

## **Martial Arts 461**

### *Chapter 461: Motivating The Entire Army!*

In the sky, the general-stage martial warriors from both sides were in a heated battle.

They moved at the speed of lightning, so from afar, all one could see were balls of lights colliding nonstop with one another, creating loud explosions along the way.

The frightening Force swept through the sky and destroyed everything in its way.

Even though the battle was occurring in the sky, the entire area had turned into a forbidden zone. The ground below them would get implicated by the residual forces.

This was how mighty general-stage martial warriors were.

Every single attack they made had scary consequences. Hence, you could imagine how frightening this life-or-death battle was.

The buildings in Star Maple City collapsed one after the other. All that was left was debris.

After the array disintegrated, the remaining dark apparitions inside dashed out of Star Maple City.

Before this, the runemasters had activated the Thousand Thunder Annihilation Array and the Yi Wood Melting Fire Array together and captured multiple dark apparitions in the city. They had killed many dark apparitions with the help of lightning and fire.

However, some of the dark apparitions had still managed to survive.

They rushed out of Star Maple City crazily, afraid that the arrays would get activated again.

These dark apparitions had suffered the torment of two huge arrays. The trauma lingered in their hearts. Whenever they recalled the fear of being controlled by lightning and fire, they would shudder.

The Black Incubus Devil Lord frowned when she saw this scene.

“Useless!”

Her cold voice echoed in the sky and landed in everyone’s ear. The dark apparitions tensed up, and terror appeared on their faces.

They knew better than anyone how terrifying and ruthless the Black Incubus Devil Lord was. If they offended this lord, they would die a terrible death.

“Any escapees will be killed!” The Black Incubus Devil Lord’s voice was indifferent without any emotions.

All the dark apparitions shivered, and their heads turned numb. They glared at the humans and roared as they charged towards them.

The humans were in a state of despair the moment the Black Incubus Devil Lord appeared.

The Black Incubus Devil Lord was too strong!

The two massive arrays specially crafted by the human runemasters were easily broken by her.

Dan Taixuan and the other general-stage martial warriors seemed exceptionally weak in front of her. Everyone saw what happened during the short exchange of blows between Dan Taixuan and the Black Incubus Devil Lord.

They knew that Dan Taixuan was powerful. Ordinary general-stage martial warriors couldn't beat her. However, she had no chance of success when facing the Black Incubus Devil Lord.

In that case, which human could resist the Black Incubus Devil Lord?

Moreover, the general-stage dark apparitions had been released. If the human general-stage martial warriors could stop them, that would be the best situation.

This was a battle that couldn't be won!

While the humans were thinking about this, the dark apparitions' ferociousness got ignited due to their fear of the Black Incubus Devil Lord. They pounced on the human martial warriors.

Many people were caught off guard and got bitten to death by the dark apparitions. It was a gruesome and devastating scene.

Wang Teng looked at them from the sky, his expression solemn. However, he was wary of the Black Incubus Devil Lord.

If he used his spiritual power to control the battlefield again, would the Black Incubus Devil Lord kill him?

The Black Incubus Devil Lord suddenly turned and looked at him. She seemed to have sensed his gaze.

Wang Teng jumped in fright.

It didn't feel good to get targeted by a big boss!

Fortunately, the Black Incubus Devil Lord just stared at him mockingly and didn't attack him.

Wang Teng heaved a sigh of relief secretly. He turned back to the tragic battlefield below, and a firm gaze appeared in his eyes.

Come on, who's afraid!

In this situation, he must act. If he was fainthearted, if he remained still because he was afraid of the Black Incubus Devil Lord, it would become a psychological trauma, and his future cultivation would be affected.

He turned serious. Then, he shot into the battlefield and spread his spiritual power to every single corner.

The same scene appeared on the battlefield once again. The dark apparitions in the area froze for a second.

The human martial warriors were stunned. Almost instantly, they understood what had happened.

“Wang Teng!”

“It’s Wang Teng!”

They looked at Wang Teng. No one expected him to have the courage to continue fighting after he gained special attention from the Black Incubus Devil Lord.

They felt a sense of shame. Compared to him, the despair they felt was nothing.

Wang Teng had been right in the arms of the Black Incubus Devil Lord. That was the real hopelessness. Yet, he didn’t give up. So, what right did they have to give up?

“Why are you staring blankly at me? Kill them!” A fierce shout came from Wang Teng’s mouth.

The morale of the human race was roused greatly. They pounced on the dark apparitions and waved their weapons high in the air. The fearless spirit of the human race had appeared once again!

Kill!

Kill!

Kill!

The human martial warriors howled. They seemed to have turned into wild beasts. Even if they had to use their teeth, they would bite the dark apparitions to death.

Dan Taixuan and Lord Yang, who were fighting in the sky, silently gave their approval when they saw this scene.

He had motivated the entire army alone!

Wang Teng did well, unexpectedly well.

As long as the morale was still there, the humans could continue fighting.

On the other side, a hint of surprise flashed past the Black Incubus Devil Lord’s eyes. She sized up Wang Teng with interest.

This young human martial warrior was interesting!

All this while, Wang Teng had kept an eye on the Black Incubus Devil Lord. He wouldn’t sit and wait for his death. If the Black Incubus Devil Lord attacked him, he would run away immediately.

But to his frustration, the Black Incubus Devil Lord didn’t plan to kill him.

Wang Teng’s gaze flickered. He didn’t care about the reason why she didn’t kill him. It might be her ego as a formidable warrior, or she might be too lazy to move. Whatever it was, he had the chance to kill the dark apparitions.

Along the way, he picked up attribute bubbles too. The greatness of the Black Incubus Devil Lord made him realize how weak he was. He needed to raise his ability quickly.

Every inch of improvement meant a higher chance of success.

The Forces of his five elements were close to reaching the 8-star soldier level. He just needed a little more to break through.

After clearing the dark apparitions in this area, he immediately turned and shifted to another spot densely packed with dark apparitions.

Kong Li and Yuwen Xuan led their team and fought viciously with the dark apparitions. Ice Wind and Black Widow were beside them too. They rode on their Gale Wolves and traveled at high speed, hunting the dark apparitions around them.

However, there were too many of them. They gradually got exhausted, and casualties started to appear among their ranks.

Wang Teng arrived above them. He swept the area with his spiritual power and locked up the dark apparitions.

Kong Li and the others were surprised before they cried with joy, feeling invigorated.

"It's our leader. Our leader is here!" Ice Wind and Black Widow exchanged glances. They were elated.

"Kill!"

The troops massacred the dark apparitions when they couldn't move.

"Form the battle formation!" Wang Teng shouted at them.

They reacted immediately and started gathering towards the center, quickly assuming the formation of a sword...

#### **Chapter 462: The Black Incubus Devil Lord Is Creating Trouble Again!**

Before the war started, the soldiers from the Black Sparrow Troop had come up with a formation to cooperate with the Gale Wolves. Thus, once they heard Wang Teng's words, they immediately got moving.

A large sharp sword formed by human martial warriors and Gale Wolves appeared on the battlefield.

One could see the complete sword from the bird's eye view.

"Charge!" Wang Teng's voice resounded from the sky.

Kong Li and the others rode on their Gale Wolves and followed behind him. They seemed to have turned into a sharp sword, stabbing straight at the fatal spot of their enemies.

The sharp blade swept through the battlefield. Wherever it went, all the dark apparitions in the area would be massacred.

Complemented by Wang Teng's spiritual power, they suffered no defeat. The war seemed to be tilting towards the humans' side.

"Good riddance!"

Lord Yang and the other martial warriors were surprised and delighted. They didn't expect the hundred-men team to become such a powerful force under Wang Teng's command.

This was a pleasant surprise!

"Where are you looking?" The sheep-headed dark apparition, Sabah, smiled hideously and clawed at Lord Yang's neck.

"Go away!" Lord Yang bellowed as he faced the attack. An intense fight started again.

On the other side, the Eight Arms Devil General, Zurz, also saw Wang Teng. Hatred almost overflowed his eyes.

*It's him!*

He had never hated someone weaker than him, but when he saw Wang Teng's face, he couldn't suppress the surging anger and hatred in his heart.

Wang Teng had caused him huge suffering. They were arch enemies.

He held his battle blade and pushed Dan Taixuan back with a single strike. He wanted to rush down and kill Wang Teng.

"If you want to kill my disciple, you have to ask me first!" Dan Taixuan realized his intention and flared up in anger. She blocked his path, throwing a punch at him.

"I'll kill you first before killing him!"

Killing intent boiled in Zurz's heart. Although he lost three arms, he still had five left. A couple of them were holding blades while the others turned into fists. He slashed and punched Dan Taixuan.

