

Last Building on Earth Chapter 226-230

Chapter 226

Wan Qianying looked up at him and said, "Everyone is tired, let's rest first, it's almost midnight, and when it's dawn, we'll find a way to return to the 'Safe Zone No. 9'."

Su Tang also sat down and said, "Aren't you looking for the five major cities?"

Wan Qianying said: "I originally thought that the place where the giant ship was located was the Five Great Cities, but where did I know it was the No. 10 Safe Zone, and now I have no clue, no one knows where the Five Great Cities and No. 8 Safe Zone are, how to find it? "

Zhu Han said: "The best way now is to first upgrade the equipment to flawless, improve the strength, and then enter the stone gate of the primary skill to see."

What Zhu Han said represents the meaning of the vast majority of people. Now that he knows the existence of "building" and "skills", and there is room to improve his strength, who wouldn't be moved?

Mou Xing said: "I don't know if it can be directly teleported to the No. 9 safe area? Unfortunately, we will not use the teleportation channel."

Huang Qingzhi said: "I have to ask Tang Ruoyu, she hasn't come out yet, but isn't the teleportation channel in the No. 9 safe zone broken? I'm afraid it can't be teleported directly."

"Badness doesn't mean it can't be repaired. I always think there should be a way. If the transmission channel in the No. 9 safe area can be repaired, it will be much more convenient if you can teleport to each other from the central city and the No. 9 safe area." Wan Qianying pondered slightly.

Xu Jian smiled and said, "You always speak accurately. Since you said so, there must be a way to repair the teleportation channel. Then we will wait for Tang Ruoyu to appear and ask."

Wan Qianying glared at him and said, "Don't put a high hat on me, I'm just guessing, it doesn't mean it's correct."

Mou Xing suddenly said in a loud voice, "Who is this girl Tang Ruoyu? How does she know so much?" He looked at Wang Xuan, Wan Qianying, and Xu Jian as he spoke.

He knew that Tang Ruoyu and them all came from "Insect Town".

What Mou Xing asked was the doubts of everyone, and almost everyone's eyes were focused on Wang Xuan and Wan Qianying.

Wang Xuan saw that these people were all looking at him with a somewhat puzzled look, and there was a hint of doubt in this doubt.

After all, they are all from the five major cities, and they are the leaders of the towns. They have also come into contact with the high-ranking elders in the five major cities. As a result, no one knows the

central city, and they do not know how to activate the transmission channel in the center. Why is Tang Ruoyu? will know all this?

Before, everyone was attracted by Central City, just like discovering a new continent. They were all thinking about researching and creating equipment and how to acquire the skills of hatching beasts to improve themselves. Now they rest and calm down.

Huang Qingzhi spread his hands and said, "Although she is from Bug Town just like us, we don't know it very well."

Mou Xing said: "Is that so?" A suspicious look appeared on his face, he didn't fully believe what Huang Qingzhi said.

Su Tang smiled lightly and said, "When she comes out, ask her if she is not clear?"

Xu Jian said: "She doesn't like talking too much, so don't ask questions. If she wants to say it, she will definitely say it herself."

Mou Xing smiled, changed the subject, and started chatting about the giant ships, totems, and the five major cities.

Wang Xuan did not continue to listen, but walked towards the "built" building on the side, and decided to go in and have a look.

Entering the inside, I accidentally found that You Kai was checking here alone. It seems that, out of the fourteen people, thirteen people came out, and only Tang Ruoyu was still hunting monsters in Shimen and collecting energy spar.

Wang Xuan went straight to the forging furnace on the left, clicked on the screen, and carefully checked the auxiliary materials needed to create the five ghost suits.

"Sky-eye ghost, bone spirit, purple stone, ghost stone, star animal skin..."

Write down all the auxiliary materials needed, and then walk out of here and go to the "mission" building. Among the various parchments sold here, there are a large number of tasks to collect materials.

Wang Xuan collected the materials and tasks he needed. Each material task had five medium-sized crystal scales. He took out 25 medium-sized crystal scales. He received a total of five auxiliary materials and received five pieces of parchment.

Open it for a closer look. The tasks for collecting "Sky Eye Ghosts" and "Bone Spirits" are all located in "Ghost Town" in Hundred Towns on the second floor, "Purple Stone" and "Ghost Stone" are in "Stone Town", and The source of "star animal skin" is "star town".

If you want to collect these five kinds of materials, you can only return to the No. 9 safe area, and then take the elevator down.

Walking out of the mission building, I found that all thirteen people gathered outside, and Tang Ruoyu also came out.

The sky above was overcast, and it was almost dawn.

After staying up all night, Wang Xuan is still full of energy, and his strength has reached their level, even if he doesn't sleep for two or three days, he can still persevere.

Youkai was sitting on the ground with his back against his mechanical beast, and when he saw Wang Xuan walking out, he said, "Everyone is here, should we go back to the No. 9 safe area now? It seems that we still need to find more ways to earn crystal scales. That's right, if you want to enter the stone gate with intermediate skills, you need a hundred medium crystals at a time."

He has broken through the bottleneck now, and if he wants to improve further, he must at least enter the intermediate skill Shimen.

"The monsters in Ghost Town are all small crystal scales. Ten thousand small crystal scales can be exchanged for 100 medium crystal scales. It is too slow to collect crystal scales by hunting monsters. It's just the task." Sun Yaofei said while shaking his head.

Mou Xingdao: "Let's not talk about the crystal scales first, let's talk about this transmission channel. If we can't directly teleport to the No. 9 safe area, it will be troublesome, which means that we need to go from the No. 9 safe area every time. The No. 10 security zone where the giant ship is located can only enter the central city."

Wang Xuan heard his words and said, "Yes, we must find a way to repair it."

As he spoke, he looked at Tang Ruoyu. If there is a way to fix it, she should know.

Wan Qianying also looked at Tang Ruoyu and said, "Ruoyu, do you know how to fix it?"

Her voice was very soft. After Tang Ruoyu came out of the "skill" building, the aura emanating from it became more and more different. When Wan Qianying faced her, she felt a vague sense of unease. She understood that Tang Ruoyu must be stronger. .

Tang Ruoyu frowned slightly. Seeing everyone looking at him, he finally said, "Repair requires huge energy. As long as there is enough energy, it may be possible."

Seeing what she said was so simple, everyone was startled, Yu Kai said, "Huge energy?"

Wan Qianying said, "When you say huge energy, do you mean blood?"

She thought that activating this teleportation array before relying on the blood of everyone, now she said that the huge energy is also blood?

Tang Ruoyu nodded slightly towards her and said, "You need a lot of blood with powerful energy."

Mou Xing said: "You say it's our blood, right? There are fourteen of us here. If there are people from other towns, we should be able to gather a lot of people."

Wan Qianying pondered slightly: "When you say a lot, how much do you mean?"

Tang Ruoyu shook his head and said, "It's hard to say, it depends on the level of damage, not just our blood, but also the blood of powerful monsters."

Yukai said: "That's easy to do. Let's hunt some more monsters to bleed. If ten can't work, just a hundred, and they can always be repaired."

He stood up as he spoke, looked up at the sky, and said, "It's almost dawn, we should go back."

He is now focused on earning crystal scales so that he can enter the intermediate skill stone gate.

The others also stood up.

Mou Xingdao: "There are two ways for me to return to the No. 9 safe area. One is to first teleport back to the No. 10 safe area where the giant ship is located, and then go back to the No. 9 safe area from there. The second way is to find one directly from here. The road to Safe Zone Nine."

Xi Muxue said: "You should go back to the giant ship first, and then go back the same way as yesterday. It will be much safer."

Several people nodded in agreement. After all, they were familiar with that road yesterday, so they would feel safer in their hearts.

Seeing that several people agreed, Wang Xuan looked up at the distant sky and said, "I think it's better to go up and see how far it is from the No. 9 safe area before making a decision."

Wan Qianying nodded and said, "Wang Xuan is right. Let's take a look at the surrounding environment and see what's around this central city, how far it is from the No. 9 safe zone and the giant ship, and then talk about it."

Hearing what Wang Xuan and Wan Qianying said, everyone agreed, and then walked outside, and soon reached the fifteen-meter-high city wall.

Everyone turned over easily and left the central city.

Outside the city, there are towering trees that are 40 to 50 meters high, and everyone climbed up the trees until they reached the canopy.

Wang Xuan stood on the canopy forty or fifty meters high and looked into the distance.

In everyone's imagination, they must be able to see the distant giant ship and the building that appeared in the shattered sky, but no one thought that the distant sky they saw was gray and seemed to be shrouded in a layer of fog, which could only be inside. I vaguely see some vague shadows, but no one knows what these shadows are.

In addition, no giant ships, any buildings appearing in the sky, can't be seen.

"How could this be?" Wan Qianying, You Kai and the others showed a hint of surprise on their faces.

Wang Xuan was relatively calm, but his brows were slightly wrinkled.

Tang Ruoyu also showed a hint of surprise, and whispered to herself: "Strange..." It seemed that this situation in the surrounding sky was beyond her expectations.

"I can't do anything now, I can't see the target, I have no direction, I can only go back to the giant ship through the transmission channel first." Mou Xingweng said in a sullen voice.

Wan Qianying shook her head slightly, knowing that there was only one way at the moment, and that was to return to the area where the giant ship was located, and then return to the No. 9 safe area.

Everyone was preparing to go down the big tree, when suddenly there was a loud bang in the distance, followed by a big tree in the distance that was struck by a huge force and began to shake violently.

Everyone was slightly taken aback, and they were busy looking over, but they saw a huge monster in the shape of a rhino appeared in the forest 100 meters away. The big tree shook, showing how terrifying its impact force was.

After it, a large number of giant rhinos appeared in the forest in the distance, and they made a sound like a bull's cry and began to rush towards the crowd.

Suddenly seeing a rhinoceros monster in the distance, everyone was not afraid, and they all slid down the big tree, and soon reached the ground.

Wang Xuan opened the eyes of the illustrated book and captured the information of this giant rhino with a body as large as an elephant.

