Chapter 167

Li Jingjin was leaving, and he didn't ask for the consultation fee, but he didn't refuse the air ticket. Although he didn't make much income this time, he was very happy. It won't be long before Lao Chang leaves the tea vegetable City disheartened. It will spread all over the border medical system. As long as he cooperates with the tea vegetable city hospital several times, he will be able to master this technique. At present, only a few hospitals in the country can do it!

Although the development of a hospital is inseparable from some particularly excellent talents, the most important task of a regional basic hospital is not to diagnose and treat some difficult and miscellaneous diseases and study cutting-edge medical technology. Ouyang really has no good way to reward Zhang Fan now. It's boring to give less money. If you give more, let's not say whether the superior approves or not, First of all, other doctors in the hospital will certainly talk about it one after another, not suffering from poverty but suffering from inequality!

Give rights. What rights can a resident doctor give? The hospital is a technical unit. What really has rights are the leaders of technical posts, presidents and directors, and hospital secretaries, as long as they are not the leaders of technical posts, are the background wall.

Just when Ouyang had a headache, Kang Hua called. Kang Hua said the matter and Ouyang promised that Zhang Fan was so excellent in such a long time. She thought she understood what made Zhang Fan work so hard.

Although more money will make the following doctors unfair, Ouyang can compensate Zhang Fan in other ways“ Come to my office. " Ouyang called the director of the medical office. After a while, the director of the medical department came to Ouyang's office, "in the future, the doctor must ask me to sign for surgery, otherwise it will be treated as a violation of discipline. After that, the medical department will form a document and distribute it to the Department. "

Not only the director of the medical department, but also the directors of surgery are confused. Generally, it is the director or deputy director of the Department who goes out to the acupoint. Other doctors secretly go to private hospitals to do a small job. In the past, the hospital also turned a blind eye. Is it who went out to the acupoint that had an accident? They didn't expect it when they broke their heads. Ouyang set the difficulty of acupoint walking for the directors of various departments and handed the work of acupoint walking to Zhang Fan. Even if the director of the Department was dissatisfied, he didn't dare to complain and complain! On the contrary, do you want to be the director!

Zhang Fan also knew about this. When he secretly cried bad, he received a call from Ouyang. In the dean's office, Ouyang praised Zhang Fan first, and then began to clean up Zhang Fan, "how old are you? It's only a few days since you got the licensed doctor. Do you know that the licensed doctor has a medical registration point. You go to other hospitals for surgery without my authorization, It's against the law. Do you understand it? If there's no accident, take it. If there's an accident, can you carry it? A great future may be buried in a small hospital! "

"I know I'm wrong!" Zhang Fan bowed his head and admitted his mistake. Ouyang was very embarrassed. He didn't dig his heart and lungs to clean him up.

"Just know it's wrong, but the following hospitals also have difficulties. If you want to go out for surgery in the future, you should report to the medical office first. If there is an emergency, you should also call the director of the medical department and come back after the operation to make up the report. Do you understand? "

"I see! Dean! " Zhang Fan raised his head and said gratefully to Ouyang that the Dean was a sincere cry!

"Well, just understand. I'm afraid you don't understand! Go ahead. You won't have to be on duty in the future. " Ouyang nodded to Zhang Fan with a righteous face!

Then the director of the medical department who received Ouyang's call understood! He knows! But he is Ouyang's man. Even if he knows, he will pretend not to understand! As a connecting link between the preceding and the following, the most powerful director can play this difficult and confused very skillfully. Otherwise, why give you such an important post, white face? Or single?

ANAR also received a call from the medical office. This time, she lost Ouyang's face. The director of the oncology department didn't know if she could continue to work! The notice of the medical department is also very simple, that is, Zhang Fan will no longer participate in the duty of the Department in the future! As long as she is not removed from her position as director, even if Zhang Fan is allowed to rest every day, she agrees.

Originally, Lao Li wanted to form a paper on this operation through Zhang Fan to publish, but after turning to major medical journals, Qingniao hospital has written this operation badly. This is the strangeness of surgery. How detailed the difficult operation paper is written. People who read the paper can recite this paper, but if there are no a large number of experiments or masters to take it, You just can't do this operation!

Zhang Fan is completely neglected in the cancer department. Zhang Fan is also happy. He turns over the medical records, looks at the patient number, turns over the books, and asks people for questions where he doesn't understand. As long as it's Zhang Fan's questions, the doctors in the Department will

definitely come up with the ability to press the bottom of the box to answer Zhang Fan. The internal medicine doctor also has a sense of achievement. It's also his ability to be a teacher for Zhang Fan!

Zhang Fan, no matter whether anyone cares about him or not, as long as the patients he is interested in can definitely follow from beginning to end. The doctors in the cancer department have also seen Zhang Fan's style and are willing to discuss and study with Zhang Fan.

