

## Merchant 1511

### Chapter 1511: Condition for Blackie's Quality Evolution

Lin Yuan estimated that after Genius consumed this batch of the Intelligent Ganoderma Sinensis, it would evolve to Fantasy IV at the very least. He only needed to nurture another batch of Intelligent Ganoderma Sinensis for Genius to reach Fantasy V.

Chimey had stayed in its nest in the Phoenix Perching Chinese Parasol Tree as it continuously absorbed energy from the strange flames to temper its bloodline.

Lin Yuan had started giving Chimey high-grade strange flames to absorb a month ago.

Now that Chimey had evolved to Fantasy IV, its appearance changed slightly.

It was likely that Genius and Chimey's bloodlines would change completely once they reached Fantasy V.

Sun Ningxiang had not been idle recently as she had been helping Lin Yuan prepare for the Warm Sun Fund and pick out a large group of spirit qi professionals and normal people willing to retreat from society.

Lin Yuan moved all the people that Sun Ningxiang had chosen into the marsh world and handed them over to Liu Tong so he could start managing them.

Once the emperor-class experts who had been in contact with Lin Yuan arrived at the Royal Capital, Lin Yuan would take the Mother of Bloodbath with him to meet up with the emperor-class experts.

Before they left, the Mother of Bloodbath and Lin Yuan attached Faceless Pape to their faces.

The Mother of Bloodbath was a Myth III fey with the same combat power as Creation Breed feys.

If the Mother of Bloodbath could use its Heavenly Family Fey bloodline to trigger the sun's power and use it during combat, the Mother of Bloodbath would be able to break through its limits to reach Creation II or even Creation III.

Thus, although the Mother of Bloodbath was only a Suzerain/Myth III fey now, it was more than capable of helping the emperor-class experts' feys to overcome their World Cleansings.

Lin Yuan and the Mother of Bloodbath remained on the outskirts of the Royal Capital for the entire day.

While the Mother of Bloodbath was taking on the World Cleansings, Lin Yuan discreetly activated the Pure Land of Bliss to absorb the World Graces.

Since the Pure Land of Bliss only absorbed 10% of the World Graces, it would automatically stop once it absorbed that amount.

Thus, the evolved Myth Breed feys would not be suffering great losses.

In a day, a large pile of spirit qi crystals had formed on top of the Pure Land of Bliss.

As a result, the Wind Speed Rapid Antelope was extremely busy.

The Wind Speed Rapid Antelope carefully separated the spirit qi crystals by type.

The small mountain of spirit qi crystals was even taller than the Wind Speed Rapid Antelope.

After returning to the mansion, Lin Yuan entered the Spirit Lock spatial zone to use the spirit qi crystals to nurture his feys.

He placed the Jasmine Lily on the nurturing table in the Spirit Lock spatial zone before he summoned Purple Afterglow out of the marsh world and Blackie out of the Submerged Flood Dragon Lake.

He instructed Blackie to manipulate itself until it was only one meter long.

He glanced at Genius, Chimey, the Jasmine Lily, Purple Afterglow, Blackie, and the Remembrance Soul Whale before tugging his sleeve and releasing the Source Sand's true body.

"I will evolve all of you until you reach Diamond X."

Genius and Chimey were the first to reply to Lin Yuan. One of them jumped onto Lin Yuan's shoulder while the other landed on his ear and affectionately nestled against his face.

Soon, the Remembrance Soul Whale and Purple Afterglow replied to him too.

The last ones to reply to him were the confused Blackie and Source Sand.

As for the Jasmine Lily, Lin Yuan needed to carry it over if he wanted to have a meeting with his feys.

Lin Yuan did not have much hope that a Platinum/Fantasy plant-type feys would have much intelligence.

However, as he looked at the Remembrance Soul Whale happily circling him, he felt momentarily awkward.

He reached out and patted the Remembrance Soul Whale's head as he said, "You haven't reached Fantasy Breed, so you'll just have to listen quietly."

The Remembrance Soul Whale did not look disappointed at all. It was as though it was already happy enough just staying by Lin Yuan's side.

Lin Yuan had more feys than the ones who were presently in front of him. Red Thorn, Silver Corona, Brocade Zither, Shiny, Dark Blue, the Floating Island Whale, Gray, and the Acid Corrosion Queen Bee were all considered Lin Yuan's feys.

Lin Yuan had evolved the Acid Corrosion Queen Bee to Diamond X/Legend long ago. However, it had not comprehended a Willpower Rune from the environment.

Red Thorn needed blood energy, and Silver Corona needed soul energy to increase their power. These could not be provided by spirit qi crystals.

Brocade Zither was Lin Yuan's secret pot of gold. Each time it evolved its grade and quality, the Golden Flower Brocade Pearls would be updated.

Hence, Lin Yuan would not evolve Brocade Zither easily.

Shiny was a fey with the Barren bloodline and needed dragon livers and phoenix blood.

Dark Blue and the Floating Island Whale needed pure water-elemental energy.

Gray needed to absorb various weather phenomena to evolve its grade and quality.

Thus, none of them needed spirit qi crystals to evolve themselves, and there was no need for Lin Yuan to call them over.

First, Lin Yuan evolved Blackie, the Jasmine Lily, and Purple Afterglow.

With the nourishment from a large number of spirit qi crystals, Blackie, the Jasmine Lily, and Purple Afterglow evolved to Diamond X. However, Purple Afterglow and Blackie were Fantasy I, while the Jasmine Lily was Fantasy III.

The best way for Blackie to increase its quality would be to absorb the essence blood from pure flood-dragon-species feys.

This was very rare, but it was likely that Coiling Dragon's Valley had a stock of it.

Lin Yuan had heard Long Tao mention that all the main-dragon-species feys in their family had to give up one drop of essence blood every decade to go into storage.

Coiling Dragon's Valley always had fewer thearch-class experts than Connected Beast Park because it was more difficult to evolve the grades of dragon-species feys.

Even without his connection to Long Tao, Lin Yuan could use Law Crystals to trade for the essence blood of main-dragon-species feys from Coiling Dragon's Valley.

Since Long Tao was his good friend, he did not mind helping Coiling Dragon's Valley become a top faction.

Lin Yuan had used the Sea Burial Lotus Flower's sea burial crystals to boost the Jasmine Lily's previous evolutions.

However, the Sea Burial Lotus Flower had transformed into the fairy-type fey Silver Corona, and the sea burial crystals at the Sea Burial Lotus Flower's roots had changed into its body.

Nonetheless, the Sea Burial Lotus Flower that Lin Yuan planted next to the spirit pool could still absorb spirit qi to produce sea burial crystals. Even if those sea burial crystals were taken, Silver Corona would not be hurt in any way.

### **Chapter 1512: Clear Zither Change Voice**

Now, the sea burial lotus flowers were much larger than the previous time when Lin Yuan fed them to the Jasmine Lily.

Lin Yuan yanked the sea burial crystals out before he planted the Sea Burial Lotus Flower next to the spirit pool so that it could continue to absorb spirit qi.

He then placed the spirit qi crystals on the Jasmine Lily's leaves so that it could absorb them.

As the Jasmine Lily absorbed the sea burial crystals, its quality evolved from Fantasy III to Fantasy V.

Now, Lin Yuan finally had a Fantasy V fey.

He should be delighted that the Jasmine Lily had evolved.

However, his headache returned when he thought about Purple Afterglow's evolution.

Purple Afterglow had the Purple Afterglow Beauty Goddess Butterfly and Kill Food Sky Butterfly's high-class bloodlines.

In order to evolve the Purple Afterglow's quality, he could collect some of the Blue Flash Purple Butterfly's scale powder and feed it to Purple Afterglow.