He had a huge advantage because of his five arms. However, Dan Taixuan was extremely powerful, and her battle awareness was appalling. She switched between her fists and palms and used her bare hands to block the Eight Arms Devil General's attacks. In the midst of it, she even managed to retaliate, causing him to retreat continuously. His face turned black.

...

Wang Teng didn't know that the Eight Arms Devil General had discovered him. He was leading the battle formation formed by his troop on the battlefield, charging right and left. They slaughtered the dark apparitions at an amazing speed like meat on the butcher's chopping board.

The Black Incubus Devil Lord leaned back on her black feather throne with one hand on her cheek. She tapped the throne's handle lightly with her other hand and suddenly yawned. Then, she muttered to herself in a lazy voice, "This young man is cheating. This isn't fun."

She thought for a moment. Her pitch-black eyes suddenly lit up, and she chuckled.

"Let's increase the difficulty for him!"

The moment this thought appeared in her mind, she opened her mouth and said to the general-stage dark apparitions in the sky, "If any of you can kill that young man, I'll forgive you for almost losing the battle just now."

The general-stage dark apparitions felt their hearts trembling when they heard this. Their attacks became even more vicious. They wanted to break free and kill Wang Teng.

When they arrived at the Xingwu Continent, they landed in the humans' array trap due to their carelessness and caused the dark apparitions to suffer a huge loss. They had to bear the blame. No one could run away.

As the chief commander of this battle, the Black Incubus Devil Lord had the power to decide their crimes and even their deaths.

They might be at the general stage, but once they remembered how terrifying the Black Incubus Devil Lord was, they felt a chill running through their bodies.

Now, the Black Incubus Devil Lord was giving them a chance to amend their mistakes. How could they give it up so easily?

Dan Taixuan and Lord Yang were shocked. They didn't expect the Black Incubus Devil Lord to create trouble again.

What grudge did she have against Wang Teng? Why must she have him killed?

Naturally, they wouldn't allow the general-stage dark apparition to kill Wang Teng. Wang Teng was a rare talent of the human race and had the potential to become a formidable warrior in the future. Also, his presence was important in this war. They mustn't let anything happen to him.

Thus, they used all their strength to stop the general-stage dark apparitions from leaving.

Suddenly, there was a blood-curdling scream. A general-stage lycan spurted a black round light ball from his mouth suddenly.

The human martial warrior was caught off guard and got hit by the ball of light. The bones in his arm, along with half of his shoulder, got shattered into pieces.

However, the vitality of a general-stage martial warrior was extremely strong, and his healing ability was powerful too. Even if he had suffered serious injuries, he wouldn't die immediately.

But his combat prowess was affected, so he wasn't the lycan's match anymore. If they continued fighting, there was a high possibility that the lycan would kill this human martial warrior.

However, the next second, the general-stage lycan, Siler, abandoned the martial warrior and turned to charge toward Wang Teng.

"Stop him!" Lord Yang and Dan Taixuan's expressions changed. They shouted furiously. If that lycan broke free, Wang Teng would be in danger.

Dan Taixuan and Lord Yang wanted to chase after him, but they were held back by other general-stage dark apparitions.

“Siler, hold back this human. I’ll kill that young brat,” Zurz shouted. He held immense hatred towards Wang Teng and wanted to kill him personally.

“Zurz, this is my chance to make amends for my mistakes. Why should I give it to you?” Siler laughed. He ignored the Eight Arms Devil General’s shouts.

“Damn it!” Zurz turned green in anger. Noticing that Dan Taixuan wanted to chase Siler, a knowing glance flashed past his eyes. He chose to let her pass.

*I must kill that fellow. Stay away as far as you can.* Zurz sniggered in his heart.

Dan Taixuan was stunned for a moment, but this wasn’t the time to ponder over his actions. Siler was traveling at a fast speed and had almost reached Wang Teng.

Wang Teng felt his heart palpitating without any warning. He felt as if a huge danger was befalling him.

“Move!” Dan Taixuan’s voice hurled down the sky at this moment. She was still a step too late, so she could only shout to warn Wang Teng.

Wang Teng instinctively used his space talent and disappeared on the spot.

Slash!

The next instant, sharp claws slashed through the air where Wang Teng was standing a moment ago. His lingering shadows were clawed into fragments.

Siler’s figure appeared. He scanned his surroundings and exclaimed softly, “He managed to run away!”

Boom!

Suddenly, a sword glow stabbed through the air, aiming directly at the lycan dark apparition.

Siler frowned. He waved his claw and tore the sword glow into pieces.

Wang Teng appeared in the distance. His face was grave, and he was carrying the Fire God Cannon on his shoulder. It was gathering energy rapidly, its fiery red glow extremely glaring.

Siler’s heart skipped a beat. He felt a sense of threat from the Fire God Cannon.

Before he could do anything, a cold smile appeared at the edge of Wang Teng’s lips. He fired the Fire God Cannon... Boom!

Chapter 463: Hunt

Boom!

The Fire God Cannon spat out flames. A highly compressed flaming Force ball disappeared from the muzzle of the cannon and shot towards the lycan not far away, bringing with it a scorching heat.

“That’s a Fire God Cannon!”

The sudden attack of the general-stage dark apparition and the huge commotion it caused attracted many people's attention. They were all worried about Wang Teng.

There was a moment of silence when they saw the item in Wang Teng's hand. Then, their eyes widened in surprise.

They didn't know that he had such a powerful weapon on him. They wondered if he could stop the lycan dark apparition.

Under everyone's gaze, the ball of Force light sped towards the lycan at the speed of light and arrived in front of him instantly.

Siler squinted. Then, he suddenly smiled and raised his hand to catch the Force ball.

Boom!

A huge explosion occurred. The next second, the ball of Force light erupted, and the flames swallowed the general-stage lycan.

"He's hit!"

Everyone stared at the flame intently. They could faintly make out a figure inside. The general-stage aura coming from the dark apparition remained strong. He didn't seem to be injured.

This result caused their expressions to change.

However, Wang Teng didn't wait for the results. He turned around and left after firing the shot. He understood the power of the Fire God Cannon. It was strong, but it wouldn't offer any life-threatening danger to a general-stage formidable warrior. It would only inflict some small injuries.

As expected, a figure charged out from the flames and scanned his surroundings. When he saw Wang Teng running away, he moved his body and chased after him.

Dan Taixuan rushed down without any hesitation to stop Siler.

The Eight Arms Devil General let Dan Taixuan off because he wanted to personally take revenge. He hoped that she would stop Siler so that he could kill Wang Teng.

"Stop her!" Suddenly, the Black Incubus Devil Lord's cold voice came into his ears.

The Eight Arms Devil General's expression changed. He turned and looked at the Black Incubus Devil Lord involuntarily. When he met her indifferent gaze, his heart skipped a beat, and he immediately chased after Dan Taixuan.

Although he felt bitter, he didn't dare disobey the Black Incubus Devil Lord. He could only throw away his plan obediently.

He didn't expect that excellency to pay so much attention to Wang Teng. It looked like that brat was dead!

The Eight Arms Devil General was fearful of the Black Incubus Devil Lord, so he released all his potential and caught up with Dan Taixuan in the blink of an eye. He threw a punch at her back.

Dan Taixuan felt the terrifying force behind her back, so she had no choice but to turn around and face the attack. She tossed her punch out, and their fists collided with one another.

Boom!

The frightening force threw them back uncontrollably. Dan Taixuan wanted to chase the lycan, but the Eight Arms Devil General moved and blocked her path.

“You can’t leave!” Zurz said calmly.

Dan Taixuan furrowed her brows and dashed towards the Eight Arms Devil General. Since the other party didn’t let her pass, she could only kill him first...

At the same time, Wang Teng had already escaped far away. He turned back and saw the lycan chasing him relentlessly. With his fast speed, he would be able to catch up with him very soon. Wang Teng’s heart felt heavy.

Damn it, why is a general-stage dark apparition chasing him? Where is his dignity?

Run!

He could only run!

His life was very important!

Wang Teng remained calm on the surface, but his speed increased exponentially.

He activated his wind Force and covered his body with it, seemingly turning into a gust of wind. Not only that, he used his spiritual power too!

It seemed to have formed a pair of invisible wings behind his back. As they flapped, his speed soared.

It was like the difference between a normal engine and a turbine generator.

Come on, I’ve never lost in terms of running away!

A smirk appeared at the edge of the lycan’s lips. He almost caught up with Wang Teng. He could visualize how he would pinch Wang Teng to death later.

But suddenly, his eyes popped out. He saw Wang Teng’s speed increasing unscientifically. Then, he darted into the horizon, leaving a trail of dust behind him.

Siler was infuriated. To hell with this human. How could he run at such a speed?

