

Last Building on Earth Chapter 76-80

Chapter 76

Wang Xuan raised his right hand and landed it on his helmet.

With a "porphy" sound, there was a crisp sound of bones shattering from the neck of the tall man. His head wearing a helmet suddenly disappeared, but his chest and back swelled and became larger.

The headless body swayed, took two steps back, and fell to the ground. There was a faint "gugu" sound in his chest, which seemed to be a sound mixed with pain, fear and despair. .

Tie Jun and Li Haotian on the other side opened their eyes wide. They couldn't keep up with their strength and couldn't intervene. When they saw Wang Xuan in danger, they didn't want him to suddenly succeed in counter-killing. Then they watched the head of the tall man disappear, and waited for him to be headless. After the body fell down, they finally saw clearly.

This tall man's head didn't disappear, but even the head and helmet was slapped into the abdomen by Wang Xuan with a palm. As a beginning state, he has extremely powerful healing ability. Not dead, the mouth can still make sounds.

Listening to the dull sound of "gugu" coming from the body, everyone's scalp was numb, and it was impossible to imagine what kind of mentality and feeling the tall man would have at this moment.

After Wang Xuan slapped this palm, his eyes were straight, and suddenly, starting from his right hand, the surface of the skin cracked, and this cracked skin quickly spread to the whole body.

He was covered with armor, and everyone couldn't see it, but they could see a spider web-like crack suddenly appeared on the skin of his hands and face. There was a faint blue light flowing in the crack, which looked extremely strange.

The three-meter-long metal tentacle that extended from his right hand suddenly began to fall apart.

Zhao Lei came back to his senses and saw that Wang Xuan was in a wrong situation, so he rushed over, but found that Wang Xuan had fallen to the sky.

"Wang Xuan!" Zhao Lei was shocked, rushed to Wang Xuan's side, and found that the skin of his whole body was cracked, and there were dark blue rays of light fluctuating in the cracks. Fragments.

At this moment, the tall man whose head was punched into the abdominal cavity finally died after struggling for more than ten seconds. A white light emerged from his right hand, and the consciousness of life inside was crushed and shattered by the invisible force. It turned into a stream of pure energy and poured into Wang Xuan's right hand.

This influx of energy caused the white light in Wang Xuan's right hand to further change violently, expanding continuously, as if it was about to burst.

Wang Xuan, who was nearly unconscious at first, was shaken by the violent change of the white light, and suddenly regained consciousness.

Immediately upon waking up, he felt the pain of tearing all over his body. The energy of the blue crystal scales was out of control, and he ran rampant all over his body. With his current physical strength, he could not bear this terrifying energy, even if he had the powerful self-healing ability of a beast.

In horror, while trying to control the runaway of the blue crystal scales, he used the white light energy in his right hand to repair his body at all costs to resist the damage of the blue crystal scales in his body.

He has just killed three Chukai in a row, absorbing the energy of their hatched beasts. This energy is quite powerful, enough to make his monsters grow to a higher form, but due to the body's self-protection mechanism, the right to survive is above everything else. These energies The white light that had just entered his right hand was released in succession, while offsetting the energy of the blue crystal scales that ran rampant, while accelerating the healing of his body's collapse.

At this moment, an extremely terrifying scene occurred in Wang Xuan's body. Those runaway blue crystal scales were tearing apart his body, and the energy in the white light was accelerating and healing his body. His body was like this. Repeatedly shredded, healed, shredded, healed again...

Wang Xuan couldn't describe the feeling. Fortunately, he was completely integrated with the monster. When the brain received this severe pain, the protection mechanism of the monster was immediately activated, and the brain automatically blocked his pain nerves, making him temporarily unable to feel it. pain.

Tie Jun and Li Haotian on the other side also reacted and surrounded them.

Tie Jun was more cautious, holding military thorns in both hands, he immediately turned to look around, and guarded Wang Xuan, who was on the ground, and stood guard to prevent other dangers from appearing.

Both Gu Manyao and Zhang Haofei were seriously injured, but fortunately, their hatching beasts stimulated a powerful self-healing ability, which accelerated the healing of their injuries. Soon Gu Manyao was able to act, and immediately rushed over to check on Wang Xuan's situation.

"Don't touch him." Zhao Lei hurriedly stopped Gu Manyao when he saw that he was about to reach out and touch Wang Xuan.

His face was dignified, and the "sacred mark" on the back of his right hand appeared. He was looking into Wang Xuan's physical condition, but he could only see that Wang Xuan was in extreme danger. There seemed to be two kinds of energies fighting in his body. Wang Xuan's life and death.

In this case, never touch him casually, so as not to affect him.

Wang Xuan closed his eyes and tried to control the blue crystal scales with all his heart, trying to calm the energy that was running rampant in his body. He couldn't bear it and suffered heavy losses, and because of the excess energy it released, it now remained in his body, but he couldn't take it back. The only chance to survive now is to use the magical beast energy in the white light to offset it.

Of course, if his body is strong enough to support him to continue fighting, then he can easily consume these energy, but unfortunately his body, which has grown to the initial state after assimilation with the beast, is still too fragile compared to the blue crystal scales.

Zhang Haofei also sat up slowly from the ground, speeding up the healing by depleting the energy in the skeleton. The collapsed nose was slowly recovering. He touched his face, which was covered in blood, and then looked at the tall man on the ground. The corpse couldn't help but snorted and spit out a mouthful of saliva.

Seeing that they couldn't help, everyone gathered around Wang Xuan, protecting him and observing the surroundings to prevent new dangers from appearing.

The three people who just appeared and the four-armed green monster corpse on the ground made everyone understand that it was not only them, but other people or monsters, and it was not safe.

Wang Xuan has always been their backbone, and now that Wang Xuan has fallen, they have become extra restless.

Wang Xuan's extremely dangerous situation lasted for two or three minutes. After that, the blue light in the cracked skin faded, and the rate of repeated cracking of the skin also slowed down, and his condition improved.

He opened his eyes suddenly, who had been closing his eyes, and gasped slightly.

"Wang Xuan!"

Seeing Wang Xuan's reaction, Zhao Lei and Gu Manyao were overjoyed, and immediately called out his name and leaned over.

"How are you now?" Although Gu Manyao had no expression on his face, there was deep concern in his eyes.

Wang Xuan squinted his eyes slightly, as if opening his eyes made him feel the difficulty.

He survived the most dangerous moment, but the energy absorbed in the white light in his right hand was almost exhausted. Originally, the energy absorbed was enough for his magical beast to grow again, but now this energy is used to offset the blue crystal scales Energy and healing the body on.

"Unfortunately, if the magical beast can grow again, the strength of my body will definitely be greatly improved. At that time, the energy of the blue crystal scales will not be so miserable as it is now. It's just the first time I used it. Completely inexperienced and don't know how to control convergence."

After experiencing the battle with the blue crystal scales in the body just now, although he was tormented, he was in a near-death situation several times, and the energy that was drawn from the white light in his right hand to grow again was wasted, but Wang Xuan also did not. Not for nothing.

Now that he has a deeper understanding of the blue crystal scales, he has begun to understand how to control the energy in the scales. He believes that if he uses it again next time, even if he can't guarantee safety, at least it won't be like the current situation. Embarrassed, he almost died on the spot.

This alone is the biggest gain. Even if he loses more energy in the white light, he is willing. After all, the energy is lost, and he only needs to work hard and hunt some monsters to make it up.

Wang Xuan squinted his eyes slightly, his anger was like gossamer, Zhao Lei and Gu Manyao had to put their ears to hear it clearly.

"I'm... okay, bring... things... back to... rest area... here... unsafe..."

Hearing what Wang Xuan said, Zhao Lei let out a long sigh and immediately said, "Everyone pack up and go back immediately."

He also understood that it would not be safe to stay here for a long time, but just now Wang Xuan was in such a terrible state that he did not dare to move. Since Wang Xuan said so, he must be able to move. rise.

Several other people also began to collect items and stripped off the clothes and armor of the three corpses.

When the owner dies, these armors become unowned again and can be easily taken off.

The helmet of the stone forest was blown up and could not be repaired. The remaining four pieces of armor were intact. In addition, his fish scale knife was a high-quality weapon, worth twenty crystal scales, but this knife was a big one. reward.

Although the head of the tall man was punched into the cavity, the helmet was not more than one-third damaged, and it had repaired itself well. Li Haotian opened the abdominal cavity with a knife and took it out. The five pieces of armor on his body are still reusable. When I was wearing the leather armor, I found that there was a small bag stuffed inside. I opened the bag and saw that it was filled with crystal scales. There were nineteen crystal scales. In addition, there were some primary nutrient solutions.

The worst part was the black-faced man. He hit the ceiling above, and his bones and flesh rotted apart. More than one third of the helmet, leather armor and knee pads were damaged beyond repair, leaving only the handguards and leather boots. can be used.

