

The Luckiest man in the world CHAPTER 521–530

Subscribe

Bear country.

After receiving a call from Huaxia, an emergency meeting was held.

The whole meeting room, like a noisy vegetable market, kept roaring.

“Don’t even mention the magnitude 9.1 earthquake in Wuka City, even an earthquake can’t happen!”

“A magnitude 9.1 earthquake? Isn’t that a joke?”

“When the machine fails, we don’t need to pay too much attention to it.”

“A magnitude 9.1 earthquake? Doesn’t this mean that nearly tens of millions of people in Wuka City will be moved away? How much trouble will it cause?”

“Cannot migrate!”

“We should send earthquake experts to Wuka City to study and investigate!”

“Yes!”

.....

At this moment, sitting at the top, the short-haired man who had not spoken, finally said, “Be quiet.”

His voice is not too loud.

However, the whole meeting room immediately became quiet.

Quiet as the needle falls!

Obviously, he has a very high prestige!

The inchtou man continued: “Five days, what if an earthquake of magnitude 9.1 really occurs after five days? Who will be responsible?”

Everyone in the conference room opened their mouths, but no one could speak.

Who will be responsible?

After all, this fact is too big.

If it is true, what disaster would it be?

The consequences could not be borne even if he died.

He will become a sinner, a sinner scolded by countless people!

The inch-headed man opened his mouth again and said: "Go ahead and let Wuka City be fully staffed within five days at any cost. In addition, Haas City, Maliku City, and Dengsha City, which are close to Wuka City, also do it. So I can withdraw all preparations for withdrawal!"

Not only to evacuate from Wuka City, but also to evacuate the other three cities.

In one breath, organize the evacuation of the four cities!

This is absolutely majestic!

Everyone's heart was solemn, and they said in unison: "Yes!"

.....

I have to say that Xiong's execution ability is still good.

Soon, a large number of investigations came to Wuka City.

When some people who do not pay attention to the Internet hear that an earthquake is about to occur, they are completely at a loss.

Many people, like people on the Internet, said they did not believe that a magnitude 9.1 earthquake would occur and refused to leave.

There are also some people who are unwilling to leave their homes.

These... undoubtedly brought obstacles to the investigators.

But what Xiong is best at is to overcome obstacles.

They do not care whether the residents are at a loss, whether they believe it or not, let alone whether the residents are willing to leave...

The investigators all squeezed everyone directly into buses, trucks, planes and other means of transportation, and kept transporting them out of Wuka City.

These things were filmed by some people and posted on the Internet.

Some people smell the traffic.

[Mi Sifang: The first day in Wuka City.

Before, I never believed that Orientals can magic, but today, I believe it.

Orientals said that a 9.1-magnitude earthquake is about to occur in Wuka City.

Then, we Xiong Guo all believed.

In charge of justice investigations, regardless of scientific theories, they were violated by magic, and violently destroyed one beautiful family after another.

Cries, shouts, screams... Constantly rippling in the streets.

My friend told me that some people who refused, even died accidentally.

Their bodies can even be piled up with several houses!

Photo.jpg, photo.jpg.....

Here, I yelled: Xiong Guo, wake up! 】

After seeing the article, some people quickly had ideas and carried out intentional publicity.

It didn't take long for this article to appear on the headlines of the world's major news.

This immediately aroused the discussion of countless people.

After seeing this, Miesfang was happily unable to be on his own.

As a result, the frequency of writing articles has been accelerated.

.....

Xiong Guo ignored all of these.

Because they have put all their energy on the transfer of urban residents in Wuka City, Hass City, Maliku City, Dengsha City and other cities.

.....

Xiong Guo ignored it, and Omi didn't even think about it.

As usual, he drove Cullinan to Jiangbei University.

At this time, Hao Zhiwu, Nie Zhenjiang and others were gathering together to make fierce discussions.

“Wuka City, Xiong Country, is there really a magnitude 9.1 earthquake?” Nie Zhenjiang asked with some doubts.

“Regardless of whether it occurs or not, the earthquake predictor is a very remarkable invention. It has brought a leap in the development of seismic physics!” Liu Qianqian affirmed.

She is a student majoring in physics and has a certain degree of research on seismic physics. She has read the papers published by Omi.

Liu Qianqian knows exactly how important earthquake predictors are to earthquake physics.

Jiang Chaoqun said: “However, the earthquake predictor encountered too much. In case it is wrong, it will have some impact on Professor Lin.”

Xia Bing and Xia Xue, who had always been quiet and didn’t like to talk, raised their heads and said in a very firm tone: “Professor Lin, you can’t be wrong!”

Hao Zhiwu, Liu Qianqian, Nie Zhenjiang and Jiang Chaoqun couldn’t help but focus on Xia Bing and Xia Xue.

Xia Bing and Xia Xue met the gazes of the four people, still extremely firm.

“Tatata!”

At this time, there was a sound of brisk footsteps outside.

A tall, handsome figure walked in slowly.

He...is exactly Omi!

Xia Bing and Xia Xue immediately gave up their previous firm eyes, picked up the pulse, and sent them to Omi very shyly.

Omi unscrewed them separately and took a sip of each.

“Meow!”

Immediately afterwards, the cat Xiaobai, who was lying on Hao Zhiwu’s shoulder, let out a loud cry.

“Master, can you give me something delicious?”

Cat Xiaobai came to Omi’s feet and kept dabbing.

Omi gently stroked it, then tore apart the fine beef cat food and poured it in front of it.

Everything is as usual, calm and ordinary.

This feeling was as if Omi didn't know the results of the earthquake predictor and didn't read the news.

Hao Zhiwu couldn't help but said, "Professor Lin, have you read the news? The earthquake center seems to predict that a magnitude 9.1 earthquake will occur in Wuka City, Xiongguo."

"But ~~ Wuka doesn't seem to be in the earthquake zone. Is this a wrong prediction?"

Omi stroked the head of the cat Xiaobai a few more times before he said: "The earthquake predictor can't be wrong."

"It can't be wrong? This..." Hao Zhiwu opened his mouth, wanting to say something more.

Omi didn't intend to wait any longer. He said, "Didn't you say that you want to study the nervous system last time? Has the paper been written?"

Hao Zhiwu lightly coughed and said, "Yet...not yet."

Then, he turned on the computer, and his fingers jumped quickly on the keyboard.

.....

Five days passed in a flash.

The huge city of Wuka is already empty.

However, the eyes of everyone in the world were all focused.

PS: “.

of Wuka City...continuously walk through, and all the pictures are broadcast live to major video sites around the world in real time.

The same tall buildings, empty streets...

Everything is so boring.

If it is placed in the past, absolutely no one can stay and watch for a minute.

But today...

This live broadcast has attracted the attention of countless people all over the world.

A barrage like raindrops, densely covering the entire screen at all times.

[Xiu: In the past, I often wanted to go to Xiong Country to play, but my purse was too deflated, but now watching the live broadcast, it's a dream come true.]

