and broken.

Shi Jin seized the opportunity and immediately launched a white light at a distance of ten meters.

The white light flashed and went straight to Wang Xuan's back.

Wang Xuan dodged, narrowly avoiding the incoming white light, suddenly turned around, stomped his feet, slammed, swept a few meters, and waved his right hand, two rotating metal tentacles swept towards Shi Jin, "Spiral Strangulation" "The power is amazing, as long as you get involved, you can immediately twist Shi Jin into pieces.

Compared with Chu Boyu, Shi Jin, who was hiding and attacking from a distance, was a greater threat to him.

Shi Jin couldn't have imagined that Shi Xuan's speed was so amazing, his expression changed slightly, he flipped his left hand, and a golden crystal with the size of a finger appeared. Form a golden barrier and protect him within it.

There was a loud bang, and the "spiral strangulation" drawn by Wang Xuan slammed heavily on the golden barrier, with a loud noise. Although the golden barrier fluctuated violently, it stably blocked the "spiral strangulation".

At the same moment, Wang Xuan's feet tightened, and two green vines were entangled.

On the ground, there were more green vines like snakes and pythons winding up along his legs, trying to trap him in place.

Chu Boyu approached silently from behind, and with a piece of his right hand, green vines shot at them like swift arrows, trying to pierce his body.

The look on his face was slightly hideous.

"Even if you really swallow it, you can't completely digest it in a short time. As long as you kill you, there is still hope to get the essence of the essence."

At the same moment, in the darkness in the distance, a third person appeared, it was Tang Ruoyu.

There was also some fine sweat on her forehead, obviously running all the way, it was not easy.

When she appeared, she saw that Wang Xuan was entangled by Chu Boyu's green vines, and the vines were about to pierce him.

Shi Jin, who was in front of Wang Xuan, used the golden barrier to block the "spiral strangulation" blow. He swung out his right arm, and the beast that had been lying on his arm finally jumped out.

His hatching beast has two attack modes at the same time, far and near, but he has been deliberately hiding his clumsiness, and only uses the beast to exhale white light to carry out long-range attacks.

This ability is a powerful force that can only be obtained by breaking through the state.

When Shi Jin once completed a special mission, he obtained a very rare limit-breaking fruit by chance. After eating the limit-breaking fruit, he can break through the current growth limit of hatching beasts and gain part of the power of the next growth stage in advance.

Therefore, when he was in the perfect state, his hatching beasts already possessed some special abilities that were only possessed when he broke through the perfect state. On the surface, he is a perfect state powerhouse. In fact, he is already half of the breakthrough state. exist.

When the three of them joined forces to besiege the sand scorpion lord before, he deliberately hid his clumsiness and did not use his real trump card.

After all, the hole card is known, and the next time it is used, it may not be effective.

Until this moment, he seized the opportunity to unleash the true power of the beast, and the beast jumped out of his right arm, fluttering its wings, and dashing towards Wang Xuan as fast as lightning.

This was so fast that even Wang Xuan didn't have time to dodge, and was instantly hit by the beast in the chest.

The whole body of the beast was faintly glowing with blue light, and when its wings converged, it looked like a blue light, entered from Wang Xuan's chest, dragged a stream of blood, and flew out from his back.

If it wasn't for him moving two inches in an instant, avoiding the key point of his heart, now his heart has been smashed by the beast and exploded out of the body.

For the first time, Wang Xuan felt that death was so close to him, and the Shi Jin in front of him was stronger than he imagined, and he underestimated the enemy.

Between life and death, there was no need to hide his privacy, his throat growled, the blue crystal scales in his body exploded completely, and a terrifying blue light shone from the metal tentacles.

"Papapa" repeated crisp sounds, and the green vines wrapped around him were broken one by one. He turned around, and with a bang, a pair of giant arms of beasts formed in an instant, and slammed towards the vines that were shooting at them.

The vines were smashed and broken, and even the vines pierced through the alloy armor and body on his body, and blood came out from the back.

Chu Boyu groaned suddenly, and was hit by Wang Xuanjie. He didn't expect Wang Xuan's reaction to be so fast. There was a crisp sound of broken bones in his body, and his body rolled back in the air.

With one blow, Chu Boyu was severely injured, and the beast that flew in the air turned into a blue light with a turning point, and passed through again like lightning, this time the target was his head.