This is a monster called the Mammoth Rhinoceros. When you see that its danger level is six and a half stars, you will understand how terrible this monster is.

You must know that the black iron lizards or the dark demons he encountered in the intermediate skill stone gate before, the strength is comparable to the superior powerhouses in the super state, but the danger is only six stars.

This represents a six-and-half-star level of danger, and the strength is definitely beyond the top powerhouses in the super state, I am afraid that it is at least comparable to the top powerhouses in the super state.

Before this mammoth giant rhinoceros, only the Dryad King, Mushroom King and Piranha King could reach six and a half stars, and they were even more powerful than Yukai, who had not yet broken through the bottleneck at that time.

If it was just one or two giant mammoth rhinos, it would be fine. Now that a group of these giant mammoth rhinos suddenly appeared, even Wang Xuan changed his face.

In addition to him, there are several people who also have similar abilities. After capturing the information of this mammoth giant rhinoceros, they immediately shouted: "Go back! This is a six-star and half-dangerous mammoth giant rhinoceros!"

Wan Qianying, Xu Jian, Huang Qingzhi, Zhu Han, Sun Yaofei and others immediately turned around and rushed towards the high wall of the central city.

In comparison, Wang Xuan, Tang Ruoyu, Mou Xing and others were much calmer, especially Yu Kai, who had broken through to become a super-top powerhouse, let out a loud laugh and said, "The six-and-half-star mammoth giant rhino, It's time to try it out!"

A half-length rock giant was suspended behind him. With a longing expression on his face, he took the initiative to rush up to meet the fastest rushing mammoth giant rhino.

Facing this elephant-like mammoth rhino at close range, everyone instinctively felt a sense of oppression as heavy as a mountain.

With a "bang", the rock giant behind Youkai flew out into the air and collided with the mammoth rhino that collided.

One is a powerhouse who has just broken through to be promoted to the top of the super-state, and a powerful monster with a six-star and half-dangerous degree comparable to the top-level super-state powerhouse. , stopped.

Yukai felt the vibration of his internal organs, and felt a little uncomfortable. He understood the power of this mammoth giant rhinoceros.

Mou Xing, Su Tang and the others were all retreating. Wang Xuan watched these giant mammoth rhinos rush up. His hands were also itchy, showing a metal tentacle, and he volleyed over.

With a "snack", a giant mammoth rhino was drawn, but the metal tentacles bounced back high. The impact force of this giant mammoth rhino was too powerful.

Wang Xuan tested the strength of the mammoth giant rhinoceros.

He had just climbed up the high wall, but saw one after another of giant mammoth rhinos appearing below. They lowered their heads and slammed into the high city wall.

"boom--"

A terrifying sound sounded, and everyone climbed up the city wall, feeling the vibration of the high wall. These mammoth giant rhinos hit the city wall. Although the city wall was not damaged, it was slightly shaken by the impact.

In just a short period of time, at least hundreds of giant mammoth rhinos appeared in this forest. When they hit the city wall for the second time, the two towering metal columns on the city wall suddenly began to glow, two white lights. It shot out, like two lasers, and shot towards this group of mammoth giant rhinos.

A terrifying scene appeared. This group of mammoth giant rhinoceros was scratched, and the flesh and blood flew out immediately, breaking away from the place swept by the white light.

At least twenty giant mammoth rhinos were killed at this moment, and white scales flew out of their bodies, all of which were absorbed by the metal pillars engraved with runes.

Seeing this scene, Wang Xuan and others on the city wall couldn't help but gasped.

These two metal cylinders actually have such a power that they can automatically launch attacks. The power of this attack is simply appalling.

The mammoth giant rhino, which is comparable to the super-state top powerhouse, is simply vulnerable.

More than 20 giant mammoth rhinos were killed in one blow, and the remaining giant mammoth rhinos seemed to be frightened. They stopped attacking and showed signs of retreating and hesitating.

At this moment, above the sky, there appeared a black mass of monsters that looked like bats, but they were more than a hundred times bigger than bats, with their wings spread out, at least seven or eight meters.

They appeared suddenly, like a dark cloud, volleying towards the people standing on the city wall.

Looking at the speed at which they rushed over, it was clear that this group of giant bat monsters was absolutely terrifying.

Everyone was busy jumping into the city.

Wang Xuan raised his head and saw that just as the group of bats was about to approach the giant net formed by countless metal combinations above the central city, a sizzling sound suddenly sounded on the giant net, as if it was electrified, and a large amount of white light burst out. The bat was immediately hit by the white light, and smoke came out of its body, its flesh became charred black, and it began to roll out along the giant metal net.

Looking at the scene above, everyone has understood that the defense of this central city is like an impregnable wall, and it is impregnable. Whether it is attacking from the sky or attacking the city from all sides, there will be a strong counterattack.

The strength of the giant bat above is definitely not weak. This black pressure pressed a huge metal net that has not touched the top, and at least dozens of them were killed by the white light. Break through this layer of defense, enter Canterlot, and hurt them.

Soon, these giant bats let out a shriek that seemed to be filled with unwillingness, but they understood that there was nothing they could do to take the people in the city, and in the end they could only flutter their wings and rise up~www.mtlnovel.com~ and disappeared here.

Everyone retreated into the city and watched the giant bat in the sky disappear.

"It seems that the forest around the central city is very dangerous. The hidden monsters are very powerful, much more terrifying than the monsters around the major security areas. Fortunately, there is a teleportation channel." Wan Qianying said solemnly: "We are still Go to Safe Area 10 from the teleportation tunnel."

Without further delay, everyone walked towards the central square quickly, and soon came to the transmission passage in the center of the square. Tang Ruoyu walked in first, and then let everyone in together.

Fourteen people gathered together, and everyone watched as a faint red light circle slowly rose under their feet, and ten numbers appeared on the surface of the rune stone carvings around them, but now only the tenth number glowed slightly, and the other nine The numbers are all bleak, and everyone understands that these ten numbers should correspond to ten safe areas.

Tang Ruoyu stretched out a hand and held down the number 10, which was glowing faintly. Immediately, the light of the number spread out and turned into a red circle, shrouding everyone in the entire transmission channel, and a ray of light soared into the sky. , covering everyone.

Everyone could not feel that they were moving, and saw the light around them converge and disappear, and found that they were still in the rune stone carvings under their feet, but around them were no longer buildings in the central city, but fell down and broke in large numbers. Glass cylinders on the ground.

Above is no longer the solid metal net, but the sky is blank. Not far from them, a giant ship descended from the sky and inserted into the ground.

They finally returned to the damaged safety zone No. 10, but at this moment, the giant ship with its bow inserted into the ground had undergone a terrifying change.

Chapter 227

The giant ship became dark from the ground, and extended upward to a part of the ninth-floor cabin. The surface of this part of the cabin turned black and there were signs of rot, like a melting candle, and rotting juice was faintly flowing down.

Everyone who saw this scene was stunned, and immediately thought of the monster baby that was thrown into the giant ship by the cyan fox yesterday.

This baby has the ability to rot everything, and now I suddenly see signs of decay on the surface of the giant ship. Obviously, this is the power of the baby at work.

Only a very small part of the nine-story cabin turned rotten black, and the closer the bow to the ground, the more serious the rot.

Everyone dared not approach, and could only vaguely see that there were countless black shadows wriggling in the bow of the ship that had turned into a rotten black, and they seemed to be roaring silently. A kind of creepy.

Wang Xuan's monster instinct was very strong, and he immediately felt a strong sense of uneasiness. It seemed that a group of terrifying devils were sealed in this giant ship.

Suddenly, Wang Xuan felt something, turned his head sharply, and looked behind him, only to see a blue fox standing on the top of the tree canopy in the distance, staring at the changes of the giant ship from a distance. .

This cyan fox is more than 100 meters long, with a faint cyan light flowing all over its body. It stands above the canopy of the tree and looks extraordinary. Its cyan eyes are crystal clear, and no impurities can be seen.

It has never paid attention to a group of humans such as Wang Xuan. It seems that in its eyes, the existence of this group of humans is meaningless.

Others also turned their heads and saw the cyan fox appearing in the distance. This is the totem of the third-layer world, and it is one of the most powerful beings. Everyone has a faint awe in their hearts.

The cyan fox only appeared for a while, then turned around quickly, stepped on the canopy, and disappeared into the distance.

Seeing the cyan fox leave, everyone dared to discuss, and they were all guessing the purpose of the cyan fox and the mutation of the giant ship.

"What is the origin of that baby? It's really terrifying. The bow of this giant ship was rotted in just one day." Huang Qingzhi muttered to himself, and seemed to be asking everyone. He understood that no one could give him the answer. .

Zhu Han said: "You said what is hidden in the bow of the boat, it looks like there are countless grievances struggling there, but it seems that they are sealed by some kind of power and can't come out."

Sun Yaofei said, "I don't know why, just looking at those black shadows from a distance gives me a creepy feeling. Do you feel this way?"

"The cyan fox threw the baby into the giant ship. It seems that he really wanted to use the power of the baby to rot the giant ship, but now it seems that the giant ship is sealed with some monsters. If these monsters really come out, Isn't this third-layer world chaos?" Mou Xing's voice was still stern, but the expression on his face was extremely solemn.

Wang Xuan didn't interrupt, just listened to everyone talking.

Youkai glanced at Wang Xuan and saw that his face was calm and his brows were slightly wrinkled.

This Wang Xuan was too calm, which made him feel uncomfortable.

Although the prow of the giant ship was rotting, and there were countless blurred shadows struggling inside, the scene looked terrifying, and Wang Xuan's eyes of fear could also sense the deep fear in the hearts of the people around him, but for some reason, with his The Eye of Fear constantly absorbs the power of fear from beings, and as he becomes stronger and stronger, his fear seems to gradually disappear.

Although his magical beasts can sense some danger and can make him feel some inexplicable uneasiness, it is only uneasiness, but it is far from fear.

