

Last Building on Earth Chapter 236-240

Chapter 236

With a "boom", the Ala troll elite let out an earth-shattering roar, and the body was shot down into the air, smashing heavily to the ground, and a loud sound erupted.

Its defense is amazing, the bronze luster concentrates on the head, making the skull as hard as steel, but it can't completely block Wang Xuan's full-strength blow that inspired the blue crystal scales.

It fell heavily to the ground, its body was twisted in place, and it did not die immediately, and it tried its best to lift its head, but the head collapsed softly, and the skull inside was broken and squeezed. A pair of eyeballs popped out of their sockets, and blood was gurgling out from its mouth, nose, eyes and ears.

Wang Xuan fell to the ground, watching the head of the Ala troll elite being hit by himself, but the head was not completely broken, and he was also secretly surprised. With his current strength, even if the head of the Ala troll elite was a rock carving, a monster arm With a single blow, it must be broken into pieces.

Yukai and the others, who were originally rushing towards here, stopped when they saw the head of the elite troll God being hit and falling into the sky.

The winged Agatha, engulfed by the flames, finally stopped struggling. A mass of white light appeared and fell into He Jiankui's right hand. He grabbed his right hand in the air, and the flame suddenly subsided and disappeared.

They also needed the blood in Agatha's body to repair the teleportation channel, but they couldn't burn her body to ashes.

And the last wing, Agatha, was hit hard by Wang Xuan, and Tang Ruoyu took action and successfully chopped off her head.

So far, the five God trolls and the four winged Agathas have all died, while five of the six green Adens have died. Killed by the super-powerful in the town".

Fifteen humanoid monsters all died, and after struggling on the ground for a few seconds, the strongest Ara troll elite finally gave up, and a white light emerged and flew towards Wang Xuan.

This group of white rays of light is very fiery, obviously different from other humanoid monsters. After being absorbed by Wang Xuan's ghost wings, the ghost wings vibrated violently, and the length of his second ghost wing was changed from the original one. Grow to one meter six.

The later on, the more energy needed for this growth, but now that it has absorbed the energy in the body of the God troll elite, it can grow immediately. It is conceivable that the energy contained in this white light is powerful.

Now the gap between his two ghost wings is not as obvious as before. Wang Xuan understands that as long as he can hunt down some powerful monsters with super-level or above, he should be able to fully grow up soon.

"Quick, send the corpses of these humanoid monsters to the central teleportation channel!" Yukai immediately shouted loudly, lest the blood in these humanoid monsters run out, and he was busy picking up the corpse of an Ara troll. , running towards the mask.

Mou Xing, Su Tang, Jiang Mingtai, Wang Yu and others took action one after another. Wang Xuan stretched out four metal tentacles and rolled up the corpses of the God troll elite, Green Aden, and a winged Agatha on the ground at once, and entered the mask.

One Ara troll elite, plus fifteen humanoid monster corpses, were quickly moved to the central transmission channel by everyone. Under Tang Ruoyu's instructions, everyone shot together and began to squeeze the blood in these monsters as much as possible. Go out and pour water on the rune stone carving in the center.

It was no different from the previous blood pouring. In particular, the blood of the God troll elite flowed up, and immediately triggered a brighter red halo, which was clearly displayed on the rune stone carvings around it.

Wang Xuan was a little excited, watching the somewhat damaged rune appear with the red halo, and there seemed to be countless blood-red silk threads in the halo, constantly intertwined, and the rune was slowly being repaired.

Everyone gathered over, watching the scene in front of them, You Kai, Mou Xing and the others showed excited expressions on their faces.

Outside the mask, groups of monsters were still wandering, attacking the mask from time to time. As those humanoid monsters died, their targets became humans again.

In this battle, a total of four super-powerful people died on one side. Among them, some super-powerful superpowers from the town came up one after another. Now the total number of people gathered here is close to 250 people.

As the blood of a large number of humanoid monsters was poured out, these blood contained powerful energy, which was absorbed by the rune stone carvings at this moment, and its remnants were being repaired at a speed that was vaguely visible to the naked eye, and everyone saw hope.

Wang Xuan looked up at the sky. With the appearance of the Ara troll elite and fifteen humanoid monsters, everyone basically guessed that these monsters should come from the cracks in the sky above, or from the tip of the iceberg. building building.

Wang Xuan thought of the unknown antiquities that had the shape of a translucent mushroom that got in that day, but he didn't know whether the appearance of the God Troll, Green Aden, and Winged Agatha had anything to do with it.

Next to Jiang Mingtai from "Wind Town", many people are asking him for detailed information about the monsters such as the Ala troll and the green Aden.

The third eye in his possession has seen the information of these monsters, and everyone is strongly curious whether these humanoid monsters are another high-level intelligent race other than human beings. Looking at the fight just now, these high-level intelligent races are very likely to also have hatching. beast.

However, although Jiang Mingtai saw the names and strengths and weaknesses of these monsters, he couldn't see the real details and origins of these monsters with his third eye, so he couldn't answer everyone's doubts.

"I guess it should be another high-level intelligent race, what Ara troll, green Aden and winged Agatha may be a high-level race like us humans, and also have hatching beasts, they should be in the sky. The other world above, it may even be the inhabitants of the fourth-layer world, and now there is a gap above it, so they can come down."

While the crowd was discussing, Mou Xing spoke his guesses in a loud voice.

This view of his has been recognized by many people.

"The Ala troll elite with four arms is obviously a middle-level leader or leader of the Ala troll clan."

"Yes, the green Aden and the winged Agatha should also have similar leaders. It is said that they may not appear at any time. We must be careful."

While speaking, Su Tang looked up at the sky, with a solemn look on her face.

Yukai walked towards the handsome man who used a pair of golden swords with the word "king" before.

In the first battle, apart from Wang Xuan, this man's performance was the most astonishing, even surpassing He Jiankui, who was like a **** of fire.

Yukai was more curious about him and took the initiative to approach him.

Wang Xuan was also paying attention, and after hearing You Kai's question, the handsome man only knew that he was from "Wang Town" in the hundred towns, and his name was Wei Zixuan.

Wang Xuan wrote down the name of this Wei Zixuan, if nothing else, I am afraid that among the nearly 250 people in front of him, apart from himself, this Wei Zixuan is the strongest.

As the blood of all humanoid monsters was poured on the rune stone carving, the light on the rune stone carving became more and more intense, and the blood slowly penetrated into it. Finally, a complete circle of red appeared on the rune stone carving. aperture.

When this red light circle appeared, Tang Ruoyu suddenly let out a long sigh and said, "It's fixed."

Hearing his words, the expressions of everyone around were shocked, Wang Xuan, You Kai, Mou Xing, Su Tang and others all showed excited expressions on their faces.

"It's finally repaired, and now you can go directly to the central city from here?" Youkai looked at Tang Ruoyu.

Tang Ruoyu nodded at him, and then walked straight in.

When she stepped into it, the red aperture that appeared suddenly rose up, and Tang Ruoyu's figure appeared in the red aperture with an afterimage, and then the afterimage disappeared, and she also disappeared.

Seeing that a big living person suddenly disappeared in front of him, more than two hundred super powerhouses crowded over excitedly.

You Kai laughed. He couldn't wait to go to the central city for a long time, and he was hesitant, so he immediately grabbed it in one step, and Sun Yaofei and Yi Wu, who were with him, also rushed up.

Then Mou Xing, Chu Dong, Xi Muxue, Su Tang, Zhu Han and others went inside one after another.

The red circle is constantly flickering, and every time it flickers, the person entering turns into an afterimage and disappears.

Wang Xuan was not in a hurry, but beckoned Gu Manyao and Tie Jun to come over, and walked in with them.

This rune stone carving is four or five meters in diameter, and it can accommodate many people at one time.

Wang Xuan felt a flash of red light in front of him, and when the light faded, he took Gu Manyao and Tie Jun to the teleportation channel of the central city.

A lot of people had come in before him. People like You Kai and Mou Xing were familiar with the road, and they rushed to the "built" building immediately.

Like Wang Xuan, they all took advantage of these two days to complete the material tasks and obtain auxiliary materials to create higher-level equipment.

The people who came in for the first time looked around curiously, and then hurriedly went to the row of buildings with various names hanging, and carefully studied the various functions of this central city.

Wang Xuan took Gu Manyao and Tie Jun towards the "build" building.

More and more people are pouring into the central city. The central city, which has been quiet for many years, has become so lively for the first time.

Soon, more than 200 people entered the central city through the teleportation array, and the buildings in this row became very lively. Most of the people entered here for the first time and began to check these buildings.

Wang Xuan entered the "build" place and told Gu Manyao and Tie Jun the function here.

"As long as there are enough crystal scales, you can directly buy a set of ghost equipment from the armor. I have the materials for making it, and you can directly make the ghost set into a higher-level ghost set."

As Wang Xuan spoke, he took out the full set of ghost suits on his body and began to prepare for it.

Although he has 140 medium crystal scales, in order to create this ghost suit, in addition to the main material ghost equipment and five auxiliary materials, each piece of ghost equipment needs an additional 20 medium crystal scales, five 100 pieces are required.

Gu Manyao and Tie Jun were stunned, and they knew more and more that the crystal scales needed to enter this place were amazing.

"You can go to other buildings first. In the 'skill' building, the primary skill stone gate is useless to you. Don't waste crystal scales there."

Wang Xuan knew that it would take a while to build flawless equipment, so he asked Gu Manyao and Tie Jun to go to Central City to get acquainted with it.

The two nodded and left together.

Although most of the people who enter here are the leaders of the five major forces in each town, they can collect the crystal scales paid by everyone in their respective towns. Very few came down. All the crystal scales received this month have been handed in. It has only been a few days since they lost contact with the five major cities. It is difficult for them to obtain a large number of crystal scales in such a short period of time.

