

Merchant 1191

Chapter 1191: Honorary Captain

Lin Yuan felt that if Su Yiren had any shred of intelligence, she would grab hold of this opportunity to survive, albeit it would cause her to lose her freedom.

Nonetheless, a person who craved revenge was better off surviving with hope than dying with their freedom intact.

Lin Yuan had prepared the resources he was going to supply to the Sincere Merchant Group the previous night.

Mr. Feng had collected a total of 12 Bronze and 57 Silver Item-Storing Walnuts from the Sincere Merchant members.

These amounted to a total storage space of less than 2,000 square meters.

Lin Yuan would have to provide the Sincere Merchant Group with relatively valuable resources in order to enable them to progress quickly.

However, the resources could not be too valuable either, as a small merchant group was sure to attract trouble if they possessed overly valuable goods.

The Sincere Merchant Group had already been targeted once by the Withered Cliff Thief Death Corps. As such, it was not impossible that they would be targeted again by another group of bandits in the future.

Lin Yuan filled the Item-Storing Walnuts with many common resources that came from Class 2 dimensional rifts.

Although it was unlikely that subterranean dimensional rifts would open in the Divine Wood Federation or that marsh dimensional rifts would open in the Iron Hammer Federation, the Sincere Merchant Group could obtain such resources during their many journeys between the Iron Hammer Federation and Divine Wood Federation.

The resources that Lin Yuan provided would be regarded as extremely precious to the Sincere Merchant members as they were resources that would only rarely fall into their hands.

Everything had to progress by taking baby steps. Lin Yuan believed that the Sincere Merchant Group would be able to expand its operation using these resources quickly.

When Mr. Feng saw the resources that Lin Yuan had prepared, his eyes widened to the point they nearly fell out of their sockets.

Although the Item-Storing Walnut was considered a common good, there was a time that the Sincere Merchant Group considered it a treasure, and it was a blessing every time they managed to obtain one.

Mr. Feng could not help but tremble as he clutched the Item-Storing Walnuts that were filled to the brim with resources.

The resources in the Item-Storing Walnuts had an estimated total value of 8,000,000 Great Lush dollars.

The Sincere Merchant Group never had close to this amount of money. It would be easy for them to expand their operation with this sum.

After Mr. Feng thanked Lin Yuan, he called a meeting with all the Sincere Merchant members and told them about the resources that Lin Yuan had just given them.

The Sincere Merchant members looked delighted by this sudden piece of good news.

Mr. Feng looked at the elated crowd before looking back at Lin Yuan and saying with a quivering voice, "Taking into account the value of all our lives, our Sincere Merchant Group was only worth 100,000 Great Lush dollars. The value of the resources Lin Yuan just gave us is 80 times our original value. According to this calculation, Lin Yuan has the right to own more than 98% ownership of the Sincere Merchant Group. I hereby suggest nominating Lin Yuan to be our captain!"

Lin Yuan's eyebrow twitched.

After a short period of silence, many people voiced their agreement with Mr. Feng's suggestion.

However, Lin Yuan had no desire to become the Sincere Merchant Group's captain.

In the eyes of the Sincere Merchant Group, the resources he had given them seemed overwhelming and ridiculously expensive.

Yet, the total value of these resources could not even match the value of one source-type lifeform.

Lin Yuan wanted to keep the pinnacle Class 2 subterranean dimensional rift open instead of just exploring it once with Liu Jie.

He wanted to go obtain the two source-type lifeforms and other useful resources from the dimensional hub.

He would obtain enough to pump resources into the Sincere Merchant Group about seven more times.

Additionally, a new heavenly-maiden-grade elemental pearl would be produced in the Spirit Lock spatial zone in the time that it took Lin Yuan to take 20 breaths.

The Startling Lines Continent did not have any Class 5 Creation Masters, and the appearance of one heavenly-maiden-grade elemental pearl in such a place would stir up a tremendous uproar and cause the three federations to fight amongst themselves.

Lin Yuan could imagine how badly the experts in this continent longed for this item that even pinnacle Class 4 Creation Masters could only produce by luck.

Hence, the resources that Lin Yuan provided the Sincere Merchant Group were mere peanuts to him.

The Sincere Merchant members did not know that each moment they spent talking to Lin Yuan increased the value of the resources in the Item-Containing Walnuts.

After Mr. Feng finished speaking, he stole a glance at Lin Yuan.

When Lin Yuan did not voice his agreement, Mr. Feng knew that he had made a mistake.

However, the Sincere Merchant Group had no way of repaying Lin Yuan for the resources, and Mr. Feng could not bear to say that they would return the profits from selling the resources to Lin Yuan.

If Lin Yuan truly wanted to sell away the resources, he would not need to do so through the Sincere Merchant Group.

If he brought the resources to the Deep Freeze Merchant Organization, he would immediately be regarded as an important client.

All Mr. Feng could offer was the loyalty of the entire Sincere Merchant Group, as this would repay Lin Yuan and lead to him becoming a part of the Sincere Merchant Group. Once he was a part of the Sincere Merchant Group, it was likely that he would help with the Sincere Merchant Group's expansion again.

This was a good opportunity for the Sincere Merchant Group.

The more excited the cheers of the Sincere Merchant members became, the more embarrassed Mr. Feng felt.

At that moment, a young man's bright voice saved Mr. Feng's pride by saying, "Firstly, thank you all for your kindness. My aim of being here is to train, so I can't travel around with any merchant group. Thus, I don't think I'm suited to being the captain.

"Moreover, I decided to supply the Sincere Merchant Group with these resources because I recognize your potential. A few opportunities are all it takes for a merchant group to gain profit. However, the sense of togetherness shared by a merchant group is priceless."

Lin Yuan's words warmed the hearts of every Sincere Merchant member.

Mr. Feng asked Lin Yuan, "If so, I shall bear the burden of being the Sincere Merchant Group's captain. Then, are you willing to become the Sincere Merchant Group's honorary captain? You shall gain a portion of all of the Sincere Merchant Group's future resources as per your 98% ownership."

Chapter 1192: The First Activated Thearch-Class Weapon

Mr. Feng paused before continuing in an excited tone. "Once our Sincere Merchant Group expands to a certain degree, we'll be able to establish our own merchant organization. At that time, I'll be able to give you any and all resources from the Divine Wood Federation and Iron Hammer Federation at the drop of a hat."

His words touched Lin Yuan.

If what he said was true, Lin Yuan would gain a loyal merchant organization that was based in the Startling Lines Continent as all its members were Great Lush natives.

Even if he stirred tremendous trouble in the Startling Lines Continent and became their enemy, no one would link the Sincere Merchant Group to him.

With the Sincere Merchant Group, he would be able to obtain resources from the Startling Lines Continent no matter what happened.

Lin Yuan waved his hand, and a figure wrapped in a black robe appeared before him.

Liu Jie frowned when he saw the figure dressed in black. He sensed a familiar aura coming from a figure. It was as though he had sensed this aura not long ago.