Seeing Yukai glance at him, Wang Xuan reached out and touched his forehead lightly, sensing the eyes of fear that were slowly absorbing everyone's fears. There was a trace of fear everywhere, but only Tang Ruoyu, who was similar to him, didn't have much fear in his heart.

He already knew a lot about the particularity of Tang Ruoyu. He now suspects that Tang Ruoyu is not from this third-layer world, and may even come from a higher floor, but why he appeared here is a mystery.

"Let's go, go back to the No. 9 safe area as soon as possible."

Seeing that everyone was still looking at the giant ship in the distance, Wang Xuan understood that there was nothing to see for the time being, so he picked a towering tree, climbed up the tree, and soon reached the canopy, looking into the distance. , there is a building in the sky above the No. 9 security area, you can use this building to determine the direction.

After determining the direction, he jumped and two ghost wings appeared on his back. With the two ghost wings, one large and one small, he volleyed down from a place of forty or fifty meters, and landed in front of everyone with a very elegant attitude. attracted everyone's attention.

Many people looked at him with envy and a trace of jealousy in their eyes.

In addition to Wang Xuan, Wan Qianying also climbed the tree and looked into the distance to determine the direction, but when she came down, she was not as dashing as Wang Xuan, and could only slide down the trunk of the big tree.

In this strong contrast, everyone felt Wang Xuan's strength more and more.

Although Youkai considers himself strong, and now he has broken through to the top super powerhouse, when facing Wang Xuan, not only did he not feel that he surpassed him, but he faintly felt that Wang Xuan had an unfathomable taste.

In addition to Wang Xuan, the other person who has an unfathomable feeling is Tang Ruoyu.

"This man and a woman are really evil." Yukai muttered in his heart.

Wang Xuan feels that as the ghost wing on the left grows to one meter and two, the power of the ghost car in his body is gradually becoming stronger. If the second ghost wing can also grow to two meters, he estimates that the power of the ghost car should not be enough. inferior to monsters.

After summoning the little girl, Wang Xuan rolled over and rode on it, and started to set off.

When everyone saw that Wang Xuan and Wan Qianying had already determined their positions, out of their trust in them, the others didn't go up the tree to look at them. They all summoned mechanical beasts and started to leave here.

Fourteen people rode fourteen mechanical beasts and ran at full speed, bypassing the giant ship in front of them, and heading towards the direction of the No. 9 safe zone.

Along the way, they encountered various monster attacks from time to time.

When everyone entered the central city, the strength of Wang Xuan, Tang Ruoyu, You Kai, Mou Xing, and Su Tang had all been greatly improved. The five of them took the lead, crushing them all the way, and easily led the crowd to charge over.

Now a monster with strength like the tree demon, Wang Xuan controls the metal tentacles and can kill several at the same time.

Wang Xuan didn't know how many monsters he had killed along the way. His second ghost wing showed signs of growing again. When the sky was getting dark, they could see ten glass columns in the No. 9 safe area from a distance. .

They finally approached the No. 9 safe area before dark. Although they encountered a large number of monsters along the way, they did not encounter any terrifying existences like monster babies, and there were no casualties.

When they saw the ten glass cylinders hundreds of meters high, everyone slowed down.

Wang Xuan's brows furrowed slightly, and there was a roar of monsters in the direction of the No. 9 safe area. Among the towering trees in front, a large number of green figures were flashing, but it was a group of tree demons. And the perennial vines are densely packed, and at a glance, there must be thousands of them.

Although everyone is not afraid, but there are so many monsters gathered here, it still makes everyone's scalp numb.

What is even more astonishing is that around the ten glass cylinders in the sky, countless iron-winged devil owls, black and rolling like dark clouds, circle the ten glass cylinders. From time to time, you can see this group of iron-winged devil owls rushing down. hit.

Although they knew that the No. 9 safe zone was protected by a mask, these iron-winged demon owls should not be able to rush in, but everyone was still a little scared when they saw it.

"I haven't seen each other for a day, why are there so many monsters here?" Xu Jian said in surprise.

Yukai said: "Let's ignore them, no amount of these monsters can stop us!"

As he spoke, he rode the mechanical beast and rushed towards the group of tree demons in front of him.

Suddenly there was a flash of figures around him, but it was Wang Xuan riding Xiaojiao, rushing up faster than him.

The four seven-meter-long metal tentacles rushed out like four giant pythons.

Their appearance had already alarmed these tree demons and perennial vines, and they all gathered towards them.

Wang Xuan felt the change of the ghost wing on the left, and it could grow again at any time. He was in need of a lot of monster energy.

Even if he didn't borrow the ability of the blue crystal scales, his strength has reached the super-high level now. The four metal tentacles bowed left and right, and the two tree demons flew out to both sides silently. The body was blown up, and there were a lot of Green juice splashes.

Wang Xuan rushed to kill him, almost invincible, white scales appeared one after another, submerged into his body, and an endless stream of energy poured into the ghost wings on his left and the white light on his right.

From breaking through to the present, he didn't know how many monsters he killed or how many white scales he had absorbed. The white light on his right hand fluctuated endlessly, and there were faint signs of full energy inside.

Wang Xuan understood that the energy he needed to grow again was finally full.

But the energy required is full, but it does not mean that the beast can grow again. Now the energy required by the white light is getting less and less, and the energy of the white scales he has absorbed is almost absorbed by the ghost wings, which makes the ghost wings grow faster. faster.

You Kai, Tang Ruoyu, Mou Xing and others shot together, and everyone rushed in at an extremely fast speed, quickly approaching the No. 9 safe area.

Wang Xuan felt that the ghost wing was constantly absorbing the white scales, and finally the ghost wing on the left shook slightly and grew again, reaching one meter three.

As the ghost wings grew again, Wang Xuan's thoughts moved, and the two ghost wings behind him suddenly lifted high, disintegrated together, and turned into steel feathers. Each steel feather contained a powerful ghost car. Force, volley shot out.

The sound of "chi chi chi" was endless, dozens of steel feathers pierced through the group of tree demons and perennial vines, and the flesh and blood flew. The rows of tree monsters and perennial vines were falling down.

Xiaoguo jumped, took Wang Xuan, and jumped five meters away. The dozens of steel feathers flew back behind him and turned into two ghost wings, one large and one small.

Contaminated with flesh and blood, Ghost Wing seemed to be excited, Wang Xuan felt the surging energy in his body, and a faint excitement appeared in his heart.

He didn't know how many monsters he had killed that day. Not only did he not feel tired, but his blood surged and he felt excited.

His Eye of Fear felt the fear of the monsters around him and became active.

As they approached, everyone heard the sound of fierce fighting coming from the direction of the No. 9 safe zone ahead.

Originally, they thought it was the violent sound caused by the group of monsters attacking the mask of the safe area, but as they got closer, they suddenly discovered that these monsters were killing each other outside the safe area.

Wang Xuan and Tang Ruoyu, who were rushing the fastest, slowed down, and everyone looked up with a slightly puzzled look on their faces.

The No. 9 safe zone had already appeared one kilometer away from them. The pot-like mask had already completely covered the safe zone. Above the sky, a group of iron-winged demon owls were attacking below.

Above the mask, stood three humanoid monsters, fighting with these iron-winged demon owls. They were almost overwhelmed by groups of iron-winged demon owls, but they resisted the attacks of these demon owls. Everyone saw iron-winged demon owls from time to time. The Winged Demon Owl was killed and fell down.

In front of the mask, groups of tree demons, mushroom men, piranhas and perennial vines are trying to climb up along the mask to attack the three surrounded by groups of iron-winged eagle owls. Humanoid monster.

"Strange...these monsters kill each other?"

Everyone was a little confused, but they were too far away, and they could only vaguely see the three humanoid monsters surrounded and attacked, but they couldn't see the real appearance.

Wang Xuan asked Xiaojiao to speed up and continued to rush forward, wanting to see what happened.

The four metal tentacles controlled by his right hand are constantly waving. This kind of monsters such as tree demons, which are only equivalent to super-normal strength, are simply vulnerable to the current him. area mask.

Tang Ruoyu rode the mechanical giant tiger and followed Wang Xuan closely. She couldn't see any expression on her face. She only held a two-meter giant sword in her right hand. Tiger to clear the way.

Her white tiger has grown to a length of five meters, and it is absolutely as good as a super-superior powerhouse in terms of speed, strength and reflexes.

As he kept approaching the mask, Wang Xuan finally saw that there were more than 30 people gathered around the ten glass cylinders that were several hundred meters high.

These more than 30 people, including men and women, are basically wearing a full set of three sets of third-order high-quality equipment, such as ghosts, silver scales and Biying, which represent their strength and status.

Wang Xuan didn't need to think much to understand that these should be the leaders from various towns. They gathered in the safe area and seemed to be shocked by all the things in front of them. At the moment, they were sheltered in the mask and did not go out, just watching quietly. The madness above.

The appearance of Wang Xuan and other fourteen people caught their attention. These people came to the edge of the mask, but they still did not come out. They were looking at Wang Xuan and the others with surprise and excitement on their faces.

"Are you from the five major cities?" Among the thirty or so people, someone immediately raised their voice and spread it from afar.

"They mistook us for people from the five major cities?" Yukai laughed.

"We are also the leaders of the towns!" Mou Xingweng responded in a loud voice.

Hearing that Wang Xuan and the others were also from the town leaders, these people immediately snorted, with expressions of great disappointment on their faces.

At this moment, the three humanoid monsters who were originally standing on the mask and besieged by a group of monsters suddenly began to slide down the mask because of the appearance of Wang Xuan and others.

As soon as they moved, the iron-winged demon owls who were rushing all over the sky changed their direction, and the monsters such as the tree demons who climbed up the mask also immediately contacted the three humanoid monsters, and the two sides had a fierce conflict.

At this time, Wang Xuan and others finally saw the true appearance of these three humanoid monsters.

One of these three humanoid monsters is about two meters tall. From the front, its body and face look very human, but it is not wearing clothes or armor. Its skin is grass green, except for the skin, eyes, nose, The mouth is almost exactly the same as that of a human being, and it is almost impossible to tell the difference between it and a human if it is not for a different skin color.

