

M Road

Chapter 150

Ma Wentao sat in the office thinking more and more and felt that something was wrong, "careless, let this trauma scare me and forget everything!" Ma Wentao patted his head in frustration. He was also a little dissatisfied with his performance.

"Doctor Zhang, there is a patient in the hospital. Come and have a look, right! Director Chen has entered the operating room!" Ma Wentao hurriedly called Zhang Fan. He doesn't trust Lao Chen. He knows how excellent Zhang Fan is.

Zhang Fan doesn't say much. Although he is a second-line class, he doesn't have to be on duty in the hospital. I was going to take a walk with Shaohua. I'm a little busy recently. They spend a little less time alone.

Zhang fan drives to the hospital. When he enters the door, Ma Wentao looks blue and white, as if he was frozen in winter "Go and have a look. The operation doesn't seem to go well. " Ma Wentao was afraid and angry. I'm not afraid of dead people, but the appearance of the workers in front scared him, and I'm angry that the newly graduated doctors recruited by me are a little inferior.

The itinerant nurse in the operating room was his confidant. After a while, he told Ma Wentao that Dr. Chen was OK and had good skills, but the newly graduated doctor was a little bad. He couldn't finish the knot neatly. Old Chen couldn't do the operation alone and was sweating hard!

Fortunately, Ma Wentao had more heart and called Zhang Fan in advance. Zhang Fan changed his hand washing clothes and entered the operating room. As soon as he saw the operation process, Zhang Fan secretly scolded Ma Wentao, "the mallet is not willing to spend more money. The doctor looked for this posture and didn't practice well in the hospital!"

Old Chen's sweat kept giving the young doctor hand-in-hand guidance, and the fracture was a crushing injury. When the young doctor was nervous, he couldn't do it. He touched his head with his hands! Lao Chen had to stop the operation and let him wash his hands and disinfect again!

Zhang Fan washed his hands and disinfected his hands. He said to Lao Chen, "hurry up. The operation time is a little long. Be careful of infection and necrosis!" As soon as Zhang Fan said this, Lao Chen knew what he meant "Xiao Li, go and have a rest first. I'll do it with Dr. Zhang. "

The little doctor left the operating table like running away. The young man still paid too much attention to his face. Today he didn't get off the stage. Zhang Fan and Lao Chen couldn't do anything about him. They also gave him a chance to practice his hand. As soon as he left, he took away the opportunity to practice his hand!

"I'll be your assistant. Hurry up. Show your director's ability! Although the fracture is very broken, it's not difficult for you!" The little doctor's departure had no impact on others, Zhang Fan said, looking at Lao Chen. He's trying to save Lao Chen's face. The first shot must be fired by Lao Chen!

At the beginning of the operation, they sucked blood, cleaned the surgical field of vision, stopped bleeding and connected broken bones. The two cooperated quite tacitly. Lao Chen, who had no certificate for many years, practiced his surgical skills in pain and depression, and Zhang Fan didn't need to say more.

Therefore, the efforts of both hands are not shallow, and this kind of limb fracture is the most surgery done by Lao Chen. In the past, there were few cars from the county to the urban area. When people still trust the county hospital, Lao Chen worked in the Department, did the most and took the least, because he didn't have a certificate! The hardships of those years have now become qualifications.

Someone here will ask, do others study better than Lao Chen? It's hard to say. Other people are given preferential treatment in the frontier. This score is really low, but in other words, Lao Chen himself is to blame. The government can't blame him for his poor study! Every year, hundreds of thousands of Han medical students are taken care of by the state!

From the biceps and triceps along the muscle space to expose the broken end of the fracture, Lao Chen skillfully avoided the radial nerve and began to splice the broken bone. The biggest advantage of internal fixation is that it can achieve the anatomical alignment of fracture. Generally speaking, it can achieve the original appearance of bone, but manual reduction is not enough.

But the biggest disadvantage of internal fixation is that it will cause great damage to the surrounding muscles and blood vessels, and infection is the biggest enemy of orthopedics. Once there is a serious infection, the operation will fail, and the internal fixation plate must be removed. Therefore, in orthopedics, great attention is paid to aseptic operation.

The grumpy director saw that you were slightly in violation of aseptic operation, and directly told you to roll off the operating table.

Today, Zhang Fan came to give Lao Chen a face. When the operation was almost finished, Zhang Fan said, "director Chen, this operation was well done. The alignment and alignment are really beautiful."

"Ha ha! ~" Lao Chen was not used to Zhang Fan's praise and smiled a little silly! Hey! It's still too honest, but honest people also have the advantages of honesty. At least when there is a problem, Zhang Fan will come to save the market at the first time.

After the operation, the patient's family had come. A beautiful woman directly patted it regardless of the patient's dirty face, "you scared me to death. If something happens to you, what can I do with the doll!" An authentic language of a place in Xishan said with a cry!

"Well, well, the patient is all right. Don't get excited. Go and buy a towel to wash his face." The nurse in the operating room said to the woman.

"Yes!" The woman rubbed black coal ash on her face and nodded her head with tears.