[MAKE: This building seems to be a bit backward.]

[Gusley: The building is a bit backward, but the greening is really good! OMG! what is that? Wild bear! I actually saw a wild bear!]

[Croc: That bear is so fat!]

[JJ: Xiong Country actually transferred all the residents of Wuka City? In five days, all the residents were transferred, but I don't know how long it will take to transfer back.]

[K K K K: There is no help, it is estimated that at least one month.]

[SKE: Earlier, I was a little skeptical about the news published on the Internet, saying that Xiong Guo's investigation forcibly took the residents away. Now after watching the live broadcast, I believe it!

You see, many doors were not closed in time, and the streets were messy.]

[Jerway: So many doors are open, when the residents are transferred back, I am afraid that there will be a lot of thefts.]

[GG: Hey, there are a few stray dogs over there, eating bones. Perhaps, the transfer of residents is also a good thing for them, they can eat!]

[Mike: Happy stray dogs.]

[YY: Stray dogs may become the biggest winner!]

[Witt: After I got up, I have been watching the live broadcast until now, so, what about the earthquake? What about a magnitude 9.1 earthquake?]

[Fries: I've been watching it since the early hours of the morning!]

[Tlights: Just a little bit of knowledge, a magnitude 9 earthquake is equivalent to 477 million tons of TNT equivalent. If you don't know what 477 million tons of TNT equivalent means, let me give you another example... This is almost the energy of 1 million nuclear weapons! Now you know how terrible it is? The effect it produces is definitely better than the special effects of all blockbuster films.]

[Mark: As you said, I am suddenly looking forward to Omi's earthquake predictor. It is really accurate. Although, there is no possibility at all.]

[Tauren: Huaxia Kingdom seems to say that the earthquake started at 9 o'clock, right? It's nine o'clock in China in 5 minutes.]

...

China State.

Generally speaking, there should be people talking, talking, or applauding constantly in the meeting room.

But at the moment...

The old man sitting in the main seat, as well as a group of men and women in formal wear, all looked up and watched the live video in silence.

They looked at the beating time, their faces were full of solemnity and a faint worry.

"There are three minutes left." Someone murmured.

...

Jiangbei University.

Hao Zhiwu, Jiang Chaoqun, Liu Qianqian, Xia Bing, Xia Xue and others have also met together for discussion.

However, as long as Omi came.

They will all separate immediately and quickly enter the learning state.

but.

Today, there have been exceptions.

"Tatata!"

Even though Omi had arrived at the office, they were still gathered around the computer, staring at the screen with scorching eyes, with a nervous expression on their faces.

Hao Zhiwu looked at the barrage that kept flashing on the screen and couldn't help saying: "Professor Lin..."

Before he could finish speaking, Omi interrupted directly: "Earthquake predictor, there will be no errors."

It's not that Omi has a prophet who knows what Hao Zhiwu wants to say.

In fact, Hao Zhiwu has asked too many times.

Today alone, this is the sixth time.

And Omi's answer didn't mean to be perfunctory at all.

This is the fact!

There will be no errors in the earthquake predictor!

Because this is the product obtained in the system.

In addition, Omi also has the most detailed knowledge of earthquake predictors, and he knows the functions of earthquake predictors.

Hao Zhiwu couldn't help but said in embarrassment: "Okay... Okay."

Then, he glanced at the time in the lower right corner of the computer, took a deep breath, and said, "There are still 2 minutes to 9 o'clock."

...

Bear country.

meeting room.

The inch-headed men, as well as a group of men and women in suits and leather shoes, stared at the live screen unblinkingly.

The atmosphere of the entire conference room is extremely dull.

Many people's faces are full of deep melancholy.

Because they decided to transfer the residents of Wuka City... and surrounding cities.

And if the earthquake predictor results are wrong, then they will also bear great responsibility.

At this time, a middle-aged man whispered: "It's 9 o'clock in China in 1 minute."

As soon as this statement came out...

The atmosphere in the already dull meeting room was instantly dignified to the extreme.

Many people's breathing became thicker.

Uneasy, disturbed!

...

At this time, in the live video.

The barrage is still like rain, densely packed, covering the entire screen.

[Halidas: The earthquake hasn't appeared yet? I almost dozed off.]

[Jet: Yeah, so many people are waiting.]

[Godot: No, no, do you really think there will be a magnitude 9.1 earthquake in Wuka City?]

[Meng Shao Kendi: Peace of mind, no one believes it, everyone is just joining in the fun.]

[Doctor Yamamoto: Earthquake predictor, we still have to look at our island country! Our island country can accurately predict for 10 seconds, that is the real earthquake predictor!

And now, the earthquake predictor in our island country has not responded, so the outcome is destined.]

[Wash it: Before, Omi wanted to call himself a member of our Bangzi country. Our Bangzi country is also considering whether it is true or not. Now it seems that there is no need to consider it at all, it is fake! He is definitely not a stickman!]

[SKY: Tell everyone, there are still 10 seconds to 9 o'clock in China Time! Will witness a miracle soon!]

[Heavy rain: 9!]

[SSSSS: 8!]

[Emperor Cage: 7!]

[Flower World: 6!]

...

In an instant, the entire screen was completely covered by neat Arabic numerals.

It feels like watching a live broadcast.

But watching a huge Arabic digital animation, everyone was dazzled.

However, UU reading www. . Com never gets tired of it.

At the same time, some people have a touch of expectation in their hearts.

Others have prepared a large amount of mocking words and articles, ready to send them at any time.

[Nicholas: 3!]

[Hunter: 2!]

[Alexander: 1!]

At the moment when countless '1's cover the screen.

"Boom!"

"Boom!"

"Boom!"

In the live broadcast, the tall buildings, streets, villages, and mountains that were originally extremely peaceful... suddenly trembled and made loud noises that were terrifying to the extreme.

Like the roar of an abyss behemoth!

Harsh and terrible!

The whole Wuka City, like a small boat in a storm, suddenly bumped and rolled violently, as if it would tip over and collapse completely at any time!

“Crack!”

“Crack!”

The flat road suddenly appeared a series of hideous gullies.

These gullies spread and spread rapidly, forming countless terrible abysses that are not bottomless!

“Boom!”

The towering tall buildings, like gravel products, crazily collapsed, directly covering the stray dogs gnawing on their bones, and arousing smoke and dust in the sky.

The huge mountain, like a bubble, collapsed suddenly, and the rocks flew across, instantly crushing the crawling grizzly bear.

The tracts of farmland seemed to be divided and reclaimed, suddenly becoming rags and ravines.

The smoke, dust and sand in the sky swept countless hurricanes and rushed into the sky, quickly smashing a large number of drones into fragments. Even several helicopters were unable to respond quickly and were difficult to control and fell quickly.

“Boom!”

The tall building collapsed, the earth collapsed, the world turned upside down!

Howling ghosts and wolves, terrible!

The end is coming soon!

...

Originally, countless barrage live videos...

At this time, it was empty.

