

## **Martial Arts 871**

### **Chapter 871: Let's Make A Tornado Series In The Future!**

At the bottom of the sea, a gigantic ape was standing in the middle of a sea trench. It was the ruler of the sea and the king among all the powerful sea beasts. On this entire planet, it was at the forefront of evolution. None of the humans was its match.

However, at this moment, its huge eyes were filled with seriousness. It was staring intently at the incomparably tiny human figure ahead of it.

A ray of gold light traveled towards it at lightning speed. It cut through the sea, ignoring the strong pressure thousands of meters below the sea level, and shot toward Windstorm Giant Ape as though there was no resistance.

When the golden light was about ten meters away from it, the pupils of the Windstorm Giant Ape constricted furiously.

Roar!

It gave an earth-shaking roar. The soundwaves forced away the seawater around it. A long rod appeared in its hand, and it swung it out viciously.

There were purple sparks of lightning flickering on the long rod. It struck down like a huge bolt of lightning.

Boom!

The golden ray of light collided with the purple bolt of lightning.

The seawater was pushed outwards strongly. An empty area was formed with the two martial warriors in the center.

The seawater formed a terrifying undercurrent at the bottom of the sea. It tore down everything in its path. The sand and mud that had remained stationary under the sea for millions of years were swept into the current.

Fortunately, there were no other living creatures in this depth of the sea. The powerful undercurrents were strong enough to mutilate a lord-level star beast.

Wang Teng stared at the scene quietly with a calm expression.

After some time, peace resumed at the bottom of the sea, revealing the gigantic body of the Windstorm Giant Ape in the trench.

It stood there motionlessly. The long rod in its hands had broken into two.

Suddenly, the stench of blood floated over. A bloody flower blossomed silently on the forehead of the Windstorm Giant Ape.

Swoosh!

A beam of gold light pierced through the back of its head and made a u-turn in the seawater before returning to Wang Teng. It twirled around Windstorm Giant Ape like a loyal guard committed to its duty of protecting its master.

Wang Teng glanced at the spinning Golden Crescent Blade. There were no signs of blood on its sharp and smooth blade. It was so clean as if it was washed.

“This is good!” A tinge of astonishment floated into Wang Teng’s eyes.

“Hmph, of course.” Round Ball’s unhappy voice appeared in his mind.

Pretending not to hear it, he glanced at the Windstorm Giant Ape below and saw many attribute bubbles floating around its body.

The king of sea beasts that caused Donghai to fall into desperation had been easily killed by Wang Teng.

He remained composed. The Windstorm Giant Ape did cause him much trouble in the past. If he hadn’t used the ultimate move, Space Tornado, he wouldn’t have been able to force it to back down.

If he didn’t stop the Windstorm Giant Ape, it might have massacred the entire city, sparing no one.

But now, Wang Teng had already gone through many things. He even killed a few planetary-stage martial warriors, so he was no longer afraid of this Windstorm Giant Ape that hadn’t reached the emperor level. He didn’t even think much about it.

He killed the Windstorm Giant Ape to get rid of future trouble for the human race.

Wang Teng glanced at the attribute bubbles below and picked them up.

Ultimate Stage Lightning Talent\*3200

Ultimate Stage Wind Talent\*2800

Ultimate Stage Water Talent\*3500

Lightning Force\*6500

Constellation Force (Lightning)\*1000

Wind Force\*6300

Constellation Force (Wind)\*800

Water Force\*7000

Constellation Force (Water)\*1500

Lightning Tornado\*300

Blank Attribute\*25000

...

Wang Teng widened his eyes in shock when these attribute bubbles merged into his body.

What the f\*\*k!

He couldn't help but curse.

This Windstorm Giant Ape dropped amazing loot!

Wang Teng was stunned. He didn't expect the Windstorm Giant Ape to give him such a large amount of attributes.

He sensed the ability of the Windstorm Giant Ape and knew that it hadn't reached the emperor level, which was comparable to the planetary stage for humans. Yet the attribute bubbles it dropped were as good as the ones planetary-stage martial warriors had.

He had to admit that the Windstorm Giant Ape was blessed by nature.

It possessed three different talents, wind, lightning, and water, and all three had reached the ultimate stage. Wang Teng gained 3200 points of ultimate stage lightning talent, 2800 points of ultimate stage wind talent, and 3500 points of ultimate stage water talent from it directly.

These three attribute bubbles entered his body and pushed his talents up.

Before the addition, all three talents hadn't reached the emperor level. Now, with the help of this windfall, all of them achieved a breakthrough.

Emperor-Level Water Talent: 80/10000

Emperor-Level Wind Talent: 15/10000

Emperor-Level Lightning Talent: 25/10000

Wang Teng felt extremely lucky when he saw the change on his attributes panel. The wind and lightning talent just barely managed to advance to the emperor level.

If the Windstorm Giant Ape had dropped slightly lesser attributes, his talents wouldn't have advanced.

1

Mind you, lightning and wind were special mutated elements. It was hard to find someone who possessed them, so improving these two talents was extremely hard. He was fortunate and managed to raise both to the emperor level. Wang Teng wouldn't need to worry about his talents not catching up with his ability for some time.

Besides the talents, the ape also dropped other amazing attributes like Forces. Besides ordinary Forces, there were constellation Forces too.

Wang Teng was surprised at the appearance of the constellation Forces.

The Windstorm Giant Ape didn't receive any legacy and managed to turn ordinary Force into constellation Force solely with its own effort and talent. This wasn't something an ordinary star beast could do.

He believed that if given enough time, the Windstorm Giant Ape would definitely reach the emperor level. At that time, it would be able to dominate the Earth with its three impressive talents.

Of course, that was before Wang Teng killed it.

The three Forces flowed through Wang Teng's body. The water Force entered the water star while the wind and lightning Forces entered the Force nucleus.

Wang Teng's wind and lightning Force were still at the 13-star general stage. Thus, they hadn't formed their respective Force stars.

There was another attribute bubble containing 25000 points of blank attributes. Wang Teng was satisfied with this number.

The last attribute bubble contained a special battle technique. It was the Lightning Tornado!

Wang Teng raised his eyebrows when he saw the name of the technique. There was some fate between him and tornado battle techniques.

Blade-Sword Tornado.

Lightning Tornado.

Space tornado.

He could make a tornado series in the future.

Wang Teng thought to himself silently. It would be quite interesting.

As the Lightning Tornado attribute bubble merged into his body, a huge shadow appeared in his mind. This was a giant ape. Wind Force was gushing around its body, creating a tornado. Lightning Force turned into terrifying bolts of lightning and merged into the tornado. The two of them mixed with each other and reached an intriguing equilibrium. Then, they released a frightening power.

After some time, Wang Teng opened his eyes. He was enlightened. A sharp green glow flashed in one of his eyes while a bolt of purple lightning blinked in his other. It was a mysterious sight.

"This lightning tornado is interesting," Wang Teng muttered to himself. He liked this skill.

The Lightning Tornado was definitely not as powerful as the Space Tornado, but it was still many times more powerful than an ordinary planetary-stage battle technique. It could be one of his trump cards!

The most important thing was, the Lightning Tornado was easier to execute compared to the Space Tornado. The strain on his body was smaller. When he executed the Space Tornado, his body needed to withstand the backlash of the power of space. His body would have been crippled after one execution if it wasn't strong enough.

But his body still suffered damage and his ability was impaired after executing the skill. If he met a powerful opponent at this moment, he would be in grave danger.

The Lightning Tornado was different. Wang Teng's physical body was able to resist the damage by the power of lightning and wind. He wouldn't be hurt when he executed this skill.

Overall, it was a good battle technique.

If Round Ball knew that Wang Teng marked the Lightning Tornado as a good battle technique, it would probably start educating him again.

In the universe, many powerful martial warriors would fight their way to snatch this battle technique.

Even eternal-stage martial warriors might get interested. After all, there was no stage restriction for this battle technique. If it was executed by an eternal-stage martial warrior, it could release eternal-stage power.

Such battle techniques were rare even in the universe.

After collecting all the attribute bubbles, Wang Teng glanced at the Windstorm Giant Ape and wondered what he should do with the corpse.

Round Ball's voice sounded in his mind. "Pass it to me. There's a star core and a star bone in the Windstorm Giant Ape's body. They're good materials for making a battle armor."

"Battle armor!" Wang Teng's eyes lit up.

"That's right. I'm going to make a battle armor made of star bones for you," Round Ball chuckled. It sounded excited.

"Are you going to make it personally?" Wang Teng pointed out.

"Why not? Come on, I was a famous grandmaster blacksmith back in the old days. It's a piece of cake for me to make battle armor for a planetary-stage martial warrior like you. You should feel honored," Round Ball said.

"You're a grandmaster blacksmith? You have my respect." Wang Teng rolled his eyes secretly, but he still remained polite.

"Hmph, I know you're a master blacksmith, but you're still a distance away from becoming a grandmaster. You can learn from me," Round Ball said proudly. It finally found something it was better at.

Wang Teng chuckled to himself. Round Ball didn't know that he could raise his secondary jobs' level by collecting attribute bubbles. He didn't need to learn.

He might be able to become a grandmaster after watching it a few times!

He would surprise it again!

Round Ball kept the corpse of the Windstorm Giant Ape. After that, Wang Teng left the deep sea and rushed back to Country Xia.

## **Chapter 872: Their Mentality Is A Little Weak!**

Country Xia, Donghai.

1/1/2011, 8 am.