However, the aura was too faint for Liu Jie to figure out where this sense of familiarity was coming from.

One of the special insect-species carcinoma feys that Liu Jie had contracted could express the life force within other lifeforms through entropy.

It would allow Liu Jie to sense which was the weakest lifeform on the battleground immediately.

Liu Jie noticed that this person had a terrifyingly high amount of entropy. It was high enough to reach the thearch-class expert level.

However, there was one thing that Liu Jie did not understand.

Every living lifeform's entropy fluctuated according to its breath, environment changes, energy depletion, and even mood changes.

However, the figure in black's entropy did not budge at all.

Although it was alive, it was as though it was dead.

If this were happening to someone else, Liu Jie would definitely look into it.

But since it was Lin Yuan, Liu Jie assumed that it was one of Lin Yuan's secret weapons and did not pursue the matter.

The figure that Lin Yuan had summoned was Han Tianhe, who Red Thorn had transformed into a human weapon.

Lin Yuan declared to the Sincere Merchant members, "Since I'm now the Sincere Merchant Group's honorary captain, I shall leave someone in my stead to stay with you. You don't need to bother him for regular activities. But whenever you're in danger or at risk of being killed, you can call out to him. He will fix the situation."

Everyone in the Sincere Merchant Group started shouting his name and cheering, "Long live Captain."

They had received so many precious resources that they would take some time to process the goods.

The emergence of such precious goods during trading would attract attention.

The Sincere Merchant Group needed to find strong guards as soon as possible to use these resources to expand their operation. However, this could not be done quickly.

But now that Lin Yuan had assigned an expert to protect them, he solved all their worries and stress.

Lin Yuan had carefully contemplated before he made the decision to send out Han Tianhe.

He did not need to assign any strong experts to protect his operations in the Radiance Federation.

As long as the Moon Empress and Night Leaning Moon remained in the Radiance Federation, no faction would dare to lay a hand on the Return from Faraway Mansion.

The only places Lin Yuan needed to assign an expert to was his underground palace in the Divine Wood Federation and his base in the marsh world.

Liu Yanshan was the stronger of the two thearch-class human weapons, and Lin Yuan planned on placing him in the marsh world. This would alleviate some of the Kill Food Sky Butterfly's burden and cover for the Kill Food Sky Butterfly's lack of ability to fix anomalous situations.

However, this would mean that the underground palace in the Divine Wood Federation would be left without protection.

The Mother of Bloodbath was already steadily moving toward becoming Myth III thanks to the nourishment of many Blood Brew Grapes.

Lin Yuan felt that he should take the Mother of Bloodbath to the Divine Wood Federation.

If the Mother of Bloodbath suddenly transformed into a Heavenly Family Fey in the Radiance Federation, it would likely attract trouble.

Comparatively, no experts would come to this desolate place. As such, the Mother of Bloodbath was more than capable of guarding the underground palace.

Moreover, he would bring the Invisible Demon with him whenever he came to the Divine Wood Federation.

The Invisible Demon was stronger than Han Tianhe and Liu Yanshan. With it around, it would be able to try to solve the problems that the two experts were incapable of handling.

Lin Yuan genuinely became the Sincere Merchant Group's ruler with a few words.

Soon, the Sincere Merchant Group started moving toward the small town that was 50 kilometers to the south.

The dimensional lifeforms were still hanging, trapped in the spiderwebs.

Lin Yuan stretched and observed the neatly arranged dimensional lifeforms. He paid close attention to a timid-looking green-skinned dwarf and said to Liu Jie, "Big Brother Liu, let the Class 4 Land Imp down."

Liu Jie waved his hand.

Two threads extended from the spiderweb and wrapped around the Class 4 Land Imp before lowering it to the ground.

This was so abrupt that the Class 4 Land Imp could not help but tremble with despair and fear.

Lin Yuan ignored the Land Imp's fright and slowly walked over to it.

He felt that it was time to deal with the Class 4 Vein Land Imp.

It was known that Land Imps were the most cowardly of all the dimensional lifeforms.

Many Land Imps had appeared in the subterranean dimensional rifts that opened in the Radiance Federation and were easily subjugated by strong spirit qi professionals due to their delicate natures.

However, despite being subjugated, they continued to act connivingly.

Lin Yuan had a lot of hope for the Vein Land Imp, but if he did not strike the fear of absolute authority into its heart now, it would cause problems when it became an Apostle.

Dimensional lifeforms were able to control source-type power. Hence, the best conversation partner for a dimensional lifeform was another dimensional lifeform of the same species.

Chapter 1193: Chance to Completely Transform into Vein

Lin Yuan looked at the trembling and struggling green dwarf. His eyebrow twitched as he said to his shadow, "Invisible Demon, teach this Land Imp some manners!"

When the Class 4 Land Imp saw Lin Yuan walking toward it, it acted as though it was face to face with a demon.

It knew that the expert that had created this overwhelmingly powerful and sticky spiderweb was this person's subordinate.

Dimensional lifeforms lived by the code that the weak always had to submit to the strong.

Although Lin Yuan had not demonstrated his power, he was already the most powerful being present in the Land Imp's eyes.

However, the Land Imp also had one doubt.

There were so many dimensional lifeforms present, and it was the smallest in size. Moreover, it had already retracted all of its aura while it was trapped in the spiderweb to make itself as unnoticeable as possible. So why had it been chosen?

The one that should be chosen was the big thrashing lug, the Obsidian Stone Statue Monster! It was clearly the most attention-grabbing dimensional form present.

The Invisible Demon immediately climbed out of Lin Yuan's shadow.

When the Invisible Demon released its aura, the Land Imp's eyes rolled into the back of its head, and it fainted out of fright.

Although the dimensional lifeforms that had undergone the complete Source-type Cleansing would be grateful to Lin Yuan for this promotion, it usually only applied to intelligent dimensional lifeforms like Rising Lizard.

Even if Lin Yuan managed to obtain the loyalty of a sly and devious dimensional lifeform like the Land Imp, it would not change the Land Imp's selfish and lazy attitude.

He did not feel a shred of guilt for the unconscious green dwarf and said to the Invisible Demon, "Invisible Demon, wake it up."

The Invisible Demon replied in its hoarse voice, "Lord Dictator, don't worry. Give me ten minutes, and I promise to make the Land Imp utterly subservient to you and more hardworking than any other creature alive."

Its body dissipated, and it turned into a mass of shadows that entered the Land Imp's body.

Ten minutes passed, and the Invisible Demon returned to stand by Lin Yuan's side.

The Land Imp had started drooling, and it was looking at Lin Yuan as though it was looking at a god.

Chills ran up Lin Yuan's body when he remembered the Invisible Demon's methods.

This was not a surprising result, as even a mindlessly savage alien insect like the Heartless Crayfish would turn obedient after the Invisible Demon used its techniques on it.