As a general-stage formidable warrior, he couldn’t catch up with a 7-star soldier-level human martial warrior. It would be embarrassing if Sabah and the other dark apparitions saw him.

In an instant, he increased his speed to the maximum and chased after Wang Teng.

Wang Teng’s gaze flickered. The general-stage human martial warriors were all held back by the general-stage dark apparitions. They couldn’t reinforce him.

Also, the Black Incubus Devil Lord was commanding the dark apparitions. She wouldn’t allow other general-stage martial warriors to help him.

He could only rely on himself!

Wang Teng made a firm decision and charged towards the mountain range in the distance.

In the empty battlefield, there was no place for him to hide. The martial warriors below the general stage couldn't offer much help to him, so it would be useless even if he sought their reinforcement. Hence, he had no chance of winning here.

However, the mountain ranges were different. The mountains were unpredictable, so he might have a chance of surviving there.

After some time, the human and the dark apparition disappeared from the battlefield. They flew into the thick forest on the mountain.

The Black Incubus Devil Lord glanced in their direction and yawned. Then, she stood up from her throne.

No, it wasn't her true form. It was just a special clone that stood up. Her body was still sitting lazily on the throne.

The clone separated from her body and quickly solidified. Soon, it looked no different than the actual lord.

"Go!" The Black Incubus Devil Lord waved her hand.

"Haha, lord, you're so curious today." The clone covered her mouth and smiled. Then, she disappeared gradually.

The Black Incubus Devil Lord rolled her eyes. Only her clone dared to laugh at her.

Well, she was a part of her body.

On the battlefield, Kong Li, Ice Wind, and the other soldiers realized what had happened. They wore grim expressions as they looked in the direction Wang Teng disappeared. They were worried.

"Don't die!" Kong Li muttered to herself.

She had no confidence. The other party was a general-stage dark apparition, while Wang Teng was only a 7-star soldier-level martial warrior. No matter how she looked at it, he didn't have much hope of coming out alive.

Yuwen Xuan's expression was complicated. Although he disliked Wang Teng, they were both on the same side, so he didn't wish for him to die. Also, Wang Teng was truly capable and strong. He acknowledged his ability. Thus, when he saw him getting chased by a general-stage dark apparition, he felt pity. Wang Teng's situation looked grim.

However, this was the battlefield, a place of life or death. They had experienced too much of it. Since they couldn't save Wang Teng, they could only turn their sorrow into strength and kill more dark apparitions.

In the sky, Dan Taixuan frowned, especially when she saw the Black Incubus Devil Lord sending a clone to chase after her disciple. She truly wanted Wang Teng to die!

Dan Taixuan was furious, her attacks becoming sharper and fiercer. The Eight Arms Devil General retreated step by step...

The Eight Arms Devil General finally understood how scary a woman could be when she was angry!

Boom, boom, boom!

Dan Taixuan's strength increased. Amidst the explosions of the Forces, she fired punches at the Eight Arms Devil General continuously.

The Eight Arms Devil General was thrown back under the onslaught. He vomited blood and looked at the lady in fear. When did she become so powerful!

...

On the other side, Wang Teng sprinted towards the depth of the mountain ranges without any hesitation after he entered the primary forest.

"You can't escape!" The lycan scoffed behind him.

Wang Teng didn't reply to him, not even turning his head. He just increased his speed. In this life-or-death moment, he had released all his potential.

"You won't understand how powerful the general stage is. You won't understand the difference between the general stage and the soldier level either. There's no need to continue running. It's useless.

"Stop resisting, and I just might give you an intact corpse.

"If I catch you, I'll break your limbs, tear every inch of your flesh with my teeth, and savor it.

"You might not know how much I love the taste of talented human flesh. They're exceptionally delicious.

"Also, the more you struggle, the tastier your flesh will be. I've eaten many talented human martial warriors in the past. I still remember the taste now..."

As Siler chased Wang Teng, he tried to stimulate him with his words in an attempt to destroy his belief and give him a mental breakdown.

However, he didn't know who he was facing.

If Wang Teng got frightened by these words, he wouldn't be Wang Teng anymore.

Rather, he was angered by the lycan's words. Killing intent shot out of his eyes. Even though his opponent was at the general stage, a crazy thought of killing him sprouted in his mind.

"In the past, I met a talented young martial warrior from your race. She was a young lady, and her skin was so smooth..."

Siler's face turned hideous when he noticed Wang Teng's indifference. He started going into more details.

"Idiot!" Wang Teng gave him a middle finger without turning back.

The dark apparitions had been fighting with the humans for many years, so Siler understood what this sign and 'idiot' meant.

He burst into anger.

This fellow was belittling him even though he was at the general stage.

There were many star beasts in the forest, and they got alerted by the commotion. However, feeling the powerful aura exuding from their bodies, they ran away, not daring to get any closer.

As the duo headed deeper, some formidable star beasts started appearing. Wang Teng sensed the presence of these star beasts and led the lycan to their territories.

He activated his Wave Invisibility skill to cover up his aura.

The powerful star beasts who got disturbed couldn't find the real invader, so they could only vent their frustration on the lycan.

Roar!

The moment a 9-star star beast darted out, it was killed by Siler with a smirk.

The muscles on Wang Teng's face trembled. He silently picked up the attributes dropped by the star beast and left in a hurry.

He didn't have the time to pick up the corpse. What a waste.

However, Siler did it for him and kept it. After all, he was the one who made an effort to kill it. The flesh of a 9-star star beast wasn't an ordinary item. He wouldn't let it go to waste.

Then, he continued chasing Wang Teng. A hint of confusion appeared in his eyes. "How did that fellow escape the star beast's detection?"

He didn't know Wang Teng's method, but he understood immediately once he recalled the attention the Black Incubus Devil Lord gave him.

There must be something special about this brat!

Siler started to feel curious about Wang Teng.

As their journey continued, more and more powerful star beasts appeared. Wang Teng used the same method to let the lycan suffer tough battles.

At the start, Siler didn't mind. One or two 9-star star beasts were nothing to him. He even felt that Wang Teng was just putting up his last-ditch useless struggle.

But as more and more star beasts blocked his path, his face turned black. He felt that he was being played. Flames of anger burned in his heart.

Bang!

He broke the spine of a star beast with his claw and killed it. Then, he panted slightly. After the long chase, he was starting to feel tired too!

“Come out!” He scanned his surroundings and howled in anger.

“I thought you love to chase me. Come on, continue!” Wang Teng revealed himself and hooked his finger at Siler. He continued running.

“Damn this human!” Siler bellowed in his low voice. He knew that this was Wang Teng’s scheme, but he had no other choice. He had to continue chasing.

If he couldn’t catch Wang Teng and bring him back, the Black Incubus Devil Lord wouldn’t let him off.

This bit of tiredness was nothing when compared to facing the Black Incubus Devil Lord.

Half an hour later, Wang Teng had traveled half the mountain range. He angered another powerful star beast and laughed. “Bald wolf, I prepared a huge gift for you. Please receive it properly.”

The moment he finished speaking, a terrifying and ferocious roar echoed in the forest. Then, a giant tiger with one horn on its head appeared in midair. It was covered with yellow scales that formed armor on its body. It scanned its territory and saw Siler, who was chasing Wang Teng, immediately pouncing on him.

“Bastard!” Siler’s face turned black. He knew that this was a half-step lord-level star beast. He wasn’t afraid of it, but he had to pay a higher price if he wanted to kill it.

The dark Force in his body wasn’t endless. The fights before this had used up much of his reserves.

Siler turned and retreated. He wanted to lay low and evade the fight with this golden-scale tiger. However, the golden-scale tiger didn’t plan to let him go so easily.

Anyone who dared to invade its territory would have to suffer its wrath.

The territorial dominance of a star beast was extremely strong.

An intense battle ensued in midair. In the end, the half-step lord-level golden-scaled tiger still lost to Siler and was killed on the spot.

Siler kept the corpse of the tiger and looked around him. He wanted to find Wang Teng.

This young human was too scheming. He wanted to use this method to exhaust him to death.

At this moment, a tinge of hesitation appeared in his heart. But when he remembered that Wang Teng was only at the 7-star soldier level, he laughed at himself. So what if he used up much of his dark Force? Killing that young human was still a piece of cake.

Wang Teng looked at the golden-scaled tiger that got killed by Siler. A few large attribute bubbles were floating around it. He immediately used his spiritual power to pick them up secretly.

Earth Force\*560

Blank Attribute\*399

...

Suddenly, Wang Teng shuddered. His earth Force had broken through the barrier and reached the 8-star soldier level!

#### **Chapter 464: Are You Planning To Change A Host Because You Dislike Me?**

Earth Force: 280/7000 (8-star)

Wang Teng felt the breakthrough in his level and immediately drew out his attributes panel. He never expected his earth Force to be the first to reach the 8-star soldier level!