1

The sun shone brightly, and the wind blew softly.

On this day, Donghai had become the center of the entire world. A few days ago, Country Xia's troops had entered Donghai and cordoned off the city. Outsiders coming to Donghai wouldn't be rejected, but they would need to undergo careful inspections. Anyone with fishy background would be banned from entering the city.

Even so, people flocked to Donghai.

All of this was done because Donghai was holding the Global Union Conference today!

The Global Union Conference!

This was an important conference that would affect the direction of this planet in the future.

A few days before the meeting, the news had already spread everywhere. The whole world knew about it. This would impact the future of the planet, so everyone was concerned. Hence, all the influential figures in the world and the business leaders came to visit Donghai.

Of course, not everyone was taking part in the Global Union Conference. The ones who came were the politicians who held great power and influence in their countries. They were the leaders of their nations.

Many battlecraft were landing on a vast plaza around a skyscraper.

This skyscraper was an iconic building after Donghai's reconstruction work. It was 360 meters tall, and there were many facilities inside, including exhibition halls, scriptures and battle techniques library, administrative halls...

The highest floor was where the conference would be held.

As the battlecraft landed, various heads of states started alighting. They entered the doors of the skyscraper under the protection of powerful martial warriors.

All the leaders of the nations had come. No one was absent.

A huge crowd gathered around the skyscraper. There was a big commotion.

"Oh my god, that's the chief commander and head of state of the White Eagle Nation!"

"The head of state of Country Boar is here too!"

"And the head of state of Country Star!"

...

The bystanders started counting the leaders of the various countries while chatting among themselves. A large number of martial warriors guarded the area, blocking the enthusiastic crowd.

Governor Jiang and General Chen were standing in the plaza. They felt emotional as they watched the leaders enter the skyscraper.

In the past, their positions were much higher than Wang Teng's. Now, he had the ability to gather the world leaders while they could only stand guard outside the building.

This...

They glanced at each other in silence.

On the highest floor of this skyscraper, the meeting room was lit up brightly with dazzling lights.

There was a huge round table in the middle of the room. The leaders were conversing warmly with one another. Leaders from all around the world had gathered in this room, disregarding all racial discrimination and segregation.

At 9 pm, the meeting started.

A beam of light lit up in the middle of the huge round table, creating a 3D screen. Everyone's attention was attracted by it. This was a map of the Earth!

"Everyone!" Wang Teng stood up from the host seat. The Leader of martial arts was sitting on his right and the commander and head of state of the White Eagle Nation was sitting on his left.

Everyone switched their gazes from the screen to the map as he spoke.

Wang Teng scanned the leaders. It was hard to tell his emotions through his expression. He opened his mouth and said, "I think everyone should know why I gathered all of you here today.

"Some time ago, aliens invaded our planet, and all the countries fell in their hands. We almost turned into the slaves of these invaders.

"This time, they came for a trial. They treated our planet as a trial ground and did whatever they wanted here.

"Everyone, I have only one question for you. Is this what you want?"

Wang Teng paused for a moment.

All the leaders found it unbearable to recall what had happened when they were in the hands of the alien candidates. There was anger and unwillingness on their faces.

To be able to become the head of the state, these leaders were able to control their emotions well. However, they couldn't suppress their anger when they remembered how the alien candidates treated them as slaves.

Wang Teng saw their response and continued, "Actually, our plight isn't too bad. They came for the trial, so they weren't planning to enslave our planet. In the universe, enslaving an entire planet is very common.

"There's a profession in the universe called slave merchants. They are merchants who deal with slave trading. It's a lucrative business!

"To the aliens, an underdeveloped planet is like an underdeveloped clan. They can enslave us and sell us like items without any worry."

Everyone glanced at one another. Their expressions turned stern.

“Slaves!”

“Turn an entire planet into slaves!”

This exceeded everyone’s imagination. They couldn’t believe what they had just heard.

Suddenly, Wang Teng pointed to the map in the middle of the round table. “I know you guys find it hard to believe, but this is the truth.

“Look!

“This is our planet, the Earth. It’s just an underdeveloped planet in the universe. Our Earth is one of the millions of life planets in the Milky Way, which is merely one of the nine galaxies in the Olant Federation.

“Oh right, the Olant Federation is the civilization the alien candidates came from.”

The screen started changing as Wang Teng spoke. It was zoomed out and other planets appeared. Soon, the entire solar system was displayed in front of everyone.

But this wasn’t the end. The map continued to zoom out until the solar system couldn’t be seen. Planets appeared one by one and formed the Milky Way.

The Milky Way then became smaller and the map of the boundless universe was shown.

This was the map of the territory of the Olant Federation.

Gasp!

The leaders were astounded, sucking in a breath of air in surprise. They never knew before, but after comparing, they realized how small and insignificant the Earth was and how frighteningly big the Olant Federation was.

It controlled nine galaxies and there were tens of thousands of life planets in each galaxy.

The earth was nothing compared to it.

Wang Teng didn’t expand the map further. He was afraid of scaring them. The Olant Federation was just a low-tier civilization. There was the middle-tier civilization and the high-tier civilization too.

Actually, the Olant Federation was just a small figure too.

Wang Teng’s tone was serious. “Do you realize how insignificant Earth is now?”

“Let’s talk about the different martial arts stages in the universe.

“In the universe, the planetary stage is just the beginning of their martial arts path. It’s similar to our martial disciples. We can only run some errands and dig some mines...”

Another image appeared beside the map. It depicted a scene of a race that looked like chimpanzees digging a mine. The people in this race had great strength. They wielded the iron hammers with immense force.

1

They were planetary-stage martial warriors but they were... digging a mine.

Round Ball had sent Wang Teng this outline of the universe. He showed it to everyone to increase his credibility.

As expected, all the leaders were too shocked to speak.

Silence!

Dead silence.

The planetary-stage martial warriors that could dominate their planet could only dig mines in the universe?

They found it incredible and unbelievable.

Someone swallowed a mouth of saliva. It sounded exceptionally conspicuous in the deadly silent meeting room.

“So if someone laid their eyes on our planet, they can just send a celestial-stage martial warrior, and we won’t be able to resist at all.”

“Mr. Wang Teng, please stop speaking.” The head of state of the White Eagle Nation wiped the cold sweat off his forehead. Unknowingly, his back was drenched. He looked at Wang Teng with a bitter smile.

Wang Teng was stunned. Was he so scared?

He raised his head and looked at the other leaders. Their faces were as pale as the leader of the White Eagle Nation. All of them were white and scared stiff.

“Erm...” Wang Teng felt a little awkward. He felt that he had restrained himself, but these people still got frightened.

*Their mentality is a little weak!*

Wang Teng complained in his heart.

### **Chapter 873: Operation Wandering Earth!**

The meeting room suddenly fell into an awkward atmosphere.

Wang Teng felt bad. He only wanted every country to know the gravity of the matter so that they could put away their differences and work together to form a global union to face the next major challenge.

However, he didn’t expect that they would be left too shocked and scared!

This was understandable though. After all, the people here had never left Earth and had no idea of the harsh reality of the universe. It was like how people who had lived their lives in the villages visited the

city for the first time. They would be clueless about the difficulties of surviving in the urban environment.

When they heard about these things, they would definitely panic.

It was just like when Wang Teng first heard about these things. He wasn't much better off.

"Cough, I believe everyone understands better than me why I'm telling you about this." Wang Teng cleared his throat.

"Mister Wang Teng!" The leader of the White Eagle Nation stood up, looked around, and said, "We understand what you mean. People from the White Eagle Nation came over to Country Xia today and have already let go of all our differences. The White Eagle Nation is the first to agree to the formation of a Global Union!"

Everyone's gaze fell onto the leader of the White Eagle Nation. No one would have imagined that the leader of a dominant country would be the first to agree without any hesitation and so simply!

The leaders of the other countries followed suit.

"On behalf of Country Xia, I agree to the formation of the Global Union!" the Leader of martial arts stood up and said lightly.

He was standing beside Wang Teng, which already showed that he firmly supported him.

"On behalf of Country Boar, I agree to the formation of the Global Union!" The leader of Country Boar was a strong white man with a firm thick voice.

"On behalf of the Alliance, I agree to the formation of the Global Union!" The old white leader of the Alliance smiled.

"On behalf of the Afel Continent, I agree to the formation of the Global Union!"

"On behalf of Country Bat, I agree to the formation of the Global Union!"

"On behalf of Country Inka, I agree to the formation of the Global Union!"

...

The representatives of every country stood up. Although their expressions were different, you could see a trace of resolve and seriousness in their eyes!

At this moment, at an important point in history, they had made a decision that would completely change the future of Earth!

And this moment was destined to be recorded in the annals of history!

"Great!" There was a glimmer in Wang Teng's eyes. "Next, in order to deal with the coming challenges, I have two plans which I will now discuss with everyone!"

Everyone sat down silently, and their eyes focused on Wang Teng again.

“This first plan is for me to head out to the universe and become a legal citizen. I’ll register Earth and become its leader!

“As for the second plan...”

Wang Teng suddenly paused.

“Please wait a moment, Mister Wang Teng, I have a question.” The White Eagle Nation’s leader, Chorio, interrupted Wang Teng.

“Please speak, Mister Chorio.” Wang Teng sat down and gestured.

“Based on what you have said previously, the galaxy that we are in should belong to the Olant Federation. So, it should be easy for us to become a member of the Olant Federation.” Chorio frowned. He suddenly realized that the plan that Wang Teng had described was somewhat inconsistent with what he had illustrated previously.