Lin Yuan felt that the Invisible Demon could live up to the title of 'dimensional lifeform whisperer' as it could 'communicate' with every dimensional lifeform and turn it into its 'friend'.

Lin Yuan summoned Genius with a wave of his hand.

The Class 4 Land Imp had the equivalent power of a Platinum fey, and Genius had reached Diamond.

Even if the Land Imp resisted Genius when Connected Tails was used on it, it would not result in too much damage to Genius.

Lin Yuan instructed Genius to use Connected Tails between him, Liu Jie, the Invisible Demon, and the Land Imp.

He rarely asked Genius to use Connected Tails on so many targets at once.

Now that Genius had eight tails, Connected Tails could connect eight targets.

As such, Lin Yuan would be able to use this chance to enable them to learn the subterranean world's language as well as take a look at the experiences that the Land Imp had in the subterranean world.

He also wanted to see if the Land Imp had truly become as obedient as it seemed after the Invisible Demon had its way with it.

Genius started to circulate its well of spiritual energy.

The movement of such a large amount of spiritual energy made one feel like an endless ocean surrounded them.

However, Genius' spiritual energy was non-invasive.

As long as Genius did not use its spiritual energy to attack a target specifically, any target under the influence of Genius' spiritual energy would feel comforted and at ease.

Genius' eight tails started to open up like a blooming flower, and four of its tails detached themselves from its body and turned into bright transparent belts.

The four bright belts linked Lin Yuan, Liu Jie, the Invisible Demon, Genius, and the Land Imp together.

At the same moment that they were all successfully connected via Connected Tails, Lin Yuan could see all of the Land Imp's experiences from the moment it gained consciousness.

Genius was rapidly learning the subterranean world's language through the Land Imp's knowledge.

Lin Yuan was still looking through the Land Imp's experiences.

Eventually, he found out why the Land Imp had become a Vein Land Imp when it was only Class 4.

The longer Lin Yuan looked through the Land Imp's experiences, the more amazed he was. The Land Imp had been born with a golden spoon in its mouth!

From the moment it gained consciousness, the Land Imp lived in a large mineral vein and continuously absorbed the minerals to increase its power. It had even consumed the heart of the mineral vein.

The heart of the mineral vein was the purest mineral in the mineral vein and contained much purer energy than was within the other minerals in the mineral vein.

It was also extremely beneficial to dimensional lifeforms like the Land Imp.

The Land Imp's journey did not stop at consuming the heart of the mineral vein as it started being hunted by other powerful dimensional lifeforms.

While other powerful dimensional lifeforms were hunting it, the Land Imp had fallen into a dark river in the mountains and lost its way in an unknown mineral vein.

Every time the Land Imp was in grave danger and on the brink of losing its life, it would manage to stumble upon a new and undiscovered mineral vein.

The Land Imp's life had been paved with miracles.

Lin Yuan felt that 'Doleful Flames' would be the most appropriate name for the Land Imp.

Somehow, Lin Yuan felt that the Land Imp had many similar experiences to Bei Xu. However, Bei Xu had it much harder.

The Land Imp still had a large amount of energy from the heart of the mineral vein. It had been so afraid that it would be interrupted while consuming the minerals in the mineral vein that it had gobbled up the minerals.

Hence, it still had a large number of undigested minerals stored in its stomach.

Lin Yuan now knew why the Land Imp had been able to transform into the Vein Land Imp.

Chapter 1194: Sacred Sword Wielding Queen, Time to Get to Work

When dimensional lifeforms underwent the Source-type Cleansing, they unleashed their hidden potential energy.

If the Land Imp underwent the Source-type Cleansing, it might be able to digest the minerals stored in its body.

After the Land Imp absorbed all the minerals, it might be able to complete its transformation into the fully-fledged Vein Land Imp fully.

When Lin Yuan sensed the Land Imp's emotions, he noticed that the Invisible Demon's methods had left the Land Imp utterly docile.

Now, it was in the right condition to transform into an Apostle.

As Genius' grade increased, its ability to learn also improved.

It did not take long for Genius to pick up the subterranean world's language, and it now spoke the language as well as the Land Imp.

Genius used Connected Tails to transfer all the knowledge about the subterranean world's language to Lin Yuan, Liu Jie, and the Invisible Demon.

Liu Jie had never seen Genius use its abilities.

Although Liu Jie could sense Genius' quality and grade, he was completely in the dark regarding Genius' abilities.

Now that he was witnessing it, Liu Jie was in awe.

The most difficult part of human interaction was communication, yet Genius could allow two people's minds to be perfectly linked and allow one mind to learn the thoughts of the other person's mind inside out.

This was such a terrifyingly strong ability!

With this ability, the human heart was no longer a complicated puzzle but a movie that could be displayed and watched.

A wave of strange spiritual energy flowed into Liu Jie's brain, and he had no reason to reject Genius' spiritual energy.

Suddenly, Liu Jie felt that he seemed to be able to understand the mass of confusing sounds that were coming from the dimensional lifeforms trapped in the spiderwebs.

He composed himself and realized that he could now completely understand what the dimensional lifeforms were saying.

This realization made Liu Jie inhale sharply.

He had encountered many carcinoma feys in the Spirit Guards' land.

A few of them were S-rank, and their thoughts made all the hair stand up on Liu Jie's neck.

All of them lived in the deepest areas of the Spirit Guards' land and were extremely bloodthirsty.

Some of them would cause disaster the moment they were released, and not even the members of royalty would be able to salvage the situation completely.

But Genius' ability to establish communication links between different lifeforms and share knowledge between them opened Liu Jie's eyes to many possibilities.

These possibilities were currently still unimaginable in any of the worlds.

However, if Genius continued developing its abilities, there was a definite chance of turning those possibilities into reality.

Liu Jie felt that Lin Yuan's sharing of Genius' abilities was a sign of his absolute trust in him, and he planned on keeping the events of today to himself. He would not even share the secret with his friends back at the Return from Faraway Mansion.

The Invisible Demon did not have as many thoughts as it was not surprised by anything Lin Yuan did from the moment it accepted him as a Dictator.

It viewed Dictators as all-powerful.

Lin Yuan did not manage to learn anything new about the Apostles from the Land Imp's mind.

He felt that it was because the Land Imp was too weak and did not have the authority to know about the Apostles.

Lin Yuan did not waste any time and said to the Sacred Sword Wielding Queen, "Sacred Sword Wielding Queen, time to get to work! Prepare 400 units of source-type power. It's going to be used for the Land Imp's Source-Type Cleansing."

The Sacred Sword Wielding Queen said warily, "Master, there are people next to you. I don't think it'll be good for me to use my abilities now."

Lin Yuan glanced at Liu Jie and the Invisible Demon and shook his head.

The Invisible Demon had dedicated its faith to him, and most of the faith stored in the shrine in Lin Yuan's mind had come from the Invisible Demon.