All the people sitting in front of the computer opened their mouths wide, their eyes widened, and the whole heart was beating wildly.

For the first time, it was the first time they had seen the terrifying power of nature with their own eyes.

As agile as a stray dog, as strong as a grizzly, as strong as a tall building, and as tall as a huge mountain...all without the slightest resistance in a major earthquake, disappear instantly without a trace, and disappear in smoke!

It's...horrible!

Those residents of Wuka City who were forcibly transferred had a cold sweat on their foreheads.

What if you are not transferred?

What will happen now?

Just thinking about it, they couldn't help but shiver.

...

Not to mention the fact that ordinary people were scared, even the people in the Xiong Country Conference Room couldn't help but have their mouths widened and could not speak for a long time.

They are both happy, afraid, and worried.

Fortunately, he promptly evacuated the residents from the earthquake zone, so no casualties were caused.

What I am afraid of later is that if there is no Omi's earthquake predictor, if I do not believe the results of the earthquake predictor...

So, what will be the consequences?

Absolutely, terrible to the extreme!

The worry is, although it did not cause a large number of casualties.

However, the follow-up of such a big disaster is still very troublesome.

This is definitely not something that can be restored overnight.

The short-sized man on the main seat was the first to react.

He took a deep breath and said firmly: "After the earthquake is over...Statistics on the casualties and property losses this time, and put all his energy into the post-disaster reconstruction work!"

His voice was sonorous and powerful, pulling everyone's thoughts back to reality.

Everyone shook their bodies and said in unison: "Yes!"

...

China Conference Room.

When everyone looked at the live broadcast, they were a little relieved, but at the same time, they were extremely shocked and a little bit sad.

Because the news about the earthquake was reported by them.

If the notification is wrong, the impact will be huge.

Fortunately... the earthquake news is accurate.

However, after seeing the earthquake, they were surprised by the terrible earthquake.

This kind of natural disaster is not something that humans can resist at all, it's too terrifying.

They thought of the previous pictures, and the soft heart in their hearts was slowly touched.

It would be great if you had an earthquake predictor earlier.

The turbid eyes of the old man sitting in the main seat shook for a while.

Obviously, he also felt something.

After a while, the old man said: "Start donating and helping immediately!"

"Yes!" everyone said in unison.

...

Jiangbei University, office.

Nie Zhenjiang, Liu Qianqian, Hao Zhiwu, Xia Bing, Xia Xue and others all opened their mouths as they watched the live broadcast.

They were all shocked by the terrible earthquake.

Tall buildings collapsed, mountains collapsed, ground shattered!

Those bullet screens are not wrong, this picture definitely surpasses all blockbuster movies!

For a long time, Hao Zhiwu said in a dry voice: "Professor Lin, your earthquake predictor is accurate."

Although, this is the result he has always wanted.

However, when he said this sentence, his tone was very insensitive, without a trace of excitement or joy.

In fact, the earthquake was so terrible that it had completely scared him.

Omi also stared at the live broadcast screen, nodded lightly, and said, "Yeah."

...

Until the earthquake gradually stopped.

Barrage finally appeared on the empty live screen.

[Escury: Earthquake, it's terrible!]

[Cursed person: I'm trembling all over now.]

[Joker: The power of nature is endless!]

[Carl Xiu: I finally understand how weak human beings are in front of nature.]

[Delicious table: the end! I seem to have seen the end come with my own eyes!]

[Edward: I will never forget this live broadcast!]

[Summer: I hope there will be no more disasters in the world.]

[Marco Polo: Thank you China, thank you Professor Omi, thank you for the earthquake predictor.]

...

[Professor Lin's number one fan: Who just said that Professor Lin's earthquake predictor was wrong? Come out!]

[Mr. Liu: Who just said that Wuka City will never have a major earthquake? Come out!]

[The flying grasshopper: Who said that the rumors were spread just now? Come out!]

[Love you for ten thousand years: Who just said that Professor Lin's earthquake predictor is not good? Come out!]

[Winter melon peel, watermelon peel: Who just said that residents of Wuka City should not be transferred? Come out!]

[Stranger's call: Who just said Xiong Guo was too stupid and listened to the rumors casually? Come out!]

...

Numerous rhetorical questions appeared on the live broadcast screen.

However, no one at UU reading Omi dare to stand up and answer.

They are all very guilty.

Of course, there are also sporadic other barrage.

[Li Sheng: I think Professor Lin should be a member of our stick country!]

[Obasanda: That's right! Professor Lin is from our stick country! Everyone, thank us for Bangzi Country!]

[Hisoko Takahashi: Such a powerful earthquake predictor, I am afraid it has surpassed our island country...]

[What is Happy Planet: What is Professor Lin from your stick country? Shameless?!]

[What is Happy Planet: Also, for the two people upstairs, the island country earthquake forecaster can only predict for 10 seconds, and the accuracy rate is less than 10%! But our Professor Lin's earthquake predictor can predict five days! Moreover, the forecast is completely correct. What does your island country compare to? Shameless?]

[A person's arena: Don't get too excited, don't they always be like this?]

...

Suddenly, clearer pictures after the earthquake appeared on the Internet.

Gully ground, cities and towns turned into ruins, and a few domestic animals that were smashed into meatloaf...

Although, everyone saw the earthquake scene in the live video.

However, now, after seeing the scene after the earthquake, everyone is still unavoidably shocked.

They couldn't imagine that this was a quiet and peaceful city not long ago, but it disappeared in a blink of an eye.

The power of nature is unimaginable!

Especially, the people in Wuka sitting in front of the screen... felt the most.

[Kaqiu Yisha: That place seems to be my home. Fortunately, the investigators took us away a few days ago, otherwise I would be gone.]

[Dougton: I still remember that there is a shopping plaza, and now there is such a big pothole.]

[Pace: My school is gone.]

[Yuehuaweite: I am a resident of Wu Kaye, here, I just want to say a word, thank you for the investigation, thank you Huaxia, thank you Professor Lin!]

[MML: Thank you for the investigation, thank you Huaxia, thank you Professor Lin!]

[Solu: Thank you for the investigation, thank you Huaxia, thank you Professor Lin!]

.....

In many videos, there are very neat bullet screens, 'Thank you for the investigation, thank you Huaxia, thank you Professor Lin! '.

Even this sentence rushed to the top of the hot search of many news media.

.....

Some news people, media people...

In order to gain traffic and attract attention, the article written in advance was published before 9 o'clock.

In the article, Omi's inferior inventions, Huaxia's misreports, Xiong Guo's easy obedience, and the consequences of the forced transfer of residents in Wuka City, etc., have been attacked in all directions.

Although it was released a few minutes in advance, none of them paid any attention.

Because these are exactly what will happen.

However, what they didn't expect was that an earthquake really occurred.

[BC News: The earthquake did not occur, Huaxia, Professor Lin, Xiong Guo, need to be responsible! Regardless of science and opposition, they acted recklessly and forcibly moved the residents of Wuka City, who had lived and worked in peace and contentment, to other places. As a result, countless people were broken up and left their hometowns...]