“No, even though we are a part of Olant Federation’s territory, Earth is an undiscovered and undeveloped planet. To the Olant Federation, we are probably the lowest lifeform, and we’ll not be treated fairly. I believe you saw the candidates’ attitude toward us.” Wang Teng shook his head.

Everyone was enlightened.

“How do we get the citizenship and establish the sovereignty of Earth? I’m afraid that this plan is not that easy to accomplish.” Chorio probed.

“Indeed. The universe highly values strength and status. Earth has neither. For us to obtain sovereignty is equivalent to a fool’s dream. It wouldn’t take long for us to be devoured by others,” Wang Teng said. “That’s why we have to become stronger as soon as possible and gain a certain status.”

“The Olant Federation already knows about Earth’s existence. Will we have enough time?” the Alliance’s leader asked worriedly.

“There’s not much time, but I have a plan,” Wang Teng replied.

“What plan?” everyone asked hurriedly.

“I obtained an inheritance that belongs to a high-tier civilization in the universe. If I can successfully inherit that, I’ll have a very high status, and Earth would be free of worries,” Wang Teng explained.

“Inheritance?”

“High-tier civilization?!”

When everyone heard this, they were both puzzled and surprised.

“That’s right, a high-tier civilization!” Wang Teng nodded and decided to explain further, “In the universe, civilizations are categorized into low, medium, and high tiers. In reality, the Olant Federation is just a low-tier civilization.”

“Erm...”

Everyone was too shocked to speak.

The powerful Olant Federation was just a low-tier civilization!

This was unbelievable!

Everyone was dripping with sweat and felt chills all over their bodies!

“Mister Wang Teng. I would like to ask just how powerful high-tier civilizations are?” Chorio found it hard to swallow his saliva. The other country leaders all looked over as well, full of curiosity.

“I don’t think you want to know.” Wang Teng cautioned.

In the end, he didn’t explain how strong the high-tier civilizations were, but everyone understood. The meeting room fell into dead silence again.

“Then, Mister Wang Teng, is the inheritance reliable enough?” Chorio asked.

He was very envious. Wang Teng managed to obtain the inheritance of a high-tier civilization. What an opportunity!

“Reliable!” Wang Teng nodded. “However, there is a great risk. I’m afraid someone would not let me do as I wish.”

Everyone was shocked.

Wang Teng’s words implied too many things.

Someone refused to let Wang Teng have the inheritance?

Who was that?

The leaders present were all smart people. They quickly understood the crux of the issue.

He would face resistance from either the Olant Federation or the high-tier civilization where the inheritance was from. But no matter which one it was, it was still an insurmountable and terrifying existence to them.

“That is why I have a second plan.” Wang Teng looked at everyone’s expression and proposed.

“What is it?” Country Boar’s leader asked anxiously.

“Operation Wandering Earth!” Wang Teng’s words stunned everyone.

“Operation Wandering Earth!” They couldn’t help but repeat it, feeling astounded.

Unless...

“Just as you imagined, under drastic circumstances, I plan to let Earth wander the universe and head toward a place out of the Olant Federation’s reach, avoiding all our enemies,” Wang Teng said solemnly.

To be honest, if the circumstances were not drastic enough, he wouldn’t be willing to do that. After all, the solar system was where the Earth originated from. This was their homeland!

A foreign land couldn’t accommodate one’s body or soul!

No one would be willing to be displaced and live in a foreign galaxy. One day when they were old, they could only tell their children that this was not their homeland!

How tragic!

Everyone was dead silent.

It wasn't only just people from Country Xia. People from other countries were reluctant to leave the solar system and drift around in the vast universe.

It was too cruel!

Moreover, the universe was filled with danger. Even if they wandered around, they might encounter unknown threats. If they were not careful, Earth could face destruction.

"Mister Wang Teng, isn't Operation Wandering Earth a bit too hasty?" Chorio asked cautiously.

"I won't do it unless either there's an absolute need for it." Wang Teng nodded.

Now that Wang Teng had said that, everyone had nothing else to say. If everyone was at their wit's end, saying anything else would be useless.

Death awaited them if they did not wander!

"Then, how would we go about the task? I'm afraid it's difficult to move an entire planet." Chorio smiled bitterly.

"Space Shift Array!" Wang Teng said slowly.

"Space Shift Array!" The crowd was stunned for a moment before coming to a sudden realization.

With the power of arrays, it was indeed possible to achieve this goal.

"I'll set up the array that covers the entire planet and then head toward the space coordinates of a foreign place. If it doesn't work, we'll directly move the Earth to that place," Wang Teng explained.

An array that covered the entire planet!

Everyone took a deep breath and looked at Wang Teng with astonishment. He was courageous and masterful!

Had his rune mastery already reached such a level?

That was really unimaginable.

"If that's the case, I have no doubts," Chorio pondered for a moment and said.

The other leaders also nodded in agreement. After all, they had no better way. Everything depended on Wang Teng!

"After the Global Union is established, I'll disclose the planetary-stage scriptures of the five elements!" Wang Teng changed the topic and presented them with another bomb.

Since the Global Union was going to be established, there was no point hiding it any longer. Otherwise, the combat power of Earth would remain at the planetary disciple stage. They wouldn't be able to stand up against others.

Earth's survivability could only increase when its combat power rose.

This was the only way!

When everyone heard this, they were both surprised and overjoyed.

The purpose of forming a global union was to get past the bad blood and tide over challenges together. Wang Teng had undoubtedly accepted them. Otherwise, he wouldn't have given them these benefits!

### **Chapter 874: Set Sail Alone!**

The Global Union Conference lasted all the way until late afternoon. After discussing the details, the leaders of the various nations left Country Xia quickly to make arrangements in their countries.

The next day, all the leaders held press conferences one after another to explain the policies and details discussed during the Global Union Conference.

For instance, Wang Teng became the leader of Earth and Operation Wandering Earth.

Everyone on Earth soon knew about the brutal survival laws in the universe and that all hopes were on Wang Teng. They also learned that Wang Teng was going to make public the planetary-stage scriptures for the five basic elements to benefit mankind.

The entire world was in an uproar.

Everyone was grateful for Wang Teng's contribution. If one walked along the streets, he would be able to hear people singing praises of him. He had become an international idol and hero!

1

The entire world considered him the sole savior of Earth!

No one could talk bad about him. If not, the person would be condemned and looked down upon by everyone. It was hard to imagine that there would be such hero worshipping in modern society.

But this was the reality!

Wang Teng's reputation reached an unprecedented height.

The guy in question didn't participate in this process. He left them to the different heads of states.

The policies proceeded in full swing.

As for Wang Teng, he started to create the Space Shift Array. He gathered all the runemasters on earth for this purpose. A large amount of manpower and resources were needed to create an array that covered the entire planet.

This Space Shift Array also required a precious material.

Space stone!

Space stones were the main material for forging space rings and other space items. They were also essential in creating space arrays.

Wang Teng didn't have a better solution, so he asked the martial warriors from around the world to collect space items and remove the space stone stones from them.

Above the earth's equator, Wang Teng floated in mid-air and spoke to the bunch of runemasters, "Are you guys clear about the task I assigned to you?"

"Understood!"

"Don't worry, Master Wang!"

"Yes, we won't disappoint you!"

...

The runemasters were all 40 years old and above, but they were fighting to perform well in front of Wang Teng. All of them replied to him loudly.

"Very good. Time is tight. Let's start immediately," Wang Teng said sternly.

The group of runemasters immediately left in their battlecraft and headed to the area they were in charge of. Very soon, Wang Teng was the only one left behind. Round Ball's voice appeared in his mind.

"Getting space stone stones out from space items is a good idea. How did you come up with it?"

"This is the best method I can think of." Wang Teng paused for a moment before saying, "Round Ball, thank you."

Round Ball was the one who came up with the idea of registering Earth and Operation Wandering Earth. It also provided coordinates of the foreign space and the Space Shift Array. Wang Teng had never left his home planet, so he didn't know anything.

"Now you know my power." Round Ball chuckled delightedly.

"Alright, you're amazing!" Wang Teng was caught between laughter and tears.

Round Ball was overjoyed. However, it changed its tone and said sternly, "But you should settle your issues on Earth quickly and leave this planet. The Saint Star Pagoda will discover the strange happenings here very soon and send someone to investigate."

"The Saint Star Pagoda is approximately 850 thousand light years away from here. They will need around two months to reach Earth even if they use a cosmos-level spacecraft to travel through the universe."

"Two months?" Wang Teng's eyes shimmered. "I remember you telling me that we only need 36 days to reach the Great Qian Empire."

"That's right. Master Nangong came here once, so we have the shortest route recorded in our logs. We'll be able to save time if we cross through a few wormholes. The E63 spacecraft has better features

than normal cosmos-level spacecraft too. If not, we won't be able to reach the Great Qian Planet so quickly. It's far away after all," Round Ball explained.

"That's good. I'll complete the array as soon as I can." Wang Teng nodded.

"As long as you have a plan, everything will be fine." Round Ball stopped speaking. The repair of the QY-E63 spacecraft had almost come to an end.

Time passed slowly.

Five days later, the Space Shift Array was completed.

In the middle of the night, a dazzling layer of light covered the entire planet as if it was protected by a mysterious shield. However, only a few people saw this magnificent scene.

