

Merchant 1581

Chapter 1581: Chimey is the Strongest!

From the description of Memory Deduction, Lin Yuan noticed that it was much more powerful than Precise Memory and Knowledge Analysis.

UPDATE FROM novelB(i)n.NET

Previously, Knowledge Analysis could use details to come to the best conclusion.

But now, it could organize information to deduce the truth.

The truth represented accuracy. Hence, anything that Genius deduced would be accurate.

Lin Yuan could already tell that Memory Deduction would enable Genius to create many spirit-fluid recipes.

!!

It could be said that Genius was currently the strongest information-sorting machine in the world.

Not even the Star Web's information sorting could compete with Genius because it was not definitively accurate.

Given that Genius' Normal and Elite abilities had combined, there was now an empty slot for an Elite ability.

Crowded Cat had filled this slot.

Intelligent Cat's Spirit had become Master of Cats.

Intelligent Cat's Spirit would allow Genius to use spiritual energy to form contracts with intelligent cat-species feys, control their lives and deaths, and do whatever with their spiritual energy that it pleased.

Intelligent cat-species feys were very rare. The only one that was more common was the Hundred Question Beast.

Now, instead of controlling just intelligent cat-species feys, Genius could control all feys.

This meant that Genius could increase the number of Hundred Questions Beasts in the army of Hundred Questions Beasts by ten times, from 100 to 1,000.

Cat-species feys were a large category of feys. Moreover, many of them were strong.

Genius could control as many cat-species feys as the spiritual energy in its body allowed.

After this bloodline evolution, Genius' spiritual energy increased by ten times.

Master of Cats and Crowded Cat clearly complemented each other.

However, adding the two abilities together was not a simple matter.

Crowded Cat would allow Genius to control the elements that the cat-species feys it controlled were affiliated with and their bodies.

If Genius had just contracted a cat-species fey that had offense-type abilities, its power would not increase by much.

But if it contracted hundreds or even thousands of cat-species feys that were skilled at battle and were all affiliated with different elements, it would be able to choose the best one to suit every battle.

Everyone knew that cat-species feys used the elements they were affiliated with and their body to attack enemies.

Cat-species feys usually had stronger bodies than dogs.

Lin Yuan stared in shock as Crowded Cat and Master of Cats.

Genius was no longer the helpless kitten.

When those two abilities were used together, Genius would be able to become a god of war on the battlefield.

Lin Yuan felt that he should build a cat area in the marsh world for Genius so that Genius would have a comprehensive pen of cat-species feys to choose from.

He and the army of Hundred Questions Beasts would nurture these cats in the marsh world.

When it needed to fight, Genius would be able to tap into their elements and bodies.

Spiritual Energy Expansion had not changed at all.

Its storage space had only increased tenfold because of the strengthening of Genius' spiritual energy.

As for Tail Trigger, it still allowed Genius to produce substitute tails.

Genius' abilities were already enough to astonish Lin Yuan.

But when it came to the change in Connected Tails, Lin Yuan felt that Genius' bloodline was terrifying!

Connected Tails had become Tails of Fate.

Connected Tails' previous abilities still existed, but it became just one part of Tails of Fate.

Besides Connected Tails, Genius' tail had also gained another ability that would allow it to combine all its tails together.

By using up the spiritual energy in its body, it would request an answer from the heavens.

As long as Genius could afford to pay the required spiritual energy, the heavens would tell Genius anything it wanted to know.

With such an ability, the substitute tails that Tail Trigger created would become very useful.

If it asked something serious, Genius would be able to use up the spiritual energy in its substitute tails to receive an answer.

There was no limit to the number of substitute tails that could be produced. It could go on and on.

Previously, Lin Yuan wanted to ask the Moon Empress about how pinnacle Class 4 Creation Masters became Class 5 Creation Masters.

But now, there was no need to do so because Genius could just use Tails of Fate to ask the heavens for an answer.

At this moment, Lin Yuan finally knew why Genius' fey name had been listed as Highest Access Fate-Knowing Beast on True Data.

As long as Genius had spiritual energy, it would be able to use its overwhelmingly powerful abilities.

Now, Lin Yuan did not have any other fey besides Morbius that had as much overall combat, defense, and support abilities as Genius. It was definitely the fey of his that had the strongest combat power.

Morbius sensed what Lin Yuan was thinking and said softly, "Partner, Genius' bloodline has reached its limit. Although there is still the possibility for its bloodline to transform again in the future, it will no longer be the evolution of Genius' bloodline but its birth horoscope."

This was the first time that Lin Yuan had heard the term 'birth horoscope'.

While Lin Yuan was mulling over what it meant, Morbius went on to say, "Genius isn't your strongest fey besides me. Although Chimey's abilities could not match up to that of Genius, its attacking and controlling powers were much stronger than Genius'. After all, it created a real sun that can produce light and heat. If the sun is strong enough, it might even be able to rise into the sky and become part of nature."

