

M Road

Chapter 154

At the end of the meal, Lao Chen was drunk, Li Liang was drunk, Xue Fei was almost drunk, and Wang Yanan was a little drunk. But everyone was happy and the atmosphere was good.

Although Li Liang was drunk, he insisted on seeing Wang Yanan off. He grabbed Wang Yanan's bag and didn't give up. This guy is a typical wine man. He usually wants to do what he doesn't dare to do, but he doesn't care after drinking. There is no way. Lao Chen can only let his wife go home, and the others go back together.

Zhang Fan and Shao Hua took Li Liang and sent Wang Yanan home. On the way back, Li Liang seemed a little sober and walked steadily, but he was silent. "What's the matter?" Zhang Fan asked.

"Brother, you said I went to a private hospital and Wang Yanan still have a chance?"

"Aren't you drunk?" Shaohua asked in surprise.

"Drunk, it should be sober!" Zhang Fan said with a smile.

It is understandable that Li Liang works in the county hospital, while Wang Yanan works in the city hospital. He has a little low self-esteem. I don't dare to pretend to be drunk after drinking. It's half confession!

"No matter how hard you try, if you really can't, just pretend it doesn't matter! Pretend to have forgotten!" Zhang Fan looked at the distant lights and said.

"You seem to have a lot of experience!" Shaohua said, pinching a little skin on Zhang Fan's arm.

"Ha ha! Isn't this a suggestion for Liangzi? If it's not deep and sensational, Liangzi may give up! When he saw the family courtyard, Liangzi was already timid! Isn't it?"

"Well! Look, hey! I'm fine. Go back, brother and sister-in-law. I'll take a taxi!" Without waiting for Zhang Fan to speak, he turned and left directly.

Li Liang is really in a bad mood today. There is no hope to enter the municipal hospital. When he really sees the place where Wang Yanan's home is located, he is even more sad! In his early twenties, he is so uncomfortable today, but he has no place to start. He hates me! I hate that I didn't study hard in college.

I hate why I didn't work harder last year! Can you go back a year ago? No! Is it really like what Zhang Fan said, pretending to be indifferent and forgetting?

Liu Wenli is out of the hospital and Zhang Fan is going to graduate. The director of cardiothoracic surgery is very reluctant to give up Zhang Fan. Really, how happy it is to have a helper on duty to deal with emergency patients! He held the transfer evaluation form in his hand and was reluctant to give it to Zhang Fan.

"Don't you want to go for another month? You haven't learned many things, and you haven't met any surgery outside the heart. To tell the truth, this department is quite challenging. Ordinary young people don't have the courage to come to our department. How about you barely make a living? "

"Director, I'm in the first Department of orthopedics! I have to ask director Gao and the Dean! " Zhang Fan has no choice! Can only push Lao Gao out.

"Orthopaedic surgery and doctors are too rough. They don't have any technical content. It's a pity that you decide to be in orthopaedics! Hey, who makes orthopedics pay high! I won't stand in your way. If you don't want to do orthopedics in the future, come to me and I'll tell the dean. " Everyone was young and lacked money. He thought he understood Zhang Fan.

"OK, director, I'll go!" Zhang Fan took the transfer list and left. The sense of alienation he had just arrived was gone after a month of contact. The director of cardiothoracic surgery really likes Zhang Fan, but Zhang Fanzhi is not here!

Next stop, outside the brain! The Department with the worst development in Northwest China! The brain can be said to be the most complex organ of the human body. It's very delicate. Lack of oxygen for a few minutes can cause irreparable injury and directly kill you! It is said to be resistant to damage, with an area of 14, and it can barely support basic life activities.

The department outside the brain, without a professional doctor, can only follow the rules to treat some technologically mature diseases. If there is a slight change, it will be caught off guard. Orthopedics, general surgery and even China outside the heart have caught up with the forefront of the world, but not outside the brain. Open major professional books, many and many contents are extracted from foreign papers.

If you want to make achievements outside your brain, you must first be able to read and understand the original professional works of foreign countries, and then the accurate translation also has the subjective consciousness of the translator. It is difficult to see the translation through the ideological collision between the books and the original works.

The refinement of Chinese language is really perfect, but English is not. Look at professional books inside and outside God. Words are longer than each other. Sometimes the meaning of words still needs to be deliberated. Reading a book for three or four years is short.