The next day, in Donghai, the leaders from around the world gathered again. There was a huge spacecraft floating above the skyscraper. Below the building, Wang Teng was bidding farewell to his family.

"Son, do you have to leave?" Li Xiumei held Wang Teng's hand. She didn't want to let go.

He wasn't going to another part of the country or overseas this time. He wasn't going to the Xingwu Continent either. He was heading into the vast universe.

Alone.

As his mother, Li Xiumei didn't feel at ease letting him leave.

"Mom!" Wang Teng called her softly. He couldn't bear to see her like this.

"Alright, let him go. Our son is the hero of mankind. He's leaving for the sake of the entire human race. We should be proud of him." Wang Shengguo pulled Li Xiumei into his arms and consoled her gently.

"I don't care if he's a hero. He's just my son," Li Xiumei replied with tears in her eyes.

"Mom, don't worry. Your son will never do things he isn't confident in. These difficulties won't stop me. It's just a universe. I'll take a little tour and come back safely in three months," Wang Teng replied lightheartedly.

Biluo rolled her eyes when she heard his words.

He sounded extremely arrogant!

The universe was vast and mysterious. Even cosmos-stage martial warriors didn't dare to face the universe with a casual attitude. Yet this guy said that it was "just a universe." He who knows not fears not.

Of course, she knew that he wanted to comfort his mother. But when she looked at his expression, she felt that he meant what he said. He wasn't worried about the dangers in the universe at all.

Wang Teng bade farewell to the rest of the leaders.

"Be careful."

“We’ll leave the rest to you.”

“Mister Wang Teng, have a safe trip.”

“Mister Wang Teng, we’ll wait for you to return with good news!”

...

The heads of states came forward and shook Wang Teng’s hand. Their handshakes were firm and their gazes were resolute as they looked at him. They seemed to be carving this extremely young hero deep into their minds.

No one cared about their race at this moment. All of them only had one identity in their minds. They were an Earthling!

The Earth was a united planet!

Wang Teng glanced around him. He paused for a few seconds when he saw his family and then shifted his gaze to Lin Chuhan. He looked at her intently with guilt in his eyes.

“I’ll wait for you to come back,” Lin Chuhan moved her lips and whispered.

Wang Teng nodded. He moved his feet and rose into the air slowly. Then, he turned and stepped into the spacecraft.

“Everyone, I’m leaving.” His voice echoed in the air with a hint of light-heartedness.

The cabin door closed, and the spacecraft rose into the air swiftly. It turned into a beam of light, vanishing in front of everyone. It left with the hope of the whole Earth.

“Take care of yourself!”

The leaders and the people close to Wang Teng raised their heads and prayed for him silently.

Ye Jixin stood on the roof of the Jixin Martial House in Donghai and stared at the ray of light with complex feelings. In the end, all his emotions compressed into two words, Take care!”

...

In another villa in Donghai No. 1 High School, Xu Jie, Yu Hao, and Bai Wei sat in the courtyard with a table full of wine. They were laughing and crying as they lifted their cups and offered a toast to the sky.

“Our best friend is leaving. He’s leaving with everyone’s hope.”

“Oh my god, we’re so useless. We can’t offer any help.”

“Brother Teng, take care.”

...

Dan Taixuan stood on the roof of a tall building in the Huanghai Military Academy with a bottle of wine in her hand. She took a large gulp. She didn’t send Wang Teng off, but she was also staring at the spacecraft that had flown away at the speed of light.

“Little brat, come back alive!” A soft voice floated in the air. Dan Taixuan had already disappeared.

On the field in Huanghai Military Academy, Peng Yuanshan and Tong Hu led a bunch of students and saluted the spacecraft.

“Everyone, send your senior off!” Peng Yuanshan said with red eyes.

“Yes!”

The group of military students shouted in unison with admiration in their eyes. Their voices soared through the clouds.

“Senior, we pray for your victory!”

### **Chapter 875: Hyperspace Travel!**

The universe, vast and boundless!

In the darkness, there were faint spots of light. Suddenly, a huge flying saucer-shaped spacecraft flew from a distance and went away, disappearing from everyone’s eyes.

In the central control room of the QY-E63 spacecraft.

The main control room was where the great hall was. The corpses inside had been cleared, and the bodies of Argus, Kathu, and the other alien candidates had been moved elsewhere.

Wang Teng sat on the main seat. Round Ball’s figure emerged, and he said with a smile, “Wang Teng, the spacecraft is accelerating now. It will reach the speed of light in about half an hour and proceed with hyperspace travel!”

“Another half an hour? That’s slow!” Wang Teng frowned.

“Slow?” Round Ball complained, “The QY-E63 spacecraft is already quite good. If this were an ordinary spacecraft, it would be much slower. The spacecraft from Olant Federation might be gorgeous, but they are far worse than QY-E63.

“When those low-class spacecraft accelerate, if the acceleration is too great, the passengers will enter the sleeping cabin or they might lose their lives.”

“Acceleration!” Wang Teng was stunned.

When accelerating, the gravitational force within the spacecraft would change. Nearing the speed of light, the changes in the gravitational force would be drastic and might even reach tens of thousands of times the gravity of Earth.

Even planetary-stage martial warriors would not be able to withstand such a terrifying gravitational force and collapse.

At the same time, he also thought about the Mick-3957 spacecraft that he had stored in his Space Fragment. It was the most ordinary spacecraft. When traveling in space, Plato beings would have to enter their sleeping cabins.

Now that he was thinking about it, the Plato beings were a bunch of nobodies!

Wang Teng couldn't help but feel a sense of superiority. He was now a rich man!

The Mick-3957 spacecraft had been dismantled by Round Ball and the Plato beings were still in deep sleep. He had yet to release them.

"Our QY-E63 has an automatic gravity adjustment system, and the outer walls are also engraved with a large number of anti-gravity runes. That's why you feel the same as if it was Earth without any discomfort," Round Ball continued.

"No wonder!" Wang Teng was stunned for a moment before understanding why.

He was walking in the spacecraft as though he was on Earth. His feet were on the ground. When watching space movies in the past, the astronauts would not be walking normally, and they were all in a state of weightlessness. Any movement was extremely inconvenient.

Now it seemed that the spacecraft was really impressive!

"So don't underestimate this QY-E63 spacecraft," Round Ball said with an angry voice.

"Hahaha, I didn't know about all these!" Wang Teng laughed nonchalantly.

"Ignorance isn't bliss!" Round Ball said with contempt and changed the subject, "It's your first space voyage. Do you want to see what's going on outside?"

"Of course." Wang Teng nodded.

"Activate panoramic simulation mode!" Round Ball ordered.

Suddenly, everything around him changed. His surroundings disappeared and turned into a vast starry sky.

Wang Teng stood up from his seat, and the seat gradually vanished as well. At this moment, it was like he was in space itself.

"High-tech!" Wang Teng exclaimed and turned around. The blue planet was slowly getting smaller before it also faded away from his sight.

Before he knew it, he had already left the solar system and was headed to an unknown space!

Such a lonely environment would naturally make people feel fatigued. Even a divine spirit master like Wang Teng would not be able to hold on for long.

Back then when he was trapped in the dimensional rift for half a year, he was on the verge of breaking down. It was clear how terrifying a void like that was.

"Round Ball, cancel the panorama simulation," Wang Teng said after a while.

"Okay."

The surroundings changed and reverted back to normal.

"Wang Teng, that Biluo is here," it suddenly said.

While leaving Earth, Wang Teng took her along as he wouldn't leave her there.

“I’ll go and take a look.” Wang Teng walked out of the central control room and met Biluo, who was walking from the passage. “What’s the matter?”

“You said you will let me go when you leave Earth.” Biluo went straight to the point.

Wang Teng hesitated for a while. It wasn’t because of other reasons. He was just worried that if she left, she would reveal information about him.

“Let her go.” Round Ball’s voice sounded in Wang Teng’s mind. “Even if you don’t, someone from the Saint Star Pagoda will go to Earth soon to look for answers.”

“Having her here would at least give us some time.” Wang Teng’s eyes flashed.

“It’s no use. The Saint Star Pagoda are aware of the death of two celestial-stage martial warriors.” Round Ball argued.

“They already know this?” Wang Teng’s face turned black. “Why didn’t you say anything earlier?”

“What’s the use of talking about it? If your worries are not resolved, would you leave Earth just like this?” Round Ball retorted.

Wang Teng was speechless. He then said with a gloomy face, “No, my parents and my family are back there. I have to go back and take them away.”

“Don’t be naive. With their strength, bringing them to wander the universe would probably lead to death instead,” Round Ball said mercilessly.

“You!” Wang Teng was enraged, but he had to admit that Round Ball was right.

The universe was too dangerous. He couldn’t even take care of himself now, much less bring his family along to wander the universe.

Biluo saw that Wang Teng wasn’t responding. She thought that he was about to go back on his word and got nervous.

This guy wouldn’t have any bad thoughts, would he?

Otherwise, why wouldn’t he kill her or let her go? What was all this for?

“You can go,” Wang Teng finally spoke.

“Wang Teng, I have a fiance. It is impossible for us to be together. I—” Biluo was a little nervous and couldn’t help but clutch her chest as she took a step back. The words in her heart blurted out, but she was stunned in the middle of it. “Wait, I can go?”

Wang Teng had a strange expression. “I suddenly don’t want you to leave anymore. You have a fiance, right? I love challenges. I’ve decided to keep you here to help warm my bed!”

1

Biluo’s face turned dark. “Can you not joke around?”

