

## Martial Arts 561

### Chapter 561 The Leader Of Martial Arts

Old Han appeared in front of everyone. He had recovered from his injuries.

Not only did Chen Ruifan couldn't believe it, even the two master alchemists, Ji Xinhui and Xu Heyu, felt like they were dreaming.

Wang Teng actually healed him when the three of them weren't able to. This fellow was indeed exceptional!

At this moment, they started to believe that he was a master alchemist. With his skills, he should be regarded as a master level.

Cui Heng believed it too. He was embarrassed that he had tried to dissuade Wang Teng previously. All this while, he was just embarrassing himself. Wang Teng was already a master alchemist, and he might even be better than him. There was nothing for him to worry about.

But it was a great thing that Wang Teng was still a student of the Huanghai Military Academy. With him, they had two master alchemists in their ranks.

"Wang Teng, thank you very much!" Old Han put away his smile and said solemnly to Wang Teng.

He really thought that his time was up, but Wang Teng had managed to yank him out of the gates of hell. He was indebted to him for saving his life.

"If you want to thank me, do it after I completely heal that injury of yours. It's just under control for now," Wang Teng said.

"Two more years for me is good enough." Old Han didn't mind it and smiled

Wang Teng just laughed. Old Han probably had an idea that only a grandmaster could save him and felt that it would be nothing short of a fantasy for Wang Teng to reach that level in two years.

He knew very well that even in the Xingwu Continent, there were not many grandmaster alchemists, and they were all at least a century old. It was not easy for Wang Teng to even reach the master level at such a young age.

He had an inkling that Wang Teng would climb the next level but definitely not in two years.

Chen Ruifan was too ashamed to stay any longer. He turned around to leave with his disciple. He had heard that Wang Teng wasn't unable to heal Old Han completely, but he at least managed to extend the old man's life by two years.

Mind you, before this, none of the alchemists were able to do anything. In his situation, five days was the most Old Han could live.

If he spoke now, he would be asking for humiliation. His face was already on the floor. There was no need to step on it anymore. Ji Xinhui and Xu Heyu didn't care when they saw Chen Ruifan leaving. They even felt a little happy seeing him embarrassed.

They walked over and started chatting with Wang Teng. The guy had reached the master level at an incredibly young age. They would be idiots if they didn't befriend him.

Wang Teng knew some methods they didn't know, so they could interact and improve together.

The two of them came forward and called him Master Wang. They viewed him as someone at their level and were extremely enthusiastic.

"Oh right, Master Wang, were you using a divine fire just now?" Ji Xinchui hesitated before asking. He couldn't control his curiosity anymore.

Wang Teng was slightly astonished. Then, he nodded and said, "That's right, it's called the Emerald Glazed Flame."

He raised his hand, and a green flame appeared on his palm. It blossomed like a beautiful green flower, its intense heat spreading in an instant. With his current ability, he wasn't worried that others would snatch his things.

Dan Taixuan and Old Han were conversing at the side. They felt the scorching heat from the Emerald Glazed Flame and walked over involuntarily. "During the sea beasts' riot, I sensed that you used a certain divine fire. So this was it," Old Han said in a thoughtful tone. He sized up the green flame on Wang Teng's palm curiously.

"I was just lucky enough to have it," Wang Teng said. "We want your luck too!" Ji Xinchui and Xu Heyu lamented in envy.

"It's rare enough to find a divine fire, much less capture it." Ji Xinchui shook his head.

Xu Heyu nodded in agreement. Although they were envious, they were all master-level characters, so they were broadminded and didn't lose their head.

They talked a little longer. The two masters then invited Wang Teng to share his alchemy experience again when he was free before taking their leave.

The next day, Wang Teng informed his family members before stepping on the military plane heading to Capital Xia along with Dan Taixuan.

The sky was getting more and more dangerous, especially after the sea beasts' riot. The entire nation had raised its vigilance.

The military aircraft they were in was equipped with extremely powerful rune weapons. If they met any flying star beasts, they would be able to strike it down. Of course, not everyone had the right to sit in military aircraft.

The military plane traveled at high speed and traversed half the nation's land in half an hour. At the moment, it was crossing a mountain.

Screech!

The cry of a bird was abruptly heard in the sky. The sound penetrated through clouds and rocks, surging towards them like a huge wave.

The military plane vibrated and suddenly changed direction. The two people on board felt the commotion. Dan Taixuan asked calmly, "What happened?"

"Report, it's an Ice Feather Vulture," the soldier in front said.

"Strike it down!" Dan Taixuan ordered with a stern expression.

"Yes!"

In the sky, a vulture covered with snow-white feathers spread out its wings. It was one-third the length of the military plane, looking extremely majestic. Its beak was as sharp as a hook, and a cold glint escaped from its eyes.

Wang Teng's spiritual power shot out from his forehead. It twirled in the air as he sensed the situation outside.

"6-star!"

He sensed the level of this Ice Feather Vulture, but there was no change in his expression.

It was just a 6-star beast. They could kill it easily.

However, the element of this Ice Feather Vulture caught his attention.

Ice element!

His ice element was only at the 7-star soldier level. If there was a large number of ice element star beasts for him to collect attributes from, it would be easy for him to rise to the general stage.

He wondered if there were many Ice Feather Vultures?

Wang Teng touched his chin and pondered on the thought.

The Ice Feather Vulture outside suddenly shuddered for no reason as it felt an evil intention enveloping it.

A hint of curiosity flashed in its eyes. What happened?

The strange feeling came and left quickly. It disappeared in the blink of an eye. The Ice Feather Vulture's gaze turned cold again as it stared at the military plane in front.

The military aircraft hovered in the air. The runes glowed brightly on the surface and congregated into a ray of golden light before discharging in a straight line.

Boom!

The Ice Feather Vulture was given a shock. It tilted its body and threw a look of contempt their way.

This is it?

Boom, boom, boom!

The next instant, multiple golden rays shot out one after another, piercing through its wings and body.

The Ice Feather Vulture cried in pain, plunging to the ground. It couldn't stand a fight in front of the military aircraft.

The vulture gifted Wang Teng a few attribute bubbles. He swept them over with his spiritual power.

Ice Force\*50

Ice Force\*65

Ice Force\*48

Indeed! Wang Teng had a sudden thought. He opened his mouth and asked, "Can you open the cabin door?"

The soldier in front looked at Dan Taixuan, who nodded in approval.

The cabin door at the back of the military aircraft opened slowly. Strong gusts of wind gushed into the aircraft. Fortunately, there were no other items inside, or they would have been blown away by the strong wind.

The Ice Feather Vulture that hadn't died flew over from afar under the control of an invisible force and entered the cabin.

The cabin door then closed.

Wang Teng walked over and looked at the Ice Feather Vulture in deep thought. It was bound by his spiritual power, and its eyes were no longer cold. Only fear was left in them.

"Why did you catch this Ice Feather Vulture?" Dan Taixuan asked.

"My ice Force is a little low in level, so the ice Force nucleus of this vulture should be able to help me," Wang Teng said casually.

"What's the level of your ice Force now?" Dan Taixuan was curious.

Wang Teng's five basic elements were too outstanding, so she had neglected the ice element that he had displayed at the start.

"7-star soldier level," Wang Teng replied.

Dan Taixuan: ...

Was this what a normal person would say?

Others had to spend much time and effort to reach the 7-star soldier level, but Wang Teng said that it was too low.

"What?" Wang Teng asked involuntarily when he noticed her strange expression.

"Nothing." Dan Taixuan coughed awkwardly. She continued, "If you want an ice Force nucleus, you can go to Beijiang. There are many ice element star beasts in the snow mountains. This Ice Feather Vulture probably came from there. I wonder what it's doing

here?"

“Beijiang!” Wang Teng started pondering. He suddenly thought of something and asked, “I heard that there’s a dimensional rift there. How’s the current situation?”

“It... isn’t good!” Dan Taixuan shook her head with a serious expression.

Wang Teng noticed that she didn’t explain further, so he didn’t ask. His gaze turned sharp as he invaded the Ice Feather Vulture with his spiritual power. A Force nucleus broke out from its body while the Ice Feather Vulture died instantly.

Wang Teng held onto the 6-star ice Force nucleus and scanned it with his eyes.

Ice Force\*120

Advanced Stage Ice Talent\*45

Ice Force\*105

Wang Teng already had advanced-stage ice talent, so this was the icing on the cake. His advanced-stage ice talent increased slightly, as did his ice Force.

Ice Force: 708/5000 (7-star)

Wang Teng looked at the changes in his ice Force and nodded slightly. It wasn’t much, but there was an increase.

Beijiang!

He gazed in the northwest direction. It looked like he had to visit there soon.

No other accidents happened for the rest of their journey. The two of them quickly reached a military airport in the suburban district of Capital Xia.

“Lieutenant General Dan, Major General Wang, nice to meet you!”

The person who welcomed them was a middle-aged man dressed in a military uniform with two crimson stars on his shoulder.

“Lieutenant General Tang!” Dan Taixuan nodded at the other party. Then, she introduced him to Wang Teng, “This is Lieutenant General Tang Qilue from the Capital Xia military.”

“Lieutenant General Tang, nice to meet you!” Wang Teng greeted.

“You’re indeed young and outstanding,” Tang Qilue sized up Wang Teng and exclaimed.

“You’re too polite,” Wang Teng replied humbly.

“Let’s go, the three commanders are waiting for you.” Tang Qilue didn’t say much and led the two of them onto a military pick-up truck. They drove towards the military district.

There was a soldier driving the car. Tang Qilue knew that it was Wang Teng’s first time here, so he took special care of him and briefly introduced the situation of the Capital Xia military.

Wang Teng glanced around him as he listened to the introduction. Capital Xia army took up a large area of land, and all kinds of buildings and gunfires could be seen here, with many soldiers patrolling around. This place was heavily guarded.

