

Magic Era 1051

Chapter 1051 Qualitative Changes

The Book of Mantras could make Syudos become even more powerful, and Syudos could reciprocally make the Book of Mantras even more powerful, this was the effect of that complementary relationship.

The Book of Mantras would be able to display even more power once Lin Yun advanced to the Heaven Rank, he would be able to display the true power of an Extraordinary Magic Tool!

Syudos returned to the Book of Mantras to keep studying it and devour flames. This was the simplest way for him to increase his control over the Book of Mantras.

Lin Yun put away the Book of Mantras while his subordinates went to process the corpses of the three Pseudo Heaven Rank Magic Beasts.

Then, Lin Yun turned his head to look at a distant location.

Lin Yun barely swept a glance that Morgan felt a wisp of cold air brushing over his body.

Morgan found out that he was already sweating when Lin Yun turned his body.

'Damn, damn, damn...

'Damn, how... How could this be? This is over, Mafa Merlin is already that powerful! That was a Heaven Rank powerhouse!

'F*ck, what did I just witness?! A Heaven Rank powerhouse was burnt alive!

'And it was that b*stard Shaq. He was like an extremely powerful tortoise before advancing to the Heaven Rank. He even blocked an 8th Tier Spell without suffering any injury in a previous battlefield.

'His defenses became even more powerful after he advanced to the Heaven Rank, that b*stard was using all his Extraordinary Power in his defenses.

'Mafa Merlin's flood of spells is arguably the most terrifying magic attack. There are over a hundred High Tier Spells cast every second. Even a true Heaven Rank powerhouse would have a headache when faced with it.

'He can release over a hundred spells in a second, this is something only Heaven Rank powerhouse could do, but that was completely useless against Shaq!

'How could he be incinerated? What are those golden black flames?

'Damn it, I knew it, I knew that Mafa Merlin had never displayed his full strength and never used his strongest cards.

'Just look at this, that guy... No, that terrifying guy has always been hiding his strongest abilities!

'Thankfully I stopped setting myself against him before. So what if we have to hand him a fifth of the mana crystals? After all, we aren't suffering a loss, he gave us the method to deal with the Pseudo Heaven Rank Magic Beasts, we will still obtain more mana crystals than before even if we give him 20%.

'More importantly, it made hunting a lot safer. There is almost no danger when handling those magic beasts now.'

"Morgan, Morgan? What should we do now?"

Morgan was looking at the few-hundred-meter-big burnt black hole in the distance and almost soiled his pants. Arnaud was deathly pale on the side, he was at a loss as he asked for Morgan's opinion.

After Arnaud asked, Morgan jumped down the hillside as if a magic beast had bit his bottom

"What else can we do? That Mafa Merlin is that powerful, so he must have discovered us. This is no good, we can't keep hiding, we have to quickly rush over. That guy is a lot stronger than Dedale.

"No, it should be very easy for him to get rid of Dedale. Can we afford to offend such a person? Let's hurry up!"

After saying that, Morgan rushed down the hill as if his pants were on fire, before quickly approaching Lin Yun.

Lin Yun sensed the figures coming from behind but didn't care. He had already noticed the Henry Family during the battle.

Back when he was unable to track Shaq down, he had sent out the Spirit Snake search, but he hadn't expected that it would find the Henry Family before Shaq.

Lin Yun was very clear about their plans, but he hadn't cared. It also came as no surprise when Morgan rushed over.

Morgan was rapidly approaching, burning with anxiety as he stealthily glanced at the few-hundred-meter-wide burnt black hole. His heart remained stuck in his throat as he sensed the remnants of the fire's destruction aura.

Before Lin Yun could say anything, Morgan hurriedly explained.

"Sir Merlin, I'm really sorry, we sensed the battle's fluctuations and hastily rushed over, but we weren't able to help before you finished the battle.

"I didn't think Sir Merlin was that powerful. That stupid Beastman actually dared to set himself against Sir Merlin, he must have been wanting to return to the embrace of the earth.

"No, these idiots wouldn't even have the opportunity to return to the earth's embrace when facing Sir Merlin.

"Others said that Sir Dedale was the strongest human in the Raging Flame Battlefield, but they are just a bunch of idiots, Sir Merlin is the strongest. Getting rid of these Beastmen is really too easy, they followed the path to their own doom..."

Morgan was scared witless. He was boot-licking, afraid that Lin Yun would remember that they had been watching from the sidelines without helping.

Arnaud awkwardly explained from the side, "Err, Sir Merlin, the speed at which you got rid of that foolish Beastman was too fast. We were actually thinking of repelling that muscle-brained idiot, but you actually killed him..."

Hearing their explanations, Lin Yun casually waved his hand

"It's fine, that guy already died. Did you meet other Beastmen?"

Morgan inwardly relaxed when he heard that Lin Yun didn't really care.

'Damn, that scared me to death. Fortunately, Sir Merlin isn't narrow-minded and doesn't bear a grudge against me. Who would have thought that he was that powerful.

'Heaven Rank... That was a true Heaven Rank powerhouse. And it was a Heaven Rank powerhouse using Extraordinary Power! A Bronze Beastman expert in defense, yet he actually killed him.'

Morgan wiped the cold sweat off his forehead and didn't dare to think much as he promptly answered Lin Yun's question.

"Sir Merlin, we haven't met other Beastmen, nor have we encountered other forces..."

Lin Yun thoughtfully nodded.

"Then, have you gone to the temple again? Isn't it possible to exchange the mana crystals there? Have you not exchanged them for some things?"

Morgan shook his head.

"We haven't, we have hunted too little magic beasts. We needed over a hundred mana crystals to open the door to the temple last time. Although we don't need the mana crystal to open the door and we can just exchange them at the entrance, the number of mana crystals we need wouldn't be any less.

"The things we would obtain would be no good if we trade in few mana crystals. We are planning on hunting Pseudo Heaven Rank Magic Beasts until their numbers dwindle before converting the mana crystals.

"Oh, right, this is your share of the mana crystals we have hunted these past few days. Based on the contract, those two are yours."

Morgan gave him two Pseudo Heaven Rank Magic Beasts' mana crystals. He didn't dare to show regret as he looked at those two mana crystals. In fact, the Henry Family had hunted seven Pseudo Heaven Rank Magic Beasts so far.

They had originally planned on hunting ten before coming to give Lin Yun his share. After all, according to the contract, they had to give him a fifth, with the 1st mana crystal of every set of five being given to Lin Yun, even if they had an incomplete set.

Whether they had seven or ten, they had to hand over two mana crystals, but they would clearly suffer a loss if they only hunted seven.

But Morgan didn't care at this time and hurriedly handed over the mana crystals while trying to gloss over what happened.

Lin Yun remained silent as he took the two mana crystals.

Morgan watched Lin Yun take the mana crystals and felt like he truly didn't care about what just happened. Thus, he boldly said, "Sir Merlin, a true Heaven Rank powerhouse had appeared amongst the Beastmen... Let's agree on a contact method, just in case we encounter another group of Beastmen, we would be able to call for help that way.

"Next time you meet any Beastman, you can activate this crystal ball and we will be able to figure out the direction and a rough distance. We will absolutely rush over to help."

As he said that, Morgan took out a crystal ball and handed it to Lin Yun.

Morgan poured a wisp of mana within the crystal ball and an arrow immediately appeared, showing the way. There was also a number pulsating, displaying a rough distance.

Lin Yun looked at it and then put away the crystal ball.

Morgan sighed in relief.

'Sir Merlin is too powerful, he can even kill true Heaven Rank powerhouses. Taking the crystal ball means that if we encounter any powerful Beastmen, he'll definitely come to help.

'True Heaven Rank powerhouses actually appeared among those damn Beastmen. Damn, we can't handle those Heaven Rank powerhouses, and they can actually use Extraordinary Power in the Raging Flame Battlefield... Wasn't it said that this place had a natural pressure against the Heaven Rank? Really wretched information...'

After this matter was over, Morgan couldn't keep staying there. He followed Lin Yun and flattered him for over an hour, before discovering that the Pseudo Heaven Rank Magic Beasts were instantly eliminated, and, naturally, the loot had nothing to do with them.

Morgan and Arnaud led the Henry Family to leave while Lin Yun's group kept hunting.

Lin Yun had upgraded his Book of Mantras to the Extraordinary Grade after coming out of that shattered world, Xiuban, Reina, and everyone else had gotten stronger. Even the mage army got stronger, the few stragglers that had yet to advance to the Archmage realm finally advanced while hunting magic beasts.

Kurumu, the strongest mage and leader of the mage army had even advanced to the 3rd Rank. There were nine mages at the 2nd Rank, and everyone else was a 1st Rank Archmage.

Alone, any of these mages was comparable to an Archmage one or two ranks above their own. But it would lead to a qualitative change when they gathered together.

Chapter 1052 Scream

They once again encountered a Pseudo Heaven Rank Frost Ape, but Lin Yun only sent the mage army to fight it this time.

The hundred-meter-tall Frost Ape was leaking cold air, which created a layer of frost over the ground. The mages of the mage army all used Fire Elemental Incarnations and Flame Wings. Moreover, a fierce fire cloud seemed to form in the sky.

Arm-thick golden flames kept moving within the fire cloud. Every mage of the mage army had a different flaming rune appearing on the chest of their Fire Elemental Incarnation.

Kurumu coldly looked at the roaring Frost Ape in front of them and gently waved the Dragonscale Staff in his hand.

The elemental flames covering over three hundred meters submerged the entire mage army, and the glaring runes shone brightly within the fire cloud.

The golden flames linked all runes together, assembling them into a huge flaming array.

The fire cloud instantly throbbed like a beating heart. This made the Frost Ape's face contort in fear. As if it felt some terrifying aura, it roared hesitantly.

Suddenly, a terrifying fire aura emerged from the fire cloud as flames full of destruction aura condensed. The Frost Ape could no longer wait and opened its mouth to spat out an Energy Sphere.

The ten-meter-big Energy Sphere was full of icy destruction power and even froze the moisture in the air. Fragments of ice started floating within several hundred meters.

If it had been before, the mage army would have immediately dodged the Frost Ape's Energy Sphere.

These Pseudo Heaven Rank Magic Beasts' Energy Spheres were their most powerful attacks. An energy sphere with destruction power could definitely destroy a hundred-meter-tall mountain. The mage army's arrays wouldn't have been able to block one without casualties before.

But now, Kurumu waved his Dragonscale Staff and the other mages, seemingly receiving some kind of command, instinctively started casting.

In an instant, the Joint Chant Array started echoing as every one of them was chanting an entirely different incantation. In less than a second, the fifty mages were divided into five groups of ten, each group chanting a different incantation.

The fifty mages were chanting different spells separately and the five groups chanting incantations were forming a new Joint Chant Array!

This was the mage army's newly mastered Double Joint Chant Technique. After everyone had advanced to the Archmage realm, they could barely use this Joint Chant technique.

The spell released was the signature spell of the famous Blazing Army, Summon Flame Giant!

The mage army had previously released that spell and it could be said to be one of their strongest spells, but they had only been able to summon half of the Flame Giant's body, they hadn't been able to display a tenth of its true strength!

The several-hundred-meter-big fire cloud shrunk.

The Chaos Energy Sphere was about to hit the fire cloud when suddenly, a big flaming hand came out of it and ruthlessly swatted at that Energy Sphere.

"Rumble..."

Thunder kept echoing from the impact between the flaming hand and the Energy Sphere while shockwave-like huge smoke rings kept spreading out.

The air around the flaming hand and the Energy Sphere kept exploding and numerous silver white lightning bolts came into existence.

The Energy Sphere was like a colossus that had been provoked, its energies kept rebelling after being blocked and it seemed ready to explode at any time.

The formidable power kept pressuring the giant hand back, until another hand suddenly emerged from the fire cloud. The two hands firmly held onto that Energy Sphere and forcibly suppressed the Energy Sphere as it was expanding, apparently ready to explode.

