

MADAM'S IDENTITIES SHOCKS THE ENTIRE CITY AGAIN Chapter 744

“Yes, that’s it. Miss Qiao, why do you know iris technology? Yesterday, after Luo Qing brought back your USB drive, the people at the technical department went crazy. I heard that they’ve been studying your technology all night...”

Iris technology was one of the nine most powerful validation technologies currently.

Qiao Nian’s skills were one level higher than Zhou Wei’s most successful technology. Although it wasn’t as powerful as the strongest defense system that only appeared once three years ago, it was still considered very powerful...

The nine technical departments were all workaholics. They were the same as Luo Qing. It would be strange if they didn’t go crazy when they saw this!

Gu San was full of anticipation, thinking that Qiao Nian would give him another surprise. Unexpectedly, he was splashed with cold water.

“I did it casually on the Internet.”

Gu San: “?”

Gu San was in disbelief. He took a step forward. “You did it casually on the Internet?”

What the hell?

“I just downloaded it casually from the Internet. There’s a website that specializes in providing software for download. There are links to all kinds of software on it. I randomly found a downloadable one.” As Qiao Nian spoke, she walked to the dining table and sat down. She opened a lunch box and saw the crystal prawn dumplings inside.

The white and transparent skin was wrapped in a cartoon prawn that was still steaming. It looked appetizing.

Gu San was so shocked that he didn’t come back to his senses for a long time. He was still in a daze as he looked at her. Not giving up, he asked, “You didn’t write the code yourself?”

He and Luo Qing both thought that Qiao Nian had written the verification system herself!

Qiao Nian’s eyes were extremely dark. She leaned against the chair and placed one hand on the back of it. She glanced at him and retracted her gaze. She shook her head and denied calmly. “No. I still have to find revision materials for my class. I don’t have time to write that.”

She picked up a pair of chopsticks by the side and picked one up to try. The fresh and fragrant prawn dumplings were wrapped in all kinds of fillings. There was also gravy when she took a bite. The prawn meat was especially fresh and smooth, and the temperature was maintained at just the right temperature.

It tasted good.

No wonder Qin Si specially mentioned the Imperial Mansion's breakfast.

Gu San watched as the girl opened the other boxes and began to eat breakfast. She looked around and really did not want to give up. However, after looking for a long time, the girl was extremely calm. She didn't have the intention of responding to him at all and lowered her head to eat her food.

He couldn't help but retract his gaze in disappointment and say with a disappointed expression, "I thought you wrote that system. Leader Luo even told me that your system is very similar to a system that was posted online by the Red Alliance three years ago..."

Qiao Nian paused for a moment before saying calmly, "Is that so? Maybe it's a coincidence."

Gu San noticed that she paused for a moment and nodded in agreement. "Probably."

As he spoke, he couldn't help but look at her eagerly. "By the way, Miss Qiao, do you know who that person is?"

Qiao Nian had just picked up a crab roe dumpling and almost choked on his sudden question. Fortunately, she reacted quickly and took a sip of water to suppress it. Her fair and beautiful hands knocked on the cup rim as her eyes darkened.

"I don't know."

Gu San smacked his lips and said regretfully, "I wonder who wrote this software. If only he could come to the Ninth Branch. Even if he imitates Sun, if 'he' can write this, he'll be considered one of the top in the country."

Qiao Nian, who was imitating Sun: "..."

...

After breakfast, Gu San led her to look for Master Cheng.

Yesterday, Qiao Nian had taken a plane and a car.. When she arrived at the Ninth Branch, she was in a particularly bad state and did not even notice what the place looked like.