Gu Manyao counted the loot he harvested. There is a helmet, two leather armors, two knee pads, three handguards, three pairs of leather boots, a fish scale knife, 19 crystal scales and 9 tubes of primary nutrient solution. It's a huge gain.

Everyone piled these things together. Wang Xuan wanted to stretch out his hand to open his pocket and use the Xumi mustard space to put all these things in, but he found that his left hand was weak, and he could only move a few fingers slightly, but he couldn't take the things at all.

Zhao Lei carried Wang Xuan on his back and said, "Everyone has a few pieces in their hands. Let's go back first. We've been here for too long."

Wang Xuan couldn't fight, he didn't know what to do, he just wanted to go back early, and while talking, he picked up the fish scale knife on the ground first.

Everyone picked up the armor on the ground. Gu Manyao took a leather armor in each of his hands, and was about to leave when there was a light "bang" when a green humanoid monster suddenly appeared on a group of containers facing him.

Chapter 77

This humanoid monster has green skin, and is less than one meter two tall. It looks like a dwarf, but it has four exaggerated arms, and its claws almost hang down to the soles of its feet.

In the middle of its forehead, there is a white crystal scale, which is very eye-catching.

Obviously, if you kill this green gnome monster, you can get a crystal scale.

This kind of monster is not unfamiliar to everyone, and there is a similar green dwarf monster corpse in the passage not far away, which was killed by the tall man and Shilin.

"Be careful!" Gu Manyao shouted, and immediately released the two inferior leather armors that he had just picked up, and the Yaochi Saber appeared, posing in a fighting stance.

A green afterimage appeared in the air. This green dwarf monster kicked its legs on the container and rose into the air. Its four huge arms spread out, and it fell towards the crowd like a weird four-clawed spider.

Gu Manyao took the initiative to meet him, holding the knife in both hands, and slashed towards him.

Zhao Lei was busy putting Wang Xuan down again, holding the fish scale knife he had just picked up in his right hand, protecting it in front of Wang Xuan and looking around to prevent another monster from appearing.

There was a crisp sound, and the green dwarf monster's claws flicked, accurately grasping the Yaochi knife that Gu Manyao slashed over. Its claws were slightly green, and they were stronger than steel, and they were not afraid of the sharpness of the Yaochi knife. , grabbed it, the other paw fell, and it reached Gu Manyao's chest and abdomen.

Zhang Haofei appeared from the side, stretched out his right hand, and stretched out his skeleton claws to about a foot in front of his right hand, grabbing one of the giant arms of the green dwarf monster.

The grip strength of the skeleton bone claws was activated, and only a crisp "click" was heard, and the bones in this huge arm were crushed.

The green dwarf monster let out a terrifying scream, and waved its other paw. Zhang Haofei groaned in his mouth. He was busy letting go and retreating.

Gu Manyao didn't expect this monster to be so good. He was able to grab his own demon chi knife, and after miscalculation, the claw reached his stomach. Fortunately, Tie Jun shot, the army thorn in his left

hand stretched out, blocking the monster's claw, and the army thorn in his right faced the face. stabbed in the monster's face.

The dwarf monster's strength was too great, the Tie Jun's left-handed army thorn just blocked it, but he couldn't hold it, and the army thorn fell off his hand. The monster's claws swung down with a snort, cut open the leather armor on his chest, and grabbed it all the way down. The blood poured out like a spring, almost ripping open his stomach.

Tie Jun's face was twisted in pain, and he fell back.

Gu Manyao reacted, panic flashed on her face, she grabbed the Yaochi knife with both hands, and stabbed it forward with all her strength.

The monster's claws couldn't hold it, the knife pierced along its right shoulder, and Gu Manyao dragged it further to cut off one of its huge arms.

It had four arms, and Zhang Haofei pinched one of its bones, and now Gu Manyao cut off another, and it screamed in rage.

Zhao Lei seized the opportunity, leaped forward, clasped the fish scale knife in his hands, a cross crack appeared on the back of his right hand, and a faint white light flickered inside.

Under the insight of the "first saint", he expected the enemy to be extremely accurate, and seized the opportunity, the fish scale knife stabbed into the center of the monster's back and emerged from the front chest.

The whistling of the dwarf monster suddenly stopped, bowed his head slightly, and his eyes became dull.

This dwarf monster's body is all over the body, and the most deadly key is the heart. Its heart is different from that of humans, and it grows in the center of the chest. Zhao Lei used the "first saint" to detect it, and successfully killed it with one hit.

With his right hand, he pulled out the fish-scale knife, and the green dwarf monster's body swayed and fell to the ground. A faintly radiant white scale appeared in its body and flew into Zhao Lei's right hand.

The strength of this green dwarf monster is terrifying. It is stronger than the average person who has a hatchling beast. Although it is not as good as the beginning of the second stage of growth, it is not much worse.

The faintly glowing white scales contained powerful energy, Zhao Lei felt his "first saint" jumping for joy, which lifted his spirits.

"The key point of this monster is in the center of the chest." Zhao Lei picked up the crystal scale that was peeled off from the center of the monster's forehead, and suddenly remembered that he forgot to tell everyone when he saw the key point of this monster, so he hurriedly added a sentence.

In fact, all of this happened in just a few seconds. Zhao Lei also used the "first saint" to gain insight into the weakness of the monster, but he didn't want to say it because he was afraid that people would misunderstand him, so he added a sentence.

"Brother Tie, how is your injury, can you leave?" Gu Manyao looked at Tie Jun on the side.

Tie Jun gritted his teeth slightly and said, "Yes." Although a huge wound was opened in his chest, luckily the white ball in his right hand was releasing an endless stream of energy, accelerating the healing of the wound.

"Then let's get out of here immediately." Gu Manyao's face was a little anxious. Just one monster just made them look very embarrassed. If there are two more, they will be finished. Now Wang Xuan can't fight, they are too long to stay here. Dangerous.

Zhao Lei was busy carrying Wang Xuan on his back again, and everyone picked up the weapons and armor on the ground, and then ran towards the exit.

Tie Jun's face was covered in cold sweat. He gritted his teeth and held it back, pressing his hand on the split belly. He didn't care whether the wound would split again, and ran after the crowd.

Fortunately, there were no more monsters on the way. Everyone passed through the rows of containers and saw the exit. Gu Manyao sighed and pushed open the door.

Zhao Lei followed closely behind Wang Xuan on his back. All six of them left the "East District" and returned to the curved corridor. Only then did they let go. Everyone's faces were very ugly, and Tie Jun fell to the ground.

During that section of the road just now, everyone was terrified, afraid that a green dwarf monster would suddenly appear again.

"Fortunately...it should be safe here..."

Zhao Lei put down Wang Xuan again and said, "Wang Xuan, how are you?" Seeing Wang Xuan's unresponsiveness, he felt anxious, but fortunately, when he put down Wang Xuan, he blinked.

Wang Xuan didn't even have the strength to speak. Although the rampant energy of the blue crystal scales in his body was gradually subsiding, the energy in the white light in his right hand was almost exhausted.

Everyone stayed in this curved corridor to rest, and Tie Jun slowly recovered from his injuries.

Gu Manyao and Zhao Lei began to distribute the newly harvested equipment.

Although Wang Xuan was lying on the side and couldn't move, Zhao Lei and Gu Manyao gave him a handguard and a pair of leather boots without hesitation.

In addition to the rhino horn helmet, inferior leather armor, and inferior knee pads that he originally owned, the five-piece suit on his body was considered complete.

The rest that could be allocated were a fish-scale knife, an inferior helmet, two gauntlets, and two pairs of leather boots. Zhao Lei got the fish-scale knife and a helmet, Gu Manyao and Zhang Haofei both chose leather boots, and Tie Jun and Li Haotian left the remaining two gauntlets alone. one piece.

In addition to this, everyone just harvested a total of 20 crystal scales, plus the seven remaining in Wang Xuan's hand, it is a total of 27 pieces, which is what everyone has now.

After the assignment, everyone's injuries basically recovered, but Wang Xuan still did not improve. After a few discussions, they decided to return to rest for the time being.

Without Wang Xuan, no one dared to casually enter the Eastern District to hunt monsters.

"Let's go back to rest first. The time for that room should not have come yet. If it passes, it will continue for another day. Anyway, now that I have money, there is no shortage of that crystal scale."

As Zhao Lei spoke, he carried Wang Xuan on his back again.

Wang Xuan's head rested on Zhao Lei's shoulders, hanging weakly. He knew that his current condition was not very good, because the energy in the white light in his right hand was almost exhausted, which caused his body to recover slower. According to the current healing Speed, it will take at least a day or two to fully recover.

After coming out of the curved corridor and returning to the huge hall, Gu Manyao, who was at the front, immediately saw eight more people in the hall.

These eight people were men and women, more or less wearing one or two pieces of inferior equipment,

At this moment, they were gathered at the elevator in the center of the hall. Two of them were trying to get into the elevator, but they were bounced back by an invisible force, followed by two people who didn't seem to believe in evil and wanted to break through. , the result was directly shaken back and jumped back.