The editor-in-chief, editor-in-chief and others, all quietly waiting for the fruit of the flow, never thought that the earthquake would really appear at 9 o'clock.

And when the earthquake occurred at 9 o'clock, they were surprised by the terrifying earthquake scene.

As a result, the article could not be deleted in the first time.

As a result, when countless people thanked the investigation, Huaxia and Omi, there were also many people who abused BC News.

Although, BC News hastily deleted the article afterwards.

[Canzhu in the wind: BC News, do you think it's okay to delete the article? I bother! He even dared to insult Professor Lin!]

[KL: People from BC News have a black heart!]

[MMM: I just want to wish the people who wrote this article, as well as the editor-in-chief and editor-in-chief of BC, all of them can reincarnate sooner.]

[Kun: Reincarnation? They still have a chance to reincarnate?]

[Jia Dehua: Stop BC News!]

[Tauren: Stop BC News!]

[Ortski: Stop BC News!]

.....

Originally, BC News had nearly 60 million fans.

In just one hour, it dropped by 20 million.

In addition, the rate of decline has not stopped, even faster.

The entire BC News, therefore, fell into panic and despair.

BC News has a large fan base and can barely fight for a few more hours.

Like BC News, some small media who want to take advantage of the earthquake and publish articles in advance cannot resist it for so long.

In less than half an hour, all accounts they had operated for many years were banned.

This directly made them almost never cry.

And this... it's all they deserved!

.....

Appeasing, counting, and rebuilding Wuka City are the most important things for Xiong Country today.

After spending nearly half a month of statistics.

Xiong Guo finally released the news.

[Xiong Guo Daily: According to incomplete statistics, the earthquake caused 25 deaths, 71 injuries, and 391 missing. Here, I am very grateful to Professor Hua Xia and Professor Lin for their help.]

This message is very brief.

However, it aroused the hearts of countless people.

25 people were killed, 71 were injured, and 391 were missing.

If it is placed in a time of peace without disasters, this is definitely a great event.

Now, it makes everyone feel very incredible.

To know.....

This is a magnitude 9.1 earthquake!

Before the change, dozens of deaths and injuries were close to one million, which is also normal.

Now, the total number of casualties is less than a hundred!

It has been reduced by a thousand times!

This is simply...a miracle!

And the person who created this miracle was Omi!

As a result, countless people followed and commented.

[Flowers withered in the wind: I hope everything will get better soon. In addition, thank you Professor Omi.]

[Yiku: Thank you Professor Omi.]

[YES: Thank you Professor Omi.]

[Edward: Thank you Professor Omi.]

.....

Omi's name was once again on the top news search lists.

.....

On the other hand, after the last discussion, the Nobel Committee gathered together again.

Chemistry committee meeting room.

At this time, the quarrel began again.

The blonde woman said: "I have the same view as last time. Professor Lin's chemical battery has achieved great results, but Professor Howth's polymer material results are also not small!"

"However, in terms of qualifications and knowledge, Professor Howth is more, so I think this year's Nobel Prize in Chemistry should be awarded to Professor Howth!"

The silver-haired old man said: "Qualifications? Knowledge? Professor Lin invented two chemical batteries, and ~~ has also made tremendous achievements in other fields. Doesn't this prove that he has more qualifications and knowledge??"

The blonde woman said: "Then let's say Professor Lin has made great achievements in other fields."

“As far as I know, Professor Lin has also been nominated for the Nobel Prize in Medicine and the Nobel Prize in Physics!”

“If we awarded him the Chemistry Prize, what if he won the Medicine Prize and the Physics Prize again?”

The silver-haired old man glanced at her faintly and said, “If everyone thinks like this, wouldn’t it be that the more accomplished people won’t be able to win awards? I think... Mr. Nobel never thought of this before his death.”

The blonde woman opened her mouth, trying to refute, but for a while, she couldn’t find a good reason.

She glanced at the people in the conference room and motioned for others to follow along.

However, this time the rebuttal voice was obviously less.

Many people may be thinking about things, maybe they are attracted by something... or bow their heads, frown, or meditate...

The Luckiest man in the world CHAPTER 526–530

Subscribe

At this time, the old man with silver rim and silver mirror sitting in the main seat cleared his throat and said: “Then, according to the rules, let’s make the final vote.”

“Currently, there are 10 nominees, namely Hoth, Omi, Javiten...”

“Please pick up the pen and paper on the table and write down your choices. Those with more votes will win the Nobel Prize in Chemistry!”

Everyone in the conference room heard what they heard, and first glanced at each other.

Their expressions are all very solemn, after all, this is the highest award in the chemistry world.

Then, everyone slowly picked up paper and pen.

“Boom boom boom!”

After a crisp voice sounded, everyone raised the white paper in front of them.

"Hose!"

" Omi!"

" Omi!"

" Omi!"

...

Overwhelming advantage!

In other words, there is no suspense!

The old man with silver-rimmed glasses glanced around and said: "The Nobel Prize in Chemistry is...Huaxia, Omi!"

After hearing this, the blond woman reluctantly lowered the blank paper in her hand.

...

On the other hand, similar things are happening in the Nobel Physics Committee meeting room and the Nobel Medical Committee meeting room.

Omi has indeed made great achievements in physics and medicine.

However, when the discussion meeting was held a while ago, great disputes still occurred.

Because, in recent years... some famous scholars have also made great achievements in their respective fields.

However, today's voting meeting was not as intense as last time.

When some people proposed to choose Omi to win the Nobel Prize, those who opposed it chose to default.

The Nobel Prize in Physics, it's better to say.

Because Omi's earthquake forecaster showed great power this time and avoided a terrible disaster.

As a result, the ability of an earthquake predictor is called an artifact!

If none of the artifacts in the physical world can win the Nobel Prize, it may have a huge impact on the credibility of the Nobel Prize.

In order to consider the overall situation, they must make some concessions.

What's more, earthquake predictors do have the ability to get rewards.

...

As for the Medical Nobel Conference Room, when someone proposed to choose Omi, few people opposed it.

Where there are people, there are rivers and lakes.

Applicable in academia, the same applies to the Nobel circle.

Huaxia and Xiong Guo have strong influence.

At this time, Huaxia can be said to have helped Xiong Guo a lot.

How could they not make some returns?

Of course, the main reason is that the insulin rehabilitative medicine invented by Omi is so effective that it is enough to win the Nobel Prize.

...

At this time, the Nobel Peace Prize Committee meeting room.

The atmosphere of the entire conference room is a bit dull.

Compared to the last quarrel in the physics, medicine and chemistry conference room.

The meeting room of the Nobel Peace Prize Committee last time was a peaceful one, and it was unanimously agreed to determine the winner of this Peace Prize.

But now, everyone has chosen to be silent.

The white-haired old man sitting in the main seat gave a light cough and said: "The leader of the United States only launched a war and indirectly saved many lives. He is a peace-loving person. He has the Nobel Peace. Eligibility for the award."