A deep roar echoed from the fire cloud and created wind ripples. A terrifying head emerged from the fire cloud, that head had no mouth, only two eyes could be seen.

Then, the Flame Giant's lava-like eyes glanced at the Energy Sphere in front of it and its flames sharply increased. The berserk flames followed the Flame Giant's hands and covered the Energy Sphere, forcibly suppressing and containing the explosion.

Everyone watching the fight from a distance was shocked, a wisp of surprise could even be seen in Lin Yun's eyes.

Everything taught to the mage army was based on the future famous Blazing Army, those were the methods the Blazing Army would use to train new mages.

The methods were slow and progressive, but those with inferior power and inferior comprehension would have no way to understand them. Moreover, if there wasn't a tacit understanding during cooperation, the mages of the mage army wouldn't be able to be part of a whole and wouldn't be able to display such power.

Surprisingly, the mage army was already able to summon a complete Flame Giant, so he could teach them some other things.

That Flame Giant wasn't an elemental lifeform, it was in fact extremely condensed flames formed by the fusion of a few dozen fire spells.

Every part of the Flame Giant was controlled by an army mage. In other words, each of the parts had to be flawlessly controlled for that Flame Giant to exert the power of a true lifeform.

If their coordination hadn't reached a tacit understanding, then the Flame Giant would just become a live target as mages controlling adjoining parts might move in opposite directions.

But it seemed that they currently had perfect coordination and such a situation wouldn't occur.

Enderfa looked at the egg-like fire cloud transforming into a Flame Giant as if he was looking at a ghost.

"Damn, how did you teach them? The strongest among them is only a 3rd Rank Archmage while most of them are at the 1st Rank, yet they can actually block an Energy Sphere?!"

“Although that Pseudo Heaven Rank Magic Beast is flawed, it’s not completely trash... Damn, the Energy Sphere has been suppressed before it could even explode...”

“Truly a bunch of lunatics. No, monsters... With a monster like Merlin, those he taught would definitely be monsters too!

“Right, it’s like that...”

Enderfa cursed and was no longer in the mood to watch. Before, Syudos had won the jackpot and became the Magic Tool Incarnation of the Book of Mantras, becoming a lot stronger than Enderfa...

He got into the Ten Thousand Spell Wheel’s inner world and sorted the Ten Thousand Spell Wheel’s runes, continuously increasing the power of the Spell Wheel to increase his abilities.

Lin Yun nodded with satisfaction. Although he already knew that this Frost Ape couldn’t match the mage army, he hadn’t expected the gap to be that big...

The power the mage army could display was definitely comparable to a 1st Rank Heaven powerhouse in the Raging Flame Battlefield.

Just the Joint Chant Array ability could make them cast 8th Tier Spells faster than 1st Rank Heaven Mages!

Lin Yun now needed one to three seconds to cast an 8th Tier Spell, while the mage army could already cast an 8th Tier Spell in two seconds at their fastest!

But Lin Yun possessed three Core Meditation Law Sets, and two of them were Meditation Law Sets with the most formulas in Noscent’s history!

With the support of the strongest Magic Conducting Rune, the Magic Array, his casting speed was faster than the Magic Conducting Rune known to have the fastest casting speed, the Swift Star Mark!

And the mage army’s casting speed was only a bit slower than Lin Yun’s. And that was after all of them had finished advancing to the Archmage realm.

Since the Joint Chant Array had yet to appear in Noscent, this was an opportunity for the mage army to suddenly rise.

As Lin Yun thought of these matters, huge changes were already happening on the battlefield.

That Flame Giant’s body had fully exited the fire cloud, and the arms of the hundred-meter-tall Flame Giant were forcibly holding the Energy Sphere.

The Flame Giant suddenly roared, and its arms instantly doubled in size. It then roared once again and twisted its body before throwing the Energy Sphere suppressed by its flames.

A series of explosions echoed as that twenty-meter-big fireball instantly appeared several hundred meters away, flying at a terrifying speed.

After flying over several hundred meters, the flames split open and the Energy Sphere exploded, instantly halving a four-hundred-meter-tall mountain by shattering the upper part into fragments.

The Frost Ape was already terrified. It looked at the Flame Giant with fear, before turning in order to flee.

The Flame Giant hadn't even landed on the ground that several blue fireballs suddenly appeared under its feet. The fireballs exploded and propelled the Flame Giant towards the Frost Ape.

The Frost Ape was already scared stiff and it just kept charging forward without looking back.

The Flame Giant only spent three seconds to cross over the two hundred meters separating it from the Frost Ape. After overtaking it, its huge flaming palms ruthlessly slapped the back of the Frost Ape, and a series of explosions instantly echoed from the Flame Giant's palms.

The Frost Ape collapsed on the ground like a huge mountain. The Flame Giant took a step and ruthlessly whipped the Frost Ape's body. Those flames were like a plague for the Frost Ape as they rapidly infected more than half of its body.

The white steam formed a thick white smoke, it was as if the Frost Ape's body was evaporating.

The Frost Ape painfully screamed. It swung its arms, trying to counter attack, but it only saw two twenty-meter-big Flame Spears condensing in the hands of the Flame Giant.

The huge Flame Spears impaled the arms of the Frost Ape, viciously nailing them to the ground. The Flame Giant then condensed two extra Flame Spears and nailed the Frost Ape's legs to the ground.

The Frost Ape screamed in panic. It tried to struggle but couldn't move its limbs, and thus, it could only open its mouth to cast another Energy Sphere.

Chapter 1053 Comparing

But the Flame Giant's flaming hands instantly grabbed the Frost Ape's head. Flames spurted out of its hands like a volcanic eruption and covered the Frost Ape's head.

Overbearing explosions loudly echoed and the struggling Frost Ape suddenly seemed to have lost its all strength. The Flame Giant let go, revealing the burnt black head of the Frost Ape.

The Flame Giant's eyes coldly looked at the Frost Ape's corpse before slowly standing straight.

...

While this side was fighting, there was also a battle a few dozen kilometers away.

Raphael was leading Sky City's mages to flee like mad dogs while riding their floating fortress, not caring about drawing attention from Pseudo Heaven Rank Magic Beasts.

Raphael turned his head and saw black smoke coming out of a floating fortress as it fell towards the ground.

Sky City's floating fortresses had a floating array carved into their magic metal main body. They would never touch the ground after they were manufactured. They would only hit the ground when they were destroyed.

Smoke coming out of the fortress and its downward trajectory meant that it was definitely destroyed.

The two mages flying the floating fortress didn't have time to escape as a dozen-meter-long Aura Slash was flying over from a distance.

The two Sky City mages didn't even have time to dodge before being sliced and burnt to ashes, leaving no traces of their bodies behind.

Raphael's eyes were red, he wanted to go over, but the two mages at his sides were forcibly holding him while the rest were pouring all their mana into the floating fortress. The floating fortress' mechanical system was already red-hot from overheating, it looked as if it would explode at any time, but it didn't seem like they cared.

In the back, a tall undead-looking skinny and bony Beastman holding a 1.5-meter-long thin sword was rapidly flying towards Sky City's people.

And a few kilometers behind, there was a group of tall and skinny Beastmen chasing, unwilling to let go. Their weapons were extremely different from the greatswords used by most Raging Flame Beastmen. In fact, it would be considered a barbecue skewer by most Beastmen.

Raphael clenched his teeth and looked at the pursuing Beastman with red eyes. He clearly had the aura of the Heaven Rank, as well as Extraordinary Power's fluctuations. This was the reason why Raphael had suffered a loss.

Even with the addition of the floating fortresses and the arrays formed by his floating fortress, he had been unable to resist. That was a true Heaven Rank powerhouse, one that could use Extraordinary Power!

A large river suddenly emerged, flowing towards the sky like a geyser. The dozen-meter-wide river turned into a wave that ruthlessly flowed towards the chasing Beastman.

That thin and tall Beastman sneered as he swung that thin sword in his hand. In an instant, a dozen 10-meter-long Aura Arrows flew and pierced that river. The river was torn apart in less than a second.

The large river exploded, revealing a pitch-black fog which enveloped the tall beastman.

The thin and tall Beastman sneered and his Extraordinary Power burst out, forming an invisible shockwave. The surrounding darkness was instantly torn apart.

In the distance, Morgan and Arnaud simultaneously groaned as they paled.

Their spells had been forcibly torn apart. The other side even injured them through their spells.

Morgan looked as if he had seen a ghost. He led the Henry Family to fly away alongside the floating fortresses and screamed at Raphael next to him, "Raphael! F*ck, how could you provoke that kind of guy! Since when does the Blood Bone Beastmen have a Heaven Rank powerhouse? Sh*t, it's actually another Heaven Rank powerhouse able to use Extraordinary Power...."

"We are dead, we are dead, sh*t, I shouldn't have jumped in to help you. That Undead-like b*stard is going to slaughter me..."

Raphael had a dark expression, he didn't even dare to curse back at Morgan. After all, Morgan and Arnaud didn't hesitate to help, but they hadn't expected that Blood Bone Beastman to be that powerful. In one move, he managed to stop both of their spells.

Raphael's expression suddenly changed, "Another? Damn, did you meet another Beastman that could use Extraordinary Power? How did you survive?"

Morgan froze and immediately smiled before promptly roaring to the other members of the Henry Family.

"Fools, hurry up and fly to the floating fortress, I'll immediately contact a powerhouse for help. That stupid Beastman thinks he can casually chase us because he had advanced to the Heaven Rank?"

"Sir Merlin will definitely burn these muscle-brained Beastmen to death..."

While saying that, Morgan took out the crystal ball and comforted Raphael on the other side of the floating fortress.

"Sir Raphael, there is no need to worry, a Heaven Rank powerhouse is nothing. So what if he uses Extraordinary Power? I've already come to an agreement with Sir Merlin. He'll definitely save us long as we encounter danger. A Heaven Rank is nothing Sir Merlin can't get rid of. Let me contact Sir Merlin first..."

Morgan suddenly got confident and as he recalled Shaq being incinerated, Morgan no longer bothered to look at the chasing Blood Bone Beastman.

'That's just a fool, he actually dares to chase the great Morgan. Even Bronze Beastmen, the ones with the greatest defenses among Raging Flame beastmen, could only be burnt by Sir Merlin. A skinny Undead Beastman like you is actually chasing me?'

'Wait until Sir Merlin burns you to ashes...'

Morgan confidently activated the crystal ball and an arrow immediately appeared on the crystal ball, as well as a rough distance.

Seeing the crystal ball, Morgan proudly laughed.

'Fortunately I was prepared, Sir Merlin definitely doesn't know that my crystal ball is the main body while the other is just a split body. The main body can show the direction and an approximate distance with a simple look.

'Moreover, that crystal ball can display characters through mana. As long as Sir Merlin takes out the crystal ball, I'll be able to immediately convey what I want to say through mana.

'Hmm, it's only twenty kilometers. This is very good, it'll take at most ten minutes to converge with Sir Merlin. That stupid Blood Bone Beastman will be screwed then.'

A ray of light suddenly shone from the crystal ball. Morgan promptly transferred mana into it and a line of text formed on the crystal ball.

[Sir Merlin, Help! I'm being chased by a stupid Blood Bone Beastman! And that guy is a Heaven Rank powerhouse that can use Extraordinary Power just like that foolish Bronze Beastman!]

Morgan sent the message and calmly waited for Lin Yun's answer.

Some time passed, but the crystal ball had yet to react. Cold sweat trickled down Morgan's back as he glanced at the chasing Blood Bone Beastman.

'How come Sir Merlin hadn't sensed it? No, Sir Merlin must have sensed the distress signal from the crystal ball, how come he hadn't answered?

'Is he busy? Is he hunting Pseudo Heaven Rank Magic Beasts? Or did he meet another Beastman powerhouse?

'No, Sir Merlin and his subordinates are too powerful, how could he not have seen this? The crystal ball had already connected...'

A faint mana fluctuation remained for ten seconds, and Morgan's cold sweat started leaking out.