Looking at their actions, it looks like they just started to enter this huge hall.

The eight people quickly noticed the sudden appearance of Wang Xuan and six people, and immediately turned around, looking at each other.

"Don't worry about them, we'll go back to the rest area immediately." Zhao Lei lowered his voice, carried Wang Xuan on his back, and walked faster towards the rest area on the other side.

If they suddenly saw these eight newcomers who were suspected to have just entered here, they would be very willing to make friends, but with the precedent of the conflict with the Shilin three people in the "East District", several people were full of vigilance. In the case of details and good and evil, it is better to avoid it first.

The eight people were also watching them. They saw Zhao Lei and Gu Manyao walking towards the other side. The eight of them were chatting in low voices. They quickly unified their opinions. They walked towards Wang Xuan and the others.

"They came over, it seems that they can't avoid it." Gu Manyao whispered softly, seeing the eight people approaching from the front, there was no way to avoid it, so he could only slow down.

The leader of the eight was a man in his fifties. He had a lot of white hair on both manes and was slightly bald. Although he was not young, he had a calm demeanor.

"Hello." The man had a friendly look on his face, and greeted him very politely.

"I'm Cheng Aiguo. My seven companions and I just came here. I don't know where this place is? Everyone is..."

Cheng Aiguo saw that the six people in front of him were a little different from his eight people. They had just come to this huge hall and didn't know anything about the surroundings. He wanted to know something through the few people in front of him.

Although Wang Xuan was seriously injured, he was clear in his heart. He rested his head on Zhao Lei's shoulder, opened his eyes slightly, and saw eight people, six men, two women, standing in front of him.

Among them, the most eye-catching is Cheng Aiguo, who is the leader, with an extraordinary bearing and white mane, and one of the women.

This woman is about 10 years old. Although the clothes on her body look torn and tattered, her face is very white, as if no flaws can be seen, like a lotus flower that is unstained from mud. Very unique dusty smell.

Seeing Cheng Aiguo, Wang Xuan suddenly thought of his father.

His father and Cheng Aiguo look a bit like, especially the two manes are white, but the level of baldness is much more serious than Cheng Aiguo.

In the past few days, although he occasionally thought of his parents and relatives, he tried his best not to think about it. He dared not imagine how his parents would react and strike when they learned that their only son was missing in Longmao Square.

Especially when he is in danger all the time, he thinks more about how to survive and escape from Longmao Square, but he has no time or dare to think about it.

At this moment, I suddenly saw a Cheng Aiguo who looked a little like his own father, and suddenly the deepest softness in his heart was touched, especially when he was seriously injured and weak, the feeling of strong yearning was aroused.

Wang Xuan suddenly felt very uncomfortable. He misses his parents very much, really misses them.

Why did you often get into disputes with your parents over trivial matters in the past? make them angry...

If he can find the certificate of the king and can really leave here, he must be filial to his parents and never make them angry again.

Wang Xuan's head drooped weakly, resting on Zhao Lei's shoulder, and slowly closing his eyes, he heard Zhao Lei's voice.

"Where did you come from here?"

Cheng Aiguo said: "We found an upward passage in Area A of the underground parking lot on the negative floor. There is a door at the end of this passage. When we opened the door and walked out, we arrived here. It was the two doors that read 'Underground World'. ' door."

As he spoke, he turned and pointed to the door on the other side that said "Underground World".

Hearing what he said, Zhao Lei and Gu Manyao looked at each other and realized something in their hearts.

They killed the monsters in the cracks in the walls of the food city, found the stairs up, and entered here, but the eight people who entered the country were completely different. channel.

It seems that if you want to enter here, you do not have to enter through the cracks in the walls of the food city, but there are different passages.

Zhao Lei was about to speak when suddenly a very pleasant female voice sounded.

"He was seriously injured..."

Following this voice, among the eight people, the young woman who was very fair-looking and had a dusty temperament walked out. Her eyes were clear and did not seem to contain any impurities. She looked at Wang Xuan on Zhao Lei's back, her face There was a look of pity on him.

Seeing her approaching Wang Xuan, Gu Manyao immediately stood in front of Zhao Lei and Wang Xuan, with a vigilant look on her face, and said, "What do you want to do?"

"He's hurt so badly that his life is in danger..." The young woman didn't seem to expect Gu Manyao to stand in front of her and question herself, and immediately became a little nervous.

Gu Manyao frowned slightly, thinking that Wang Xuan was seriously injured, anyone with a discerning eye could see it, why do you need to point it out over and over again?

Cheng Aiguo hurriedly said, "You misunderstood. Meng Lian wanted to help him. Thanks to Meng Lian, we were able to come here safely."

"Help him?" Gu Manyao was startled, but showed disbelief, shook his head and said, "Thank you for your kindness, no need."

Wang Xuan opened his eyes slightly, saw this woman named Meng Lian, touched her eyes, felt that her eyes were pure and definitely not a bad person, and even had a faint feeling of compassion.

For some reason, Wang Xuan suddenly felt that this woman named Meng Lian was trustworthy.

"Let her... come over..."

His breathless voice sounded.

Hearing Wang Xuan's words, Gu Manyao was stunned for a while, then stepped aside.

Zhao Lei hurriedly said: "Wang Xuan, how are you doing now." He then looked at Meng Lian and said, "Can you help? How?"

Wang Xuan's situation is so serious now that he really can't think of any way to help him except to let him rest and recover slowly.

Meng Lian didn't speak, she just raised her right arm and stretched out a right hand that looked as white as jade.

Light spots appeared from the back of her right hand, and more and more light spots gathered upwards, and soon they gathered to form a little man the size of a fist.

This little man is made up of light spots, shaped like a baby, with pointed ears, green curly hair, closed eyes, and looks very supernatural.

Zhao Lei and Gu Manyao were dumbfounded. They knew that this should be Meng Lian's hatching beast, but they didn't expect it to be so miraculous that it could summon a villain.

"This is the elf hatched by Meng Lian. No matter how serious the injury is, as long as she doesn't die instantly, she can be cured." Cheng Aiguo saw the shocked expressions on Zhao Lei and Gu Manyao's faces, and introduced with a smile.

Zhang Haofei said: "Elf...grandma, it's amazing...Will there be more amazing hatching beasts..."

Meng Lian summoned the elf, and the elf was suspended in her right hand. She stretched out her right hand and lightly tapped it on Wang Xuan's forehead.

The elf floating on the back of her right hand immediately turned in a circle, let out a faint sound, and threw herself on Wang Xuan's forehead, turning into countless light spots like fireflies.

These light spots spread out in all directions from his forehead, and then penetrated through the skin.

An incredible scene appeared. The cracks on Wang Xuan's skin could not heal for a long time and disappeared, but with the influx of light spots, these cracks began to heal at a speed visible to the naked eye.

Wang Xuan, who was originally weak, only felt that the essence of life was injected into his body from the center of his forehead. The physical energy and strength that had been almost exhausted seemed to be awakened again. This feeling was like a long drought and a sweet rain. They are all happy, and a happy emotion naturally arises in the body.

"Amazing..." Li Haotian watched the cracks on Wang Xuan's face disappear quickly, and looked at Meng Lian with an expression of admiration.

With Wang Xuan's self-healing ability at the beginning, he is helpless to his own injury, but Meng Lian's elf can heal in an instant. Can you imagine the level of this elf's powerful healing ability?

In this world, dangers may be encountered at any time, and the probability of injury or death is too high. If there is a companion who can save the wounded like this, the hope of survival is much higher.

He somewhat understood why Cheng Aiguo said that all of them were able to come here safely thanks to Meng Lian.

Now it seems that this sentence is not touted and exaggerated, but sincere.

As the injuries to his body were gradually recovering, Wang Xuan's physical fitness was also slowly recovering. Immediately, with a little force on his hands, he got off Zhao Lei's back.

Seeing that Wang Xuan could stand, Zhao Lei was surprised and delighted: "How are you?"

Wang Xuan nodded towards him, then said to Meng Lian, "Your name is Meng Lian, right? My name is Wang Xuan. Thank you for healing my wound."

Meng Lian had a smile on her face, then stepped back and returned to the group of eight. She was obviously not good at words. Her face was paler than before, and her spirit was a little tired. She had just summoned the elf to heal Wang Xuan. easy.

After confirming that Wang Xuan had recovered, Zhao Lei and Gu Manyao were all secretly relieved. With Wang Xuan there, they had the backbone. Everyone's mentality was stable. It wasn't like they just escaped from the eastern district, like a bereaved dog, lest monsters appear again.

"Brother Cheng, I don't know what to call these six?" A smile appeared on Wang Xuan's face.

Cheng Aiguo immediately began to introduce the names of the people around him.

Except for Cheng Aiguo and Meng Lian, the other five men and one woman are named Lu Weichao, Feng Yuan, Li Dan, Ma Weijie and Wei Zitao. Compared to Meng Lian, Wang Jing looks much more mediocre, with small eyes and a flat nose. Although she doesn't look good, she has a good figure and looks plump.