But when it turned and turned its back to everyone, everyone could see the huge difference between it and humans.

It extends from the shoulders of the back down to the heels of the legs, and grows two rows of suckers the size of a fist.

These suckers are like breathing, contracting from time to time, they can eject airflow from them, or they can contract and absorb.

When Wang Xuan saw it, it was sliding down the mask at an extremely fast speed. An iron-winged demon owl swooped down and stretched out a pair of claws. He was about to catch it. The suction cup suddenly bulged out ~www.mtlnovel.com~ and two exhaust streams were ejected from it.

This airflow generated a huge propulsive force, causing its body to stand up suddenly from the state where the mask slipped. While avoiding the strike of the iron-winged owl's claws, the five claws of the left hand flicked, and with a screeching sound, fresh blood splashed out, the neck of this iron-winged demon owl was cut off, and the **** head flew out.

Wang Xuan saw that its claws could be freely retracted or extended like a liger.

Seeing the speed at which it flashed and shot, Wang Xuan's heart froze slightly. With his current strength, the speed at which this green-skinned humanoid monster cut off the iron-winged demon owl's head just now made him feel dazzled.

In addition to this green humanoid monster, there are two other humanoid monsters, one is tall, reaching three meters in height, with pieces of steel-like muscles bulging all over its body, bronze-colored throughout, like a super-muscular giant, it is wrapped around its body. The iron chain made a rattling sound from time to time.

Its fists are simply unstoppable, and with a single punch, it can easily knock out the iron-winged demon owl who fell down.

The last human-shaped monster has a pair of bird-like wings on its back. Although it has a human shape, it is covered with a lot of feathers. It looks half-human and half-bird. Its hands are like mantis forelimbs, and two black knives appear. The hilt was fused with its arm, and it was unclear whether it was part of its body, or just a weapon it used to fight.

When they saw these three humanoid monsters, everyone felt an indescribable strange feeling in their hearts. They instinctively felt that they seemed to have a great essence with monsters such as tree demons, iron-winged owls, and mushroom men. the difference.

They are more human than monsters.

Chapter 228

Wang Xuan's Warcraft instincts were sensitive, and the shadows of the Elder Xuancheng in the five major cities and the five people who were seated on the blue stone seats by the hatched beasts flashed in his mind immediately.

"Yes, they feel very similar to the person who was devoured by the hatching beast, but their eyes are different from those of the elders."

Wang Xuan was still riding on the little girl, rushing towards the oncoming mask at full speed. The biggest difference between these three humanoid monsters and the elders is that their eyes are terrifying, cold and ruthless, and they cannot see the emotions that humans should have. A cold, faint trace of madness and bloodthirsty killing intent.

When Wang Xuan and the 14 people rushed to within 100 meters of the mask, the three humanoid monsters had already slid down from the top of the mask, and no amount of monsters such as tree demons and mushroom men could stop them.

What caught Wang Xuan's attention the most was that when they killed monsters such as tree demons and mushroom people, white scales would fly out of these monsters and be swallowed by them.

Everyone noticed this detail, and the scalp immediately went numb.

"What kind of monsters are these three monsters, and they can get white scales? Isn't that the same as our hatching beasts?" Wang Xuan heard Huang Qingzhi's shocked cry behind him.

The speed of these three humanoid monsters is terrifying, and they rush between the hordes of dryads and mushroom people, rushing towards them.

Compared to hunting monsters, they were obviously more interested in Wang Xuan's group.

And it is strange to say that for monsters such as tree demons and iron-winged owls, compared to humans like Wang Xuan, they seem to hate these three humanoid monsters more. Most of the iron-winged owls appearing in the sky are rushing towards these three humanoid monsters. Only a few who could not squeeze in would change their target and rush towards Wang Xuan and the 14 people.

Wang Xuan's eyes narrowed slightly, the two ghost wings behind him spread out, and the little girl who stepped down suddenly accelerated, and with a bang, like a swift arrow, the electricity shot out.

He was also curious about what the three humanoid monsters were.

The humanoid monster with a pair of wings was the fastest. It landed with a kick, the wings behind it fluttered, and it almost rose into the air. Although it couldn't really fly, it could help it dash out 20 to 30 meters in a vertical direction, followed by the take-off. It fell again, and reached above the head of Wang Xuan, who was riding Xiaojiao. It swung a black blade about one meter long in its right hand and slashed head-on.

It was followed by the green humanoid monster, and the three-meter-high muscle giant fell to the end.

Wan Qianying, Xu Jian, Huang Qingzhi, Zhu Han, Xi Muxue and others took action one after another, either defending against the iron-winged demon owl who pounced from above, or launching long-range attacks on these three humanoid monsters.

Xi Muxue raised the Gatling machine gun in his hand and fired frantically. The bullets all over the sky shot towards the three rushing humanoid monsters like a storm.

The humanoid monster that slashed towards Wang Xuan suddenly shrank to the ground, and swung a pair of black blades fused with both arms.

In the crisp sound of "clang clang", sparks splashed everywhere, Xi Muxue saw it, and sucked in the cold air. It was the first time she had seen someone who could really swing the two knives to the point of splashing water, and block all the bullets she madly shot.

What kind of strength does this require?

There was a dignified look on Wang Xuan's face, and the four metal tentacles opened, and blue dim light burst out from inside, and slammed out from all sides.

To deal with this humanoid monster, he directly activated the power of the blue crystal scales, and raised his level of strength from the original super state to the top level.

Tang Ruoyu, who was beside him, rode a mechanical giant tiger and slanted towards him. The two-meter giant sword in his right hand turned into a sword wheel and swept the green humanoid monster.

With a bang, the green humanoid monster disappeared in a flash, the sword wheel flew out sideways, and when the green humanoid monster reappeared, it was already on the right side of her body, with five sharp claws popping out of her palm, Violently grabbed at Tang Ruoyu.

It was too fast, so fast that Tang Ruoyu's face changed slightly, he was busy flipping backwards, and at the same time controlled the mechanical giant tiger man who stepped down to stand up.

"Crack!" A crisp sound, she relied on the mechanical giant tiger standing up to block the attack for herself, otherwise she would be seriously injured if she didn't die.

The mechanical giant tiger was caught by the five claws of the green humanoid monster, and slammed to the ground with a bang. The mechanical shell on the surface immediately shattered and collapsed, and the heart of the mechanical beast appeared inside, and shot towards Tang Ruoyu who had flipped out. And go.

Tang Ruoyu started to merge at the same time as it was overturned. For this reason, the mechanical giant lost at least two mechanical shell devices.

The green human-shaped monster was about to take a step forward, but suddenly a ray of stars shot out like a pistol. It was Mou Xing who made the move. He held the star ball in his hands and launched a star attack from above.

This star ray strikes with infinite power, and the green humanoid monster retreats and dodges.

Tang Ruoyu stabilized his body, the two-meter giant sword returned to his hand, and the white tiger lying on it appeared, roared, and rushed up.

The green-shaped monster staggered past the rushing white tiger, the white tiger suddenly let out a roar, leaving five deep cracks on its body, and the green human-shaped monster was already approaching Mou Xing on the other side.

It seemed to sense the threat to it from the star ball in Mou Xing's hand, and wanted to kill Mou Xing first.

Mu Xing's expression changed when he saw the speed at which it rushed over.

In the rear, there was an earth-shattering rumbling sound, but Yukai launched half of the rock giant and collided with the three-meter giant that hit.

The giant was covered with iron chains, like a suit of armor, and it collided with the rock giant. Instead of retreating, it knocked the rock giant backwards.

This scene made Yukai's face hard to look at.

You must know that he is now a super-level top powerhouse. Although he did not use the strongest power in this blow, it is not trivial. The average high-level powerhouse can't bear it. How could this three-meter giant have such a powerful power?

There is no doubt that the three-meter giant in front of him is at least a super-state top-level existence, or even more powerful.

Seeing that Yukai's rock giant was knocked back, Su Tang activated a pair of transparent hands and grabbed it in the air.

Zhu Han summoned the ice beasts and fired ice arrows at the same time towards the three-meter giant.

Su Tang's transparent hand attacked silently and suddenly shot. The three-meter giant had just hit Youkai's rock giant, but he couldn't dodge at the moment. He suddenly felt his feet tighten, but was caught by Su Tang's hands that were in the air. He stopped his leg and pulled it hard, trying to throw it out in the air.

The iron chains of the three-meter giant made a rattling sound, and suddenly the giant pythons rose into the air, flew out of its body, and slammed towards Su Tang.

Su Tang's face changed, Yu Kai had recovered his anger, the half rock giant that flew out overlapped with his body, and he entered into a state of fusion with the mechanical beast at the same time, and finally burst into the strongest power, with a stern roar from his mouth, Hit the strongest blow.

With a "bang", the three-meter giant blocked it with his arms, swayed his body, and fought against Yu Kai with all his strength. The flying chain lost its control and fell down. Su Tang seized the opportunity and pulled it with all his strength.

Su Tang has already realized that he has mastered his own primary skills of hatching beasts in Shimen, the primary skill of the central city, and his strength has improved. Although he is not as good as Yukai, he is already a super-top powerhouse. He joined forces with Youkai, plus Zhu Han and Sun Yaofei who shot, these three-meter giants took care of one thing and another, and just stepped back, they were pulled back by Su Tang and fell heavily.

Zhu Han seized the opportunity and shot it down with several ice arrows.

Although this ice arrow can't kill it, it can freeze it for a short time.

You Kai and Su Tang immediately attacked with all their strength.

Yukai and the rock giant merged into one, fists together, and with a bang, they smashed into the face of the three-meter giant who fell.

The three-meter giant roared wildly, his bronze-colored face immediately became bloody, and the bones in his head cracked.

Su Tang's two transparent hands joined together to form a sharp cone, and began to rotate, slamming its heart, and immediately the flesh flew out, and a huge blood hole was drilled out of it.