Mind you, at the start, his fire Force was way ahead of the other Forces.

He scanned his attributes panel and noticed that his fire Force was actually inches away from reaching the 8-star soldier level...

Fire Force: 4999/5000 (7-star)

It was indeed extremely close. All he needed was one more point!

Wang Teng felt a little exasperated. In that instant, he felt how evil the system was. If he hadn't opened his attributes panel, he wouldn't have realized that his fire Force was so close to the 8-star soldier level!

If he knew it, he would have killed a fire element star beast. Even a 1-star soldier-level star beast was enough to help him raise his level.

He looked at the other Force attributes. Besides the rarer elements, wind, lightning, ice, and poison, the other five elements had seen a tremendous improvement. They were also very close to breaking through. In total, he needed less than a hundred Force attributes to raise his five elements.

Wang Teng felt the evil intentions of the system.

The system: ...

Among all his Forces, the one that surprised him the most was... dark Force!

Without him knowing, his dark Force had silently risen to the 9-star soldier level!

It wasn't far from the general stage either!

Dark Force: 8560/9000 (9-star)

Wang Teng's expression turned ugly. He didn't sense the breakthrough of his dark Force.

However, it was reasonable that his dark Force rose tremendously. After all, there was an abundance of dark apparitions on the battlefield, so naturally, more dark Force attributes would be dropped.

Nonetheless, it was strange, though. His dark Force rose from the 7-star soldier level to the 9-star soldier level. It rose two whole levels, but he didn't detect anything at all!

How did this happen?

He couldn't find the reason. He felt that some things had gone out of his control.

This feeling wasn't good.

Normally, every time his level rose, the Force would rise from the Force nucleus and flow up his spine to the next Force nucleus, settling inside it. The reaction it caused wasn't small, so he would be able to feel it.

Wang Teng relaxed and started looking at his body with his conscience. He searched for the 9th Force nucleus that had been lit up.

Very soon, he realized the problem. The dark Force wasn't stored inside the Force nucleus. Instead, it had unknowingly merged with the body of his Force nucleus. The surface of his 9th Force nucleus was covered with dense black patterns.

If someone dug his Force nucleus out of his body, they might think that he was a dark apparition!

The Force nucleus looked as if it had been contaminated.

The edge of his lips trembled. He didn't sense that he was turning into a dark apparition, but the feeling of things getting out of hand wasn't good.

*System, didn't you say that nothing will go wrong?*

*System, you've changed!*

Wang Teng screamed in his heart. Unfortunately, the system remained as cold and distant as always. It didn't bother to reply to him.

"Gotcha!"

Suddenly, Wang Teng heard a sinister laugh. That lycan dark apparition was charging at him.

Boom!

He waved his sharp claws. The trees that hid Wang Teng got chopped by two black claw glows. Then, the claw glows continued flying towards Wang Teng.

Wang Teng squinted. He was too careless just now. The Force fluctuations created when he rose in level must have attracted the lycan's attention.

Without thinking, he activated his space talent.

The air behind him rippled slightly. At the same time, the claw glows arrived in front of his face. The sharp and strong wind scratched his cheeks, leaving thin and small wounds. Blood dripped from the wounds.

Wang Teng stared at the black claws. Then, he stepped on the ground and flew back abruptly.

Slash!

The next moment, the black sharp claws split Wang Teng's lingering shadow into two.

On the other side, Wang Teng's true form appeared. There was cold sweat on his forehead. He turned around and continued running away without hesitation.

"That is... the power of space!" Siler's expression turned eerie. There was disbelief in his eyes.

This time, because of the close distance, he detected the source of the secretive power. It was the power of space. There was no doubt about it.

This young human had managed to grasp the power of space!

However, he was only a 7-star soldier-level martial warrior. Even if he had reached the 8-star soldier level a moment ago, he was still a huge distance away from the general stage. Yet, there were rarely any general-stage warriors who were able to grasp the power of space.

Only those at the peak of the general stage might be able to touch the door of space power. Even then, it was impossible for them to use it smoothly like this young human.

Siler's gaze flickered. He snorted and stepped on the ground. He turned into lingering shadows as he chased after Wang Teng.

The answers would be revealed once he caught that young human.

He didn't believe that this young human could use space power endlessly. Once he reached his limit, he would fall in his hands.

Wang Teng felt the lycan behind him getting closer and closer. He turned serious. Because of his mistake, the distance between them had shortened greatly, and his advantage was gone.

He couldn't continue like this. He would get caught sooner or later.

Wang Teng gritted his teeth and made his decision. With his current ability, he might have a 10% to 20% chance of killing his opponent if he gave it his all.

Even if there was only a 10% or 20% possibility, he must do it. If he didn't, death was his only option.

At this moment, his vision included his own, as well as Little White's in the air.

Very few people detected Little White's presence. In this primary forest within the mountains, it was a huge assistance to Wang Teng.

He relied on Little White's vision-sharing ability to accurately find the positions of the powerful star beasts.

Now, he was preparing a huge gift for that lycan.

Not long after Little White absorbed the 4-star fire element star core, Wang Teng had fed the 5-star star core to it.

Little White was extremely talented and was always looking for fights. With Wang Teng's help, it managed to reach 5-star successfully.

Although this level wasn't high nor low, its progress was already swift. After all, it had only been with Wang Teng for a short time and had already managed to reach its level.

As its ability rose, the range of its connection with Wang Teng increased by many times.

Wang Teng ordered Little White to fly deep into the mountain range using the power of the spiritual pet contract. He was looking for something in the mountain.

Not long after, he finally saw a dazzling ball of fire element Force glow through Little White's vision.

*That's it!*

Wang Teng was elated. He suddenly changed his direction and darted to the left of the forest.

The lycan chasing him was stunned for a moment. He frowned. He wasn't stupid, so he could see that this young human seemed extremely familiar with this forest. He could always find the location of star beasts and create trouble for him.

*What tricks does this young human have this time?*

#### **Chapter 465: Come Quickly, You Can Do It!**

To Siler, this young human was a sinister and tricky person. That was why he was able to think of such an irritating and torturous scheme.

He had never met such a frustrating fellow. He was only at the 7-star soldier level, but he was forced to spend such a long time chasing him.

He would be embarrassed if anyone found out!

Wang Teng shot towards the ball of red glow he saw using Little White's vision while feeling his ability. All in all, the dark Force was at the top among all his Force attributes currently.

He was facing a life-threatening danger now, so he didn't have the time to ponder over the abnormality of the dark Force. He just hoped that he could use it.

It didn't matter what Force it was. As long as he could kill the dark apparition, it was a good Force.

Even if it was the dark Force, he would use it if it could help him kill the general-stage dark apparition.

He had no dislike for it!

Very soon, Wang Teng realized that he could still use his dark Force smoothly. He didn't feel anything strange.

He heaved a sigh of relief. If any troubles happened now, he would be in a dire situation.

Since he was able to use his dark Force normally, it meant that he could execute the power of a 9-star soldier-level martial warrior at its peak. Along with his other skills and techniques, there was a higher chance of him killing the general-stage dark apparition.

But to Wang Teng, this wasn't enough.

His pupils twirled around as he commanded Little White to silently close in on the crimson ball of light.

If one knew the enemy and oneself, they would not need to fear the result of a hundred battles.

Based on the intensity of the Force glow, this star beast must be at the lord level. If he had no better idea, he wouldn't go and provoke this formidable presence.

Wang Teng used the power of the spiritual pet contract to command Little White forward. He was extremely careful, trying his best to not alert the lord-level star beast.

He didn't want to lose Little White here.

Little White retracted its Force under Wang Teng's order. It carefully flew closer to the lord-level star beast's territory just like an ordinary bird.

As it got closer, it felt the scorching aura in this area. Huge rocks stood erected in the middle of this dense forest. The trees here grew strangely too. The leaves were fiery red, looking like flames sparkling on the trees.

Even though it was extremely hot, the ground was wet. Molds could be seen everywhere.

Little White flew low in the sky. It circled the huge rocks covered with mold and soared through the fiery red leaves growing on the trees...

Suddenly, Wang Teng asked it to stop and hide.

Right in front, in the middle of a pile of broken rocks, a green flame was burning. Beside this flame lay a hideous and gigantic scorpion. It looked like an armored tank hibernating on the ground.

As its mouth opened and closed, as it breathed, small wisps of flames from the green fire got sucked into its stomach.

There was a ball of flame on the tip of its tail, covering its poisonous stinger. It looked very strange.

It was obvious that this lord-level giant scorpion shouldn't be provoked.

It looked like a metal armor flaming scorpion, but its flames should be red, not green! Wang Teng felt puzzled when he saw the appearance of the giant scorpion.