"Morgan, you idiot, what are you doing? Didn't you say you had a helper? Is your helper coming? That damned Blood Bone Beastman is catching up and our floating fortress' mechanical system is about to explode..."

Raphael stood on the other side of the floating fortress and loudly shouted through his clenched teeth.

Morgan wiped his cold sweat, he turned to glance at that sinister Blood Bone Beastman chasing them and lost all his confidence.

"Idiot, what are you yelling for? You think that powerhouse is like a subordinate of your Sky City? That you can summon him as you wish? How could it be that easy? I already contacted Sir Merlin, he is rushing over from that side. Fly east, Sir Merlin is over there!"

Morgan scolded Raphael, reluctant to admit his mistake. Cold sweat was dripping from his forehead. He kept pouring mana into the crystal ball, not letting the connection to the crystal ball disappear.

Raphael didn't feel like cursing at Morgan when he heard that help was on its way, he just kept pouring mana into the mechanical system of the floating fortress with a sullen expression.

Morgan was somewhat pale and his legs were somewhat shaking as he sensed the surging Extraordinary Power behind him.

But he kept pouring mana into the crystal ball to transmit his words.

[Sir Merlin, we are going to die, the Blood Bone Beastman is too powerful.]

[Sir Merlin, Help! That damned Blood Bone Beastman is disrespecting you! I said that you got rid of that Bronze Beastman Heaven Rank powerhouse named Shaq and he actually said that Shaq was a weakling and that he can take care of you in one hit.]

[Sir Merlin! If you don't rush over, Sky City and the Henry Family will be completely eradicated...]

...

On the other side, Lin Yun was discussing with the mage army after their battle, he was pointing out the flaws in their casting and coordination before giving them a new array.

He couldn't help but chuckle when he saw the words continuously appearing within that crystal ball. He wasn't in a hurry to go help Morgan, he would rather continue explaining the new array, at least until he noticed the "Sky City" part of the message.

Lin Yun was moved and understood what happened. Morgan and the others should have merged with Raphael's group, but the big group was actually chased by a formidable Heaven Rank powerhouse.

The Blood Bone Beastman Tribe had no border with the Andlusa Kingdom, there was almost no Blood Bone Beastmen over there, and their understanding of Blood Bone Beastmen was quite lacking.

Although Blood Bone Beastmen were powerful, they weren't as strong as Gold Beastmen. But this was considering their strength as a whole, it wasn't taking into account the difference in strength between individuals.

Chapter 1054 Blood Bone Beastman

But no matter how powerful that Beastman was, he couldn't crush Sky City and the Henry Family's forces that fast. The joint forces should be able to resist for a bit, they wouldn't be eliminated.

As this thought flashed in his mind, Lin Yun casually replied:

[I am quite busy.]

...

On the other side, Morgan was continuously using mana to send text messages when he suddenly received an answer. There were four words within the crystal ball.

[I am quite busy.]

Morgan's expression turned green, before turning white. He foolishly looked back at the Blood Bone Beastman chasing them with murderous intent and felt cold sweat soaking his back.

'Damn, what do you mean you are busy, please don't joke like that Sir Merlin, that enraged Blood Bone Beastman will skin me alive...

'I cursed at that Undead-like Blood Bone Beastman, he'll definitely carve a few big holes in my body after catching up, he might even hang my head in his bedroom and show it off to his guests...'

"Morgan, how far is he? Our floating fortress' mechanical system is about to explode, it has already exceeded its limits. We won't be able to escape once it explodes..."

Raphael loudly roared from the other side of the floating fortress, his face was red and his neck muscles were bulging.

Morgan chuckled and answered, "There are still a few kilometers until we meet up with Sir Merlin, it's on you if we die during those few kilometers!"

Hearing this, Raphael decisively gave an order to Sky City's mages, "Push the floating fortress' mechanical and weapon systems to their limits, use every possible speeding method! I won't hold you responsible if the floating fortress becomes a pile of scraps as long as it can last long enough. If it doesn't last, we will be killed by that Undead-like fool..."

Sky City's mages immediately supported it. They were using all their skills with red eyes, not only because they wouldn't be held responsible, but also because their lives were on the line.

The floating fortress' internal frame was dismantled and some arrays were forcibly altered. Their modifications were all tailored to make the floating fortress fly over those last few kilometers at the fastest speed.

Only the weapon system and the mechanical system remained after a few seconds.

Apart from the components that could make the floating fortress move faster and endure those last few kilometers, everything else had been torn open and thrown away. Even the mechanical system had its circuits altered and was bursting with its last radiance.

Morgan's complexion was turning increasingly paler as Sky City's people began setting everything up for a last ditch effort.

'Damn it, it's over, it's over. That foolish Raphael believed me, they are going all-out. Raphael's group will be screwed if Sir Merlin isn't there in a few kilometers.

'They are all injured and will definitely be killed by that enraged Blood Bone Beastman when he catches up...

'The Henry Family definitely wouldn't be able to afford it if Sky City's people learnt that I tricked their people.'

Morgan felt like weeping as he threw another glance at the Blood Bone Beastman...

He was thinking hard and suddenly got an idea when he felt an Aura Arrow flying above his head. He then rapidly used mana to write a sentence within the crystal ball:

[Sir Merlin, please help! Sky City's last floating fortress is already about to be scrapped. Raphael has already been seriously injured, he won't last more than one minute after that Blood Bone Beastman catches up to him!]

[Eight Pseudo Heaven Rank Magic Beasts' mana crystals, that's all I have. This should be a good compensation for your losses. We will really die if you don't come...]

Morgan hesitated after sending those message and added a line:

[There are still five intact Pseudo Heaven Rank Magic Beasts' furs which could be made into magic scrolls, twelve bones that could be used as weapon materials, and twenty-eight bottles of blood from three different magic beasts. This should be enough to compensate for Sir Merlin's current losses. Please just shake off the magic beast you are fighting or Raphael will really die!]

...

On the other side, Lin Yun was looking at the crystal ball's messages with a puzzled expression.

'Since when is Morgan so generous? So willing to help others?

'Why is he so worried about Raphael dying? Even to the point of taking out all his Pseudo Heaven Rank Magic Beasts' mana crystals in order to get my help...

'It didn't look like the relationship between Morgan and Raphael was that good?

'I didn't see them being that close before, did something happen?'

Lin Yun thought about it but didn't understand. Last time, Morgan had been watching the battle from the side and hadn't jumped out until the battle was over, yet he was willing to spend so much to help Raphael.

No matter how much he thought about it, he couldn't understand. Lin Yun no longer felt like scaring Morgan due those mana crystals.

That guy had been watching the battle from the side last time, not coming out to help. If he had watched the battle and left, Lin Yun would have understood, but he not only didn't help, he didn't leave, so how could Lin Yun not understand what Morgan had been thinking...

He finished teaching the mage army and immediately used Flight to fly in the direction pointed out by the crystal ball.

His subordinates were chasing after him.

After flying for a few minutes, Lin Yun saw Sky City's floating fortress and noticed the black smoke emitted from one side. Next to the floating fortress was a flying ship that was also rapidly flying over.

A berserk Beastman was stubbornly chasing them.

That clear Heaven Rank aura and that soul-pressuring Extraordinary Power clearly exceeded the limits of mortals. That power was on another realm. This showed that this was another Heaven Rank Beastman using Extraordinary Power.

Seeing Morgan as pale as a corpse on the floating fortress, Lin Yun knew that he had reached his goal of scaring him, and he had even won eight mana crystals and a pile of materials while doing so.

After brushing past the smoky floating fortress and the flying ship, Lin Yun took out the Book of Death and the Draconic Staff and a wave of mana instantly burst out.

The Purple Dragon Incarnation appeared, alongside the wheel shadow and its countless roaming runes. Lin Yun instantly used Windfire Elemental Incarnation.

Twelve ten-meter-big chaotic windfire vortexes revolved in a circle around Lin Yun and spurted out countless windfire spells. Those windfire spells transformed into twelve spellwaves that intertwined themselves as they flew towards the Heaven Rank Blood Bone Beastman.

That Heaven Rank Blood Bone Beastman originally didn't pay attention to Lin Yun since he clearly hadn't reached the Heaven Rank realm, but his expression suddenly changed when he saw those twelve intertwining spell waves forming a hundred-meter-thick spell storm.

He halted his rapid flight and swung his thin sword a dozen times. Aura condensed in the air and formed a net in front of him.

Then, taking advantage of the net made from Aura blocking the spell storm, his body swayed and his two shoulder bones extended out of his body. The magic patterns visible on the bones shone brightly.

In an instant, the Heaven Rank Blood Bone Beastman's body was cut into five shadows. Each of the illusory shadows flew in a different direction to dodge.

One of the shadows suddenly condensed into a true body after flying two hundred meters away.

Lin Yun frowned. That Blood Beastman's strength was really strange, just like the Heaven Rank Bronze Beastman from before. It didn't look like a Beastman that had just advanced to the Heaven realm.

He had the strength of a powerhouse that had already stabilized his power. He just used the power of his innate magic patterns and added Extraordinary Power to instantly escape the suppression of the mana storm, and it made it look easy.

Blood Bone Beastmen and Bronze Beastmen represented two extremes among the Beastmen of the Raging Flame Plane. The Bronze Beastmen represented extreme defense. For them, suffering no injury was an honor, while being injured meant that their strength was lacking.

Blood Bone Beastmen were different, their bodies were extremely thin and they looked just like Undeads wearing a layer of Beastman skin. Their weapons were also extremely thin swords.

Their speed was terrifyingly fast, and when their power was displayed to the extreme, even Gold Beastmen might not be their match in terms of pure destructive power.

But their weakness was also obvious, their bodies' strength couldn't compare to other Beastmen, they would definitely be seriously injured in a direct confrontation.

However, just like Bronze Beastmen, their weakness was complemented when they advanced to the Heaven Rank.

Their innate magic patterns were on their bones, and before advancing to the Heaven Rank, their bones could only cover some vital parts of their bodies. But after advancing, their bones could even extend out of their bodies and form a Blood Bone Battle Armor. Not only could it reinforce their defense, it could also be used as a weapon in a melee battle.

The most important part was that their innate magic patterns would be able to display their strongest might at that time!

The Heaven Rank Blood Bone Beastman was relying on Phantom Flash to keep dodging Lin Yun's attacks in the sky. He wanted to counterattack, but was continuously pushed back by Lin Yun's spells and couldn't find an opportunity.

"Woosh, woosh, woosh..."

Slashing sounds kept echoing as thin Aura Slashes kept flying towards Lin Yun from different directions.

Those condensed powerful Aura Slashes easily pierced through the spellwaves, but they were blocked by the layers of shields covering Lin Yun.

Even the occasionally treacherous Aura Slash filled with a large amount of Aura was blocked by Lin Yun.

Chapter 1055 Black Flames

Half a minute of probing later, Raphael and the others had already escaped, but Lin Yun hadn't found a suitable opportunity to attack that Heaven Rank Blood Bone Beastman's main body.

Lin Yun frowned and controlled the spellwaves into a huge circle surrounding the body of the Heaven Rank Blood Bone Beastman and restricting his movements.

After a few seconds, that Blood Bone Beastman disdainfully sneered.

"Stupid guy, you want to trap me? You must not know about that famous saying in the Raging Flame Plane? Never try to trap a Blood Bone Beastman..."

After saying that, the Blood Bone Beastman, used his flexible body and flashed three times around Lin Yun's spellwaves in provocation. Lin Yun's spellwaves didn't have much use against that terrifying guy.

Lin Yun sneered and ignored the Blood Bone Beastman's taunts. By the time the Blood Bone Beastman flashed out of the encirclement for the third time, an explosion suddenly burst out of the endless fire spells and they transformed into a several-hundred-meter-wide sea of flames.

The Blood Bone Beastman was still sneering.

"Stupid Human..."