After a pause, he said: "Everyone is concerned about the earthquake that occurred in the bear country a while ago?"

"The earthquake was terrible, but fortunately it didn't cause too many casualties."

"It can be said that this is the credit of Professor Omi who invented the earthquake predictor. He also has the qualifications to win the Nobel Peace Prize."

After speaking, the white-haired old man glanced at the people in the conference room and saw that they nodded.

So he continued: "Then, this year's Nobel Peace Prize, let it be conducted by voting."

"There are 9 nominees for this year's Nobel Peace Prize. They are Gilesley, Mike... and Omi!"

After hearing this, everyone looked at each other again.

Then he slowly lifted the pen and wrote the name.

" Omi!"

" Omi!"

" Omi!"

...

Passed unanimously!

There is no difference!

In fact, this is also normal.

To know...

Omi's earthquake predictor has directly saved the lives of tens of millions of people.

If this fails to win the Nobel Peace Prize, instead, the award is awarded to the person who started the war.

They don't know if they will be scolded to death.

See here...

The old man sitting on the main seat was obviously relieved.

After all, he is the principal of the Nobel Peace Prize.

If there is too much deviation, he will receive the heaviest insult.

The white-haired old man said: "Then, the winner of this year's Nobel Peace Prize is... Omi!"

...

At this time, Jiangbei University, office.

Nie Zhenjiang, Liu Qianqian, Jiang Chaoqun and others are studying hard.

At this time, Hao Zhiwu, who was scrolling the mouse, suddenly exclaimed with excitement: "Professor Lin, you are on the hot search again!"

"Where? Where?" Nie Zhenjiang, Liu Qianqian, Xia Bing, Xia Xue and others all quickly gathered around.

Especially Xia Bing and Xia Xue, the fastest.

As long as they heard the good news about Omi, the whole person seemed very excited and happy.

Hao Zhiwu said: "The hottest search is number one! Look... Thank you Professor Omi!"

"There were less than 100 casualties in the magnitude 9.1 earthquake. I really should thank Professor Lin!" Liu Qianqian said seriously.

Xia Bing, Xia Xue, Nie Zhenjiang and others couldn't help but nod their heads.

Omi gently stroked the cat Xiaobai, rubbed his ears, and said, "Don't be so excited."

These days, Hao Zhiwu and others are all a little unwilling to learn, and continue to pay attention to the news of the earthquake in Wuka City.

As long as they saw the hot search about Omi, they would let out a cry of excitement, which made Omi's ears hurt.

"Ding Dong!"

At this time, an email popped up on Omi's computer.

It turned out to be the CL editorial department, which responded to the last paper by Xia Bing and Xia Xue.

CL journals are the top journals in the computer field, and I don't know how many manuscripts I have to receive every day.

Without the help of a super smart watch, emails like this one that only took more than ten days to reply would already be relatively quick.

Omidao: "Xia Bing and Xia Xue, the paper you submitted to the CL journal last time is over, and it will be published in the next issue of the CL journal."

The CL journal is over!

Hao Zhiwu, Nie Zhenjiang, Liu Qianqian, and Jiang Chaoqun all yelled excitedly.
UU reading Omi

"Xia Bing, Xia Xue, congratulations!"

"That's amazing! That's the top computer magazine!"

"congratulations!"

"marvelous!"

Xia Bing and Xia Xue were also very happy.

They are not happy because their papers are in the top issue.

They just because, this paper was created by them and Omi together.

It's like their children, now grown up!

Omi looked at everyone's happy appearance, as if infected, and a smile appeared on his face.

"Jingle Bell!"

At this time, the mobile phone in his pocket rang a brisk ring.

Omi glanced at the call notification and found that it was an unfamiliar number from a foreign country.

If you are an ordinary person, seeing this kind of unfamiliar number, you will definitely choose to hang up.

Because most of these are fraudulent calls.

However, Omi has acquired too many foreign assets, such as shares of LV, Volkswagen, Shangri-La, and so on.

He often receives similar calls from strangers abroad.

This time, he thought it was another call from the chairman of some company.

Therefore, he directly pressed the answer button.

"Hello, is it Professor Omi?" There was a burst of fluent English on the phone.

Omi said in Chinese language: "It's me, who are you?"

There was a noticeable pause in the voice on the phone.

Then, there was a little kowtow in Huaxia.

"Lin...Professor Lin, hello..."

"I am Godochov, the chairman of the Nobel Committee on Chemistry. After discussion and voting by our committee, I hereby inform you that I have won the Nobel Prize in Chemistry..."

Nobel Prize in Chemistry!

Ordinary people, if they hear this news, will definitely yell happily, ecstatically, and there is no autonomy at all.

However, Omi just responded calmly and said, "Oh."

Oh?

Then, it's gone?

The person on the phone was obviously taken aback.

After a long while, he continued: "Here, I want to say congratulations to Mr. Lin... Then, Mr. Lin, goodbye."

"Goodbye." After Omi finished speaking, he directly hung up the phone.

Hao Zhiwu couldn't help but said, "Professor Lin, is it another call from the media?"

These days, the media often wants to interview Omi.

Without exception, he all chose to refuse.

For a long time, Omi didn't want to be exposed.

Because, once exposed, your leisurely life will be completely broken.

He doesn't want to hide wherever he goes, to prevent a group of people from suddenly running out, claiming to be his fans, holding a mobile phone, and taking pictures of himself frantically.

In addition, the interview... is also a troublesome thing.

Omi shook his head and said, "It's not the media. The chairman of the Nobel Committee on Chemistry called me and told me that I won this year's Nobel Prize in Chemistry."

Omi's tone was very plain.

It looks like it's like saying that someone asked me whether I had eaten or not and other trivial things.

However, listening to the ears of everyone in the office, it was like thunder, and everyone's ears were humming.

What did they hear?

The chairman of the Nobel Committee on Chemistry called and informed Omi that he had won this year's Nobel Prize in Chemistry!

Although, they have seen many people on the Internet, discussing that Omi will win this year's Nobel Prize.

They also felt that Omi could win the Nobel Prize and also joined the discussion.

But, feel...just feel.

After all, it is not a fact.

In addition, Omi is too young and the time to achieve those achievements is too short.

If, in the end, Omi did not win the Nobel Prize, everyone would not be too surprised.

In a sense, academia is also a circle of judging capitalists.

Now, they heard that Omi won the Nobel Prize in Chemistry. How can this not make everyone excited?

"Professor Lin, you are so amazing!"

"Nobel Prize in Chemistry, Professor Lin, congratulations!"

"Congratulations, Professor Lin!"

"Very good!"

Hao Zhiwu, Liu Qianqian, Nie Zhenjiang and others kept yelling.

Although, what they are more looking forward to is that Omi will receive the Nobel Prize in Medicine and the Nobel Prize in Physics.

However, it is not bad to have won the Nobel Prize in Chemistry!