As such, it could be said that the Invisible Demon was his biggest fan.

Source-type power was sacred to dimensional lifeforms, and they safeguarded it with their lives.

With regards to Liu Jie, if Liu Jie had not pushed Lin Yuan aside and sustained the attack in his place, Lin Yuan would probably have been dead now.

Thus, there was no reason for Lin Yuan to put up any walls around Liu Jie.

Moreover, Liu Jie would eventually head to the marsh world with Lin Yuan.

When the Class 6 abyss dimensional rift opened, people would start pouring in, and the existence of the Apostles would eventually become known.

When the time came, Liu Jie would also be able to realize that Wendy and Rising Lizard were Apostles.

Everything in the dimensional worlds was still in the process of being uncovered.

Lin Yuan was essentially a pioneer by building a base in the marsh world.

He planned on taking Liu Jie with him to the marsh world soon. Thus, he was fine with using the Sacred Sword Wielding Queen's powers in front of Liu Jie.

Although the Sacred Sword Wielding Queen was a special sacred source lifeform that was created from two sacred source lifeforms, it was still a known being.

However, this was not the case for Morbius.

Morbius was Lin Yuan's biggest secret weapon, and he had not even told Chu Ci about it.

Lin Yuan planned on taking the secret of Morbius to his grave.

"Don't worry, and just go ahead. Slow down the rate at which you inject source-type power into the Land Imp to give it time to digest the remnants of minerals stored in its body slowly."

The Sacred Sword Wielding Queen replied excitedly, "Leave it to me. I'll separate the 400 units of source-type power into groups of 10 units."

While it spoke, the Sacred Sword Wielding Queen's silhouette appeared behind him.

A strange look appeared on Liu Jie's face when he saw the silhouette.

Liu Jie did not understand why Lin Yuan was activating his sacred source lifeform.

He was not a Creation Master and could not tell what abilities Lin Yuan's sacred source lifeform had. However, during Lin Yuan's fight on the Martial Stage, he had discovered that Lin Yuan's sacred source lifeform had two types of abilities.

One of its abilities was a strong resistance against fire elements, while the other was powerful dark-type attacks.

However, neither of these abilities was applicable in this situation.

Additionally, Liu Jie had noticed that the features of the silhouette were much sharper than before. This was especially so when it came to its skirt, which seemed to encompass a much more beautiful scenery than before.

Chapter 1195: One-Man Army and Mineral Mountain in Human Form

Before Liu Jie thought any further, he saw Lin Yuan and the figure behind him raise their hand.

Amber light shot out of Lin Yuan's palm and shot toward the Land Imp.

At the same moment, the Invisible Demon fell to its knees and assumed a solemn submissive pose as it trembled violently.

This was the first time in the Invisible Demon's life that it was feeling such pure source-type power, and it thought, *"This Class 4 Land Imp is extremely lucky to receive Lord Dictator's blessing. With so much source-type power being injected into it, it will probably be able to evolve into an Apostle today."*

However, the Invisible Demon was not jealous because Lin Yuan had given it a similar promise, and it would soon be able to evolve into an Apostle as well.

It had not undergone the Source-Type Cleansing because it wanted to save up and gain immortal power at the same time that it reached the Apostle rank.

As more source-type energy was injected into the Land Imp, its grayish-green skin sloughed off and revealed greenish-blue skin underneath.

It did not become any taller, but its ears became more pointed, and its teeth grew sharper.

The sharpened teeth would enable the Land Imp to be able to chomp down on harder types of metal.

By the time Lin Yuan injected 200 units of source-type energy into the Land Imp, it had turned into a greenish-blue dwarf.

As more source-type power was injected into it, faint tattoos appeared all over its body.

At first, these tattoos seemed out of place.

But slowly, the tattoos moved into place, and Lin Yuan could make out the shapes of mineral mountains.

When Lin Yuan injected the last portion of source-type power into the Land Imp, a guttural roar erupted from its throat, and an amber-colored totem appeared on the tip of its nose.

The amber-colored totem depicted towering mineral mountains that gleamed with a metallic tint.

This was the Land Imp's awakened faith totem, Metal Mountain Vein Totem.

Lin Yuan used True Data to check on the new Apostle.

[Alien Beast Name]: Vein Land Imp

[Lifeform State]: Apostle

[Alien Beast Class]: Class 4

[Power of Faith]: Extremely weak

[Faith Totem]: Metal Mountain Vein Totem

Natural Skill:

[Metal Growth]: Form a contract with a certain type of metal and absorb it to increase its power. It will be able to produce the metal that it absorbed. Once the metal it formed a contract with reaches a certain level, it will be imprinted on the Vein Land Imp, and it will be able to produce this metal even without consuming more of it. It will be able to swap out the type of metal each time it evolves its grade.

[Heart of Mineral Vein]: When the Vein Land Imp discovers an untouched mineral vein, it will be able to use its blood to activate the heart of the mineral vein and turn it into a vein fairy. The Vein Land Imp will be able to order the vein fairy to mine the mineral vein. Once the vein fairy is done mining, the Vein Land Imp can consume it to increase its power.

Faith Ability:

[Believer Change]: A portion of the energy in the totem is injected into a believer to change it from a dimensional lifeform to a Favored Believer.

Now that the Land Imp had transformed into a fully-fledged Vein Land Imp, Lin Yuan knew that this was the reason for the appearance of the tattoos.

Now that it had become an Apostle, the ability Metal Growth had also become stronger.

Previously, the Vein Land Imp could only form a contract with one type of metal each time, and it would not be able to produce that metal after it increased its grade.

But now, the metal would be imprinted onto the Vein Land Imp once the metal reached a certain level.

Previously, it would have to use up its energy to try to remember the metal.

Although the Vein Land Imp still could not imprint many types of metal after Metal Growth improved, it could still produce metal out of nothing.

As long as it had energy, it would be able to produce the imprinted metal continuously.

Essentially, the Vein Land Imp was a mineral mountain in human form.

Moreover, Heart of Mineral Vein enabled the Vein Land Imp to become a one-man army, and it could mine the mineral veins on its own.

It could even consume the vein fairy afterward and increase its own power.

Lin Yuan could not be more satisfied with the Vein Land Imp.

After the Invisible Demon had its way with the Vein Land Imp, it now regarded Lin Yuan as a god.

When the Vein Land Imp was in the subterranean world, its level had been too low for it to learn about Apostles. Nonetheless, it knew that Lin Yuan had promoted its rank in life.

As conniving as the Vein Land Imp was, it was still grateful to Lin Yuan.

It stood up and bowed to Lin Yuan as it said, "Master, I will only be loyal to you from now on."

Heavy Mountain shot a look at the Invisible Demon, but it was no longer as frightened of the Invisible Demon as it was before.

Although it was still much weaker than the Invisible Demon, its life rank was higher than the Invisible Demon. Now, Heavy Mountain even looked down on the Invisible Demon.