However, this was not the best way to evolve the Purple Afterglow, and it did not fit with Lin Yuan's methodology of evolving feys.

He needed to find the Nirvana Blaze Butterfly to nurture Purple Afterglow in the best way. He would collect the Nirvana Blaze Butterfly's powder and feed it to Purple Afterglow.

However, Lin Yuan had no idea where he could find the Nirvana Blaze Butterfly.

Lin Yuan had asked the Cage of Brahma Insects if they had the Kill Food Worms stocked up and if they would be willing to give him one if he asked.

However, no Nirvana Blaze Butterflies existed in the Cage of Brahma Insects.

The Nirvana Blaze Butterfly was not a normal fey but one that had mutated.

Any butterfly-species fey had the possibility of evolving into the Nirvana Blaze Butterfly, but the chances were extremely low.

Although the Nirvana Blaze Butterfly was recorded in history books, unlike the Purple Afterglow Beauty Goddess Butterfly, there had only been two of them ever recorded.

Moreover, both of them had perished in endless nirvana. Neither had been able to defeat the odds to break through to an unknown bloodline.

Without the Nirvana Blaze Butterfly, Lin Yuan did not want to force Purple Afterglow to use the Blue Flash Purple Butterfly's scale powder to evolve itself.

Purple Afterglow had already reached Diamond X/Fantasy I, and it was very useful during combat.

The scale powder would be sufficient to seal off the feys that relied on elemental combat.

Given that Blackie, the Jasmine Lily, and Purple Afterglow had not gained new abilities when they evolved, Lin Yuan sighed softly.

He put so much effort into nurturing them; they would have been impressive if they had gained new abilities.

Lin Yuan wondered if he would be able to see his Spirit Locked feys gain high-grade abilities once Morbius' grade evolved.

After he was done evolving the Jasmine Lily, Blackie, and Purple Afterglow, Lin Yuan prepared to evolve Genius and Chimey.

Genius was currently Diamond I/Fantasy II, while Chimey was Platinum III/Fantasy III.

After using numerous spirit qi crystals, both of them reached Diamond X.

Unlike Chimey, Genius was already Diamond I. Thus, Genius did not gain any new abilities.

Chimey used to be Platinum but was now Diamond grade. As such, it gained a new ability.

Lin Yuan used True Data to check on Chimey.

[Fey Name]: Clear Voice Luan Sparrow

[Fey Species]: Plume Sparrow genus/Luan species

[Fey Grade]: Diamond (10/10)

[Fey Type]: Sound/Light

[Fey Quality]: Fantasy III

Abilities:

[Shattered Jade Voice]: Fire a giant musical note at the designated target that has a beautiful sound of jade shattering. The jade-shattering sound has a certain disruption effect. When struck by the giant musical note, it would split into ten spiraling Sound Thrust.

[Bathed in Light]: Bath the body in clear sunlight. When the sunlight shines on the body, it can quickly recover one's exhausted vitality.

[Sunlight Rays]: Emits various rays from the sun that will cause negative weakening to the target. At the same time, the Sunlight Rays can help to increase a plant type fey's cellular activity.

[Nirvana Light Swansong]: Leaving just a trace of one's vitality and sealing it inside the sun on the wings. The rest of the vitality would burn into sunlight energy. Before the sunlight energy vanishes, it will negate most of the physical and elemental damage.

[Clear Zither Change Voice]: Place an anchor on something that can release light-type energy. By controlling this entity or whatever is connected to this entity, one's voice or voice-type ability can be applied to this entity and dispersed with this entity at the center.

Exclusive Skill:

[Clear Sky]: After a clear chirp, the clouds would disperse, summon the morning sun and clear up the sky. The darkness will be repelled.

[Radiant Body]: Rapidly absorb the power of the sun and form a Radiant Body from the huge amount of solar energy gathered in the body.

Lin Yuan noticed that Chimey's new ability was called Clear Zither Change Voice.

This ability was interesting!

Lin Yuan was fascinated by its ability to anchor itself to an entity that could release light-type energy.

There were many things that could release light. There were metal-type spiritual ingredients, strange flames, and most light-type feys.

The thing in the world with the most light-type energy was the unchanging sun.

When Chimey used Clear Zither Change Voice to take control of strange flames or metal-type spiritual ingredients, it would gain a microphone.

Moreover, Clear Zither Change Voice could take control of anything connected to this entity as well, and Chimey would be able to place his light-type energy in this as well. It would then spread its voice with it at the center.

If so, could the anchor be placed on the sun?

If Chimey could do so, the entire world would be able to hear its voice.

At that point, Chimey would become a global idol whose voice could reach any person in the world.

It would be a golden singer who used the sun as its microphone!

However, placing the anchor on the sun would be difficult.

Even if Chimey could reach Immortal, it would not be powerful enough to control the sun.

By communicating with Chimey, Lin Yuan learned that Clear Zither Change Voice had a limited range that it could spread its voice.

However, the stronger the entity that the anchor was placed on, the more light-type energy it would contain and the further Chimey's voice would be able to travel.

### **Chapter 1513: Sun Singer**

In order to test if Clear Zither Change Voice could be applied practically, Lin Yuan took out a Bronze metal-type spiritual ingredient Floating Light Aluminium and instructed Chimey to use Clear Zither Change Voice to control it.

It did not take long for the Floating Light Aluminium to be set as the anchor.

Lin Yuan left the Spirit Lock spatial zone to test Chimey's ability and traveled to the outskirts of the Royal Capital.

Lin Yuan noticed that when Chimey sang while controlling the Floating Light Aluminium, the Floating Light Aluminium was like a megaphone.

The voice produced from the Floating Light Aluminium was similar to Chimey's. However, the voice from the Floating Light Aluminium could travel three kilometers while Chimey's could only travel 300 meters.

Lin Yuan continued to experiment. This time, he took out a ball of high-grade strange flames.

“Yuan, it would be easier to get this ball of strange flames to acknowledge me instead of me trying to take control of it,” said Chimey.

Chimey flapped its wings and flew over to the strange flames.

Chimey used the light element it released to interact with the light released by the strange flames.

Soon, the strange flames were anchored.

By enabling the strange flames to acknowledge Chimey, Lin Yuan understood that anchoring something would use up Chimey’s light-type energy.

In order to get something to acknowledge Chimey, the latter would be able to use up the other party’s light-type energy.

Through the experiment and after gaining the acknowledgment of the strange flames, Chimey’s voice could now travel a full 50 kilometers.

It could be seen that the anchored entity had a direct relationship to the strength of the broadcasting ability.

Lin Yuan remembered that Chimey could also use voice abilities through the anchored entity.

Currently, Chimey’s only voice ability was Shattered Jade Voice.

Lin Yuan ordered, “Chimey, use these strange flames to release Shattered Jade Voice to its greatest extent.”

Chimey let out a cry, and Lin Yuan saw that the effects of Shattered Jade Voice could be seen 50 kilometers away.

Lin Yuan told Chimey to use Shattered Jade Voice toward the side and made the same observation.

This meant that the attack released by the anchored entity was just as strong as if Chimey itself released the attack.

After using Shattered Jade Voice once, the strange flames’ light was visibly weaker. This meant that Chimey had used up a portion of the strange flames’ light-type energy.

This discovery caused Lin Yuan to feel that it would be the right thing to do for Chimey to place an anchor on the sun.

Any other fey would find it difficult to gain the sun’s acknowledgment even if they had more talent for light-type energy, but Lin Yuan also had the Mother of Bloodbath.

The Mother of Bloodbath had the Sky Sundial Jade Spider bloodline and was beloved by the sun. It could communicate directly with the sun.