As long as it is a Nobel Prize, that's fine. It's a great thing to be happy about!

Omi looked at their excited appearance and couldn't help but shook his head with a smile.

"Jingle Bell!"

At this time, his mobile phone rang again with a crisp ringtone.

He glanced at the call alert, it was still an unfamiliar number from abroad.

Without much hesitation, Omi pressed the answer button again.

"Hello, may I ask... is this Professor Omi?" A relatively dull Chinese language came through the phone.

Omi said, "It's me."

"Professor Lin, hello, I am Jeffs, President of the Nobel Committee on Physics. After voting and recommendation by our Nobel Committee on Physics, I hereby inform you that you have won the Nobel Prize in Physics..."

I just notified that I won the Nobel Prize in Chemistry, and now I am notified that I have won the Nobel Prize in Physics?

Omi couldn't help but froze for a moment, and said, "Okay."

After the two continued to chat for a few words, they hung up the phone.

Hao Zhiwu said again: "Is it the media? The media knew you won the Nobel Prize so soon?"

Omidao: "It is the chairman of the Nobel Committee on Physics. He told me that I won the Nobel Prize in Physics."

quiet!

Originally, the noisy office suddenly became silent!

Hao Zhiwu, Liu Qianqian, Nie Zhenjiang, Jiang Chaoqun and others all opened their mouths, completely dumbfounded.

What did they hear?

The chairman of the Nobel Committee on Physics called to inform Omi that he had won the Nobel Prize in physics?

A minute or two ago, Omi had been notified that he had won the Nobel Prize in Chemistry.

Now, he has been notified that he has won the Nobel Prize in Physics.

In the same year, the same person won two Nobel Prizes at the same time!

This...this is absolutely something that has never happened before.

"Another Nobel Prize!"

"Nobel Prize in Physics!"

"Very good!"

"Awesome!"

They danced and shouted constantly.

It looked like he was even more happy than he won the Nobel Prize.

"Jingle Bell!"

When everyone was excited, Omi's cell phone rang again.

This time, again, there is no difference.

Still a bunch of unfamiliar foreign numbers.

As before, Omi chose to answer again.

"Hello, Professor Omi, this is Chopper, the president of the Nobel Medical Committee." A slightly hoarse voice came from inside.

Omiyan heard a strange look on his face.

Is it the president of the Nobel Committee again?

"Hello."

"Today, our Nobel Medical Committee conducted a rigorous selection process. Finally, we selected you as the winner of the Nobel Medical Prize. Congratulations."

“Okay.” Omi had already expected it when he received the call, so he answered more briskly.

After hanging up the phone, Omi saw Hao Zhiwu and others, and cast inquiries.

So, he took the initiative to say: “A call from the president of the Nobel Medical Committee, he told me that I got it.”

Immediately, Hao Zhiwu jumped up.

“Sure enough, I said, Professor Lin must have won the Nobel Prize in Medicine, right?! After all, Professor Lin invented the insulin rehabilitation medicine! What a result!”

The other people in the office were initially a little confused.

After hearing Hao Zhiwu’s words, he also screamed excitedly.

“Three! Three Nobel Prizes!”

“Oh my God!”

“Professor Lin, that’s awesome!”

“I’m almost dreaming...”

“On the Internet, there has been a long debate about which Nobel Prize Professor Lin will receive. Who would have thought that Professor Lin won the Nobel Prize in Physics, Nobel Prize in Chemistry and Nobel Prize in Medicine at the same time?”

“No! Xia Bing and Xia Xue thought about it!”

When everyone called here, they couldn’t help but focus on Xia Bing and Xia Xue.

In the past, if Xia Bing and Xia Xue were stared at by so many people, they would definitely be ashamed to want to bury their heads in the valley.

Now, they were raising their heads and placing a pair of bright beautiful eyes on Omi, their pretty faces full of smiles and blessings.

Omi... won three Nobel Prizes!

In the eyes of Xia Bing and Xia Xue, Omi’s whole body was filled with brilliant light, and the whole person seemed to be transformed into a fiery red sun, extremely dazzling!

“Jingle Bell!”

At this time, Omi's cell phone rang briskly.

This time, without exception, it is also a string of unfamiliar numbers from abroad.

Having already answered three foreign calls, Omi seemed to have formed a habit and directly pressed the answer button.

"Hello, is it Professor Omi?" On the phone, there was a burst of fluent English.

Omi said in Chinese language: "It's me."

After a while, the phone turned into a voice full of magnetism.

"Professor Lin, hello, I am the assistant of Mr. Marco, the chairman of the Nobel Peace Prize Committee. Mr. Marco said that after all the members of the Nobel Peace Committee voted, it is finally decided that you are the winner of the Nobel Peace Prize. ..."

After the Nobel Prize in Chemistry, Nobel Prize in Physics, and Nobel Prize in Medicine, won the Nobel Peace Prize?

The weird color on Omi's face became more intense.

"OK."

After that, he chatted a few more casually and hung up the phone.

Omi glanced at the people in the office and said, "The president of the Nobel Peace Prize Committee called me and said that I won the Peace Prize this year."

quiet.

The whole office was silent again.

Hao Zhiwu, Liu Qianqian, Nie Zhenjiang and others have thought that Omi might win the Nobel Prize in Medicine, Nobel Prize in Physics, Nobel Prize in Chemistry...

However, they never thought that Omi would win the Nobel Peace Prize.

As a result, when Omi uttered these words, everyone was a little bit unexpected, and they were in a daze.

Hao Zhiwu's receptive ability seems to be far better than others.

He was still the first to react and shouted: "f*ck! Four! Professor Lin won four Nobel Prizes by himself! Great, great!"

After being called by him, the others finally came back to their senses.

“The Nobel Peace Prize, yes, the earthquake predictor invented by Professor Lin detected earthquakes in advance, saved countless people, and won the Nobel Peace Prize, so it should be!”

“One person, to win four Nobel Prizes, this is absolutely unprecedented!”

“More than unprecedented? In the future, there will never be such a person!”

“Oh my God, I turned out to be a student who won four Nobel Prize winners at the same time, did I dream?”

“Too awesome!”

.....

Even if everyone screamed, even if their throat hurts...

They didn't care at all.

It was really too exciting.

And when Hao Zhiwu finished shouting, he turned his eyes on Omi and his mobile phone.

He murmured: “I don't know, the chairman of the Nobel Prize Committee, will call me.”

When Omiyan heard it, the corners of his mouth twitched slightly.

The chairman of the Nobel Prize Committee called?

Why, you still want me to win another Nobel Prize in Literature?

One person, occupy all the Nobel awards this year?

Don't say it, it seems pretty good.

It is a pity that Omi has never published any literature. Naturally, it is impossible to win the Nobel Prize in Literature.

.....

meager.

In the hot search, there are a certain celebrity divorced, life tips, a certain TV drama plot and so on.

These hot searches have appeared all year round, and many people have taken it off.

However, many people still can't help but click on the title to see what happens.