The bullets that Xi Muxue swept across the sky were blocked by the winged humanoid monster with double knives. She was extremely shocked. The four tentacles controlled by Wang Xuan were wrapped around its limbs.

As long as its limbs are wrapped around it, it can be dismembered immediately.

The humanoid monster spread its wings, not dodging Wang Xuan's metal tentacles, and its body rotated on the spot, generating a strong hurricane with its body as the center.

The four metal tentacles controlled by Wang Xuan approached the hurricane, but they could not reach it, but were blocked by a terrifying invisible force.

This humanoid monster was spinning at a high speed, carrying this hurricane, and rushing towards it fiercely with overwhelming force, so powerful that Wang Xuan felt suffocated.

Wan Qianying and Xu Jian approached here, wanting to help.

Wang Xuan watched the mighty hurricane come over, his expression was so calm that he could not see emotional fluctuations, his thoughts moved, and he entered a state of integration. The little boy turned into a rainbow light and attached to his ghost suit, forming a layer of mechanical shell. A pair of ghost wings appeared behind him, covering one left and one right.

There are other people behind Wang Xuan. Even if he can dodge, the people behind will not be able to dodge, so instead of dodging, he relies on ghost wings to cover his body and carry it hard.

A harsh voice sounded, the hurricane crushed on the ghost wing, Wang Xuan's body couldn't support it, he fell back, and the surface of the ghost wing began to show signs of slight distortion.

Almost at the same moment, a blue light suddenly appeared on the surface of the ghost wing that was about to be twisted. The power of the blue crystal scales merged into the ghost wing. Turned into two giant arms of monsters.

"Boom", like the giant arm of a magical beast that had been connected to the blue photoelectric, slammed into the hurricane, tearing a gap in the hurricane. He expected the enemy to be extremely accurate and wanted to grab the wings of this humanoid monster.

A black blade suddenly appeared and slashed on the giant arm of the beast that had entered the hurricane.

Although the passive skill of "metal toughness" was obtained, the toughness of the giant arm of the beast was twice as strong as before, but it was still unable to withstand the blow of the black blade.

Almost at the same moment, Wang Xuan's other giant arm of demon beast hit the black blade from the side.

With a loud bang, the black blade was beaten violently, and a spider web-like crack appeared on the surface immediately, and it was about to shatter completely.

Another black blade appeared silently, and suddenly stabbed at Wang Xuan's heart.

This humanoid monster is not under Wang Xuan in terms of speed or reaction ability, and this one hand is at least a super-state top-level existence.

At this moment, Wang Xuan didn't have time to use the giant arm of the beast to resist, so he could only activate the energy shield, but unfortunately he couldn't stop the black blade. The energy shield, mechanical shell, and ghost armor were pierced in an instant. Pierce his body.

With a "pop", the two ghost wings that had been covering Wang Xuan's left and right all of a sudden flicked and slapped on the hurricane formed by this humanoid monster, and a tremendous force erupted.

With the help of the two ghost wings, Wang Xuan retreated violently, and the flapping ghost wings suddenly disintegrated and turned into dozens of steel feathers, shaped like sharp blades, all of which pierced into the hurricane.

Although Wan Qianying and Xu Jian were approaching, but watching Wang Xuan and this humanoid monster attack, they were unpredictable and frightening as fast as lightning. Can't see clearly.

The two gasped, including Xi Muxue, who wanted to help with a Gatling gun in the back, and felt the horror of this winged humanoid monster.

A faint roar sounded, and the rotating pair of wings of this humanoid monster spun out, a large number of feathers scattered and flew out, and dozens of steel feathers were all slapped back.

In the harsh voice, Wang Xuan took a step forward, and he stretched out his hand to grab the black blade that was about to pierce his chest, and yanked it hard.

On the giant arm of the beast, a dazzling blue light lit up.

As he realized and mastered the passive skill of "Metal Toughness", the power that the giant arm of the beast can withstand is doubled before, which allows him to explode the power of more powerful blue crystal scales.

The power contained in the blue crystal scales is almost unfathomable. At least until now, he still cannot estimate the limit of the energy in the blue crystal scales.

At this moment, he exploded his strength to the limit that he could bear, only to hear a bang, the humanoid monster was pulled out of the hurricane by him, flew into the air, and then smashed to the ground.

"Crack" crackling sound, the black blade could not withstand this huge force, and immediately broke and shattered.

Wang Xuan leaned forward, and the other giant arm of the monster was shrouded in blue light, dragging a blue light in the air, and it fell into the sky.

Although this monster was hit on the ground, its internal organs were shaken, and blood spurted out of its mouth, but it still reacted quickly, so he wanted to turn over to avoid it, and at the same time swung another black blade towards Wang Xuan.

There was a crisp sound, just as the black blade was swung out, it was hit hard by the giant arm of Wang Xuan's beast, and the black blade, which was originally covered with spider web-like cracks, shattered immediately.

The monster's two wings slapped the ground, trying to stand up, suddenly a lot of blood splashed out, and the steel feathers fell like dense rain, passing through the two wings and nailing to the ground.

The monster opened its mouth wide and let out a roar. The originally cold and ruthless eyes finally showed a trace of panic. Wang Xuan's Eye of Fear immediately caught a trace of its fear, but he did not activate the Eye of Fear, and the monster in front of him was not worth his fear. Eye to attack.

At the same time that he caught the fear of the monster's appearance, he threw out his fists, and the two giant arms of monsters slammed from the left and right, leaving two blue afterimages in the air, and the fists hit the ground firmly. Monster left and right forehead.

With a "porphyry" sound, the monster's wings were nailed to death, and it struggled to escape. Unfortunately, just as he raised his head, it was blasted to pieces, with blood mixed with white brains splashing out.

Watching the monster's headless body froze, and then softened, suddenly, a mass of white light emerged from the monster's body, which contained a strong breath of life and a sense of consciousness.

This consciousness struggled and seemed to want to escape, but a mysterious power in this world suddenly came, and it wiped out the consciousness in this white light and turned it into a pure energy, which was absorbed by him.

Wang Xuan's body was shocked, and now he can be completely certain that the humanoid monster in front of him is another high-level life with a hatching beast, or it is the original face of a hatching beast.

The energy contained in this white light was extremely powerful, and it was swallowed up by his ghost wings. Immediately, there was a faint crackling sound in the ghost wing on the left, and it grew from the original one meter three to one meter four in one fell swoop.

On the other side, You Kai and Su Tang joined forces and successfully killed the three-meter-tall giant. Like the winged monster, a white light also emerged from the body of the three-meter giant, and the violently fluctuating consciousness inside was captured. The power in the dark was erased~www.mtlnovel.com~ and was swallowed by Yukai.

A look of astonishment flashed across Yukai's eyes. Just like Wang Xuan, he immediately understood that the three-meter giant in front of him was a high-level being with hatching beasts, which was completely different from ordinary monsters.

Of course, it is also possible that it is a human being who has been completely counterattacked by the hatching beast.

The three-meter giant and the winged humanoid monster died, and the last green-skinned monster was covered in blood and was successfully beheaded by Tang Ruoyu.

Tang Ruoyu and Mou Xing joined forces, and they were both promoted in Central City. Mou Xing, who was originally a super-high-level strength, was promoted to the level of top-level powerhouses like You Kai and Su Tang.

And Tang Ruoyu's strength is the same as Wang Xuan's, it is almost unfathomable, even You Kai can't see through her.

Except for the big loss at the beginning, she quickly went all out and entered a fusion state with the white tiger. Holding the two-meter giant sword in her right hand, she slashed out three times in a row. The green monster was trying to avoid Mou Xing's Xingchen attacked, and at the same time had to deal with Tang Ruoyu's attack, he was soon beheaded by Tang Ruoyu.

Tang Ruoyu was not particularly surprised when she obtained the white light inside the green humanoid monster. It seemed that she already knew the true identities of these three humanoid monsters.

With the death of these three humanoid monsters, the iron-winged demon owls who had swooped down in a frenzy stopped attacking and rushed upwards one after another. It seems that they came this time purely for the sake of these three humanoid monsters.

Inside the mask, more than 30 leaders from various towns also rushed out and started to take action. So many super-powers joined forces, especially several of them were super-powerful and reached the upper-level. , and easily cut a **** path to join them.

Chapter 229

Everyone was shocked when they saw the white light appearing after the three humanoid monsters were killed.

When the monster is killed, only white scales will appear, and only when the person with the hatched beast is killed will the white light appear.

The 14 people and the 30 people gathered together and went to the No. 9 safe area to kill together.

Wang Xuan separated three metal tentacles, wrapped around the dead bodies of the winged humanoid monster, the three-meter giant and the green humanoid monster, and dragged them towards the mask.

Seeing his actions, some people didn't know why, but smart people immediately understood his intentions.

With the death of these three humanoid monsters, Dryad, Mushroom Man, Piranha, and Persistent Vine focused their attention on them, but they were simply powerless to stop the crowd.

Soon they broke out of the siege and returned to the mask.

Wang Xuan dragged the three humanoid monster corpses into the mask. The mask did not resist them any more. Wang Xuan was relieved.

They entered the mask, and these monsters rushed towards the mask with hoarse howls from their mouths, constantly impacting, causing slight fluctuations on the surface of the mask, but no matter how frantically they charged, they could only watch through the mask. The people inside, but they can't do anything about them.

Entering the mask, a few of these people immediately squeezed out, busy asking them how they appeared from the distant forest.

They all came from various towns. They were shocked by everything in front of them. In addition, the three humanoid monsters appeared in the sky. They temporarily decided to wait and see until Wang Xuan and other 14 people suddenly appeared from a distance. They thought they were from the five major cities, but only later did they realize that they were from the towns below.

Wang Xuan carried the three humanoid monster corpses, swayed his body, and went straight to the center of the ten glass cylinders, and threw them into the rune stone carvings with a diameter of four or five meters in the center.

These three humanoid monsters are very powerful, and their strength is at least the top powerhouse in the super state, and even among the top powerhouses, they are extremely powerful existences.

If it's just one-on-one, even Yokai might not be able to kill them.