“Alright, leave quickly before I change my mind.” Wang Teng waved his hand.

Biluo heaved a sigh of relief. She was about to turn and leave when she suddenly stopped and said, “I know what you are worried about. You wouldn’t be able to gain autonomous control of Earth just by walking into the Olant Federation. Olant Federation will intervene, and many factions will come for Earth. After all, an unowned planet is too valuable.

“Don’t worry, I won’t reveal any information about you when I get back.

“I’ll try my best to delay them. At the very least, I’ll keep you Earthlings from being enslaved.”

She was sincere and really wanted to help Wang Teng.

“Many thanks!” Wang Teng was slightly stunned for a moment. He then chuckled. “But there are some things that you don’t know. I’m afraid that it will be difficult to help.”

If Biluo knew that he had killed two Saint Star Pagoda celestial-stage instructors and that the two sides were in a feud, she wouldn’t say something like this.

After all, Saint Star Pagoda’s influence in the Olant Federation was too huge. Most of the powerful warriors were from the Saint Star Pagoda.

Biluo’s family was one of the three great families of the Emerald Abyss Galaxy. However, it was still small compared to the Saint Star Pagoda.

When Biluo heard his words, she froze for a moment. Her thoughts were racing as she didn’t think that he was trying to scare her.

There must be something that she didn’t know about.

“Best of luck!” Biluo looked at Wang Teng and left her words. She then headed to the back of the spacecraft where her spacecraft was docked.

Wang Teng watched her board her spacecraft when a woman appeared beside Biluo. He was a little surprised.

“Alais!”

She was the goddess of Mount Saint, Alais!

“Alais’s talent for light is good. I’ve decided to take her away from Earth. Her talent will only flourish to its maximum potential in the universe,” Biluo explained.

Wang Teng nodded and looked at Alais. “I didn’t expect that we would meet again in such a situation. The universe is dangerous. Take care!”

Alais’s eyes swept across Wang Teng’s face as if she was trying to engrave his features in her heart. She then said softly, “You too. We’ll see each other again!”

The rear hatch of the QY-E63 spacecraft opened. Biluo’s spacecraft left and flew in the other direction.

Wang Teng stood by the window as he watched them leave.

This was good!

Biluo took Alais away. Even if he failed, there will still be someone from Earth who would have a chance to rise.

“These two women are talented!” Round Ball said, “If all goes well, they might even reach the cosmos stage.”

“Oh, you’re rating them so highly?” Wang Teng was surprised.

“Actually, the cosmos stage is not too strong in the universe.” Round Ball lamented, “See, Master Nangong also fell.”

Wang Teng nodded and agreed with Round Ball. However, he wasn’t worried about himself as the cosmos stage was definitely not the end goal for him.

“Wang Teng, the spacecraft is about to reach the speed of light!” Round Ball’s voice suddenly became serious.

A gleam of light flashed in Wang Teng’s eyes as he nodded.

A few moments later.

“Begin the countdown!”

“10!”

“9!”

“8!”

“7!”

Wang Teng looked at the view outside the window. He could no longer see anything else. The planets and meteorites were blurred, and there was only darkness. He clearly felt the surrounding space had begun to sway.

“6, 5, 4, 3... 2... 1!”

As the countdown ended, the blurred QY-E63 spacecraft suddenly disappeared into the universe.

Hyperspace travel, activated!

## **Chapter 876: Wings Of Wind And Lightning! (1)**

Boom!

Wang Teng felt the spacecraft trembling. The vibrations lasted for more than ten seconds before they stopped.

The surroundings were pitch-black. There was no light at all.

“Hyperspace travel success. This is the Dark Universe,” Round Ball appeared beside Wang Teng and said as it looked at the scene outside.

“Dark Universe? Aren’t we... inside a dimensional rift?” Wang Teng hesitated when he saw the familiar scene.

“Inside a dimensional rift? Well, that’s not wrong.” Round Ball touched its chin and nodded.

“I came here before,” Wang Teng said.

“What? You came here before?” Round Ball was shocked. It stared at Wang Teng in astonishment and asked instantly, “How did you come here? You won’t be able to enter the Dark Universe if you don’t exceed the speed of light. Wait, you possess space talent. Could it be...”

“I escaped from the Darkland with the help of a dimensional rift the dark apparitions were constructing. I blew the dimensional rift only to realize that it was only halfway through construction. I was dumbfounded,” Wang Teng shrugged and replied in a helpless tone.

Round Ball was stunned. Then, it burst out laughing.

“Is it funny?” Wang Teng was speechless.

“You idiot. You ran into someone else’s dimensional rift and even blew it up. Weren’t you afraid of getting implicated?” Round Ball said in disdain.

“You don’t understand how dangerous the situation was. Would I blow it up if I had other choices?” Wang Teng retorted.

“Why were you in the Darkland?” Round Ball asked curiously.

Wang Teng explained briefly how he was thrown into the Darkland. Round Ball was flabbergasted, lamenting, “Your experiences are really interesting. You have already been through so many things even before you reached the planetary stage. It’s a miracle you didn’t die.”

“Do you think I want to? I don’t have a choice.” Wang Teng rolled his eyes. For some reason, he felt that this little fellow was gloating.

“Haha.” Round Ball covered its mouth and chuckled. Suddenly, it turned serious and said, “But you’re really lucky to be able to escape from the Dark Universe. This must be related to your space talent, right?”

“Yes. I found the coordinates of Earth through my connection with my spiritual pet. Then, I used the space array to reconstruct a tunnel to go back,” Wang Teng nodded and said.

“Space talent is indeed heaven-defying. Ordinary martial warriors would have died in the Dark Universe.”

“Round Ball, how much do you know about the Dark Universe?” Wang Teng asked.

“Not much. The Dark Universe is extremely mysterious. A martial warrior can only travel through the Dark Universe on a spacecraft unless he’s able to exceed the speed of light. Or he has to possess space talent like you. Actually, even if you are able to travel in the Dark Universe, you can’t explore it on a large scale. Thus, the Dark Universe has always been a mystery to us.”

“Is it?” Wang Teng felt a little disappointed. He wanted to get more information about the Dark Universe from Round Ball, but it didn’t know much either.

Round Ball felt frustrated when it saw his expression. It didn’t know what to say, so it could only swallow its exasperation.

“Huh?” Wang Teng suddenly gasped softly.

“What is it?” Round Ball asked hurriedly.

“I think I sense a faint connection. What is it?” Wang Teng frowned. Although he pondered for a long time, he couldn’t find the answer.

1

“Connection?” Round Ball was puzzled too.

What could be connected to Wang Teng in this Dark Universe?

“Stop thinking about it. Follow me. I’m going to make the battle armor soon.” Round Ball interrupted his thoughts and floated out.

He was still contemplating, but he followed Round Ball.

They walked in the universe spacecraft. The spacecraft was huge, but there were numerous construction robots maintaining the spacecraft, so they didn’t need to worry.

After some time, they came to a spacious smithery studio. There was a large table in the middle of the room. All kinds of smithery equipment hung around the walls.

This was the first time Wang Teng had seen such a high-tech smithery studio. He glanced around curiously.

Round Ball smiled. It floated to the table and opened its palm. A star core and a crystal-clear star bone appeared on its palm.

“This is the star core and the star bone from the Windstorm Giant Ape. They contain three elements: wind, water, and lightning. They’re extremely rare. Even if you don’t possess the wind or lightning element, you can activate the runes on the battle armor to release a certain amount of wind and lightning attack. It’s extremely useful,” Round Ball explained. It didn’t know that Wang Teng also possessed the wind and lightning elements.

“Wait, I have these two elements,” Wang Teng said.

Round Ball was stunned. It turned to look at him and asked, “Are you kidding me?”

Wang Teng opened his palm. Two balls of Force appeared. One was green while the other was purple.

“What kind of monster are you?” Round Ball stared at him with wide eyes. It contemplated for some time before continuing, “You have the five basic elements, the space talent, and the wind and lightning element. Oh my god!

2

“There’s no one else in the universe with your talent!”

It looked at Wang Teng as if he was a monster. It couldn’t believe its eyes.

### **Chapter 877: Wings Of Wind And Lightning! (2)**

“Alright, you can continue,” Wang Teng said nonchalantly after flicking away the two balls of Forces.

Round Ball suddenly felt dispirited. However, its eyes lit up quickly, and it said, “Since you have wind and lightning Force, I can add the wings of wind and lightning to your battle armor!”

“Wings of wind and lightning?” Wang Teng was stunned.

“Yes, wings of wind and lightning.” Round Ball nodded. “With them, your speed can increase by two to three times.”

“That’s amazing!” Wang Teng exclaimed.

Looking at all the martial arts in the world, only speed could never be defeated.

If he could raise his speed by two to three times, he could kill opponents a few levels higher than him.

“The wings of wind and lightning is actually a battle technique. But it is too expensive. I’ve only seen it once, but I worked hard and managed to decipher the principle behind it. I then made runes to create wings of wind and lightning that can be engraved on battle armor. Although it isn’t as powerful as the battle technique, it’s an incredible item,” Round Ball said proudly.

Wang Teng gave it a thumbs up. Round Ball’s smithery mastery must be profound as it was able to create a weapon out of a battle technique.

“Hahaha, quick, didn’t you say that you have many star cores and star bones? Take them out. I can’t wait to start making the battle armor.” Round Ball got excited, and its eyes were sparkling. It urged Wang Teng to hurry.