It was so fast that even Wang Xuan felt dizzy. It was too late to raise the giant arm of the beast to block or dodge. The beast was in front of him in an instant.

Between life and death, there was a sudden hula sound, and a huge black shadow rose up, slamming a fan, carrying a huge gust of wind, dragging his body half a foot horizontally, narrowly avoiding the fatal blow of the beast. hit.

On the other side, Shi Jin, who was fully controlling the beast, opened his eyes wide, showing an incredible look inside.

No one could have imagined that between Wang Xuan's life and death, a huge wing grew out of his right back.

The wings are pitch-black and formed of sharp steel feathers, each of which is like a sharp sword, and suddenly tore open the alloy armor outside, just one fan, and a gust of wind blew up, leading him to avoid The beast attacked.

The expression on Wang Xuan's face was slightly distorted. With the help of the strong wind blown by the steel feather wings, his body rotated at a high speed, his right arm was swung out, and the giant arm of the demon beast more than one meter long carried a blue light, intercepting the charge. The beast that went out smashed heavily on this blue light.

"Boom", there was a faint scream from the beast. The powerful beast couldn't bear the force of the punch, and exploded from it.

Shi Jin, who was in full control of the beast, suddenly let out a scream, his entire right arm exploded from the inside, blood and flesh flew out, and his face was full of horror.

Wang Xuan's Eye of Fear was activated and began to frantically absorb powerful fear power.

Whether it was Chu Boyu or Shi Jin, there was a strong fear in their hearts at this moment.

Shi Jin couldn't believe it anyway, he was already considered to be half a powerhouse beyond his realm, how powerful is his beast to be blasted by a punch?

The beast and his flesh-and-blood connection, the beast exploded, his right arm exploded, and he fell back with a roar.

Wang Xuan with a single black wing descended like a monster.

"Wait—" Shi Jin suddenly yelled, "I don't want Mushroom Gu, I'll leave immediately—"

As he spoke, he quickly took out a primary healing water and wanted to pour it into his mouth.

Wang Xuan's face was cold and emotionless. The blood hole in his chest that was pierced by the beast's hole was difficult to heal. Through the blood hole bigger than his fist, he could see the scene behind him.

Before Shi Jin's words were finished, the giant arm of the beast that Wang Xuan swung over appeared in front of him.

Suddenly, Shi Jin's left hand tightened. It turned out that in addition to the healing water, he was holding two finger-sized crystals, one smoky crystal, and one that was golden in color. It was the defense crystal he had just used once. .

The two crystals were crushed by him at the same time, and a large cloud of smoke burst out of the smoke crystal instantly, shrouding this area, and the defense crystal turned into a golden barrier to resist Wang Xuan's attack.

With the help of the smoke, Shi Jin turned around at full speed and fled into the distance, followed by the explosive crystal with his left hand.

If Wang Xuan was able to catch up in this situation, he would immediately throw an explosive crystal.

For a strong man like him, he cherishes his life more than anyone else, and he has prepared various means of escape.

It's too hard to kill him.

Wang Xuan's giant arm of monster swung out, and with a loud noise, the punch hit the golden barrier, and the barrier fluctuated endlessly. No matter how powerful the attack of his monster arm, it couldn't be smashed to pieces. .

Although this kind of defense crystal can only last for a moment, at this moment, its defense is almost invincible, even the powerhouse beyond the perfect state cannot smash it.

Wang Xuan was blocked, and the smoke was surging, covering a radius of several meters in the blink of an eye, and it was spreading around at an alarming speed, and soon it was able to cover a radius of ten meters, and this area was still expanding at a terrifying speed. I didn't just throw a smoke crystal, but kept throwing it all around, completely sinking this area into absolute darkness.

In this smog, no one can see five fingers, no one can see things, and no one dares to chase in easily.

With the smoke protection, Shi Jin was confident that he could easily escape, and the healing water he drank was working, healing his shattered right arm at an alarming speed.

Wang Xuan's eyes shone terrifyingly, his forehead suddenly cracked, a crystal eyeball emerged from it, the Eye of Fear opened, and he rushed into the dark smoke.

Shi Jin ran at full speed, and Wang Xuan had no idea which direction he was going to escape from. Under the protection of the smoke, even if Wang Xuan could notice, he had already escaped a hundred meters away.

In addition, his beast is recovering, and with the speed of this beast, he does not believe that Wang Xuan can still catch up with him at a distance of 100 meters.