Their blood must contain powerful energy. Wang Xuan threw their corpses in, and then summoned Xiaojiao to squeeze the blood out of the three corpses as much as possible, hoping to use their corpses to repair them. This teleportation array.

Those people looked at Wang Xuan's behavior, so they were confused and somewhat baffled.

Wang Xuan saw that Xiaojiao was squeezing the three corpses, so he turned around and walked in the direction of these people.

He glanced at the people in front of him. There were thirty-six people in total. They were basically wearing a complete set of third-order equipment, and each wore the symbols of the five major forces. Through mutual introduction, he knew that among the thirty-six people, six were from "Fire Town", two people from "Ming Town", three people from "Woo Town", three people from "Hai Town", four people from "Ling Town", four people from "Magic Town", three people from "Tu Town", and three people from "Wind Town". "Five people, two people from "Lei Town", and four people from "Yu Town", a total of thirty-six people from ten towns.

Because of the large number of people, they did not introduce their names in detail to each other. Both parties only briefly introduced which people came from which town, and then introduced the names of the leading people.

For example, one of the six people in "Fire Town" is a man in his twenties. His face is slightly red. The air temperature around him is one or two degrees higher than the normal temperature. Obviously, he contains some kind of special Treasures or abilities, among this group of people, he is the most eye-catching, standing there, like Yuanding Yuezhi.

Wang Xuan heard him introduce his name as He Jiankui, and realized that this person was no trivial matter, so he wrote down his name.

"Brother Wang Xuan...why did you throw the corpse there?" He Jiankui couldn't help but asked Wang Xuan, he was really curious.

Wang Xuan said: "The blood of these monsters can be used to repair the transmission channel."

"Transportation channel? What transmission channel?" He Jiankui and others were even more confused.

Wang Xuan was too lazy to talk much, so he glanced at Wan Qianying and said, "Boss Wan, it's better for you to introduce the cause and effect."

Wan Qianying nodded and did not refuse, and then roughly recounted the experiences of the fourteen of them that day, focusing on the central city.

"Although we didn't find the five major cities, we entered the central city."

When Wan Qianying mentioned that there are places in the central city where flawless equipment can be "built" and the skills of hatching beasts can be obtained, the eyes of these people all lit up.

He Jiankui immediately said solemnly: "Which direction is this central city?" Obviously, he was moved, and he immediately wanted to go.

Yukai said, "As long as this transmission channel can be repaired, I can go there immediately."

As he spoke, he reached out and pointed to the unusable transmission channel between the ten glass cylinders.

He Jiankui and a group of people heard what he said and turned their heads to look over.

"How to repair this teleportation channel?" Beside He Jiankui, there was a fat woman who looked big and three thick and asked.

He Jiankui had already woken up and said, "I still don't understand? I want the blood of monsters."

Wan Qianying nodded and said, "Yes, it takes a lot of energy to repair this transmission channel. The blood of these monsters contains powerful energy. The stronger the monster, the better. The blood of these monsters flows on the rune stone carving. There is hope to inspire this rune stone carving and repair the transmission channel."

Wan Qianying said here and looked at Tang Ruoyu and said, "Ruoyu, is that the case? Do you have anything else to add?"

Tang Ruoyu shook his head slightly, indicating that he was gone.

"So that's what happened, it's not easy? There are many monsters outside. Let's hunt some monsters together to collect their blood." He Jiankui said this, his eyes were slightly hot, and he stared outside. The hordes of dryads and piranhas and other monsters.

Tang Ruoyu walked towards the transmission channel in the center, and Wan Qianying and others followed after seeing this.

Xiaojiao stepped on the bodies of the three humanoid monsters into mud, and the blood in their bodies mixed with the minced flesh stuck to the ground. Everyone could see that these flesh and blood were slowly infiltrating down, and there was a circle of rune stone carvings. There were signs of damage, but as the flesh penetrated, a faint red light slowly appeared on these runes.

"There is a reaction, and it can be repaired." Tang Ruoyu finally showed a hint of joy on his face.

He Jiankui said: "Then what are you waiting for? Let's drag more monster corpses over immediately."

Wang Xuan suddenly thought of something and said, "Yes, do you know where these three humanoid monsters came from? Why were they above the mask before?"

He Jiankui shook his head and said, "It seems to have appeared from the glass cylinder above. When we noticed, they had already slid onto the mask above."

"It appeared on the glass cylinder?" Wang Xuan immediately looked up at the glass cylinder.

Above the glass column, which is hundreds of meters high, is the building that reveals the tip of the iceberg.

"Do these three humanoid monsters come from the building above that?" A thought popped into Wang Xuan's mind.

He also used the eye of the illustrated book before, but unfortunately he couldn't capture the data of these three humanoid monsters.

"It's not like an ordinary monster. It's like some kind of high-level intelligent race with hatching beasts. Of course, it may have been completely devoured by hatching beasts. I remember their eyes looked terrifying." Wan Qianying saw that Wang Xuan was very concerned about this. The three humanoid monsters expressed their views.

Wang Xuan snorted and nodded slightly. Now he has no way of knowing the origin of these three humanoid monsters. The corpse of the monster was transported to the central teleportation array.

Soon a large number of corpses were piled up, and the blood in these corpses was poured on the rune stone carvings.

With the pouring of a large amount of blood, these rune stone carvings continuously absorbed the blood, including the transmission formation in the center, which was soaked with blood.

Tang Ruoyu has been paying attention to the changes of these rune stone carvings, and finally shook his head and said, "No, these monsters are too weak, the effect is not obvious, and they need powerful monster flesh and blood."

The flesh and blood of the three humanoid monsters had an obvious effect before, but now although a lot of monster flesh and blood has been poured, there is no obvious change.

Hearing Tang Ruoyu say this, everyone stopped.

"The monsters in this area are only equivalent to ordinary super-states. If you want to find more powerful monsters, you have to travel far away, which is a bit troublesome." Yukai frowned.

Wang Xuandao: "The flesh and blood of the three humanoid monsters just now worked very well. It would be nice to have more."

As he said that, he looked up at the building that showed a corner of the sky.

It was completely dark now.

Wan Qianying said, "No one knows where the three humanoid monsters came from. It's getting dark. Let's take a night's rest and talk about it tomorrow."

Many people around nodded slightly. Originally, everyone was excited, thinking that they could repair this teleportation array. They didn't want these monsters to have no obvious effect, and they felt disappointed immediately.

He Jiankui said, "If that's the case, then we'll go back to town to rest first, and come up early tomorrow morning."

The fat woman next to him said again: "I think we should all inform the chiefs of other towns. There are many people and great strength. Let's work together, and it will be repaired soon."

Wan Qianying glanced at her and said, "You're right, there are one hundred towns. Now we only have fourteen towns here, and there are still eighty-six town leaders."

Yukai said: "It seems that many towns have been destroyed, and there is no one left."

Wan Qianying said: "Even if a lot is destroyed, at least there are still people in most of the town. This sister's suggestion just now is very correct. I think we will try our best to unite all the people who have reached the super state in the town. No matter how powerful it is, it will be much easier to repair the transmission channel or find the five major cities."

Wang Xuan nodded slightly, feeling that what Wan Qianying said made sense.

Yukai said: "This is indeed true. How to join forces? Let's go down to find them? Or wait for them to come up?"

He Jiankui said: "It's too slow, let's go down to find them, we have 50 people here, basically each person is responsible for notifying one town, we will work harder, each person notifying two, no one knows. Which towns have been destroyed, which towns are still alive, in short, the remaining 80 or so towns must be notified, what do you say."

"I agree, it should have been this way long ago." The five people from "Huo Town" who followed He Jiankui nodded together.

"Of course you can." The two people from "Ming Town" also immediately expressed their position.

After that, everyone agreed.

Wan Qianying said: "In this case, let's make an agreement, that is, we will notify the leaders of the hundred towns as much as possible, and we will make an appointment in the morning of the day after tomorrow. How about we all gather here?"

"No problem." Youkai and the others all nodded, and then everyone began to distribute. Whoever notified which town, fifty people had to notify more than 80 towns, and some people had to notify two towns.

Wang Xuan thought that he needed to go to "Stone Town" and "Star Town" in the material tasks he had to do, so he volunteered to inform these two towns.

The distribution of the people ended one after another, and some people immediately started to go down these elevators to notify, while Wang Xuan and the 14 people basically returned to their respective towns to rest.

From yesterday to today, they basically did not rest, and now everyone feels exhausted and wants to go back to rest.

Wang Xuan and Wan Qianying, Tang Ruoyu, Xu Jian, Gongyangxuan entered the elevator together and returned to Insect Town.

When they returned to "Insect Town", everyone was taken aback as soon as they got out of the elevator.

At night, the "Insect Town" is generally relatively quiet, but at this moment, the "Insect Town" is very lively. A large number of people gathered in the square, all raising their heads and looking up.

The sky in this worm town is 100 meters high, and it seems to be covered with a layer of white material, like a ceiling, covering everything, but at this moment, there is a big hole in the ceiling 100 meters high, from which a hole is poked out. A gigantic prow.

When Wang Xuan saw it, he immediately thought of the giant ship in the third layer of the world. The bow of the giant ship was inserted into the ground. Could it be a coincidence that it pierced the boundary between the third layer of the world and this insect town? Did the bow of the boat protrude into Wormtown?

The whole body of several people was like petrification, and they looked up at the hundred meters above. In the head, it seems that there are countless dark shadows struggling, like evil ghosts sealed in hell, they are trying to break free from it.

"This is really the bow of that giant ship... rotted by that monster baby." Huang Qingzhi's face turned pale.

A large number of people gathered in the square, and the entire insect town was a sensation. Thousands of people looked up at the sky above, and everyone was trembling.

Seeing that Wang Xuan and several leaders had returned, people from several major forces immediately greeted them.

Only the leader of the "Justice League" died, and no new leader appeared, and now it is like a mass of loose sand.