Lin Yuan was shocked and stared incredulously at Chimey, who was swinging on one of Genius' tails.

Chimey was swinging in a carefree manner as it admired its tail feathers.

Lin Yuan immediately used True Data to check on Chimey.

Chapter 1582: Command Phoenix New Day Sparrow

Lin Yuan finally realized why Morbius said such a thing.

Not only could Genius not compare with Chimey in terms of combat, but even Shiny might not be able to compete with Chimey when it reached Diamond X/Fantasy V.

[Fey Name]: Command Phoenix New Day Sparrow

[Fey Species]: Sound sparrow genus/sound sparrow species

[Fey Grade]: Diamond (10/10)

[Fey Type]: Sound/Light

[Fey Quality]: Fantasy V

Abilities:

[Phoenix Cry]: The power of main phoenix will combine the phoenix cry into musical notes that will turn into birds. The birds will be able to pass through almost anything. After coming into contact with a target, the phoenix cry within the musical notes will stun and disturb the target. When the musical notes are attacked or blocked, they will separate into more birds.

[New Day of Light]: The exquisite main phoenix blood and sunlight will solidify into a sun. Under the light of the sun, its abilities will rapidly be absorbed by light. When the light is used up, it can replenish phoenix blood and soul.

[Phoenix Breed Input Sound]: By tempering the phoenix-species fey's soul into a phoenix breed and injecting it into the body of an avian fey, the avian fey will gain the intelligence and partial abilities of the phoenix-species fey. Setting the phoenix breed alight will increase the power of the musical notes that had transformed into birds.

[Falling Sky New Day]: Drop the sun in its body to create a territory full of sun energy. When the sun energy depletes, it will temporarily be immune to most physical and elemental damage.

[Speak Spirit Singer]: Enter a song into the soul. By using up the phoenix breed's ability to bring a song into reality, the willpowers and effects in the song can be an advantage or disadvantage to bless its friends or curse its enemies.

[Clear Zither Change Voice]: Place an anchor on something that could release light-type energy. By controlling this entity or whatever was connected to this entity, one's voice or voice-type ability can be applied to this entity and dispersed with this entity at the center.

UPDATE FROM novelB(i)n.NET

Exclusive Skill:

[Double Sun Reins]: The stronger the power of the sun it controls, the stronger its ability to communicate with other suns. According to the strength of the reins, it can offer a song to the sun and lend energy from the other suns to replenish itself.

[New Sun Body]: Fuse with the sun it produces and enter the Non-Burning Nirvana Sound Sparrow. Its abilities will not change, but it will be able to switch attributes.

When he saw Chimey's abilities on True Data, Lin Yuan felt that even his soul was spiraling into shock.

Oh my God! Are these the abilities that a fey should be having?

Lin Yuan had seen the Mother of Bloodbath and Gray's True Data.

Both of them were Heavenly Family Feys, but Lin Yuan felt that even their abilities and exclusive skills could not compare to that of Chimey.

Lin Yuan felt that Chimey's abilities and exclusive skills were on another level, even to a Heavenly Family Fey.

Heavenly Family Feys were the most beloved lifeforms in the world. They could communicate with a certain facet of nature or celestial phenomena, but this also came with them relying on one of the main world's natural resources.

Yet, Chimey could use itself to produce a sun. As such, there was no doubt that it had surpassed Heavenly Family Feys.

Chimey was like Genius. It used to be plume sparrow genus/plume sparrow species. But now, it was sound sparrow genus/sound sparrow species.

Its species had also never existed in the main world in the past.

Chimey was also about to open a new path that no fey had gone down before.

Chimey's abilities and exclusive skills had changed to a much greater extent than Genius.

Firstly, Shattered Jade Voice had changed into Phoenix Cry.

Shattered Jade Voice could shoot out a loud musical note that sounded like a piece of jade shattering at a target.

It would definitely bother targets and break off into ten spiral-shaped notes that could easily pass through most things when it made contact with the target.

Now, Phoenix Cry would combine phoenix cries with musical notes and change them into flying birds. When the birds crashed into targets, phoenix sounds would be produced. It would not only disturb but also stun targets. After the birds were attacked, they would shatter like jade.

It seemed that these two abilities did not differ by much.

However, Phoenix Cry matched Chimey's power as a main phoenix.

It seemed that the main-phoenix-species fey bloodline that Chimey's bloodline consumed had not disappeared. Rather, it had turned into a tool for it to use for attacking.

Chimey's previous Elite ability had been Bathed in Light. It could recover the vitality that Chimey used up and was considered a self-recovery ability.