2 was

Wang Teng had been to a few military districts, but this was his first time seeing a district of this size. As expected of the greatest military in the nation.

The military truck passed through layers and layers of guards. Finally, they came to the center of the district and stopped in front of a large building.

“You can go in. I’ll send you until here.” Tang Qilue smiled slightly and turned to leave.

The two of them sent Lieutenant General Tang off with their gazes.

“Let’s go.” Dan Taixuan was familiar with this place. She brought Wang Teng into the large building

Inside, there were soldiers on duty leading the way. They took the lift and went to the top floor of this huge building.

Wang Teng felt emotional. It wasn’t easy to come to this place. Without Tang Qilue leading them at the start, it would be a few times more troublesome for them to get in.

The military knew their background, so it was easier for them. If it were others, they wouldn’t have been permitted access without undergoing layers of inspection.

“The three commanders are inside. This way please,” a soldier’s voice pulled Wang Teng back to reality.

A huge door had appeared in front of him. The soldier left without stopping.

Dan Taixuan wanted to knock, but an old voice came out from the room. “Come in.”

Dan Taixuan wasn’t surprised. Based on the cultivation levels of the three people inside, they would have noticed them when they arrived at the bottom of the building. She pushed the door and entered.

Wang Teng looked inside. The figure of three elders appeared.

The three great commanders!

no

These three commanders had different auras, but all of them had a formidable force of presence lurking around their bodies. Wang Teng activated his Spiritual Sight and almost got blinded.

The light given off by the three elders was exceptionally glaring. Although it wasn’t as intense as the Windstorm Giant Ape, they must have reached the upper levels of the general stage.

While Wang Teng was sizing up the three elders, they were looking at him too.

They were no strangers to Wang Teng, but this was their first time seeing him in real life. Despite looking him up and down, they couldn’t see through him. They were astounded.

“Come in.” They exchanged glances with one another before a skinny and small elder opened his mouth.

Dan Taixuan and Wang Teng walked into the main hall.

“Wang Teng!”

A voice suddenly came from the side. Wang Teng was shocked as he glanced sideways.

A tall and lofty man with graying hair was standing in front of the floor-to-ceiling window not far away from the three commanders. He was facing them with his back with his hands behind him.

How is this possible? Wang Teng was shocked. He didn't notice the presence of another person in this room.

“Leader of martial arts!” Dan Taixuan lost her composure when she saw this person.

At first, she thought they were here to see the three great commanders first before going to the imperial palace to visit the Leader. Who knew that he would appear here?

He came to see Wang Teng personally?

Dan Taixuan was in disbelief. She bowed slightly to greet the Leader.

This person was the most powerful martial warrior in the entire nation. Even in the world, his ability was top-tier. Without him, their country wouldn't be able to remain so peaceful and harmonious.

He was the pillar supporting the entire nation!

Wang Teng immediately understood who this person was when he saw this scene. Astonishment flashed past his eyes.

“Do you know why I came to look for you?” The Leader turned and smiled as he gazed at Wang Teng

### **Chapter 562 Alien!**

“I don't know!” Wang Teng replied directly. He wasn't afraid of the guy.

After the initial astonishment, he had already regained his composure. The Leader of martial arts was worth respecting, but there was no need to be fearful of him.

In the past, Wang Teng might not have been so open-minded. But now, he was at the general stage and was confident that he would be on par with the three great commanders or the Leader soon. Hence, his fear towards them wasn't that great.

This was the temperament of a formidable warrior.

The Leader didn't mind his tone. Instead, he gave a smile of approval and said, “Let's go, I'll bring you somewhere.”

He walked out of the door. The three great commanders glanced at one another and followed him out of the room.

Can you finish what you have to say at once? Stop beating around the bush. Wang Teng rolled his eyes and complained in his heart.

They took the elevator down. This was a different elevator from the one Wang Teng took just now.

Very soon, the elevator stopped. The door opened, and a bright underground space appeared in front.

There was a long corridor. The Leader strode ahead. Many figures wearing long white gowns were shuttling back and forth hurriedly. Seeing the Leader and the three great commanders, they would bow and greet them. They only straightened their backs after they walked far away.

Wang Teng looked at the white gowns and frowned.

F\*\*k, are they going to cut him up for research?

Should he run or not?

The problem was, he couldn't beat the Leader yet!

Wang Teng was in a dilemma. He followed the Leader until they reached a huge room that looked like a laboratory in a science fiction movie.

The door of the room was extremely thick and sturdy. Through the window, he noticed that the staff inside were all covered up. Their white working uniform was like a spacesuit.

The view from the window was limited. Besides the staff, he could only see some high-technology devices. He couldn't see anything else.

"Use your Force to cover yourself as protection," the Leader opened his mouth and said.

Then, he opened the door.

There was a sterilization scanning area behind the door. Everyone was scanned thoroughly to sterilize their bodies before they could pass through another door to enter the room.

Wang Teng was shocked. Where was this? Why did they have to be so strict when entering?

He hesitated for a moment and decided to follow the Leader. Covering himself with Force, he entered the room behind the man.

He couldn't run away. Since he had no chance of resisting, why not see what they wanted to do?

These people were all general-stage formidable warriors. Hence, there was no need to cover themselves up tightly with the protective suit.

The instant Wang Teng entered, he scanned the surroundings. Soon, his gaze was fixed on a huge enclosed cabin. Bewilderment appeared in his eyes.

There was a human-shaped creature covered with scales locked up in the enclosed cabin. It was approximately three meters tall, and even its face had scales on it. There was a horn in its head giving off a gold glint. It looked a little hideous because of it.

"What is that?" Wang Teng was dumbfounded.

He also noticed that the limbs of this creature were chained up by rune chains. A huge thick metal chain tied up its body, while a few more chains penetrated its body to lock it up entirely.

At the same time, many tubes were stabbed into the creature. They seemed to be sucking something from its body.

"It's still alive?!" Wang Teng shuddered at this scene.

As expected, this was a laboratory researching living creatures. How frightening!

But they were kind enough not to cut it up!

Suddenly, Wang Teng's eyes lit up. As the tube sucked up something from the creature's body, two attribute bubbles suddenly dropped out.

Huh? Wang Teng glanced at the Leader and the others silently. If he used his spiritual power to sweep the attribute bubbles over, he would definitely get noticed.

But he couldn't touch it without using his spiritual power either.

What should he do?

Should he pick them up?

Wang Teng hesitated. If he was at another place with other people around him, he would do it. Yet, this was an important research facility, and the Leader of martial arts and the three great commanders were beside him.

If he used his spiritual power recklessly, he would cause huge trouble.

Wang Teng contemplated and decided to give up. He would pick them up when he had the chance.

Thereafter, he activated his Spiritual Sight and looked at the creature.

Huh? Wang Teng was given another shock. He saw a special Force color from within the creature. It was different from any other Force he had ever seen.

What Force is this? Wang Teng's heart was itching. His curiosity towards this scaled creature had increased to an all-time high. He looked at the two attribute bubbles and wished that he could pick them up instantly.

This creature was neither a star beast nor a dark apparition. If not, it wouldn't have this Force.

He looked at the Leader of martial arts uncontrollably. They probably brought him here to see this creature.

As expected, the Leader exchanged a few words with the person in charge of this laboratory. Then, he turned and said to Wang Teng, "Do you know what this is?"

"I don't know," Wang Teng shook his head and replied.

"It's... an alien!" the Leader paused for a moment before saying slowly.

"Alien?!" Wang Teng was dumbstruck. He didn't expect this creature to come from outer space.

"The world is bigger than we think," the Leader exclaimed.

Wang Teng remained silent.

Xingwu Continent, Darkland, the outer space.

He felt that the more he knew, the more he couldn't understand this world. He had found the Ancient God's corpse in the dimensional rift and always felt that it belonged to another world.

However, today, someone told him that there were powerful presences in their world too.

"How did this creature..." Wang Teng paused. He didn't know if he should ask.

"You want to know how we caught it and brought it to the laboratory?" The Leader smiled.

"Yes." Wang Teng nodded.

"About 18 years ago, a spaceship from outer space fell onto a certain island in the ocean. At that time, something went wrong with the spaceship, so it caused a huge commotion when it crashed onto land. All the countries sent people out to search for it. They found it and caught the badly injured creatures in the spaceship. After a round of debate, some big countries gained ownership of these creatures. Our country is one of them," the Leader explained briefly.

Wang Teng was surprised. He looked at the Leader's expression and asked, "So we brought it back for research?"

"Cough, we didn't plan to research at first, but these creatures don't want to cooperate. They were powerful too, so if they weren't heavily injured at that time, they might have caused disasters on Earth," the Leader coughed awkwardly as he replied.

Wang Teng glanced at him silently. Was that the truth?

### **Chapter 563 Constellation Force**

The Leader remained calm without a change in his expression.

Wang Teng shrugged. No matter what the answer was, they had already started the research. What could he do?

Were they going to release the creature and say, "This is all a misunderstanding. Let's be good friends in the future."

Bullshit!

Wang Teng looked at the creature in front. He remembered something and asked, "Did you say it's very powerful?"

"Yes, more powerful than any human martial warriors." The Leader was exceptionally serious.

Wang Teng was shocked. An idea flashed into his mind, and he blurted out his thoughts, "So the countries on Earth want to decipher a path to become stronger from it?"

The Leader looked at him in admiration. "You're indeed smart.

“That’s right. We want to find the secret to becoming stronger from it. We have only reached the general stage. If we don’t achieve a breakthrough, we will be at a disadvantage against star beasts, dark apparitions, and unknown aliens.”

“What have the other countries found out?” Wang Teng asked again.

“I don’t know.” The Leader shook his head. “This is why I brought you here.”

“I don’t think you brought me here just to see this alien, right?” Wang Teng asked with bright eyes.