Could it have mutated?!

A thought suddenly flashed through his mind. His gaze landed on the green flame.

If it had mutated, it would be harder to deal with!

A glow appeared in Wang Teng's eyes. He felt that the lycan would be extremely satisfied with the opponent he had found for him.

He commanded Little White to leave. However, an unexpected situation occurred. Little White stared intently at the green flame, a strong yearning surging into its heart. It used the spiritual pet contract to send its feelings to Wang Teng.

"You want that flame?" Wang Teng asked through the power of the contract.

After receiving the confirmation, he persuaded Little White for a long time before it managed to curb the immense temptation.

...

Boom!

Siler got impatient. He started attacking while chasing Wang Teng, attempting to lower his speed.

Explosions resounded in the forest, and the trees around them were all chopped into pieces.

Their chase had implicated many low-rank star beasts.

While Wang Teng was dodging, he hurriedly picked up the attribute bubbles dropped by those unlucky star beasts.

Wood Force\*15

Fire Force\*10

Blank Attribute\*3

...

At a certain moment, his fire Force achieved a breakthrough.

Fire Force: 9/7000 (8-star)

A glint flashed past his eyes. He didn't feel much excitement since he only lacked one point. Hence, it was predictable that it would rise in level.

However, he didn't mind teasing the lycan behind him.

"All the best. Continue attacking. Believe in yourself. You will be able to hit me soon," Wang Teng said seriously after evading his opponent's attack.

Siler: ...

The muscles on his face twitched, and he felt his blood boiling. This human dared to provoke him!

"I will kill you!" Siler bellowed.

"Come quickly. You can do it." Wang Teng hooked his finger at him.

Siler raged, his attacks turning even more ferocious. He felt that if he didn't kill this human, he wouldn't be able to live in peace, and his lifespan would be cut short by ten years.

Boom, boom, boom!

More and more unlucky star beasts died under his flames of anger. Siler didn't know that his actions were involuntarily helping Wang Teng in increasing his ability.

The remaining three Forces finally reached the 8-star soldier level consecutively.

Metal Force: 35/7000 (8-star)

Wood Force: 18/7000 (8-star)

Water Force: 40/7000 (8-star)

...

As his ability rose, Wang Teng's confidence in killing the lycan dark apparition also increased. Finally, he led his opponent to the territory of the metal armor flaming scorpion.

Siler immediately felt the frightening atmosphere in this hoodoos forest. However, Wang Teng didn't give him any time to react. He took out Mo Que and slashed it deep into the forest.

Boom!

As the blade glow landed among the hoodoos, a terrifying, shrill cry was heard.

Siler's expression changed. He forcefully stopped in his tracks.

Wang Teng took the chance while he was hesitating to dart into the forest. He left through the path he had pre-planned using Little White's vision and evaded the general-stage lycan's detection.

"Damn it!"

Siler's expression was extremely ugly. He had already seen the huge scorpion crawling quickly out from the hoodoos.

Once again, he lost sight of Wang Teng.

The metal armor scorpion noticed Siler too. It hissed at him. To his surprise, it started speaking human language. "Get out of my territory!"

Wang Teng, who was hiding in the dark, was dumbfounded. This was the first time he had seen a star beast that could speak human language.

Siler didn't find it weird. As a dark apparition, destruction and havoc were carved into his bones. How could he bow down to a star beast? Even if the star beast was at the lord level.

The metal armor giant scorpion noticed that the invader wasn't backing down, so it stopped talking. It hissed and charged towards Siler, smashing its giant pincers at his head.

"Kill!"

...

#### **Chapter 466: Watching The Intense Battle From A Distance**

The metal armor flaming scorpion was the overlord of this region. All the other star beasts bowed their heads to it. Hence, it was enraged by the sudden invasion of the lycan dark apparition.

It didn't attack him at the start because it was wary of its opponent's ability.

However, the lycan showed no signs of backing down. The metal armor flaming scorpion wasn't afraid of the other party, so it launched its attack directly.

Boom!

Siler roared as the metal armor flaming scorpion charged at it aggressively. He welcomed it boldly.

He raised his sharp claws and blocked the huge pincers of the metal armor flaming scorpion. The collision sounded like two metal objects clanging into each other.

In front of the tank-like giant figure of the scorpion, Siler seemed a little small. However, he was able to resist the powerful attack of the metal armor flaming scorpion head-on.

As a lord-level star beast, the metal armor flaming scorpion's intelligence was on par with humans. After it sensed the invasion of a powerful presence, it immediately turned vigilant.

Siler moved his body and darted through the huge pincers. He leaped up into the air and slashed his sharp claws at his enemy. Two black claw glows aimed right for the metal armor flaming scorpion's eyes.

The metal armor flaming scorpion moved its two front legs. Although its body was huge, it still managed to retreat quickly. It was quite agile.

The black claw glows landed in the air. Siler wanted to chase after it, but he felt a strong gale above his head.

The metal armor flaming scorpion had curled its body into a crescent. The poisonous sting at the tip of its tail stabbed towards Siler as it burned with a green flame.

Siler's expression changed. He saw the poisonous sting covered with green flame and felt fearful of it. He didn't dare to receive it, so he flew back to evade the attack.

...

Wang Teng hid in the dark and activated his Wave Invisibility skill to its maximum.

To prevent the metal armor flaming scorpion from detecting him, he had specially used many blank attributes to raise his Wave Invisibility skill to the perfected stage.

Wave Invisibility: 5000/5000 (perfected)

He spent 6550 blank attributes in total before the Wave Invisibility skill reached the perfected stage. If he hadn't picked up all the blank attributes from the huge number of star beasts killed, there might not have been enough blank attributes in his reserve.

He looked at his attributes panel and gave a forced smile.

Blank Attribute: 3200

He only had 3200 blank attributes left. He felt his heart aching just thinking about it. It hadn't been easy to collect all these blank attributes!

However, thinking back, all these powerful star beasts were killed by other people. That meant that these blank attributes were free!

Cough, this wasn't the main point. The main point was, his heart ached.

Of course, he could feel the benefits of having a perfected-stage Wave Invisibility skill. Currently, he seemed to have turned into a gust of wind, merging into the air around him.

He also planted some invisibility runes on himself. This way, no one would be able to detect him, not even general-stage martial warriors.

If not, the metal armor flaming scorpion would be heading for him and not the lycan.

He raised his head and looked at the sky. As a lord-level star beast, the metal armor flaming scorpion was able to float in the air. The midair battle between the scorpion and the lycan was astonishing. Many trees and hoodoos below them were destroyed, sending debris flying everywhere.

Wang Teng stuck out his tongue in amazement. As expected of a battle between general-stage presences. It was appalling!

The metal armor flaming scorpion had left its nest, so Little White got restless. It wanted to eat the green flame.

“Don’t go!” Wang Teng ordered it sternly. He also felt helpless.

This wasn’t the time to steal things. The metal armor flaming scorpion might have left some traps behind to prevent more intruders.

What if they got discovered while trying to steal the green flame? His plan would go down the drain, and they would have to suffer the scary attacks of the metal armor flaming scorpion.

The lycan was enough to tire him out. If the metal armor flaming scorpion joined in, he could just surrender and die.

This was the first time Wang Teng scolded Little White so fiercely. Because of the situation, it didn’t dare to make any sound. It could only send its hurt emotions to him.

“Be patient. Once both of them suffer serious injuries, I’ll find a chance to kill them. You can then swallow that green flame in peace,” Wang Teng coaxed Little White like a child.

Little White’s increased ability would be great assistance to him. Obviously, the green flame offered many benefits to Little White. If he had a choice, he wouldn’t let it go.

On the other end, the clone of the Black Incubus Devil Lord also reached the scene. She looked at the battle below and shook her head. “Idiot!”

“Nevermind, the true form only asked me to watch the show. She didn’t ask me to act.”

The clone of the Black Incubus Devil Lord perfectly inherited the laziness and cold-blooded nature of the real Black Incubus Devil Lord. If it didn’t need to act, it wouldn’t. It was indifferent towards the death of other dark apparitions too.

The metal armor flaming scorpion and the lycan were having a heated battle. Wang Teng felt excited watching it. He wanted to stand up and cheer for them.

Unfortunately, this wasn’t the right time.

He stared at the two parties exchanging blows and waited for the chance to attack. Both the metal armor flaming scorpion and the lycan were injured.

Many cracks could be seen on the metal armor flaming scorpion’s hard armor. One of its legs was broken and twisted at a weird angle, lowering its battle ability greatly.

Siler was in no better state. Most of his fur was already burnt by the rune array. After the fire attacks by the scorpion, more burnt marks had appeared on his body. These were just the external injuries; his organs suffered too. Fire poison had invaded his body. He wasn't in a good state.

