

M Road

Chapter 138

Zhang Fan entered obstetrics and gynecology. There are only two male doctors in obstetrics and Gynecology, and the others are female doctors. Obstetrics and gynecology are also despised in hospitals.

Surgery says they belong to internal medicine, and internal medicine says they belong to surgery. There was a transferred doctor who entered obstetrics and gynecology in the first department and made some sutures in obstetrics and gynecology.

The second Department went to general surgery, and the doctors laughed at it for a long time because of the problem of suture technique! This is the chain of contempt of the hospital.

Gynecology has its own treatment room. Those who do not need to enter the operating room for some small operations are treated in the treatment room, which has a heavy bloody smell. The smell of blood in the treatment room is different from the general smell of blood. The smell of blood here is stronger.

Female gynecologists are generally stronger and a little masculine than those in other departments. Gynecology needs strength, and those who are weak can't do it.

And the female gynecologist's voice is not small. Zhang Fan heard the female doctor's loud voice outside the Department, "hurry up, gauze!"

Obstetrics and gynecology is also a department with great responsibility. Once an accident happens, one body and two lives will often be killed. The state pays more and more attention to newborns and pregnant women. In general, if there is a death in the Department, as long as it is not a medical accident, there is no need to report to the hospital, but obstetrics and Gynecology can't. If the pregnant woman dies, it is a major event. The hospital should report not only to the hospital, but also to the Health Bureau. Obstetrics and gynecology is also a department with high incidence of disputes.

Babies from the mother to the outside world suddenly change an environment. Pregnant women from pregnancy to delivery, the rise of various hormone levels and various physiological changes can really be said to have climbed around the gate of hell. These changes have led to too many unpredictable things.

No matter how careful you are, there will be accidents. One corpse and two lives are like thunder and

destruction for a family. Therefore, doctors in obstetrics and gynecology are also under great pressure. For a long time, they are depressed, have few good tempers, and talk with a gun. They are not born like this. Sometimes they are helpless! Please understand.

After entering the Department, Zhang Fan followed Xiao Hong, a middle-aged woman, who was in charge. She was strong, talked and worked very fast. This half year, it's Xiao Hong's turn. This group is obstetrics.

Pediatric crying can be tolerated. Children's crying makes people anxious. The cry of gynecology is really worrying.

On the first day of duty, Zhang Fan realized that it was not easy to be a woman and a mother. Xiao Hong's nine bed, a 28 year old pregnant woman, has been in labor for two days, and there is no sign of delivery. The cold sweat of pain flowed continuously.

Her husband has cried into tears, but the pregnant woman is very strong, because the fetal position and fetal aspects are very good, so she should adhere to natural delivery.

On the delivery bed in the delivery room, a lonely man lay there, writhing in pain. This place is full of pregnant women waiting to give birth. Family members can't come in. Nurses and doctors are very busy and don't have time to comfort her. It's just that nurses will check her according to time.

The pregnant woman in bed nine kept moaning with toothache. Her family brought in food and pulled the curtain around the hospital bed.

"Liping, no, let's have a caesarean section. You're in such pain that I'm dying. Really, let's have a caesarean section. "

"It's all right! It's really okay! The baby who gives birth naturally has a strong sense of direction and is not easy to get pneumonia. I must give birth naturally. " He said it was all right, but he grabbed his husband's hand.

"Liping!" My husband cried silently.

"Don't cry, no, the baby is coming out. He's starting to come out!" The pregnant woman said anxiously to her husband. She felt a sense of falling.

"Doctor! Come on! " My husband got up quickly and knocked out his lunch box.

"Shout what shout! Get out! " Xiao Hong saw that the pregnant woman was about to give birth, and said to her husband. The husband of nine beds is a little reluctant to go out. Watching his wife suffer, he is

really uncomfortable.

"You hear me, get out!" Xiao Hong's voice raised several levels and directly pushed the pregnant husband out of the door.

"Push! Come on, come on, hold your breath and push down. yes! That's it. come on. Come on. " Midwife, helping pregnant women give birth. Zhang Fan stood aside and his heart was pulled together. It was too painful.

The pregnant woman shook her head and head in pain, but in this way, her lower body kept as still as possible. This is not Superman, this is the power of maternal love“ Go and give her a drink of Red Bull and a bite of chocolate. She's running out of strength. " Xiao Hong said to Zhang Fan.