“There will be a global exchange event soon. It will be held on Mount Saint, and only youths aged 25 and below will participate in this event. I want you to represent our country for the event,” the Leader said directly

“A global exchange event?” Wang Teng was puzzled. He had never heard of this event.

“It has been held many times, but normal people don’t know about it.”

“Do you want me to find out what the other countries have discovered?” Wang Teng asked.

“That is one reason. I also hope that you can suppress the younger generations of the other nations to show the strength of our country.” The Leader said, “Our performance has always been average. But with the current changes in the world and the restless star beasts and dark apparitions, we need to display more power to have more initiative.”

Wang Teng understood. He was there to be a coolie. They called him over from Donghai and went an entire round to tell him this.

He had reached the brigadier general stage and was close to becoming a low-tier general. He had probably surpassed all the younger generation talents in the world.

“What benefits will I get if I agree?” Wang Teng smiled and asked. He didn’t agree immediately.

“Indeed, you won’t commit yourself until you get what you want.” The Leader smiled and asked, “What do you want?”

Wang Teng hesitated before saying, “I took many treasures from the Darkland and want to turn them into cash. Can you help me settle this?”

“You took treasures from the Darkland!” The Leader’s expression turned weird. He was a little surprised. “How much?”

“A few trillions,” Wang Teng said shyly.

“Pfft!” The three commanders who had been silent all this while widened their eyes in surprise and looked at Wang Teng as if he were a monster.

The Leader choked too. He kept quiet for some time before he said, “I’ll ask someone to take care of them. Just pass them to me later.”

Wang Teng nodded. “Can I observe this alien?”

“Wang Teng, we have gathered the top talents in the nation, but no one managed to find anything. Don’t waste your time,” the scrawny commander couldn’t help but open his mouth.

“I’ll just take a look,” Wang Teng sniggered.

“Sure. I’ll ask someone to open the cabin,” the Leader said. “No need, I’ll use my spiritual power,” Wang Teng said.

The Leader nodded his head. It was recorded in his data that he was a divine spirit master. Hence, he wasn’t surprised.

Wang Teng noticed that the two attribute bubbles were already disappearing, so he immediately sent his spiritual power out.

He picked it up.

Constellation Force (Fire)\*10

Constellation Force (Fire)\*12

This is? Wang Teng was flabbergasted.

Constellation Force!

And it was a fire element constellation Force.

As the constellation Force merged into his body, Wang Teng felt a certain change.

He pulled out his attributes panel and looked at his Force column. There was a new Constellation Force (Fire) entry: 22

This constellation Force was different from his other fire Force. It seemed strangely more powerful.

However, this wasn’t the time to look into it. He pretended to use his spiritual power to scan the alien a few times before retracting it.

Suddenly, the alien opened its eyes.

“%&#i ¥\*#...” It struggled frantically and made strange and inaudible sounds with its throat.

“Quick, quick. Give it a huge jab of anesthetic. Don’t let it struggle,” the person-in-charge who was talking to the Leader just now shouted.

The staff around them started to get busy. After a series of operations, the anesthetic was injected into the alien through one of the tubes.

The alien gave a frustrated and angry roar. Its eyes popped out, and it went back to sleep again.

The Leader and the others seemed used to this scene. They shook their heads helplessly.

Wang Teng glanced at the Leader and then at the alien. Suddenly, he found this fellow a little pitiful.

It had been locked up for 18 years and was treated as an object of study. Its life was dark.

“Did you discover anything?” The Leader asked.

"It's Force seems powerful." Wang Teng thought for a moment. He didn't want to say anything at first, but he figured it wasn't good, so he gave an ambiguous answer in the end.

"That is the direction of our research. Unfortunately, we haven't found a way to alter our Force," the Leader said.

"You think that this Force is a mutation of our Force?" Wang Teng read between the lines.

"High possible," the Leader said.

Wang Teng nodded in deep thought.

"Alright, you have taken a look at it. Do you have any other requests?" the Leader asked.

"That's all. I agree to go for the global event." Wang Teng didn't make any requests and agreed to the Leader's suggestion.

"Let's leave." The Leader walked out of the laboratory.

Wang Teng threw a sad look at the alien in the cabin. He wished that he could gain more attributes bubbles from it, but this wasn't a place he could enter whenever he wanted.

He didn't make this request just now because it was too sudden, and he was asking for too much.

After they came up, the three great commanders arranged Wang Teng and Dan Taixuan's lodging and let them rest. Three days later, Wang Teng would board the military aircraft heading to Mount Saint. As they watched him leave, the lofty commander asked curiously, "Why didn't you ask him about the rock body? He seemed to have found the path forward."

"We will know what we need to know. He will tell us when he feels he can say it," the Leader smiled and replied.

The three commanders were silent...

### **Chapter 564 Once A Master, Always A Mother**

That night, Wang Teng and Dan Taixuan stayed in the Capital Xia military district.

Wang Teng was a major general now, so by right, he belonged to the military. It was reasonable for him to live in the military district.

There were accommodations especially for outsiders in the military district. The treatment was not bad.

Under the guidance of a soldier, they passed through a small cobblestone path and saw many simple buildings in front of them. They looked exquisite. It was hard to imagine that such accommodations existed in the military that was known for being frugal.

Noticing Wang Teng's surprise, Dan Taixuan explained, "This area is normally used to welcome foreign guests. Hence, it mustn't look too shabby."

Wang Teng was enlightened and nodded. He discovered that Dan Taixuan seemed familiar with this place. It wasn't her first time here.

“Loft 03, 05, and 08 are empty. Major General Wang, you can choose one,” the soldier leading the way said.

“I’ll take 08. I came to Capital Xia to earn a fortune, so I’ll choose this lucky number,” Rubbing his chin, Wang Teng said seriously.

The soldier: ...

Dan Taixuan rolled her eyes. She was speechless.

“Alright, you can get going. You don’t have to worry about us,” Dan Taixuan said to the soldier.

“Yes!”

After the soldier left, Wang Teng asked Dan Taixuan curiously, “Master, where will you be staying?” Dan Taixuan frowned. “Stop calling me Master. You’re no weaker than me now. In the martial arts world, your ability decides your status. You can talk to me as a peer.”

Wang Teng didn’t expect her to talk about this. He was shocked. Then, he straightened his face and said, “Once a master, always a mother...”

Dan Taixuan was speechless.

To hell with always a mother!

What could you expect from a hog but a grunt?

“Cough, sorry I made a mistake. That isn’t the main point. The thing is, I always treated you as my master.” Wang Teng coughed awkwardly and continued, “You taught me many things in the past. When we went to the Crimson Tiger Troop, you stood up for me without any hesitation. I’ll always remember it.”

Dan Taixuan glanced at Wang Teng. This fellow had some conscience. Her expression remained emotionless as she stretched her back and said lazily, “Alright, let’s not talk about the past. If you really remember what I’ve done for you, call me sister from now

on.”

“Alright, I’ll call you Sister Xuan from now.” Wang Teng knew that as his status changed, it would be awkward to keep calling Dan Taixuan his master. Hence, he agreed to her request.

Dan Taixuan nodded. He pointed to the loft beside her and said, “That’s where I’ll be staying. Call me if you need anything.”

Wang Teng finally saw the ‘Xuan’ doorplate on the loft. She had a personal loft here.

“Why don’t I have this treatment?” He wasn’t convinced.

He was a major general who was going to represent the country soon. Why couldn’t he enjoy a similar treatment?

Outrageous!

He must talk to the three great commanders about this the next time he saw them.

“Wait until you’re a lieutenant general.” Dan Taixuan snorted and walked towards the loft. She left Wang Teng with a heartless back view.

Wang Teng was stunned for a moment before regaining his senses. She had mocked him.

Dan Taixuan was still the evil Dan Taixuan.

“Since you’re not my master anymore, I won’t give in to you! Hmph!” Wang Teng glared at Dan Taixuan’s amazing figure as he muttered to himself.

Dan Taixuan felt the furious gaze and froze. She turned around abruptly and glared ruthlessly at Wang Teng.

She was welcomed with an innocent and pure gaze.

“If you look at me with that gaze again, I’ll dig your eyes out.” Dan Taixuan threatened him before slamming the door shut and disappearing from Wang Teng’s sight.

“Hmph, a paper tiger.” Wang Teng laughed and shook his head as if he had discovered something funny.

In the no. 08 loft, Wang Teng sat down cross-legged on the bed and focused on his attributes panel.

Constellation Force (Fire): 22

His mind was fixed on the constellation Force. He felt it thoroughly and discovered that there were strands of special fire Force mixed in his normal fire Force.

The next instant, Wang Teng opened his eyes and lifted his hand. Fire Force surged out from his body and congregated into a ball of flame on his palm.

At this moment, there was an even more scorching flame within this fiery red flame.

Wang Teng removed it from the normal flame carefully. In the end, it formed a dark red flame. Its color was darker, and its temperature was higher, possessing a stronger destructive power.

“Based on what the Leader said, this constellation Force is mutated from our normal Force.”

Wang Teng stared at the dark red flame in deep thought.

“In that case, there must be something connecting these two Forces. This connection might be a profound Force skill scripture. “The humans on Earth lack this advanced skill scripture, so they can only stop at the general stage.” Wang Teng frowned. He had a sudden thought.

“The Ancient God’s Body also had a stronger and more profound Force skill scripture. However, it cultivates the body and not Force...”

“Wait, that isn’t right. I remember that when I raised my Ancient God’s Body’s level, a certain Force merged into my body. It was similar to the constellation Force.

“But... that Force was purer, and it didn’t possess any attributes.”

Wang Teng recalled the feeling as he activated his Ancient God's Body. He tried to sense the secret within.

Boom!

His heart pounded forcefully. The blood in his body churned and nourished his flesh and bones. A powerful strength surged out of his body.

A magical golden mark appeared on his forehead.

Wang Teng followed the path on the Ancient God's Body. A loud explosion suddenly came from his body, and a large suction force surged out.