Wang Teng smiled, shaking his head when he saw its expression. He took out all the star cores and star bones he had accumulated.

These were all 13-star and above star cores and star bones. He had sold the others.

“Not bad, not bad. These are all planetary disciple star cores and star bones, enough to make a planetary-level battle armor. With the help of the star core and star bone of the Windstorm Giant Ape, this battle armor can reach the peak of the planetary level.” Round Ball nodded in satisfaction.

“This is...” It suddenly gasped softly. Then, it jumped up and grabbed two star bones!

“Emperor-level star bones!

“Where did you get these emperor-level star bones? You have two of them!” Round Ball rushed toward Wang Teng and asked him excitedly.

“Erm... don’t get too excited. It’s just two emperor-level star bones,” Wang Teng said.

“Just?!” Round Ball’s tone went many pitches higher. It gave him a death glare and continued, “Are you trying to anger me to death?”

“Do you know how rare star bones are? Emperor-level star bones are even harder to find. If you put this up for auction, even cosmos-stage martial warriors will come and snatch it!”

“Really? Aren’t you exaggerating? Even cosmos-stage martial warriors will want it?” Wang Teng exclaimed in surprise.

“What do you think? You don’t know how lucky you are.” Round Ball glared at Wang Teng. Then, it sighed and said, “If Master Nangong had an emperor-level star bone for his cosmos-level battle armor, he wouldn’t have died.”

“You can make a cosmos-level battle armor with these two emperor-level star bones?” Wang Teng asked.

“Yes. However, we need some cosmos-level ores too. Let me take a look. Master Nangong has probably some leftovers. You can cultivate. We’re not making the battle armor today. I need to reorganize my plan.” Round Ball disappeared to look through its treasures.

Where were its treasures? Wang Teng didn’t know.

He shook his head helplessly when he saw the empty smithery studio.

But he was filled with anticipation too.

Cosmos-level battle armor!

It would be awesome if he had one for himself. Indeed, he should collect more treasures whenever he could. There were always surprises when the time was right.

Wang Teng thought to himself happily as he walked out of the smithery studio and headed to the cultivation room.

[The spacecraft silently traveled in the Dark Universe.](#)

A universe fleet was silently floating outside a wormhole in a part of the Milky Way.

A young man was sitting in the command room, leaning against a sofa and enjoying some wine. He was the commander of this fleet.

“I wonder why they sent me to guard this remote planetary sector. There’s no life planet here. This is a waste of my time!” the young man complained silently.

He had silver hair, and he looked like a human. However, there were three silver streaks on each side of his cheek. From his aura, he was a celestial-stage martial warrior.

“Sigh, it can’t be helped. I don’t have a powerful family, so they won’t send me to those wealthy planets. They will only give me this job which no one else will do,” the silver-haired young man sighed and bemoaned his fate.

“I heard that some time ago, talented martial warriors from the federation came to a planet in this planetary sector for the trial. I wonder what kind of planet it is to be chosen as the trial ground.

“Is there a life planet in this desolate sector?”

“How great will it be if I discover a life planet. I can become a noble immediately.”

The silver-haired man started muttering to himself nonstop.

At this moment, the screen in front of him lit up, and an elder in a gray gown appeared.

“Master!” The silver-haired young man was shocked. He quickly got up from the sofa and greeted the elder respectfully.

“Klook” the elder spoke in the common universal language. “I have an order for you.”

“Please go ahead,” Klook replied hurriedly.

“Guard your planetary sector properly. If anyone comes out, arrest them no matter who it is,” the elder said coldly.

“Even the candidates?” Klook was shocked.

“Yes!” The elder said sternly, “Don’t harm them if they don’t resist. However, if a stranger passes through, arrest him, dead or alive.”

“Yes!” Klook could hear the anger and firmness in the elder’s voice.

After some time, the command room turned quiet again. Klook straightened his back and let out a long sigh. “I wonder what happened. Master seems very angry.

“No matter what it is, I didn’t cause the trouble. I’m just in charge of arresting the person.

“This is a good chance. If I can perform well in front of Master, he might take notice of me. My future will be bright once he puts in a good word for me,” Klook mumbled. There was an exciting glow in his eyes.

...

The higher authorities from the Olant Federation didn’t just send the order to the fleet guarding this wormhole. All the wormholes in this remote planetary sector, with the Earth in the center, were guarded by different fleets. All of them received the order for arrest.

The Olant Federation sealed the news immediately when they discovered the presence of the Earth. Only some high-level officials knew about it. Thus, the commanders of these fleets didn’t know who they needed to arrest or why.

But this didn’t prevent them from getting excited. Just like the silver-haired young man, these people didn’t have any background. That was why they were sent to guard a wormhole in this remote planetary sector.

This piece of news from the higher authorities was a great opportunity for them to rise in rank.

None of the commanders wanted to give up this pie that had dropped from the sky. They rubbed their hands in excitement and ordered their martial warriors to be vigilant. They mustn't let any person leave this sector.

Wang Teng didn't know that a bunch of celestial-stage martial warriors had laid their eyes on him. He was cultivating on his spacecraft when the connection he felt some time ago got stronger.

He got up and walked to the window. A bunch of faint light spots was flying over from afar. In this vast and pitch-black Dark Universe, the spots of light were extremely conspicuous. Wang Teng saw them at once.

Round Ball noticed this strange sight and appeared beside Wang Teng. It stared at the light spots in astonishment.

### **Chapter 878: A Special Use Of Void Mayflies!**

"Void mayflies!" Round Ball exclaimed.

Even without its reminder, Wang Teng remembered what they were. When he first came into this dimensional rift, he had accidentally made a connection with a bunch of void mayflies.

He finally understood the origins of the faint connection. It came from the void mayflies!

Wang Teng didn't think that after so long, these void mayflies could still find his position when he came to the Dark Universe.

Round Ball's face was almost pasted on the window. It stared at the countless dots of light outside and felt confused. "I wonder why these void mayflies came here?"

"Tsk, I didn't think that I will have the honor of seeing one of the wonders of the Dark Universe." It was in awe.

"One of the wonders of the Dark Universe?" Wang Teng was surprised.

"You don't know? The void mayflies are one of the few lifeforms that live in the Dark Universe. Their lifespan is extremely short. They tour around and reproduce at the same time. When they die, their corpses fall wherever they are. That's how they got the name 'one-day' mayflies. Not many people are able to see the beautiful scenery of them flying in the Dark Universe," Round Ball said slowly.

"They have a short lifespan?" Wang Teng noticed a detail in Round Ball's words. He frowned.

"That's right. Everyone knows this." Round Ball continued staring at the void mayflies outside, not noticing Wang Teng's expression.

Wang Teng touched his chin and contemplated.

Something wasn't right.

These mayflies had been alive since the last time it was here. He didn't think they had a short lifespan.

Very soon, the void mayflies came close to them and started dancing around the spacecraft. They seemed to have found something and gathered in front of the window where Wang Teng and Round Ball were at.

Round Ball widened its eyes in astonishment. It was puzzled. "Did they come for me?"

Wang Teng chuckled secretly when he saw its stunned expression. He walked forward and tapped his finger on the window.

All the void mayflies started gathering toward his finger. They seemed to be answering his summons.

"What is this?" Round Ball stared at Wang Teng in amazement.

Even if it was an idiot, it could tell that these void mayflies didn't come for it. They were here for Wang Teng.

This bastard!

Evil!

He knew the reason, yet he didn't say it. He must be laughing at it. Round Ball gritted its teeth in anger and glared at Wang Teng.

"Don't look at me like this. You didn't ask me," Wang Teng said innocently.

"So it's my fault?!" Round Ball raised its voice and stared at Wang Teng in disbelief. It seemed shocked by his shamelessness.

"Of course." Wang Teng nodded.

"Shut up!" Round Ball rolled its eyes.

Despite living for so many years, it got teased by a stupid kid that was less than 20 years old. Round Ball felt exasperated and speechless. It took a few deep breaths before it managed to calm its emotions. Then, it voiced out its greatest doubt, "Why did they come to look for you?"

"I established a spiritual connection with them." Wang Teng released his spiritual power. It seeped through the metallic walls and went outside.

These void mayflies started forming various shapes under the guidance of his spiritual power. A second ago, they were butterflies. The next instant, they formed a giant whale... They seemed to be an extension of Wang Teng's body. Round Ball was dazzled by their performance.

"You managed to form a connection with them!" Round Ball was dumbfounded. It asked in disbelief, "How?"

"Will you believe me if I say that I did it accidentally?" Wang Teng shrugged.

"Accidentally!" Round Ball didn't know what to feel.

It felt that Wang Teng was putting on an act. He must be. However, it found no reason to refute him.

"Oh my... I'm so jealous!" Round Ball almost cursed after thinking for a long time.

“Void mayflies are rare, but they can’t seem to do anything besides being an extension of my spiritual power. They can only be used to scout the Dark Universe. I can’t bring them out, so their uses are limited. Why are you jealous?” Wang Teng shook his head.

“Indeed, you don’t know anything.” Round Ball looked at Wang Teng as if he was a country bumpkin. It said contemptuously, “Besides being an extension of your spiritual power, void mayflies can also condense spiritual skills in their bodies and give their opponent an unexpected attack. They’re a necessary item when you want to sneak an attack on someone.”

Round Ball’s eyes shone brightly. It seemed a little excited.

Wang Teng interrupted it with a cough and a weird expression.

“What?” Round Ball asked unhappily.