Wang Xuan also mentioned the names of Zhao Lei and Gu Manyao. When everyone heard each other's names, they all nodded and smiled kindly. The two sides had gotten to know each other initially.

"Wang Xuan, can you talk about the situation here?" After the introduction, Cheng Aiguo finally couldn't help but ask.

Wang Xuan knew that they had just entered this hall~www.mtlnovel.com~ was full of curiosity about everything here, and for Cheng Aiguo, who looked a bit like his father, he had a kind of intimacy in his heart, and patiently introduced: " The center is the elevator leading to the top, but to enter the elevator, you need to hatch the beasts above the initial opening. The 'entry and exit channel' over there should be the exit from Longmao Square. You need the certificate of king to go out. As for what is the certificate of king , we don't know yet..."

"There is a 'rest area'. As long as you have crystal scales, you can buy weapons, armor, various items, and rest..."

Wang Xuan introduced the situation around him in detail. The eight Cheng Aiguo listened to each other, looked at each other, and most of them looked surprised.

Among the eight, Lu Weichao, who had an inch of hair, couldn't help but said, "Wang Xuan, can I ask you a question?"

Wang Xuan said, "What do you want to ask?"

Lu Weichao said: "I just saw that you were seriously injured. Can I ask how you were injured? Are there monsters here too?"

Wang Xuandao: "There is a corridor over there. There are four districts in the east, west and north. We just entered the east district and encountered a monster, so we were injured."

Hearing what he said, Lu Weichao nodded slightly, oh well.

"Everyone can look around here to learn more. I'll go to rest first." Although Wang Xuan's injury was cured by Meng Lian, his spirit was not fully recovered. This time he activated the blue crystal scales, which greatly damaged his vitality. , he is going to return to rest for a while, it is not easy for him to support now.

Chapter 78

"Okay, then I won't disturb you for now." Cheng Aiguo saw that Wang Xuan's face was not very good, and knew that he was going to rest. After that, Wang Xuan and the six went to the rest area, while Cheng Aiguo and eight went to the rest area." Exit and Entry".

Although Wang Xuan has already introduced the general situation here, they still want to learn about the experiment in person.

He returned to his original room again, and the 24 hours have not yet ended. There is no need to spend another crystal scale. Wang Xuan entered the room to rest. Although his injury has recovered, he is mentally exhausted. .

Wang Xuan gave Zhao Lei a crystal scale, and if he didn't come out after the time limit, let him continue to put in a crystal scale for another 24 hours.

Wang Xuan entered the room, fell on the bed, and fell asleep immediately.

Zhao Lei and Gu Manyao did not go in, but stayed outside so as not to disturb his rest.

The five people sat down on the carpet in the corridor outside, and Li Haotian said softly: "Do you think we should form a team with Cheng Aiguo? That Meng Lian's elf is very useful. If you have more of her, we will have more. A guarantee."

Zhang Haofei said, "I don't know what kind of strength these eight people have. It's not easy to see that they all have one or two pieces of armor."

Gu Manyao pondered: "Cheng Aiguo said that they entered here after passing through Area A of the blackout station on the first floor. We entered the Food City from Area D and came here directly. If they were the same as us at the beginning. Trapped in the negative second floor, I am afraid that it is possible to stay in the parking lot longer than us, of course, if you start to be trapped in the negative third floor and break all the way here, it will be even more powerful."

Zhang Haofei said, "Then if you are trapped in Area A on the first floor, then you will be able to enter here directly?"

Zhao Lei said: "It's possible, but looking at their appearance, their strength is definitely not too bad. As for whether to form a team together, this kind of thing has its own advantages and disadvantages."

"I know the benefits, but where are the disadvantages?" Li Haotian was a little strange.

Zhao Lei stretched out his hand and habitually pushed the glasses on the bridge of his nose. After pushing for a while, he remembered that he was no longer myopic and no longer wearing glasses, so he touched his nose and said, "There are so many people. Well, if you get something, it won't be very good."

Li Haotian understood when he said so.

Zhang Haofei said, "That girl surnamed Meng rescued Wang Xuan. Wang Xuan's eyes went straight when he looked at her. Hehe, based on what I know about men, he would most likely pull her along."

As he spoke, he glanced at Gu Manyao.

Gu Manyao didn't see any expression on her face, and said, "This elf of Meng Lian has amazing healing ability. If there is such a companion in the team, I would be very welcome."

Zhang Haofei closed his mouth after hearing Gu Manyao's words.

Tie Jun said slowly: "Let's talk about what the certificate of the king is, and how to find it?"

He was eager to go home, and was most concerned about the King's Card.

Zhao Lei said: "Judging from the current situation, the certificate of the king is likely to be in the four areas of the corridor. If you want to find the certificate of the king, you can only enter these four areas."

When Tie Jun heard this, his eyes gleamed slightly, and his right hand clenched into a fist.

Li Haotian said: "This East District is too dangerous, I don't know what the other three districts are like..."

Zhao Lei sighed: "No matter how dangerous it is, we have to go in and have a look. We can't be trapped here forever. To be honest, who doesn't want their parents and family? Who doesn't want to go home? If we want to go home, we must do everything possible to find the king's king. certificate."

Li Haotian became silent after hearing him say that. Yes, he also misses his parents, his brothers and friends, and his previous life.

The five were chatting outside, and Wang Xuan was resting in his room. This time he woke up after only an hour of sleep.

After waking up, he felt full of energy, and after sweeping away the sleepy appearance before, his spirit finally recovered.

After stretching, Wang Xuan let out a long sigh, and the hidden dangers caused by the activation of the blue crystal scales were completely eliminated.

Looking at the time remaining in the room, there were still more than three hours, but he was no longer going to sleep any more. The energy in his demon beasts was almost exhausted. He needed to hunt monsters to get enough energy to replenish.

He got out of bed, opened his pocket, and took out a pair of inferior gauntlets and a pair of leather boots. The armor he had obtained from killing the three Shi Lin before, he only lacked the handguards and leather boots, but because of the serious injury, he only put them in. The waist bag has never been worn.

At this moment, blood was dripping on these two pieces of armor. He put on a pair of handguards, discarded his rotten shoes, and put on leather boots. Now, except for his face, almost all of his body is covered in the armor. At first glance, it looks like A medieval knight.

Opening the door, he saw Zhao Lei and Gu Manyao sitting on the carpet in the corridor outside chatting.

Suddenly seeing Wang Xuan standing at the door of the room, Zhao Lei stood up first, with a happy look on his face: "Recovered?"

Wang Xuan smiled and said, "Well, thanks to everyone this time, otherwise I'm afraid I won't be able to come back here."

Zhao Lei said: "You kid, you are polite to us. You have saved us many times, and you still say such kind words to us."

"What about Cheng Aiguo?"

Gu Manyao stretched out her hand and pointed to two adjacent rooms not far away, and said, "They opened two rooms, and it's not long since they entered. They should be resting now."

Wang Xuan snorted, but he was not surprised, and said, "It seems that their choice is the same as when we first entered here."

Li Haotian said: "Wang Xuan, what shall we do next? Wait for them to be together?"

Wang Xuanwei pondered: "They must have gone through a very cruel battle before they came here. In this state of excessive exhaustion, they won't be able to wake up if they don't sleep for more than ten hours. If they don't wait for them, let's go first. Bar."

After speaking, he walked outside first, and the other five followed him out.

Quickly returning to the hall, Gu Manyao said, "Are we still going to the East District?"

Li Haotian hesitated for a moment before saying, "Actually, I think it's quite safe here, there's no need to go to the East District."

Wang Xuan stopped, looked back at him, and said, "Li Haotian, don't you understand? Trapped in this world, if you want to survive, you must work hard to hunt monsters, become strong, and obtain various resources before you can survive. There is hope to live, and then find the certificate of the king and leave here."

Zhao Lei interlaced: "Yes, it seems that it is quite safe to stay in this hall at present, and I haven't seen any monsters, but you must eat and drink, even if you don't enter the room to rest, you need crystal scales to buy food. These crystal scales won't fall from the sky, that's what we need to hunt monsters to get."

Li Haotian smiled bitterly and said: "I know, for example, the certificate of the king that opens the access channel, you said before, there is a high probability that it may be hidden somewhere in these four districts, and what we can do is one district by one district. In fact, I understand what you are talking about, but... the East District is indeed too scary, the dwarf monster with four arms that appeared at that time, I don't know why, I feel that it should be the weakest monster in the East District, Gu Manyao, Zhang Haofei, you all have hatched beasts, ask yourselves, fighting alone, are you opponents of this monster?"

Gu Manyao and Zhang Haofei were silent, fighting alone, they were not opponents of this monster.