With help from the Mother of Bloodbath, Chimey would be able to gain the sun’s acknowledgment and place an anchor on the sun.

The sun had a never-ending supply of light-type energy.

With the sun as its base, it would be able to transmit its voice much further than just a few thousand meters.

But it was too early for Chimey to gain the sun's acknowledgment using Clear Zither Change Voice before it reached Myth Breed.

With Clear Zither Change Voice, Lin Yuan could see endless possibilities for Chimey.

Once an anchor was placed on the sun, the effects of Clear Zither Change Voice would be no different from a celestial phenomenon.

Besides Heavenly Family Feys, only 10 Stars sacred source lifeforms would be able to control celestial phenomena. Yet, Chimey was able to do this despite being only a fey.

Currently, the only light-type ability that Chimey had was Shattered Jade Voice.

As Chimey continued to evolve and its bloodline strengthened, it would be able to gain new light-type abilities.

But even if it only had Shattered Jade Voice, it would be strong enough if it was able to place an anchor on the sun.

If Chimey used Shattered Jade Voice with the sun, it would be able to go on indefinitely as long as the sun's light energy did not disappear.

Nonetheless, Chimey's evolution to Diamond brought a huge surprise to Lin Yuan.

Now, he only had to wait for Chimey and Genius to evolve to Fantasy V, and they would be able to transform again before they reached Myth Breed.

Lin Yuan was greatly looking forward to this.

The Source Sand had been Diamond I, but Lin Yuan had evolved it to Diamond X.

As a result, Close Guard Sand had strengthened by almost 100 times.

Now, Lin Yuan would be able to cover a kilometer radius with Close Guard Sand and even control it at will.

Soon, Lin Yuan activated the Source Sand, and yellow sand soon covered the ground. A 10-kilometer radius around Lin Yuan became a prison of sand that was only continuing to expand.

A 30-kilometer radius around Lin Yuan turned into a sea of sand in less than a minute.

Lin Yuan manipulated Close Guard Sand into shapes.

Suddenly, an idea flashed in Lin Yuan's mind, and the sand beneath his feet started to thrash until a three-meter-tall and two-meter-wide house of sand appeared in the middle of the pool of quicksand.

Lin Yuan moved freely within the small house of sand.

Lin Yuan manipulated the small sand house until its interior was decorated beautifully.

However, this was far from reaching Lin Yuan's limits.

As more sand gathered around the small sand house, it started to grow until it became a 30-meter-tall and 20-meter-wide castle.

Still, Lin Yuan did not stop here.

Metal Consume Manifestation had consumed three types of metal, each turning into a different type of state. They were the chain blade produced from radium, feathers made of the Day and Night Spirit Silver, and Trigone Strands made of the Red Lotus Soft Gold.

Bones made of the radium chain blade started building up within the castle.

These chain blades could be shot out from the castle at any time.

Feathers made of the Day and Night Spirit Silver covered the castle's exterior. It was durable and increased the castle's defenses.

Day and Night Spirit Silver intermittently fell from the castle and formed a defensive mat around the castle.

The Trigone Strands formed from the Red Lotus Soft Gold snaked under the ground around the castle like a snake.

#### **Chapter 1514: Lin Yuan's Moving Castle**

Lin Yuan chose the Red Lotus Soft Gold because it could stretch extensively.

When spirit qi was used, the Red Lotus Soft Gold Strands would be able to turn into strong needles in an instant.

The Trigone Strands formed from the Red Lotus Soft Gold would be able to replace Gravel Spirit Acceptance's Heart-Penetrating Ironline.

Soon, the castle changed again.

Wheels made from the Close Guard Sand started to rise from below the castle.

When more spirit qi was injected, Close Guard Sand started to change again.

A small amount of spirit qi entered the wheels and enabled the castle to move in the sea of sand.

Soon, a pair of arms and legs grew out of the castle made of sand., and chain blades made of radium covered the giant's arms and legs.

Lin Yuan had watched the animation called Howl's Moving Castle, so he used the Source Sand to create a moving sand castle.

The Source Sand was an elemental source-type fey, and Lin Yuan had always geared toward group abilities when it came to nurturing the Source Sand.

But through Close Guard Sand and Metal Consume Manifestation, Close Guard Sand was now a giant walking in the sea of sand that was ready to attack at any moment.

This method would be able to use the Source Sand's attacking ability to its greatest extent.

After testing the Source Sand, Lin Yuan felt that it was time to choose a suitable fey or dimensional lifeform for Gravel Spirit Acceptance.

Since the Source Sand had changed into the Red Lotus Soft Gold and it was in the Trigone Strands state, Lin Yuan had practically eliminated the Heart-Penetrating Ironline.

Lin Yuan was not picky when it came to choosing a fey or dimensional lifeform for Gravel Spirit Acceptance.

Lin Yuan could choose to increase defense or the Source Sand's controlling abilities, so he decided to give up on attacking. He relied on Blackie's Spirit Essence Explosion and the Sacred Sword Wielding Queen's Sword Skills for his attacks.

No matter how strong the fey that Gravel Spirit Acceptance had assimilated, the Diamond X/Fantasy III Source Sand would not be able to compare with the power of a Sword Skill.

Thus, it would be a waste of the Source Sand's talent to strengthen its attack.

It would not be difficult for Lin Yuan to evolve the Source Sand's quality.

Although the Mountain-Containing Embryo was rare, it was still more common than the essence blood of main-dragon-species feys and the Intelligent Ganoderma Sinensis.

Lin Yuan could just offer 100 heavenly-maiden-grade elemental pearls on Star Web, and he would be able to obtain the Mountain-Containing Embryo.

For Lin Yuan, it was as easy as taking a breath to use spirit qi crystals to evolve a fey to Diamond X.

Previously, Lin Yuan's feys' grades had been a rung below the other top members of the younger generation.

All of Zong Ze, Gu Lang, An He, and Liu Jie's feys had reached at least Diamond X/Fantasy V. Meanwhile, only a few of Lin Yuan's feys had reached Diamond I.

But now, Lin Yuan caught up.

When it came to his variety of feys, Lin Yuan was no different from the top younger members of the Radiance Federation.

Lin Yuan had evolved Chimey, Genius, the Source Sand, and Blackie to Fantasy V a month ago.

He was only at a loss when it came to Purple Afterglow because he did not have access to the Nirvana Blaze Butterfly.

Next, Lin Yuan would have to go to Coiling Dragon's Valley and obtain the main-dragon-species feys' essence to help Blackie evolve its quality.

Lin Yuan took out his phone and called Long Tao.

When they talked in the group yesterday, Long Tao mentioned he would be personally heading to the abyssal world these few days to manage the situation there. He also planned on fighting against abyssal demons to train his combat skills.

If Lin Yuan did not go and see Long Tao before he went into the abyssal world, he would have to wait until Long Tao returned.

It did not take long for Long Tao to pick up the call.

“Big Brother Long, are you at Coiling Dragon’s Valley’s residence?” asked Lin Yuan.

Long Tao knew that Lin Yuan needed him for something and hurriedly said, “Brother, I am at Coiling Dragon’s Valley’s residence now. Do you want me to go and meet you?”

Long Tao thought that Lin Yuan wanted him to collect the Golden Lotus Brocade Pearls.

However, today was not the agreed-upon time!

Lin Yuan had already given the last batch of Golden Lotus Brocade Pearls to Coiling Dragon’s Valley, and the next batch was only due next week.

Long Tao was genuinely grateful to Lin Yuan.

Lin Yuan had helped Long Tao’s father’s fey that had injured roots break through to Myth III.

Long Tao also owed him too much as a friend.