“Do you like to be sneaky too?”

“Of course. Isn’t it good to be a little sneaky? You don’t have to put in so much effort in fighting. If you plan it properly, you can kill someone more powerful than you...” Round Ball was exceptionally enthusiastic about this topic. It started chattering nonstop and didn’t notice Wang Teng’s expression turning strange.

*This fellow has the same interests as me.* Wang Teng chuckled as he thought to himself.

“Unfortunately, Master Nangong was too righteous. That was why he got tricked by others and died. Sigh...” Round Ball suddenly thought of Nangong Yue and lamented.

“That’s right. One can’t be too righteous,” Wang Teng nodded in agreement. He felt the same way.

*The main reason why Nangong Yue got schemed by his disciple was that he was too naive. If he was as treacherous as me—wait, I’m not treacherous. If he was as smart as me, he wouldn’t have been tricked.*

1

“Yes, do you think so too?” Round Ball seemed to have found its soulmate. It looked at Wang Teng earnestly. “Did you ask me if I like to be sneaky too? Does that mean you like to trick others?”

“Haha, come, let’s have a good discussion.” Wang Teng sniggered.

The two of them leaned together and started chatting like two good brothers.

“What other uses do the void mayflies have?” Wang Teng asked after conversing for some time.

“I’ve already listed out their main uses. The most important one is condensing skills. Void mayflies can condense all kinds of skills. One thing to note is, when the void mayflies establish a connection with another lifeform, they will be nourished by the lifeform’s spiritual power and their lifespan will be extended. They will no longer be one-day mayflies anymore. Their reproductive ability still exists, so they can multiply quickly,” Round Ball explained.

“I see. No wonder they can live until now.” Wang Teng nodded. He was enlightened.

“You should feel lucky. There’s rarely anyone that can establish a spiritual connection with void mayflies. Over the past eras, only a few instances have been recorded. All of them dominated their territories with the help of the void mayflies’ growth and became formidable martial warriors. They ruled over the universe and killed numerous enemies.” Round Ball’s eyes glowed. It said enviously, “Do you know what similarity these people have?”

“What?” Wang Teng asked curiously.

“All of them possess strong spiritual power. They’re all divine spirit masters!” Round Ball answered.

“Only those with strong spiritual power can have the chance to establish a spiritual connection with the void mayflies, right?” Wang Teng pondered as he said.

“That’s right. This is what the later generations concluded.” Round Ball nodded. “However, besides having strong spiritual power, you need a bit of luck too.”

“Luck?” Wang Teng stared at it curiously.

“Later, many divine spirit masters with strong spiritual power entered the Dark Universe to search for void mayflies. They hoped to establish a connection with them, but guess what, none of them succeeded. All of them died.” Round Ball scoffed.

“All of them failed?” Wang Teng was astounded.

He could guess that many people had come to search for these void mayflies and they must all be extremely powerful and confident in themselves. Yet none of them succeeded!

What did this mean?

This meant that luck was truly important.

His luck must be heaven-defying. How could he have accidentally made a connection with these void mayflies if his luck wasn’t amazing?

1

He didn’t even use any effort.

Round Ball rolled its eyes when it saw his delighted expression. “Alright, stop being proud of yourself. Let me teach you a way to keep these void mayflies in your consciousness. That way, you can bring them out of the Dark Universe.”

“Keep them in my consciousness?” Wang Teng was stunned. He asked hurriedly, “I can bring them away from the Dark Universe?”

“Of course.” Round Ball raised his head and said arrogantly, “Look, without me, you will need much more time to understand the great use of these void mayflies.”

“Hahaha, Round Ball, you’re my lucky star. Quick, tell me.” Wang Teng laughed happily.

“It’s simple. Form a spiritual bubble and wrap these void mayflies with your spiritual power to give them an environment to survive. Then, you can pull them into your consciousness.” Round Ball’s smile turned brighter when he heard Wang Teng’s compliment.

“Alright, watch me.” Wang Teng immediately followed Round Ball’s instructions and formed a bubble with his spiritual power. He wrapped the void mayflies inside.

The void mayflies seemed to like the bubble Wang Teng had formed. They floated happily inside it.

“Keep!”

Wang Teng pulled half of the void mayflies over. Then, he moved his thoughts, and the spiritual bubble merged into his forehead. It entered his consciousness.

“Done!” Wang Teng was elated when he sensed the void mayflies in his consciousness.

“Now, you need to learn how to condense spirit in the void mayflies,” Round Ball said.

“But I don’t know how,” Wang Teng said helplessly.

“You can experiment with them. You have many void mayflies to play around with. They multiply quickly, so you don’t have to worry about them dying.”

“Alright, I’ll try.” Wang Teng’s eyes shimmered. He was eager to start.

### **Chapter 879: Even A Nobody Like You Have Heard Of My Name**

The spacecraft continued traveling in the Dark Universe.

The Dark Universe was dead silent. The spacecraft didn’t make any sound as it sailed.

During the remaining time, Wang Teng studied how to condense spiritual secret skills into the bodies of these void mayflies. His enthusiasm was ignited by Round Ball. He truly anticipated how he would use these secret skills in the void mayflies’ bodies to launch sneak attacks on his opponents in the future.

Somehow, he found this extremely interesting.

Thus, these void mayflies who came all the way here to find their owner suffered.

Wang Teng had four spiritual skills: Spiritual Spike, Spiritual Missile, Spiritual Shield, and Spiritual Illusion.

He planned to use a milder spirit skill for the experiment. After all, these void mayflies viewed him as their owner, so he couldn’t bear to torture these poor little things.

Spiritual Shield and Spiritual Illusion were relatively milder. They weren’t as offensive, unlike the Spiritual Missile which would explode instantly if the attack failed. The void mayflies would definitely die if that happened.

Even though the void mayflies weren't in any life danger, they suffered tremendously, especially when Wang Teng was condensing the Spiritual Illusion. The void mayflies got attacked by the Spiritual Illusion occasionally.

They started dancing wildly in the air. No one knew what frightening illusion they saw.

Round Ball shook its head as it watched at the side. It felt sad for the void mayflies. It had conveniently forgotten that it was the one who asked Wang Teng to use the void mayflies for the experiment.

"Wang Teng, we're reaching a wormhole soon. We'll be able to leave the Milky Way directly through this wormhole. It will save us much time," Round Ball said.

"Wormhole!" Wang Teng stopped his experiment and looked up at Round Ball.

"Yes, it's not far ahead."

Wang Teng nodded. He wanted to say something but stopped. "My void mayflies have sensed many signs of life in front, outside the wormhole you just mentioned."

"Signs of life!" Round Ball frowned. Its expression changed. "It might be the people from the Olant Federation."

Wang Teng's expression turned grim. "It looks like we'll need some effort to pass through the wormhole."

"Can you sense how strong those people are?" Round Ball pondered for a moment before asking.

"Let me try." Wang Teng closed his eyes and controlled the void mayflies to move closer to the spacial wall.

The spacial wall referred to the segregation between the Dark Universe and the normal universe. One couldn't touch or see it, but it existed. One would be able to pass through this wall when they exceeded the speed of light.

The void mayflies were special, so they could sense the situation on the other side of the spacial wall.

Wang Teng's spiritual power was pasted on these void mayflies, so he sensed it too. All the lifeforms appeared in his spiritual vision.

After some time, he opened his eyes and said grimly, "There should be 15 planetary-stage martial warriors and one fifth-level celestial stage martial warrior."

"A fifth-level celestial stage!" Round Ball ignored the planetary-stage martial warriors and placed its attention on the celestial-stage martial warrior.

The planetary stage wasn't a threat to them. Even Wang Teng had the ability to fight with martial warriors on the last three levels of the planetary stage, much less Round Ball. However, celestial-stage martial warriors were harder to deal with.

Wang Teng's spiritual power had reached the peak of the Planetary Realm, so he could have a chance if his opponent was at the first three levels of the celestial stage. However, that martial warrior was at the fifth level. He wasn't confident.

Round Ball didn't have a body, so it couldn't release its full cosmos stage ability. If not, a celestial-stage martial warrior would be a piece of cake for it.

"There are weapons on this spacecraft that can kill a celestial-stage martial warrior," Round Ball hesitated.

"Really?" Wang Teng was elated.

"It's too early to be happy. If the other party has celestial-level weapons, we won't have any advantage." Round Ball shook its head. "Shall we evade them?"

"No, these people came for me. If I don't appear, the Earth will be in danger." Wang Teng rejected Round Ball's suggestion immediately.

"Let's force our way through then," Round Ball gritted its teeth and said.

"Wait." Wang Teng's eyes lit up. He thought of something. "I have an idea."

"What is it? Tell me quickly." Round Ball got excited too.

Wang Teng chuckled. The muscles on his face started squirming, and his appearance changed in an instant. He looked like Argus from the Blue Wolf Galaxy.

"Huh?" Round Ball was surprised. It floated around Wang Teng and clicked its tongue. "You look exactly the same."

"Hahaha, if I use this identity to get close to our opponent, will I be able to sneak an attack on him?" Wang Teng smiled.

"It's a little dangerous, but you have a 70% chance." Round Ball started sniggering too.

"It's decided then." Wang Teng made the decision.

"You should be able to sneak an attack on a celestial-stage martial warrior based on your Planetary Realm spiritual power," Round Ball suggested.

Wang Teng nodded. This was exactly what he thought.

He didn't need to use his Planetary Realm spiritual power to fight his opponent head-on. It might be better to use it for a sneak attack.