Li Haotian sighed and said, "Even if you fight alone, you are not the opponents of the weakest monsters in the Eastern District. Tie Jun and I don't have hatched beasts now. Going in is almost the same as sending them to death... So I was thinking, should we choose that one? In the underground world, go back to the underground parking lot to see, maybe the monsters there are weaker, and we will be much safer."

Zhao Lei snorted and said: "What you said is not unreasonable, this East District is indeed a bit scary, but we have encountered two monsters before, one of which is still a corpse, and we are not sure whether the monster that will appear in this East District is. What level, is this dwarf monster the weakest

monster in it, but how do you say it, the more dangerous the place, the greater the reward. Killing this dwarf monster can get a crystal scale, and the white scales in its body contain energy. It is also powerful, I feel that I only need to kill a few more dwarf monsters, and my ancestors will definitely grow to the beginning state."

Gu Manyao looked at Li Haotian, and then at Tie Jun, and said: "Li Haotian is right, now you two don't even have hatching beasts, it is indeed very dangerous to enter the East District, I think we should all help them hatch first. beast."

Zhao Lei nodded and said, "I agree with this. With hatching beasts, it will be different. If one of your hatching beasts has the ability to heal or something better like that Meng Lian, it will be good for all of us."

Zhang Haofei's eyes lit up and said, "That's true. Now that I know that hatching beasts still have this type, I don't know if there are more bizarre hatching beasts."

Hearing what they said, Li Haotian immediately lifted his spirits. He just said so much, but the actual essence is to hope to get help so that he can also get hatched beasts. Otherwise, he will follow them into the East District, and he can only wait and see. Hunting and killing The monsters can't get their own share, and it is impossible to hatch hatching beasts. On the contrary, if they are careless, they will lose their lives. It can be said that the monsters in the Eastern District are not suitable for the current self and the iron army.

But now everyone agrees to help him and Tie Jun hatch the hatching beasts first, then it will be different, and he is naturally willing to give it a try.

"Let's go, let's go to the East District first to see the situation." After Wang Xuan finished speaking, he walked in the direction of the "corridor passage", and the six people quickly entered the "East District" again.

There are still a lot of containers fixed on the ground, looking like an emptied supermarket.

Wang Xuan led Chao Lei forward, Tie Jun and Li Haotian walked in the middle, Gu Manyao and Zhang Haofei broke off.

There was silence all around, and the six people quickly passed through these containers and saw the passage in the distance.

I met Shi Lin and the three of them in this passage before.

The sound of licking the ground came from far away, and everyone saw five giant frog monsters as big as a round table. These monsters were shaped like giant frogs, with strong blood-red tongues and sharp teeth. They were stretching their tongues to lick. Eat the blood stained on the ground.

These bloodstains were left by the corpses of the green dwarf monster and Shilin three people they had killed before.

When they saw it, the eating was coming to an end. The corpses on the ground were torn and swallowed by them, and even the bones were chewed up and eaten, and now they were licking the blood and debris left on the ground. Meat.

Zhao Lei opened the "Sacred Scar" on his right hand, the cross-shaped crack opened, and a white light faintly appeared inside, trying to gain insight into the weakness and information of this monster.

"It turns out that these guys are called scavengers, and their weakness is the stomach sac hidden in the belly below. As long as their stomach sac is destroyed, the strong acid inside will pour back into the body, and they will be corroded by their own strong acid immediately and die. It's amazing, these guys. The strong acid in the stomach can easily corrode even steel."

Wang Xuandao: "These giant frogs are called scavengers? No wonder there are no other corpses here. It seems that their main function is to clean up corpses."

Gu Manyao asked curiously, "Zhao Lei, your 'first saint' can still see the names and information of these monsters? Why didn't I hear from you before."

Zhao Lei said: "This sage's insight ability is not stable, it may be that the growth rate is not enough, and sometimes it is ineffective. Before, I could only see the weakness of the green dwarf monster, but I didn't know its details. Daofu suddenly saw their information, according to my estimation, the weaker the monster's strength, the more detailed information I can see, these scavengers should not be as strong as those green dwarf monsters."

The six people were talking, and the five scavengers also saw them, and immediately stopped licking the blood on the ground, but made a strange noise, like a baby crying, and rushed towards them.

When Wang Xuan saw the movement speed of these five scavengers, he immediately understood that their strength was slightly weaker than those of Gu Manyao and Zhang Haofei, who had embryonic hatching beasts, and far less than the green dwarf monsters.

According to previous experience, with his current initial state, killing such a monster that cannot even reach the strength of the prototype, it is highly unlikely that it will be effective.

"Tie Jun, Li Haotian, your chance has come."

Wang Xuan took the initiative to move, went up to meet him, stretched out his right hand, and released the three-meter-long metal tentacle.

Zhao Lei charged with the fish-scale knife, followed by Tie Jun and Li Haotian. Gu Manyao and Zhang Haofei were faster than them, and they surpassed them as soon as they accelerated.

Wang Xuan's metal tentacles came into contact with the first scavenger, like a large python, and immediately wrapped around its head. With a tug of his right hand, the scavenger as big as a round table flew into the air and fell heavily. go out.

With a bang, the scavenger turned his feet up and fell to the ground, exposing his white belly.

"Quick!" Gu Manyao shouted, UU reading www.uukanshu.com jumped up, and the Yaochi knife swung out horizontally, but instead of attacking the belly where the scavenger's vital spot was, he cut off the long, blood-red tongue that he spat out.

She left the scavenger to Tie Jun and Li Haotian.

Tie Jun shot slightly faster than Li Haotian. According to Zhao Lei, the scavenger's key point was in the middle of his belly.

Li Haotian also immediately slashed the steel knife in his hand.

The scavenger's belly was quickly cut open by them. As Zhao Lei said, there was a huge stomach sac hidden in the scavenger's belly, which was full of highly corrosive strong acid. The stomach sac was destroyed, and these strong acids flowing out, a large amount of black smoke came out immediately, exuding bursts of stench.

The scavenger, which was as big as a round table, was quickly corroded to the point where its flesh melted and turned into a black skeleton, and the skeleton was also corroded and disappeared.

This kind of strong acid is really terrible. Only the special structure inside the stomach sac can be immune. Otherwise, as long as it is swallowed into the stomach by this scavenger, even steel will be easily corroded and melted.

The scavenger died, and a white scale flew out, which fell into the right hand of Tie Jun. Although Li Haotian also shot, this scavenger was killed by Tie Jun.

The white scales that Tie Jun originally obtained made him on the verge of being able to hatch at any time. Now that he obtained the energy of the white scales of this scavenger, which was slightly weaker than the prototype, the white ball in his right hand vibrated violently, making a crackling sound and bursting into a ball. White light, a golden substance emerged, and his hatchling beast finally broke out of the cocoon.

Chapter 79

Wang Xuan saw that on the surface of Tie Jun's right hand, there was a golden substance extending from it, and it soon turned into a golden round shield about a foot in diameter.

Although Tie Jun's personality is relatively calm, he can't hide his excitement at this moment.

He also finally has his own hatchling beast.

Before Wang Xuan and Zhao Lei, they were all in danger of life and death when they were able to hatch.

This has a lot to do with the energy of the white scales obtained, the mental state of the person, or even the characteristics of the hatched beast.

For example, the stronger the energy of the white scales obtained, the greater the probability of successful hatching. For example, the more special or powerful the hatching beast, the greater the energy required for hatching, and the more difficult it will be to hatch.

The strength of this scavenger is only slightly weaker than the prototype, and the energy contained in it is strong enough for the unhatched iron army. In addition, the energy accumulated by the iron army before is long enough to hatch, and now I can get its scale energy, and it will hatch immediately. success.

A golden round shield appeared on his right hand, which affected his use of the military thorns in both hands. Tie Jun frowned slightly, he could only release the military thorn in his right hand, and rushed towards the other scavenger with the military thorn in his left hand, knowing in his heart that he should change his weapon.

With the successful incubation, there was a crisp "click" in his body, and he began to reinvent himself. His strength, speed, and reaction ability were greatly improved, and his strength immediately surpassed that of the scavenger in front of him.

Zhao Lei on the other side flickered, and the fish-scale knife in his hand slid past the ground, cutting off a scavenger's leg.

The scavenger lost a leg and fell down. Zhao Lei added another kick and kicked him to the ground.

"Li Haotian, hurry up!" he shouted loudly.

Li Haotian saw that Tie Jun successfully hatched, and was envious. When he saw Zhao Lei kicking a scavenger, he immediately clasped the steel knife in his hands and stabbed the scavenger's belly.

This time, everyone did not fight with Li Haotian, but rushed straight towards the remaining scavengers.

The metal tentacle on Wang Xuan's right hand rolled out, wrapped around the head of the other scavenger, and launched "Twisting and Strangulation", with a crunching sound, smashing the head of the scavenger.

Although the key of the scavenger is in the belly, it can be easily killed by stabbing its belly and destroying the stomach sac, but its head is also the key, and it will die immediately after being crushed.