At this moment, Wang Teng's plan was halfway to success.

Actually, it was just a rough plan. He wanted to make use of the arrogance of a general-stage warrior and the nature of the dark apparitions and the star beasts. Dark apparitions were vicious and brutal. Star beasts possessed intelligence, but they were still wild beasts. There was no doubt that a fight would break out once they met. Even more, Wang Teng was flaming the sparks at the side.

Suddenly, Wang Teng's gaze froze.

The metal armor flaming scorpion hissed with rage in midair. Huge flames started to engulf its entire tail. It swept towards the dark apparition like a burning long whip.

Siler's expression changed. He didn't expect the metal armor flaming scorpion to launch a killing move. He could feel a frightening high temperature from the burning tail. If he was hit, he would be seriously injured.

The most fearful part was the poisonous sting at the end of the tail. That was the fatal threat.

Even his dark Force wouldn't be able to resist the flaming poison of this lord-level star beast!

However, the metal armor flaming scorpion had been preparing this move for a long time. It launched its attack suddenly, so it wouldn't let Siler evade it so easily.

Siler realized this too. A mad look appeared in his eyes. He opened his mouth, and a black ball of dark Force quickly formed in it.

Roar!

Before the flaming tail whip arrived, the black ball of Force had finished forming. Siler tilted his head back and bellowed furiously. He spurted the ball out.

The black ball turned into a lingering shadow and slammed into the metal armor flaming scorpion's tail.

Boom!

A deafening explosion resounded in the air.

The power of this black ball of Force was overwhelming. It exploded when it touched the tail. The metal armor flaming scorpion gave a shrill cry of agony.

Chapter 467: Sir, Save Me!

Amidst the fierce explosion, the flames on the tail of the metal armor flaming scorpion jumped furiously and the hard armor was blown apart. Its flesh was torn to shreds, blood oozing out.

The metal armor flaming scorpion was enraged. It bore with the pain and continued sweeping towards the lycan with the same strength. It hit the lycan fiercely.

Bang!

Siler's entire body got thrown back from the hit. The next moment, a shrill scream came out of his mouth.

When he got hit by the metal armor flaming scorpion's tail, the green flames crawled onto his body and engulfed him. It started burning violently.

At this moment, Siler had become a burning man. He rolled on the ground, trying to put out the green flames with the dark Force seeping out of his body.

It would have been better if he didn't use his Force. The moment he activated his Force, the green flames grew bigger as if more fuel was added to it.

Wang Teng's gaze flickered. After a moment of confusion, he regained his senses. This was the special trait of the green flame. Indeed, it wasn't an ordinary flame.

He felt that he didn't need to kill the lycan personally. The scorpion would do it for him.

After seeing the power and special trait of the green flame, Wang Teng was even more determined to get the flame.

He needed to think of a way...

"Idiot!" At this moment, a cold voice was heard.

Wang Teng's expression changed. He saw a figure gradually appearing in the sky.

Black Incubus Devil Lord! Why was she here?

His expression turned ugly. The appearance of Black Incubus Devil Lord had ruined his plan entirely.

However, under his Spiritual Sight, Wang Teng noticed something amiss. No, this isn't right. Why is the light around her so weak? She isn't Black Incubus Devil Lord!

The Force glow around this person had only reached 10-star general stage. Yet, the Force glow around Black Incubus Devil Lord was extremely thick and was way ahead of this level.

Wang Teng would never guess that Black Incubus Devil Lord's intention was to let her clone follow them and spy on them. She thought that Siler would be able to take down Wang Teng easily since he was at the general stage. Hence, there was no need for her clone to act.

She didn't expect Wang Teng to lure Siler to the metal armor flaming scorpion and discover the green flame.

The clone of the Black Incubus Devil Lord was interested in the green flame.

"Lady, save me!" Siler screamed in pain when he heard the voice and saw the clone of Black Incubus Devil Lord.

Lady? Wang Teng got confused again. Looking at how this general-stage dark apparition called her, could she really be Black Incubus Devil Lord?

Or did the lycan burn his brain and recognize the wrong person?

“You can’t catch a soldier-level human martial warrior and even ended up in this state. What’s the point of saving you?” the clone replied nonchalantly.

“Lady, it’s my fault. I failed to complete the task and am willing to accept the punishment. Please save me!” Siler felt despair. He was swallowed in flames. He kneeled in mid-air and raised his hands at the clone, begging her to save him.

“Hmph!” The clone snorted. Still, she waved her hand and used some method to remove the green flames on Siler’s body.

However, the process took some time. It looked like even the clone had to spend some effort to deal with the green flame.

The metal armor flaming scorpion didn’t dare to move. It felt a sense of danger from this clone. Although this clone was at the same level as Siler, they couldn’t be compared.

Even more, it was already injured, so it wouldn’t have any advantages if it started a fight with the other party.

After removing the green flame, the clone compressed it into a ball and waved her hand. The ball flew into her palm.

She observed the floating green flame on her palm with interest. Then, she turned to look at the metal armor flaming scorpion and said calmly, “Hand over the flame, and I’ll spare your life!”

“In your dreams!” The metal armor flaming scorpion burst in anger. Although it was fearful of the clone’s ability, it wouldn’t hand over its most important thing because of a few threats.

The green flame was the source of its power. It allowed it to mutate from a normal metal armor flaming scorpion to the king of this area. It was the reason why it became stronger and stronger.

Taking the green flame away was equivalent to touching its life.

“Since you don’t agree, you can die.” The clone stretched her back lazily and tilted her head. She said to Siler, who was panting painfully at the side, “Why are you standing there? I didn’t save you so that you can watch the show at the side.”

Siler was in a miserable state. His body was black, and all his fur had been burnt by the flames. He was a bald wolf now.

Although he was in excruciating pain, he didn’t dare to disobey the clone’s order. He replied hurriedly, “Yes, I will kill that beast immediately.”

He glared hatefully at the metal armor flaming scorpion after he finished speaking. This beast had almost killed him. The only way to vent the anger in his heart was to kill it.

“Die!” The metal armor flaming scorpion was infuriated.

Not only did these two invaders want to snatch its treasure, but they also wanted to kill him. Other people might be able to bear with it but not the scorpion.

Amidst its angry hisses, the metal armor flaming scorpion burst into flames. This time, it wasn't just its tail. Its entire body was burning in green fire.

The tank-size giant figure appeared majestic and domineering in the fire.

Oh my, the metal armor flaming scorpion has been forced into a corner and is going all out! Wang Teng could feel that the green flames were putting heavy pressure on the metal armor flaming scorpion's body. Even if it didn't get seriously injured after this war, its ability would be greatly discounted.

However, Wang Teng was happy to see this. The more powerful the scorpion became, the greater the threat it possessed to the two dark apparitions. Hence, the more beneficial the situation was to him.

Siler's face turned green when he saw the burning scorpion. One flaming tail was enough to take half of his life away, much less an entire body.

How was he supposed to fight?

Could someone tell him how he was supposed to fight?

Siler screamed in his heart, feeling exasperated.

No matter where he hit, he would get affected by the flames.

What should he do?

The metal armor flaming scorpion didn't give him any time to think. It rushed towards Siler with its flaming body and snapped at him with its giant pincers.

Siler evaded the attack hurriedly. He didn't dare to touch the metal armor flaming scorpion, afraid that the flames would burn him again.

The metal armor flaming scorpion was filled with rage. It started hurling all its attacks at Siler, its giant pincers, its poisonous sting...

The clone couldn't bear to see the fight any longer. This fellow was utterly useless. She moved her body and appeared beside Siler. She slapped him away with one hand.

"Go away!"

The metal armor flaming scorpion saw its target being thrown away and immediately shifted its anger on the clone.. It threw all its attacks at her.

Chapter 468: Killing The General-Stage Dark Apparition

The clone's face was as cold as ice. Her lazy expression had long disappeared.

As she faced this giant metal armor flaming scorpion who dared to wave its pincers at her, she decided to give it an unforgettable memory.

Boom!

She raised her fair and smooth palm and slammed it forward.

The huge pincers covered with green flames were pushed away by a frightening force, and a huge patch of green flame was extinguished.

The clone's palm didn't get stained with any of the green flames, though.

Cracks appeared on the shell of the metal armor flaming scorpion's giant pincers due to the clone's attack.

This gentle push possessed such great power!

Wang Teng squinted when he saw this scene from his hiding spot. This 'Black Incubus Devil Lord' was also at 10-star general stage, but she was much more powerful than the lycan.

His gaze landed on the clone's palm, and his eyes lit up. There was a thin layer of light shining on her palm. It was like a shield protecting her hand.

The green flames did have some effect. With his sharp eyes, he noticed a few strands of green flames sticking on the faint layer of light. It was burning and damaging the layer.