Zhang Fan quickly opened Red Bull, took chocolate and fed it to the pregnant woman, which would not hurt much. The pregnant woman's tears and sweat mixed together. Looking at the things sent by Zhang Fan, he ate and drank while it didn't hurt much. Red Bull gadev is really tired!

After a while, the pain began again“ Come on, push down, shrink your anus and hold your breath! Come on, come on, the child's head is coming out. Come on, come on, come on, come on! No more force, the child will lack oxygen! Come on! " Xiao Hong's voice and that of the midwife grew louder and harsher.

The pregnant woman tried her best, "ah!" The pregnant woman did not know whether she was relieved or lucky, or it was really the last force. She shouted. Finally, the child was born!

Zhang Fan's hair stands on end! Covered with goose bumps. Clean the child's airway, cut the umbilical cord and pat his ass, wow! WOW! WOW! The crisp cry sounded! For the first time, Zhang Fan felt that the child's cry was so wonderful.

The child's birthday is really the mother's Good Friday!

"Doctor! Is it a boy or a girl? " The pregnant woman asked Zhang Fan. As soon as Zhang Fan wanted to open his mouth and tell the pregnant woman, he heard Xiao Hong say, "shut up. Both men and women are your children. Now is not the time for you to worry!"

Zhang Fan, who wants to talk, shut up quickly! Pregnant women have to wait for the discharge of the placenta. The child will also be very busy. Press the footprints and weigh. Because it is a natural birth, the child's head is like a stick, ugly!

A ray of sun shines into the delivery room! it's dawn! The pregnant woman rushed through the door of life and death and fell asleep quietly! The child is right beside her. Dad, Grandpa, grandma, grandma and grandpa quietly surrounded them. There was no sound at all, but everyone was filled with a happy smile! Obstetrics is a wonderful department. Pregnant women waiting to give birth say they don't give birth, and there's nothing moving. But it is said that students are born together. Just after one delivery, there are two more to be delivered. There are only three midwives in the evening. They are too busy to

help Xiao Hong as a midwife and Zhang Fan as a itinerant nurse.

"Dr. Zhang, stimulate the breast (a) head of pregnant women." Zhang Fan, wearing plastic film gloves, tilted his head and kept fiddling with the breast (a) head of a pregnant woman. Stimulating this place is to let pregnant women secrete progesterone, which has the effect of inducing labor.

Repeat shouting, rest, eat chocolate, drink red bull, shout again, rest again! Women with a longer labor process almost lost their strength in the end.

Those pale pregnant women in TV dramas are not exaggerated at all. The actual situation of pregnant women is more exaggerated than TV dramas. His hair was disheveled, his lips were bloodless and dying.

In modern life, the improvement of pregnant women's nutrition and the reduction of pregnant women's physical labor are particularly easy to cause dystocia. In the past, a child had eight kilograms. That's all strange news! Now there are eight jin children everywhere.

After a night shift, Zhang Fan was a little overwhelmed. It was too painful. Doctors who work in this environment all year round can't survive without a heart of stone.

Compassion is sometimes not a good thing. When pregnant women lose their strength, good persuasion is of no use at all. It is the most useful way to hit the head.

"Come on! Force. " A loud voice can directly wake up pregnant women and give them more strength.

Eating, drinking, obstetrics and Gynecology, having children is a happy event. Having a noble son or a daughter is something that makes the whole family happy. Of course, it is inevitable to thank the doctor.

Other departments are not allowed to take gifts on the table. But the hospital is not very strict about obstetrics and gynecology. The obstetrics office keeps fruit and milk all year round!

There are exquisite families that will send eggs to doctors and eggs wrapped in red paper. There are more superstitious families. Three days after the child is born, the doctor receiving the birth must give a nickname. It is said that the doctor receiving the birth has evil spirit and can prevent the child from suffering from all kinds of diseases.

I can't leave for the next night shift because it's Monday. Gynecological Pediatrics joint ward round, and the two directors join hands in ward round. The formation is very big, cheering a group of people.

Zhang Fan had the courage to fight in pediatrics. Although he didn't win, he dared to stand up and protect the nurse. This made Pediatrics enthusiastic about Zhang Fan.

"Zhang Fan, tomorrow is my birthday. Go singing. Remember to buy me a birthday present! ~" This is a small resident just scheduled for pediatrics.

"Great Xia Zhang, what's the matter? You look listless. It's not like your style." The pediatric director looked at Zhang Fan and asked jokingly.