Wang Xuan saw that many of the people who greeted him were familiar, such as Chu Boyu in "Dynasty", the hatchling beast was a tall man with "Thunder Saber", and the two in "Phoenix" wore two pieces. The ghost and the man in the silver scale suit had joined forces last time in Worm Town, but they didn't know their names.

In the "Xuan Gang", he knew even more people. Qiu Yuanfeng, Gongsun Xiaoyan, You Ao, Xiang Jingnan, Liu Weijie and others all greeted him.

"Chief, Brother Wang!" Qiu Yuanfeng and Gongsun Xiaoyan saw Xu Jian and Wang Xuan, and they were busy saluting respectfully.

Although Wang Xuan's current strength far exceeds Xu Jian's, Xu Jian is still the leader of the "Xuan Gang" on the bright side.

"When did the thing in the sky appear?" Xu Jian nodded towards Qiu Yuanfeng and the others, and immediately pointed to the sky and asked.

"Not long after it appeared, we didn't know what happened. Now everyone has appeared. Chief, do you know what's going on?" Qiu Yuanfeng asked.

Xu Jian said with an ugly face: "It may be related to the third-layer world, but the bow of the third-layer giant ship should have been inserted into the ground a few days ago, and it has not been exposed from here until today?"

The last sentence he said was to Wang Xuan, and it felt incomprehensible.

Wang Xuandao: "We can't use common sense to speculate here. It's not surprising what happens. I don't know if it's just a problem in Bug Town or other towns have problems."

Wang Xuan felt the constant fluctuation of the Eye of Fear in his forehead. The fear in the hearts of thousands of people in Insect Town was aroused, and was absorbed by his Eye of Fear incessantly. The power of fear contained in it was gradually increasing. But if you want to grow again, you need a bigger fear.

Everyone in the square has been paying attention to it for a long time. Although there are shadows struggling in the rotten bow of the boat, in the end, no shadows are struggling. After that, the people who gathered began to slowly disperse.

Wan Qianying, Xu Jian, Gongyangxuan, and Huang Qingzhi decided to send people to take turns on duty after discussing, to monitor the changes of the rotten bow in the sky at all times, and notify them immediately if there is any abnormality.

Wang Xuan then returned to the small building where he lived~www.mtlnovel.com~ He didn't sleep last night. After two days of fighting, he was already tired. He returned to his bedroom, washed up, and fell asleep.

He slept until the second half of the night, but was woken up by the whistling, and he immediately heard it, it was Wang Zong's voice.

The people in the insect town were awakened again, and there was a lot of discussion, and anxiety shrouded the whole insect town.

Generally, before the insect tide appears, the king worm will wake up and send out such a strange howl, but the insect tide in "Insect Town" basically only occurs once every two or three months, and the previous "worm tide" Soon after the end, how could Wang Zong wake up again?

This is deeply disturbing to many, and those who are awakened can no longer fall back asleep.

Soon Qiu Yuanfeng came to inform, saying that Wan Qianying invited him to discuss.

Wang Xuan put on the ghost suit again, and went to the place where Wan Qianying lived, and saw several leaders and Tang Ruoyu also came.

"Wang Insect is screaming, I'm afraid there will be another insect wave tomorrow. This time the situation is very abnormal, and we need to prepare for the worst." Wan Qianying saw Wang Xuan coming, and immediately took the initiative to greet him.

Xu Jian said: "I have never seen a worm tide before, how come there is a worm tide again, the king bug was awakened early, is it related to the rotting bow in the sky?"

Wan Qianying nodded towards him and said, "I guessed so too, but the most important thing now is to deal with the insect tide."

With the last experience, Wang Xuan is not very worried about the insect tide. The only headache is this insect town world. The strength of the super state is suppressed, and they can only exert the power of the limit of the state at most.

Tang Ruoyu, who has been quiet for a while, suddenly said, "Don't worry, there will be no insect infestation this time."

Chapter 230

"Huh?" Several people were stunned when they heard this, and looked at her.

Huang Qingzhi said, "Miss Tang, how do you know?"

Tang Ruoyu's face was a little dignified, looked at the window outside, and muttered: "You are right, Wang Zong was awakened early because of the ship that appeared in the sky, and it roared because of anxiety, so it will not start the insect tide. ."

Wan Qianying said, "Ruo Yu, can you be sure?"

Tang Ruoyu nodded.

Huang Qingzhi said: "Miss Tang, I've always wanted to ask you... What is your origin? Why do you know a lot of things that even the elders don't know, including the central city, including the transmission channel, what information do you know? We can't tell us all together, after all, there has been a huge change in the third floor, and we are now like blind people touching an elephant, we don't know anything, and those who have no clue don't know what to do next."

"Yeah, now it's not just the third-layer world, but even Insect Town has changed. We are all worried, and no one knows what to do next." Xu Jian was also busy talking, with a sincere look on his face. , they didn't want to force Tang Ruoyu, but now something happened to the third floor and Insect Town, everyone was worried and eager to know some news.

Wang Xuan also looked at Tang Ruoyu. Like them, he was also very curious, hoping to know some truth and curious about Tang Ruoyu's true identity.

Seeing everyone looking at him, Tang Ruoyu moved his lips and said: "Actually, it's not that I don't want to say it, but my memory... It's very messy, and I remember some things, only when I come into contact with them, will I suddenly change from my memory. It appeared in my mind, just like now, I seem to

have experienced this scene, the same sky is broken, and the king insect is screaming, but I can be sure that it is not the insect tide, but some kind of sign that is more terrifying than the insect tide."

This said, everyone was stunned for a moment, looking at Tang Ruoyu's appearance, there was a faint fear of the unknown in their hearts.

"A more terrifying sign than an insect tide?" Huang Qingzhi murmured, "What is that?"

Tang Ruoyu shook his head and said, "I don't know that either."

Wan Qianying said: "Actually, the elders of 'Phoenix City' once specifically mentioned you to me, let us not pay attention to your affairs. At that time, I always thought that you had something to do with the elders, but now it doesn't seem like they have anything to do with you. , Ruoyu, are you from the higher world?"

Tang Ruoyu shook his head slightly and said, "I have no memory of the past. When I woke up, I was sitting in a car. It was a huge parking lot. Later, I was attacked by monsters. I killed the monsters and ran away. It's all memory fragments, only one thought is very strong, like a voice warning me not to trust any human being, so I dare not touch anyone..."

When she said this, there was a confused and faintly painful look on her face.

Wang Xuan understood that what she was talking about should be the underground parking lot of Longmao Plaza. She grew up and evolved all the way, and entered Wormtown earlier than herself. At that time, he wondered why she was always alone and seemed very lonely. See why.

Everyone looked at each other in dismay, not believing any human beings, what does this mean?

"Later... I got in touch with everyone. I know that everyone is very good to me." Tang Ruoyu glanced at Wang Xuan when he said this.

When she said this, she suddenly thought of something, looked at Wan Qianying and said, "Since the elder of 'Phoenix City' mentioned me to you, then he must know my origin. I want to find him and ask."

Xu Jian said: "Not only the elders of 'Phoenix City', the elders of 'Xuancheng' also mentioned you to me. I think the elders of the 'Five Cities' should all know about you. I also asked the elders about you in detail at that time. It's a pity the elder didn't say anything."

Wan Qianying said: "So, do you know that the Central City and the repair of the teleportation channel were only thought of temporarily?"

Tang Ruoyu said: "I see some scenes, and sometimes I feel familiar, and then there will be corresponding memory fragments."

Hearing Tang Ruoyu say this, they all felt disappointed. Although they guessed that Tang Ruoyu might have a great background, they thought she would know a lot of important news, but now it seems that it is impossible to find out more news from her.

Wang Xuan, who had not spoken for a long time, finally said, "Then, do you have any relevant memories of the giant ship and the buildings that appeared in the sky?"

Tang Ruoyu shook his head slightly and said, "I don't know where they came from, but there is a piece of memory about them. There are similar giant ships and buildings there, buildings as big as the sky fell down, giant ships traversed space, and There are a lot of people's faces, men and women, old and young, they are all smiling at me, each with kind eyes, but I don't know why, but every time I think about it, there is something I can't tell. Fear, and the head hurts like a split."

When she said this, she suddenly stroked her head with her hand. For a short time, there was cold sweat all over her forehead. It was obviously because she thought of a certain episode that she had a headache.

Wang Xuan's eyes of fear reacted slightly, and he finally caught a strong sense of fear from the depths of Tang Ruoyu's heart.

It was the first time that he sensed Tang Ruoyu's fear.

Seeing Tang Ruoyu's reaction, everyone inexplicably raised an indescribable sense of eccentricity.

"Many people, both male and female, smiled kindly at you, but why did you feel the fear?" Huang Qingzhi whispered softly, looking at Tang Ruoyu's fierce reaction, he couldn't think of any reason for a while, but felt confused.

Xu Jian pondered: "You can think of a lot of people from this giant ship and that building. Could it be that this giant ship has something to do with the building and humans..." He couldn't understand, no matter how he thought about it, there could be no such giant on earth. Ships and buildings as big as the sky.

"Ruoyu, don't think about it since you think about this headache." Wan Qianying showed pity in her eyes, busy comforting, she could see that Tang Ruoyu was not pretending.

In a short period of time, Tang Ruoyu was covered in cold sweat, and under Wan Qianying's comfort, she did not dare to think deeply, the headache slowly disappeared, and her face became very pale.

Xu Jian said solemnly: "Since Ruoyu said there would be no insect tide, then there should be no insect tide, but just in case, we still have to prepare with both hands. What do you think, Ruoyu, this is not unbelievable. You, but take precautions before they happen."

Tang Ruoyu nodded lightly, expressing understanding.

After that, several leaders found their subordinates and asked them to immediately set off for Snake Domain, Centipede Island and Scorpion City. Like last time, they brought sound transmission crystals and called back all those who had not returned to Insect Town.

Since the king insects are whistling wildly tonight, whether there is an insect tide or not, it will naturally be known by noon tomorrow.

Several teams were sent out, and several leaders also gathered people from their own forces.