At this time, a different headline appeared at the bottom of the hot search, and every few seconds, the popularity was growing rapidly, and it continued to rise toward the top position.

"Congratulations to Professor Omi for winning four Nobel Prizes! »

After everyone saw this headline, they couldn't help choosing to click.

[National Daily: Congratulations to Professor Omi for winning four Nobel Prizes! They are the Nobel Prize in Chemistry, the Nobel Prize in Physics, the Nobel Prize in Medicine, and the Nobel Prize in Peace! Professor Omi is the first Chinese citizen to receive these awards!]

[National Daily: Since the opening of the Nobel Prize, the Nobel Prize has never been awarded to the same person, Professor Lin, and made history! But he is worth it! Let us congratulate Professor Omi!]

[National Daily: Let's review the academic achievements of Professor Lin.]

[National Daily: Mathematics. Professor Lin successively answered Zhou's conjecture, twin prime conjecture, hail conjecture, Hodge's conjecture, Riemann's conjecture... and was selected as the recipient of the Fields Medal. It is worth mentioning that the Fields Medal is known as The Nobel Prize in Mathematics! Belongs to the highest honor in mathematics! He is the emperor of mathematics!]

[National Daily: Computer. Professor Lin invented a carbon-based lithography machine and a carbon-based chip. The leaps and bounds have improved the performance of mobile phones, and let us enter the game world into reality. He is the creator of the chip!]

[National Daily: Chemistry ~~Professor Lin invented chemical batteries such as super batteries and super batteries. As a result, the endurance of mobile phones and new energy vehicles has undergone earth-shaking changes. This not only makes our lives more convenient, but also greatly reduces exhaust emissions. He is the guardian of the earth!]

[National Daily: Physical aspect. Professor Lin invented the earthquake predictor. This invention can detect earthquakes in the next 5 days, giving us more protection in front of nature. He is the guardian of mankind!]

[National Daily: Medical. Professor Lin has developed insulin rehabilitation medicine. Diabetes is one of the top ten diseases in the world! According to statistics, the number of diabetic patients in my country alone exceeds 100 million! Countless people are tortured by diabetes, but insulin rehabilitation medicine can treat diabetes very well. He is an angel who saves the dead and heals the wounded!]

[National Daily: In terms of peace. The earthquake forecaster invented by Professor Lin has saved countless people from suffering from disasters. He is the elite of peace!]

.....

PS: !

“.

The comments under the National Daily have grown rapidly.

1,000!

10,000!

100000!

[After dusk in 1996: Nobel Prize in Physics, Nobel Prize in Chemistry, Nobel Prize in Medicine, Nobel Peace Prize! The four Nobel Prizes were all won by Professor Omi! Professor Lin YYDS!]

[Gu Gu: The emperor of mathematics, the creator of chips, the guardian of the earth, the guardian of mankind, the angel who rescues the wounded, the elite of peace! Hearing the evaluation of Minzu Daily, I don't know why, my eyes suddenly became a little wet!]

[Langji Tianya: Inexplicable excitement!]

[Shangguan Ming: Isn't this spreading blood than the Bo people?]

[Free as the wind: If I remember correctly, this is the first time that the National Daily has sent so many Weibo to one person in a row?]

[Hello tomorrow: I think this is because the National Daily has mistaken Weibo as a circle of friends.]

[No one loves sand sculptures: Either you don't win the Nobel Prize, you get 4!]

[Qian Renxue: Professor Lin, awesome!]

[Why not: Professor Lin, awesome!]

[Luo Shang: Professor Lin, awesome!]

.....

Omi paid no attention to the news published by the National Daily.

He doesn't care, but many people are so excited that they can't be on their own anymore.

.....

Jiangbei University, Office of the President.

Principal Shen Liang looked at the meager news and exclaimed excitedly: "Good, good! Great!"

He picked up the phone and was just about to dial Omi's call.

But, soon, he put it down again and murmured: "No, you have to congratulate it in person!"

While talking, he made three steps and two steps, and even walked and jumped towards Omi's office.

That looks like...

It was like a kid who had just received a certificate, and was extremely happy.

Shen Liang would be like this, but it was normal.

He is an educator and a Chinese scholar.

What all Huaxia scholars most expect... and most regrettable thing is that no Chinese Nobel Prize winner in the field of science has appeared.

Now, this expectation has finally been realized!

Moreover, it achieved the Nobel Prizes in the three scientific fields of medicine, chemistry and physics at one time.

More importantly, this person... is Omi, Omi from Jiangbei University!

When Shen Liang came to the office, the dean of the School of Mathematics, the Dean of the School of Chemistry, the Dean of the School of Medicine, the Dean of the School of Physics, and many professors had already arrived in the office.

However, in the office, there are only students such as Hao Zhiwu, Nie Zhenjiang, Xia Bing, Xia Xue, where is the teacher Omi?

Hao Zhiwu said: "Professor Lin said that there is something to deal with during this period, so he may not come to school in the next few days..."

Shen Liang, the dean, and many professors looked at each other with helpless expressions on their faces.

It seems...congratulations in person is not enough.

However, this helplessness came quickly and went quickly.

After a while, their faces were completely filled with excitement.

"Our School of Chemistry prepares to conduct large-scale seminars with the topic of super batteries and super batteries..."

"Our School of Physics is about to prepare a seminar on earthquake predictors..."

.....

Hearing what everyone said, Shen Liang couldn't help but nodded and said: "Everyone should work hard together, and we must do a good job in the guidance and promotion of Professor Omi in all directions. This... is the most important thing for our Jiangbei University for a long period of time. matter!"

"Yes!" everyone said in unison.

.....

When Omi saw that he had won the Nobel Prize, the reactions of Hao Zhiwu, Nie Zhenjiang and others, as well as the fierce discussions on the Internet, made Omi realize that it would be very troublesome next.

Omi hates trouble.

Therefore, he left Jiangbei University directly and took several days of leave.

At this time, Omi had already arrived at Panlong Villa.

He was lying on the soft sofa, swiping his mobile phone, and eating exquisite snacks from a two-Michelin-star restaurant, which was extremely cozy.

In a blink of an eye, it was the next day.

The heavy rain last night filled the morning air with a sweet smell.

The little caterpillars hiding in the tree hole couldn't help but crawl out to breathe the sweet air.

"laugh!"

When these caterpillars were intoxicated, a ferocious and terrifying giant bird suddenly flew over from a distance, and with its terrifying steel beak, it pecked down and ate the caterpillar.

"I ate another worm!"

A little bird next to him said: "I also ate three in total!"

"continue!"

In the cheerful cry of the little bird, Omi slowly opened his eyes.

He glanced at the phone habitually, and a text message had already appeared on the screen.

"0:00, China Merchants Bank remits 36,790,010 yuan."

Then, Omi focused on the sign-in system.

"Sign in!"

【Ding! The sign-in is successful, congratulations to you, get the Time Restaurant. 】

See here...