Given that the Class 4 Vein Land Imp was looking at it with disdain, the Invisible Demon was made aware of the difference in their standings as dimensional lifeforms.

Lin Yuan never expected the Vein Land Imp to name itself.

However, this was a sign that it possessed high intelligence.

Yet, it seemed strange for a dwarf to name itself Heavy Mountain, and the name seemed to carry many unfulfilled hopes.

Now that the Vein Land Imp had not only evolved its bloodline but also became an Apostle, the name Heavy Mountain did seem fitting.

Lin Yuan smiled at the bowed Vein Land Imp and said, "Heavy Mountain, do work hard from now on! For now, what type of metal are you currently contracted to?"

Chapter 1196: Spirit Settling Silver Ore

The Vein Land Imp hurriedly stretched out its hand, and Lin Yuan saw metal ions moving.

Slowly, a ball of metal was formed in Heavy Mountain's palm.

"I've been eating mineral rocks for as long as I can remember. I didn't need to use my natural skill to create metal. Hence, I've only formed a contract with one type of metal."

Lin Yuan could not help but massage his forehead. This Land Imp had been born with a golden spoon in its mouth, after all.

Heavy Mountain had been living like a god despite living in the dimensional world where danger was omnipresent.

Other Land Imps would be extremely jealous if they heard of its lifestyle.

When Lin Yuan took a closer look, he saw that the metal in Heavy Mountain's hand was Flame Heart Bronze.

Although Flame Heart Bronze could only be found in the subterranean dimensional rift, it was not valuable and was mainly used to create high-temperature fuel.

Many fire-type spiritual ingredients that came from the abyssal world could be used to replace Flame Heart Bronze.

"Heavy Mountain, since you formed the contract with Flame Heart Bronze when your level was low, you should be able to contract another type of metal now, right?" asked Lin Yuan.

Heavy Mountain nodded vigorously and replied, "Master, yes I can. I can form a contract with another type of metal at any time."

Lin Yuan patted Heavy Mountain's shoulder and said, "Without my permission, you are not allowed to change the type of metal you're contracting. I'll give you a type of metal spiritual ingredient to use, and you should do your best to produce more of it."

Heavy Mountain smiled and revealed a mouthful of sharp teeth as it replied, "Master, leave it to me. I'm the best at producing metal."

It pointed at an area nearby and said, "Master, I can sense a mineral vein about one kilometer in that direction. It's sending out very strong waves."

Lin Yuan turned to say to Liu Jie and the Invisible Demon, "Why don't we go and take a look with Heavy Mountain? There might be hidden precious minerals in the underground mineral vein."

Liu Jie looked at the Class 2 subterranean dimensional rift and asked, "Lin Yuan, what do you plan to do with this pinnacle Class 2 subterranean dimensional rift? Is Silver Corona's sea of flowers able to reach this area and surround the pinnacle Class 2 subterranean dimensional rift?"

Lin Yuan sensed the Silver Corona's current progress before saying with a smile, "Judging from Silver Corona's current power, it shouldn't be possible to reach this area that's 90 kilometers away from where it is. How long can the Web Area Glass Spider maintain its control over this Class 2 subterranean dimensional rift? In two weeks, Silver Corona should be able to reach Gold grade. By that time, its sea of flowers should be able to stretch out to 90 kilometers to the north."

Liu Jie took out two handfuls of Gold Protein Silkworm Chrysalis and scattered them on the web made by the Web Area Glass Spider.

"If so, I won't take the Web Area Glass Spider back for another two weeks. These Protein Silkworms Chrysalis are enough to last the Web Area Glass Spider for two weeks. If there really is a mineral vein, I will instruct the Web Area Glass Spider to spin a web long enough to reach it and seal the area off."

As a member of the Radiance Hundred Sequence, Liu Jie was very aware of the value of a mineral vein. Moreover, there was a chance that this mineral vein could be a large one.

Even if the mineral vein turned out to be full of low-grade or cheap minerals, a large mineral vein's worth of minerals would still be able to turn over for a tidy sum.

Lin Yuan said happily, "I shall leave the matter in your hands. However, it will require the Web Area Glass Spider to use up a lot of energy. Liu Jie, you can let the Web Area Glass Spider consume the weak dimensional lifeforms currently trapped in the web. Try to consume all of them in less than a month."

Liu Jie instructed the Web Area Glass Spider to eat the Protein Silkworm Chrysalis as he said to Lin Yuan, "As long as a strong presence doesn't come and damage the spiderwebs, these Protein Silkworm Chrysalides will be enough. If any dimensional lifeform becomes too weak, the secretions on the spiderwebs will enter the dimensional lifeform's mouth, and its nutrients will keep the dimensional lifeform going. Moreover, the secretions have healing properties. Once Silver Corona's sea of flowers reaches this area, all the dimensional lifeforms that have crawled out of the pinnacle Class 2 subterranean dimensional rift during this time will become Silver Corona's sustenance."

While they spoke, they arrived at the area that Heavy Mountain had pointed out.

Heavy Mountain had the ability to morph geographical landforms, and it manipulated the ground below its feet to cave in.

The soil stopped caving in once it reached 30 meters deep.

Heavy Mountain reached down and searched the ground with its hands. Soon, it found several pieces of silver mineral rocks that gleamed with a metallic tint.

It returned to the surface with these mineral rocks and presented them to Lin Yuan as it said, "Master, this is the type of mineral produced in this mineral vein. The quality might seem bad on the outside, but once you break into it, the minerals inside will be of better quality."

Lin Yuan took a look at the mineral rock and realized that it was the Spirit Settling Silver Ore.

When Creation Masters were concocting spirit fluids that they were familiar with or spirit fluids that were concocted with cheap spiritual ingredients would commonly make use of crystal bottles.

Creation Masters would use the bottles made of Spirit Settling Silver instead of the crystal bottles they often used in order to stabilize the spirit fluids and reduce the chances of it failing.

Spirit Settling Silver bottles were sold in the Creation Master Association in the Radiance Federation for higher prices than the market rate.

Spirit Settling Silver did occasionally appear on the market, but they were always bought up by Creation Masters who had connections before they even had the chance to reach Star Web.

Lin Yuan was well aware of this as Creation Masters were all rich and could even afford to buy up many expensive resources such as the Golden Lotus Brocade Pearls.

Thus, there was definitely no issue for them to get their hands on the Spirit Settling Silver bottles.

Chapter 1197: Lifespan Mouse

Since the Spirit Settling Silver bottles were a necessity for Creation Masters, the high demand resulted in a high price for Spirit Settling Silver.

Although a fair amount of Spirit Settling Silver was produced in the Radiance Federation, its price was still high enough to rival some Gold metal spiritual ingredients.

Lin Yuan was sure that he would have no problem selling the Spirit Settling Silver produced in this mineral vein.

He did not expect to find this pot of gold on his second day in the Divine Wood Federation.