It was nighttime. The stars hung high in the sky.

Suddenly, all the stars shimmered and blinked once. Then, the Force within the area flowed toward him frantically.

These Forces weren't limited to one type. There were all kinds of attributes: metal, wood, water, fire, earth, wind, lightning, and ice. All of them flowed over and turned into a purer form of energy using the Ancient God's Body. Finally, it merged into his body.

"As expected!" Wang Teng activated the scripture once and felt the tremendous changes outside. He immediately stopped the cultivation of the Ancient God's Body.

Bewilderment appeared in his eyes. The Ancient God's Body was exceptionally domineering. It was able to absorb all Forces into his body.

No wonder the Ancient Gods' tribe sucked the energy from the planets and stars to raise their cultivation. Their path was too powerful.

"If I'm right, those Forces are the constellation Forces!" Wang Teng took a deep breath to calm down. He made his guess.

### **Chapter 565 Wang-Wikipedia-Teng!**

When Wang Teng was cultivating the Ancient God's Body, the three great commanders walked out of their lodgings and looked up at the sky.

"Did you sense that?" the lofty Commander Long asked in a stern voice.

"The fluctuation was violent, but it disappeared too quickly. I can't find the location." Commander Hong was scrawny, but his voice was loud and clear.

The last refined-looking elder was Commander Yong. His gaze flickered as he said, "I wonder who can cause such a huge commotion?"

"Do you think it's Old Wu-" Before Commander Long could finish his sentence, he was interrupted.

"Old Long, be careful of what you say," Commander Hong and Commander Yong said simultaneously.

"I know, I know." Commander Long was frustrated. He muttered, "If they found any results during their research, they can be direct. What's the point of hiding?"

Commander Hong and Commander Yong ignored him.

The three of them investigated the commotion again but discovered nothing. They went back to their lodgings dejectedly.

Wang Teng didn't know that the commotion caused by his Ancient God's Body cultivation had attracted the attention of the three great commanders. Honestly, what happened just now was out of his expectations.

In the past, he used his blank attributes to raise the level of his Ancient God's Body, so he didn't need any external Force. Hence, no one detected anything.

But now, he cultivated the Ancient God's Body properly using the standard cultivation method, so a large amount of Force was needed. This would definitely attract others' attention, and they would realize that his cultivation method was different.

Wang Teng didn't mind releasing this cultivation method to the public when the right time came. But, it wasn't now.

He hadn't experienced it yet, so why should he let others do it first?

He had his selfish thoughts too. The Ancient God's Body was exceptionally powerful. He wouldn't tell everyone about it.

He would tell them after he found a normal Force skill scripture to cultivate constellation Force. That way, his heart wouldn't hurt.

It looks like the Leader's guess is right. Wang Teng wondered to himself.

The constellation arose from normal Force. The next stage of human cultivation was to learn how to evolve Force into constellation Force so that they could move to a higher realm.

Wang Teng pondered to himself silently. All sorts of ideas went through his mind. He had already experienced the process of the transformation of Forces, so he had some understanding of it.

If he could merge this skill into the sky-rank scriptures he possessed, would he be able to come up with a new way of cultivating constellation Force?

Wang Teng's eyes lit up at the thought. He immediately put his idea into motion. He possessed many advanced-rank scriptures from yellow-rank to sky-rank.

No one had more scriptures than him.

In the future, he could be called Wang-Wikipedia-Teng!

A smile appeared at the edge of his lips. He closed his eyes and focused on going through the constellation Force skill scripture in his mind.

The night passed quickly.

The next morning, Dan Taixuan called Wang Teng up for breakfast.

Wang Teng opened the door with panda eyes. He had underestimated the difficulty of creating a scripture. This wasn't something a normal human could do. He felt that his head was going to explode after thinking the entire night. However, his efforts weren't useless. He did have some new enlightenment, but he was still a vast distance away from creating a new constellation Force skill scripture.

"What's the matter with you?" Dan Taixuan asked in surprise.

"Nothing. I didn't sleep well," Wang Teng replied casually.

"Didn't sleep well?" Dan Taixuan looked at him curiously. Then, she thought of something, and her expression turned strange. "Young man, you need to curb yourself."

"Pfft!"

Wang Teng almost vomited blood. "Curb your head! What are you thinking?"

"Am I wrong?" Dan Taixuan glanced at him from the corner of her eyes.

"Definitely. I'm so handsome. Why will I do that?" Wang Teng was speechless. "What are you referring to? I don't understand. I just hope that you will stop staying up late."

Wang Teng: ...

Dan Taixuan smirked in her heart when she saw his frustrated expression. How dare you be cheeky around me!

She was taking revenge for what happened yesterday night.

After their breakfast, they prepared to go back to their lodging.

"What do you plan to do for the next few days?" Dan Taixuan asked.

"Nothing. I'm going back to cultivate." Wang Teng hadn't given up. He decided to go back and try it out again.

"Since we're here, let me bring you to a good place," Dan Taixuan said with a mysterious smile.

"Oh? What place?" Wang Teng got interested when he saw her expression.

"You'll know once you get there." Dan Taixuan said, "But that place needs some contribution points."

"Contribution points!" Wang Teng knew what contribution points were. The military would reward people with contribution points after they completed a mission or made great achievements. These contribution points could be used in the military or exchanged for other resources in official stores.

Honestly, he had quite some contribution points on his hands.

Without him knowing, he had made many contributions to the human race. He caught the spy for dark apparitions, helped in the Star Maple City war and the sea beasts' riot... He made great contributions during these events, so the higher authorities gave him his due contribution points.

However, Wang Teng didn't need any other resources, so he never used them.

They walked deep into the military district and stopped outside a heavily guarded building

“Please show your identity.” The guard walked up and stopped them. Wang Teng and Dan Taixuan took out their identity certificates. The three guards present saluted and said indifferently, “Lieutenant General Dan, Major General Wang, please enter!”

The two of them entered the building and took the elevator to the underground level.

The underground space was extremely similar to the space Wang Teng visited yesterday. A silver-white corridor appeared in front of him. They walked forward.

On the way, Dan Taixuan explained, “The place I’m bringing you to is called virtual reality!”

“Virtual reality!” Wang Teng remembered something. “Isn’t it the same as the virtual combat chambers we have in school?”

“If it were the same, why would I bring you here?” Dan Taixuan smiled and asked.

“Huh?” Wang Teng looked at her curiously.

“The virtual combat chamber here is more advanced than the virtual combat chambers at the academy. You will know the details later,” Dan Taixuan said secretly.

The two of them came to an underground room. There were enclosed cabins that looked like coffins placed all around the room. Many people were lying inside.

“Swipe some contribution points and enter,” Dan Taixuan said. She swiped her contribution points and laid in one cabin.

Wang Teng looked around him and shook his head. Why did she have to be so secretive about this?

He followed Dan Taixuan’s actions and swiped his contribution points. A lovely sound suddenly rang inside the cabin.

“Respected Major General Wang, welcome to the virtual reality system. You need 1000 contribution points to enter for ten hours. Do you wish to enter?”

### **Chapter 566 Does This Human Likes To Get Tortured?**

“1000 contribution points!”

Wang Teng was stunned. 1000 contribution points for ten hours was a lot.

He looked at his personal wristwatch.

Given his current status, the wristwatch was no longer the one from Jixin Martial House but the one given by the military. It had better functions and was one of the top rune equipment on Earth.

There was a record of Wang Teng’s contribution points in it, and there were... 56,000 points!

Wang Teng was astonished again when he saw his contribution points.

It was quite a substantial number. If he didn’t make so many contributions, he wouldn’t have been able to obtain so many points.

That was fine. Now, he had enough contribution points for him to squander for a while.

He made his choice immediately.

“Yes!”

The cabin door in front of him opened slowly.

“Please enter the virtual chamber, wear the sensor helmet, and connect to the virtual reality!” The ethereal voice sounded again.

Wang Teng scanned the interior of the virtual cabin. He smiled, entering the cabin according to the instructions while wearing the helmet.

“Connecting to the virtual reality. Please concentrate your spirit...”

Wang Teng closed his eyes and concentrated his spirit.

Suddenly, there was a glimpse of light in his sea of consciousness, and his spirit was instantly sucked into it. The next moment, Wang Teng felt his eyes getting blinded by the bright, dazzling light.

However, his spiritual perception was still intact. Imperial Realm Spirit was not something ordinary people could match up to.

The spiritual power gradually extended, surprising Wang Teng. He realized that the surroundings seemed real. Every area that the spiritual power passed through felt real. It was completely different from what he had experienced in the virtual combat chamber.

He opened his eyes and looked around.

There was a seemingly quiet street, lined with high-rise steel buildings on its sides, whose metal surfaces reflected dazzling light.

“How is it?” Dan Taixuan’s voice could be heard from the side.

“This... is virtual reality!” Wang Teng cried out in astonishment.

If he hadn’t known in advance where this place was, he would have almost thought that he was in the real world.

“Not bad. Do you feel that the thousand contribution points were well spent?” Dan Taixuan smiled.

“Just based on this sense of reality, it wasn’t a waste.” Wang Teng was speechless and nodded. With a slight frown, he asked curiously, “Is this virtual reality a product of our research?”

“You think too much. With our current technology, we would need at least hundreds of years to create something like this,” Dan Taixuan answered.

“Then where did this come from?” A thought flashed through Wang Teng’s mind, and he probed. “Is this alien technology?”

“Oh, you guessed it.” Dan Taixuan glanced at him in surprise. She walked towards him while nodding.

“Go out first. We’ll talk while walking.”

“When the aliens landed on Earth, the spacecraft they were riding in was mostly destroyed. However, some of the technologies and equipment survived the crash, and this virtual reality cabin was one of them.”

“Spacecraft!” Wang Teng was attracted by the content of Dan Taixuan’s words, and his eyes were shining brightly as he asked curiously, “What kind?”