The mine owner is kind and righteous. He sent two workers as escort. It's also good for patients lying in bed. He takes care of food, drink and wages. If this occupation is not dangerous, such treatment can be regarded as the level of section chief in the ranks of civil servants, which is very good.

The West Mountain in China is a special place. All the beautiful girls went to the capital and all the men went down to dig coal. All over the country, the main technicians of some coal mines are almost Xishan people, especially those who are highly dangerous and pay special attention to technology and experience. Almost all of them are Xishan people, such as gunners.

This patient is a gunner. The boss specially invited him from Xishan. His salary is no less than 20000 a month. It has been a lot in 10 years! But it's also dangerous. Maybe it will be buried in the mine that day. That is, I use my life to change money, but I don't know how much money this life can change!

The operation was over and Lao Chen's waist was straight. Although Zhang Fan was invited to help in the end, he can't be blamed. The boss is too layman to ask his assistant! After this operation, Ma Wentao will have to seriously call Chen Qifa director Chen, because he has proved his ability!

Ma Wentao's office. After a rest, he is much better" Come and smoke one! " Ma Wentao, who seldom smokes, handed Zhang Fan a cigarette.

"Quit!" Zhang Fan shook his head.

"Ah! I heard my father say that people who can quit smoking are the most terrible people, because they can even quit smoking. If they have this perseverance, nothing can stop them in the world! "

"Hehe~ Take it as your horse boss praised me! "

"If you don't smoke, drink tea!" Ma Wentao also pressed out the lit cigarette.

"You are a little too careless. In such a big business, your assistant can't even tie a knot. Director Chen is

worried and is about to cry."

"Isn't there no chief of surgery at that time! I look at that young man very clever! All right! I admit my mistake, don't talk about him, I've been fired. Next, I will hand over the right of recruitment to Director Chen. This is yours. We agreed. " Ma Wentao got up and took out an envelope from the drawer under the table.

"How much?" Zhang Fan is also welcome.

"Two thousand!"

"As I said, I only accept half!" Zhang Fan took out one thousand and gave it back to Ma Wentao. He said again, "nothing. I'll go first. Call me if you have something! "

Why can you only take half of the money? People have to be trustworthy. Many people feel that this is unnecessary. Just make money in an impetuous society. There is no need to talk about credibility and integrity.

There is a saying that good and evil will be rewarded, and the way of heaven is good reincarnation. If you don't believe it, look up and see who the sky spared. Now Ma Wentao has to beg Zhang Fan. Zhang Fan just opens his mouth and asks for 10000. People will give it. The days are long. You can't live too much. Zhang Fan takes half of the reward to find Lao Chen. Zhang Fan was worried about money when he just graduated. When he could live at home, he looked at it very lightly.

Ma Wentao's mouth rose. He was recalling Zhang Fan's performance of receiving money. He didn't find that Zhang Fan had the performance of posture. "It's a character!" Seeing character from a young age is his Lao Tzu's employment secret. You can inadvertently discover human nature.

"Put it on these five hundred!" Zhang Fan called Lao Chen to a place where there was no one, took out the money and quickly gave it to Lao Chen, "master, don't you hit me in the face! I don't want it. " Lao Chen blushed!

"Stop the ink. It's the rule. Hurry up!" Zhang Fan is not polite to Lao Chen. To Lao Chen, it is a direct order.

"Recently, pay more attention to whether there is general surgery. The equipment in the operating room is still complete, even laparoscopy."

"I see! Master, do you want to engage in general surgery in the future? I think you still have a future in orthopedics. " Lao Chen is worried that Zhang Fan has gone astray. Medicine is a pit, of which the pit for ordinary foreigners is the deepest! He thinks Zhang Fan's talent is good, but people's energy is always limited!

"Hehe! All right, take care of this patient more! When I left, call me if you have something to do.

Shaohua and I invited you and your sister-in-law to dinner in a few days. You were busy cleaning up when you first came, so I stopped Shaohua and didn't bother you. "

"It should be us!" Lao Chen sometimes grinds a little, and Zhang Fan doesn't bother.

For Ma Wentao's hospital to carry out surgery, Zhang Fan is still happy to see its success. Running in the city is much more convenient than running in the county. One more place to brush the operation also satisfied Zhang Fan.

Operation expenses, material expenses, consumables, medicine expenses and nursing expenses. This patient is a work-related injury and can't go through medical insurance. Moreover, the safety indicators of private units are reserved for the dead. The injured won't give this work-related injury quota. Fortunately, the mine owner has money and doesn't care about these.

It took more than 50000 to get down. Looking at the charge list, Ma Wentao's cold heart is fresh again. Huge profits, real huge profits, as long as there are one or two such patients in a month, all kinds of expenses of the hospital will come out. The rest is pure profit!

If you have the motivation, you should take measures. At the hospital affairs meeting, he made it clear that Lao Chen is the director of surgery, and then he gets a raise. He gives more than 500 department management fees and 200 telephone fees a month, and then asks Lao Chen's wife to cook for several experts. He has more than 2000 income a month, which is all small money, But it was this little money that killed Lao Chen!