Lin Yuan had asked him to start a faction together to break into the abyssal world.

This would bring a bright future to Long Tao.

Otherwise, Long Tao would never be able to join the group of disciples of members of royalty despite being the Young Leader of Coiling Dragon’s Valley and #3 of the Radiance Hundred Sequence.

The Golden Lotus Brocade Pearls that Lin Yuan provided Coiling Dragon’s Valley enabled their Creation Masters to increase their resources by 30%.

As a result, they would be able to develop faster and still gain more resources.

Hence, they were able to increase their rank as a top faction. They would be able to fight for a chance to become one of the top five top factions.

This was all because of Lin Yuan’s help to Coiling Dragon’s Valley.

Thus, Long Tao would do anything to repay Lin Yuan.

“Big Brother Long, you don’t have to come. I want to go to Coiling Dragon’s Valley to discuss a deal with the faction. I need you to be the middleman,” said Lin Yuan.

Long Tao immediately knew that Lin Yuan was not coming to Coiling Dragon’s Valley as the Moon Empress’ disciple but as his friend. Otherwise, Lin Yuan would not need to inform him in advance.

He could have just sent a notice to Coiling Dragon's Valley, and Long Tao's father and the other elders of Coiling Dragon's Valley would all rush to welcome Lin Yuan warmly.

Even if his grandfather was still locked away and was trying to gain Immortal power, he would still come out to greet Lin Yuan respectfully when Lin Yuan arrived.

Lin Yuan asked Long Tao to be a middleman because he regarded him as a true friend and as a show of respect to Coiling Dragon's Valley.

Long Tao hurriedly replied, "Brother, you can just be frank about any trade you have in mind. I will let them know and prepare everything for you before arriving."

Lin Yuan said honestly, "Big Brother Long, Coiling Dragon's Valley probably has pure flood-dragon-species, right? I need their essence blood."

### **Chapter 1515: Coiling Dragon's Valley's Opportunity!**

Long Tao was stunned.

Coiling Dragon's Valley indeed had a pure-flood-dragon species fey. However, it was Long Tao's grandfather's main combat fey.

Now that its power had reached Sovereign X/Creation XIII, it was trying to break through to Immortal.

The few drops of main dragon-species fey essence blood that Lin Yuan needed had been given to Long Tao's grandfather's main combat fey so that it could break through.

Long Tao's grandfather's main combat fey would have to produce more of the essence blood now.

Once his grandfather's power reached Immortal, Coiling Dragon's Valley's position as a top faction would be completely changed.

The Spirit Guards had locked down Whale Ocean Commerce, and no one knew what was going on internally.

However, according to the information from the Spirit Guards, Whale Ocean Commerce had already been removed from the list of the Radiance Federation's factions.

Once Long Tao's grandfather reached Immortal, Coiling Dragon's Valley would be able to fill the empty space in the top three factions.

However, Long Tao and the entire Coiling Dragon's Valley could not turn down Lin Yuan's request because they owed him too much!

"I'm going to ask my family to prepare in advance so you can collect it once you're here," said Long Tao.

"Big Brother Long, I'm heading to Coiling Dragon's Valley now. We can discuss the details of the trade once I arrive."

Lin Yuan hung up the call.

When Lin Yuan rode Blackie to Coiling Dragon's Valley's residence, he noticed that all the direct descendants were waiting at the door to greet him.

Long Tao stood in the center of the group. The leader of the Long family, Long Tu, was standing to his left, and a white-haired elderly man was standing to his right.

Lin Yuan could clearly sense that the elderly man had a troubled gaze in his eyes but was still genuinely welcoming to Lin Yuan's arrival.

When they saw Lin Yuan jump down from Blackie's back, they got ready to welcome him.

Lin Yuan bowed to Long Tu and Long Du before he walked over to Long Tao and said with a tone of slight reproach, "Big Brother Long, why are you standing on ceremony?"

Lin Yuan's sincere tone touched Long Tao.

Long Tu had gotten to know Lin Yuan, while Long Du had never interacted with Lin Yuan. However, they both had a great impression of him now.

Despite being a top elite, he did not put on any airs and was respectful to all.

Usually, geniuses were arrogant.

Long Tu, Long Tao, and Long Du had all been born with golden spoons in their mouths and had been haughty from the moment they were born.

Long Du and Long Tu felt that Long Tao would be able to reach a level that they could not.

After they welcomed Lin Yuan and understood the situation, Long Du was silent for a moment before he decided to abandon the chance to evolve the Weak Water Ice Blue Flood Dragon to Immortal.

The Weak Water Ice Blue Flood Dragon activated the blood in its entire body and produced five drops of essence blood.

The pinnacle Creation Weak Water Ice Blue Flood Dragon managed to produce only 12 drops of essence blood in its entire body, and five drops would already cause it to be grievously injured.

In order for the Weak Water Ice Blue Flood Dragon to recover, it would need to use pure water-type elemental pearls for several years.

As the previous leader of the Long family, Long Du had still been upset about having to give up his benefit for the sake of repaying Lin Yuan.

But when he saw how respectful Lin Yuan was, his displeasure was slightly reduced.

When Long Du saw the black flood dragon that Lin Yuan came with, he was silently shocked.

He was a pinnacle Class 4 Creation Master and identified the black flood dragon as the Spirit Tide Ink Flood Dragon that had been evolved from the Spirit-Siphon Goldfish.

Long Du could not imagine how much spirit qi had to be used to trigger the dragon bloodline in the small Spirit-Siphon Goldfish to such an extent.

It was clear that Lin Yuan was asking this favor for the sake of evolving the Spirit Tide Ink Flood Dragon. Otherwise, Lin Yuan would not have specified that he needed the blood of the pure flood-dragon-species fey.

Long Tao smiled in a friendly manner and said, "This is the first time that you're here at Coiling Dragon's Valley's residence. There won't be so many people here to greet you the next time you're here."

When the Long family returned to the residence, Long Du took out five amethyst test tubes.

Each of them contained a drop of purple and gold blood that had the aura of a dragon. It was almost as though a dragon would fly out of the bottles the moment they were uncorked.

"Lord Lin Yuan, here is the essence blood you asked for. If this isn't enough, we can produce another three drops."

Long Du's voice was determined. However, Long Tao and Long Tu turned to look at him with worry.

If three more drops of essence blood were produced, the Weak Water Ice Blue Flood Dragon would be in a near-dead state that would most likely have damaged roots. It would not be able to be healed using elemental pearls for a few years.

Lin Yuan received the amethyst test tubes from Long Tu and said, "Five drops are enough. I have already made a deal with Big Brother Long to—"

Before Lin Yuan could finish speaking, Long Tu said, "Lord Lin Yuan, our family owes you so much. You helped our family to rise from a position in the tens to one of the top ten top factions within a few months. You don't need to make a deal with us. If you need the essence blood, just take it!"

The Long family could have told Lin Yuan about Long Tu's situation. This would give them an even better position in Lin Yuan's good books.

But since Long Tao was not going to do so, Long Tu and Long Du would not either because Long Du wanted to repay Lin Yuan instead of angling for another favor.

Lin Yuan shook his head seriously and said, "Uncle Long, we have to address each matter individually. How many pinnacle emperor-class experts does the Long family have?"

Long Tu, Long Du, and Long Tao's breaths hitched.

All three of them knew that Lin Yuan had Law Crystals, as they had traded with him in the past to enable Long Tu's fey to evolve to Myth III.

It was clear that Lin Yuan was asking them how many pinnacle emperor-class experts they had because he wanted to trade essence blood with the Law Crystals.

Every thearch-class expert was precious to a top faction.

Thearch-class experts could be dispatched to the various cities to act as guards and carry out assignments.