After saying that, the Blood Bone Beastman burst out with Aura. He swung his thin blade eight times and the thin Aura Slashes instantly pierced through the sea of flames. The Blood Bone Beastman followed the Aura Slashed in order to rush out of the sea of flames;

Lin Yun sneered, but didn't stop him.

A mournful scream suddenly echoed as the Blood Bone Beastman was halfway through the sea of flames.

Glaring Aura and Extraordinary Power burst out in an instant as the other side rushed out of the sea of flames, his body burning from ashen black flames.

The layer of Bone Armor covering his body looked as if it had suffered the decay of countless years and bone fragments were rapidly falling down.

The bone-corroding black flames had been burning on his back, but it took less than a second for his entire body to be engulfed in flames.

Bone-corroding black flames that specialized in burning bones could very easily be expelled by other races if they were infected. After all, unless it reached the bones, the spreading rate of the bone-corroding black flames was very slow. When the flames were in contact with the skin, they only needed mana or Aura to dispel them.

But it was different for Blood Bone Beastmen. They could innately control their bones, and their bones could spread out of their bodies to form Bone Armors. The stronger they were, the greater the range of the Bone Armor.

Bones were like fuel to the bone-corroding black flames, as long as bones were infected, the speed at which they expanded and strengthened would increase exponentially, especially when the bones were that powerful..

Lin Yun's encircling spellwaves were like berserk flames, but these berserk flaming spells were only there to hide the bone-corroding black flames. It would be enough as long as a wisp of bone-corroding black flames infected him.

The Heaven Rank Blood Bone Beastman flew a few hundred meters away with a blood-curdling screech. It looked like Aura couldn't dispel the bone-corroding black flames. The ashen black flames seemed to be taking root in his bones and removing the Bone Armor wouldn't scatter the black flames.

The Heaven Rank Blood Bone Beastman suddenly roared, the layer of Bone Armor exploded and bones fragments were sent flying everywhere.

All the bones infected by bone-corroding black flames were shattered into pieces and left his body. The surface of his body was suddenly dripping with blood.

Those bones had all been extending out of his body, and it now looked like half of his bones had been shattered. The fierce pain made the Blood Bone Beastman pale.

The bones infected by the bone-corroding black flames lost the protection of the Beastman Aura after flying out. They were instantly wrapped in bone-corroding black flames and burnt into nothingness in less than four seconds.

After this, the Heaven Rank Blood Bone Beastman ruthlessly glared at Lin Yun and his body turned into five shadows that flew in five different directions.

In less than three seconds, the five illusory shadows disappeared over a kilometer away.

Lin Yun frowned and slightly hesitated. That Heaven Rank Blood Bone Beastman had already escaped far in the distance.

The ability of that Blood Bone Beastman's innate magic patterns was something only a very small number of Blood Bone Beastmen could obtain. It was scattering illusory shadows which all had the exact same aura and exact same power fluctuations.

And with the Blood Bone Beastmen's natural speed, a moment of hesitation was enough for him to escape.

Lin Yun sighed. Unfortunately, he had let the other side run away.

That Blood Bone Beastman was pretty strong and very arrogant, but he was also very alert. He also had a lot of willpower, enough to actually shatter his own Bone Armor.

Those bone-corroding black flames had been stealthily inserted in the sea of flames by Syudos in order to restrain the Blood Bone Beastman.

Unfortunately, Lin Yun had let the other side run away.

It was rumored that the Blood Beastmen shadow technique could divide into nine shadows when at its peak, each of them being fake and real at the same time.

As long they were attacked, the fake escaping illusory shadow would condense into reality. The other side would definitely be able to escape unless all shadows were eliminated at once.

That Blood Bone Beastman had a very powerful bloodline, he could already split into five phantoms and should be able to freely switch between any two of them.

The other side escaped his encirclement and injured himself to get rid of the bone-corroding black flames. Lin Yun simply couldn't keep up with his speed and couldn't simultaneously kill the five shadows, stopping him was no use.

After putting away his Magic Tool, Lin Yun turned to catch up with Raphael and Morgan. Morgan had a bitter and painful expression as he looked at Raphael.

'Damn it, forget it, isn't it just a few Pseudo Heaven Rank Magic Beasts' mana crystals? I can't let Raphael take them out. If I speak, he will definitely want to shoulder everything.

'But if I explain, the one who would get Raphael's favor would be Sir Merlin...

'A few Pseudo Heaven Rank Magic Beasts' mana crystals are nothing in front of the favor of Sky City...

'No, I can't let Sir Raphael know now, I can always let it slip later on.

'Haha, when the time comes, Sir Raphael will be moved to tears when he learns that I paid the fees for his rescue out of my own pocket.

'As long he left the Raging Flame Battlefield alive, Raphael will definitely repay me. I would obtain great benefits as long as a small part of Sky City's purchases went through me.

'Right, a few Pseudo Heaven Rank mana crystals are nothing.

Morgan took out a Spatial Ring as if he was cutting his own finger and then pulled a mage of the Henry Family over. He then lowered his voice and instructed, "Go, quietly give that ring to Sir Merlin. No, give it to one of Sir Merlin's subordinates, do you see that one? That expressionless army mage. Go and give it to him."

Morgan looked hurt, but he didn't want Raphael to know, so he quietly made his subordinate deliver the mana crystals to Kurumu.

Seeing that they were safe, Raphael took out some Health Potions and started recovering.

After regaining some strength, he immediately gratefully thanked Morgan, "Sir Morgan, we are fortunate to have met you or we would have definitely died from that stupid Undead-like Beastman..."

Raphael saw Morgan's complex expression and inwardly sighed.

'I always thought that the Henry Family was putting benefits before everything and that all of them only possessed the shrewdness of merchants. I really hadn't expected that Morgan would take the initiative

to help when we were facing a Heaven Rank powerhouse. It looks like I misjudged him. Even though he has no injuries, his mana consumption should have been extremely severe.

“Sir Morgan, this is our Sky City’s Mana Floating Dragon Potion. It has pretty good mana recovery effects. You should drink and rest first...”

Morgan happily received the potion and kept shaking his head...”

“It’s fine, it’s fine, I didn’t do much...”

‘Sure enough, Sir Raphael remembers my good deed. Fortunately, I didn’t tell him about the mana crystals. I’m too smart. Sir Raphael just started thanking me and gave me this Mana Floating Dragon Potion, a potion they had always kept concealed and never gave away.’

Raphael sighed, he felt even more certain now.

‘I truly misjudged Sir Morgan, what a magnanimous person. Just a potion and he is so humble. He must be a good person taking pleasure in helping others. There are really too few of them nowadays, especially in the Henry Family, they are as rare as the feathers of a phoenix.

Morgan was lost in thoughts, longing for a beautiful future.

Raphael sighed, “Sir Morgan is truly an upright person. In contrast, Dylas from the Shadow Tower is truly a disappointment...”

Lin Yun’s expression changed.

“Sir Raphael, please tell us what you have encountered. After all, encountering a true Heaven Rank powerhouse is too abnormal.

“I met the Heaven Rank powerhouse of the Bronze Beastmen before, and he was also able to use Extraordinary Power.

“I think the Beastmen definitely have some special methods, otherwise there wouldn’t be two Heaven Rank powerhouses appearing at once. Furthermore, it didn’t look like they had just advanced to the Heaven Rank.”

Raphael gritted his teeth. His eyes reddened as this matter was brought up.

“Those damned Beastmen, those Undead-like Blood Bone Beastmen are bordering Sky City’s territory in the Raging Flame Plane, so we are frequently clashing against each other.

“But we have always been suppressing them with the support of the floating fortresses and our arrays. Our Sky City is continuously taking control of their territories.

“They can’t display their advantages against our Sky City, we could still suppress them after entering the Raging Flame Battlefield.

“They could only escape in front of our floating fortresses and arrays.

“However, something unexpected happened after coming out of that broken world. We encountered the Blood Bone Beastmen again, but that fool had already advanced to the Heaven Rank. Moreover, he could still use Extraordinary Power in this Raging Flame Battlefield.

“That damned guy... He is a Heaven Rank powerhouse, yet he still sneak attacked us and instantly destroyed our two floating fortresses and killed a mage in charge of the arrays.

“Then, a large group of Blood Bone Beastmen appeared. And under the pressure of that Heaven Rank Blood Bone Beastmen, we couldn’t borrow the power of the arrays and could only escape.

“We encountered the Shadow Tower during our escape.

“I originally thought that we could at least resist a bit by joining hands with the Shadow Tower’s people and wouldn’t be so powerless against those bony Beastmen.

“But I hadn’t expected that just as we prepared to counterattack, that cowardly Dylas noticed the presence of a Heaven Rank powerhouse and immediately escaped.

“That damned guy threw away the honor of Mankind, abandoned the honor of the Odin Kingdom, he is a disgrace.

“No human in the Raging Flame Plane flees before a fight starts. That stupid b*stard, I must make him pay the price before he leaves this place!

“We had even greater losses because the Shadow Tower fled before the start of the battle. We lost six floating fortresses, and ultimately, even our spares were used until only one remained.

“I might have already fallen if not for Sir Morgan and Sir Arnaud from the Henry Family.

“Our Sky City’s losses were already disastrous, we had used too much mana. Moreover, the people Sir Morgan brought weren’t a match for that Beastman.

“Fortunately, Sir Merlin appeared. If not for your help, that hateful Blood Bone Beastman would have definitely used his speed to kill us little by little.

“Sir Merlin, I really don’t know how to express my gratitude...”

Raphael was choking with emotions as he said those words. As the one leading Sky City’s forces below the Heaven Rank, his position wasn’t lower than a Heaven Rank powerhouse. Forces put emphasis on nurturing powerhouses, but only the most outstanding powerhouses could hold a position before advancing to the Heaven Rank.

In the Raging Flame Plane, Raphael has been having a smooth sailing while leading Sky City. The other forces of the Odin Kingdom were also very polite towards Sky City, including the Burning Tower. Even if they were a bit more powerful than Sky City, the Burning Tower was still respecting Sky City.

This train of thought almost killed everyone this time. They hadn’t expected that the Shadow would unhesitantly ditch them.

They hadn’t expected that the Shadow Tower, a force of the Odin Kingdom, would run away from an ally and lead them into a trap while someone from the opposing Andlusa Kingdom would save them.

Raphael's emotions were complicated. He couldn't really accept this contrast. He was actually very disappointed in the members of the Odin Kingdom. If not for Morgan and Arnaud timely appearances, he would have already broken ties with the Odin Kingdom.

Hearing Raphael's words, Lin Yun thoughtfully nodded.

Chapter 1056 Elemental Spheres

"Sure enough, I guessed right. That Blood Bone Beastman wasn't Sir Raphael's opponent before, but it suddenly got strong enough to suppress Sir Raphael and even mount a sneak attack. This is inconceivable.

"A powerhouse that advanced to the Heaven Rank can't suddenly become that strong, even if the gap between the Heaven realm and the Archmage realm was huge.

"Sir Raphael is already one step into the Heaven Rank, you are only missing the final transformation and the ability to control Extraordinary Power. That Blood Bone Beastman just transformed before you and obtained Extraordinary Power.

"This is wrong, a powerhouse that just advanced to the Heaven Rank shouldn't grasp Extraordinary so smoothly.

"If one wanted to use Extraordinary Power in a fight, they would need to adapt for some time. The comprehension of laws isn't something that could be gained in a day or two.

"The Bronze Beastman I recently encountered was also like that, he didn't have the aura of someone that just advanced to the Heaven Rank and he clearly understood enough of the Laws when he used Extraordinary Power.

"I don't believe that the Beastmen are all geniuses like that. It might be possible if it was just one, but two in a row definitely meant that these Beastmen have some sort of a special method!

"Furthermore, that Blood Bone Beastman already mastered the innate Shadow Split technique of his race, and it's at a very high level. It's not something pure bloodline and effort can accomplish!"