Therefore, when these leaders saw the number of crystal scales needed to spend the most core "building" and "skills" in the central city, they all secretly scolded.

Gu Manyao and Tie Jun left, and Wang Xuan took out a hundred medium-sized crystal scales and began to create five ghost suits.

Seeing that one hundred medium-sized crystal scales were gone, I secretly felt pain, but these hundred medium-sized crystal scales can enter the "intermediate skill" Shimen for an hour.

"No way, I can only do crazy quests to earn crystal scales. It's too slow to pick up 5-star quests, and the 6-star quests in Bug Town are too time-consuming. I don't know how the 6-star quests in the central city are. That's it."

He still has two pieces of parchment in his hand, both of which are six-star dangerous tasks, and they are all related to Insect Town. The first is to "steal insect eggs". He needs to sneak into the insect country

and steal an egg of a king insect. See The content of this task is not simple. Now Wang Zong is suspected of being awakened by the accident in Zong Town. He wants to steal insect eggs now, which is basically the same as sending him to death.

The second six-star mission is "Cerber's Call", which requires entering the Hell Tower and hunting the hellhounds hidden in the Hell Tower.

He had been to the Hell Tower before, and he knew that it was quite difficult, especially when some super-powerful people from Hundred Towns entered it. Under the influence of a certain force in the Hell Tower, they were attacked by the hatching beasts and became the fallen or lost. , These are the real super powerhouses. It can be said that entering the Hell Tower is considered a crisis.

"Because the No. 8 elevator was out of order this time, the leaders of the towns needed a **** clown mask if they wanted to take the No. 9 elevator up. They could only enter the **** tower. I'm afraid that many leaders would die inside. The five leaders went for two days and didn't come back, most of the regiments were destroyed, but unfortunately..."

While waiting for the forging of the five ghost suits, Wang Xuan was thinking about how to get the crystal scales as quickly as possible. When he thought of this, his heart suddenly moved.

The five leaders of this stone town may have been destroyed in the **** tower. If I can get their storage belt, isn't it a fortune?

"Yes, according to what Wan Qianying and Xu Jian said, I don't know how many superpowers have been lost in this **** tower. Especially this trip, it is estimated that many town leaders died in it. , it is impossible for everyone's storage belts to be taken away, there are always lost in the **** tower and not taken away, or a few people are completely destroyed in it, as long as a few can be found, then the harvest will be great, A person who can become the leader of a hundred towns, no matter how poor he is, there are at least dozens of medium-sized crystal scales, even if there are hundreds of them, it is not uncommon..."

Thinking of this, Wang Xuan was immediately moved, and he wanted to fly to the **** tower immediately. He understood that if he could think of this, it might not be unthinkable by others. Maybe it was too late, and it might be picked up by others, and anyone who dared to enter the **** tower casually must be All are real strong.

Seeing that Yukai, Mou Xing and the others were all waiting for the forging of the equipment, they didn't talk to each other. I don't know what thoughts they were thinking about, or maybe they were thinking of something with him?

From time to time, people enter here, look at the screens around these forging furnaces, check the information and introduction, and show surprises on their faces.

Finally, fifteen minutes passed and the forging was completed. Wang Xuan took out the five pieces of equipment that had been forged one after another, and checked the information one by one with the eye of the illustrated book.

Spectre helmet, third-order flawless quality, enhances hearing and vision by 30.

Ghost Armor, third-order flawless quality, increases stamina recovery and wound healing speed by 30.

The rest of the ghost knee pads, ghost handguards and ghost boots are all third-order flawless quality, one increases physical fitness and body strength by 30, one increases strength and instantaneous explosive power by 30, and one increases movement speed and bounce power by 30.

Wang Xuan put on the five ghost equipment one by one.

Compared with the high-quality ghost suits, this flawless ghost suit is more delicate. The ghost suit, this ghost suit is more personal, more delicate and beautiful, Wang Xuan waved his hand gently, feeling the indescribable comfort, it seems to have no weight.

With the five pieces of ghost equipment put on, the various attribute abilities that were originally increased by 30 were immediately increased to 34. Not only that, he sensed that the energy spar in the five-piece suit resonated with each other, and the energy of all the spar Fusion into one, merged with his body, and a message appeared in it, the "ghost sneak" ability of this ghost suit was successfully activated.

"Ghost stealth is a skill that enhances movement."

Wang Xuan sensed this ghost's stealth ability, and his heart moved slightly. This ability can increase the speed of people when they move and move, and can enter the stealth state. The action is silent, very suitable for sneak attacks, and it is a very powerful and applicable skill.

After finishing the forging, Wang Xuan didn't stop, turned around and left immediately, only to find that Youkai, who had completed the training one step earlier than himself, was heading towards the teleportation array in the central square.

"Did he really think of going to the Hell Tower?" Wang Xuan frowned slightly.

At this moment, Youkai has made the original full set of silver scales into a flawless golden scale suit. This golden scale suit is very beautiful. The original silver scales have golden lines on the surface, which looks gorgeous and extraordinary. Wang Xuan knows this "gold scale suit". "The skill is the body of golden scales, which should be a main defense skill compared to ghost sneaking.

Watching Yukai enter the central teleportation channel, he quickly disappeared.

Wang Xuan frowned, and at this moment he saw Gu Manyao and Tie Jun walking out of the "Material" building on the side and walking towards him.

"Wang Xuan." Gu Manyao was very happy.

Chapter 237

Wang Xuan saw that Gu Manyao had turned into a full set of ghost equipment. She originally had two pieces on her body, but now she bought three more pieces.

Tie Jun originally had a ghost knee pad on his body, but now there are three more, and a ghost gauntlet is still missing.

This ghost equipment is not expensive. For each piece of ten medium crystal scales, Gu Manyao and Tie Jun spent thirty medium crystal scales each to buy three pieces each. Of all the savings, most of them were earned by doing the task yesterday, and I couldn't afford any more.

Seeing the two excitedly approaching, Wang Xuan took out ten medium-sized crystal scales and wanted to buy a ghost gauntlet for Tie Jun, and helped him gather a set of ghost equipment.

Tie Jun hurriedly shook his head and refused, saying: "I'll do the task later, and I should be able to earn it soon. There are too many places where crystal scales are needed, and I can't ask you for them."

Wang Xuan frowned and said, "Why are you being polite with me? Hurry up and take it. Get a set first and then talk about it."

When he said this, his heart moved, and he thought of taking Gu Manyao and Tie Jun to enter the **** tower together. This **** tower has nine floors, which can be said to be dangerous. Qualified to leave this building.

Now both Tie Jun and Gu Manyao's strength are above the super-moderate level, especially the energy contained in Gu Manyao's "Blood Erosion" that even he can't see, she just lacks a strong enough opponent to sharpen it.

It is not difficult to break into the first floor of the Hell Tower by yourself, but it is hard to say after that. No matter how strong your personal strength is, there will inevitably be miscalculations or careless mistakes. If there is a mistake, there is a risk of death.

If you bring them and take care of each other, the situation will be completely different. Maybe you can try to break through a few more floors, just to use the Hell Tower to sharpen and improve their strength.

With this idea, he opened his mouth and said, "Brother Tie, hurry up and buy it. Later, I will take you to a somewhat dangerous place. If you are lucky, you may have a good harvest."

Hearing what Wang Xuan said, Tie Jun didn't refuse any more, he bought a ghost gauntlet, and finally got together a set of ghost equipment.

Wang Xuan thought that this world has the ability to purify itself. If the corpse is not treated for a long time, it will be slowly melted away, but the equipment will not. If the **** tower has really killed a lot of super-powerful people, there must be some lost. equipment.

"Go." Wang Xuan took the two of them to the teleportation channel of the central city.

As they walked in, a red aperture appeared in the transmission channel, surrounded by ten numbers, of which the numbers nine and ten were glowing, and the rest of the numbers were gray, appearing very dark.

This means that from the transmission channel of the central city, it is currently possible to teleport to the No. 9 safe area and the No. 10 safe area.

Wang Xuan placed his hand in the aperture of the number nine, and soon the red light rose up and enveloped them. When the red light subsided, they returned to the safe area of number nine.

Now the No. 9 safe zone has become deserted and deserted. Originally, almost 200 people have arrived in the central city. It will take some time to get familiar with the central city, so now there are very few people who return here, except that he saw Yukai entering the teleportation channel before. , did not see a single person.

"Wang Xuan, where is the dangerous place you just said?" Gu Manyao followed Wang Xuan and asked quietly, looking a little nervous and excited.

It must be very dangerous if Wang Xuan can also talk about the dangerous place, but with Wang Xuan, she is not afraid, and she is still a little excited.

She has finally narrowed the distance with Wang Xuan now and can fight side by side with him.

She had just fought against the humanoid monster. She almost lost her life because she couldn't control the power of blood erosion. She still had to rely on Wang Xuan to save herself, which made her very ashamed. strength.

She didn't want to rely on Wang Xuan to save herself all the time, she hoped that she could help him.

"It's the Hell Tower. I have an idea. If we are lucky, we may be able to get a lot of crystal scales. Of course, it's hard to say how."

Seeing that there was no one around, Wang Xuan said his thoughts while walking towards the elevator to "Insect Town".

"I'm afraid that someone before me had a similar idea and picked up the lost storage belts and equipment one step ahead of time, but I think there must be some omissions. This time, because of the failure of the No. 8 elevator, there are hundreds of towns. Hundreds of leaders basically went in, and they suffered a lot of damage. It was only a few days before and after. It is impossible for another powerful person to enter the **** tower and take away the relics of these dead leaders. We only need to pick up a few. It's better than doing it for days at a time."