Lin Yuan asked, "Heavy Mountain, can you find the heart of the Spirit Settling Silver Ore's mineral vein?"

"I can find it, but I'll have to dig deep into the mineral vein to search until I find its position. According to the size of the mineral vein, this can take anywhere between two days and seven days."

Lin Yuan pointed at the ground below him and said, "Then, you shall remain here to search for it! Once you find it, you can use Heart of Mineral Vein to form a contract with the Spirit Settling Silver Ore and start producing it. I will return for you in two days' time."

The Web Area Glass Spider's webs had reached this area, and all Heavy Mountain had to do was communicate with the Web Area Glass Spider so it could produce webs to seal off the area.

Lin Yuan's plate was too full to sit here and accompany Heavy Mountain.

The Invisible Demon had returned to Lin Yuan's shadow.

Lin Yuan and Liu Jie returned to the underground palace together.

After one day away, Silver Corona's sea of bone lotus flowers was still the size of a soccer field, but each flower was now twice its previous size. The bone lotus flowers looked strong and elegant.

The white bone mist above the sea of flowers was thick and could block sight better than before. It could even block the dark red entrance of the dimensional rift.

The moment he returned to the underground palace, Lin Yuan ordered Silver Corona to slow down the pace of every other task besides turning dimensional lifeforms into hermit dead servants and use the leftover spiritual power to spread the sea of flowers toward the north.

The underground palace was currently uninhabitable.

Although Hu Quan was a Class 5 Spirit Craftsman, one day was not even enough to fully understand the framework of the underground palace, much less produce a blueprint or begin construction.

Given Hu Quan's dedication to perfection when it came to his job, it would take another month for him to produce a blueprint.

There was also no way he could build the underground palace quickly with his lack of manpower.

Hence, Liu Jie set up several tents next to the underground palace where the people could live comfortably before the underground palace was built.

Lin Yuan called Feng Shuang and Elder He over as he would take them to the marsh world.

As for Hu Tian, he planned on leaving him in the Divine Wood Federation for some time to help Hu Quan with constructing the underground palace. After all, his fcy was suitable for such manual labor.

After he stored Feng Shuang and Elder He inside the Jeweled Cave Golden Toad, Lin Yuan entered one of the tents Liu Jie had set up.

Just as Lin Yuan was about to enter the Spirit Lock spatial zone, the clingy squirrel squeaked and climbed up to his shoulder.

Lin Yuan brought this spirit qi-sensitive squirrel to the Spirit Lock spatial zone with him.

He had a lot to do during this trip to the Spirit Lock spatial zone.

The moment he entered the Spirit Lock spatial zone, he saw the Hundred Questions Beasts concocting spirit fluids.

As such, the spacious Spirit Lock spatial zone now seemed cramped even though every Hundred Questions Beast was only taking up one square meter of space.

The Hundred Questions Beasts' hands made of spiritual energy had to be curved in a way that would not get in the way of another Hundred Questions Beast.

Genius had not even taught most of these Hundred Questions Beasts. Once they were done learning from Genius, Lin Yuan would probably have no place to let his foot fall in the Spirit Lock spatial zone.

He called over Genius, who was using Connected Tails to teach eight Hundred Questions Beasts.

“Genius, the Spirit Lock spatial zone is way too cramped now. Why don’t you pick some Hundred Question Beasts who can work independently? I’ll take them to the marsh world where they can continue concocting spirit fluids,” said Lin Yuan.

He thought about Purple Afterglow’s report that the 35 Spirit Craftsmen had finished building the breeding rooms he had asked them to build first.

The breeding rooms would be the best place for the Hundred Questions Beasts to continue concocting spirit fluids.

Every Hundred Questions Beast could have its own room to work in.

Genius meowed and replied, “Yuan, I’ve used Intelligent Cat’s Spirit to form a contract with every Hundred Questions Beast I taught. There won’t be a problem even if they aren’t in the Spirit Lock spatial zone.”

Genius started carefully selecting Hundred Questions Beasts.

Lin Yuan was about to search for a few different types of jade-textured wood in which he would plant the Intelligent Ganoderma Sinensis spores that he had obtained from the Miao family when he saw fur falling like snow from his shoulder.

He turned and saw the small squirrel under the pile of fallen fur.

Lin Yuan pushed the fur away and saw that its fur had turned completely orange-red, and it was as though it was drunk on spirit qi.

Once the squirrel’s fur was done shedding, he used True Data to check on it again.

Now, he could see its True Data. This meant that it had transformed into a fey.

Lin Yuan inhaled sharply when he saw the squirrel’s name—Lifespan Mouse!

This name seemed to insinuate a deep connection with life!

Chapter 1198: Moon Empress’ Opportunity at Immortality!

When Lin Yuan saw the Lifespan Mouse’s abilities, he was stunned.

A moment later, he could not help but slap his leg.

He was usually civilized but could not help but curse at this moment, “What the hell? How is this fey real?”

The Lifespan Mouse’s Normal ability was Knotted Lifespan.

[Knotted Lifespan]: The Lifespan Mouse’s lifespan will be tied together with its contractor’s lifespan. When its contractor’s lifespan is at its end, the Lifespan Mouse can transfer its lifespan to its contractor to replenish their lifespan. When one of them dies, the other will also die. (Due to the construction of the Lifespan Mouse’s body, it cannot increase its power or gain new abilities and exclusive skills. Its life rank also cannot be increased.)

This description did not seem extraordinary as it only seemed to tie two lifespans together.

When both lifeforms were alive, their lifespans would be reduced at half their original rate.

However, after the squirrel transformed into a fey, it had another innate ability. This innate ability was to consume and digest items that contained vitality. It would then store the vitality in its body.

When this ability was used in conjunction with Knotted Lifespan, the Lifespan Mouse's capabilities transcended what they appeared to be.

As long as it continuously ate spiritual ingredients that contained vitality, its lifespan would not deplete, and its contractor would not have to worry about dying due to the passage of time.

Since the beginning of time, this had always been an unrealistic hope.

Not even thearch-class experts had an unlimited lifespan, albeit they lived much longer than the average person.

After the world became filled with spirit qi, normal people could live to 100 or even 110 years old as long as they were not afflicted by illness. It was also not uncommon for people with longer lifespans to live to 130 years old.

If the person were an A-rank king-class spirit qi professional, they would even be able to live to 160 years old without issue.

Emperor-class experts who knew how to take care of themselves would even be able to live to 180 years old.

Once a spirit qi professional reached S-rank and was thearch-class with a Creation Breed fey, they could even live to 250 years old as long as nothing damaged their roots.

This was one of the key reasons why thearch-class power was so important to top factions.

As long as a thearch-class expert steadily improved themselves without doing anything that would put their lives at risk, they could guarantee 250 years of service to the top faction.

However, all living beings had to live by the laws of nature. All creatures, strong or weak, outstanding or unassuming, could only live as well as they could within the lifespan that was given to them.