A white scale appeared and disappeared into his right hand. Wang Xuan couldn't feel any energy fluctuations. Sure enough, this kind of scavenger who couldn't even reach the rudimentary level was useless to him.

Li Haotian successfully killed the scavenger who was kicked over by Zhao Lei and obtained a white scale. Like Tie Jun, he was on the verge of breaking through. Purely in terms of energy, he had already accumulated enough energy. The extremely huge white scales, the white ball in the right hand burst immediately, bursting into a white light, and the life inside successfully hatched.

With the successful hatching, he dropped the steel knife in his right hand, and extended the metal substance from the palm to both sides, quickly forming a metal bow.

The bones of his whole body were crackling, the strength in his body was increasing, his eyes became sharp, he raised the metal bow manifested in his right hand, put on the bowstring in his left hand, and began to draw the bow.

A white light converged on the bowstring, and as the bow was fully drawn, it turned into a white light arrow.

He let go of the left hand that hooked the bowstring, and with a bang, the white light arrow shot out, hitting a scavenger's head.

The scavenger opened his mouth and let out a cry like a baby. The white light arrow pierced through its head, showing a blood hole, and flew out from the head, and then flew twenty or thirty meters away before disappearing.

What an astonishing arrow, everyone saw a strange color in their eyes. This Li Haotian's hatching beast belongs to a long-range attack, and it is extremely powerful.

In comparison, the golden round shield of the Iron Army has become eclipsed.

The five scavengers were quickly killed by several people. Tie Jun and Li Haotian succeeded in obtaining their own hatching beasts, with excited expressions on their faces.

The process of obtaining a hatched beast is like rebirth. The joy and enjoyment brought by the transformation and improvement of various organs and senses of the whole body can be said to be the ultimate.

Any enjoyment in the world cannot be compared with it, and it is difficult to describe it with pen and ink if you do not experience it yourself.

"This feeling is unbelievable... It's unforgettable for a lifetime, no wonder you are all thinking about continuing to hunt monsters and get promoted again, I'm afraid it's not entirely for the purpose of becoming stronger, but the process of promotion, simply ..."

Li Haotian slowly retracted the metal bow in his hand, his face full of surprise, as if he wanted to describe the wonder of this process, but suddenly found that he was short of words, and there were no words to describe this feeling.

Zhao Lei smiled and said, "I only know now? If you want to enjoy this feeling next time, you have to keep working hard to hunt monsters and reach the early opening. By the way, what is the name of your hatching beast."

Li Haotian said: "My name is Orion. This name is quite tacky, but I am very satisfied with the power." A complacent smile appeared on his face, and he felt that his Orion was probably the strongest among the crowd.

Tie Jun still looked very calm and said, "My name is King Kong, this is the King Kong Shield, the main defense."

As he spoke, he put down the military thorn in his left hand, and picked up the fine steel knife that Li Haotian had just dropped.

With the diamond shield, the military thorn is not suitable for him. It is more suitable to use a knife and a shield to attack and defend.

After that, he picked up a pair of thorns on the ground and handed them over to Wang Xuan.

Although I can't use it for the time being, I bought it from a crystal scale anyway, so I can't just throw it away here.

Wang Xuan has a Miso belt, which can hold a lot of things.

Wang Xuan put away the thorns and said, "Now that everyone has hatched beasts, we should take a look inside, hoping to find the king's certificate or clues about this king's certificate in this eastern district."

Gu Manyao said: "Unfortunately, we don't get much improvement by killing this kind of scavenger. I hope that a few dwarf monsters will come. Then there is hope that the impact will start today."

Wang Xuan understands that if he wants to be promoted quickly, it is best to hunt down monsters that are equal to or even stronger than himself. The dwarf monsters are stronger than Gu Manyao and the others. If they can obtain the scale energy of this dwarf monster, they will quickly can break through.

"Let's go, go and have a look first." At the end of the supermarket is a huge passage. Wang Xuan is still taking the lead, but this time Gu Manyao is by his side.

Both Tie Jun and Li Haotian have successfully hatched, and they have the power to protect themselves, so there is no need for her to protect them after the break.

Going down the passage, I soon saw giant frogs jumping out from the front.

"It's this kind of scavenger again?" Wang Xuan frowned. Killing this kind of scavenger has almost no effect. Gu Manyao can still gain some energy from hunting with five people. The amount needed is staggering.

This time Wang Xuan was too lazy to move forward and fell behind. Gu Manyao, Zhao Lei, Zhang Haofei and Tie Jun rushed forward.

After all, this kind of scavenger is ineffective against him, and it still has some effect on the five of them, so there is no need for him to fight.

Li Haotian, like Wang Xuan, did not rush up, but showed the Orion bow on the spot to conduct a long-range attack.

Wang Xuan was observing the battle of the four people in front of him, and soon found that the hatchling beast King Kong of the Iron Army was not as capable as he first saw it. The Iron Army held a diamond shield in the right hand for defense, and cooperated with the knife in the left hand to attack and defend, in the real fight. In battle, the survivability is extremely strong.

"This diamond shield is good." Wang Xuan saw that the scavenger's claws caught the iron army's diamond shield, and not even a trace of scars could be left. This diamond shield is very strong and has strong defense capabilities.

More than a dozen scavengers were quickly killed by the five of them. At this moment, green figures appeared in the depths of the passage. These green figures were extremely fast, rushing out from the darkness in the depths of the passage, waving Four, four arms, screaming from the mouth, and rushed into these scavengers at once.

The green gnome monster finally appeared.

"Everyone, be careful!" Zhao Lei was refreshed and shouted loudly. Seeing these green dwarf monsters, he saw the hope of a breakthrough.

Wang Xuan moved and rushed up.

This green dwarf monster is much stronger than the scavenger, and even Gu Manyao and Zhang Haofei are no match for them.

There were three green dwarf monsters rushing out of the passage, and they rushed towards Gu Manyao, Zhang Haofei, and Zhao Lei to catch them.

Li Haotian pulled the Orion bow in his hand, and a low drink came out of his mouth. With a flash of white light, a light arrow shot out, and the target was exactly one of the green dwarf monsters.

The four arms of this green dwarf monster swung out together, and its claws were attached to the light arrow that was shot over.

Seeing the opportunity, Zhang Haofei took a look at the skeleton and bone claws, grabbed the green dwarf monster's chest, and grabbed a few bone claws inside. He remembered that Zhao Lei said that the heart of the green dwarf monster's chest was the key, as long as the heart was hurt, will kill it.

Not wanting the green dwarf monster's quick response, one of its claws fell and slapped Zhang Haofei's right arm.

Zhang Haofei's right arm was in severe pain, and he shrank back.

The Yaochi knife in Gu Manyao's hand stabbed out of the way, stuck it on the monster's chest, and pierced it.

The monster opened its mouth wide and seemed to want to make a sound. When Gu Manyao pulled out the knife, the monster turned and fell down. A faintly glowing white scale appeared and disappeared into Gu Manyao's right hand.

After harvesting this white scale, Gu Manyao's eyes flashed with joy. She felt the excitement of Yaochi, and the white light in her right hand vibrated violently. Looking at the situation, she only needed to get another white scale from a green dwarf monster, and she would definitely be able to grow and break through.

Gu Manyao had just succeeded in killing the green dwarf monster. Wang Xuan in the back was faster than her, and the three-meter-long metal tentacles volleyed down, like a vicious python, with a "snack", hitting another green dwarf in the middle. The monster's head was beaten to the point of bursting its brains.

A white scale flew out of the green dwarf monster's body, and he absorbed it. He felt a slight energy fluctuation from the white light in his right hand. The scale energy of this green dwarf monster was just as useful to Wang Xuan.

The last green dwarf monster was blocked by Tie Jun with a diamond shield. Zhao Lei came around from the other side, and the fish scale knife in his right hand fell, cutting off one of its claws. The monster screamed in anger and turned to attack Zhao Lei.

Zhao Lei was busy backing up, still late, his claws slashed across his chest, cut the leather armor, and blood splattered out. Tie Jun jumped up, and the fine steel knife in his left hand fell, not wanting to be blocked by the monster's claws.

Tie Jun knew that something was wrong, and he was busy raising the diamond shield when he saw the monster's other claw grabbing it.

The claws caught on the diamond shield and made a harsh sound. With a wave of Wang Xuan's right hand, the metal tentacles came down, and with a slam, one of the monster's huge arms was drawn, and there was a sound of bone shattering.

Zhao Lei saw the opportunity, stopped retreating, rushed forward, and stabbed the fish scale knife in his hand into the monster's chest.

At the heart of the chest, the monster's body fell limply.

Obtaining the monster's white scales, Zhao Lei's face showed excitement, he felt that his first saint was about to break through.

This time, they encountered three green dwarf monsters at the same time. Everyone joined forces to kill them with ease. The few remaining scavengers have escaped.

"With Wang Xuan here, it's just different. The one that came before scared us enough." Li Haotian put away the Orion bow in his hand, and walked over with a smile.