Wang Xuan thought that according to what he had seen before, among the more than 200 leaders who were still alive, the strongest one was Wei Zixuan from "Wang Town". Except for a few people who dared to enter the Hell Tower at will, the others were considered to have entered. , don't say whether you can find this relic, I'm afraid it will be difficult to protect yourself.

When Gu Manyao and Tie Jun heard about it, they both showed an excited look. If Wang Xuan can get a lot of crystal scales as Wang Xuan said, Wang Xuan will naturally take the big head, and they can also drink some soup. The harvest will definitely be better than the task.

Taking the elevator, the three of them returned to "Insect Town" very heavy.

The "Insect Town" was still the same, and the square was busy with people coming and going. Wang Xuan led Gu Manyao and Tie Jun straight towards the north gate.

Soon it went deep into the northern insect country and went in the direction of the Hell Tower.

All three summoned mechanical beasts. Although they encountered many Zerg attacks on the way, such five-star dangerous monsters could not cause them any harm at all, let alone stop them.

The three of them drove straight in, and after half an hour, they arrived at the Hell Tower.

When he came to the Hell Tower, Wang Xuan launched a fusion, and the little boy turned into a rainbow light and attached to him, forming a mechanical shell.

Seeing that Wang Xuan and Xiaojiao were combined, Gu Manyao and Tie Jun were also busy combining with their own mechanical beasts to form a second defense outside the equipment.

"Remember, this place is very dangerous, and it is said that there is an invisible power. People stay here for a long time, and it is easy to trigger the backlash of hatching beasts. Although we don't know whether it is true or false, we also need to pay attention. If you feel something wrong, you must immediately speak out."

"Yeah." Gu Manyao nodded, and then revealed his demon chi knife.

With a look of alertness on Tie Jun's face, he summoned the King Kong Shield.

The two followed Wang Xuan and entered the nine-story tower. When they entered the tower, they saw a huge cave on the ground. From this cave, they entered the first floor of the real **** tower.

Wang Xuan took out three bottles of primary night vision water, drank a bottle himself, and gave a bottle to Gu Manyao and Tie Jun each.

Although he had lighting crystals, it was not as convenient as this night-viewing water. After Gu Manyao and Tie Jun drank it, they found that the cave that originally seemed pitch-dark became clear.

"I take the lead, you all follow me, this is the first floor of the **** tower, the most common monster in it is the **** clown, the strength is stronger than the general super state, but not as good as the super state, your current strength is stronger than it, don't be afraid, the main thing is to beware of the Fallen."

As Wang Xuan spoke, he slid down the edge of the cave. Four metal tentacles extended out of his right hand, protecting him around his body, followed by Gu Manyao, and finally Tie Jun, who protected the Vajra Shield behind him.

The three of them slid down the smooth **** in the cave. Inside was a huge passage, about 20 meters wide and 20 to 30 meters high. The walls on both sides were engraved with some complicated symbols, which looked like some kind of text, but Wang Xuan did not know.

After the three of them landed, they stood in a zigzag shape. Although it was dark and dark, the three of them drank the water of night vision and could basically see the surrounding environment clearly.

"Go." Wang Xuan took the lead, with four metal tentacles, one guarding the top of the three people's heads, two guarding the sides, and one extending forward.

"Remember not only to look around, but also above your head."

When Wang Xuan was exhorting, a black shadow suddenly rushed out of the slanting darkness, looking at the human-headed dog wearing a clown mask, it was a **** clown.

Wang Xuan's strength is much stronger than the last time he came. Now, looking at the speed at which the **** clown throws out, he suddenly finds that it is much slower than the last time he saw it.

Wang Xuan knew that it wasn't that the clown of **** was really slowing down, but that his strength had been surprisingly improved, his vision capture ability, reaction ability, and speed were far stronger than the last time. In contrast, in his current eyes it seems that the speed of this **** clown is much slower.

With a "snap", a metal tentacle swept out in the air, like a bolt of lightning, circled behind the **** clown, from back to front, instantly hit the back of its head, knocking its brains apart, with a The clown mask flew out immediately.

Another metal tentacle stretched out and wrapped the clown mask back.

Wang Xuan threw away the blood on the clown's mask and put it away in the Xumi mustard seed space.

Killing a **** clown easily, Wang Xuan's attention was on the ground around him.

He didn't come here to kill the enemy, but mainly to find the relics left by the dead superpowers here.

When Gu Manyao and Tie Jun noticed the **** clown, they were just about to shoot, but they didn't want Wang Xuan to kill him in an instant, so they stopped again.

Wang Xuancheng looked at the ground around him, but he didn't notice it, so he continued to move forward.

Going all the way along this giant passage, I soon encountered the attacks of three **** clowns in a row.

Wang Xuan killed one first, watching their situation while paying attention to the surrounding overhead.

Gu Manyao is very serious, even if he is dealing with this kind of **** clown who is not as strong as the super state, he will go all out.

She learned from the previous experience of fighting against the winged Agatha, and the power of "Blood Erosion" extended to the entire Yaochi Saber. While attacking, she was trying to control and understand the strength of this power change, how to attack to be more perfect Unleash the power of blood erosion.

With a snort, blood surged from the neck, the **** clown was cut off by her knife, Gu Manyao pulled back the knife, she just swung the knife at will, it didn't seem to use much force, but it was very precise. The **** clown beheaded and made it impossible to dodge.

She was enlightened.

Tie Jun's strength is not as good as her, but it is not difficult to deal with the clowns of hell. Wang Xuan sees that his current strength is between super-moderate and superior. As long as he sharpens it a little, he can truly exert the power contained in his body and break through to the top. It's not hard to wait.

After all, he has obtained a lot of energy spar, and has also comprehended the primary hatching beast skills. In any case, it is not only his current strength, but he just lacks the experience of fighting enemies of similar strength.

This way, Wang Xuan kept mentioning the appearance of the Fallen, but he did not encounter the Fallen, nor did he find any lost equipment or belts along the way.

His brows were slightly wrinkled, and now he was a little scared to be rejoicing, and the gap in his heart was huge.

After that, they encountered four **** clowns, and they were all killed relatively loosely by the three.

Wang Xuan put these clown masks into the Xumi mustard seed space. Finally, they reached the end of the giant passage and saw a stone wall with a door.

The last time he saw a lost person in this door, and a bunch of **** clown masks, now I don't know if the lost person is still inside.

He made a gesture towards Gu Manyao and Tie Jun, telling them not to make a sound, and then approached Shimen lightly.

This stone gate has been opened, Wang Xuan looked into it, and there was nothing inside, nothing.

The half-human body that I saw last time, the half-body melted and festered, has disappeared.

At the end of this stone gate, there is a staircase going down, through which you can enter the second floor of the Hell Tower.

Although the Hell Tower looks from the outside, there are nine floors on the ground, but after entering the interior, it is completely upside down and needs to go down, becoming nine floors underground.

Wang Xuan walked in, glanced around, and found nothing, so he walked towards the stairs that went down at the end, and now he can only enter the second floor of the Hell Tower to see.

If there is no discovery on the second floor, it can only mean that his speculation is wrong, and there is basically no chance of smuggling.

Just as he walked to the stairs, he suddenly felt uneasy in his heart, and immediately understood something. The surface of the four metal tentacles that he extended to all sides immediately lit up with a blue dim light.

In this staircase, a black shadow was curled up. When Wang Xuan approached, the curled shadow suddenly attacked and wanted to sneak attack.

It's a pity that Wang Xuan's Warcraft instinctive warning can instantly sense something bad. One of the metal tentacles is blocking the front and the other is above, on both sides. It can be said that no matter which side the enemy appears from, his metal tentacles can resist and counterattack. .

"Bang" with a soft sound, the shadow grabbed a claw covered with black scales, which was blocked by his metal tentacles. The force on this claw was very strong, and his metal tentacles contained blue crystal scales. Even with the strength, it was not able to completely shake its claws.

Taking a step back, Gu Manyao and Tie Jun spread out from left to right, only to see this black figure standing up, a monster with black scales all over its body, half-human and half-beast, its face still kept a small half-human face. The face, it can be seen that it was originally a woman, but most of the face has become black scales, one eye is a human eye, and the other eye is a snake eye, no matter which eye is filled with ferocity. light.

Obviously, she used to be a powerful super-powerhouse, but now she was attacked by the hatching beast, completely lost the reason and soul that human beings should have, and turned into a monster that only knows how to kill.

Through the power she just shot, Wang Xuan now has at least super-class combat power after being attacked by the hatching beast.

After turning into a monster, her body turned into a beast, and she no longer had any armor and no storage belt.

Wang Xuan saw it in his eyes, sighed secretly, his right hand turned into a giant arm of beast, and slammed into the air.

The giant arm of the beast and the power of the blue crystal scales, his punch surpassed the super-class in terms of speed and strength. The fallen man in front of him didn't have time to dodge or resist, and was hit in the head by his fist. her life.

A group of white rays of light appeared, submerged in Wang Xuan's right hand, and then absorbed by his ghost wings.

"This is the Fallen?" Gu Manyao and Tie Jun looked at the Fallen who was half-human and half-beast, and looked at the terrifying appearance of her body mutation, and they were a little scared.

For those who have hatched beasts, being devoured by hatched beasts and turned into monsters is their greatest fear.

"Yes, after entering the super state, the stronger the strength, the more you need to beware of the backlash of the hatching beasts, so you must be firm in your heart and find a way to exercise your strong willpower."

Wang Xuan looked at Gu Manyao and Tie Jun and said in a deep voice.

The two nodded slightly, with awe-inspiring expressions on their faces.

"Let's go, let's go down to the second floor and have a look. If you haven't found it yet, then go back."

Wang Xuan didn't see any equipment relics on the first floor, let alone storage belts. He was very disappointed. He knew that he thought too well before, and this trip might be in vain.

