

MADAM'S IDENTITIES SHOCKS THE ENTIRE CITY AGAIN Chapter 718

However, this system was the same as the system shown by Sun at the beginning. It did not have any source code loopholes!

Zhou Wei was shocked as her body swayed. Her face full of disbelief.

“She and Sun...”

She wanted to ask how could Qiao Nian be compared to Sun from the Red Alliance?

Her third uncle was so powerful, but he still was not able to enter the Red Alliance. Sun was not only the leader of the Red Alliance, but also recognized by the entire hacker community as an insurmountable leader.

How old was Qiao Nian?

And she’s only 18.

She had not even graduated from high school.

How could she be compared to Sun! Luo Qing was exaggerating!

Luo Qing couldn’t hide his excitement. He took out his cell phone and sent a voice message to Gu San. “Gu San, can you help me ask Miss Qiao how to solve the password of the USB she gave me?”

In the few minutes that they waited for the reply, the car was quiet, and only time ticked forward.

Finally, Luo Qing’s cell phone rang.

Gu San was calling.

Luo Qing hurriedly answered the phone and was the first to say “hello”.

Gu San was still angry about what happened with Zhou Wei just now, and said in a cold tone, “I asked Miss Qiao, and Miss Qiao said that she forgot to set it up. She asked you to wait a moment, she’ll enter your information on her cell phone.”

Luo Qing was very surprised.

Damn, that system could be remotely operated with a cell phone?

What level of Boss was this?!

The rest of the Ninth Branch members were also stunned...

Didn't they say that she was just a high school student who wasn't too capable? That she was an ordinary girl who boasted but did not have real skills?

Before Luo Qing could find his voice, he heard Gu San's voice on the other end of the phone, "Okay, can you try it now?"

"It's done?" Luo Qing's throat tightened. It had only been a minute.

He was unsure if it was really done, and could not figure out where Qiao Nian would have gotten his information from.

He tapped the keyboard of the laptop with one hand and re-authenticated.

With a beep, a green light lit up on the screen, and under everyone's attention, the lock on the screen was unlocked.

"How is it, have you unlocked it yet?" The man's voice on the other end of the phone came again.

This time it was deadly quiet in the car.

Only Luo Qing calmed down a little. The skin on his rough face twitched, and his voice was hoarse as he said, "It's done, say thank you to Miss Qiao for me."

"Mm."

The call ended.

He slowly put down the phone, raised his head and glanced in Zhou Wei's direction, wanting to ask if she really wanted to continue watching.

But Zhou Wei didn't seem to have any reaction. He did not know if she was staring blankly or something else, but her expression was extremely awful, and she didn't even look at him.

He couldn't say anything, so he simply opened the USB file in front of everyone.

A complete automated operating system appeared in front of everyone.

From the model display to the subsequent programming code, all were perfectly presented in front of the large group of people.

No loopholes!

No source code issues!

Zhou Wei's face really hurt now, she opened her mouth, but her voice seemed to be stuck, and she couldn't say a word.

Her hands clenched into fists. She unclenched them then tensed up again.

It went on for several times.

Luo Qing looked shocked to see what was in the USB drive. He looked up at Zhou Wei quietly and then said succinctly, "Leader Zhou, don't forget what you said previously."

Zhou Wei had openly declared that if Qiao Nian had the ability to solve the problem of the automated system source code, she would sincerely apologize to Qiao Nian for her attitude towards her.