Wang Xuan smiled and said, "Although this monster is powerful, as long as we all unite and cooperate with each other, it is not difficult to deal with."

Li Haotian shook his head and said, "I still think it's because of you."

Zhao Lei smiled and said, "Li Haotian, you are quite a flatterer."

Li Haotian looked at Zhao Lei and said, "How can this be called flattery? I'm telling the truth."

Tie Jun picked up three white crystal scales from the ground. After this green dwarf monster died, the crystal scales on each forehead would peel off.

Tie Jun handed the crystal scales to Wang Xuan, and the number of scales in Wang Xuan's pocket now increased to 30, enough to buy a higher-grade armor.

Everyone continued to move forward along the passage. The passage was about thirty or forty meters long. When they were about to walk out of the passage, they encountered the green dwarf monster again.

There were seven green dwarf monsters that appeared this time. They were blocked at the exit of the passage, screaming and roaring from their mouths, waving four huge arms and rushing up.

When the six people saw these green dwarf monsters, not only were they not afraid, but they were delighted.

"It's up to you whether you can get to the first opening!" Zhang Haofei shouted at these green dwarf monsters and rushed up.

It was still Wang Xuan who made the fastest shot, and the metal tentacles were pulled out like a whip. The green dwarf monster that rushed the fastest clearly saw the metal tentacles being pulled over, but he couldn't dodge. He was hit in the head, and his skull shattered immediately. , killed on the spot.

Except for Wang Xuan, among the remaining five people, Gu Manyao was the first to break through. While being scratched by the claws of a green dwarf monster, he plunged the demon chi knife into the monster's chest and successfully struck it. kill.

Yaochi once again absorbed a white scale, and the white light in Gu Manyao's right hand fluctuated violently immediately, successfully breaking through from the prototype to the initial state.

The density of her flesh and bones was increasing, and the appearance of the demon chi knife in her right hand began to change slightly.

The black machete, which was originally about one meter long, was growing, and the length was extended to one meter five. There were a lot of lines on the surface of the machete, which looked like dragon scales, and the new ability was grasped.

Seeing another green dwarf monster with four arms outstretched and rushing towards him, Gu Manyao's eyes shrank slightly, and a cold glow flashed inside, holding a knife in both hands, and suddenly slashed head-on.

With a "chi" sound, the black machete that evolved into a one-meter-five-meter-long suddenly flew out a white knife light, which looked like a huge machete. Go, a stream of blood spurted out, and this green dwarf monster was cut in half by her knife.

This is the special ability she has just grasped, "Yao Chi Slash", which can slash a sword light from the Yao Chi knife in the air, with amazing power.

Wang Xuan noticed this "Yao Chi Slash", a strange color flashed in his eyes, and he immediately understood that she had broken through.

Wang Xuan had already killed two green dwarf monsters in a row, and seeing Gu Manyao beheading one more green dwarf monster, four of them died in the blink of an eye, and the remaining three green dwarf monsters, he did not fight any more. Taking a shot, the fact that killing this kind of dwarf monster doesn't improve him much, it can only be regarded as better than nothing.

Tie Jun blocked a monster's crazy attack with a diamond shield. He couldn't fight back for a while, so he could only step back. Zhang Haofei seized the opportunity and grabbed the monster's neck with skeleton claws. The head was taken off and a white scale was obtained.

The remaining two green dwarf monsters, Li Haotian seized the opportunity, hit one of the monsters in the air with an arrow, killed it, and harvested a white scale.

The last green dwarf monster hit Li Haotian with two arrows, but Zhao Lei seized the opportunity to kill it by stabbing the center and obtaining a daytime scale.

Seven green dwarf monsters died, and seven crystal scales were harvested again. Now the number of crystal scales in Wang Xuan's pocket has reached 37.

"Congratulations." Wang Xuan looked at Gu Manyao with a smile: "The knife just now was good, very powerful."

Gu Manyao also smiled at him and said, "Where, that knife just now is called Yaochi Slash. It can stimulate power and slash a blade of light, but it doesn't feel as good as your 'arm of beast'." , she now knows how to be humble. Before the change, she must have thought that her "Demon Chi Slash" was stronger than Wang Xuan's "Beast Arm".

Zhang Haofei said with a bit of envy on his face: "This time I let you take the lead in breaking through again. Fortunately, you didn't bet with us before, otherwise Zhao Lei and I would lose to you."

Gu Manyao glanced at him and said, "How about you, how long does it take to break through?"

Zhang Haofei said: "It's almost too soon, I guess it's possible to kill one or two more dwarf monsters like this."

Everyone did not leave immediately, but rested for a while, Wang Xuan took out six tubes of primary nutrient solution, one tube per person.

It has been almost twenty-four hours since he drank the nutrient solution before. Wang Xuan felt hungry and thirsty. After drinking another tube at this moment, his hunger and thirst disappeared immediately.

"Just this little nutrient solution can really make people not hungry or thirsty all day."

After Wang Xuan finished drinking, he threw the empty glass tube of nutrient solution aside, shook his head slightly and sighed that there are too many incredible technologies in this world.

Tie Jun sat aside. After drinking the nutrient solution, he took out a pack of cigarettes and handed one to Zhang Haofei. Among the crowd, only he and Zhang Haofei smoked.

"I don't know how big this East District is. If there are a few more dwarf monsters like this, we can all be promoted to the beginning." Zhao Lei looked outside the passage and saw a lot of glass counters, which were suspected to be shopping malls in Longmao Plaza.

Wang Xuan waited for Tie Jun and Zhang Haofei to stand up after smoking and said, "Let's go."

Go out of the passage first.

Everyone stood up one after another and walked out of the aisle. There was a shopping mall outside, with a large number of glass counters. These counters were filled with all kinds of jewelry, jade and gold jewelry. Other than that, there was no one.

Zhang Haofei saw that his eyes were straight, so he quickly walked up and said, "Grandma, we have made a fortune. How much is so much gold and jewelry worth?"

Li Haotian said: "Then it's worth going out. It's worthless here."

Zhang Haofei glanced at him and said, "What do you know, we can always go out sooner or later, isn't it possible to open the entrance and exit with the certificate of king? If the certificate of king is somewhere in this eastern district, then we will soon If you can leave, you must bring these valuable things with you."

Gu Manyao glanced at him and said, "Look at your success, if we can really go out, it's not easy for you to want money based on our current ability?"

Zhao Lei smiled and said, "Yeah, with our ability, even if we can't kill you with a gun, what's the money if we can go out? It's just a number."

Zhang Haofei listened to it, thought for a while, and said, "It seems to make some sense, but I'd better take it with a grain of salt, and be more at ease. There is a saying that money is a man's confidence."

As he spoke, his skeleton claws were revealed, and he punched the glass in front of him.

There was a crackling sound, and the glass counter shattered. He reached out and grabbed a few pieces of gold jewelry and stuffed them into the leather armor.

The other people just watched Zhang Haofei holding the gold jewelry, but didn't move.

Gu Manyao shook his head helplessly and said, "Let's go, let him take it slowly here by himself."

Although she is a girl, she does not love these jewels and gold. In her heart, she only thinks about how to hunt monsters, become powerful, and get the certificate of king.

While talking, he walked around the counter in front of him and walked towards the front.

Zhang Haofei saw that they were all walking forward~www.mtlnovel.com~ with a face full of regret, he grabbed two more pieces of jewelry and stuffed them into the leather armor, and then followed.

There was silence all around, no monsters, no other people, only the six of them walked between these glass counters, and soon a passage appeared in front of them again.

Unlike the bright ones in the shopping mall, the passage in front seemed a little dark, and Wang Xuan suddenly stretched out his hand to make everyone stop.

"There is a voice here." Wang Xuan said softly.

Gu Manyao's monster chi has also grown to the beginning state, her hearing and eyesight have improved a lot. At this moment, when she heard Wang Xuan say this, she immediately listened carefully. Sure enough, there was a strange snoring in the somewhat dark passage. The sound seemed to be the sound of many things crawling and moving.

"Is it a monster?" Zhao Lei was refreshed, a cross crack appeared on the back of his right hand, and a faint white light was flowing in it. He opened the "Scar of the Holy" and wanted to gain insight into the situation in the dark passage facing him.

At this moment, a green shadow flickered in the darkness, and a green dwarf monster rushed out from it.

Chapter 80

Seeing the green dwarf monster again, except Wang Xuande and Gu Manyao, the other four were all refreshed. If they want to break through and advance to the initial state, hunting and killing this green dwarf monster is the most suitable.

With a scream, the green dwarf monster suddenly accelerated and rushed within five meters of everyone in the blink of an eye.

Neither Wang Xuan nor Gu Manyao moved, and were about to give the green dwarf monster to the other four.

Zhang Haofei, Zhao Lei, and Tie Jun began to move and went up to meet them. Li Haotian raised his right hand, and the Orion bow appeared, bent the bow and mounted an arrow, and shot out the first arrow.