However, the clone's control ability was strong. The moment the layer of light got damaged, a new layer was formed.

An invisible force spread above the layer of light and shook off the green flames on it.

This was the special method 'Black Incubus Devil Lord' used to block the green flames. She still feared it.

Wang Teng felt relieved. This was enough to prove that the 'Black Incubus Devil Lord' in front of him wasn't as terrifying as the one he met before.

Then, he shifted his gaze to the other side. The lycan flew back in a bedraggled state after he got thrown away by 'Black Incubus Devil Lord.' He seemed a little awkward.

Although he was exasperated, he didn't dare reveal his displeasure because of Black Incubus Devil Lord.

He couldn't offer any assistance to the fight between 'Black Incubus Devil Lord' and the metal armor flaming scorpion, so he awkwardly waited at the side.

Soon, he remembered the mastermind behind everything and started scanning the forest below to find Wang Teng.

If he didn't kill this sinister human, he wouldn't be Siler!

Wang Teng saw the ruthless gaze of the lycan and smiled. Did he torture the dark apparition a little too much?

The other party hated him very much!

That gaze looked as if he wanted to bite him!

In that case, why don't I secretly kill the lycan while 'Black Incubus Devil Lord' is fighting with the scorpion?

After all, if 'Black Incubus Devil Lord' killed the metal armor flaming scorpion, he would have to face two general-stage dark apparitions simultaneously.

The lycan had suffered serious injuries, so this was the best time to ambush him!

Wang Teng's gaze turned sharp. He looked at his attributes panel, focusing on the Assassination skill in his repertoire. In the past, he didn't use it because he didn't have the chance. However, this seemed to be the perfect scenario to use this technique.

But the Assassination skill level was a little low. It was at the foundation stage. Obviously, it wasn't enough to deal with the general-stage dark apparition.

Increase!

He threw all his 3200 blank attributes into this skill.

The Assassination skill rose from foundation to small achievement to big achievement. It finally settled on the perfected stage.

Assassination: 1613/5000 (perfected)

With the help of the blank attributes, memories of the Assassination skill floated into Wang Teng's mind.

In his memory, the outline of a light figure appeared. It started executing all the assassination techniques, starting from the easiest and gradually getting more complicated and profound. The figure showed the learning process from a novice to a master.

Finally, the memories merged into Wang Teng's mind and body and became part of his ability.

In an instant, he changed from an ordinary person into an assassination machine. It was as if he had experienced many years of brutal training.

His gaze changed. Once Wang Teng entered the state, his gaze turned indifferent and cold-blooded. He became extremely logical and calm.

This was the basic quality of an assassin!

Unfortunately, all his 3200 points of blank attributes were gone. If not, Wang Teng would have increased his Assassination skill to the peak of the perfected realm.

Now, he could only use what he had.

However, with the addition of his space talent and concealing skills, he could more than double the effect.

The next second, his body disappeared on the spot. No traces were left behind as if he had merged into the air.

This was a practical application of the Assassination skill. Along with the concealing skills, he was able to merge with the surroundings to wait for the opportunity to launch the lethal move.

The lycan dashed into the forest below and searched for Wang Teng crazily. He hated him to the core. The pain coming from every inch of his body constantly reminded him that his sufferings were all caused by that young human!

But no matter how he searched, he was unable to find Wang Teng's hiding spot. This made him mad, his eyes turning bloodshot.

Suddenly, his head turned numb and his heart started palpitating without any warning. His general-stage battle awareness caused him to move to the side without thinking.

Slash!

Blood blossomed in the air.

"Come out!" the lycan shouted angrily.

He had almost suffered a lethal blow just now. Although he had dodged it, he still received a deep cut on his arm.

He was forced into a tight corner by a soldier-level human martial warrior!

This was a humiliation for a general-stage warrior.

However, Wang Teng didn't continue after the first sneak attack. The space around him became distorted, and he disappeared without a trace.

The lycan swung his wolf claws and destroyed all the trees around him so that Wang Teng wouldn't have any place to hide.

Wang Teng launched his attack again. He shot out from the side and slashed his sharp sword at the lycan, adding another wound to the collection.

Roar!

"Human, come out and have a duel with me!

"Don't hide like a mouse. Come out! Come out!"

The lycan almost went crazy. He sensed that Wang Teng was around him, but he couldn't find him no matter what. He felt extremely frustrated and irritated.

"As you wish!" Wang Teng's cold voice echoed beside his ears. Before the lycan could feel happy, another cut appeared on his thigh.

Wang Teng was using Mo Que. It was so sharp that even the indomitable body of a general-stage dark apparition couldn't block it.

The cut was extremely deep, going all the way into his flesh. Even his bones could be seen.

The lycan staggered and almost fell. His leg trembled as large amounts of blood started flowing down his leg.

"Howl! I will kill you! I will kill you!" He bellowed while attacking everything in his path frantically.

“Come, kill me!

“I’m here!

“I’m here!”

...

Wang Teng’s mocking tone resounded all around him.. It drilled into the lycan’s ear from all directions like cursed chants.

#### **Chapter 469: As Expected Of A General-Stage Warrior!**

Wang Teng used his Assassination skill and disturbed the lycan’s mind with the methods recorded to make him mad.

By right, the mentality of a general-stage warrior shouldn’t be so weak. However, the lycan had suffered multiple stimulations and attacks, so he wasn’t able to keep his cool anymore.

To him, Wang Teng’s voice was like an evil curse. His mind was about to explode from the pain, and he started attacking aimlessly.

Slash!

Slash!

Slash!

Wang Teng wounded the lycan continuously, leaving many hideous cuts on his body. After some time, the lycan was already covered with blood. He looked miserable.

All these happened within a short time.

Assassination required speed, accuracy, and brutality. If too much time was wasted, the lycan would notice something amiss and recover his senses.

However, the outcome was inevitable now.

*Almost there!* Wang Teng thought to himself as he looked at the wounds on the lycan’s body.

Immediately after, the crazy lycan suddenly froze. Then, he opened his mouth and vomited black blood.

He was flabbergasted. This sudden change caused him to calm down instantly. He bellowed, “What did you do?”

Wang Teng didn’t reply to him. He waited quietly for the poison Force of the Demon Lotus Poison Body to explode entirely in his body.

“You’re a poison-element martial warrior!” Siler was in disbelief after he felt the change in his body.

He quickly sensed an extremely troublesome and strong poison in him. Without him knowing, it had already spread to his entire body. Even his dark Force got corroded by it.

What a frightening poison Force!

Siler wanted to get rid of the poison Force, but it was glued to his body and Force. Even the most infectious dark Force had become helpless in front of this poison Force.

“Damn it, come out. I want to kill—pfft!” Siler tried his best to resist the poison Force in his body as he roared in anger.

However, before he could finish speaking, he vomited another mouthful of black blood.

Wang Teng squinted. He traveled through space and appeared behind the lycan. Then, he threw his Mo Que out...

“Roar!”

Siler felt the threat of death. He forcefully twisted his body and opened his mouth, a black Force ball congregating at high speed in it.

“I’ve been waiting for this move!” Wang Teng scoffed. A sinister red light appeared in his eyes. It stabbed right into the lycan’s eyes.

Bewitch!

He used the bewitching skill he had picked up from a vampire dark apparition on this lycan dark apparition.

The lycan was caught off guard and fell into Wang Teng’s trap.

“Die!” Wang Teng waved Mo Que down during his moment of absent-mindedness.

Splurt!

Fresh blood sprayed out of the neat cut. The lycan’s head flew into the air.

“Impossible...”

The excruciating pain forced the lycan to regain his consciousness. At that instant when his head was chopped, his consciousness was still alive.

He recognized the hypnotic battle technique. It was exactly like the Bewitch talent ability of the vampire race.

As a dark apparition, he died of a dark apparition’s skill.

And the person who killed him was a soldier-level human!

The lycan widened his eyes in regret as his consciousness seeped into the darkness.

A wolf head dropped from the sky and smashed on the ground. It rolled a few times before stopping a few steps away.

His body crashed onto the ground loudly.

Wang Teng panted. He felt emotional as he looked at the wolf’s head.

Damn it, it was so hard to kill a general-stage warrior!

He almost went to hell with him.

Fortunately, everything ended well.

It might seem as if he didn't use much effort, but he had to combine his schemes and the assassination methods to kill his opponent.

The process was arduous and strenuous. A single error could end his life. After all, that was a general-stage dark apparition.

Fortunately, he kept his life and killed the general-stage dark apparition.

He had no time to feel proud, though. There was another stronger dark apparition waiting for him to kill. That was the real trouble!

Wang Teng kept the corpse of the lycan in his space ring and looked at the attribute bubbles floating on the ground.