Raphael was disappointed and resentful, he looked at Lin Yun in shock and said, "Morgan previously said that Sir Merlin encountered a Heaven Rank Beastman, a Bronze Beastman that could use the full power of the Heaven Rank? Do you know his name?"

"Shaq."

Raphael was in disbelief.

"Shaq?! That stupid guy? He actually advanced to the Heaven Rank? And he could actually use his innate ability? I met that guy before and he couldn't even attack back. If not for his formidable defenses, he would have already died under my floating fortress...

"Just what is behind those Raging Flame Beastmen' sudden progress to the Heaven Rank..."

"We will be screwed if we can't figure out the reason..."

Lin Yun frowned and suddenly recalled something. He then asked Raphael with a solemn expression, "Sir Raphael, you have a better understanding of the Raging Flame Beastmen, do you know which tribes entered the Raging Flame Battlefield this time? And their leaders?"

Raphael nodded, Sky City's intelligence definitely had that information.

"The strongest are the Gold Beastmen and their leader is the tribe's famous General. He is just a step away from the Heaven realm. The leader of the Bronze Beastmen was Shaq, but you already killed him.

"The leader of the Blood Bone Beastmen is Baolo, and he was also a step away from the Heaven Rank. But he has already advanced.

"The Black Iron Beastman Tribe's leading powerhouse is also a powerhouse half a step into the Heaven Rank...

"The Barbarian Beastman Tribe's...

"Hold on, Sir Merlin, you aren't saying..."

Raphael's expression suddenly froze, cold sweat trickled down his forehead...

Lin Yun frowned, a terrible expression on his face.

"That's right, Sir Raphael, the Raging Flame Beastmen's tribes that entered the Raging Flame Battlefield are all led by powerhouses half a step into the Heaven realm, and they only miss that last step to finish their transformation and control Extraordinary Power.

"How many of such powerhouses are there?"

Morgan was confused.

"What the hell are you talking about? How come I don't understand?"

Raphael had a bitter expression as he shook his head at Morgan and wryly smiled.

"There are a total of nine Raging Flame Beastmen half a step into the Heaven Rank that entered the Raging Flame Battlefield.

"At first we thought that they dispatched the strongest people they could dispatch because Heaven Rank powerhouses couldn't enter the Raging Flame Battlefield.

"But now, it looks like this isn't the case, their goal isn't the same as ours..."

"Nine powerhouses half a step in the Heaven Rank... Sir Morgan, both Shaq of the Bronze Beastmen and Baolo of the Blood Bone Beastmen were among those nine.

"And both of them advanced to the Heaven Rank, even breaking through the limitations of the Raging Flame Battlefield and using Extraordinary Power.

"Do you understand what that means?"

No matter how stupid Morgan was, how could he not understand? His face turned pale and he started stammering, "You... You mean... The Raging Flame Beastmen might have nine Heaven Rank powerhouses here? And Heaven Rank powerhouses that can use Extraordinary Power?"

Raphael bitterly smiled and nodded.

"We are screwed, completely screwed. Even if Sir Merlin is powerful and already got rid of Shaq, Sir Merlin hasn't advanced to the Heaven Rank. We would only die if we get attacked by eight Heaven Rank powerhouses..."

"Sir Dedale is very powerful and can compare to a Heaven Rank powerhouse, but defeating a Heaven Rank powerhouse using Extraordinary Power would be very difficult for him.

"And thus, we are screwed. Eight Heaven Rank powerhouses using Extraordinary Power, they are unparalleled existences in the Raging Flame Battlefield..."

The group looked defeated, they seemed to have lost all hope.

Lin Yun shook his head.

"Impossible, all nine powerhouses won't rise at the same time. No matter what method they use, it's absolutely impossible.

"The Raging Flame Beastmen's understanding of the Raging Flame Battlefield might surpass ours by far and they dispatched a group of powerhouses half a step in the Heaven Rank because they knew some of its secrets.

"There must be something here, a method that allowed them to finish the last transformation, but it definitely won't be that easy.

"Otherwise there would be multiple Heaven Rank powerhouses coming out everytime the Raging Flame Battlefield was opened.

"If they had that many Heaven Rank powerhouses, how could we suppress the Raging Flame Beastmen?"

"I remember Shaq's words, the reason why he was able to use Extraordinary Power in the Raging Flame Battlefield was due to the Beastmen's blessings.

"So he must have been to the temple. Do remember what that old Beastman said? We can use those Pseudo Heaven Rank Magic Beasts' mana crystal to trade for things.

"I think they completed the last step of their transformation there.

"Even if we can't find the secret, the fastest way to increase our strength is to use those Pseudo Heaven Magic Beasts' mana crystals and trade for items.

"Maybe we can find a way to resist the Raging Flame Beastmen there."

Lin Yun's words gave hope to Morgan and Raphael.

Raphael almost jumped up, his eyes shining.

“Yes, if several Heaven Rank powerhouses could appear every time the Raging Flame Battlefield was opened, then the numbers of powerhouses the Raging Flame Beastmen possessed must be terrifying.

“How could we suppress them like that if they had that many Heaven Rank powerhouses, how could we conquer the Raging Flame Plane...

“They definitely used some special method, they know that their defeat was a foregone conclusion, so they used some method to make those powerhouses with one foot into the Heaven Rank, but unable to complete that last transformation, advance to the Heaven realm.

“This is their last counterattack, this is their goal!

“Not only would they gain a lot of Heaven Rank powerhouses, they would also be able to kill us there!

“The leaders of every tribe that entered the Raging Flame Battlefield are the strongest Beastmen under the Heaven Rank of their tribes, the most talented ones with the prospect of advancing to the Heaven Rank.

“It would be a huge blow to our side if powerhouses able to display the power of the Heaven Rank at the Archmage realm like Sir Dedale and Sir Merlin fell in the Raging Flame Battlefield. Those stupid Beastmen would seize the opportunity to counterattack and might make a few of our Heaven Rank powerhouses fall...”

Lin Yun inwardly nodded

The Raging Flame Beastmen had been living in the Raging Flame Plane for such a long time, they definitely knew a lot of secrets and possessed a lot of tricks mankind was unaware of.

Mankind’s side would be completely eliminated if these nine Beastmen all advanced to the Heaven Rank, they would have no chance.

And with nine more Heaven Rank powerhouses, the Raging Flame Beastmen would inevitably counterattack and quite a few of Mankind’s Heaven Rank powerhouses would fall.

They might have to give up on the territories they were currently occupying, and after disastrous losses, it might not be impossible for the humans to be driven away after a final battle.

After thinking about it for a bit, Lin Yun felt that this was a huge plan thought by the sages of the Beastman Tribes.

The special nature of the Raging Flame Battlefield isolated this place, if there really were nine Heaven Rank powerhouses capable of using Extraordinary Power killing the humans within this plane, then no information would leak out.

The humans wouldn’t know of the current situation while the Raging Flame Beastmen would take advantage of this to counterattack.

Lin Yun’s expression wasn’t good. Even if the Book of Mantras had reached the Extraordinary Grade, facing eight Heaven Rank powerhouse was still a dead end.

Moreover, Syudos could only display the power of the 1st Rank of the Heaven realm when using the Book of Mantras. After all, he was only controlling a portion of the book.

Even if Lin Yun went all-out and faced those eight Heaven Rank powerhouses, he would, at best, bury two or three along with him.

The only way to break through this scenario was the temple.

Soon, Lin Yun's group pooled all their mana crystals together in order to see what they could exchange in the temple.

They didn't come across any Beastman after rushing to the temple, there was no Beastman lying in ambush there.

After reaching the door of the temple, Lin Yun put 1 Pseudo Heaven Rank mana crystal on the platform and a halo instantly covered the platform.

The rays of light converged into a screen listing all kinds of things. There was a short introduction next to the items, and further on the side, the number of mana crystals needed to trade for the items could be seen.

1 Pseudo Heaven Rank mana crystal could only be traded for some materials, and these materials could be found within the Raging Flame Battlefield.

Lin Yun put his, Raphael, and Morgan's mana crystals on the platform and the screen suddenly expanded.

A long list of items suddenly appeared below those materials. The list kept expanding, clearly marking the number of mana crystals required for every item.

[Eternal Gold Essence (1 piece) – 2 Mana Crystals]

[Magic Flame Flower – 5 Mana Crystals]

[Spatial Quartz – 10 Mana Crystals]

[Magellan's Hatchet – 38 Mana Crystals]

[Flame Dragon Scale's Shield – 45 Mana Crystals]

...

The long list of items made everyone's eyes shine.

Morgan suddenly pointed at one Magic Tool's name and shouted, "Bible of Darkness! F*ck it's actually the Bible of Darkness! That's a True Spirit Magic Tool that disappeared over ten millennia ago! I heard legends about it, I really didn't expect that the Bible of Darkness would actually be here!

"And its Incarnation is intact! With that True Spirit Magic Tool, I can contend with Heaven Rank powerhouses! Even if I can't defeat one of those Raging Flame Beastmen, I won't fall.

"Moreover, it is said that the Bible of Darkness contains many powerful lost darkness spells. If I can master those darkness spells, I might be able to defeat one of the Heaven Rank Beastmen!

“Sir Merlin, exchange for that thing please, it’s only 43 mana crystals!”

On the side, Arnold was staring at a drop-like Magic Tool and his eyes rapidly turned red.

“Sea God’s Tear, heavens, wasn’t that True Spirit Magic Tool destroyed during the Nesser Dynasty’s reign? How could it appear here?”

“It is said that this was created when the Sea God condensed a Water Elemental Plane. It would form a pure water world when roused by mana and could even transform into an ocean when at its peak.

“With that thing, I would be able to display my peak power at any time and I wouldn’t have to slowly gather power over the course of a battle.

“No, with that Sea God’s Tear, I would be able to display ten times my peak power!”

“88 mana crystals! This isn’t expensive at all!”

Raphael’s eyes also shone, his fingers were shivering as he pointed at a True Spirit Magic Tool. It consisted of six spheres of various colors flickering with a different kind of power.

“Sir Merlin, this, it has to be this. This is the core of the famous Hexagram Array, those are the purest elemental spheres.

“These six things would form the Hexagram Array when combined, and from the descriptions, these six elemental spheres all have Magic Tool Incarnations.

“With the Hexagram Array, that Baolo definitely will be pressured to his death, his speed would be useless in front of it.

“It only needs 110 mana crystals, we have just enough for those six elemental spheres!”

Chapter 1057 Trade

The few of them were looking at Lin Yun with red eyes, they wanted Lin Yun to trade for the True Spirit Magic Tool they fancied.

Lin Yun hadn’t paid attention to these Magic Tools, he was looking at something on the list of materials.

[Beast God’s Blood.]

The introduction was very simple, it was a drop of blood of Beast God Norabis, there was nothing else written there.

A strange light flickered in Lin Yun’s eyes.

There were twelve Beast Gods worshipped by the Beastmen, but at Noscent’s end, Lin Yun had read a detailed report in the decaying library.

Only one Beast God was called Beast God by mankind’s mages, Beast God Norabis.

Only Norabis was ranked about the seventy two Gods, while the Beast Gods worshipped by the Beastmen were in fact Norabis’ entourage, the subordinates that followed Beast God Norabis.

It wasn't as if Lin Yun hadn't obtained God Blood before, but that God Blood was different from Norabis'.

Beastmen had Norabis' bloodline. His bloodline had actually been spread far and wide and no other God could compare to him in terms of inheritance.

Constance's bloodline inheritors were pitifully few in numbers, and most of them didn't have any special talent.

But the Beastmen with Norabis' bloodline focused on the power of their bloodline. They almost all had some special talent, and each of them had innate magic patterns from which they could inherit some abilities from their bloodline.

After recalling some records of the decaying library, Lin Yun looked at the Beast God's Blood with a strange expression.

In the records it was written that Beastmen had been frantically gathering Norabis' blood and wanted to use it in order to revive him!

Constance's skull was the source of his power, and the greatest power up Lin Yun obtained from fusing with it wasn't a sudden boost in strength, but an increase in potential.

