## Chapter 145

After the operation, director Wang Weiping was rescued. It depends on the recovery in the later stage. This kind of fracture with high degree of injury is particularly troublesome in the later stage.

The most serious is fat embolism syndrome, which is the formation of fat particles. When fat balls enter the brain, it is cerebral embolism, and when they enter the lungs, it is pulmonary embolism. This complication will kill people and is not easy to prevent.

A series of complications such as accumulated pneumonia, ischemic necrosis and osteoarticular necrosis may occur. So when an operation is completed, the real treatment has just begun.

After the operation, you have to report to Ouyang. Zhang Fan won't go. The two old men were resting, so he found a stool to sit and wait. The operation is finished.

"Doctor Zhang, why don't you change your clothes first? Dean, they are already waiting for you in the office!" The head nurse in the operating room said to Zhang Fan.

"Oh! My legs are a little numb. I'll sit for a while!" Zhang Fan looked at the two people leaning against the corner and said to the head nurse. At this time, going out must be infinite, but Zhang Fan doesn't think of this limelight. It's not necessary. Before the operation, we are united as one. It's hard to say if the operation is successful. There are a lot of envy, jealousy and hatred. Let the two directors come out!

Chinese people are not good at this. They can pull forward with all kinds of hardships and hardships, but once wealth comes out, it will be in trouble! Pull your legs, pull the ladder, pull the ladder, anyway, you can't be rich!

After a rest, Zhang fanwei went out of the operating room with the two directors. Zhang Fan quietly followed him without much talk. He was not excited at all. Lao Gao and Lao Wang looked at him and nodded. Zhang Fan's performance is much better than that of them in those years. Only with this calm and stable character can he achieve great things and make a breakthrough in technology!

In the doctor's rest hall outside the operating room, when three people appeared, Ouyang led a group of people to stand up and applaud, and the flash kept flashing.

When the operation was almost over, the head nurse in the operating room reported to Ouyang. Ouyang quickly organized the doctors and nurses in the hospital, and then took the reporter to meet the three operators.

This scale of welcome has not happened in the hospital. Doctors who adapt to shadowless lights are somewhat shy in the face of flash lights, regardless of age!

Build momentum! Ouyang's best skill. Wang Weiping was shaped into a perfect doctor. He was injured on duty, and then the whole hospital was linked. Everyone was contributing. After the surgeon's hard rescue, the operation was successful! Among them, leading Party members rushed to the front line of blood donation! How perfect!

The municipal hospital led by Ouyang can suppress the Municipal Hospital of traditional Chinese medicine. It is not only the leading equipment, but also the comparison of presidents. The presidents of traditional Chinese medicine hospitals can not be compared with Ouyang!

Lao Gao followed the dean to receive the reporter. Zhang Fan was too young. Lao Wang spoke against people, so Lao Gao was more in line with Ouyang's requirements.

Gynecology out of school, now Zhang Fan has really become a celebrity in the hospital. People say hello wherever they go! People who used to be nodding friends at most will now stop and talk to Zhang Fanpan. In fact, we don't expect to get any benefits from Zhang Fan, but that's how people buy up rather than down.

Ouyang is more and more satisfied with Zhang Fan. He has good skills, calm people and special respect for his superiors! If she were not too young, Zhang Fan would be the best orthopaedic director in her mind!

In the medical office, the director of the medical office poured a glass of water for Zhang Fan himself. Zhang Fancheng was terrified! What does the medical office do! We protect doctors when we are outside, and we especially trouble doctors when we are inside, especially young doctors.

"Director! It's not appropriate. I'll do it myself!" Zhang Fan quickly stood up, grabbed the kettle and said.

"Yes, sit down! You may not know that Wang Weiping and I are classmates, but he is three years older than me. Although we are all old, the younger generation has grown up. You are the leader of the younger generation and are qualified!"

Zhang Fan, who said this, was a little embarrassed. "It's all the opportunities given by the teachers!"

"It's also the result of your own efforts. I heard a few months ago that you directly contracted the operation in the emergency department for some time. It pays off! Keep going! "

"Yes, director, I will."

"Take a drink and go directly to the dean's office. Your transfer list is ready, but the Dean wants to talk to you. I've been waiting for you this morning. "

Zhang Fan didn't dare to ink. After drinking two salivas, he went to the dean's office with a transfer list.

Zhang Fan knocked at the door, "come in!" Ouyang's voice sounded.

"Dean, are you looking for me?"

"Hehe! Sit down! Good, not arrogant and impetuous! Ready to pack up and go to the countryside! " Ouyang said with a smile.

"Going to the countryside?" Zhang Fan wondered.

"There is only one place in the medical system to evaluate the top ten outstanding young people in the city! If you want to get this quota, you must have the experience of staying in the countryside, so you will go to the countryside for a week tomorrow. "

"For so long, go to the county or the country." Zhang Fan doesn't want to go. There are few patients in the village now. It's a waste of time to go.

"Hehe! Still young! Do you know the importance of this reward? Go ahead. Don't worry about transferring. I know you like surgery. There are still many days for surgery. If you miss this opportunity, you'll miss it! "

Although Ouyang said it lightly, she took a lot of effort to win the quota. After she got the quota, many people greeted Ouyang. Although the Youth League Committee, the women's Federation and the disabled persons' Federation are relatively small organizations, there may be a large number of them. Ouyang gave the quota to Zhang Fan under pressure. She is going to make Zhang Fan a benchmark for the younger generation of the municipal hospital!

