Omi's expression changed slightly.

Accumulate power and explode in an instant!

This is definitely a good skill for beheading the enemy by surprise.

Then, the two continued to hang out.

During this period, Omi detected a broken king-level sword, a flame crystal, and a bottle of life, and shared 60 spirit crystals.

At the same time, he learned a little more about the universe.

After Omi returned to the hotel suite, he first picked up the rusted king-level broken sword, followed the instructions of the system to unlock the seal, and then lightly touched the slate table in front of him.

"Wow!"

The slate table was like tofu, and was instantly broken in two.

Omi couldn't help but exclaimed, "Is this a king-level weapon? Awesome!"

Then, he put his eyes on the bottle of life, opened the restriction according to the system prompt, and saw a white liquid with great vitality inside.

Omi just took a breath, his whole body immediately became extremely relaxed, and the pores all over his body opened.

"Now, as long as I still have one breath, I'm afraid I can immediately return to my peak state after drinking a drop!" Omi exclaimed.

Immediately afterwards, Omi took out the flame crystal.

This is a dark red stone.

Omi slowly unblocked according to the system prompt.

“Wow!”

He untied it a little, and the temperature of the entire suite shot up immediately, the air suddenly distorted, and smoke gradually emerged.

Omi hurriedly sealed it again.

He said in horror: “What a terrifying temperature, what a pure flame energy! When I find a place to unblock it tomorrow, I will definitely be able to greatly improve the fire power of my five elements!”

When Omi said this, the whole person became extremely excited.

Today, he also has some understanding of the spiritual crystals and treasures of the universe.

Whether it is the bottle of life, the broken sword of the king level, or the flame crystal, if you take it out and sell it, the price is at least tens of thousands or even hundreds of thousands of spirit crystals.

And he only spent 50 spirit crystals!

The system is really good!

In the end, Omi took out the Sky Soul Orb again, and after unsealing it, he directly recognized it as the master.

Immediately, Omi’s soul had a strong protective cover.

At the same time, his soul was also nourished by a mysterious force, constantly solidifying and becoming stronger, very comfortable.

After doing this, UU read www. . The figure of Qin Dachuan appeared in Omi’s mind.

The Heavenly Soul Orb is definitely a very good treasure.

Originally, the Sky Soul Orb only needed 1 Spirit Crystal.

As a result, under Qin Dachuan’s troubles, he finally spent 15 spirit crystals.

More importantly, if it was because of Qin Dachuan's troubles and the attention of others, such a wonderful Sky Soul Orb might not be in his hands at all.

Thinking of this, Omi's expression gradually turned cold, and he focused his attention on the curse technique.

[Whether to consume spirit crystals to curse Qin Dachuan?]

"Yes!"

"Crack!"

The next moment, a spirit crystal in Omi's hand shattered instantly, and disappeared as a powder.