Even if the thearch-class experts were sent to clear out dimensional rifts, they would also gain a sea of resources each year.

Moreover, when the top factions worked together, they would send out a thearch-class expert to watch over the process.

### **Chapter 1516: Coiling Dragon's Valley's Transformation**

If one party did not send out a thearch-class expert, they would be seen as weaker even if they put in more effort.

Since it was difficult for dragon-species feys to evolve, the Long family always had a low number of thearch-class experts.

Now that Lin Yuan wanted to trade Law Crystals with the Long family, Long Du and Long Tu had no reason to turn him down.

Just as Long Tao was about to insist on gifting the essence blood to Lin Yuan, the latter said, "The Long family has probably heard about the situation at Whale Ocean Commerce. There is now a power vacuum amongst the top three top factions that needs to be filled.

"The Long family is a faction with the Creation Master role and is very suited to take over this space that Whale Ocean Commerce left. I can help the Long family's pinnacle emperor-class experts to evolve to thearch-class."

Lin Yuan took out a brocade pouch that contained 100 Law Crystals.

Long Tu and Long Du looked at Lin Yuan with excitement.

Although Coiling Dragon's Valley did not have many thearch-class experts, they had the Creation Master role, and the many Class 4 Creation Masters could easily evolve the emperor-class experts to pinnacle emperor-class.

Coiling Dragon's Valley had many more pinnacle emperor-class experts than other factions.

This was the reason Coiling Dragon's Valley was able to hold a high position amongst the top factions despite not having many thearch-class experts.

Lin Yuan noticed that Long Tao had something to say but was struggling to say it. Thus, he said softly, "If not for my relationship with you, I would never use something like Law Crystals."

At first, Long Tao did not know what to say.

The Long family wanted to repay Lin Yuan. Yet, they did not expect Lin Yuan to turn the tables on them and do another huge favor for them.

Long Tu and Long Du were elated, but they also started to think.

Given Long Tu and Long Du's experience, they could think of things in a deeper way than Long Tao could.

Lin Yuan was the Moon Empress' disciple and the champion of the Martial Arts Stage. There was no reason for him not to fight for a chance to become a Radiance Envoy.

If Coiling Dragon's Valley could truly become one of the top three top factions, they would be able to help him during the Radiance Hundred Sequence.

After all, the higher the rank a top faction had, the more votes they possessed.

Although Coiling Dragon's Valley had always depended on the Bamboo Monarch, they had not made any large advancements.

Ever since the Bamboo Monarch became preoccupied with Wang Fuxiang's bad luck and Coiling Dragon's Valley became acquainted with Lin Yuan, Coiling Dragon's Valley had not been in contact with the Purple Bamboo Garden.

At first, Long Du and Long Tu felt that becoming acquainted with Lin Yuan would be the equivalent of forming a link to the Moon Empress. But now, it was apparent that Lin Yuan himself was already an enormous tree that the Long family would be able to take shelter under.

From both a personal and profit perspective, the Long family should depend on Lin Yuan.

Now that Long Tu had thought things through, he said to Lin Yuan, "Coiling Dragon's Valley currently has 31 pinnacle emperor-class experts and seven experts whose power is only one step away from reaching pinnacle emperor-class. However, in the eyes of other factions, they are considered pinnacle emperor-class."

Lin Yuan was silently shocked when he heard what Long Tu said.

Coiling Dragon's Valley had almost double the number of pinnacle emperor-class experts than Connected Beast Park.

It was clear that Coiling Dragon's Valley would be able to crush Connected Beast Park to the ground in a fight.

"Please call the pinnacle emperor-class experts who are currently in the residence over. We can choose a location in the outskirts of the Royal Capital and evolve everyone at once."

Long Tu turned and rushed off to do as Lin Yuan asked.

He called over the 17 pinnacle emperor-class experts in the residence and went to an empty space on the outskirts of the Royal Capital.

As Lin Yuan provided more and more Law Crystals, the Long family's pinnacle emperor-class experts' pinnacle Myth Breed dragon-species feys all broke through and made the advancement toward Creation Breed.

As the seven or eight Trials of World Creation started to solidify in the sky, Long Du summoned the Weak Water Ice Blue Flood Dragon and Extreme Darkness Ground Explosion Dragon.

Lin Yuan noticed that the Weak Water Ice Blue Flood Dragon had a higher grade and quality but weaker aura than the Extreme Darkness Ground Explosion Dragon.

There could only be one reason for a dragon-species fey looking so drained. It had produced essence blood.

It should not be so weak if it had only produced one or two drops of blood.

Lin Yuan remembered that the Weak Water Ice Blue Flood Dragon was a flood-dragon-species fey and stared at Long Du.

Since the Long family had treated him so well, he had to return the favor.

Lin Yuan said softly, "Shadow, stop these Trials of World Creation and break up the power into 100 pieces so they can temper the main-dragon-species feys that just evolved to Creation Breed."

The moment Lin Yuan spoke, a black shadow emerged from Lin Yuan's shadow.

It did as Lin Yuan instructed and stopped the Trials of World Creation.

Although Long Du was a pinnacle thearch-class expert and could have easily ordered his feys to stop the Trials of World Creation, the Weak Water Ice Blue Flood and Extreme Darkness Ground Explosion Dragon had the same power as the Trials of World Creation.

Thus, neither of them would be able to divide up the Trials of World Creation so the dragon-species feys would be able to receive them slowly and trigger their bloodline in a better way.

At that moment, Coiling Dragon's Valley's experts finally knew what the expert that had killed all of Connected Beast Park's experts silently looked like.

Shadow looked very different from a normal person, but it did not look like a fey either.

Although the abyssal world had opened, the members of Coiling Dragon's Valley had not yet interacted with a Class 12 demon. Hence, they could not confirm what Shadow was.

However, they could tell from Shadow's power that it had surpassed Creation Breed.

Long Du was very envious of this.

Lin Yuan did not absorb the Creation World Ley Lines when he helped the Long family's experts to overcome their Trials of World Creation.

But, the Creation World Ley Lines started to disperse like when Endless Summer evolved to Creation Breed.

A small portion of the Creation World Ley Lines would dissipate while the Long family's feys were absorbing them, so Lin Yuan used the Pure Land of Bliss to collect these remnants.

Lin Yuan knew that source-type power could strengthen Creation World Ley Lines through his communication with the Sacred Sword Wielding Queen.

These small golden Creation World pearls could become miniature ley lines.

## Chapter 1517: Where Do We Go to Find Such an Expert?

After Shadow helped the new Creation Breed main-dragon-species feys to overcome their Trials of World Creation, it returned to Lin Yuan's shadow,

The experts that had just broken through led their feys to Lin Yuan and started thanking him profusely.

Long Tu suggested for everyone to return to the Long family to hold a feast in honor of Lin Yuan. However, Lin Yuan said, "Coiling Dragon's Valley needs more than thearch-class power to fill the power vacuum that Whale Ocean Commerce left. You need Immortal power. The Weak Water Ice Blue Flood Dragon has only reached Sovereign X/Creation VIII. It only needs an opportunity to reach Immortal."

Lin Yuan's words caused the members of the Long family to be stunned, and all of them looked at him with racing hearts.

Long Du's gaze was especially fiery.

*Is Lin Yuan going to give the Weak Water Ice Blue Flood Dragon a chance to reach Immortal? However, the Weak Water Ice Blue Flood Dragon just produced five drops of essence blood and is very weak. It won't be able to seize the opportunity now!*

At that moment, Lin Yuan took out a wooden chest and gave it to Long Tu as he said, "There's no time like the present. Use the things inside this chest to help the Weak Water Ice Blue Flood Dragon to regain its vigor. Next, I will use a World Crystal to try and help the Weak Water Ice Blue Flood Dragon to reach Immortal."