Compared with other units, hospitals don't pay much attention to this kind of thing. It can't be said that there is no such thing. Vanity Fair, regardless of size, men and women, may represent a take-off! If Zhang Fan knew this was the case, he might not really want to go. He has no intention of a career!

A few days after Shaohua came back, Zhang Fan had to go to the countryside again. Although he was a little dissatisfied, he couldn't help it. When Shaohua was going to send his sister, Zhang Fan gave Shaohua his salary card and bonus card. Although he didn't talk about the house with Shaohua, Zhang Fan thought it was right. People can enjoy a few years of happiness when they are old. If they have the

ability, they should enjoy their old age.

The place to go to the countryside is a Kazakh inhabited area, deep in the grassland. Three people went to the countryside to stay. A female teacher, a graduate student, worked in the Education Bureau. One doctor was Zhang Fan, and the other was a Uighur boy working in the animal husbandry bureau.

The vehicle of the Municipal Youth League Committee took them to the grassland, but Zhang Fan drove his own car. He still has business to be busy. There must be nothing to do in the countryside. If he has a car, he may be able to go to a cave or something.

In autumn, there are abundant water and grass in the pastoral area, the cattle and sheep have been fattened, and the herdsmen have begun to cut grass and sell livestock for the winter. This point is a small ethnic group. How can the government persuade them not to go to the designated place for winter and settlement.

A leader of the Youth League Committee was a little dissatisfied with Zhang Fan's driving, but there was no way. He was not a direct leader and his words didn't carry much weight! That is to say, in the car of the Youth League Committee, Zhang Fan has no collective sense of honor, and the municipal hospital has not selected a good candidate!

Those who can participate in this activity are not stupid. Even if they have no background, they are human spirits. Everyone is silent and pretends not to hear! It is clear which is more important for a small bureaucrat or a young man who can get a municipal advanced quota.

There are not many people in this small group, there are more than 40 people, many old people and many children. The young man of the animal husbandry bureau is called Maimaiti. He didn't say his name completely. There are many words behind him. If you say it all, it will become a water word count! The name of the education bureau is Tan Jie.

The task of the three of them is to examine the herdsmen, see a doctor and give medicine, persuade the herdsmen to send their school-age children to the settlement for school, and then help to see a doctor for livestock and guide how to raise livestock.

The herdsmen are hospitable. Doctors, teachers and veterinarians who can see animals are here again. The herdsmen are very happy and welcome them. Just met the child at home for circumcision!

Circumcision is an alternative adult ceremony in the frontier. Elderly herdsmen or elders in temples circumcise teenagers.

Family friends and relatives will come from afar to send blessings to the children. The children's home will also hold a banquet to entertain their relatives and friends. When they came, they were guests. Zhang Fan and several of them also attended the banquet. On the grassland, everyone sat around, singing songs of blessing and dancing happily. Then there is the key figure of the ceremony. Today's little balang is dressed up very strangely by his family! Very famous ethnic characteristics.

Zhang Fan has never seen such a ceremony. He is very curious! An old man carrying a bowl mixed with pepper, oil and some things Zhang Fan didn't know, sang songs he didn't understand, and sprinkled wine to thank God!

After these rituals were finished, the old man took out a polished knife and prepared for the last thing of etiquette! The child to be circumcised is very nervous! His face is red.

When the old man washed the things in the bowl, he began to light the knife. Zhang Fan unconsciously clamped his thigh, "no anesthetic, just dry cutting!"

The old man seemed to do this often. Several people grabbed the child and completed the ceremony in the child's cry. It really hurts! Zhang Fan's frightened face turned blue. Terror! Zhang Fan, who knows this level of pain, is really terrible!

"Won't you get infected in hot weather? The child won't hurt and shock! " Zhang Fan secretly asked Maimaiti.

"No, they all have their own secret recipe. They haven't been infected for many years! And we grassland people are very brave! " Maimaiti said proudly.

In the tent, Zhang Fan spent the first night. Although the weather was very hot during the day, it didn't work at night. The temperature dropped sharply.

The next day, the three started their own work. Zhang Fan took a sphygmomanometer, a hearing device and some simple common drugs.

The food in pastoral areas is single and lack of green vegetables. Most of them are made of animal fat and dairy products. Therefore, older people have diseases such as hypertension and hyperlipidemia. And because it is far from the city, there is almost no formal treatment.

About 40 people, the outpatient volume of a day is not enough. Zhang Fan finished his work in one morning and should prescribe medicine. This activity is really a wind activity. When Zhang fan leaves, the herdsmen finish their medicine and still do what they should do. It has no effect. After circumcision, the child pulled his leg and chased his partner on the grassland like a small crab!

It's not that they don't want to live better, because the grassland is far from the city, and the conditions for regular review are not allowed. This is not something Zhang fan can change. He can only try his best to do his own job.

On the morning of the third day, when Zhang Fan helped Maimaiti give an injection to the livestock, he received a call from Li Liang, "brother Zhang, director Chen quarreled with the dean and were suspended! He's going to resign, and I don't want to do it! Can you help us contact an emergency post in the municipal hospital? "

"What's going on?" Zhang Fan asked.

"I can't say a word or two clearly. We'll go downtown. Do you have time today?"

"No! I'm looking for you. I'm going to the countryside. I'll be in the county this afternoon. "