Still extending the metal tentacles under the stairs, Wang Xuan went down the stairs first, Gu Manyao followed closely, and Tie Jun held the giant diamond shield and broke the back.

The stairs are very long. Wang Xuan estimated that he went down at least thirty or forty meters, and finally walked down the stairs and reached the second floor of the Hell Tower.

Wang Xuan looked around carefully. It was still dark here. Although he drank the night vision water, he still felt a little gloomy around him. This was a huge room that looked very empty. , there is nothing inside, except for the wall where the stairs are located, there is a giant stone door on each of the remaining three walls.

These three stone doors are all very large~www.mtlnovel.com~ about three meters wide and six or seven meters high. Compared with these three giant stone doors, the three of them are like dwarfs who broke into the giant's living room.

"Where are we going now?" Gu Manyao asked softly.

Wang Xuan frowned, looked at the giant stone gate that was closed on three sides, and said, "Let's take a look, I hope we find something, let's go to the left first."

As he spoke, he walked towards the stone gate on the wall on the left.

There are still three or four meters away from the stone gate, he stopped, and released two metal tentacles, separated by three or four meters, against the stone gate, and slowly pushed inward.

Although the stone door was tightly closed, it looked huge and heavy, but Wang Xuan only exerted a little force, and the stone door was slowly pushed open.

As the stone door was opened, a layer of ash was sprinkled on the stone door, which looked like it had not been opened for a long time.

Wang Xuan held his breath to prevent poisonous gas from escaping from the Shimen, and looked inside at the same time.

Chapter 238

When the stone door was completely pushed open, and it was confirmed that there was no danger, Wang Xuancai slowly approached and saw that the stone door was another room with some tables and chairs. , there are some books stacked on the table.

The three of them were all looking inside, with surprised expressions on each other's faces.

Wang Xuan thought about it and took out a lighting crystal. Although he drank the water of night vision, he could see in the dark, but after all, his vision was not as good as during the day. , the inside immediately became slender.

After making sure that no monster was seen, the three walked in. Wang Xuan found that the tables and chairs were all made of wood, and the table in front of him was a head taller than him.

Using the metal tentacles, he took down several thick books from the table, all covered with ashes.

Wang Xuan flipped through it, and the book was full of all kinds of crooked characters, which looked like some kind of text, but the three of them couldn't understand it.

"Why is there such a room in this **** tower? It looks like a study room, but the owner of this study room should be a giant much taller than us." Gu Manyao looked around and found nothing, and said curiously .

Wang Xuan took the lighting crystal and searched it carefully, but found nothing in particular, he only shook his head and walked out.

After that, he chose the second giant stone door opposite the stairs, still using the metal tentacles to separate a few meters away, pushed it open, and looked inside. This second stone door was also a similar huge room. A study, and this one looks like a bedroom, with a bed placed on it, which is covered with a suspected animal skin, which is used as a quilt.

Wang Xuan took the lighting crystal, walked in, and saw a thick layer of ash on the animal skin on the bed. The room was very empty. If there were dangers or monsters hidden, it was only under the bed, so Wang Xuan was the first. Time took the lighting crystal and looked under the bed.

Looking at it, he really saw something under the bed. Wang Xuan stretched out his right hand, and a metal tentacle stretched in, wrapping the thing under the bed and taking it out.

Gu Manyao and Tie Jun stood on both sides of him on guard, and when they saw the metal tentacles rolled out, they whispered at the same time, "Storage belt?"

There was a faint surprise in their voices.

They came for the relics of the super-powerful who once entered the **** tower. There was no gain on the first floor. When even Wang Xuan was about to decide to give up, he actually found a storage belt here.

The storage belt was also covered with dust, and it seemed that it should have been left for a long time. Wang Xuan blew the dust on it and saw that it was an intermediate storage belt. He opened the storage space and looked inside. a bit.

He immediately saw a bunch of medium-sized crystal scales inside, at least forty or fifty pieces, and a few crystals and various materials.

"There are a lot of materials and dozens of crystal scales in it. I won't look at the specifics. I will wait until I get out of the Hell Tower and then slowly count them. It seems that this trip is indeed the right one. Let's go, let's go and see that. What's in the third stone gate?" Wang Xuan's face showed a look of excitement, and he immediately became full of energy, walked out from here, and walked towards the third giant stone gate.

Gu Manyao and Tie Jun had the same excitement on their faces. The second floor of the Hell Tower was really different from the first floor. It was so easy to pick up an intermediate storage belt.

Soon the three of them came to the third stone door, and Wang Xuan once again used the metal tentacles to push the stone door open.

The dust on the stone door fell down, and Wang Xuan held the lighting crystal in his left hand. Seeing that the stone door was pushed open, he held the lighting crystal and looked inside.

This stone gate is no longer a room, but a huge passage similar to the first floor of the Hell Tower. The passage looks very dark, with a width of about 20 meters and a height of 20 to 30 meters. The end cannot be seen at a glance. , On the walls on both sides of this giant passage, a large number of similar giant stone gates can be seen.

When he looked towards the giant passage, he saw that not far ahead, two figures were sitting against the wall, and a corpse was lying on the ground in front of the two figures. The appearance of the beast is suspected to be a fallen person whose soul consciousness was devoured by the hatching beast.

Wang Xuan was holding an illuminating crystal in his hand. The light was very conspicuous. When he noticed the two figures not far away, the other two were also turning their heads, noticing them one step ahead of him.

The two sides were separated by a distance of more than ten meters and looked at each other. Wang Xuan was suddenly stunned.

One of the two figures was wearing a third-order flawless golden scale suit. A man in his thirties was in the dark. The golden thread on the golden scale suit was faintly glowing, making it very gorgeous and delicate.

The other is a woman wearing a third-order flawless Qinglian suit, about twenty-four or five years old.

Wang Xuan was not surprised to suddenly encounter other super-powerful people here. After all, he had heard that the Hell Towers in Baizhen were connected, but what surprised him was that the pair of men and women were all blond and blue-eyed, with pale skin, and a large number of them could be seen faintly. Freckles, high nose, turned out to be two white people.

Since entering the building, it was the first time he saw foreigners, and he saw two at a time.

The white men and women saw Wang Xuan and the three men and stood up.

Wang Xuan saw that this white man was tall and was afraid of being close to 1.9 meters. Wearing this golden scale suit, he looked very mighty and domineering.

And the Caucasian woman is also relatively stout, with a strong back and a waist, and her height will not be less than 1.8 meters.

Wang Xuan put away the lighting crystal, and together with Gu Manyao and Tie Jun, slowly walked out of the opened stone door.

Looking at the pair of white men and women, and then looking at the fallen body of the fallen, it seems that they should have encountered a fallen here and killed it.

Dare to enter the second floor of the **** tower, and wearing a full set of third-order flawless quality equipment, the strength of the white men and women in front of them must not be underestimated.

"Which town do you two come from?" Wang Xuan didn't expect that there were foreigners in the Hundred Towns, and none of the more than 200 people in the Hundred Towns came up this time. Could they be from the five major cities?

Although I wasn't sure if they could understand their own words, I still asked a habitual question, trying to test where they came from.

Hearing Wang Xuan's words, the white man and woman frowned, then shook their heads slightly, not knowing whether they didn't understand or said they were not from which town, then the man spoke.

Wang Xuan heard that he was speaking English.

Wang Xuan's English is average, especially in spoken English, but he can barely hear what the other person is saying.

The man said he didn't understand what he was saying.

At this moment, Gu Manyao suddenly stepped forward and spoke very fluent English.

Wang Xuan could barely understand the English spoken by Gu Manyao, but Tie Jun was at a loss, apparently completely incomprehensible.

Wang Xuan heard that Gu Manyao was repeating the question he just asked in English.

"We're from Tring, my name is Corbett, her name is Barty, how about you?"

Wang Xuan frowned when he heard Kaobi's words clearly.

In the No. 9 security area on the third floor, there are hundreds of elevators with the names of Hundred Towns. Among these one hundred towns, there is no "Terling Town" at all. Isn't the guy who calls himself Corbett from Hundred Towns?

Gu Manyao introduced the three of them, and she was also a little curious about the sudden encounter with two foreigners here.

"Teling Town... It's not within the Hundred Towns. Could it be that there are other towns besides the Hundred Towns?" Wang Xuan pondered and said, "Manyao, ask him, have you heard the name of our Bug Town? If you haven't heard of it, please report the names of Ghost Town, Sand Town, Fire Town, etc."

Gu Manyao hummed, and communicated with this test bit in English.

Sure enough, just as Wang Xuan guessed, this Kaobi had a puzzled look on his face, and shook his head, indicating that he had never heard of Insect Town, or Ghost Town or Sand Town.

"What other towns are there other than your Trin town?" Wang Xuan asked Gu Manyao to turn the tide for him.

"There are Harry Town, Marsha Town, Gus Town, etc. There are as many as 100 towns, but there is no town you just mentioned."

After Wang Xuan heard what Corbett said, he finally understood a little. Maybe there are another hundred other towns besides their hundred towns. According to the names of these towns, these one hundred towns should be based on these white people. host.

"It seems that the world in this building is far more terrifying and larger than I imagined. This phenomenon is not only happening here, but is happening all over the world. The people in our hundred towns are basically The above are dominated by yellow-skinned people, and the Hundred Towns that Corbett said should be dominated by these white people..."

"It seems that the second floor of this **** tower is not only connected with the hundred towns, but also with the other hundred towns where this Corbett is located. That's why I met them here."

Wang Xuan's mind switched, probably knowing the cause and effect, he began to ask Kaobit about the third-layer world. Every time he said a sentence, Gu Manyao translated it for him in very fluent English.

This Corbett walked towards them while talking, while Nabati didn't speak, just followed him silently.