With a bang, the green dwarf monster swung its two claws and pulled the light arrow away.

Zhang Haofei and Zhao Lei were on the left and right, almost at the same time.

The four of them worked together. Just as the green dwarf monster blocked Zhao Lei's fish-scale knife with its claws, Zhang Haofei's skull and bone claws grabbed its neck and used a strong grip, twisting its head off.

Harvesting a white scale again, Zhang Haofei was refreshed and full of anticipation, but unfortunately the white light in his right hand fluctuated endlessly, and he failed to break through after all.

At this moment, in the dark passage facing the front, the sound of snoring suddenly became intense, followed by green dwarf monsters one after another.

Wang Xuan's face suddenly became solemn.

The green dwarf monsters that suddenly appeared in the dark passage are no longer three or five, but a dozen or so in the blink of an eye. Behind them, there are more green figures flashing. This dark passage seems to be their lair. I don't know how many green dwarf monsters are hidden inside.

What caught Wang Xuan's attention the most was that there was a distinctive green monster mixed in.

This green monster is a lot taller than other dwarf monsters, at least one meter five in height, and compared with other green monsters, it has an extra green tail behind it.

Wang Xuan immediately understood that this green monster should be the leader of this group of green gnomes.

All of a sudden, so many green dwarfs rushed out, and everyone was surprised and delighted. Gu Manyao didn't dare to stand by, and immediately showed the demon knife. Li Haotian pulled the Orion's bow and shot arrows of light toward the group of green dwarves facing him. shoot away.

These green gnomes screamed in their mouths, either dodged or swung light arrows with their claws, and quickly rushed to the front of the crowd.

Wang Xuan showed no mercy, and released the metal tentacle in his right hand, killing a green dwarf first, then jumping up, targeting the dwarf leader among a group of green dwarves.

Gu Manyao swept out the demon chi knife in her right hand sideways and cut off a green dwarf at the waist. As she was promoted, her speed and strength began to crush these green dwarfs. With her knife, these green dwarfs could not resist.

Wang Xuan and Gu Manyao shot and killed two green dwarfs in an instant, followed by Tie Jun, Zhao Lei and Zhang Haofei.

There are glass containers everywhere in this shopping mall. So many green gnomes rushed out. As soon as the two sides fought, they only heard the sound of clucking, and group after group of glass containers were smashed.

A green dwarf jumped up into the sky and fell violently. Iron Army held the shield and lifted it up. The green dwarf fell and pressed against the shield. Iron Army overturned it with force and fell on the glass container on the side. The container collapsed.

Zhao Lei took a fish-scale knife to make up a knife and killed him.

Wang Xuan made a serious move this time, the metal tentacle in his hand was like a steel whip, and he pulled it out one after another, killing three green dwarfs in the blink of an eye.

The dwarf leader let out a screeching scream, his eyes shot out with anger, and his arms stretched out towards Wang Xuan.

Whether it is speed or strength, it is far stronger than the average green dwarf. In Wang Xuan's view, the strength of this dwarf leader monster is infinitely close to the beginning.

The metal tentacles wrapped around a giant arm of the dwarf leader and launched a twisting strangulation. He wanted to abolish the giant arm of the dwarf leader first, but he did not want the dwarf leader to give up his giant arm. Wang Xuan.

This move was beyond Wang Xuan's expectations. He groaned in surprise and fell back. The dwarf leader's sharp claws cut through the leather armor, just about to grab into his flesh.

Wang Xuan reacted at this moment, raised his right hand, grabbed the claw, and rotated his body along the same spot, his strength exploded, and the dwarf leader flew into the air.

With the sound of "crack", it hit a group of glass containers on the other side. The glass container immediately cracked and collapsed, and a large number of bracelets inside broke and smashed and splashed all over the floor.

The metal tentacles wrapped around like a big python, and threw it out, entangling the dwarf leader with his giant arm and head.

"Twisting and Strangling" was launched, the metal tentacles shrank, the dwarf leader opened his mouth wide, but could not make a sound, the bones in his body were crushed and broken by the terrifying force, and a large mouth of blood was spit out.

When he took back the metal tentacles, the dwarf leader had died, and a white scale appeared, submerging into his right hand.

There was a faint layer of light on the surface of the scale, and when it entered his hand, Wang Xuan immediately felt a wave of energy in his body, and the energy contained in the scale satisfied him.

Wang Xuan successfully killed the most powerful dwarf leader, and Gu Manyao beheaded three green dwarfs in a row with a demon chi knife. Now, in addition to Wang Xuan, she is the strongest.

Zhang Haofei suddenly opened his mouth and let out a low growl, his face twitched, his expression a little distorted.

There are several damages on his leather armor, and there is blood flowing out. This is the wound left from the fight just now. His right hand is faintly glowing. Just now, he harvested a white scale again, and the skeleton finally succeeded. breakthrough.

As the skeleton was successfully promoted to the initial state, the skeleton bones in his right hand continued to grow, as if the arm bones in his right arm were stretched out. The skeleton that was originally just a bone claws has now evolved into a white bone with a length of nearly one meter. The right arm stretched out from his right shoulder, as if he had an extra bone arm.

Feeling the increase in strength in his body, his flesh and bones were strengthening. Zhang Haofei enjoyed the pleasure very much, let out a wild laugh, kicked his feet abruptly, and charged towards a green dwarf facing him.

His speed became much faster, and he flicked his body to avoid the green dwarf's attack. The white bone arm that grew out was grabbed by five pieces, and the five bone fingertips were like sharp blades, which were inserted straight into the green dwarf's chest and heart. With a twist of the bone fingers, a blood hole was dug out of his chest, five fingers retracted, and a **** heart was held in the white bone palm.

"That's what it feels like, it's so cool!" Zhang Haofei laughed as he watched the green dwarf in front of him fall to the sky, followed closely behind Gu Manyao and rushed into the group of green dwarfs facing him, the bone arm waving wildly. When it opened, white afterimages remained in the air, and the five bone fingers were as sharp as knives, madly grabbing towards these green dwarfs.

Where this bone hand grabs the green dwarf's body, it can grab a blood hole with the flesh and the bone, which is extremely terrifying.

Zhao Lei was only one step behind Zhang Haofei. He killed a green dwarf and obtained white scales.

Feeling the changes in his body, Zhao Lei's eyes filled with excitement. On the back of his right hand, a white light overflowed from the cross crack, and extended along his right hand to the fish-scale knife, which soon caused the surface of the fish-scale knife to appear. Covered with a faint white glow.

With one slash, the speed and strength of the fish-scale knife doubled, and the two giant arms of a green dwarf, along with the smaller half of its body, were cut open.

The power was so strong that Zhao Lei himself was stunned.

Tie Jun and Li Haotian looked at Gu Manyao and Zhang Haofei's three consecutive breakthrough promotions, and they were full of envy, but they had only hatched soon, and it was not as easy as three people to be promoted again.

Wang Xuan killed the dwarf leader, noticed that Zhang Haofei and Zhao Lei had made breakthroughs one after another, and nodded slightly. Now there are four of them out of the six, and their overall strength has greatly improved. Without risking the power of the blue crystal scales, they could easily defeat the trio.

A low roar came from the dark passage on the face, followed by another green monster jumping out. This green monster is the same as the dwarf leader Wang Xuan just killed. It is 1.5 meters tall, which is taller than the ordinary green dwarf. Quite a lot.

Another dwarf leader appeared, and Wang Xuan immediately understood that this was not the leader of the real green dwarf, but an elite monster among these green dwarfs.

When the green dwarf elite appeared again, Wang Xuan immediately rushed forward. Killing one such green dwarf elite was far more than killing ten green dwarfs.

Another low roar sounded, following the green dwarf elite, followed by two green dwarf elites of similar size, these three dwarf elites appeared, spread their arms, and the other ordinary green dwarfs were busy getting out of the way. Come.

These three dwarf elites quickly rushed to Wang Xuan~www.mtlnovel.com~ Well done! "Wang Xuan snorted, the metal tentacles shrank suddenly, wrapped around his right arm, and turned into a huge monster arm. The special ability "Beast Arm" was activated. Disappeared in the middle, leaving only an afterimage, and when it reappeared, a huge fist hit the chest of one of the green dwarf elites.

The speed of the giant arm of the beast is too fast. Although this green dwarf elite has almost the strength of the beginning, it has no time to react. The chest that was hit immediately exploded, the bones and flesh were rotten, and the upper body flew out in the air.

This punch was so powerful that it smashed the green dwarf elite into two pieces with one punch.

This power shocked the ordinary green dwarfs around them with fear, and instinctively stepped back.

Gu Manyao held the knife in both hands and launched the "Demon Chi Slash", the black machete in his hand slashed out into the air, and a piercing light of the knife came out, like a crescent moon flying to another green dwarf elite.

The dwarf elite felt bad, and instinctively raised his huge arm to block it, but found that the huge arm suddenly broke from the middle, followed by the body.