“After we get out, I’ll bring you to see it. With our authority, we can enter that place.”

Wang Teng nodded and didn’t ask anymore. Filled with emotions, he said, “Looks like the aliens’ technology is much more advanced than ours.”

“That’s right. Which is why all the countries are worried, or even... terrified!” Dan Taixuan frowned. “The universe is too vast, and Earth is just a drop of water in the ocean. It might be just a planet in the corner that has life, but no one knows what it is like outside of the solar system.

“Now that aliens with scales all over their bodies have appeared, it is very likely that other lifeforms also exist. They are stronger than us, and their technology is more advanced than ours. Earth is as fragile as a newborn child!

“Everyone is worried. If the aliens target the Earth one day and descend onto Earth, what will happen?”

Wang Teng’s expression became serious. It was obvious. If that day arrived, there would be drastic changes to Earth.

If the nest fell, the eggs would be broken!

Earth was home to all human beings, and aliens were outsiders. Those who were not their kin were sure to be of a different heart!

This sentence was not unfounded.

The weak would eventually be stepped on, and no one would treat someone well for no good reason.

Now, Earth was too weak!

“Judging from the current situation, these aliens have not discovered Earth’s existence,” Wang Teng said.

“The universe is too big, and it’s normal not to find us for the time being.” Dan Taixuan nodded. “Maybe the aliens that we captured were just too unlucky and strayed onto Earth and that everything was just an accident.”

“Is it possible for them to have sent a signal before they crashed?” Wang Teng wasn’t as optimistic and thought of a possibility in his mind.

“We can’t rule it out, but we can’t do anything about it, can we?” Dan Taixuan said helplessly. “All we can do now is to improve ourselves, to deal with the powerful enemy who may come at any time.”

“Hmmm- This world is getting more and more interesting!” Wang Teng took a deep breath and smiled.

“You’re still able to laugh?” Dan Taixuan rolled her eyes. Even with her calm and composed disposition, she felt burdened. However, Wang Teng could still laugh about it. Even she felt that his brain was wired differently from ordinary people.

Did he have a screw loose? Or an extra screw in his head?

Wang Teng suddenly realized that Dan Taixuan’s gaze was a little strange. “Are you thinking about something bad again?”

“No.” Dan Taixuan immediately denied and reacted, “Why the word ‘again’? What do you think of me?”

“You will have to ask yourself that.” Wang Teng shrugged.

As they talked, they turned at the crossroads and came to another street where some figures appeared.

There were all kinds of stores. Some people had opened stores in virtual reality! “Are you surprised?” Dan Taixuan laughed. “What’s the point of opening a store in the virtual world?” Wang Teng couldn’t help but ask.

“Only items that are produced in the virtual reality can be used here. If you don’t believe me, take a look at your wristwatch,” Dan Taixuan explained.

Wang Teng lowered his head and fiddled with it. As expected, the wristwatch became a display item that could not be used at all. Only its time was still ticking.

“Now you know why.” Dan Taixuan smiled. “This virtual reality is very wide. Although there are no other races here, there are countless star beasts. Training here would greatly improve you. Fighting here would require weapons, and the materials come from virtual reality... It’s a bit complicated to describe. Anyway, a self-contained trading system is formed here.”

Wang Teng had a thought in his mind. “Wait, why are there only star beasts and not other races? Also, are the buildings here created by us, or were they originally here, to begin with?”

“Looks like you discovered where the problem lies.” Dan Taixuan was surprised by Wang Teng’s subtlety. “Some people suspect that we are missing a piece of technology.” “Missing a piece of technology?” Wang Teng seemed to have grasped it, but he couldn’t figure it out. It felt extremely uncomfortable, as though something was scratching his heart.

“Have you watched science fantasy movies? Do you know what’s Skynet?” Dan Taixuan asked.

“Are you saying...” A sharp glint appeared in his eyes. He looked at Dan Taixuan in astonishment.

“We only have these virtual reality cabins. Some people guessed that this is just an empty shell, so the virtual reality we are entering is the most basic one. If we can connect to the alien’s Skynet, something unexpected might appear,” Dan Taixuan said slowly.

“Skynet!” Wang Teng muttered to himself.

“Skynet is just the name we give it. We don’t know what it is,” Dan Taixuan continued. “But we know that it’s more advanced than our internet.”

"It's hard to believe!" Wang Teng gave a bitter smile.

"What's so hard about it? The writers of science fantasy movies have done the thinking for us. No one had seen it in the past, so we find it too far-fetched. But now, do you still think it doesn't exist?" Dan Taixuan asked.

"Maybe." Wang Teng didn't give a definite answer.

"Let's go outside the city and kill some star beasts to get a feel of it." Dan Taixuan was about to rise into the air when she stopped suddenly. "Do you want to buy some weapons? I have enough virtual coins to buy a weapon."

"It's alright. I can kill star beasts without weapons." Wang Teng shook his head.

Dan Taixuan remained quiet. She flew into the air and rushed out of the city.

Wang Teng tapped the ground and turned into a ray of light. He disappeared on the spot.

The two of them flew out of the city. No one stopped them at the city gates.

This city was empty. Only a few humans were living inside because virtual reality hadn't been popularized. The numbers weren't enough to start the operations of the city.

Dan Taixuan and Wang Teng entered a mountain and started hunting. At their level, they wouldn't feel anything if their prey's level was too low. It wouldn't give them any experience.

They searched for some time before they discovered a huge ice python sleeping beside an ice lake.

"You wanted to kill ice element star beasts, right? There's one ice element python right here for you to practice," Dan Taixuan whispered. She was hiding on a large tree with Wang Teng and looking at the ice python lying on the ice lake.

Wang Teng wondered if Dan Taixuan purposely found this ice element star beast for him because she knew that he wanted to hunt for ice element star beasts.

He glanced at Dan Taixuan secretly and noticed that her expression didn't change. She seemed to have discovered this ice python coincidentally instead of searching for it specifically.

Hmph, I'm thinking too much. Wang Teng mocked himself. His gaze turned sharp as he looked at the large python.

Its huge body circled the lake, protecting the lake in its arms. Ice blue scales covered its body, and it was giving off a chilling aura. There were two sharp horns on its head, with a ball of faint ice mist floating above them.

Immortal!

This was Wang Teng's first thought.

Then, he sensed that this python was different from the other pythons on Earth. They weren't the same breed.

The animals on Earth might have mutated, but they still possessed their original traits. However, the traits this star beast had were a little different in essence.

It was just like two different human races.

The next moment, he moved.

His body vanished, appearing above the giant blue python's forehead. He clenched his fists and smashed it down like a cannon.

Boom!

An explosion resounded. The frightening fist pressure squeezed the air around it, and a huge outline of an ape king materialized.

This was a serious punch.

From his Spiritual Sight, this ice python was a low-tier lord-level star beast. Hence, Wang Teng didn't hold back his strength.

The giant python woke up with a start. It raised its head and hissed into the sky. When it saw Wang Teng's attack landing on its body, a humane emotion flashed past its cold and vertical pupils. Then, it smashed into Wang Teng without evading.

A thick layer of ice congregated on its horns, forming an arc and looking extremely sturdy.

This was a real iron head!

All of this happened within a few breaths. Wang Teng's fist landed on the ice blue giant python's head.

Boom!

Both sides paused for a split second.

The giant python gave a look of contempt. It seemed to be mocking the human for overestimating himself.

This is it?

Crack!

Right then, lines started to appear on the layer of ice on the giant python's head. The cracks spread outwards.

The giant python was astounded.

Bang!

Suddenly, the ice layer shattered entirely, and Wang Teng's fist smashed down with overwhelming force.

The giant python's body was thrown out. It smashed onto the ground and rolled a few times violently.

The python was stunned by the fist.

Some distance away, Dan Taixuan's jaw almost dropped. Why was this fellow so strong?

He slammed a lord-level star beast on the ground with a single punch.

Wang Teng was stunned too as he looked at the attribute bubbles that had suddenly appeared on the ground. He rubbed his eyes in disbelief.

Seriously?

There were attribute bubbles in the virtual world?

He was honestly shocked. What kind of world is this? This doesn't make sense!

He picked up the attribute bubbles anxiously.

Ice Force\*130

Ice Force\*99

Blank Attribute\*58

He confirmed the changes in his attributes panel before he believed that he could pick up attributes bubbles in the virtual world.

Virtual reality wouldn't be more advanced than the system. They wouldn't be able to clone another system out, right?

That was impossible.

Wang Teng was extremely confident in his system.

That meant that there were some special circumstances in this virtual world. No matter what, this was a good thing.

He was looking for a way to raise his ice Force, and here it came. Even heaven was helping him!

Wang Teng's eyes lit up. He looked at the giant python as if it was an ice baby.

The ice blue giant python shook its head. Its puzzling gaze turned cold again, and it stared at the human in front with killing intent.

"That's right, this is the gaze. Come and kill me! Go all out and kill me! Come!" Wang Teng shouted excitedly.

The ice blue giant python: Does this human likes to get tortured?

### **Chapter 567 A Very Serious Punch!**

Dan Taixuan was still thinking if she should help Wang Teng. However, when she saw him suddenly getting excited, she felt that her worry was for nothing.

Indeed, Wang Teng was able to punch this low-tier lord-level python into the air with a single punch. Without any ultimate moves, he might still be able to defeat this star beast.

As a 10-star was brigadier general, he jumped a level and was fighting with an 11-star lord-level star beast. He had gone further and further on the invincible path!

No, as his ex-master, how could she fall behind him!

Dan Taixuan gritted her teeth. The motivation to become stronger instantly rose in her heart. She was a top-tier talent too. If not, she wouldn't be able to become a general-stage martial warrior at 27.

Hence, it was understandable why she felt frustrated when Wang Teng caught up with her.