Tang Ruoyu, who appeared in the distance, had a subtle expression on her face that she couldn't tell. She was approaching, but she didn't expect the situation to change so drastically. Seeing a large amount of smoke spreading out in front of her, she stopped.

Shi Jin intentionally made a circle in the smoke, changed his position, and quietly prepared to escape from the other direction.

Knowing something was wrong, Shi Jin was shocked. He wanted to lift the beast on his right arm, which had not fully recovered, to face the enemy. Suddenly, his body fell into an ice cave, and his body froze. Then, he was shocked to see a huge fist slamming into the face. come over.

With a "no" sound, his face was hit by a fist, and his head and helmet exploded in an instant.

Before he died, he couldn't understand why Wang Xuan could accurately know his position in this invisible smoke? Could he be a prophet?

One punch shattered Shi Jin's head, watching his head explode, the headless corpse fell backwards, and the Eye of Fear in the middle of Wang Xuan's forehead was constantly releasing the power of fear.

Shi Jin never thought until he died that a trace of fear released from his body could allow Wang Xuan to know exactly where he was moving in the smoke, and he could intercept the ambush ahead of time and suddenly make a sneak attack. Great increase, immediately let Wang Xuan's Eye of Fear seize the opportunity, and suddenly launched, Shi Jin finally got the move.

It can be said that the smoke not only failed to help him escape, but also helped Wang Xuanshun kill him. Otherwise, in a head-on confrontation, Wang Xuan would not have been so easy to kill him.

A white light appeared from Shi Jin's right hand, struggling constantly, filled with unwillingness.

The beast already has a certain self-consciousness. It is full of unwillingness and wants to escape and find a new host. Unfortunately, a natural force quietly descends between the heaven and the earth, completely erasing its consciousness and turning it into a pure mass. The energy of Wang Xuan's monsters, like a giant whale, absorbed water and absorbed it together.

This beast is already a half-existent existence, how powerful is this energy, the white light in Wang Xuan's right hand absorbs this energy, and immediately fluctuates violently, creating a strong sense of tearing, and it seems that it is about to explode from it.

Wang Xuan kept his body and quickly rushed out of the shrouded smoke, only to see that Chu Boyu, who had been hit by him before, had disappeared. Obviously, he took the opportunity just now to escape, but someone appeared in the distance. Tang Ruoyu hadn't left, but stopped dozens of meters away, looking at himself from a distance.

The white light in his right hand felt a tearing sensation, which made Wang Xuan very uncomfortable. He took out a bottle of healing water in his left hand and drank it.

Where the beast pierced his chest, the power of the beast remained, making it difficult for his wound to heal, and he could only rely on the healing power of the healing water.

After drinking the healing water, white light appeared in this huge transparent hole, and it began to heal slowly~[www.mtlnovel.com](http://www.mtlnovel.com)~ You are also here to hatch the corpse? But you are a step behind, I have

eaten. "The jet-black steel feather on Wang Xuan's back slowly converged, and soon it was absorbed into the body and disappeared.

This jet-black steel feather was exactly the special ability he inherited from the hatchling beast that had died. Now this power has merged with his magical beast and has become his ability.

At a distance of dozens of meters, Wang Xuan stared at Tang Ruoyu. If the other party had the same idea as Shi Jin, he would not hesitate to take action without showing mercy. Let him understand that these powerhouses who can reach the state are not simple, and more or less have their own trump cards and trump cards. Even if they are stronger than them, they can't be careless, otherwise they may die.

For someone like Tang Ruoyu who is suspected of having the above background, no one knows what special treasures she holds in her hands, and he is even more afraid to be careless.

This time, Tang Ruoyu reacted unexpectedly, shook his head slightly towards Wang Xuan, and suddenly said, "I know, you just showed ghost wings..."

Her voice was very nice, Wang Xuan heard it in his ears, his heart moved slightly, and said, "How do you know this is Ghost Wing?" He was a little curious.

"This dead hatching beast is called a ghost car. I can't imagine that it will be destined for you."

When Tang Ruoyu said this, he seemed to sigh silently.

Wang Xuan was even more curious. He also learned that the hatchling corpse grew from the corpse of a hatchling beast called Ghost Car after he obtained the core ability in the essence liquid. He inherited the power of the ghost car and obtained the How did Tang Ruoyu know about this ghost wing?