The two of them came up with a plan and lowered the speed of the spacecraft. Once the spacecraft went below the speed of light, it came out from the Dark Universe and returned to the normal universe.

This was an unfamiliar planetary sector. A wormhole floated in front of them. A universe fleet was parked beside the wormhole.

The other party noticed Wang Teng's spacecraft the moment it appeared. A voice came out from the spacecraft. "Please stop and accept our investigation."

"I'm Argus from the Blue Wolf Galaxy. I'm returning after my trial. Why did you stop me?" Wang Teng's voice had turned into Argus's voice. It echoed out from the spacecraft.

“Argus?” The silver-haired Klook frowned. He ordered the intelligence on the spacecraft to pull out a piece of data. Argus’s appearance and background were listed on it. Klook took a look and signed in disappointment. “It’s him. I thought it was someone else. I was happy for nothing.”

Klook had been waiting for Wang Teng to appear ever since he received the order. He viewed him as his ticket to a promotion.

“Argus, I have been given an order by the higher authorities to inspect everyone who passes by this area. I hope that you can cooperate with me.” Klook turned polite. Argus came from a powerful background and possessed great potential. He didn’t want to offend him.

“Since it’s an order from the higher authorities, I’ll accept the inspection,” Wang Teng said calmly in Argus’s voice.

“Please leave the spacecraft temporarily,” Klook said.

Wang Teng exchanged glances with Round Ball. Then, he opened the cabin door and flew out.

“Argus, it’s you.” Klook didn’t suspect anything. He flew out from his battlecraft with more than ten planetary-stage martial warriors behind him.

Klook came in front of Wang Teng and patted his shoulder in admiration. “I’ve long heard that you’re the top talent in the Blue Wolf Galaxy. Indeed, you’re exceptional.”

“Really? Looks like I’m quite famous. Even a nobody like you has heard of my name,” Wang Teng smiled and said arrogantly.

Klook was stunned. His expression turned ugly.

Nobody!

This fellow called him a nobody.

This was too much.

Who did he think he was? Did he really think that he was someone important?

Klook’s face was as gloomy as the dark clouds. He glared at Wang Teng.

“I’m sorry. I’m bad at talking. I always say the wrong thing,” Wang Teng explained hurriedly.

Klook was stunned. He wondered if Argus was just an inexperienced young man who only knew how to cultivate and didn’t know anything about interacting with people.

“Although it’s the truth, I shouldn’t have said it directly. I must have hurt your feelings,” Wang Teng added.

2

Klook: ...

He changed his mind and wondered if he should flip the table. Would he be harming his interest if he flared up?

His mind was a mess. He got angered by Wang Teng's words.

At this moment, a sharp gaze shot out of Wang Teng's eyes and pierced right into Klook's eyes.

Klook didn't expect this. They were extremely close, so he didn't have the time to dodge. The sharp gaze stabbed right into his eyes.

"Ah!" He howled in pain.

### **Chapter 880: I Have To Rely On Brute Force!**

Spiritual Spike!

Wang Teng attacked Klook with a Spiritual Spike when he wasn't paying attention. With their close distance, the Spiritual Spike penetrated his eyes and reached his mind. His soul was seriously injured.

Klook clutched his head and screamed in agony. He shot back quickly.

"Thinking of running away?" Wang Teng's gaze turned cold. He released his fist and aimed it at his opponent's forehead.

Boom!

A terrifying Force surged forward.

Klook was still a celestial-stage martial warrior. He bore the pain in his soul and released all his Force. It quickly formed an earth-brown protective shield in front of him.

Bang!

Wang Teng's fist aura landed on the shield. The great strength caused the protective shield to sink in, and cracks started to appear on it.

Bang!

The next instant, the protective shield shattered.

Klook got hit by the residual force and flew back. However, he also made use of this chance to escape from Wang Teng's attacking range.

Wang Teng's sneak attack and Klook's reaction all happened within a few breaths.

The other planetary-stage martial warriors finally reacted. Their expressions changed, and they crowded around Klook.

"Commander, are you alright?" a planetary-stage martial warrior asked worriedly.

Klook's expression was frightening. His eyes were bloodshot, and there was blood seeping out of them. His soul had suffered a grievous injury while his mind was hurting like mad. His face was white and hideous. He gritted his teeth violently to resist the agonizing pain.

"He managed to evade it! But he's still injured." Round Ball's voice sounded in Wang Teng's mind.

"I wanted to kill him in one move, but I failed." Wang Teng's expression turned stern.

“You’re thinking too much. He’s at the fifth level of the celestial stage. Killing him isn’t an easy feat.”

“Looks like I have to rely on the brute force now,” Wang Teng said helplessly.

“Are you planning to fight him head-on?” Round Ball asked in astonishment.

“Do you have a better idea?” Wang Teng asked it back.

“Erm... you can do it. I’ll cheer you on.”

Wang Teng: ...

At this moment, Klook regained his composure at stared at Wang Teng coldly. His voice was icy as he said, “Divine spirit master! You’re not Argus.”

“You’re wrong. I’m Argus!” Wang Teng replied.

“I don’t care if you’re Argus. You won’t be able to escape today.” Klook gave his order, “Kill anyone that attacks the commander of a fleet!”

“Yes!”

The planetary-stage martial warriors behind him replied in unison.

Boom! Boom! Boom!

Thick and dense Force erupted from their bodies. Aura of different colors enveloped them like a round ball of light as they dashed towards Wang Teng.

Wang Teng’s expression didn’t change. His gaze turned vicious as he charged toward the planetary-stage martial warriors. Before they could attack, he launched his ferocious assault.

The five basic Forces surged out of his body. The power was on par with a seventh-level planetary-stage martial warrior. He held a sword in one hand and charged forward as if there were no one blocking him.

A sharp sword glow slashed through the air. Two planetary-stage martial warriors died under his sword.

Two people were dead in one move. The expressions of the other planetary-stage martial warriors changed.

A planetary-stage martial warrior emerged behind him with an ax. He released a gigantic ax glow at Wang Teng’s back. The force was astonishing. He wanted to chop Wang Teng into two.

Hmph!

Wang Teng twisted his body and punched his fist out. A terrifying fist glow collided with the ax glow. With a loud explosion, the ax glow shattered under the martial warrior’s astounded gaze.

Swoosh!

Wang Teng stabbed his sword out, penetrating his opponent’s throat in a split second.

Fresh blood spurted out. Another planetary-stage martial warrior died.

Very soon, more planetary-stage martial warriors arrived before Wang Teng. He released his five basic Forces to the maximum. Five element sword consciences erupted one after another, earth sword conscious, water sword conscious, fire sword conscious...

“Five different elements!”

“Five sword consciences!”

“What kind of monster is he!”

Klook furrowed his brows as he watched them from a distance. He couldn't believe his eyes.

This fellow possessed all five basic elements and had enlightened all the five sword consciences. This wasn't something a normal talent could achieve.

Splurt!

Splurt!

Splurt!

Cries of pain were heard one after another. Within a few seconds, most of the planetary-stage martial warriors were killed by Wang Teng. Only less than half were left.

“Damn it!” Klook's expression changed entirely. He stopped being a bystander and stomped his feet, disappearing on the spot. He traveled through space with a scorching glow and shot towards Wang Teng like a meteorite.

Wang Teng immediately felt a powerful force crashing toward him. He turned serious and evaded the attacks from the planetary-stage martial warriors around him. At the same time, a dazzling blue sword glow erupted from his sword. Giant waves appeared out of nowhere and piled up a hundred meters high in an instant.

Numerous sword glows intertwined among the giant waves. Nerve-wracking sharp glints were reflected in the water.

Water element Sword of Ultima-Thousand Crashing Ripples!

Boom!

A hundred meters tall waves crashed toward the scorching light ball charging towards it. The battle between fire and water burst out in the universe!

The red and blue Force collided, giving off a glaring glow of light.

The other planetary-stage martial warriors were appalled. They hurriedly retreated, afraid that they would be caught in the explosion.

*This fellow is not bad. He's at the second level of the planetary stage, yet he can fight with a celestial-stage martial warrior.* Round Ball complimented silently.

Boom!

Sometime later, the glaring light disappeared suddenly.

A figure was thrown out. It was Wang Teng!

“Young brat, you’re only at the planetary stage. No matter how strong you are, I can still kill you.”

Klook’s face was ice-cold. He held a crimson battle sword and chased after Wang Teng like a beam of light.

“Oh shit!

“Danger!”

Round Ball was agitated. It didn’t want its new master to die even before they left the Milky Way. That would be a huge joke.

It immediately activated the rune weapon on the spacecraft and aimed it at Klook.

The hairs on Klook’s skin stood up. He sensed the threat of death. He had no choice but to give up his chase and retreat. For a formidable martial warrior, the difference between life and death would be a single thought.

Swoosh!

A beam of white light shot out from the QY-E63 spacecraft. It soared through the universe and landed at the spot where Klook was at.

Boom!

A small planet was hit and exploded. This was how frightening a weapon that could kill a celestial-stage martial warrior was!

At this moment, Wang Teng had landed on a meteorite floating in space. He had an idea. He punched the meteor, and it shattered below him.

This wasn’t enough. He dashed towards the other meteorites and punched all of them. They broke into multiple small pieces. Within a few breaths, the meteorites in this area had turned into rocks. They floated around Wang Teng.

“What’s he doing?” Everyone was puzzled when they saw this scene.