Dan Taixuan glanced at Wang Teng who was fighting with the ice python. The corners of her lips twitched.

What was he excited about?

The ice blue giant python moved its body slowly as it stared vigilantly at Wang Teng. It felt a sense of danger from this human!

Especially that gaze. He seemed like a maniac...

"Hiss!" It hissed at Wang Teng before it shrunk its head back...

Wang Teng didn't move. Although the ice python had shrunk its head back, it still didn't launch an attack.

What's this stupid python doing? Wang Teng was stunned, feeling confused.

Was that a fake move just now?

As a lord-level star beast, why are you making a fake move? Do you think we're playing basketball? Fake move?!

This ice python seems like an idiot. Did I hurt its head just now?

Wang Teng started to look at the python with compassion. It was quite pitiful. It wasn't easy to become a lord-level star beast, but he had knocked it stupid.

Never mind, this star beast is stupid, so there's no point in keeping it. I will kill it and eat it.

I wonder if ice element star beasts' meat is delicious?

Wang Teng had never tasted it before.

As these random thoughts flashed through his mind, Wang Teng suddenly disappeared on the spot. He turned into a ray of light and shot towards the ice python.

He raised his fist, and metal Force gushed out, forming a powerful and firm force on his fist.

Sky-rank battle technique-Golden Star Fist!

Strength of Ultima!

This was a very serious punch!

In that instant, the ice python felt an extremely frightening power from Wang Teng's fist. The fist zoomed in continuously in its eyes like a huge mountain boring down on it.

"This is?" Dan Taixuan sensed something and widened her eyes in astonishment.

The ice python hissed fiercely. An ice-blue ball of light quickly formed in its mouth, and it spurted it out.

Boom!

The ice blue ball of light went straight for Wang Teng's fist. Force glow exploded, and the terrifying residual force of their attacks swept through the lake.

The center of this ball of light erupted.

Dan Taixuan squinted as she stared at the point of contact.

"Roar!" The ice python's howl was heard from afar. The pain in its voice was obvious.

Dan Taixuan's expression changed. The ice python seemed to have suffered miserably during their exchange just now.

The dust blown into the sky by the strong wind dissipated gradually. The situation in front was finally revealed.

A deep hole had appeared on the ground. The

ground and buried deep inside. Its hard scales had cracked, and many parts of it were broken. The scales were scattered everywhere.

A large pool of blood flowed down its head. It looked tragic.

There was a figure standing above its head. It was, of course, Wang Teng. Is it dead? Dan Taixuan frowned. This result was out of her expectations. There was a difference in their level, so it was hard to believe that the ice python got so easily defeated by Wang Teng.

Did this ice python look fierce but was actually useless?

At this moment, the ice python suddenly opened its eyes and hissed. It moved its body frantically.

Wang Teng stood on its head firmly without falling. He grabbed one of the ice python's horns, and his gaze turned cold. "You're putting up a stiff resistance."

The ice python flung its head furiously, wanting to fling Wang Teng off. At the same time, a chill surged out of its horn and spread to Wang Teng's arm.

A thick layer of ice froze around Wang Teng's arm.

"Are you trying to freeze me?" Wang Teng smirked. He released his Emerald Glazed Flame, covering his arm internally and externally.

The fire was the bane of ice. Moreover, the Emerald Glazed Flame was a divine fire, so there weren't many ice Forces that could resist it.

The ice python's ice Force hadn't reached that stage.

The thick layer of ice melted instantly.

Wang Teng didn't retract his Emerald Glazed Flame. He allowed it to spread out until it reached the ice python.

Roar!

The ice python's eyes widened in surprise, and it hissed in agony.

Hot!

Extremely hot!

What did this human do?

The ice element star beast wasn't able to withstand the scorching heat of the Emerald Glazed Flame at all. This heat was the worst torture for it.

Wang Teng's gaze was cold. He grabbed the other horn with his free hand, and the Emerald Glazed Flame seeped out of it, enveloping the hand.

The two ice blue horns of the python started turning red at a visible speed. They seemed to be getting cooked... The ice python gave a loud hiss. Its voice had changed. It seemed to be suffering great pain.

Dan Taixuan looked at the scene from afar and suddenly started pitying the ice python.

It was tragic!

This giant python was extremely unlucky to have met Wang Teng, a person who possessed the divine fire. It could only be tormented.

The green flame wrapped around the ice python's horns. The scorching heat flowed into its body through the sharp horns, and the ice mist was evaporated. Steam appeared above its head.

No matter how hard the ice python struggled, it couldn't break free from Wang Teng.

At this moment, it understood what despair felt like!

Boom!

The next moment, the ice python stopped struggling. Its huge body slammed on the ground forcefully, and it stopped moving.

Smoke rose from its head. It seemed to be... cooked!

Wang Teng leaped down from the ice python's head calmly. He glanced at the attribute bubbles around him and swept them over with his spiritual power.

He picked them up.

Ice Force\*230

Ice Force\*560

Ice Force\*360

Ice Force\*420

Advanced Stage Ice Talent\*156

Blank Attribute\*640

Wang Teng counted his gains silently and was overjoyed.

There were 1570 points of ice Force. Adding the 229 points from before, he had gained 1799 points in total. This was not bad!

Ice Force: 2507/5000 (7-star)

Wang Teng looked at his ice Force. The gains allowed his ice Force to reach the middle zone of the 7-star level. He needed only 2500 points more to break through this level.

What did this mean?

Simple. All he needed to do was to kill another lord-level ice-element star beast!

At this moment, Wang Teng was full of motivation. He hoped that he could find another lord-level star beast immediately and pick up another round of ice Force from it. He wanted his ice Force to reach 8-star immediately.

Besides his ice Force, Wang Teng also received 156 points of advanced stage ice talent and 640 blank attributes. The gains were not bad.

Virtual reality was a good place!

### **Chapter 568 What A Great Way To Kill All The Ants!**

There must be some secrets in this virtual reality because he could pick up attributes.

Wang Teng thought to himself. He was restless.

Dan Taixuan walked over with a strange expression. "You cooked it?"

"Cough, I didn't. It's not entirely cooked. It's probably half done." Wang Teng kicked the ice python's corpse as he coughed awkwardly.

"Is there a difference?" Dan Taixuan rolled her eyes at him.

"Of course. Half-cooked meant that I'm not so cruel," Wang Teng said in a righteous tone.

Dan Taixuan: ...

She was shocked by this person's shamelessness.

"Don't care about the details. I learned many things from the fight just now. I plan to look for other ice-element star beasts," Wang Teng said.

VO

"Alright. You seem like a fish in water, so I don't have to follow you anymore. We'll move separately and gather in the city when the time is up."

Wang Teng had no objection. He had already found a special cultivation method for himself in virtual reality. Now, he just wanted to look for ice element star beasts quickly and hunt them.

Other people could only raise their battle ability through the experiences in virtual reality, but he could get attribute points. If others knew about his cheat, they might turn green with envy.

Dan Taixuan turned and prepared to leave. Suddenly, she stopped and turned back. She asked, "Was there Ultima in your punch just

now?"

"You noticed it!" Wang Teng exclaimed in surprise.

"So it's true! You have grasped the Ultima!" Dan Taixuan was flabbergasted. She stared at Wang Teng as if he were a monster.

"I was lucky," Wang Teng replied calmly.

"Hurry and leave. I don't want to see you." Dan Taixuan felt her heart churning in pain. This fellow was here to stimulate others.

After separating with Dan Taixuan, Wang Teng started roaming the mountains, searching for ice element star beasts seriously. "Where are you? Come into my arms quickly," Wang Teng muttered as he combed the area for ice element star beasts.

Wherever he went, the star beast around him scurried away as if they saw something terrifying

Huh?

Wang Teng saw a high mountain in the distance. The peak of the mountain was white, turning into a natural ice world.

His eyes lit up. There must be ice-element star beasts up there.

The next instant, Wang Teng rose into the air and turned into a ray of light. He flew straight for the peak.

He stopped in mid-air, ignoring the wind pressure in the sky. He activated his Spiritual Sight and scanned the peak below.

His eyes were like a radar scanning the Force fluctuations below.

Suddenly, an icy blue ball of light entered his vision.

"I finally found it!" Wang Teng was elated. He rushed towards the ball of light without any hesitation.

From the size of the ball of the light, it didn't look like a lord-level star beast, but it was still an ice element star beast.

Ice element martial warriors were rare, so he could only gain ice Force from ice element star beasts. He mustn't let go of any chance.

Soon, Wang Teng saw the appearance of the ice element star beast. This was a snow-white giant ice ant. Its body was like an ice sculpture, crystal-clear.

There was a snow-white shell that looked like armor made of snow. Its appearance was magical.

The ice ant was moving a corpse and crawling forward.

Wang Teng wanted to attack it, but when he saw this scene, he stopped abruptly.

The habits and living conditions of ants appeared in his mind. Although ice ants were star beasts, they were similar to normal ants. There must be a nest of them.

This ice ant was just carrying its prey back to its nest. Wang Teng decided to follow it.

After making his decision, Wang Teng hid his aura entirely. He tailed the ice ant.

Ants weren't slow, but they were too small as compared to humans. Hence, they needed more time to move the same distance as a human.

However, the ice ant in front of him was anything but small. It was the size of a small Beetle car. It traveled a few hundred meters in an instant.

After some time, a nest hidden under the rocks appeared in front of Wang Teng.

The ice ant arrived at the entrance of the nest. Another ice ant crawled out, and they touched each other's antenna. Then, they crawled into the nest.

Wang Teng floated down from the sky. This entrance was big enough for him to enter while standing straight.

Activating his dark talent, dark Force surged out. He executed the Shadow Merging Secret Skill and hid in the dark as he moved into the nest.

As he went deeper, he realized that the nest extended in all directions, and the paths had many twists and turns. The nest spanned a huge area.

Very soon, he saw an ice ant.