Norabis' source of power was his bloodline. Each and every drop of blood contained Norabis' control over Laws, disseminated within his blood.

Especially Norabis' heart's blood, it even contained a fragment of Norabis' soul and mind power.

After a few millennia, the Beastmen gathered a large amount of Norabis' blood, and even managed to gather a drop of the precious heart's blood.

Using that drop of heart's blood as a catalyst and relying on the fragment of soul power, the Beastmen used a sinister ritual and offered a large number of lives as sacrifices in order to revive Norabis through the blood and the drop of heart's blood.

Unfortunately, the resurrection could be considered both a success and a failure.

The revived Norabis didn't have a complete soul. Using a fragment of soul and mind, Norabis was only able to converge some fragments of his soul.

Moreover, the Beast God's blood was incomplete, it accounted for 10% of Norabis' blood at best.

But even so, Norabis' power greatly surpassed the Heaven Rank.

Unfortunately, his soul and mind power were too damaged and Norabis didn't recover his wisdom. It was only a powerful half ancestral Beastman, he was just like a magic beast devoid of intelligence.

The Beastmen clearly hadn't expected that situation back then, they thought that they only needed a drop of heart's blood containing a fragment of soul power and mind power in order to summon the fragments of Norabis' soul fragments.

Unfortunately, it was a huge failure and they lost most of their forces to Norabis. Its power had surpassed the Heaven Rank, but it had lost its wisdom. The Beastmen were the first to suffer from that disaster.

After being revived, Norabis went on a rampage, and no less than three large planes controlled by the Beastmen were thoroughly destroyed. It was instinctively seeking its other soul fragments and its blood as it killed its way into Noscent.

Then, a bitter war happened. Norabis' resurrection could be considered failed, but he had still been a God. This attracted all those powerhouses that researched the true essence of mana.

Even with the large number of powerhouses acting together, it took no less than half a year. Over a hundred Heaven Rank powerhouses fell, and even one existence surpassing the Heaven Rank fell.

After all, Noscent had developed very fast in the next few millennia, the amount of Heaven Rank powerhouses then far surpassed the current era, even if it hadn't reached the stage where Heaven Rank powerhouses were everywhere.

Every force's Heaven Rank powerhouses were the same as now, their greatest effect was intimidation and they would rarely appear personally.

Over a hundred Heaven Rank powerhouses fell in order to stop the wisdom-less Norabis in the northernmost desolate ice field.

Space was shattered at the end of the desolate ice field, and the ice that had accumulated for a countless amount of time had disappeared, replaced by a big hole that led to the endless void.

This continuous war affected the entire Noscent world. All kinds of disasters kept happening, causing huge losses.

Ultimately, an old powerhouse surpassing the Heaven Rank stood out. He had already reached the Heaven Rank during the Nesser Dynasty and his legend was still known to this day.

No one had expected him to still be alive. Unfortunately, he had received a wound he couldn't recover from and his life was reaching its end after ten millennia.

Thus, he sacrificed his life and power, he used his soul to make a cage and dragged Norabis from Noscent's northernmost ice field into the cage, before disappearing into the void alongside Norabis.

The battle then stopped, but the aftermath of the battle still affected Noscent for over a hundred years.

The losses were just that big, and Noscent's mages targeted the Beastmen in bloody reprisal. Countless mages roused their laboratory magic battleships with red eyes and rushed out of Noscent.

In bloody reprisal, they annihilated a large number of Beastmen and fought over their various planes.

Some even said that Noscent's Planar Colonization Era truly started at that time.

The resurrection of Norabis was the starting point of a series of future developments and the boom of Noscent's Magic Era.

As the God with the strongest bloodline, Norabis' blood contained things that far exceeded other Gods. Most importantly, those Beastmen possessed Norabis' bloodline, and after fusing with a drop of Norabis' blood, their bloodline's innate gift would greatly strengthen and the fusion wouldn't be an issue.

The reason why these Beastmen were advancing to the Heaven Rank should be due to the Beast God's Blood.

The Beast God's Blood helped them accomplish their final transformation and even increased the power of their bloodline. The power contained within the blood even made them rapidly grasp the power of the Heaven Rank.

Most importantly, the Beast God's Blood contained a fragment of Law, this was the reason why they could directly control Extraordinary Power.

For a very long time, there was no clear concept regarding Extraordinary Power; but in the end, it was grasping the power of Laws.

Lin Yun threw a strange look at that Beast God's Blood while the people next to him were about to start fighting.

Everyone's Pseudo Heaven Rank's mana crystals had been pooled together to reach a total of 110 mana crystals. If they were traded for any of the True Spirit Magic Tool that they fancied, then there wouldn't be enough for someone else's True Spirit Magic Tool.

"Why should you be the first to trade for the Magic Tool you want? After I get a new True Spirit Magic Tool, not only will I be able to fight a Heaven Rank powerhouse, I would even survive the siege of two Heaven Rank powerhouses and escape. Let go, okay?"

"Fool, as long as I trade for that set of True Spirit Magic Tools, I'll be able to set up an array that can pressure a Heaven Rank powerhouse to death!"

"Dogsh*t, you think Heaven Rank powerhouses are pets? That they'll obediently walk into your array?"

Lin Yun raised his head and suddenly said, "You don't need to quarrel, I already found how those Raging Flame Beastmen advanced to the Heaven Rank."

Lin Yun's words instantly silenced the arguing men and they all started watching Lin Yun attentively, their eyes shining.

True Spirit Magic Tools might be good and might allow them to instantly power-up, but a True Spirit Magic Tool is only a True Spirit Magic Tool, it couldn't compare to them directly advancing to the Heaven Rank.

They wouldn't have to flee in defeat even if they were unable to obtain the Beast God's blessings and were unable to use Extraordinary Power in the Raging Flame Battlefield.

They could even use their own True Spirit Magic Tool to defeat a Heaven Rank Beastman.

Apart from a few Beastmen with extremely powerful bloodlines, most Beastmen weren't their opponents when at the same rank.

The mages that entered the Raging Flame Battlefield were powerful existences, especially the leaders of the forces, they could be said to be the strongest under the Heaven Rank in every force.

As long as they advanced to the Heaven Rank, they would definitely be the Beastmen's match.

Increasing their strength was better than trading for True Spirit Magic Tools.

More importantly, that was advancing to the Heaven Rank!

As long as they didn't die in the Raging Flame Battlefield, they would still be Heaven Rank powerhouses once they were out. Whether it was position or future prospects, or even for benefits, it wasn't something a True Spirit Magic Tool could compare to.

Morgan's eyes were green, as if they were about to release light. He kept searching through the list.

"Sir Merlin, which one? What thing can make those Beastmen advance to the Heaven Rank?"

Lin Yun pointed at the Beast God's Blood on the list.

"Those Beastmen should have advanced to the Heaven Rank due to that Beast God's Blood. They fused with a drop of Beast God's Blood and that allowed them to complete the transformation, even greatly increasing their fighting strength."

Morgan was somewhat worried, "Then what are we thinking about? Trade for that Beast God's Blood. We can all advance to the Heaven Rank as long as we fuse with it!"

"How could those brainless idiots be our opponents then?"

Lin Yun shook his head.

"It is indeed possible for these Beastmen to advance to the Heaven Rank by fusing with the Beast God's Blood, but those Beastmen can easily fuse with it because they have the bloodline of the Beast God. We are humans, directly merging with the Beast God's Blood would most likely result in the bloodline invading our bodies and killing us in a gruesome way.

"Even if we luckily survive, the bloodline would still invade our bodies and we would become monsters that are neither humans nor Beastmen..."

Morgan's expression suddenly sank.

"It's the same as not saying anything! I would rather die here than become a monster..."

Raphael thoughtfully looked at the Beast God's Blood before asking a question, "I heard that Sir Merlin is an Artisan expert in potioning, since Sir Merlin pointed out that Beast God's Blood, I presume that Sir Merlin can find a way to use this Beast God's Blood?"

Lin Yun didn't deny and nodded.

"With the power of alchemy, I could process the Beast God's Blood to make it mergeable with humans in order to complete the final transformation to become a Heaven Rank powerhouse.

"I have some clues, but I won't be able to guarantee it before obtaining the Beast God's Blood. I would also need a lot of other things as supplements and the energy spent would be huge.

“Most importantly, I need a special area and special tools...”

Morgan’s wisdom instantly peaked as he unhesitantly said, “Sir Merlin, as long as you can process that Beast God’s Blood, I’ll give you a fifth of the Pseudo Heaven Rank mana crystals we obtain. You’ll get one for every set of five, even incomplete sets.

“Trade for a drop of blood, as long as I can fuse with it, this fifth will be added to our previous contract and I’ll give you 40% of the mana crystals we get.

“What do you think?”

Lin Yun was a bit stunned as he glanced at Morgan, ‘How come that guy is suddenly so straightforward?’

Morgan had a resolute expression, but he was laughing inwardly.

‘Damn, I previously always regretted giving a fifth to Mafa Merlin, but after obtaining the method to hunt those magic beasts, not only has the danger been reduced, the hunting speed had greatly increased.

‘Even if I have to hand over a fifth, I’ll get more mana crystals than before.

‘More importantly, Sir Merlin didn’t say that the contract would still be valid in the future.

‘The profits of our Henry Family would greatly increase next time we come to the Raging Flame Battlefield.

‘This is a profitable transaction with no downside. So what if we have to give one more fifth?

‘With my current power, I might still be unable to advance to the Heaven Rank within a few dozen years. I might even die of old age before reaching the Heaven Rank.

‘There have been many innately powerful powerhouses who ended up stuck at the last step.

‘My status within the Henry Family will greatly increase as long as I advance to the Heaven Rank, and there would be too many benefits to count.

‘Personal strength is the most reliable strength. Heaven Mages and Archmages are two different concepts...

‘In any case, even if it looks like I’m making losses by following Sir Merlin, I would ultimately profit. How could there be such a good transaction, haha, the others definitely won’t understand.

‘Raphael must be reluctant...’

Morgan proudly glanced at Raphael, before looking at the doubtful Arnaud with a feeling of superiority.

Chapter 1058 Experiment

Raphael suddenly laughed.

“Sir Merlin, we gathered the needed Pseudo Heaven Rank mana crystals for the first drop of Beast God’s Blood, and most of the mana crystals belong to Sir Merlin.

“It is safe to say that this drop of Beast God’s Blood should be merged with Sir Merlin. Moreover, we need Sir Merlin to personally refine the Beast God’s Blood to make it safe...”

“That drop of Beast God’s Blood could be considered Sir Merlin’s experiment, if there are some results, Sir Merlin can decide how to use that drop of Beast God’s Blood.

“If it’s successful, I hope that Sir Merlin would help us process Beast God’s Blood once we have gathered enough mana crystals. Then, I’ll be giving Sir Merlin a fifth of the mana crystals I earn as a reward.

“I’ll also send all the Pseudo Heaven Rank Magic Beasts’ materials as a reward for Sir Merlin.

“Of course, 40% just like Morgan would do...”

Morgan’s expression changed after hearing Raphael’s words.

Lin Yun smiled and casually said, “I previously had a deal with the Henry Family, I unexpectedly discovered the weak points of those Pseudo Heaven Rank Magic Beasts, and hunting them has become a lot easier with it.

“I told the Henry Family this method in exchange for a fifth of their mana crystals.

“If Sir Raphael is interested, we can have the same deal.

“As for the Beast God’s Blood, I’m still not certain whether it can be processed by alchemy to the point where it could fuse with humans, I need to experiment first.”

Raphael’s expression remained resolute.

“Sir Merlin, whether it’s a success or a failure, I won’t change my decision. I can’t make you exert yourself in vain, the Beast God’s Blood is the blood of the Beast God after all. I’m also an alchemist, albeit proficient in the field of array, I do understand the difficulty.

“If Sir Merlin can process the Beast God’s Blood, I’ll give you a fifth of the mana crystals we hunt as a reward, along with the magic beasts’ materials.”