During the exchange between the two sides, Wang Xuan immediately understood that the third-layer world that the Hundred Towns where Kaobit was located led to was different from the third-layer world they had traveled to before.

As the two sides approached, Wang Xuan looked at this kopit with a smile on his face, he looked very friendly, and it seemed worth making friends, but for some reason, an inexplicable uneasiness suddenly appeared in his heart, which was the instinct of Warcraft.

This kind of unease appeared, and Wang Xuan felt a vigilance in his heart. Although the kobit in front of him looked friendly, he still needed to be careful.

Just as this thought popped into his mind, Kaobit, who was smiling in front of him, suddenly turned his hand, shoveled his right hand, and went straight to Gu Manyao's throat.

He suddenly shot, this right hand strike was as fast as lightning, and there was a faint sound of tearing sonic boom in the air. This shovel could shovel Gu Manyao's neck in an instant, causing her head to fly out.

At this moment, Gu Manyao was communicating with him in English, and in any case, he never expected that the smiling Corbit would suddenly take action.

Barty, who had never spoken, and Corbett seemed to have a tacit understanding for a long time. Almost at the moment Corbett shot, she pounced on it, and a sharp blade appeared in her right hand, stabbing the Iron Army.

She and Kaobet saw that among the three of Wang Xuan, Gu Manyao and Tie Jun didn't even have third-order flawless equipment, so they were obviously weaker, so they had to activate it in an instant, take advantage of it, and kill them with one blow. Kill them first, and then they Two to one, and then go all out to deal with Wang Xuan.

With their strength, they suddenly attacked Gu Manyao and Tie Jun, which was almost guaranteed.

Gu Manyao could only barely blink, with a look of astonishment on her face, but it was too late to dodge or resist, and Tie Jun was not even better than her, facing this sudden attack by Batty, he didn't even have the thought of reacting.

Among the three, only Wang Xuan was able to react, and when he felt uneasy in his heart, he became alert, but he didn't expect that Corbett and Barty would take a shot. At this moment, he wanted to block the attacks of Corbett and Barty at the same time. Impossible.

At the moment of Gu Manyao and Tie Jun's life and death, Wang Xuan exploded his strength and speed to the limit, and even activated the "Ghost Sneak" skill of the ghost suit.

Before he could resist, the only thing he could do was to pounce on Gu Manyao beside him while pulling out the metal tentacle in his right hand.

He pounced on Gu Manyao in an instant, knocking Gu Manyao sideways before Cobit attacked her.

Gu Manyao let out a scream, opened his mouth and spat out a mouthful of blood, Wang Xuan exerted his strength to the limit, the impact was not small, Gu Manyao flew out like a broken kite.

With this shovel, Kaobit shoveled Wang Xuan.

The energy shield, the mechanical shell, and the ghost suit, the three layers of defense could not stop the attack of Kaobit, and it split immediately.

With the ghost equipment being built into a more powerful ghost suit, the defensive power of this ghost suit is not trivial. Although it cannot completely block it, it also reduces the speed and power of Corbett.

Three layers of defense blocked this moment, and Wang Xuan's ghost wings volleyed and shot back.

With a "snap", the shot hit the test.

On the other side, while he was hitting Gu Manyao, the metal tentacles carried a blue light and hit the sharp blade that Barty had stabbed.

A look of surprise flashed across Barty's eyes amid the piercing metal crash. She did not expect that Wang Xuan would be able to use the metal tentacles to hit the sharp blade that he stabbed at Tie Jun while hitting Gu Manyao.

Tie Jun was not stupid, he escaped the catastrophe, and immediately let out a loud roar, the giant golden shield came down, protecting him, and he retreated.

Wang Xuan's eyes shone with terrifying light, although he didn't know why the Corbett and Barty suddenly wanted to kill them, but since the other party wanted to kill them, the only thing he could do was to do everything possible to kill them first. Kill men and women.

The ghost wing slapped Kaobit, and Kaobit whistled lowly, and a terrifying air wave burst out from his body, forming a huge white light. The ghost wing slapped the white light and made a dull sound.

Wang Xuan immediately understood that this Kaobit is definitely the top powerhouse in the super state. With this third-order flawless golden scale suit, his strength is very powerful. I am afraid that he is close to the peak of strength. Not weaker than him.

He and Batty joined forces, although he was not afraid, but as long as Kaobit could block him for a moment, Gu Manyao and Tie Jun would be in danger. With Batty's current strength, he could kill Tie Jun in an instant.

All these thoughts flashed in an instant, and a large amount of white light appeared on Wang Xuan's left arm. These rays of light gathered together to form metal parts one by one. The parts combined, and they made a crisp sound, and they turned into a giant mechanical arm.

Kaobi was just angry and formed a huge white light. There were still golden scales floating in the white light, but the golden scale body of the golden scale suit skill was also activated. These two abilities were combined, and he has reached a super state. The top-level limit is even faintly approaching the super-peak level.

With this strength, even if he can't kill Wang Xuan, he still has absolute confidence to entangle Wang Xuan, and then let Batty, who is not inferior to him, kill Gu Manyao and Tie Jun.

Corbett let out a violent roar, took a step forward, and was about to attack when a radiant mechanical arm suddenly appeared in front of him, slamming heavily on the white light he had just burst out.

Kaobi was about to sneer, but suddenly he felt something was wrong. How powerful is the white light formed by his violent energy combined with the body of golden scales, how can he suddenly be crushed so easily now?

He didn't have time to think about it, and he heard a "bang" in his ears, and his eyes suddenly turned black. He only felt that the world was spinning, and an infinite force seemed to be overwhelming, so powerful that he had no room to resist and struggle.

How powerful is the left arm strike of the mechanical **** that Wang Xuan suddenly launched with all his strength? The strength he has burst out now is close to the super-peak level, and with the left arm of the mechanical god, the power is already incalculable, and he will instantly blast Kaobit together with his golden scale body and violent energy. Explosion, the chest exploded, flesh and blood flew, and the bones that burst out of it shot rapidly.

Wang Xuan had already turned around, and the ghost wings behind him were raised high, suddenly turning into dozens of steel feathers, shooting like a violent storm towards Barty who had just circled around Tie Jun and wanted to shoot.

Barty heard this deafening bang in her ears, and the child holes in her eyes suddenly enlarged. She saw the scene of Corbett's whole body being bombarded, and her face showed a horrified look.

The sound of "chichichi" can be heard endlessly, UU reading www. uukanshu. She exclaimed in shock, and her reaction was a little slow. Although she avoided and blocked most of the steel feathers, a small half of the steel feathers stabbed in instantly, breaking her defense and shooting her into a hedgehog.

The metal tentacles controlled by Wang Xuan turned upside down and fused along his arms, turning into two giant arms of beasts.

As his strength became stronger and stronger, and he was in a state of mechanical beast fusion, after he fully launched a blow with the left arm of the mechanical god, there was still a little physical strength left, which made him pounce at the fastest speed.

Barty's face was twisted and twisted, and he didn't care to pull out the steel feathers inserted into his body. He held both hands. Suddenly, the sharp blade extended and turned into a huge two-meter-long blade, which slammed down towards Wang Xuan. .

Wang Xuan was so precise that he almost rushed towards the giant blade. At the moment when the giant blade was about to cut off his head, he shifted slightly, swung his left arm sideways, and hit the giant blade from the side with a slap.

The giant blade shook violently, and Wang Xuan's right arm of the beast followed closely. At the same moment, he controlled Gang Yu to rush out of this Batty's body, bringing out a lot of blood.

Chapter 239

Barty wanted to back up and dodge, but the steel feathers that didn't want to be inserted into her body suddenly pulled out all of them. She let out a groan and was slightly confused. on her chest.

With a scream, a terrifying force exploded in Barty's chest. Although she was in a state of integration with the mechanical beast, she could not resist the double defense. The mechanical shell and the green lotus suit on her body shattered and exploded in an instant. The monster's giant arm punched a huge blood hole from the chest to the back.

This Barty's vitality is extremely tenacious, and even so, he did not die immediately. He raised his hands to fight back. Wang Xuan used the giant arm of the beast to penetrate her body, lifted her up in the air, and smashed it out.

"Boom", this time Barty's head hit the ground. The material of the ground is special, harder than steel, without any damage. Her head shattered together with the Qinglian helmet on her head, and her brain was splashed out.

Seeing the emergence of a white light, the soul consciousness that was struggling violently was immediately wiped away by the invisible power, and turned into a pure energy, which was absorbed by him.

After successively absorbing the white light energy of Corbett and Barty, Wang Xuan only felt that his second ghost wing vibrated violently, and there was a faint crackling sound inside, and soon grew again, from one meter six to one. For one meter seven, it was only thirty centimeters shorter than his first ghost wing.

Once it grows to two meters, this second ghost wing is truly complete.

All this is a long story. In fact, it only took a few seconds from Kaobit's shot to Wang Xuan's killing of Barty. Tie Jun used the giant diamond shield to protect his body and wanted to intervene, but he was not qualified to intervene. Wang Xuan crashed and fell out, his internal organs were shaken, and he spat out a mouthful of blood. He just got up from the ground and was about to rush to help. Wang Xuan had already dealt with the pair of men and women.

After the mechanical god's left arm struck, it automatically disintegrated, turned into white light again, and merged back into his body. Wang Xuan let out a long sigh of relief. Although he killed these two people, his physical strength was almost exhausted. This mechanical **** The left arm attack is powerful, but it consumes too much stamina.

If it wasn't for the critical situation just now, he had to kill Kaobit instantly, otherwise he wouldn't use it casually.

Watching Wang Xuan slowly sit down and rest, Gu Manyao and Tie Jun stepped forward. Gu Manyao was not seriously injured, and her powerful self-healing ability was working. Seeing that there were no new enemies around, she did not take out the healing water.