Wang Teng didn't attack it immediately. He wanted to understand the situation first.

He headed deeper into the nest and met more and more ice ants along the way. The edge of his lips lifted into an arc.

There were so many ice ants, so there must be many attribute bubbles!

This was going to be a good harvest.

Wang Teng suppressed the excitement in his heart. He took a few turns and finally came to a huge underground space. A large queen ant was lying horizontally here.

Its entire body was white, and it was bloated and round. Erm... if you took a bite of it, juice might spurt out!

Wang Teng scanned it with his Spiritual Sight and noticed that the intensity of the light in the queen ant's body had reached mid-tier lord-level.

This queen ant was stronger than the ice python he met some time ago!

But...

Wang Teng looked at the bloated body of the queen ant. He wondered if it was still able to fight?

Could it be that it was just a reproductive tool like a normal queen ant?

It would be great if that was true!

1

He could kill a lord-level star beast with extreme ease!

Of course, Wang Teng knew that this might not be the case. There were all kinds of star beasts. He didn't dare to treat this queen ant as a weakling

Furthermore... he looked around the queen ant. There were a few soldier ants present.

Based on the intensity of the Forces in the soldier ants' bodies, some of them were at the 9-star while a few had reached low-tier lord-level.

This ant nest was not bad!

Although Wang Teng was elated, he was a little afraid. Ants were known for their numbers. Even he would feel terrified if all the ice ants swarmed out of their nest at once.

I need to think of a way to settle it once and for all! Wang Teng touched his chin and pondered to himself as he hid in the dark.

This nest of ice ants was a little hard to swallow, but he wouldn't give up.

Once he killed all of them, he would be able to gain a huge number of ice Force attribute bubbles. His ice Force might leap all the way to the 9-star level because of this.

Wang Teng shuddered in excitement when he imagined that scene. His mind worked furiously.

"That's it!" Suddenly, an idea flashed past his mind.

With an evil smile at the edge of his lips, he retreated toward the entrance.

When he arrived at the entrance, his gaze flickered, and poison Force gushed out of his body. Then, the Emerald Glazed Flame came out.

Once the poison Force touched the Emerald Glazed Flame, a thick black smoke erupted.

Wang Teng pushed his Force out and formed a strong gale. He blew the black smoke into the nest.

### **Chapter 569 A Fat Queen Ant!**

When Wang Teng released the poisonous smoke at the entrance, his expression was extremely calm.

It would be better off dead than be an emotionless reproductive tool. Wang Teng felt that he was doing a good deed!

Ding! He received a good man card!

He successfully gave himself a good man card!

At this moment, faint crawling sounds could be heard inside the nest. It didn't sound like one or two ants. Instead, there seemed to be four to five ice ants crawling inside.

A sharp glint flashed past Wang Teng's eyes. He raised his large fist...

The instant an ice ant popped its head out, Wang Teng smashed it with his fist.

Bang! The ice ant's shell collapsed in a single blow, and its head exploded.

Ice Force\*88

Blank Attribute\*56

Wang Teng picked up the attribute bubbles. 88 points... this was a lucky start!

The second this ice ant died, the one behind crawled out hurriedly. Then, the third and the fourth one came out.

Wang Teng was feeling over the moon. He sent an ice ant to hell with every single punch he made.

Ice Force\*50

Blank Attribute\*38

Intermediate Stage Ice Talent\*10

Ice Force\*70

Blank Attribute\*46

Ice Force\*66

Wang Teng picked up the attribute bubbles. His ice Force rose continuously, and his blank attributes increased steadily too.

The ice ants in front weren't strong. They were at most at the 4-star or 5-star level. The intermediate stage ice talent some of them dropped was useless to Wang Teng.

As time passed, more and more ice ants crawled out. Wang Teng was overjoyed. These were all moving attributes!

He got increasingly excited as he killed the ants. Soon, a small pile of ant corpses was formed at the entrance of the nest.

This virtual reality was extremely life-like. The corpses of the dead star beasts wouldn't disappear instantly. They remained here and merged into the natural environment.

Hence, Wang Teng had no choice but to add a movement. Whenever he killed an ant, he would kick the corpse to the side. If not, the entrance would be blocked.

Suddenly, Wang Teng's expression changed. He felt a few stronger auras coming closer.

The lord-level soldier ants!

Wang Teng knew that the main highlight of the show was here. After so many unimportant ants died, the bosses inside couldn't sit still anymore.

Swoosh!

A figure suddenly rushed out and charged towards Wang Teng.

Wang Teng squinted and slammed his fist out.

Mirage Mountain Fist!

Boom!

The ice ant that charged out stopped abruptly as if it was frozen.

Everyone knew that ants were extremely strong. They were able to lift an item 400 times their body weight and drag an item 1700 times their body weight. If a normal ant was so strong, think about how much strength these ice ants possessed.

Wang Teng didn't exert his entire force in this move, but he already felt the powerful strength coming from the body of the ice ant in front of him. They were at a standstill.

At the same time, a cold stream flowed over from the ice ant's body. If he wasn't a fire element martial warrior, he would have gotten hurt by the coldness. If his body was frozen, how could he resist the ice ant?

Hence, normal martial warriors wouldn't have any advantages against these ice ants.

Unfortunately, the ice ants met the bug in this world, Wang Teng. He possessed multiple elements, and his brigadier-general-level fire Force was powerful enough to tackle his opponent's ice Force.

The fire Force flowed through his body, turning it into a furnace. All the coldness was dispelled.

The ice ant opposite felt the scorching heat. It turned a little anxious and wanted to stay away from the heat source.

At the same time, two more lord-level ice ants dashed out from the cave and hurled themselves at Wang Teng.

Wang Teng stared intently at them and caught the antenna of the ice ant in front of him. He tapped his feet on the ground and landed on top of the ice ant's head.

The other two ice ants rushed out from the side and collided with each other. Their heads were spinning.

Wang Teng burst out laughing. He slammed his fist down on the ice ant below him. The Emerald Glazed Flame covered up his fist as it pierced through the ice ant's body with its scorching heat.

The ice ant raised its head frantically and wanted to throw Wang Teng down.

But as the Emerald Glazed Flame invaded its body, the crystal-clear shell of the ice ant gradually turned red, and hot air rose from its body. The ice ant was cooked!

The other two ice ants saw the tragic state of their comrade and naturally felt fearful. They kept retreating

Wang Teng leaped down from the ice ant's head and landed in front of the two ice ants. He released both his fists at once.

Boom!

Boom!

The green flame exploded, enveloping the two ice ants. They burned furiously.

The two ice ants rolled on the ground, wanting to extinguish the fire. Unfortunately, the Emerald Glazed Flame wasn't a normal flame, so it couldn't be put out so easily.

Very soon, the two ice ants turned into ashes within the green flames. A few attribute bubbles were dropped.

Ice Force\*560

Ice Force\*380

Advanced Stage Ice Talent\*186

Ice Force\*450

Blank Attribute\*640

Advanced Stage Ice Talent\*222

Good riddance, these lord-level ice ant were the main course. This was a great harvest!

Wang Teng's ice Force had jumped from the 7-star to the 8-star soldier level.

Ice Force: 2250/7000 (8-star)

Within a few hours, his ice Force rose from 7-star to 8-star. A normal person would feel that this was a dream.

At the same time, he accumulated 6300 points of blank attributes.

He felt more at ease with his savings.

Once again, Wang Teng was a rich man with savings.

However, seeing the last advanced stage ice talent bubble, his good mood was gone. 222 points...  
System, are you serious?[1]

I have already collected this bubble, so I have to take it. If not, I won't accept this atrocious number!

I have my dignity!

Wang Teng accepted the bubble in frustration. Suddenly, he looked towards the entrance.

Under the influence of the poison smoke, a bloated body was slowly moving out of the nest.

It was the queen ant!

Wang Teng turned vigilant. This queen ant was at mid-tier lord-level. He wondered how powerful it was. He should be careful.

Soon, he discovered that the queen ant didn't crawl out by itself. More than ten ice ants were carrying it out step by step.

It was like a fatty that couldn't move by itself!

Wang Teng's expression turned strange. He didn't know how this queen ant was going to fight.

Was it going to smash him with its bloated body?

His imagination ran wild. With the help of the ice ants, the queen ant finally arrived at the entrance.

A large number of ice ants scurried out from the nest after it. They surrounded the queen ant and looked at Wang Teng vigilantly.

Without any warning, a strange airwave came out of the queen ant's mouth. It spread out in circles.

What is it doing? Wang Teng didn't feel any attack. He frowned in confusion.

But the next instant, the ground shook suddenly, and loud noises came from the sky above him.

Large patches of snow fell on him.

Wang Teng raised his head and squinted his eyes.

"What the f\*\*k!

"Avalanche!"

Wang Teng couldn't help but curse. He stared at the queen ant in disbelief. Was this phenomenon created by the airwaves just now?

[1] In Chinese, the number two can mean stupid.

### **Chapter 570 Only A Small Improvement!**

Wang Teng was startled when he heard the loud noises above!

Avalanche!

The queen ant had created an avalanche. Wasn't she afraid of getting buried by it?

Wang Teng immediately soared into the air. It wouldn't be fun if he was buried alive. However, the queen ant would never let him off so easily. The airwaves became more and more violent as they rippled out.

Boom!

Ice and snow were rolling down, and the ice sheets swept down above his head.

The worse thing was that the ice and snow seem to be targetting Wang Teng. The ice and snow didn't go anywhere and slammed towards the top of his head.

Wang Teng's face turned dark. He didn't expect the ant queen to deal him a blow like this.

It didn't make a sound and immediately used its ultimate move. It was more crafty than he was... Bah, other people were the crafty ones, not him.

Wang Teng lowered his head and looked at the queen ant. It stared back at him as well.

"Ah..."

Wang Teng sneered. The Emerald Glazed Flame burst out and surrounded his body.