Dark Force\*1200

Advanced Stage Dark Talent\*300

Spiritual Realm Spirit\*220

Spiritual Realm Enlightenment\*280

Dark Wind Bullet\*420

...

Wang Teng was almost blinded by the hundreds and thousands of attributes.

This was the first time he had gained so many attributes from an individual. In the past, he wouldn't even dare to think about it.

He was a living attribute machine. Of course, this machine was a little too powerful.

Wang Teng stared at the attribute bubbles in front of him hesitantly.

His dark Force was already at the peak of 9-star soldier level. He was 440 points away from reaching the general stage!

But, there were 1200 points of dark Force right in front of him!

It was within reachable distance.

Many martial warriors worked and fought hard to reach this stage. The majority of them collapsed halfway through the journey, including the gifted ones.

In the end, only a small percentage of talents would climb to the top and step through the gates to turn into formidable warriors!

Now, the opportunity was right in front of Wang Teng, but he was hesitating!

He would be beaten to death if he told others about it.

Wang Teng was in a dilemma because this was the dark Force. If it was another Force, he would have jumped in joy.

Not long ago, he had discovered something strange about his dark Force. Before he figured out what happened, he was still wary of it. If he was assimilated, he wouldn't be able to save himself even if he cried his heart out.

His only consolation was that the dark Force in his body didn't give him any adverse effects.

*I don't care. The opportunity is right here. To hell with the abnormality!* After a short moment of hesitation, Wang Teng made his decision.

Seeking wealth in risk!

The system had already lowered the risk to its minimum. If he still worried so much, he might as well go back and enjoy his inheritance.

He had a strong opponent waiting to attack him. The stronger he was, the higher his chance of surviving!

*Isn't it just a 10-star general? After this breakthrough, I'll kill that female dark apparition!*

Wang Teng picked up the spirit attributes first. He had used up much of his spirit when he was running away, so he needed to replenish it.

Then, he picked up the enlightenment and advanced-stage dark talent.

These two attributes would enhance his control of dark Force. He felt anxious about his dark Force, so he hoped that he could increase his control of it through raising his enlightenment and the related talent.

As the attribute bubbles merged into his body, Wang Teng's enlightenment increased. His mind got clearer.

The 300 points of advanced-stage dark talent allowed his dark talent to rise exponentially.

Advanced Stage Dark Talent: 330/1000

Wang Teng instantly felt that his sensitivity and grasp of the dark talent had become sharper and easier.

#### **Chapter 470: Boss, Don't Worry. Let Me Help You!**

Moving along, the next special battle technique was Dark Wind Bullet!

Wang Teng had received the same battle technique from a human who had turned into a dark apparition. However, at that time, he only received a few attribute points. He didn't want to waste blank attributes on it, so he had shelved it away.

Now, he had received 420 points of Dark Wind Bullet attributes from the lycan, allowing his skill to rise to the small achievement stage. This proved that the lycan's grasp of this technique was higher than the other dark apparition.

Dark Wind Bullet: 321/500 (small achievement)

Wang Teng disregarded the attribute after a single glance. The Dark Wind Bullet was not bad, but the most important thing was the rise in his dark Force level.

The last few attribute bubbles were pitch-black, dense like an endless black hole.

He picked them up.

The dark Force attribute bubbles immediately merged into Wang Teng's body.

Boom!

Wang Teng shuddered. As the dark Force seeped into his body, the dark Force inside his 9th Force nucleus reached its limit. This time, he focused his attention on his body and carefully observed the changes in the dark Force.

He realized that the dark Force did merge with his Force nucleus. Next, similar black patterns started forming on the surface of the Force nucleus. This represented the perfected state of the dark Force in the 9th Force nucleus.

There were nine Force nuclei in a human. They were distributed on the spine, starting from the tailbone and ending at the back of the head.

When the nine Force nuclei reached a perfected state, Force would overflow and run through the entire spine. At that moment, the ability of the martial warrior would undergo a tremendous change as they advanced to the general stage!

Wang Teng knew that the dark Force would run through his spine very soon, so he felt a little nervous. He prepared his cultivation technique so that he could use it to push dark Force through his spine when it overflowed his Force nucleus. That way, he would be able to advance to the general stage.

He waited for some time. After his 9th Force nucleus reached the perfected state, it quietened down. There was no movement from it.

Wang Teng: ...

He was stunned.

*What is this?*

*What just happened?*

*What am I doing?*

His mind was full of curses. Why didn't he advance to the general stage? Why didn't anything happen in the end?

*Damn it. System, are you playing with me!*

Wang Teng felt that the world was playing a prank on him.

"Damn it!" He pointed his middle finger at the sky before taking a deep breath. Then, he stopped dawdling over this issue and turned to rush towards the area where the 'Black Incubus Devil Lord' and the metal armor flaming scorpion were fighting.

From afar, he could tell that the metal armor flaming scorpion was dying. As expected, the female dark apparition wasn't an easy opponent.

The metal armor flaming scorpion was in a terrible state after withstanding the fierce attacks by the clone. When Wang Teng came near, he noticed that the green flames on the scorpion had turned dim. It was going to be extinguished soon.

There were many cracks on its shell too. Wounds could be seen everywhere, and green blood covered its entire body.

However, the clone also had some scratches on her body. There were a few unobvious burnt marks caused by the green flames, and her hands were trembling slightly. She had paid a huge price to destroy the hard shell of the metal armor flaming scorpion.

The clone of the Black Incubus Devil Lord was floating ten meters away as she stared at the metal armor flaming scorpion sternly.

The Black Incubus Devil Lord only gave it the ability of a 10-star general-stage martial warrior, so she had trouble killing this star beast. She frowned while complaining in her heart.

She had almost exhausted all the dark Force in her body. She was a clone made of dark Force, so her ability to absorb dark Force to replenish her stock wasn't very effective.

Once she used up all the dark Force she had, she would disappear automatically.

"Why isn't that idiot back? All he needed to do was to catch the human. What's he doing?" The clone was furious. She looked in the direction of their fight a moment ago.

Unfortunately, her ability was limited currently, so she couldn't sense the situation there. She would never expect the general-stage Siler to get killed by a soldier-level Wang Teng.

The unknown situation made her feel that she was losing control.

"If the true form was here, it wouldn't have been so troublesome." The clone sighed. Then, she looked at the metal armor flaming scorpion and scoffed. "Bow down or die!"

The metal armor flaming scorpion hesitated. Its stance wasn't as tough as before because it felt the threat of death.

Wang Teng saw this scene when he came closer and cursed in his heart.

*What the hell, boss? Where is your dignity? Where is your ego? What happened to your domineering attitude at the start?*

*Don't be afraid. Continue fighting her!*

A smile appeared on the edge of the clone's lips when she saw the metal armor flaming scorpion's hesitation. It was a lord-level star beast, but once fear had crept up to its heart, it wasn't far from surrendering.

"I'll only give you ten seconds. Pass me the green flame, and I can spare your life!"

Wang Teng cursed the 'Black Incubus Devil Lord' for being unscrupulous. She wanted to win the war without a fight!

He felt that he needed to do something. He mustn't allow the metal armor flaming scorpion to hand over the green flame so easily. After all, he wanted that treasure too.

He activated his Spiritual Sight to check the two parties' situations.

*Huh?! He exclaimed in his heart, a sinister smile appearing on his face. I almost got fooled by her. There must be something wrong with this 'Black Incubus Devil Lord.' The Force glow in her body is much dimmer. She's a paper tiger now.*

"Ten, nine, eight..." The clone started counting down.

Wang Teng stopped hesitating. He jumped straight out and shouted, "Boss metal armor flaming scorpion, don't worry. I'm here to help you!"

The clone: ...

The metal armor flaming scorpion: ???

They both turned and looked at Wang Teng who had suddenly dashed out, feeling stunned.

The metal armor flaming scorpion was utterly confused. *Who is this? Do I know him? Why did he suddenly run out to help me?*

"Boss scorpion, the dark apparitions have invaded our world. This is unforgivable. We belong to the same side, so we should work together to kill her!" Wang Teng shouted in a righteous tone. Then, he charged towards the clone. "To show my sincerity, I'll go first."

He knew that there was limited Force left in the 'Black Incubus Devil Lord's' body so he wasn't afraid.

Of course, he remained cautious of the Black Incubus Devil Lord. Once the situation went astray, he would use his space talent to escape.

Boom!

He punched his fist out, hurling a frightening fist Force at the clone.

"Brat, I'll remember you!" The clone's expression turned ugly. The next moment, she disintegrated under Wang Teng's fist Force and turned into a ball of dark Force, dissipating in the air.

Wang Teng: ...

The metal armor flaming scorpion: ...