"Are these two lunatics? After a good conversation, why did they suddenly attack us?" Gu Manyao looked at the corpses of the two and still had difficulty understanding why the two did so.

Tie Jun said: "Do you want to **** our property?"

He felt that the only reasonable explanation was this. Those who can enter here are all super-powerful people, who do not have some crystal scales and various materials on their bodies. If they kill people and steal treasures, they will easily accumulate a large number of crystal scales they need.

After entering the central city on the third floor, they realized how important this crystal scale is.

Wang Xuan shook his head and said, "It's hard to say, there may be other reasons."

While talking, together with Gu Manyao and Tie Jun, they stripped off the belts and equipment from the two corpses.

Kaobit is wearing a third-order flawless golden scale suit, and his golden scale armor has been blown up by him, which can no longer be repaired, but the other four pieces are intact, and Batty's Qinglian suit, the helmet has been blown up. , although the breastplate was pierced by him, the damage did not exceed one-third, and it was slowly repairing itself. Except for the helmet, the remaining four pieces can be used.

Tie Jun took the golden scale suit, Gu Manyao took the Qinglian suit, and they only needed to build a golden scale armor and Qinglian helmet to get the third-order flawless suit, which saved a lot of crystal scales.

Wang Xuan opened the storage belts of the two of them and took a look. There were a lot of crystal scales and various materials in them, so he put them away, and only waited for the **** tower to slowly count.

While sitting and resting, he still held a bottle of stamina water in his hand. If the situation is not right, drink the stamina water and restore his stamina immediately. Otherwise, there is no temporary danger, just wait for his stamina to recover naturally, which can save a bottle of stamina. water.

Gu Manyao and Tie Jun each changed into the flawless equipment they had just obtained. Although they could not stimulate the equipment skills due to the lack of one piece, their strengths still improved.

Gu Manyao and Tie Jun accompany Wang Xuan to rest, while observing the huge passage that looks very dark, and discussing Corbett, Barty, and the Trin Town and the third-layer world mentioned by them.

"The towns they mentioned are not within the Hundred Towns we know. I think there may be more towns outside the Hundred Towns we are familiar with, and there may even be more than one third-layer world." Gu Manyao State your guess.

Wang Xuan sighed: "There is a possibility, we are still too weak and know too little information, maybe it has something to do with the destruction of the glass column on the third floor, I think the elders in the five major cities seem to know it. Not much."

"Why do you say that?" Gu Manyao asked strangely.

Wang Xuan said about Tang Ruoyu, and said, "These elders don't know that the central teleportation channel in the safe zone can be repaired, otherwise the five major cities must find a way to repair the

teleportation passage in the center of the No. 8 safe zone. Of course, there is another possibility, the damage to the transmission channel in the No. 8 safe zone is too serious to be repaired."

Gu Manyao said in amazement: "This Tang Ruoyu has such a great history. I remember that she was just like us. She was trapped in the underground parking lot of Longmao Plaza at that time. She was also a newcomer like us. She entered a day or two earlier than us at most."

Wang Xuandao: "She is different from us. I suspect she is from a higher floor, such as the fourth floor, or the fifth floor or something."

Tie Jun said: "I don't know what the fourth, fifth and higher floors will be like?"

Gu Manyao said: "The road to the fourth floor is cut off, and it is impossible for us to enter the higher floor. Speaking of which, after the hatching beast has evolved to a super state, will it really come to the end? Wang Xuan, you should You've drawn enough energy, what do you think?"

Wang Xuan's Warcraft has already absorbed enough energy, but there is no sign that it will continue to grow. Hearing Gu Manyao's inquiry, he said: "What I can know now is that this super state has six levels, one is stronger than the other, but when the time comes After the superstate limit, whether it can continue to grow, or what conditions are needed to grow, I don't know."

"The strength of Kaobit and Barty feels terrible. I'm afraid they have reached the top level or even above." Gu Manyao thought of the previous scene, and she still has more than one season in her heart. It wasn't that Wang Xuan suddenly hit her and her head was hit Corbett shoved away.

"Well, at least it's at the top of the super state. It's close to the peak." Wang Xuan expressed his speculation. One-on-one, the strength of Corbett and Barty is probably still higher than Yukai.

Gu Manyao snarled: "They are already close to the peak, and they can be killed by you in an instant, then you are at least the peak, or you have reached the limit of super state."

Wang Xuan shook his head and said, "I don't know either."

Having said that, he stood up and said: "Let's go, I'm almost recovering, let's go and see what's in the stone gates on both sides, this trip is not small, even if there is no harvest next time, we will also go this time. made money."

He took a look at it just now, and the storage belts of Corbett and Barty are quite extraordinary. The number of medium-sized crystal scales in each belt is at least over a hundred.

After releasing four metal tentacles, Wang Xuan walked towards a nearby stone door on his left.

The stone door was tightly closed, and he used the metal tentacles to slowly push it open with a distance of several meters.

When the stone door was pushed open, Wang Xuan immediately saw a huge stone room inside, and a figure in the stone room turned his back to them.

His heart froze, the four metal tentacles controlled by Wang Xuan immediately tightened, and a faint blue light appeared inside.

His Demonic Beast instinct sensed the horror of this figure, which was definitely another powerful existence.

But when he took a closer look, Wang Xuan suddenly felt that this figure was familiar.

When he turned around slowly, he finally saw clearly.

Half of this person's body is human, but the other half of his body is melting and festering, and a translucent viscous liquid is constantly flowing out.

There was nothing in his eye, and he seemed to be at a loss.

The last time Wang Xuan entered the Hell Tower, he had seen him at the end of the first floor. He was a lost person without consciousness, but he never expected that he would enter the second floor now.

The last time I saw this lost person, I felt his strength. Now that Wang Xuan's strength has improved a lot, he still feels that the lost person is terrifying.

There was nothing in the huge stone chamber, only the lost man wandered in it.

Wang Xuan stepped back quietly, signaling Gu Manyao and Tie Jun not to make any noise.

Gu Manyao and Tie Jun also saw the lost man. They originally wanted to make a move, but after seeing Wang Xuan's gesture, they could only follow him back.

It wasn't until he had exited more than 20 meters that Wang Xuan said in a low voice, "That's called a lost person, there's no need to alarm it, go." With the two of them, they walked along the giant passage and walked towards another stone gate.

There are a large number of stone gates on both sides of this giant passage, but each stone gate is separated by a distance of dozens of meters. They left the stone gate where the lost person was, and soon arrived at the second stone gate.

Wang Xuan still quietly opened the stone door with his metal tentacles, and then looked inside.

This stone gate is also a huge dark stone room, with a length and width of 20 meters. There is a round stone pillar about one meter high in the center. On the stone pillar is a stone ball the size of a basketball, which is stained with blood. There was a human corpse lying on the side.

Looking at the corpse wearing a full set of Qinglian suits, it is obviously not weak.

Apart from the corpse and the round stone pillar only one meter high, there was nothing else in the stone chamber.

Making sure he didn't see a monster or any danger, Wang Xuan took out the lighting crystal and walked in.

After approaching, I noticed that the deceased who fell on the ground had pale complexion, large pores, and very rough skin. This was another Caucasian man, about twenty-seven or eight-year-old.

From his appearance, he could not tell the cause of his death. The armor on his body was not damaged. It looked like he was sleeping here, but Wang Xuan could sense that the man had lost his breath of life.

"How did this person die here?" Gu Manyao's face showed a hint of surprise, looking at the man on the ground, and at the blood stained on one side of the column: "Could this be his blood? Strange, look There is no blood left on the corner of his mouth, it doesn't look like the blood he spit out, and there is no wound on his body, could it be the blood left by someone else?"

While talking, he looked at the Qinglian helmet on the head of the corpse on the ground.

She lacks a Qinglian helmet now, and with this helmet, her Qinglian set is complete.

Wang Xuan was also curious about the cause of the man's death. Using the metal tentacles, he first took off the storage belt on his body, took a look and put it away. This was the fourth storage belt he had obtained, and then put the corpse on the body. Several pieces of Qinglian equipment were stripped off.

After confirming that there is no problem with these equipment, he gave the Qinglian helmet to Gu Manyao.

Gu Manyao replaced her original ghost helmet, and after putting on this Qinglian helmet, her Qinglian set was finally complete, and her set skills could be activated.

Wang Xuan put away the rest of the equipment, and then looked at the corpse on the ground. The body also seemed to be intact, without any wounds, and it did not appear to be poisoned.

"How on earth did he die?"

Tie Jun squatted down and checked carefully, trying to find out the cause of death of the corpse.

Wang Xuan said: "Forget it, since you can't see it, let's go. A super-powerful person mysteriously died here. Maybe there is some danger here that we don't know about."

Seeing that Tie Jun wanted to examine the corpse carefully, Wang Xuan immediately stopped him. Although his magical beasts hadn't sensed something was wrong, but just in case, he would not let Tie Jun touch the corpse and prepare to take them out of here.

Hearing Wang Xuan's words, Tie Jun snorted, and was about to stand up when suddenly the body's tightly closed mouth was propped open from the inside, a green light flashed, and he fell to the ground. Something drenched on his face.

Suddenly, he was shocked, and he was busy reaching out to grab it, but he saw that the green thing was terrifyingly fast, like a soft-bodied creature, less than the size of a fist, with a tentacle sticking out from it, which instantly reached into his ear, Drill into his ear.

Tie Jun's speed was not as fast as it was, he stretched out his hand and failed to catch it, a trace of fear appeared on his face, and he finally understood how the super-powerful man on the ground died.

This green monster can actually drill into the brain from the seven orifices of a person, destroy and eat the human brain from the inside, and there is no trace of it outside.

Seeing that the green foreign object was about to burrow into his ear, suddenly four metal tentacles appeared silently and opened together like claws, grabbing the green foreign object, followed by the four metal tentacles along the green foreign object. Winding, almost wound into a metal ball without any gap, completely wrapping the green foreign body inside.