Morgan looked worried.

‘Damn, that b*stard bloodsucking Raphael, he is good at doing business. Isn’t he an alchemist of Sky City? Shouldn’t his brain be only filled with arrays? How could he be so shrewd...

‘Sh*t, he definitely tricked me, that profiteer actually jumped onto my business.’

Morgan, unwilling to be outdone, immediately offered a higher bid.

Raphael and Morgan simply couldn’t compromise on this matter. Whoever was the first to advance to the Heaven Rank would obtain more benefits and their self-defense abilities would greatly increase.

After all, one of them could always be killed by the Beastmen before advancing to the Heaven Rank...

The two rapidly piled benefits upon benefits for Lin Yun, and their attitude made it impossible for others to look down on them.

Lin Yun was embarrassed.

“I see, let’s trade for the Beast God’s Blood first. We can discuss the rest after it has been successfully refined.”

Raphael and Morgan immediately stopped their quarrelling.

Lin Yun pointed at the icon of the Beast God’s Blood and a hundred mana crystals disappeared from the table.

Rays of light rapidly flickered on the platform, interweaving until they formed a golden light sphere. The golden light sphere then slowly dispersed, revealing a stone bottle floating in midair containing a drop of golden blood.

After collecting the stone bottle, Lin Yun opened the door to the Demiplane and left after saying a few sentences.

He needed a lot of alchemy equipment to study the Beast God’s Blood, and he also couldn’t be disturbed. It couldn’t be done in the Raging Flame Battlefield, the only suitable location was the Demiplane.

A smile appeared on Lin Yun’s face after entering the Demiplane.

There had been a complete record of the method to handle Beast God’s Blood in the future. Some alchemists had already been researching the blood of the Beast God before the Beastmen started crazily plundering the scattered Beast God’s Blood.

Beastmen could use Beast God’s Blood to complete the last step of the transformation into the Heaven realm, but other races couldn’t.

How could those crazy alchemists not research this matter in the future.

The complete method had been recorded.

There was a complete record on the method to refine Beast God’s Blood to make it safe for humans to use the power behind the Beast God’s Blood to complete their transformation.

But the content that could enter the desolate library was only the final conclusion, there was no other details recorded. There was only the recipe, nothing regarding the thought process.

But now, he just needed to follow the complete method and complete the refinement so that humans could fuse with it.

But Lin Yun himself couldn’t use this method, only a powerhouse half a step in the Heaven Rank could use this method.

Moreover, that method did have some side-effects.

Using the Beast God’s Blood to advance, would cause one to have a flaw in their comprehension. It wouldn’t be a big influence at the lower ranks of the Heaven realm, but the stronger one was, the greater the impact.

After all, if that final step’s transformation didn’t rely on the foundation one established, it would transform into huge trouble.

Archmages were crowding the streets when Noscent's development was at its peak. At that time, a large number of planes had been colonized and the Mana Baptism Potion had already been invented. With such a large number of Archmages, the amount of Heaven Mages also increased exponentially.

At that time, only some old Archmages dying of old age would use the Beast God's Blood to complete the transformation.

Slightly younger Archmages would never use this method as long as their lives hadn't reached their end.

After all, there was no problem with their constitution in that era, everyone was a mage and had hope of becoming an outstanding powerhouse. Who would use a method like this that ruined their future?

But in this era, the effect of the Beast God's Blood could be considered negligible. The Planar Colonization Era could be said to have just started, it could barely be considered the Planar Colonization Era.

Archmages were considered powerhouses and there was a pitiful number of Heaven Rank powerhouses. Those Heaven Rank powerhouses might not even have the confidence to advance to the higher ranks in this life.

In any case, Lin Yun definitely wouldn't use this method. He possessed Constance's skull, making his potential immeasurable. He would be an idiot if he used a method that would ruin his future.

Lin Yun wasn't planning on letting Xiuban and Reina use the Beast God's Blood either.

Xiuban kept fusing with the blood of different Dragon Races, such as the Three-Headed Gold Dragon, the Ancient Poison Dragon, and the Abyssal Blood Dragon.

Any of these existences could casually surpass the Heaven Rank and could even compare to Gods at their peak. How could their potential not be higher than this strange Beast God's Blood.

As for Reina, she had fused with the Ancient Poison Dragon's empty mana crystal. Her Life Essence had undergone changes and she might even surpass the very first Frost Dragon.

After all, the strongest Ancient Poison Dragons were existences that even Gods avoided during the ancient God Era.

The most important reason was that the Beast God's Blood was very strange to begin with. It was needed for the Beast God to revive, who knew how many secrets it hid.

These secrets hadn't been completely solved before Noscent's destruction. With the revival of the Beast God and its exile into the void, these secrets had been bound to never be solved.

Lin Yun wasn't looking at the drop of Beast God's Blood as if it was a treasure, he was actually on guard against it.

After all, the Beast God had yet to revive in this era, who knew if that drop of blood hid something that had yet to be discovered.

No one could say that they fully understood God Blood, especially the Beast God's Blood which was the source of the Beast God's power.

After entering his laboratory, Lin Yun started refining the Beast God's Blood according to the recipe.

The various materials and supplementary tools were naturally available in the Demiplane. Many of the valuable materials could be found on the Raging Flame Battlefield and had been previously stored here.

He released five Flaming Hands and put them below five laboratory flasks. He then condensed pure water and poured it into the five flasks.

He prepared nineteen kinds of materials which he then divided into five portions before starting to refine them and extract the liquid according to a specific sequence.

Refining the materials was the easiest part, Lin Yun only spent a few minutes to complete the extraction of all materials.

What came next was the most difficult part. There couldn't be any difference in weight between the five portions of materials.

The first portion only had two kinds of materials, and the fusing process would remain smooth as long as the proportions and speed remained stable.

But the fifth portion contained seven kinds of materials. The amount of materials poured every second and the mixing process required extreme precision.

A tiny mistake would make the mixing fail and that kind of failure couldn't be used.

Or it would be better to say that using that solution to process the Beast God's Blood would result in a potion with huge flaws. The mixing process would also be dangerous and could result in death.

That extraction method had taken countless powerhouses' lives in the future before being perfected.

Lin Yun solemnly looked at the five flasks before him. Five tubing covered in runes were inserted into the five flasks.

The solutions had nothing to do with each other. Slowly, the solutions went through the five tubing and flowed into a flask covered in runes at different speeds.

Five colored solutions converged together and emitted a multi-colored radiance before transforming into a water-like transparent liquid.

After it was complete, Lin Yun slowly sighed in relief.

The final solution turned into a colorless liquid, this could be considered a success.

Chapter 1059 Heaven Rank

He used mana to control the flask with transparent solution and slowly poured the solution onto the drop of Beast God's Blood.

The solution turned into a transparent thread that doused the Beast God's Blood.

This instantly created wisps of bloody mist and the drop of blood floating within the stone bottle slowly shrunk. After coming in contact with the drop of blood, the transparent solution turned into a kind of amber thick and sticky liquid.

The Beast God's Blood had completely disappeared by the time all the transparent liquid had been poured out, only leaving the amber-colored liquid within the stone bottle.

A special fluctuation was spreading from the stone bottle. It wasn't mana fluctuation, it was a clear Extraordinary Power fluctuation.

It felt like his comprehension towards Laws was rising just from feeling these fluctuations. But it also felt like they were hidden behind a layer of fog, which made people want to tear open that layer of fog.

And the best method to tear open that layer of fog was naturally to drink that golden potion.

Lin Yun vigilantly glanced at the potion. Even he felt like drinking the potion when he sensed that fluctuation.

'No wonder that potion was called the Golden Temptation...'

The power of Laws was the greatest temptation to mages, it was more terrifying than all worldly temptations.

Lin Yun used a rune to seal the stone bottle, completely sealing the spreading fluctuation.

He didn't immediately leave after compounding the potion, he instead started thinking about the refining process.

That process seemed very simple, but it was impossible for anyone below the Artisan realm.

The alchemy knowledge and techniques required were so advanced that it could make a Master Alchemist despair.

It wasn't just the alchemy techniques, it also required knowledge of the runes, control over the materials, precise control over one's actions. This even required array and crafting knowledge.

There would be few alchemists able to reproduce it if this method came out.

Lin Yun came out of the laboratory with the stone bottle in hand and then hurriedly left the Demiplane.

They had encountered two Heaven Rank Beastmen in a row, and both of them weren't part of the strongest eight tribes... How could the powerful tribes not possess Heaven Rank powerhouses already?

'How come these damned Beastman got a hold of so many mana crystals in such a short time?'

Although there was a huge number of Pseudo Heaven Rank Magic Beasts in the Raging Flame Battlefield, to the point where one could be found every few dozen kilometers.

But there wasn't only one Beastman Tribe here, aside from the several Beastman Tribes, there was still ten human forces.

There were so many people hunting the magic beasts. And wanting to collect a hundred Pseudo Heaven Rank mana crystals meant that they had to hunt a hundred magic beasts.

Lin Yun's hunting speed definitely was the fastest here, yet he had only obtained about fifty mana crystals.

Apart from the dozen hunted by the mage army and the two given by Morgan, he had gotten rid of about forty magic beasts.

There definitely couldn't be another force in the entire Raging Flame Battlefield hunting the Pseudo Heaven Rank Magic Beasts faster than him. Just how did they get their mana crystals?

Lin Yun thought about it but couldn't understand.

But he had a feeling that the Beastmen already had three or four Heaven Rank powerhouses.

They might have even more, maybe seven or eight Beastmen had already advanced to the Heaven Rank.

Lin Yun felt a chilling sensation as he thought of that number. Seven to eight Heaven Rank Beastmen capable of using Extraordinary Power could completely crush any human force.

They had to unite at this time, they needed a few Heaven Rank powerhouses at the very least in order to reduce that gap. They could only think of counterattacking if they breached that gap.

Raphael and Morgan were waiting for Lin Yun as he got out of the Demiplane. As for the forces of Sky City and the Henry Family, they were currently hunting in the surroundings.

"Sir Merlin, you came... Was it a success?"

Seeing Lin Yun, Morgan immediately shouted with a pleasantly surprised tone. He couldn't stop drooling as he saw the stone bottle in Lin Yun's hands.

Raphael also had an unconcealable excited expression.

"How did it go? Did everything go well?"

Lin Yun nodded.

"It can be considered a success. I compounded a kind of potion that can be taken by humans and whose effect is similar to the Beastmen merging with the Beast God's Blood. But its only effect is to complete the last step of the transformation, it doesn't increase the power of one's bloodline..."

Before the two could say anything, Lin Yun made his decision on the ownership of the Golden Temptation.

"Sir Morgan, I believe that you understand the current situation. Both you and Sir Raphael are Peak 9th Rank Archmages half a step away from the Heaven Rank. Whoever drinks this potion will be able to advance to the Heaven Rank.

"We should stand united to survive this crisis. Self-preservation should be the first problem we need to solve.

"Sir Raphael is proficient in the field of arrays. After he advances to the Heaven Rank, he would be able to help us escape from Heaven Rank Beastmen by using the power of arrays.

"Even if we meet two Heaven Rank powerhouses, he would be able to help us safely flee..."

Lin Yun had carefully thought about it for a while before deciding to give this bottle of Golden Temptation to Raphael. Moreover, the previous negotiations over the potion had made Lin Yun come to a decision.

But Lin Yun had barely finished his words that Morgan indifferently waved his hands.

“It’s fine, just let Sir Raphael drink the potion first. Another drop of Beast God’s Blood can be traded once enough mana crystals are gathered. Moreover, new magic beasts keep popping up even after areas are wiped clean.

“The speed at which we can obtain mana crystals is rising extremely fast. Moreover, our side possesses more powerhouses half a step into the Heaven Rank than the Beastman side.

“Even if those damned Beastmen have enough Beast God’s Blood and can advance to the Heaven Rank, there would definitely be less than ten of them.

