

M Road

Chapter 142

Autumn tigers are rampant. Although it is very hot in summer and early autumn, the snow mountain in the distance is a large air conditioner. If the weather is hot for a few days, there will be rain.

Shao Hua hasn't come back yet. He took two old people to travel in East China. The farmers who finished the summer harvest have more money in their pockets and more hospitalizations. Zhang Fan usually runs in the county once a half month. Now he has to run almost once a week.

He didn't take Ma Wentao's words to heart. He didn't believe any shares or wages. The road of private hospitals is too difficult to go. Without a strong capital as a backer, it can only be a small fight or abduction! In addition, some people in a field have broken the rules, so that people can't believe private hospitals, so it's too difficult to establish a reputation.

And now Zhang Fan focuses on the amount of brush surgery, and the money is enough for his own expenses. There is no need to become a slave of money. After gynecological graduation, Zhang Fan took a three-day leave.

The practice examination in September is coming soon. Wang Yanan is nervous. He says that he has reviewed very well, but no one can guarantee that he can pass it before the results come out!

Li Hui finally talked about a stable object. The biology teacher of the municipal high school is tall and strong, but his skin is white, his voice is gentle, and his appearance is fairly past. Li Hui's lean body nestled in her arms like a child. Li Hui was also helpless. He was supposed to play, but the other party was pregnant.

There are many brothers in the woman's family. After being interviewed several times by the woman's family, Li Hui peed. There's no way to go straight to the hospital without peeing. In Li Hui's own words, "speculation into shareholders!"

On the last day of Zhang Fan's graduation, he found Li Hui taking her girlfriend for a pregnancy test. Zhang Fan wanted to open his mouth and was blocked back by Li Hui in advance. "Don't go after work. We'll invite you to dinner. Let's have a pregnancy test first! "

The biology teacher was very polite. Although he didn't speak, he smiled at Zhang Fan.

This meal didn't go to little Sichuan. Because his girlfriend was pregnant, Li Hui found a porridge shop. Li Hui went after the pregnancy test. Zhang Fan arrived later.

"Come on, let me introduce you to my fellow and good friend, Zhang Fan, the future director of surgery. This is my girlfriend, Yang Yuanyuan, a biology teacher in high school. Zhang Fan, you have to bear more. She is pregnant and can't smell oil smoke. Drink some porridge. "

"Hello!" After saying hello to Yang Yuanyuan, Zhang Fan said to Li Hui, "it's all right. You can eat anything. I should invite you for the first time. Why didn't I hear a message in front, and suddenly began the pregnancy test!"

"Everyone was busy and didn't want to trouble you. They were ready to inform you when they got married. As a result, they didn't expect to win the prize! We're going to get married. We'll have a wedding at eleven. " Li Hui can't say whether he is happy or unhappy, but suddenly he seems to have calmed down a lot.

"Oh! oh Then I congratulate you in advance. Has the hotel been booked yet? " Other things Zhang Fan is not easy to ask, so he can only ask these superficial things.

"I've booked the Junfu hotel. Li Hui often mentioned you and said you were his only friend here. We were a little unhappy with our family in front, so I didn't tell you. Please don't mind." Speak decently and generously. He is also a shrewd man. In one sentence, he said all the embarrassment.

"That's good, that's good. It doesn't matter to me. Just be happy."

Li Hui is so talkative and jumping off people that Yang Yuanyuan can't eat. He is considerate from beginning to end. He already looks like a husband. After dinner, Zhang Fan looked at Li Hui and carefully helped Yang Yuanyuan to take a taxi. He was very moved. After two years, his youth was about to enter oil, salt, soy sauce and vinegar!

What's the matter with Li Hui and Yang Yuanyuan? In fact, it's not simple. The old nurse in the digestive department helped connect the two people and introduced them. Li Hui took one gun and went down three ways with sweet words.

However, Yang Yuanyuan is not stupid. She is three years older than Li Hui. It's not appropriate to talk about a few. There are many dirty aunts and sisters at home. She is also anxious to get married. Moreover, as a teacher, she is not afraid of such timid people.

Li Hui wanted to have an abortion. As a result, after several big brothers appeared, they became like this. Yang Yuanyuan's family didn't treat the little girl badly. The house and car were dowry. The only

requirement was that Li Hui should be good to her daughter. Otherwise, the brothers are not furnishings. In small cities, people's requirements are not high, and you don't need to be rich. As long as you have a serious job, you are all human, and don't be contaminated with some pornography, gambling and drugs, you can get along. There are few romantic and romantic, although not romantic, but also peaceful.

Each one is going to start a family. In those years, several people who came to the frontier left and changed their careers. Several were admitted to civil servants, and few really worked as doctors. The doctor profession, looking at the scenery, in fact, the pain inside, who do who understand.

There are more than a dozen new people in the hospital, all of whom are graduate students. For only two years, the third class hospitals in the frontier didn't want undergraduates. Although these graduate students do not graduate from famous universities, this is the trend of the medical industry. They pay more and more attention to academic qualifications.

The siphon phenomenon in big hospitals is so severe that not only siphon patients, but also doctors. Some experienced doctors in some small hospitals around went to other places or large hospitals, and then patients began to gather in the municipal hospital.

County hospitals slowly began to shrink. For various reasons, the diseases that can be treated by surgery have also been transferred to the municipal hospitals. The hospitals in the city are full, and the doctors are overloaded with work. Rural hospitals are shrinking even more, and there are no surgery and obstetrics. In their words, it's a drugstore selling medicine!

With the extension of medical treatment time, patients are anxious and doctors are irritable, and there are more and more disputes. Have there been any disputes before? Yes! But not as much as in recent years. The state has vigorously developed key hospitals, first aid centers and pediatric centers in municipal hospitals.

In contrast, hospitals at the county and township levels are shrinking rapidly. Convenient transportation and smooth information have made county-level hospitals enter a bottleneck. How to reform the country and how to develop medical treatment in the future is a problem.

Doctors have higher and higher education, and fewer and fewer graduates can go to counties and townships. Doctors with specialist education can no longer enter the clinical department. As for the third class hospitals, each department is actually treating some basic diseases and doing the work of these county-level hospitals.

The most common is the appendix and gallbladder, the most common is the cold in the respiratory department, and the house prices around the hospital have secretly increased a lot in this year.

These are all happened inadvertently. Like buying a car, you have to buy private cars all over the street, whether necessary or not. Then it is difficult to park and travel.

Quarrels and fights are seen on the main road every day!

During the three-day holiday, Zhang Fan helped Li Hui clean up his new house for two days. It was in the development zone. Although it was small, it was also good. Maybe the previous dissolute life has dissipated Li Hui's passion and accepted his life!

They smoked and sat on the balcony. "After marriage, I want to apply for a fixed department. The latter departments don't transfer. There are more and more patients, and the new doctors are graduate students. You're ready to think about it earlier. The later the competition, the greater the pressure. Our education is a hard wound. " Li Hui said, looking at the starry sky outside the window.

"Well! Come on! Have you decided which department? "

"Breathe! The director of breathing has agreed, but this is not a problem for you. "

"That's good. You breathe well. If you want to get married, you should pay attention in the future. After all, you have grown up and have no time to play again. If you are a husband and father, you should have a sense of responsibility! ~"

"Ah! I just want to talk to you from my heart. What I regret most is Wang Sha. The rest are the clouds of the past! I really regret it! Seven years! The youngest seven years! "

"It's not necessary. People are doing well. You should cherish what you have now!"

"Yes!"

Both were silent! There is no grassland at home. I really dare not raise wild horses! Let the past go with the wind!