While Lin Yuan was speaking, Long Du opened the wooden chest and was almost blinded by the pearls within.

The Weak Water Ice Blue Flood Dragon only needed to absorb half of the water-type heavenly-maiden-grade elemental pearls inside the box and some nourishing thearch-class spiritual ingredients for its vigor to recover quickly.

When Lin Yuan mentioned the World Crystal, Long Du thought, *?World Crystal! Only Class 5 Creation Masters can produce World Crystals to help pinnacle Creation feys reach Immortal.*

None of the three members of royalty had ever given away World Crystals. They had only ever used them for their own personal use.

But now, Lin Yuan was giving them to the Long family.

This was the biggest gift of Class 5 Creation Master resources that a top faction had ever received.

If Lin Yuan and the Moon Empress were separated, it was obvious that it would be more reliable to depend on Lin Yuan for benefits than the other Class 5 Creation Masters.

Coiling Dragon's Valley was not ungrateful.

Long Du, Long Tu, and Long Tao detested people who went back on their word.

Today, Lin Yuan's gift would enable Coiling Dragon's Valley to become one of the top three top factions.

From now on, Coiling Dragon's Valley was going to stick closely to Lin Yuan.

As intelligent people, Long Tu and Long Du would never express such sentiment through words because it would cause their relationship with Lin Yuan to become awkward.

Although they were not going to speak their intentions, they were going to express them through their actions.

When using the heavenly-maiden-grade elemental pearls with outer layers, the Weak Water Ice Blue Flood Dragon in human form bowed deeply to Lin Yuan before it went back to healing itself.

Coiling Dragon's Valley had stocked up on many thearch-class spiritual ingredients that could recover vitality.

Dragon-species feys always needed spiritual ingredients to quickly recover after producing essence blood.

As it continued to use the water-type heavenly-maiden-grade elemental pearls, the Weak Water Ice Blue Flood Dragon's aura rose and soon became more powerful than the Extreme Darkness Ground Explosion Dragon. It had regained the might of a pinnacle Creation main-dragon-species fey.

The Extreme Darkness Ground Explosion stood off to the side in human form and watched the Weak Water Ice Blue Flood Dragon enviously.

It knew that the Weak Water Ice Blue Flood Dragon was about to transform to a completely different level.

The might of a main-dragon-species fey was only truly released when it reached Immortal because that was when they would be able to produce dragon pearls.

Long Du had more than enough power to take on the Trial of World Creation. However, he was powerless against the Forging Immortal.

The difference in danger between the Trial of World Creation and World Cleansing was the same as that between the Forging Immortal and Trial of World Creation.

Hence, even if Lin Yuan gave the Weak Water Ice Blue Flood Dragon the opportunity to evolve to Immortal, Long Du was afraid that the Weak Water Ice Blue Flood Dragon would not be able to survive.

The Forging Immortal, World Cleansing, and Trial of World Creation had completely different connotations.

Forging Immortal only involved the fey itself and not any celestial phenomena.

The Immortal power produced by the law world would cleanse the fey's body and slowly temper the law world with the Creation World Ley Lines until the fey's body was combined with the law world. An Immortal body imbued with the power of a world would be formed.

Law worlds were the batteries for Creation Breed feys.

Even if the fey overcame the danger of being cleansed by Immortal power, it would have to undergo the risk of using its body to temper the law world.

Immortal was a level that was beyond the recognition of the entire Coiling Dragon's Valley. Because they did not have experience with it, they were terrified of it.

Other experts could also help with Forging Immortal, but they would have to be able to protect themselves well to prevent their bodies from being destroyed by the Immortal power.

Then, they would have to create a barrier around their target that had to be impervious to the world power to ensure that the body within would be able to temper the world power smoothly.

These two factors seemed easy, but even the first one needed the accurate input of Immortal power to ensure their body was protected from Immortal power.

Evidently, the expert that Lin Yuan had just revealed could not achieve this.

In order to accurately control Immortal power, the helping expert had to possess the power of at least Immortal V.

The second factor was even more difficult.

Even an Immortal V expert would be unable to sustain the explosive power of the right Creation World Ley Lines in a law world.

Once the barrier was broken and the world power dissipated, the Immortal body that was formed would be incomplete and rendered useless.

Thus, in order to ensure that the evolving Creation Breed fey was completely safe, the helping expert had to be at least Immortal VII.

But where would they go to seek such an expert out? The Long family did not have such access.

Hence, when it was first made known that Di Wancheng had successfully reached Immortal and that the Di family had two Immortal experts, all the thearch-class experts in the major factions were silently impressed at Di Wancheng's luck.

### **Chapter 1518: Forging Immortal!**

While Long Du was feeling troubled, Lin Yuan said, "The expert who will be protecting the Weak Water Ice Blue Flood Dragon will be here soon. Rest assured, as long as the Weak Water Ice Blue Flood Dragon is patient and doesn't cause any accidents, I am fully confident that it will be safe."

Long Du immediately realized that Lin Yuan had access to power that was at least Immortal VII. This was too unbelievable!

Soon, uncontrollable gratitude spilled out from Long Du's heart.

After living for so long and reaching the later years of his life, this was the first time Long Du felt so grateful toward a person.

Long Tao had chosen a great person to become friends with! Lin Yuan was the entire Coiling Dragon's Valley's lucky charm!

However, his gratitude soon turned to astonishment.

No one knew about Coiling Dragon's Valley's situation better than Long Du.

Coiling Dragon's Valley had almost reached the top ten top factions in the Radiance Federation because of the explosion of Creation Master resources brought by the Golden Flower Brocade Pearls.

This boost brought by external help caused Coiling Dragon's Valley's position to be unstable. It needed a few decades to stabilize itself before it could plant solid roots as one of the top ten factions.

But now, Lin Yuan swooped in and used resources to push Coiling Dragon's Valley into the ranks of the top three top factions by using tens of Law Crystals to create new thearch-class experts and World Crystals as well as supplied an expert to help Long Du gain Immortal power.

With this kind of resources and capabilities, Lin Yuan could have helped even a veteran faction to fill the space left by Whale Ocean Commerce to become one of the top three top factions.

Regardless of whether the Moon Empress had given the resources or Lin Yuan had obtained them on his own, it would be enough to prove that Lin Yuan had the power to change the concept of factions.

Lin Yuan had already sent the Kill Food Sky Butterfly to contact White Speak.

White Speak was currently rushing toward the Klein Hub in the marsh world.

In less than an hour, Lin Yuan waved his hand and summoned White Speak.

White Speak bowed and said, "Greeting, Lord."

White Speak glanced at the Long family as it greeted Lin Yuan.

Its gaze lingered on the Weak Water Ice Blue Flood Dragon. It felt that if a fight was to break out, the biggest danger to Lin Yuan would come from the Weak Water Ice Blue Flood Dragon.

Thus, White Speak released its aura and covered the Weak Water Ice Blue Flood Dragon.

The Weak Water Ice Blue Flood Dragon felt as though it was deep in the jaws of a crocodile and was about to be devoured at any moment.

Lin Yuan instructed White Speak, "White Speak, retract your aura. Produce a barrier in front of it and use your power to prevent the Immortal power from destroying its body."

Although White Speak did not understand why its Dictator wanted to protect this being from another world, it would do a good job because the order had still come from its Dictator.

White Speak's thought process had changed on Raging Waves City's island, and it became more certain that Lin Yuan was a god as more time passed.

White Speak placed its hand on the Weak Water Ice Blue Flood Dragon's back, and a thick aura flowed into its body.