Wang Xuan saw that the green foreign body was similar to a soft-bodied creature, without bones, and could fit into a hole as small as an ear. These four metal tentacles were intertwined with each other, and activated the ability of "twisting and strangling", trying to crush it completely.

He reacted much faster than Tie Jun. He was on guard when Tie Jun touched the corpse on the ground just now. When he saw the corpse on the ground suddenly open his mouth, he activated four metal tentacles. Fortunately, the green foreign body completely got in The Iron Army caught it in the ears.

As long as half a second later, this green foreign object got into Tie Jun's mind, and he had nothing to do.

With the launch of "Twisting Strangulation", green juice flowed out through the gap between the entangled metal tentacles.

Tie Jun escaped and was still in shock. He was about to speak when Wang Xuan suddenly let out a low roar: "Get out!"

"Boom", Tie Jun didn't understand what happened, he was hit by Wang Xuan with the shoulder, he let himself go, and flew out of Shimen.

Gu Manyao was very close to Shimen. Hearing Wang Xuan's words, he hurriedly raised his head and found that the corpse on the ground had green foreign objects coming out of its mouth, ears, and nostrils.

What is even more terrifying is that the one-meter-high stone pillar in the center fell silently into the ground and disappeared, and a hole appeared below. At this moment, a woman appeared in the hole, naked, her face, neck, chest and abdomen, and her legs were covered with fist-sized. of sarcomas, these sarcomas are constantly rupturing, with green foreign bodies crawling out.

Their speed was extremely terrifying, they jumped up, and they were as fast as lightning. In just a split second, several of them were thrown on Wang Xuan's body. They followed the mechanical shell of Wang Xuan's body and rushed towards the seven orifices of his head.

And I don't know how many such green foreign bodies are hidden in the body of the corpse on the ground. In addition, the woman who crawled out was covered with sarcoma. In the blink of an eye, it was green and sparkling, which made people's eyes numb.

Wang Xuan reacted quickly and knew that it was not good. He first knocked the iron army away, and while he rushed out, he waved a metal tentacle and grabbed the stone door on one side. The green monsters are all locked inside.

Although he didn't know if the gap in the stone gate could stop these green foreign objects.

His Illustrated Eye couldn't capture the information on these green foreign objects, and he didn't know what their origins were.

Fortunately, Gu Manyao was the closest to Shimen. Seeing that something was wrong, one jumped out, followed by Wang Xuan and rushed out. The two ghost wings behind him slammed, and a dozen green foreign objects that had just jumped over were caught by him. His ghost wings flapped, followed by a bang, and just as he rushed out, the stone gate behind him was closed by the metal tentacles he controlled.

The stone door was closed, and there was a gap below. When Wang Xuan noticed it, he secretly screamed that it was over.

These green foreign objects have been drilled out along this line of gaps.

And several green foreign objects that climbed on Wang Xuan jumped onto his helmet in an instant, and drilled towards his mouth, nose, eyes and ears.

They were too fast~www.mtlnovel.com~ Gu Manyao and Tie Jun couldn't help him, and when they saw the green foreign objects that were crawling out, they all felt fear.

Wang Xuan knew that it was not good. Once they were drilled into it, no matter how powerful he was, he would have nothing to do with them.

It was too late to use the metal tentacles at this moment, so he opened his hands and grabbed towards his head and face.

Just grabbing two with both hands, like grabbing two pools of snot, it seems unspeakably uncomfortable and weird.

Following him, he felt a foreign body entering his nostrils, and a green foreign body protruded part of his body.

In horror, Wang Xuan stretched out his hand to grab it. His speed was faster than the green foreign object. He immediately grabbed the green foreign object in his hand, pulled it out of his nostrils, and threw it hard into the distance.

In just a short period of time, a large number of green foreign objects were drilled from the gap under the closed stone gate. Each green foreign object was only the size of a fist. It's frighteningly fast.

Chapter 240

Gu Manyao and Tie Jun were terrified, no matter whether they launched the monster chi or the giant golden shield, they couldn't resist, and it was too late to escape.

On the other side, some green foreign objects came surging like a tide, not to mention them, even Wang Xuan was in big trouble.

He incited the ghost wings and slapped away the green foreign object that was rushing towards him. He just pulled out the green foreign object that he wanted to get into his nostril and smashed it out. Suddenly, his left ear hurt. He was busy reaching out, but it was too late. A foreign object burrowed into his ear.

Gu Manyao and Tie Jun were horrified, and just now, they were also drilled by a green foreign object down their ears and nostrils.

Wang Xuan's forehead cracked suddenly, the Eye of Fear opened, and he fully activated it. He sensed the strong fear of Gu Manyao and Tie Jun, and even had a trace of fear in his own heart.

These days, his Eye of Fear has been continuously absorbing the fear energy of various human beings and monsters, and a rune that appears in it has become clearer, which means that the power of the Eye of Fear is increasing.

He wants to use the power of the Eye of Fear to capture the fear of these green foreign objects. As long as he can sense and capture their fear, he will have a way to deal with them and then dominate them.

Although this green foreign object is strange and terrifying, it is obviously also a kind of life with self-awareness. It is a life, has self-awareness, and should know fear.

The stone gate that had just been closed was shaking, and a group of green foreign objects rushed in like a tidal wave, and immediately submerged the lower half of the three of them.

While Wang Xuan activated the Eye of Fear with all his strength, he quickly opened the Xumi mustard seed space and held the Book of Giants in his hand.

When I got the Book of Giants, my heart immediately calmed down.

If the Eye of Terror is ineffective, he can only activate the last card of the Book of Titans.

Although he has always been reluctant to use it, the green foreign body has now penetrated into his brain, and any concerns between life and death have been forgotten.

His Eye of Fear had reached its limit, but unfortunately he could not feel the fear of these green foreign objects.

They have no fear, and the Eye of Terror cannot control them.

Seeing that the Eye of Fear was ineffective, Wang Xuan no longer hesitated, squeezed the Book of Giants with his left hand, opened his mouth, and was ready to spray blood upwards.

Suddenly, a chilly aura surged from behind, and in an instant, it was like falling into an ice cave. Wang Xuan turned his head in surprise, only to see that the lost person appeared behind them at an unknown time.

The lost person at this moment, the one eye that originally belonged to humans is no longer empty, but a strange look. He did not look at Wang Xuan, Gu Manyao and Tie Jun, but stared at these green foreign objects, which seemed to reveal a kind of faintness. Very happy look.

Half of its body melted and collapsed, the viscous liquid opened, releasing an invisible and intangible yin and cold breath, which spread like a tide, spreading in all directions.

It is strange to say that wherever this chilly aura spreads, the green foreign objects are feared like snakes and scorpions.

Including the green foreign objects that originally got into the bodies of Wang Xuan, Gu Manyao and Tie Jun, because they were enveloped by the cold aura, they immediately sensed it, escaped from their ears, and rose into the air towards the closed stone gate. Escape in the direction.

Wang Xuan was stunned, holding the Book of Giants in his left hand, he almost spat out blood, summoning the existence hidden at the end of the endless darkness, but he never expected the appearance of this lost person to be able to frighten away these terrifying green foreign objects.

Gu Manyao and Tie Jun were pale and covered in cold sweat. They almost thought they were going to die, but they didn't want to be rescued all of a sudden. It felt like they had come back from a circle before the gate of hell.

Almost at the same moment, the closed stone gate was opened from the inside with a bang, and countless green foreign objects piled up like a mountain. Among the green foreign objects, a woman with sarcoma all over her body appeared.

Her hair was disheveled, the sarcoid on her body was constantly torn, green juice was flowing, and a green foreign body came out of it. The tattered sarcoid quickly shrank and scabbed off, and new sarcoid was expanding and appearing.

The woman's eyes shrank inward, like two black holes. She stared at the approaching lost person, and suddenly a faint shriek came out of her mouth. The shriek was like a sharp needle. Meng Ran pierced into the ears of the three, as strong as Wang Xuan felt a pain in his head, and the group of green foreign objects rushed over again, driven by this shriek.

Wang Xuan ignored the headache, grabbed the Book of Giants in his left hand, and rushed in the same direction as when they were coming and going. Gu Manyao and Tie Jun escaped, and they ran with him wherever they dared to stop.

Fortunately, the green foreign body this time, the target is no longer them, but surging towards the lost.

The lost person who was slowly approaching was drowned by this green foreign object in an instant, and a green hill was formed where he stood.

In just a short period of time, the number of green foreign objects that have appeared has reached tens of thousands.

Wang Xuan ran wildly and turned his head to look, only to see that a large amount of viscous liquid suddenly surged out of the green hills that drowned the lost, and the green foreign bodies were melted and digested wherever the liquid flowed.

In just a short period of time, the green foreign objects that piled up into the hills were in turn submerged by the viscous liquid. A large number of green foreign objects were dissolved and melted in this liquid, and the lost people who had been submerged reappeared. These were dissolved and melted. The green liquid was surging towards his body in an endless stream.

An incredible scene appeared. After most of his melted and festering body absorbed the green liquid, there were signs of growth recovery.

Perhaps, this is why the lost suddenly appeared to prey on these green foreign objects.

How terrifying these green foreign objects are, even Wang Xuan has nothing to do with them, unless he uses the last trump card, the Book of Giants, but when he encounters this lost person, one thing falls to another, no matter how frantically they struggle, they can't resist this stickiness. thick liquid.

The sarcomcovered woman kept screaming, her face twisted, and she looked terrifying. In her screams, more and more green foreign objects rushed towards the lost, but the sticky fluid that flowed from half of the lost's body There are more and more thick liquids, and these green foreign objects contaminated with the liquid seem to meet the fiery ice and snow, melt instantly, form a green liquid, and be swallowed by the lost.