Even people as strong as thearch-class experts would eventually end up six feet underground and become nothing more than fertilizer for the soil.

However, the Lifespan Mouse's appearance broke this cardinal law of nature and offered the chance at true immortality.

Lin Yuan did not believe that the thirst for immortality would be nonexistent in a world where people formed contracts with feys to use them as weapons.

Even he had considered immortality when he first reached this world and came to understand it.

He could imagine how hopeless and lonely an expert would feel when they had reached the end of their lifespan. They would probably be willing to do anything as long as it meant they could extend their life.

If the Lifespan Mouse appeared before the dying expert, they would surely go mad, driven by their desire to give up anything in order to extend their life.

The Lifespan Mouse's ability touched on every living creature's desire to live.

Nonetheless, the Lifespan Mouse was not without its faults. It had two drawbacks.

Firstly, its power would forever be stuck at Normal I/Normal. This meant that its contractor would always have a Normal I/Normal fey amongst his contracted feys.

Secondly, Knotted Lifespan tied the Lifespan Mouse and its contractor's lifespans together. The death of one would result in the death of this other.

This meant that the death of the Lifespan Mouse would cause its contractor to die immediately.

The Normal I/Normal Lifespan Mouse was too weak, and many children would have the strength to crush it to death.

However, these two issues were not problems in Lin Yuan's mind as he could keep it in the Spirit Lock spatial zone after contracting it.

Although it needed to consume spiritual ingredients that contained vitality, it could consume them inside a fey storage box.

As such, he would not have to worry about the Lifespan Mouse coming into any danger.

Since the Lifespan Mouse was only Normal I/Normal, Lin Yuan did not have to worry about it eating up too much of its spiritual energy, and he even had the means to contract it now.

He also did not have to worry about obtaining vitality-containing spiritual ingredients as they were expensive but common.

No expert that got their hands on the Lifespan Mouse would have to worry about finding food for it.

At that moment, the Moon Empress came to Lin Yuan's mind.

He felt that the Moon Empress was the best person to contract the Lifespan Mouse.

He, Chu Ci, Liu Jie, Wen Yu, and the rest were all around their 20s and still had more than 100 years in their lifespans.

Their lives were just beginning, and they had no reason to worry about dying of old age as of yet.

Lin Yuan did not know exactly how old the Moon Empress was as she always had the countenance of a young woman.

However, she was definitely up in years.

After all, decades had already passed since she became a member of royalty and built the Radiant Moon Palace on Leaning Moon Mountain.

Once she contracted the Lifespan Mouse, she would never have to worry about dying of old age again.

Chapter 1199: Growing Intelligent Ganoderma Sinensis

If the Moon Empress became immortal, she could do whatever she wanted whenever she wanted and live with her young countenance forever.

This was what Lin Yuan wanted, and it was his way of showing his Master that he cared.

Moreover, it was likely that this was not the only Lifespan Mouse in existence.

The five members of Withered Cliff Thief Death Corps that Lin Yuan had captured had looked at the Lifespan Mouse's pre-fey form with disdain.

This indicated that there were many Lifespan Mice in the Divine Wood Federation.

As scarce as fur was in the Divine Wood Federation, the poor Withered Cliff Thief Death Corps' members would rather dress in vines than wear the skin of the Lifespan Mouse.

This was not surprising as the Lifespan Mouse's pre-fey form had coarse and brittle hair.

Now, it looked completely different.

Although it still could not compare to Genius, it now had orange fur covering its body.

Lin Yuan stroked the Lifespan Mouse's head before storing it in a Bronze fey storage box with a serious expression.

He planned on visiting the Radiant Moon Palace the next time he returned. He would be able to tell the Moon Empress about the Lifespan Mouse then.

After the Astronomical Parliament parliamentary meeting was over and he returned to the Divine Wood Federation, he planned on searching for more Lifespan Mice.

If there were truly many unevolved Lifespan Mice in the Divine Wood Federation, he would be able to use them to change the main world as people knew it.

Now, he started to carefully look through the pile of jade-textured wood on the shelves.

If Lin Yuan did not have Genius or he was not the Moon Empress' disciple, there was no way he would have known about something like the Intelligent Ganoderma Sinensis.

Even if Genius absorbed all the information from Star Web, information on Star Web was restricted in such a way that information about the Intelligent Ganoderma Sinensis would never have appeared there.

Lin Yuan had only come to know about it because Genius had picked up the knowledge from the Hidden Moon Pavilion.

Morbius' True Data could see a fey's properties and list their abilities and exclusive skills. However, Lin Yuan had to figure out for himself what was the best way to nurture the fey.

Although he possessed the Intelligent Ganoderma Sinensis' spores, he would have to experiment and see which type of jade-textured wood would enable the spores to grow the quickest.

Compared to the Intelligent Ganoderma Sinensis, the price of the jade-textured wood was nothing.

After all, the Miao family only allowed its main emperor-class and thearch-class experts to utilize the Intelligent Ganoderma Sinensis.

Liu Yanshan had been one of the select few who used the Intelligent Ganoderma Sinensis.

Lin Yuan needed a large amount of Intelligent Ganoderma Sinensis to evolve Genius from Fantasy I to a higher quality.

Hence, he did not hold back from using all the types of jade-textured wood that he possessed.

He had a total of 23 types, and he cut all of them into the same size and shape to ensure that the experiment was fair and reliable.

Lin Yuan carefully scattered the Intelligent Ganoderma Sinensis spores onto the jade-textured wood and began to observe them carefully.

The Intelligent Ganoderma Sinensis' growth depended on the jade-textured wood and the spirit qi in the surroundings.

All of the jade-textured wood that Lin Yuan possessed was 100% jade-textured and considered the highest quality.

As for the concentration of spirit qi, there was probably no place on earth that had more concentrated spirit qi than the Spirit Lock spatial zone.

Now that both conditions for its growth were fulfilled, the Intelligent Ganoderma Sinensis spores could grow at their maximum rate and would soon produce different strains of Intelligent Ganoderma Sinensis.

Everything progressed as Lin Yuan expected. A small Intelligent Ganoderma Sinensis sprout grew on the jade-textured agarwood, cedarwood, red sandalwood, and laurelwood within half an hour.

Lin Yuan separated these four wooden pieces from the rest to pick the best out of them.

However, he would not be wasting the Intelligent Ganoderma Sinensis spores that grew on the other types of wood.

Once the sprouts grew strong enough, Lin Yuan would replant them.

Out of the four wooden pieces, the Intelligent Ganoderma Sinensis grew much quicker in the cedarwood than in the other three wooden pieces.

However, Lin Yuan did not immediately deem cedarwood the best type of wood to grow the Intelligent Ganoderma Sinensis. He also had to consider the strength of the sprouts that grew from it.

It did not take long for Lin Yuan to spot issues.

Although the sprouts were growing quickly in the cedarwood, they were all skinny and weak.

