## Chapter 140

The days of Obstetrics made Zhang Fan really realize the difficulty of a woman. In China in modern society, few people have experienced life and death, and every mother is a person from the gate of hell. Only the mother knows the hardships!

The decorated house is completely out, but it can't live yet. The paint inside smells too strong. The windows are open all day and ventilated. Zhang Fan plans to let Shaohua's parents move in. Their old house is a little old and too small.

They are both parents. There is no difference between you and me. Zhang Fan once said to Shaohua, "your parents are my parents!" You have to do what you say!

But this matter must be discussed with Shao Hua first, then I will discuss with Shao Hua mother again, and finally notify Shao Hua's father. Although the usual home is Shao Hua's mother has the final say, this event must let Shao Hua father nod.

Ma Wentao has begun to decorate his hospital. He has found three retired directors in the provincial capital, including the directors of Endocrinology, traditional Chinese medicine and respiration. The director of the digestive department of the municipal hospital has also been contacted.

There are fewer surgeons. At the beginning, he is not going to set up a general hospital. The surgeon will just set up a hand and foot surgeon. The doctor of hand and foot surgery is Zhang Fan. For Zhang Fan, that is, the thing of more money and less money, he can win it by giving some shares. He doesn't find it difficult. A little doctor has survived 10000 a month in a public hospital.

The main cost is decoration and some equipment. The salary of doctors and nurses is paid monthly, not much, more than 100000 a month. The decoration cannot be luxurious. Many private hospitals are extremely luxurious. In fact, ordinary people still account for the majority of the people who see a doctor. A luxurious hospital directly blocks the ordinary people at the door. It's OK to be professional. Therefore, he specially invited the dean of women and children to help design. Naturally, the consulting fee is indispensable. He is very good at being a man~

Gynecological duty is the last thing Zhang Fan likes to do. He stays in the delivery room and listens to the screams of pregnant women. Every time he is on duty, he is like giving birth to a child! But if you choose this line, you can do it if you can't. carry it to death!

In the evening, Xiao Hong brought rice to Zhang Fan. Horse meat Naren is a kind of food mixed with horse meat, noodles, onions and green pepper. It tastes good.

"Eat more. There are several waiting to give birth today. It is estimated that it will be another all night." Xiao Hong said while eating.

"Well, OK!"

"A few days ago, did you rescue a massive bleeding of an ectopic pregnancy?"

"That's the day when I was busy leaving the hospital after the last night shift. As a result, I was pulled to the operating room to help!"

"Deputy director Rouzi Guli praised you as a flower and suggested that the director ask you to do obstetrics and Gynecology! The director told me yesterday that he wanted to ask you what you mean first! We are short of male doctors like you in gynecology, and our department income is also good. You see, this ward is full every day! "

"Oh! Dr. Xiao, forget it. I really can't get obstetrics and gynecology. I've taken off a layer of skin this month. If I engage in obstetrics and gynecology in the future, I guess I'll have depression! " Zhang Fan of other departments will be vague. This obstetrics and gynecology department really doesn't dare to be vague. He really can't do it.

"Oh! The director and I both guessed that you didn't want to do obstetrics and Gynecology, so the director didn't ask you, just let me ask. Not many boys are willing to take the initiative to do maternity, and you are excellent. In fact, maternity is also very good. You see, every day you see the birth of a new life, you have a sense of achievement. " Xiao Hong continues to deceive Zhang Fan.

Zhang Fan made up his mind that he would never do maternity. He just said a flower. He didn't want to do it.

Zhang Fan did not want to do it. Xiao Hong was also unable to do so. Zhang Fan was very good. He would have many departments to rush. So it was not the Department that has the final say, but the doctor himself. After all, it is a two-way choice!

At eleven o'clock in the evening, the children in the pregnant women began to revolt one after another. The midwife was busy and Xiao Hong went to the stage to deliver the baby. When the pregnant woman delivered by Xiao Hong was fully open and the child was about to come out.

The midwife at the other table shouted, "Dr. Xiao, come here! There is something wrong with this child! " Xiao Hong can't spare time. The child here has been caught in the birth canal, "go quickly! Go and have a look! "

Zhang Fan ran over and saw that the child's umbilical cord had been cut. The nurse hurriedly said, "there is a heartbeat, but there is no breathing." Without saying a word, Zhang Fan pulled the mask off his face and flattened the baby. Stretch out your finger and take out the baby's mouth, which is to remove foreign bodies in the baby's mouth.

I can't care about the meconium, fetal fat and amniotic fluid on the child's face. Open your mouth and cover the child's nose and mouth. Artificial respiration! One, two.

The child's mother lay on the delivery bed, crying silently. She didn't even dare to make a sound, for fear of disturbing the doctor! After many hardships, the child was born without breath. Lying on the maternity bed, the mother felt like a knife in her heart.

"My baby! I haven't even looked at you! You must insist. Mom is willing to trade her life for you! You must hold on. " She dared not open her eyes. The running water had flowed through her face and the sweat soaked delivery bed!

It will take up to one minute for the child to breathe independently. It's successful. The rescue is successful! Zhang Fan, who was full of bitter taste, didn't care to gargle and started spanking when he mentioned the child.

Finally! The little broken child finally cried“ WOW! WOW! WOW! " The loud cry made the doctors and nurses breathe a sigh of relief. They didn't feel nervous when rescuing. But when Zhang Fan mentioned the child spanking, his heart was in his throat. If he didn't cry again, he would be a dead baby! No chance to rescue!

The child's mother opened her eyes, looked up and struggled to see her child, "crying! The baby is crying! The child has been rescued! " The silent mother cried out. Although she was crying, her face showed happiness!

"What are you crying for? You can't get excited now. Here you are! Look at your child quickly. He's very healthy and scared us to death! " The nurse stood beside the young mother with the child in her arms.

This is as effective as the electric light switch. The child's mother stopped crying immediately, opened her eyes fascinated by tears and looked at the little man with a smile“ Baby! I'm mom! "

It may be that mother and son are connected. The child who hears the voice wriggles his lips looking for his mother's breath!

"Well, now I see. The child is safe! You can't be excited anymore. Relax and cooperate with treatment. Take a deep breath! " The nervous and sweaty nurse can't rest yet. She should appease the pregnant

woman, examine the child and prepare to sew the incision of side incision.

"After the examination, send the child to the intensive care unit!" Zhang Fan stretched out his tongue and explained to the nurse.

The mouth is too bitter. At that time, the situation was urgent and there was no time to think about it. Now relax and the mouth is too uncomfortable. The child's face not only has meconium, but also fetal fat. Zhang Fan's mouth is not only bitter but also greasy, just like a candle with half a mouth.

The temperature in the mouth can't reach the temperature in the abdominal cavity, and the fetal fat can't melt! You must rinse your mouth with hot water. After gargling several times, I still feel strange in my mouth!

Walking into Xiao hongdai's delivery room, Zhang Fan said: "the rescue has come, and the child has been sent to the intensive care unit."

"That's good. It's over here. Wait until I finish the side cutting. Xiao Li, come and wipe it. I just didn't notice that there was a little secretion in the anus of the pregnant woman! "

Zhang Fan listened and looked sideways. When the pregnant woman tried hard, she excreted a little stool.

After wiping the paper, the obstetric nurse said, "Hey, just listening to the rescue of the child next door, I didn't notice it, and I don't know if the child had feces!"

Zhang Fan vomited! Just throw up! Bile spit out!

The nurse is dying of wonder! This young man is really, just a little shit!
