

MADAM'S IDENTITIES SHOCKS THE ENTIRE CITY AGAIN Chapter 753

Typically, a completed program wouldn't have a cartoon error halfway through unless the program had a loophole that hadn't been resolved.

"Today is the public visitation day of the Ninth Branch, and many foreign guests have come. The driverless system is the main show of contents for this public visitation day. It has been arranged for the finale to be introduced to everyone. Master Wang and Young Master Bo are not here, and Leader Luo doesn't know what to do either..."

No one had expected such a sudden situation to occur. Everyone was caught off guard. The technical team was now feeling anxious. Some people had already gone to look for Zhou Wei, hoping that she could resolve this bug.

He and Luo Qing trusted Qiao Nian more, so he rushed over to look for her. Gu San was actually very anxious, but he couldn't put too much pressure on her in front of the girl. Trying not to look so anxious, he said, "Miss Qiao, are you free? Why don't you go over and take a look?"

...

At the same time, on Luo Qing's side.

A man with dark skin and a scar on his face was sitting in front of a computer. His fingers were typing rapidly.

Luo Qing was beside him, staring at the computer screen.

Looking at the data update and seeing the scar-faced man hit the enter key, he immediately placed his hands on the table and asked in a low voice, "How is it?"

The man with the scar stared at the computer screen and did not speak at first. When the program was halfway done and the screen flashed with code, his expression instantly turned ugly. He shook his head and said with a serious expression, "Boss, I still can't do it."

"Damn it!"

Luo Qing's fist hit the table, causing a cup to bounce up and almost drop to the ground.

"How could this be? It was fine at first..." His face was also dark as he lost his temper.

The atmosphere in the room was bad.

No one in Team 1 spoke.

Everyone was quite anxious.

However, the procedures that even Liao Xu couldn't handle weren't as good as theirs. No one dared to go forward and embarrass themselves.

On this public visitation day, the technical team's driverless system was the key. Everyone was filled with hope and prepared to showcase it to the overseas guests.

Their hopes were dashed. If the system didn't perform well, they might embarrass themselves. It wouldn't be good for anyone.

Liao Xu tried again. It was still the same old problem. Whenever the program was running, there would be a mess of flashing screens. Sometimes, the screens would turn black and jump back.

The scar on his face looked quite scary. When he pulled a face, it looked even more frightening. Only he dared to speak to Luo Qing at this moment. "Boss, it looks like there's a virus."

"Virus? How could it have a virus?" Luo Qing was stunned.

It was a matter of glory and loss, but someone was still making sarcastic remarks.

"What virus? I think it's just a programming bug. This situation happened because there were loopholes in the program from the beginning. How could that source code be so easy to fix? We worked overtime for three months and still couldn't do it. A high school student who hasn't even grown a hair yet solved the loophole in the source code in a day. There was a problem from the beginning. See, something happened."

The person who spoke was not one of Luo Qing's subordinates. It was from Team 2, where Zhou Wei was.

At this moment, he wasn't thinking of solving the problem but was still dividing the responsibility.

Before Luo Qing could speak, Liao Xu couldn't stand it anymore and said, "I already said that there must be a virus. Is there a problem with the program? On the first day, we all saw it when the boss brought the USB.. The program in the USB flash drive Miss Qiao gave us operated fine, which means that the programming was fine."