Lin Yuan touched all the sprouts that were growing and found that the sprouts growing in the cedarwood moved the most.

Thus, he decided against choosing the cedarwood as the quality was more important than speed.

Moreover, the sprouts growing on the other three types of wood were not growing slowly either.

Soon, Lin Yuan observed issues with the sprouts growing on the laurelwood.

The laurelwood was the strongest wood out of the four. As a result, the spores could only absorb the nutrients on the surface and had trouble penetrating further than five centimeters into the laurelwood.

Hence, Lin Yuan also decided against using laurelwood.

Both the sprouts growing on the red sandalwood and cedarwood appeared to be strong and growing at a relatively similar rate.

The only difference was that the caps of the sprouts growing from the cedarwood were larger.

Most of the Intelligent Ganoderma Sinensis' nutrients were stored in its purple cap, and its size indicated the nutrients within the Intelligent Ganoderma Sinensis.

Eventually, Lin Yuan chose the jade-textured cedarwood as the best type of wood to grow the Intelligent Ganoderma Sinensis in.

Chapter 1200: Return to the Marsh World

Lin Yuan had been using the expensive cedarwood as incense.

He liked the subtle calming fragrance of cedarwood and always kept a large stock of jade-textured cedarwood with him.

Lin Yuan took out all the jade-textured cedarwood he had and cut them using feathers made of Day and Night Spirit Silver.

He planned on replanting the Intelligent Ganoderma Sinensis spores into them.

At that moment, Genius was done selecting the Hundred Questions Beast and said in a child-like voice, "Yuan, there are already 50 Hundred Questions Beasts that can work independently and concoct spirit fluids on their own. All of their grades have been increased to Diamond using spirit fluids. They might not be able to use their souls to concoct spirit fluids and only have the knowledge of Class 4 Creation Masters, but the knowledge enables them to be outstanding pinnacle Class 3 Creation Masters."

Genius' eyes shone with pride.

This abruptly reminded Lin Yuan of Chu Ci's homeroom teacher, Teacher Bao.

Teacher Bao's eyes had shone with the same pride when he praised Chu Ci.

Lin Yuan looked at the various colored Hundred Questions Beasts and said, "All of you help me transplant the Intelligent Ganoderma Sinensis sprouts from the other types of wood onto the jade-textured cedarwood."

The Hundred Questions Beasts happily got to work.

All of these Hundred Questions Beasts had the abilities of pinnacle Class 3 Creation Masters and had no issue with such a task. In fact, they performed it better than Lin Yuan would have.

While the Hundred Questions Beasts were hard at work, Lin Yuan coughed and said, "I'm nurturing these Intelligent Ganoderma Sinensis to evolve Genius' quality. Once Genius evolves to Fantasy V, it will not need as much Intelligent Ganoderma Sinensis. I also plan on investing more resources into nurturing Intelligent Ganoderma Sinensis that can produce spores. These spores will be planted in the marsh world. When the time comes, all of you will have the chance to consume Intelligent Ganoderma Sinensis as well."

Heaven and Earth Feys like the Intelligent Ganoderma Sinensis were the most beneficial spiritual ingredients for spiritual-type feys.

Naturally, Genius had also included the information about the Intelligent Ganoderma Sinensis while it was teaching the Hundred Questions Beasts.

Hence, all the Hundred Questions Beasts knew how precious the Intelligent Ganoderma Sinensis was.

The Hundred Questions Beasts all looked at Lin Yuan with gratitude and enthusiastically started thanking him.

Lin Yuan brought ten of the Hundred Questions Beasts over to the Pure Land of Bliss.

He collected the newly produced Golden Lotus Brocade Pearls while he checked on the Spirit-Mouthed Peonies that he had forcefully split into child ramets.

Under the nourishment of the pure spirit qi in the Spirit Lock spatial zone, the Spirit-Mouthed Peony child ramets had quickly grown into full-grown plants, and red flowers had sprouted atop each of them.

The newly grown Spirit-Mouthed Peonies were currently greedily absorbing the spirit qi and storing them within the flowers.

Lin Yuan nodded in satisfaction as he looked at the thriving Spirit-Mouthed Peonies on the Pure Land of Bliss.

The ten Hundred Questions Beasts started splitting the Spirit-Mouthed Peonies into more child ramets.

Initially, there were only 100 child ramets. But now, there were 500 of them.

The 500 Spirit-Mouthed Peonies clustered together and took up all the space on the Pure Land of Bliss to the point that Brocade Zither's living area had become much smaller.

Unless the Spirit Lock spatial zone transformed again and the Pure Land of Bliss increased in size, the maximum number of Spirit-Mouthed Peonies that could be grown in the Spirit Lock spatial zone was 500.

However, this was not just because of the Pure Land of Bliss. The spirit pool was also unable to keep up with any more Spirit-Mouthed Peonies.

Once all the 500 Spirit-Mouthed Peonies sprouted flowers and started absorbing more spirit qi, any accident that took place in the Spirit Lock spatial zone would affect its ecosystem.

The spirit pool would produce just the right amount of spirit qi to sustain the current ecosystem in the Spirit Lock spatial zone, and there was no allowance for error.

Nonetheless, this also utilized the spirit qi to its maximum ability.

Soon, Genius and the 40 other Hundred Questions Beasts had finished replanting the Intelligent Ganoderma Sinensis spores, and Lin Yuan stored all the 50 Hundred Questions Beasts into the Diamond fey storage box.

He went through Klein Hub into the marsh world.

Once he re-entered the marsh world, he noticed that it looked completely different from when he was last here.

Before he left, the area that the base was in would be nothing more than a stretch of mud if the Marsh Ground Sphagna had not become Wendy's Favored Believer.

After the Marsh Ground Sphagna became Wendy's Favored Believer, it covered the stretch of mud in a layer of thick green carpet.

The green carpet extended past the construct.

One of the base's tall buildings' construction was finished while the others were still in the process of being built.

Once Lin Yuan entered the marsh world, the Kill Food Sky Butterfly noticed him.

But even before the Kill Food Sky Butterfly reached him, Liu Tong had run up to him and given him a report of the base's construction progress.

All of the 35 Class 2 and 3 Spirit Craftsmen had put their lives at risk during the time they had been working in the marsh world.

All of them only had six hours of rest each day and worked in shifts.

In order to reduce his rest time and produce better work, Liu Tong had also contracted a Vitality Sloth like Hu Quan had done.

Lin Yuan could not help but be touched by all their effort.

As Liu Tong passionately introduced himself to Lin Yuan, the latter waved his hand and said, "Liu Tong, call over the other 34 Spirit Craftsmen. I have something to say to all of you."

Liu Tong hurriedly did as Lin Yuan said and jogged over to gather all the Spirit Craftsmen who had been working on various sections of the construction area.

Rising Lizard bounded toward Lin Yuan with Wendy on its back.

Lin Yuan noticed that both of them had changed significantly since he last saw them.