Because of the death of the leader of the Justice League, the dragons are now without a leader, like a pile of scattered sand. The task of Wang Xuan and Tang Ruoyu has become to temporarily integrate the people of the Justice League. With Wang Xuan's prestige in Worm Town, they can naturally calm down the "Justice League". people.

The sky is getting brighter. Although Wang Xuan has not slept well, he is no longer drowsy. Together with Tang Ruoyu, he first arrived at the area where the powerhouses of the "Justice League" lived, and immediately left those people in the insect town. The powerhouses gather together.

Among these people, Wang Xuan was somewhat familiar with one of the men with a more calm demeanor. Wang Xuan had seen him in the tavern and asked his name.

The man was busy saluting respectfully and saying his name.

"My name is Geng Jianming."

On that day, Wang Xuan killed three envoys who came down from the Rakshasa City above, and shocked the entire insect town. How could Geng Jianming be disrespectful?

"Geng Jianming, right, just now, the king insect is screaming, and you should have heard it. Now the leader of the Justice League is dead in the **** tower. Something happened on it, and no new leader has come down. You can temporarily lead the Justice League and do your best. It is possible to organize all the members of the Justice League, do you have any objections?"

While talking, Wang Xuan looked at the other powerhouses in the "Justice League".

These people have expressed no objection, joking, and expressed objection in Wang Xuan's face.

Seeing that there was no objection from everyone, Wang Xuan instructed these people to act and convened all the members of the "Justice League".

As the sky got brighter, people returned to Insect Town one after another. Wang Xuan thought of Gu Manyao, Zhao Lei and others. They had been to Scorpion City for a while, and they never came back. He was also a little worried. Should be back too.

In the square, people from the five major forces gradually gathered, and after a while, a group of people came to look for Wang Xuan.

Wang Xuan looked over and saw that it was Cheng Aiguo, Meng Lian, Shi Lei and He Mingli.

Seeing their nervous and excited expressions, Wang Xuan's heart moved, and he said, "Have you made a breakthrough?"

In his induction, the induction and breath of Cheng Aiguo and Meng Lian did not look like a full body.

Cheng Aiguo nodded busily and said, "We have all made breakthroughs, thank you..." He wanted to thank Wang Xuan for the hatching of the corpse mushroom, but he suddenly thought that there were too many people around, so he closed his mouth.

Wang Xuan glanced at Meng Lian, and saw that she had broken through to the perfect state, and her temperament became more and more dusty. Although she stood in front of her eyes, she did not look like this earthly person, pure as a lotus. Every time he saw Meng Lian, There is an indescribable feeling of wonder.

"Shi Lei, He Mingli, you should be soon." Wang Xuan looked at Shi Lei, He Mingli, Zhang Mingbo and Fang Linhan again.

"Well, it should be soon. I am confident that it will be almost the same in a day or two. By the way, they are all talking about the insect tide. What does the insect tide look like?" Shi Lei nodded busy and asked curiously.

Wang Xuandao: "When there is an insect tide, there will be countless insects appearing and besieging the insect town, but there is a high probability that they will not appear today."

He still believed in what Tang Ruoyu said, but just in case, everyone was still in a serious battle. People from the five major forces gathered to guard the surrounding high walls.

Wang Xuan and Tang Ruoyu came to the north together and looked into the distance, and occasionally they looked up.

Now that it is daytime, two or three thousand people in the entire insect town can see it more clearly. There is a huge hole 100 meters above the hole, and a rotten-looking bow emerges from the hole. Inside, there are groups of black figures struggling. It seemed unspeakably terrifying.

The holes in the sky and the insect tide that may appear at any time make the whole insect town full of tension and anxiety.

Wang Xuan was also a little anxious, because Gu Manyao, Zhao Lei, Zhang Haofei and other nine people never showed up.

Fewer and fewer people have returned from Scorpion City, and the masters of the major forces who have basically stayed in Scorpion City for training have basically all returned with news.

Just when Wang Xuan began to doubt whether Gu Manyao and the others would really have an accident in Scorpion City, nine figures finally appeared in the west of Worm Town, returning at a very fast speed.

Wang Xuan breathed a sigh of relief when he saw it.

Gu Manyao, Zhao Lei and other nine people finally came back.

As soon as the nine of them returned, they immediately gathered at the place where the "Xuan Gang" was located, regardless of where they lived.

Wang Xuan saw them very early and walked over immediately.

It feels like I haven't seen them for some days, and Wang Xuan still misses them a bit.

The nine people have been in Scorpion City these days, and they seem to be busy. When they saw Wang Xuan, their eyes lit up and they rushed over immediately.

"Wang Xuan!" Zhao Lei exclaimed excitedly.

Gu Manyao was also very excited, but she was a girl, she was more reserved and did not dare to shout like Zhao Lei.

"What's the matter, didn't the insect wave just happen? Why did the insect wave appear again?" Zhao Lei raised his head and pointed upwards and shouted, "And what's up there? It looks scary."

Wang Xuan said: "This is indescribable. Last night, the roar of the king insect may be related to the sudden hole in the sky, so there may not be an insect tide today, but just in case, we still have to be prepared, you guys. How did Tian gain in Scorpion City?"

When he said this, his heart suddenly moved, and he looked at Gu Manyao, and then at Tie Jun, his brows slightly wrinkled.

"You..." His magical beasts were very sensitive. Looking at Gu Manyao and Tie Jun, it gave him a rather special feeling. His heart suddenly jumped, and he said, "Have you broken through?"

They were originally the perfect state, and if they could break through, it would be the super state.

Can Gu Manyao and Tie Jun break through to the super state in these few days? A look of disbelief appeared on Wang Xuan's face.

Gu Manyao nodded with a smile on his face, and Tie Jun also laughed twice.

Zhao Lei laughed and said: "This is even more difficult to describe. We encountered an adventure in Scorpion City and accidentally found an underground ancient city. Everyone got some opportunities, but the most powerful ones were Man Yao and Tie Jun. They The chance to get it is the greatest, and now he is a super-powerful person."

Zhao Lei said with envy on his face.

Wang Xuan nodded when he heard this. In such a world, as long as there is enough luck, it is not surprising to encounter an opportunity. He just doesn't know what kind of opportunity Gu Manyao and Tie Jun encountered, and they broke through to the super state directly. This is indeed true. very rare.

Seeing Wang Xuan looking at him, Gu Manyao didn't hide his secrets, and immediately revealed the Yaochi knife.

In front of Wang Xuan, she really wanted to express herself, feeling that Wang Xuan would value her more and more.

With Gu Manyao's breakthrough to the super state, this black demon chi sword has grown and evolved from the original one meter five to two meters long, and turned into a giant black machete.

The knife was covered with black dragon scales, and it looked like a small black dragon was being held in her hand.

In addition, among the black dragon scales, a blood-red gem appeared, emitting a faint blood-red light.

"This is called blood erosion. With its help, I can break through." Gu Manyao pointed to the blood ruby among the black dragon scales, with a little pride on his face.

Wang Xuan was able to sense the powerful energy contained in this blood-eroded treasure, and understood that it must be a no-nonsense treasure that could be fused with hatching beasts. It was her luck and chance that Gu Manyao could get it.

Compared with Gu Manyao, Tie Jun is much more low-key, he didn't deliberately reveal the chance he got, but just said softly: "I don't have the good chance Manyao has to get such a powerful treasure. Like everyone else, I have encountered a relatively ordinary chance. , I got some metal energy crystals that can be used to improve King Kong, and I realized a skill of hatching beasts. Later, I suddenly encountered a very powerful monster. At that time, I thought I was dead, and I suddenly broke through."

"Metallic energy crystal? Comprehend skills?" Wang Xuan immediately understood that the underground ancient city where the nine people entered actually contained treasures similar to those in the central city's skill stone gate. This kind of spar can not only make the hatching beasts grow, but also if you are lucky, you can even get the hatching beast skill, which is greatly improved. It is very rare for them to get such an opportunity.

It is obviously a coincidence that Tiejun can break through, because he has absorbed enough metal energy crystal to complete the necessary savings before breaking through, and has also comprehended the skills. Later, when he encountered danger, he broke through the "life and death barrier" unknowingly and became a super state. Strong man, but even now, I am afraid that even he himself does not know what happened.

"So, you got a lot of spar in that dungeon?" Wang Xuan looked at Chao Lei.

"Yes, these spar stones are strange, and they are divided into different people. Different spar stones require different hatching beasts to merge and absorb. We have been staying there for the past few days, basically killing all the monsters inside. This just came out~www.mtlnovel.com~ Zhao Lei was a little excited and said: "These crystals are amazing, although I haven't made a breakthrough, but I feel that my strength is growing in a straight line, without bragging, I feel that I am at least in the state now. Peak strength. "

Wang Xuan snorted and nodded slightly, realizing that they had unknowingly completed the savings that they were about to break through.

It's just that this can't be told to them, otherwise, if they know the existence of life and death, it will be easy to get away with it, and it will be easy to break through and fail.

"Something has happened on the third floor now. Since Man Yao, you and Tie Jun are also super strong, then come to gather here in the morning the day after tomorrow, and let's go to the third floor together."

"Go to the third floor?" Gu Manyao and Tie Jun immediately felt both nervous and excited.

Zhao Lei, Zhang Haofei and others looked envious.

"Manyao, are you happy, now you are finally catching up with Wang Xuan's footsteps again, and you can act with him, hey." Zhao Lei said casually, but Gu Manyao blushed a little, and gave him a hard look .

When Wang Xuan heard Zhao Lei say this, his heart suddenly moved slightly. Speaking of which, he really hadn't been with them for a while.

They were trapped together in the underground parking lot that day. Later, they were brave and diligent all the way. Compared with them, they couldn't keep up with their own footsteps, and the gap between the two sides was getting bigger and bigger.

Although I have been working with Tang Ruoyu and Xu Jian these days, when I am with them, I can't find the feeling of being with Gu Manyao and Zhao Lei at the beginning.

Now that they are together again, that long-lost feeling is back again.