“We have the advantage in number. At the current speed, I would be able to gather over a hundred mana crystals within a month with the Henry Family’s forces...”

Lin Yun nodded and gave the Golden Temptation to Raphael.

Raphael had an excited expression as he said with a shaky voice, “Sir Merlin, you and Sir Morgan used a lot of mana crystals this time. I’ll rapidly pay it back, with 20% interest.”

On the side, Morgan waved his hands, pretending to be generous.

“It’s fine, Sir Raphael, you should hurry and drink the potion.”

Raphael took a moment to calm down before drinking the Golden Temptation. In an instant, dense Law Power surged from Raphael’s body.

Raphael slowly floated up, and countless runes containing the aura of Laws fluttered around his body. These endless runes all contained special power.

Especially when floating, every time the angle changed, everyone could see a very different rune. It was like the rune was three-dimensional, but it didn’t appear to be three-dimensional when looked at.

Lin Yun attentively watched those runes.

Law Runes were the advanced form of runes!

Each of these Law Runes contained the power and variation of at least ten runes. This was something Heaven Rank powerhouses would start controlling.

The fusion of runes resulted in Law Runes. The fusion of two runes could result in several kinds of transformation, and every extra rune would increase the number of transformations exponentially. And the greater the amount, the more troublesome it was.

Heaven Mages’ specific defensive ability was a merged shield made from a Fusion Shield, a Mana Shield, an Elemental Shield and a Runic Shield. It was even stronger, this was a Law Runic Shield.

At least a hundred of Law Runes had to be comprehended in order to use this Law Runic Shield.

The gap between Heaven powerhouses that had just advanced to the 1st Rank and 2nd Rank Heaven powerhouses was so great because of that Law Runic Shield.

Lin Yun knew from seeing these Law Runes that these fragments of Laws from the Beast God's Blood, these were the most important things to complete the last transformation.

The fragments of Laws could make mages rapidly grasp the power of the Heaven Rank and rapidly control Extraordinary Power. Completing the final transformation would be just as easy as letting a boat be dragged along with the flow.

Those that grasped Extraordinary Power were Heaven Rank powerhouses!

Raphael was surrounded in countless Law Runes. His aura became stronger and stronger until Extraordinary Power slowly spread out.

Soon, those Law Runes merged within Raphael's body and the shadow of a Demiplane could vaguely be seen emerging behind him.

Those Law Runes started merging into that faint Demiplane, making the incorporeal shadow rapidly take shape.

This was the same as directly using the power of the Heaven Rank to establish his Demiplane, it was a lot faster than slowly grasping Extraordinary Power to establish his Demiplane step by step.

Seven-colored rays of light appeared in the sky, followed by a bright light pillar surging from Raphael's body. The light pillar charged into the sky and converged with those seven-colored rays of light.

Ultimately, the seven-colored rays of light dissipated and only left cyan rays of light behind.

At that moment, all elements apart from the wind elements were repelled. The wind elements seemed to be cheering as they converged towards Raphael.

Those wind elements converged into semi-transparent cyan fairies which revolved around Raphael, continuously singing his praises.

At that moment, Raphael became the center of the world.

Extraordinary Power surged and spread in the surroundings. But a kind of powerful pressure suddenly appeared around Raphael. It felt as if the entire world was emitting pressure in Raphael's direction and forced the escaping Extraordinary Power back into his body.

Something appeared in the sky, it looked as if the sky was being flattened by two huge incorporeal hands.

Those cyan fairies disappeared and Raphael slowly floated down with closed eyes.

Chapter 1060 Allegiance

The effects, that disappeared as fast as they appeared, attracted the attention of all the mages in the Raging Flame Battlefield.

No mage was clueless as to what that meant.

Dedale suddenly raised his head and looked into the distance with a surprised expression.

“Someone advanced to the Heaven Rank? Who is it? How could this be?! They just advanced to the Heaven Rank and already established their Demiplane?!”

It wasn't just Dedale, several other mages also noticed that.

A few of the leaders of the human forces had seen someone advance to the Heaven Rank and could recognize the fluctuations and the effects.

Those few fluctuations barely lasted an instant, but the few people noticing them let out surprised exclamations.

It was possible to advance to the Heaven Rank in the Raging Flame Plane, but it was extremely rare. There had only been one case in so many years. It was a lot harder to advance in a place like the Raging Flame Battlefield that suppressed the Heaven Rank and Extraordinary Power.

“To be able to advance here... Who could it be? Dedale? Damn, that guy is actually that talented? He advanced to the Heaven realm in a place that suppresses Extraordinary Power?!”

“How strong will he be after leaving this place? I'm afraid 1st Rank Heaven powerhouses won't be his match.

“F*cking damn luck, can't that sl*tty goddess of fate watch over me for once? How come I never get that lucky...”

Dylas' eyes rapidly turned red as he looked envious and hateful.

And on another side, Jouyi and Harren converged together, hunting those Pseudo Heaven Rank Magic Beasts together.

The Cloud Tower and the Black Tower's strength had been greatly damaged after entering the Raging Flame Battlefield. Not only did a large number of their mages die, their inherited True Spirit Magic Tools were destroyed, reducing their hunting efficiency while increasing the dangers.

They had complicated expressions as they suddenly felt those Heaven Rank fluctuations.

“Heaven Rank, eh? Someone was actually able to advance to the Heaven Rank in the Raging Flame Battlefield? This place is unfortunately suppressing mages quite heavily and Heaven Rank Mage's Extraordinary Power can't be used, we also can't sense who advanced...” Harren sighed.

He had been half a step in the Heaven Rank for a long time, his foundation was good enough and he only missed the last step to finish his transformation. But it's been a few years and he had yet to feel any sign of advancing.

As for Jouyi, he had waited for at least twenty years. He had previously been focused on something else and hadn't focused on advancing. His research had been completed only because of Lin Yun and he was finally able to focus on magic in the recent years. But he hadn't completed that final transformation.

It would be wrong to say that he didn't feel envious as he felt those fluctuations.

For those half a step into the Heaven Rank and lacking the final step, the increase in strength from completing that transformation wasn't too excessive, it would double or triple their strength at best.

The most important part was casting off their mortal body and becoming a lifeform that transcended mortals. Their Life Essence would transform and their lifespan would be ten times longer. They would appreciate even more things and would have even more time to accomplish their desires and seek the truth of magic.

The meaning of these things, to a true mage, far exceeded a measly increase in power.

The powerhouses half a step in the Heaven Rank within the Raging Flame Battlefield all had complicated feelings. They could only envy that person's fortune.

After all, who could guarantee if and when they would advance to the Heaven Rank and complete that last transformation, luck played an important role after all.

There were many cases of mages reaching the 9th Rank of the Archmage realm before 30, only to die of old age before accomplishing the last transformation.

There were some old Archmages that suddenly accomplished that transformation at death's door and became Heaven Rank powerhouses, regaining their youth. This kind of matter wasn't impossible.

Whether they did everything they could or not, in the end, that last step was something that only fate decided.

And thus, they all felt envy, jealousy or hate. No one thought that this breakthrough had been accomplished through external help.

Near the temple, Raphael floated down with closed eyes. The wind elements in the surroundings supported his body of their own volition. He wasn't casting, but he didn't have to worry about falling down.

His Extraordinary Power fluctuations disappeared, but his aura had already gone through huge changes. His skin was shining and his mana fluctuations had become vast and cryptic. It gave others the feeling that he was overwhelmingly tall, and it felt as if the surrounding environment was helping him.

Elements were following him while the Law was putting pressure.

Those were instinctive abilities of Heaven Rank powerhouses, just like mana and spells. The power released by a Heaven Rank powerhouse was several times higher than a 9th Rank Archmage.

This wasn't like Ultimate Spells' qualitative change in the essence of the spells. It was a kind of change interweaving quality and quantity. A spell of the same tier was more powerful in the hands of a Heaven Mage, even without Extraordinary Power.

More importantly, because of the comprehension of a Law, the speed at which a Heaven Rank powerhouse cast the same spell would far exceed that of an ordinary Archmage. Some 7th Tier and 8th Tier spells they were proficient in could even be compressed and released within one or two seconds.

Some stronger powerhouses could even instant cast one or two 8th Tier Spells due to their comprehension towards Laws! And the spells' power wouldn't weaken.

This kind of strength surpassed Archmages on every single field.

Raphael's mana hadn't grown much, but the strength he emitted was a few times stronger than before.

Morgan walked over with envy and congratulated Raphael.

"Congratulations Sir Raphael, you already became a true Heaven Rank powerhouse. I didn't expect Sir Raphael's talent and foundation to be so powerful that you actually established your Demiplane..."

Raphael opened his eyes, his face carrying an unconcealed happiness. Advancing to the Heaven Rank was the dream of all mages. And he has just accomplished it and even established his Demiplane. He had thoroughly stabilized at the 1st Rank of the Heaven realm and no longer had to worry about being unable to reach the Heaven Rank. This was a pleasant surprise.

"Sir Morgan is praising me too much, this isn't due to my abilities. Rather, Sir Merlin's potion had very good effects and contained pure fragments of Laws. I didn't have to worry and only needed to fuse them within my Magic Conducting Rune to smoothly complete the transformation and easily establish my Demiplane."

After saying that, Raphael gratefully looked at Lin Yun and directly bowed.

"Sir Merlin, I no longer know how to express my gratitude. I can only say that from now on, I'll stand together with Sir Merlin at any time, for any matter, as long as Sir Merlin doesn't destroy Sky City.

"No matter what it is, you only need to send me a magic signal if you require my help and I'll help you with all my strength. You are truly a mage worthy of respect.

"I've been trapped at the Peak of the Archmage realm for twenty years, I already had a foot in the Heaven realm back then, but I had yet to complete that last transformation. I thought that I would spend all my life praying for fate to look upon me, but I didn't expect to receive Sir Merlin's help.

"I..."

Raphael's eyes turned red as he spoke, these were matters that outsiders didn't know. Others only saw Raphael as the leader of Sky City, a powerful alchemist with a huge level of mastery of the field of array.

But they didn't know that based on Sky City's tradition, the truly gifted alchemists that could reach the Artisan realm or had a faint hope of becoming Saint Alchemists, absolutely wouldn't be in a dangerous place like the Raging Flame Battlefield.

Those with the prospect of reaching the Heaven realm wouldn't take the risk to die in this place either.

Sky City was hidden within a thick layer of mist, very few people ever got to the actual Sky City, there were many things that outsiders didn't know.

The spokesperson that appeared on the surface didn't have a very high position within Sky City, he would only get rewards from managing the force and could get more support and assistance. This was also an opportunity to increase their chances of advancing to the Heaven Rank.

Lin Yun waved his hand.

“Sir Raphael, you don’t have to be so polite at such a time. We have to stand united against the danger we are facing. We won’t be able to defend ourselves if we don’t gather enough power...”

Lin Yun didn’t fancy the Beast God’s Blood from the start since he definitely wouldn’t use it. That thing could only be used for the Golden Temptation, so he might as well give it to others to build relationships.

Lin Yun’s actions reinforced his relationship with Raphael, which could now be said to be very good. At least now, if the Odin Kingdom wanted to deal with Lin Yun, Raphael would definitely be the first person to stand up and stop them. If they fought, Raphael would definitely stand on Lin Yun’s side.

Morgan was completely shameless, he was of the same vein as Xiuban. He didn’t think too much about him, as long as he gathered enough mana crystals, Lin Yun would help him with the Golden Temptation.

There was also Arnaud, a pure water mage. He definitely wouldn’t be weak after advancing to the Heaven Rank, not only would he master some healing spells, he would also learn some buffing spells, his power would truly shine.

Then he would look for Jouyi and Harren. With five Heaven Mages and Lin Yun, they would be able to deal with the Raging Flame Beastmen if they went all-out.

The Raging Flame Beastmen weren’t truly united, the relationship between each tribe, and even within their own tribe, wasn’t very good.