Orthopedics majors have great attainments in mechanical knowledge, while experts outside the brain should be involved in electrophysiology, mechanics and space science. One synapse, one electric reflex and node can persuade 70% of students to retreat.

There is a saying in the medical community that the experts who master the best neural theory are in the anatomy rooms of major universities. But the theoretical and clinical differences are too great. Your understanding doesn't mean you can treat it. The actual clinical situation is too complex. Sometimes more than one centimeter of injury is another situation. It can be born a minute earlier or die a minute later.

During the three-day transfer holiday, Zhang Fan has no time to deal with his own affairs. Li Hui is going to get married. If he doesn't get married again, the woman will be pregnant. Northwest is not very receptive to pregnancies before marriage. Gossip is not good for the bride, and she is a teacher. She is more troublesome and should pay more attention, so Li Hui set the wedding date in golden autumn October.

Li Hui has asked for marriage leave, he has already got a practicing doctor's certificate, and the transfer of internal medicine is almost over. He has applied to the medical department for instructions from the fixed department, and the respiratory department is willing to accept him. It is estimated that there is no problem waiting for the Dean to sign.

Originally, Li Hui wanted Zhang Fan to be his best man, but there is a rule in the frontier, that is, when the bridegroom goes to the bride's house to pick up the wedding, the bride's family will be embarrassed for the man. Blocking the door and red envelopes are small things. The biggest difficulty is drinking. When many people get married, the best man they are looking for is kilogram.

Zhang Fan's three cups of wine can't be expected! Moreover, Zhang Fan also trembles when he sees several brothers in law of the other party. This is the way to drink to death! Zhang Fan directly refused to be the best man. Finally, his task is to drive Cherokee in front of the car and pull the cameraman to be a cameraman for them!

Li Hui's parents came to the frontier from his hometown early. The wedding room was cleaned up well. Although Li Hui didn't save a few money, the woman's family was really rich in dowry. Just for dowry, Li Hui didn't have to spend a lot of money to buy household appliances and furniture.

Li Hui's wife's brothers work well. Their only sister is going to get married. They pay 20000. The old couple spend money to buy a house and a car. In an instant, loser Li Hui becomes a middle class!

The bride's profession is a teacher. She has learned how to manage naughty children since college. For her, Li Hui is just an enlarged version of naughty students. Since falling in love, she has cleaned up Li

Hui's clothes.

What has the final say of a successful woman is, no matter what career, what rank, that is a strong woman. Successful women are able to transform a man to succeed. Although there is nothing in your life that you can talk to me, a family will really have a clear position. Who cares what matters? There must be constant fighting every day!

Li Hui's wedding was booked in the county government hotel. After all, Li Hui is an outsider and few relatives came to attend the wedding. Mainly some hospital colleagues. And they are all internal medicine doctors, and a group of doctors with undetermined departments. The frontier is a multi-ethnic residential area, so the Junfu hotel is a hotel operated by Hui bosses.

The marriage witness was jumabek, the director of the respiratory department. Jumabek, who was wearing a suit and tie, was energetic. He liked this kind of public appearance best. At that time, after Li huidingke was determined, he went to ask him to be the marriage seeker, and jumabek immediately agreed.

The hospital leaders attending the wedding banquet were all middle-level. The director of the medical department, the president of the trade union and the director of the general affairs department, Ouyang, did not come, but the gift money was brought by the president of the trade union.

Wang Sha, who was far away in Quark County, also asked Li Liang to bring a gift of 2000 yuan. In an era when the gift was generally 100 yuan, this amount was really not small! However, this also means that the two will never communicate with each other from now on. Let the wind blow away everything that once was!

The wedding in the frontier is very lively. The hotel has a special band and dance team. When the wedding is half way, the band and dance team will come on stage, holding the guests to sing and dance, and wishing the new couple a happy wedding.

Zhang Fan and Shao Hua both attended Li Hui's wedding banquet. Shao Hua looked at the bride in a white wedding dress, hugged Zhang Fan's arm and said, "this is the most brilliant day for a woman. She is a princess today! She is sure to live happily in the future. "

"Well, yes, it will be happy, but how can you tell?"

"Didn't you see her brothers offering a toast! Just Li Hui's physique! Dare not be honest! Alas, it's a pity that I don't have a brother. "

"Well! No, I don't need my brother-in-law to whip you. I'll be good to you. Don't worry! "