In two years, Zhang Fan changed from Xiao Zhang who shouted for teachers all over the world and whispered all over the world in order to sew more in Quark county to Dr. Zhang today. In addition to the system, he also made unremitting efforts! If you don't work hard, even if you have a system, you can't reach today's level. In the past two years, except for a slight relaxation at the stage of chasing Shao Hua, you have been in the liver and making continuous efforts. He has always been on the way forward. I used to be a person, hobbling along alone, but now I have a partner! He is not lonely on the way ~!

The patients with three broken fingers have been discharged from the hospital. Although they are in plaster, they have survived. The perception of their fingers is obvious. In the later stage, they can definitely restore their original function to 80% with rehabilitation exercise. The patients and their families are satisfied and happy. They sent a golden flag to Ma Wentao's hospital with gongs and drums. Ma Wentao's mouth cracked with laughter. This golden flag is happier than he earned a million.

Because this banner indicates that he has succeeded, and the career he chose has taken a solid first step. As long as he settles down, he will definitely one day stand in front of his father and say, "old man, I'm not bad!" Strong father and weak son are the most painful. He is the weak son. Only he knows this feeling! The compassionate eyes of his relatives made him covered with wounds like a soldering iron! Can only rely on indulgence to avoid anesthesia!

Shaohua's family, Zhang Fan, after dinner, went for a walk with Shaohua. After work, Shaohua had to read, study and do questions. The examination of one of the four major certificates in China was very difficult.

If there were no system, maybe Zhang Fan would really stay in this small city, really comfortable. In autumn, there is a fragrance of melons and fruits in the tea vegetable city. There is no hot summer or cold winter. The products in the tea vegetable city are really rich. Surrounded by the primeval forest of tea vegetable City, the evening air is floating with a fragrance of trees.

These days, Shaohua's parents have finished eating and don't exercise. They go to the new house to clean up, ventilate and wipe the furniture every day. They have two bedrooms, a study, a living room and a restaurant. The old couple put a bed in their study. Although the bed is small and expensive, the old lady bought it for Zhang Fan. It's close to the hospital. At noon, Zhang fan can lie down for a while. If they weren't married and afraid of criticism, she was ready to let Zhang Fan live in.

Ouyang set the threshold for acupoint walking. The surgical directors dared to be angry but not speak. At the beginning, everyone didn't react, but after a period of time, they knew who was going to acupoint again. It was Zhang Fan! Originally, several nearby county township hospitals were forbidden by the

directors of major departments. Zhang Fan was young, with low professional title and little competitiveness.

But after Ouyang set the threshold, the directors of various departments couldn't get out, and Zhang Fan's opportunity came. As long as the doctors in the surrounding counties cooperated with Zhang Fan once, other directors would have no market. It's not that Zhang Fan's level is high, but that Zhang Fan is willing to share the profits, and half of the operation cost is taken out equally. Everyone is willing to invite Zhang Fan for surgery, and slowly more and more people invite Zhang Fan for surgery.

It's only more than ten kilometers away from the nearest County town of Chasu City, but the county hospital never gives patients a transfer certificate to go to the city hospital. If you want to see a doctor in Bird City, the president can sign immediately. If you want to see a doctor in the city hospital, you can't sign. It's also difficult for the president of the county hospital to do. It's too close to the city. If you don't control it more strictly, the county hospital can be closed directly.

The difficulty of acupoint walking is not high. Almost all of them are laparoscopic gallbladder and appendix, as well as some fracture internal fixation. Zhang Fan is young and energetic. He goes out for surgery in the middle of the night. He comes back to sleep for two or three hours and goes to work the next day.

The directors of various surgical departments have no choice. They could go secretly before. Since Zhang Fan was killed in the surrounding hospitals, the doctors below don't contact them directly anymore.

Zhang Fan's running has become popular and his income has also increased a lot. In the past, he was specialized in running in remote counties. Now several hospitals around him can earn five hundred dollars after a meal.

The house in his hometown has also been renovated. Zhang Fan knows his parents very well and will definitely move in the old furniture, so he asked Shaohua to call his parents. He said it had no effect.

"Aunt, how are you recently? Zhang Fan is also very good. I just miss you a little. Why don't you come to tea vegetable city for a few days."

"We are all fine. Your parents are in good health. I don't have time for the new year. "

"Aunt, let me tell you something. If we get married with Zhang Fan, we have to go to our hometown for another wedding. At the same time, our family has moved to a new house, and my parents can live there for a few days. Zhang Fan said that the bed at home is a little old. He asked you to buy a new bed. I've called you for the money! The TV is also replaced with a new one. That house is the new house of Zhang Fan and me! " Shaohua blushed and finished the phone call. The instigator Zhang Fan kept giving ideas to correct his tone.

If not, there's really no way for the old couple to make up their mind to change the furniture.