The Weak Water Ice Blue Flood Dragon would not be able to handle any pressure that White Speak placed on it, and it felt its body almost break apart when White Speak's energy entered its body.

Lin Yuan said to the Weak Water Ice Blue Flood Dragon, "Now, swallow this World Crystal."

The Weak Water Ice Blue Flood Dragon placed the World Crystal in its mouth and prepared itself to transform.

As the energy from the World Crystal entered the Weak Water Ice Blue Flood Dragon's law world, the Weak Water Ice Blue Flood Dragon felt its law world expanding and contracting continuously.

Eight solid Creation World Ley Lines flew into the air and danced around, producing dark gold energy.

This dark gold energy broke open the Weak Water Ice Blue Flood Dragon's World Crystal and entered its body.

Soon, the Weak Water Ice Blue Flood Dragon felt as though its entire body was on fire, and unspeakable pain started to arise from its flesh.

Luckily, White Speak's energy held the Weak Water Ice Blue Flood Dragon's body together. Otherwise, it would have collapsed in less than two minutes.

White Speak frowned when it sensed the Weak Water Ice Blue Flood Dragon's situation.

Once the Weak Water Ice Blue Flood Dragon's body became used to the Immortal power, White Speak pulled back some of the energy that it had injected into the Weak Water Ice Blue Flood Dragon so that the Immortal power could cleanse more of the Weak Water Ice Blue Flood Dragon's flesh.

One day and one night passed. The sun hanging majestically in the sky changed to a starry sky, then back to the blazing wheel in the sky.

A faint fark gold appeared all over the Weak Water Ice Blue Flood Dragon's body.

Once the aura was released, the Extreme Darkness Ground Explosion Dragon took a step back.

The members of the Long family watched with eyes full of hope as the Weak Water Ice Blue Flood Dragon's body was cleansed by the Immortal power.

At that moment, White Speak said, "I will be removing the last portion of energy in your body. All I can do from now on is to keep the barrier from breaking. The rest is up to you. Don't disappoint the chance that my Lord is giving you to transform."

White Speak removed its hand from the Weak Water Ice Blue Flood Dragon's back.

White Speak's eyes turned white, and a solid light of energy spewed forth from its eyes. The energy covered the Weak Water Ice Blue Flood's barrier and formed the image of a giant crocodile with shining scales.

Even when the Weak Water Ice Blue Flood Dragon's law world broke apart and the energy within exploded, the barrier was completely unaffected.

At that moment, the Weak Water Ice Blue Flood Dragon was in a hundred times more pain than before.

The breaking of its law water world caused it to feel as though all its strength had been drained.

This feeling put the Weak Water Ice Blue Flood Dragon into a panic.

Before the Weak Water Ice Blue Flood Dragon's panic could go on, it felt the Immortal power cleansing its body and absorbing the broken world.

Soon, the Weak Water Ice Blue Flood Dragon felt its lost power slowly returning and fusing perfectly with its Immortal body.

The Weak Water Ice Blue Flood Dragon felt as though the world was combining with its Immortal body.

### **Chapter 1519: The Six Pairs of Flapping Black Wings**

Suddenly, the Weak Water Ice Blue Flood Dragon felt a warmth in its abdomen. It was as though there was a new life forming within it.

This feeling caused the Weak Water Ice Blue Flood Dragon to panic.

*I'm male! Am I able to have kids? I don't want to be a parent!*

It did not take long for the Weak Water Ice Blue Flood Dragon to realize that it was producing its dragon pearl.

It opened its mouth and spat out a dragon pearl!

The dragon pearl was about the size of a fist and covered with rigid dragon power.

This dragon power caused the surroundings to appear blurry.

Freezing water-type power flowed out from the dragon pearl.

This power made White Speak feel extremely comfortable. It was even more comfortable than when it was having its scales cleaned by small fish.

But as comfortable as it was, it could not give in to its desire to take the dragon pearl for itself.

Main-dragon-species feys were stretching their bloodline to the max when they spat out the dragon pearl.

When the dragon pearl turned into spirit, the main-dragon-species fey would suddenly break through and attain a whole new level of bloodline.

The Weak Water Ice Blue Flood Dragon recalled its dragon pearl, and a puppet appeared next to it.

This was the Weak Water Ice Blue Flood Dragon's Immortal body.

As the Weak Water Ice Blue Flood Dragon's quality evolved, more brilliant colors appeared on the Immortal body, and it also gained more fey characteristics.

Lin Yuan said to Long Du with a smile, "Congratulations on gaining Immortal power! Next, you will have to reveal your power to be acknowledged by the other top factions in order to take over Whale Ocean Commerce's position."

Long Du and the Weak Water Ice Blue Flood Dragon bowed deeply to Lin Yuan again.

"Lord Lin Yuan, we know what to do from here on out. Thank you for bringing prosperity to us. If there is anything that you need from us, please don't hesitate to let us know. No matter what it is, we will get it done."

Lin Yuan immediately thought about the Mountain-Containing Embryo that the Source Sand needed to evolve and said, "I do need a spiritual ingredient. Do you have the Mountain-Containing Embryo? I need at least three to evolve a fey."

Long Tao knew that Lin Yuan was Black, so he immediately thought about the Source Sand when he heard that Lin Yuan needed the Mountain-Containing Embryo.

"Brother, we do have a store of the Mountain-Containing Embryo. I think we have about seven or eight of them. I will go and pack all of them up for you."

Lin Yuan did not turn him down.

Although three or four of the Mountain-Containing Embryos would be enough for the Source Sand to evolve to Fantasy V, the Source Sand would be able to produce more Close Guard Sand when it consumed more Mountain-Containing Embryos.

The more Close Guard Sand there was, the stronger the Source Sand would be.

Lin Yuan followed the rest of the Long family back to Coiling Dragon's Valley and accepted their generosity.

But immediately after dinner, a large number of insects started to cry out in Coiling Dragon's Valley's backyard.

Coiling Dragon's Valley did not seem to be surprised by these insects, but rather delighted.

Long Tao started to explain to Lin Yuan, "It looks like a Class 4 alien insect dimensional rift has just become pinnacle Class 4."

If a top faction opened a dimensional rift on its own, their experts would be able to wipe out the dimensional lifeforms to harvest a large number of source-type items.

Due to a lack of sacred source lifeforms, Class 4 dimensional rifts could not evolve to Class 5. However, there would be many more items in a pinnacle Class 4 dimensional rift than a Class 4 dimensional rift.

Since the last time when Lin Yuan told Coiling Dragon's Valley to look out for the Emperor Armored Martial God Insects, they had collected a total of seven.

Now, the seven Myth II Emperor Armored Martial God Insects were completely under the Sky Fragrance Beauty Butterfly's control.

Lin Yuan became interested when he heard that the Long family had a pinnacle Class 4 dimensional rift.

The Emperor Armored Martial God Insect was 100 times more likely to appear in a pinnacle Class 4 alien insect dimensional rift than a new Class 4 alien insect dimensional rift and 30 times more likely than a mid-grade Class 4 alien insect dimensional rift.

When Lin Yuan said that he wanted to enter the pinnacle Class 4 alien insect dimensional rift, Long Du said that he wanted to accompany Lin Yuan.

Lin Yuan did not turn him down.

He had already sent White Speak back to the marsh world. It was not convenient to call it out for every matter.

With Long Du accompanying him, Lin Yuan would be able to collect the Emperor Armored Martial God Insects at the fastest rate.

Lin Yuan might even get lucky and encounter the mutated Emperor Armored Martial God Insect.

When he entered the alien insect dimensional rift, Lin Yuan noticed that they were surrounded by alien insects.

