

MEDICAL GOD CHAPTER 724

Lin Yueyao frowned and she looked a little unhappy.

“Mr. Joel, don’t you think that you’ve gone too far with your words? You were the one who sent the patient here because you were unable to treat her.”

Mr. Joel was a doctor at Handong Province International Hospital. There were some connections between the two hospitals. Whenever there were patients or illnesses that were complicated to treat, both hospitals would offer help to one another.

People’s Hospital was the only hospital Handong Province International Hospital had a connection with within the province.

Here was exactly what happened today. As Mr. Joel treated a patient, he thought that it was more suitable to treat the patient using traditional Chinese medicine. Therefore, he transferred the patient to the People’s Hospital, where he looked for a Chinese medicine doctor for help.

Lin Yueyao wasn’t too familiar with traditional Chinese medicine. She didn’t want to get involved in the first place, but the symptoms that the patient had were exactly the same as described in Qin Jun’s book.

Since there were remedies for the exact symptoms, she wanted to give it a try.

Unfortunately, the treatment had caused the patient to fall into a coma after a cardiogenic shock. Emergency rescue was the only solution at that point.

Mr. Joel said coldly, “Doctor Lin, even though we are the ones who came to look for help, but why is your skill level so low? I won’t blame you if you aren’t able to cure the patient. But now, not only did you not cure her, but you have also put her life in danger! Your hospital must take full responsibility for this incident!”

All the doctors looked at each another with a firm look .

This patient carried a unique identity. Her name was Lei Hong, female and thirty years old.

Even though she was young and pretty, but the factor that had made her unusual was more of her identity.

Lei Hong managed most of the entertainment facilities in Sheng City. The street gangsters, idle personnel, were all under her supervision.

As the lady boss of the black market, she was equivalent to Duan Baodong of Donghai.

Lei Hong's identity was extremely unique. If anything had happened to her, it would not simply be a matter of compensation or medical malpractice. The life of the main doctor who treated her might had been in danger.

For that reason, Mr. Joel was very cautious when he treated Lei Hong. As long as there were signs of side effects from the treatment, even if it was minimal, Mr. Joel chose not to try. Hence, he immediately transferred this problematic case to the People's Hospital.

Lin Yueyao frowned as she thought of ways to rescue Lei Hong. Suddenly, a few men in black suits dashed into the surgical room.

One of them was bald and looked dreadfully violent. He raised his arm with a black gun in his hand, and pointed straight at Lin Yueyao's head.

"Are you the doctor in charge?"

Lin Yueyao was startled, but she tried to stay calm. “Yes, I am. What are you trying to do!”

The bald man replied coldly, “If anything happens to Hong, you will not see tomorrow’s sunlight.”

After he finished his sentence, the bald man put down his gun. This was because he saw that the doctor was a woman, and the other two were foreigners, so they didn’t seem to have any power to fight back. They wouldn’t even have a chance to run away even if they wanted to. Thus, the bald man instructed a few of his men to watch the entrance, and not let anybody out.

As Mr. Joel saw that and he quickly spoke, “Sir, this has nothing to do with me. Hong was in a healthy condition when she was still at the Sheng City Hospital. She only became like this after she got here!”

The bald man frowned and looked at Mr. Joel coldly, “Stop talking nonsense! IF anything happens to Hong, none of you can escape.”

The bald man’s words had caused Mr. Joel’s expression to change. Mr. Joel stood on the side and pondered about how he could shift the full responsibility to Lin Yueyao.

Lin Yueyao carefully checked on the patient. Lei Hong’s health condition was really unique. She was so young, but how did she have so many negative reactions.

Moreover, Lin Yueyao treated Lei Hong according to the method stated in the book Qin Jun had given her. How could there a problem?