The lost person was slowly approaching, the woman with sarcoma saw that the situation was not good, and began to retreat into the stone gate. The lost person who had been moving very slowly suddenly pounced. This receding sarcoma woman.

The woman was hit by him, and her body couldn't bear the force of the blow, and immediately shattered and scattered.

There is no flesh and blood in her body, and there is no internal organs, only the outer layer of skin and the inner skeleton. Besides, the empty space and also are all piled up with green foreign objects.

As the woman's shell-like body shattered, these green foreign objects scattered and wanted to escape. An endless stream of viscous liquid surged out of the lost person's body, shrouded in all directions, covering all these green foreign objects. Devouring it, it turned into a billowing green liquid, which was absorbed by him, and its melted and festered half of the body was growing continuously.

At this moment, Wang Xuan took Gu Manyao and Tie Jun, and fled back along the giant passage, until they reached the stairs on the second floor, and they stopped after they were sure that the green foreign objects would not chase here.

Thinking of the scene I just experienced, my scalp is numb.

"The lost...why would you save us..." Gu Manyao gasped and reached out to touch her ear, thinking that the green foreign object had just entered her head and escaped from the ear, although it did not cause any damage to her. How much damage, and she has a strong self-healing ability, even if there is damage to the head, she will quickly recover, but she always feels strange psychologically.

Wang Xuan saw better than her and said, "This green foreign object is helpful to the lost person. It was their appearance that attracted him."

There was a hint of hesitation on Tie Jun's face before he said: "Wang Xuan, why don't we go back, Man Yao and I will not only be unable to help you here, but will also drag you down. If you were alone, you don't have to think about us. , certainly will not be in danger, if there is no lost person, all three of us..."

Wang Xuan knew that he was telling the truth. He brought two people here before, hoping to use the powerful monsters in the **** tower to sharpen them, and secondly, to take care of each other, but he did not expect that the second floor of the **** tower would be so strange. Terrifying, that green foreign object was unprecedented. If he hadn't tried to save Tie Jun, he had knocked him out with his body, but it was delayed for a moment. With his speed and reaction, he would have already fled to the place when these green foreign objects first appeared. distance.

With these green foreign objects, it is naturally even more impossible to catch up with him, but with Gu Manyao and Tie Jun, they have to consider their safety at all times, and this is the trick.

With the terrifying encounter just now, if the lost person hadn't suddenly appeared, he would have been forced to use the Book of Giants. So now that Tie Jun had this idea, Wang Xuan nodded slightly and agreed.

Anyway, this trip has been rewarded. This **** tower is too dangerous. It is really not safe to continue to take Gu Manyao and Tie Jun. Although there is a hole card in the Book of Giants, the Book of Giants is a taboo. It's better not to use it, no one knows what terrible consequences will be after using it.

"Okay, let's go back then."

Wang Xuan didn't say anything more. He walked up the stairs, thinking that if he entered the Hell Tower next time, it seemed that it would be better to enter alone. Although Gu Manyao and Tie Jun said they were powerful, they still couldn't help him. .

Return to the first floor of the Hell Tower, and then continue to go back. There is no danger on this road. It was until the Hell Tower was exited. The dangling heart finally settled down.

Although he was determined, the horror of the Hell Tower and the danger of life and death made him a little unbearable. If he stayed any longer, he felt that he would go crazy.

Of course, he also thought of Wang Xuan's previous statement that there is some invisible power in the **** tower, which will make people's hatching beasts prone to backlash. .

Looking at Gu Manyao again, looking at the look on her face, I'm afraid it's not the same as what I think.

Wang Xuan sat down on the spot, while resting, he opened the Xumi mustard seed space, and took out the four storage belts that he had harvested this time.

Gu Manyao and Tie Jun also sat around.

The three of them shot together, first fell down all the things in the four belts, and then counted them one by one.

Among these things, the crystal scales that caught their attention the most were naturally.

After the inventory, the answer appeared soon. In the four belts, there are a total of 462 medium crystal scales, 374 small crystal scales, 217 bottles of advanced nutrient solution, 47 bottles of primary physical strength water, and primary healing water. 39 bottles, 21 bottles of primary night vision water, 12 defense crystals, in addition, there are explosion crystals, smoke crystals, flame crystals, lighting crystals, and various materials.

462 medium crystal scales, Wang Xuan gave Gu Manyao and Tie Jun 100 each, the remaining 262 medium crystal scales and 374 small crystal scales were kept by themselves, and the other things, except the defense crystals, Wang Xuan himself has stored a lot now, but he didn't pay much attention to it, so he divided it into three parts, one for each person.

Tie Jun was very embarrassed. He felt that he and Gu Manyao were basically here to make soy sauce. Not only did they fail to help, but they dragged their feet. Now that Wang Xuan gave them so much, he felt uneasy.

Wang Xuan insisted on giving them to them. Now that he knows the situation in the Hell Tower, next time he comes alone, he is confident that he can harvest more crystal scales. On the contrary, Gu Manyao and Tie Jun want to earn crystal scales, and for the time being they can only rely on task done.

262 medium-sized crystals were harvested. Wang Xuan now has 292 medium-sized crystal scales and 428 small-sized crystal scales. The number of advanced nutrient solution reached 233 bottles, 49 bottles of primary stamina water, 16 bottles of primary night vision water, 38 bottles of primary healing water, 9 defense crystals, 59 explosion crystals, 47 smoke crystals, and flame crystals. 34 pieces, and a number of other equipment.

Gu Manyao and Tie Jun's mechanical beasts also successfully obtained the "medium state" powertrain, and Wang Xuan's little girl is equipped with a medium-state green-patterned mechanical armor. Now, among the six kinds of crystals in Xiaojiao, there are already three medium states. The other three are initial states.

After all the things were distributed, Wang Xuan looked up at the darkening sky and said, "Just in time to return to Insect Town, you can rest for a while, and you can go up tomorrow morning, yes, although you have a hundred medium size now. Crystal, but don't go to the primary skill Shimen, waste medium crystals, Manyao, your current strength, you can try your luck in the intermediate skill Shimen, Tie brother, it is best to sharpen it, strive to achieve super status, and then Enter the intermediate skill stone gate."

After that, he talked to Gu Manyao about how to find the right energy spar after entering the intermediate skill stone gate.

After returning to Insect Town, the three stayed in Insect Town to rest for the night. The next morning, they took the No. 9 elevator and entered the third-layer world again.

Perhaps because of the early morning, the area around the No. 9 safe area was very quiet. Neither the humanoid monster appeared, nor were the monsters such as the tree demon and the giant forest wolf that rarely attacked the mask.

The three entered the teleportation channel in the central area and soon teleported into the central city.

Although it was early in the morning, everyone in the central city was already busy.

Of the more than 200 people who entered Central City yesterday, many of them did not leave, but stayed here for the night. They need to be familiar with the place, and those who have some crystal scales on hand will basically enter the primary skill stone gate and try it out. When the crystal scales are not enough, it has to stop, and then consider "building" to complete various tasks of collecting materials.

The three of Wang Xuan entered here. Except for Tie Jun, who was missing a piece of golden scale armor, Wang Xuan and Gu Manyao were wearing a full set of third-order flawless equipment. This flawless equipment had a relatively obvious glimmer flowing on the surface, which was more expensive than fine equipment. Much more beautiful and gorgeous, they appeared here and immediately caught the attention of some people.

After all, everyone only entered here yesterday, and now they are basically still wearing excellent third-order equipment, and only a few people can wear flawless equipment.

Wang Xuan ignored the strange look of these people, walked out of the teleportation channel, and was about to go to the "skill" building when suddenly a rhino's roar came from a distance.

Hearing this voice, Wang Xuan understood that those powerful giant rhinos had appeared again.

With this roar of filial piety, the towering trees in the distance were shaking violently, and groups of giant rhinos appeared from the forest in the distance.

Seeing this, many people climbed towards the city wall one after another, wanting to see what happened.

After Wang Xuan's experience last time, he was very calm. The defense of the central city was impregnable, and these giant rhinoceros were more or less in vain.

Sure enough, as the giant rhinoceros slammed into the city wall, the two metal pillars on the wall soon began to show their power, releasing strong white lasers, and under the sweep, they immediately killed the giant rhinoceros one by one.

Wang Xuan didn't even go up to the city wall this time, but just raised his head and looked at the two metal pillars in awe. There was a faint arc of light flashing on the surface.

Hearing the tragic roar of the giant rhinoceros outside, and the towering trees in the distance shaking violently, Wang Xuan shook his head, and was about to ignore the giant rhinoceros who were still trying to approach the central city. There was a loud rumbling sound.

With this rumbling sound, the towering trees one after another couldn't bear the oppression of the terrifying force, and they were broken and fell down one after another.

You must know that any one of these towering trees is tens of meters high, and it takes unimaginable strength to break them down easily.

A look of surprise appeared on Wang Xuan's face, and when he looked up, he saw a giant beast slowly walking out among these towering trees.

This is a huge white rhino~www.mtlnovel.com~ It looks similar to the giant rhinoceros, but it is much larger. Its head and tail are more than 100 meters long, and it is far away from the virgin forest. Those towering trees, which are slightly shorter than it, were easily pushed down and broken by it, forming a path.

In the central city, everyone who was busy everywhere stopped and looked up, looking at the giant rhinoceros that appeared in the distance, showing a surprised look.

The moment Wang Xuan saw this white giant rhino, he understood, totem.

This is definitely one of the seven most powerful totems in the third-tier world.

Only the totems here have such a huge body.

How many years does it take for a giant rhino to grow to be a hundred years long?

This white giant rhino seems to be walking slowly, but it is actually incredibly fast, and it quickly reached within 100 meters of the central city.