Omi's expression moved slightly and said, "At last it's not 10 million yuan."

"Time restaurant? I heard Hao Zhiwu say a while ago. It seems to be a restaurant with very good taste..."

"Cuckoo!"

At this time, Omi's stomach let out a cry.

"It's okay anyway, let's go to the Time Restaurant for dinner later, which can be regarded as a visit to your own store."

After speaking, Omi slowly got up.

After washing for a while, he picked up the key of Cullinan's car and walked outside.

"boom!"

Depressing the accelerator, the Cullinan V12 engine roared like a beast and galloped away.

The security guard standing at the door hurriedly stood upright like a soldier undergoing inspection.

At this time, the morning peak had already passed, and every road seemed relatively empty.

About half an hour later, Omi arrived at his destination...Time Restaurant.

This restaurant has a total of three floors and occupies a huge area. The whole decoration is very warm and comfortable, which makes people feel like they are home.

A round-faced woman with a height of about 155~~ is holding a mobile phone and came to the gate of Time Restaurant.

She pointed to the phone and said: "Good morning, everyone! Recently, I heard many people recommend Jiangbei's Time Restaurant. Today, I will taste it for everyone!"

"Come and see if this restaurant is as delicious as everyone recommends!"

The round-faced woman's name is Li Haiyan, a gourmet anchor with 3 million fans in Douyin... Haiyan.

Li Haiyan's main style is to explore the store and be responsible for appearance.

Generally speaking, a woman with a round face of 1 meter 55 is somewhat different from her face value.

However, her appearance in the live broadcast was strangely transformed into a melon face, big eyes, and fair skin like jade. The whole looked like a beauty from a comic.

This... is exactly the magic of Douyin, possessing the magical ability to completely change the appearance of people.

Then, Li Haiyan turned the camera to the door of the Time Restaurant.

[Tara Kira: Great, I've long wanted to go to the Time Restaurant to try it.]

[Xia Mi Xiaoyaner: Just looking at the decoration, I think it's very good.]

[Xuanyuan Longyi: With such a tall hotel, when it's over, it's going to expose Haiyan's appearance before the world.]

[Grave of Heaven and Earth: Little Haiyan, go in quickly.]

[Trembling BB: Sponsor a little so that Xiao Haiyan can't pay for something to eat later.]

...

With more and more barrage, so did the rewards.

Li Haiyan's small eyes directly smiled into a slit.

However, in the live broadcast room, it turned into a meniscus shape, which is very beautiful.

As a result, more and more rewards.

Then, Li Haiyan strolled towards the time restaurant.

When she saw the wide open space and luxurious lamps inside, she couldn't help but opened her mouth wide, her face full of admiration and shock.

"Wow! This is too beautiful!"

Then, she sucked her nose vigorously, and said: "The air also has a very fragrant smell."

No one noticed, there was a slight disdain at the corners of her mouth.

The barrage in the live broadcast room rolled again.

[A visitor from the earth: It's over, it's over, Xiao Haiyan is embarrassing again.]

[JJ is too cold in winter: Haiyan, low-key, low-key! You need to know, you are in the big dining room now.]

[Lonely living in the sea: Don't ask too much about Haiyan, after all, she is just a cute little girl.]

...

At this moment, the waitress standing at the door with a face of Guazi smiled and said, "Welcome."

Li Haiyan seemed to notice the waitress and once again exclaimed, "Is this a high-end restaurant? The waiters are so beautiful and sweet!"

Although I said so.

However, there was another undetectable disdain on her face.

Studio.

[Prologue actor: It's over, it's over... Haiyan is completely hopeless.]

[Healer benevolence: Haiyan, you have to remember that you are a great food anchor.]

...

The waitress's pretty face blushed slightly.

She has never been praised in person like this.

Li Haiyan seemed to have discovered the New World, and said, "Wow! The beautiful sister blushed, so cute."

The Guazi face waitress said a bit, "This...do you have an appointment?"

Li Haiyan said, "No, do I need to make an appointment here? Then I can't eat it today?"

The Guazilian waitress said: "That's not the case, but you may not be able to go to the place reserved by others."

"It's good to eat, it's good to eat." Li Haiyan breathed a sigh of relief, and patted her valley lightly.

Then, Li Haiyan walked inside under the leadership of the waitress.

When I passed the small bridge and flowing water in the middle of the restaurant and the vivid white crane statue in the middle, I was surprised: "Wow! There is actually a small bridge and flowing water in the hotel, and there are also white cranes! It's so beautiful!"

"No, I want to have a beautiful photo with Baihe."

After speaking, she moved the phone to Baihe and herself, and then pressed the shutter button.

Finally, Li Haiyan came to a position by the window.

The waitress asked, "Madam, what would you like to eat?"

Li Haiyan said: "I have to ask my fans first to see what's delicious."

Then, she directly cast her gaze on the live broadcast screen.

[Jiuyuan Promise: Beef! The M5 steak of Time Restaurant, this is their signature.]

[PP: 18 delicious, very delicious.]

[With a smile: 10 catties of large lobsters!]

[MMMM: Right, right, 10 catties of big lobster, and golden fish!]

...

Li Haiyan said: "I have an M5 steak, which is as delicious as 18, 10 catties of large lobsters, and golden fish... well, another regular soup."

The waitress couldn't help but hesitate and said, "Do you have any other friends here?"

Li Haiyan said, "No, I'm the only one."

"Then these dishes may be a bit too much..." the waitress kindly reminded.

Long-winded!

A look of boredom appeared on Li Haiyan's face.

However, she still smiled and said, "It's okay, I have a lot of appetite and eat a lot."

When the waitress heard it, she couldn't say more, and said, "Okay, please wait a moment."

Studio.

[Bin Bin: This waiter is still worried that Xiao Haiyan will not finish her dynasty. He really underestimates Haiyan.]

[KT: Isn't it? Although Haiyan is small, but the appetite is not small at all, this is why I don't marry Haiyan, and I can't afford it.]

[Big guy: Get f*cked, just you, still want to marry Haiyan? Haiyan is mine.]

[Temporary discussant: 10 catties of large lobsters! I really want to see Haiyan's expression when she sees a lobster bigger than herself later.]

...

I have to say that the efficiency of Time Restaurant is extremely high.

It didn't take long for the exquisite food to be served.

There are 18 bowls of this delicacy, and each bowl is very delicate and small.

This...is one of the signatures of Time Restaurant, 18 delicious.

Li Haiyan said excitedly: "Wow! I can't bear to eat such good-looking food."

After speaking, she directly picked up a delicious meal and put it in her mouth.

"Yeah! It's delicious!"

...

Studio.

[Missing: Such a beautiful beauty, why is she not eating so much?]

[Road of Shura: Can't bear to eat? I have seen water coming from the corner of Haiyan's mouth.]

[Mo Wentian: Saliva? where? Suck!]

[A mermaid incarnation: Xiao Haiyan, pay attention to your image, you are a beauty, why are you still licking your fingers?]