The ice and snow seemed to be under the queen ant's control as they condensed into a huge icicle, with icy cold light flashing at its tip.

Wang Teng saw that, and his spiritual power gushed out. Using the control techniques of a divine spirit master, he condensed the Emerald Glazed Flames into one place.

Roar!

A majestic and powerful emerald dragon emerged from the flames. The compact scales on its body seemed real.

"Go!" Wang Teng shouted coldly. The emerald dragon rose into the sky, facing the horrifying avalanche.

Swoosh, swoosh, swoosh!

The power of the flames surged, melting the ice and snow. The icicle was instantly melted as a path was opened up in the middle of the avalanche.

When the surrounding ice and snow fell, Wang Teng was unharmed as he stood in the middle of the sky. His hair and clothes were flapping in the wind.

He looked down and realized that the ice ants had been completely buried. However, with his Spiritual Sight, he could still see that they were alive.

Ice and snow couldn't do any damage to them.

"I see. An avalanche can not only stop and kill me but also cover their tracks for them to escape." Wang Teng's eyes flashed as he snickered, "A lord-level star beast is not that stupid after all. Unfortunately, you have made the wrong move."

As Wang Teng stood in midair, the Emerald Glazed Flame condensed into a flame spear, locking onto the traces of the ice ants.

He then waved his hand, and countless flame spears shot straight down. Swoosh! Swoosh! Swoosh!

There were sounds of air crackling as the flame spears cut through the sky and pierced the thick layers of ice, nailing the ants down onto the ground below.

After exterminating all of the ants, Wang Teng collected the attribute bubbles that they had dropped.

Ice Force\*250

Blank Attribute\*140

Finally, Wang Teng's gaze locked onto the queen ant. Its bloated body landed on the ground, unable to move at all. Besides, after using the avalanche once, it seemed like within a short period of time, it couldn't use the same move again.

Wang Teng also noticed this abnormality. He looked at the queen ant like it was a lamb about to be slaughtered. His expression suddenly became weird.

Is this queen ant really so weak?

Just one hit?

This queen ant was probably the weakest lord-level star beast in history!

If the queen ant knew what Wang Teng was thinking, it would probably vomit blood in frustration. Ordinary martial warriors couldn't even get close to her. The swarms of ice ants were enough for the intruders to get more than what they had bargained for.

The strength of the ice ants was in their number!

These ice ants were all offspring of the ant queen. It was strong because of its terrifying reproductive ability. Giving birth to large numbers of powerful ice ants to serve itself was its most powerful means!

But there was nothing else to say since it had encountered Wang Teng, the bug.

It wasn't weak, just that its opponent was too strong!

Wang Teng shook his head and dealt with the poor ant queen mercilessly. A large number of attribute bubbles appeared above the snow.

Ice Force\*1430

Ice Force\*1380

Blank Attribute\*1600

Advanced Stage Ice Talent\*420

Avalanche\*1

Emperor Realm Spirit\*380

Wang Teng was a little surprised. The queen ant had dropped quite a lot of attribute bubbles!

It even dropped Emperor Realm Spirit attribute bubbles!

Wang Teng was in a bit of disbelief. The queen ant's spiritual power had actually reached the Emperor Realm!

It was rare for an ordinary human runemaster to reach the Emperor Realm. This queen ant was gifted...

He then looked at his Force attributes again.

This time, he had obtained 2810 points of ice Force from the ant queen. Adding the ones he got by killing the other ice ants, it was an extremely huge amount.

Now, Wang Teng's ice Force had already reached the 8-star soldier level, and he wasn't far away from reaching the 9-star soldier level.

Ice Force: 5950/7000 (8-star)

"A thousand more points to go," Wang Teng said to himself as he felt a bit unfortunate.

Besides that, there were a full 420 points of advanced-stage ice talent!

The low-tier lord-level ice ants had raised his advanced-stage ice talent by a lot. With these 420 points, Wang Teng's advanced-stage ice talent finally upgraded.

Ultimate Stage Ice Talent: 30/5000

Wang Teng felt that the essence of his body had undergone some mysterious changes. His body became extremely sensitive to ice Force. As he looked at the snow in front of him, tiny dots of ice Force gathered towards his body.

At this moment, he seemed to have transformed into a prince of snow!

Next was the 1600 points of blank attributes. The number of blank attributes that he had collected by sweeping the ice ants' nest was in the thousands, making his total tally reach five figures.

Blank Attribute: 10500

Wang Teng's eyes flashed, and he looked at the last attribute bubble.

The queen ant's skill— Avalanche!

He didn't expect that there would be a skill amongst these attribute bubbles.

Wang Teng couldn't help but wonder what this virtual reality really was? One could argue that the existence of Force and blank attributes in virtual reality was because the star beasts were made using Force here. However, these skills were the innate abilities of star beasts. They were already rare in the real world, let alone in this virtual reality.

This virtual reality was even more mysterious than he had imagined!

Wang Teng couldn't understand, so he didn't dwell on it. He shook his head and calmed down.

As the attribute bubble was absorbed into his body, the relevant details of the skill appeared in his mind. “No wonder the queen ant’s spiritual power had reached the Emperor Realm!” Wang Teng muttered to himself.

This skill needed spiritual power. It utilized a special way to create shocks and combined it with the ice talent to control ice and snow, creating an avalanche!

The Avalanche was not a weak skill among the other ice element battle techniques. The reason it didn’t hurt Wang Teng was that he had contained it.

However, in Wang Teng’s hands, Avalanche was different. After all, his spiritual power had reached the Imperial Realm, and the power of his Avalanche would definitely increase multiple times.

Of course, there were limitations. The skill was best used in snowy mountains like the one here. In other places, it would need huge amounts of ice Force to create the ice. Also, it would not have that same impact and momentum from falling from a high area, resulting in a lower effect.

In summary, it was a good skill, but it needed the right time and place!

This meant nothing much to Wang Teng. One more skill meant one more method for him. It was always good to have more skills!

Wang Teng nodded in satisfaction. He suddenly realized that this virtual reality was tailor-made for him. It was too friendly to him!

He didn’t know what kind of changes would happen to virtual reality if he could connect it to the Skynet. What could he gain from it?

With this thought in mind, Wang Teng continued to search the snow-capped mountains. If he could find another nest of ice ants... that would be great!

Unfortunately, he could only fantasize about it.

Perhaps this nest of ants was the overlord of this snow mountain, and there were no other similar species here.

Wang Teng had no choice but to take a step back and see if he could find other ice star beasts. If his ice Force could reach the 9-star soldier level before he left virtual reality, it would be a huge gain for him.

With less than three hours left, Wang Teng scoured through the snow mountain and almost turned it over.

In the end, he managed to find two or three kittens. They weren’t lord-level, but they were at least 7-star to 9-star, and they provided him with many ice Force attributes.

Wang Teng’s ice Force had finally broken through and reached the 9-star soldier level!

Ice Force: 135/9000 (9-star)

He was extremely satisfied with his gains this time around. However, he had wasted a lot of time, and it was too late to rush back to the city now.

As soon as it was time, a spot of light appeared in his mind again.

“I’m going back!”

Wang Teng didn’t have the time to react before the spot of light sucked him in. His body disappeared from the snow mountain. When he regained his senses, he was already back to reality.

Opening the door of the virtual chamber, he sat up, turned his head, and saw that Dan Taixuan had just walked out of the virtual chamber.

“You didn’t return to the city?” Dan Taixuan frowned when she saw him.

“Hahaha, it was a bit too far away. It was too late to go back.” Wang Teng remembered her advice and scratched his head in embarrassment.

“Looks like you had too much fun killing star beasts,” Dan Taixuan glanced at him and said.

“... You got it.” Wang Teng was a little awkward. She didn’t have to expose him.

“How was it?” Dan Taixuan couldn’t help but ask him when she saw him like this.

“It was okay. My strength did improve a little.” Wang Teng thought about it and didn’t feel that there was anything wrong. Improving his ice Force from the 7-star soldier level to the 9-star soldier level was a small improvement for him for his current strength!

“In such a short period of time, you actually improved,” Dan Taixuan said in surprise.

“I’m just lucky.” Wang Teng laughed. “...” Dan Taixuan didn’t know what to say anymore.

Many people entered virtual reality to fight, mainly to improve their strength. However, it took a lot of time.

ev

But this was the first time that Wang Teng had entered virtual reality, and within ten hours, he actually managed to improve. He made it hard for people to live.

Was that what you call a monster?

Even with Dan Taixuan’s talents, she was hit hard.

If she knew what exactly the small improvement was, her reaction wouldn’t be this small. She would be in hysteria.

Dan Taixuan shook her head and didn’t say anything on the topic. She reminded, “Whenever you leave virtual reality, even if you don’t return to the city, you should find a safe place to stay. Otherwise, the next time you enter, you might face a star beast and get killed immediately. Your spirit will take a hit. Someone encountered that situation before, and it took him a long time to recover.”

Wang Teng realized what Dan Taixuan meant when she kept reminding him to return to the city. That was the reason.

Virtual reality was really too advanced. The secrets that it contained could only be unearthed by humans after a long period of exploration.

However, for a newbie like him, he still needed to listen to the seniors' advice. Otherwise, he would have to suffer losses from his inexperience.

"Alright. I'll take note of it next time." Wang Teng nodded solemnly. "Are you coming tomorrow?"

Dan Taixuan's expression softened when she saw Wang Teng taking her advice. "Of course. I came all the way down to Capital Xia. How could I pass up such an opportunity? Fighting star beasts, in reality, would take up too much time, even more so if we are injured. Whereas for virtual reality, as long as we don't get killed, even heavy injuries wouldn't have any great impact on our real bodies. At most, we would only get a little weak. We can recover after a while."

"Let's come back tomorrow." Wang Teng nodded. After agreeing to meet again, they each went back to rest.