"Hehe, good director. I worked last night and stayed up all night!" Zhang Fan said with a smile. He thought he would get some sympathy. As a result, the pediatrician said, "it's just like this overnight. You should exercise more! Young kidney loss is not a good thing! "

Before starting the ward round, the pediatricians teased Zhang Fan. LV Shuyan was very jealous. She had entered the Department. Although the two departments make rounds together, they are usually very serious. There is no such laughing scene today.

"You're good! It's popular everywhere! Or we'll settle in gynecology in the future. Our two hands are definitely the golden partner of gynecology. "

"Oh! Miss Lu! I didn't expect to see you here! " LV Shuyan is in gynecology and Zhang Fan is in obstetrics, so after they left the urology department, they never met again. They are both people in gynecology and obstetrics. Zhang fan can't refuse directly, so he deliberately digress from the topic!

"Fuck you!" LV Shuyan is a little embarrassed. Although she is a graduate student, she is also a resident doctor. Zhang Fan, a teacher, makes her a little embarrassed.

Although I am tired after a night shift, today is a big ward round on Monday. As long as I can move, I have to follow the directors.

The connection between obstetrics and Gynecology and pediatrics is children, so the ward rounds of the two departments focus on newborns, one room by one, maternal and child.

At two o'clock in the afternoon, the ward round was over, and everyone rushed back to the Department. Now it's not time to eat. The ward round takes too much time, and a lot of work on that day has not been finished.

In the Department office, there are a group of family patients to be discharged or changed. When these things are finished, it's more than three o'clock in the afternoon. I'm really hungry. Have a bite of chocolate!

These jobs are the work of residents and transfer doctors! After Zhang Fan finished, he took a bath, lay in bed for less than five minutes and went straight to sleep. Before going to bed, I sent a message to Shaohua. I don't eat at night. I don't have to wait for him. I want to go to bed!

Jing Shu got her license and drove steadily. Although she didn't dare to run far, she still had no problem around. Shaohua got off work. As long as she was ok, they drove out. Although Shaohua is busy reading, Zhang Fan is too busy to attend to Jingshu. She is the only one to accompany Jingshu. Besides, Jingshu doesn't have a few days to stay.

Gynecology is supported by a group of masculine women. It can be said that there is no day or night. What do you fear most when you are a doctor? What do you fear most about the phone.

When ordinary people sleep and rest, when the doctor's phone comes, don't think about it. Dress and answer the phone! Nothing good, just a word, "come on, there's an emergency."

The caller doesn't care whether you're married or not, and doesn't worry about whether you're unwell. The emergency call is the charge number! Doctors who have worked for more than two years are particularly sensitive to the ringing of the phone. A phone call can cause palpitations.

The sudden ringing of the phone can make the doctor's adrenaline secretion rise and his heart beat faster!

There was a joke in the hospital that an injured doctor was in shock and the medication effect was very poor. When the doctors were helpless, the president said, "sound the alarm! He called and a patient wanted to be rescued. He wasn't dead yet. As a result, the Shock Doctor woke up! "

The pain of all walks of life is not unreasonable.

The decoration of Zhang Fan's house came to an end under the supervision of Shaohua's father. The old man didn't supervise enough! The house decoration in LAN city is also coming to an end. They are all simple decoration. There is no complex decoration, so the speed is also very fast.

Shaohua has decided to take her mother and Zhang Fan's mother to send Jing Shu to college. The plane tickets have been bought. Zhang Fan doesn't have time to go. He feels a little guilty for his sister. However, with Shao Hua, he can rest assured that Shao Hua is much stronger than Zhang Fan in some aspects.

Li Liang's study is over. The life, study and work of the municipal hospital for half a year are full and tired! Although the difficult operation can't be taken down, there are not many problems with the general simple internal fixation. Li Liang had to leave because he didn't give up. There's no way he didn't prepare it in the municipal hospital.

Zhang Fan, Shao Hua, Wang Yanan and Li Hui accompanied Li Liang. After half a year's study, the little fat man's round face is a little thin, and Li Liang can bear hardships. Although he can't do Zhang Fan's abnormal efforts for half a year, he is also praised by the doctors of the first Department of orthopedics.

Although the little fat man's face value is not high, his EQ is high. Now he can communicate with Wang Yanan by text message. Although it is not much progress, it has also taken the first step of the long march.

Li Hui is much better than before. He is in contact with a biology teacher in a municipal high school. But it's just the beginning.

The atmosphere for dinner was good. There was no sadness of parting. Li Liang wanted to be very open. He had to be able to work or his girlfriend. As long as he worked hard, he had no regrets.