Long Du was about to step in when Lin Yuan released a six-winged fairy.

Long Du immediately started coughing.

The six-winged fairy waved its hand and scattered powder that caused the insects to go into a frenzy.

Many fleshy flowers grew between the insects.

Just as the alien insects were about to attack the fleshy flowers, the fleshy flowers released a fountain of powder. Then, vines burst out of the ground and covered the entire area.

The vines stretched out and consumed any alien insect that they came into contact with.

Occasionally, a few of the stronger alien insects fell victim to negative effects and were reduced to dregs.

Lin Yuan had intended on using the pinnacle Class 4 alien insect dimensional rift to test Red Thorn's power.

But now, Red Thorn could leave its main body and summon the sea of flowers for battle.

However, Red Thorn's current combat style was clearly weaker than its main body.

Just as Long Du was about to summon the Weak Water Ice Blue Flood Dragon and instruct it to use its main body to comb through the Class 4 alien insect dimensional rift, two sets of black wings sprouted out of Lin Yuan's back.

However, these two sets of black wings were only the beginning. Even more large black wings appeared on his back.

Soon, Lin Yuan flapped his wings and took to the sky like a black-winged angel.

Long Du was silently shocked by the speed at which Lin Yuan could fly using the black wings.

The Source Sand's evolution caused Lin Yuan to be able to fly much faster. He could now fly as quickly as a Platinum/Fantasy avian-type fey.

Lin Yuan could change the size of his wings by manipulating the Day and Night Spirit Silver.

### **Chapter 1520: The Double Mutated Emperor Armored Martial God Insect**

While Red Thorn was devouring the prey, it was completely oblivious to its wings.

Now that Red Thorn had transformed into a fairy source-type lifeform, it was very attracted to wings.

Lin Yuan now had six pairs of wings stacked behind his back, and Red Thorn was completely floored.

Red Thorn flew into the air and hugged Lin Yuan's face. It absolutely refused to let go.

Red Thorn's enamored behavior slightly vexed Lin Yuan. He knew that it would be sad if he pulled it away. As such, he had no choice but to allow Red Thorn to continue to hug his face and nuzzle against him.

Red Thorn instructed the sea of flowers to continuously consume the alien insects and extend into the pinnacle Class 4 alien insect dimensional rift.

Lin Yuan walked on paths made from the sea of flowers.

The brutal vine ramets were the best filters. They killed the weaker alien insects while leaving the stronger ones behind.

Lin Yuan did not ask Long Du to step in for these stronger alien insects. Instead, he released 12 of the Sky Fragrance Beauty Butterflies.

Five of the Sky Fragrance Beauty Butterflies that had not taken control of the Emperor Armored Martial God Insects took control of the strong alien insects, while the seven Sky Fragrance Beauty Butterflies that had taken control of the Emperor Armored Martial God Insects instructed the Emperor Armored Martial God Insects to change their armor into sharp knives and kill the controlled alien insects.

The Sky Fragrance Beauty Butterflies appeared exceedingly strange as they stood amongst the corpses of insects that they had killed in the name of love.

Only butterfly-species feys had such abilities.

However, the Sky Fragrance Beauty Butterflies were much less charming than Purple Afterglow.

Soon, Lin Yuan caught sight of his objective.

The Emperor Armored Martial God Insect was an insect-species fey that was extremely skilled at combat. It never backed down when it encountered its own kind and would not hesitate to even kill mutations.

It only showed mercy to mutations that it encountered during mating season.

This mentality was the reason the Emperor Armored Martial God Insect was so rare and that every one of them was a seasoned warrior.

Lin Yuan watched as two Emperor Armored Martial God Insects crashed into each other ferociously.

One of the Emperor Armored Martial God Insects was clearly seriously injured, but it was stronger than the unharmed one.

This meant that the Emperor Armored Martial God Insect's injury was not a result of this battle.

Lin Yuan noticed that the injured Emperor Armored Martial God Insect's armor had split from two pieces into four pieces. The four pieces of armor looked like four metal sheets.

Lin Yuan decided to use the Emperor Armored Martial God Insect to pull his fey carriage when he saw the one that resembled an iron angel in Lan Qin's fey observation room.

It was clear that this injury that alien insect had undergone a mutation. However, the mutation was incomplete.

Lin Yuan did not interfere in the fight and continued to observe them silently.

When Lan Qin introduced the mutated Emperor Armored Martial God Insect, she said the mutation happened instantly.

"Every time the Emperor Armored Martial God Insect gains enlightenment while on the brink of death, its wings will split once. Its wings will become its weapons that make up for its flaws in attacking skills."

Since the mutated Emperor Armored Martial God Insect had only mutated once, it was unable to create waves in the battle even with its four wings.

As the two Emperor Armored Martial God Insect clashed, the heavily injured Emperor Armored Martial God Insect continued to use its armor to defend itself.

Perhaps it was due to the threat of death or its genetic model being pushed to the brink by its mutation, but its armor split again.

The four wings were initially six meters each, but two more sprouted, and they extended to 23 meters in an instant.

The six wings crossed together and started slashing down on the other Emperor Armored Martial God Insect.

Although this battle would cause Lin Yuan to lose one of the Emperor Armored Martial God Insects, Lin Yuan did not mind because he preferred a twice mutated Emperor Armored Martial God Insect to two normal ones.

This double mutated Emperor Armored Martial God Insect already looked the same as the one in Lan Qin's fey observation room.

Lin Yuan instructed the sole Sky Fragrance Beauty Butterfly that had experienced a breakthrough to take control of this Emperor Armored Martial God Insect.

The Emperor Armored Martial God Insect that had just come off of a fierce battle became the general of the mighty Sky Fragrance Beauty Butterfly.

Lin Yuan was very lucky in this trip to a pinnacle Class 4 alien insect dimensional rift as he managed to fill the gap of five Emperor Armored Martial God Insects that he needed.

Lin Yuan left Coiling Dragon's Valley and returned to the mansion. He first tossed the Mountain-Containing Embryos to the Source Sand so it could start absorbing them.

The Source Sand needed some time to carry out its evolution.

Nonetheless, it would be able to evolve to Fantasy V before the Radiance Hundred Sequence selection.

Blackie and the Weak Water Ice Blue Flood Dragon were water-type feys. Hence, the Weak Water Ice Blue Flood Dragon's essence blood would be the best nourishment for Blackie.

The three drops of essence blood enabled Blackie to evolve to Fantasy V.

Now that Blackie had evolved again, it grew again and was now almost 300 meters.

Blackie now looked extremely intimidating and majestic.

But Lin Yuan knew that Blackie was actually simple-minded and silly. Hence, he could not help but say, "You really can't judge a book by its cover."

Besides a change in size, Blackie's evolution also allowed it to start to be able to control clouds.

While they were flying, it could use the clouds to cover itself and start thunderstorms. This was the ability that was characteristic of flood-dragon-species feys.

Now that Blackie could manipulate the clouds, it meant that it was beginning to mutate into a main-dragon-species fey.

Lin Yuan still had two drops of the Weak Water Ice Blue Flood Dragon's essence blood, and he decided to feed both of them to Blackie at once.

He would just take it as a loss if Blackie failed to evolve into a main-dragon-species fey.

But once Blackie did evolve, it would be the first in history to become a main-dragon-species fey before evolving to Myth Breed.

Some Creation Masters were adamant that history could not be wrong.

But in the last six months, Lin Yuan had already broken apart wide-accepted concepts and structures multiple times.

He had always evolved Blackie using the best methods, and it was not surprising that it would become a pioneer.

Blackie truly did not disappoint Lin Yuan.