But now, New Day of Light allowed Chimey to use its bloodline to turn its blood into a sun.

After these suns rose, they would essentially become a checkpoint for Chimey to return to.

The light from the new sun would be able to quickly replenish Chimey.

The flying birds from Phoenix Cry could also become more lifelike under the sunlight.

If the sun energy was used up, Chimey could use phoenix blood and soul to replenish the sun energy and recover the sun.

Lin Yuan understood that New Day of Light was the reason Chimey could produce a sun.

The sun was mainly made up of the main-phoenix-species bloodline that Chimey had consumed.

Lin Yuan thought, *How much does Chimey hate main-phoenix-species feys?*

In order for New Day of Light to be developed, the sun had to be stronger. He could only imagine how much phoenix blood and how many souls had to be used up.

Lin Yuan had provided Shiny with dragon liver.

He had specifically opened a faction with Long Tao to buy and sell dragon-species fey spiritual ingredients by nurturing feys that had main-dragon-species bloodline.

But now, Lin Yuan felt that he needed to contact Li Xuan to ask for a faction that nurtured main-phoenix-species feys.

After tonight, besides the main-dragon-species fey blood that Shiny needed, Chimey also needed the blood and soul of main-phoenix-species feys.

Chimey's Phoenix Breed Input Sound was similar to New Light of Day.

It also needed the souls of main-phoenix-species feys to temper them into phoenix breed.

The phoenix breed would combine with the phoenix cries and enable the golden flying birds to gain intelligence and partial abilities of phoenix-species feys.

Chapter 1583: Non-Burning Nirvana Sound Sparrow

As such, the attack from the phoenix cry would turn into a phoenix-species fey. Moreover, it would be able to increase its power through the burning phoenix breed.

Lin Yuan was willing to create a fey breeding base for Chimey where it could nurture phoenix-species feys.

Chimey would have as many souls of phoenix-species feys as it wanted in the future.

Chimey could temper the phoenix breed to increase its power.

Sunlight Rays had turned into Falling Sky New Day.

Sunlight Rays was a very simple support ability with a large range. It could weaken all the targets while increasing the liveliness of plant-type feys within the range.

Now, Falling Sky New Day would increase the benefits that it could bring to their own side and combine it with Nirvana Light Swansong to create the territory of light for Falling Sky New Day.

Chimey would be resistant to most physical and elemental damage within the territory.

As such, Chimey would be able to do as it pleased and dominate the battlefield.

Speak Spirit Singer was the ability that Chimey unlocked through its Sound Bird bloodline.

It would use up its soul to bring the willpowers in the song into reality while making use of its abilities.

Although Chimey mostly sang older songs, Lin Yuan knew numerous special songs, such as 'A Bloody Love Story', that he had heard in his previous life.

'The more blood flows, the more the hand aches, the more empty the heart is, the more painful the flesh, the more vivid the emotion.'

If Chimey sang such lyrics, the enemy would immediately experience aching hands, stalled blood flow, and weakness. They would lose their faith and experience pain akin to thousands of knives.

If such negative effects were applied to the enemy, they would essentially be cursed.

Negative effects could be removed by purifying effects.

But special feys with special abilities would be needed to remove a curse.

If one did not have such feys, Chimey would be able to sing various cursed songs to torture its enemies.

There were also many songs of benefits that could be called blessings.

Just like curses, blessings could not be easily purified.

UPDATE FROM novelB(i)n.NET

Speak Spirit Singer would enable Chimey to have endless possibilities.

Clear Zither Change Voice had not changed in the slightest.

Previously, Chimey's first exclusive skill was Clear Sky. It used a bird cry to dissipate the clouds and summon the sun.

However, Chimey could now produce a sun of its own.

Thus, Clear Sky became Double Sun Reins.

Chimey could use the sun it produced to communicate with other suns. It could even offer up a song to the sun to borrow its energy.

Besides the main world, every dimensional world had its own sun.

Double Sun Reins could be used in any world and allow the sun it controlled and its ability to communicate with other suns to become even more powerful.

This meant that Chimey could depend on itself to produce a sun and communicate with suns without needing the Mother of Bloodbath's help.

It would also make it easier for it to use Clear Zither Change Voice.

The sun in the main world would become its anchor.

Double Sun Reins made Lin Yuan feel that Chimey's combat style was no different from that of heavenly family feys.

However, Chimey did not communicate directly with the sun but with the sun in its body.

The exclusive skill that Chimey obtained when it evolved to Fantasy Breed was Radiant Body.

But now, Radiant Body had become New Sun Body.

New Sun Body's description was very simple. Chimey would fuse with the sun it produced and enter the Non-Burning Nirvana Sound Sparrow state.

Lin Yuan was stunned when he saw the name Non-Burning Nirvana Sound Sparrow.

Lin Yuan immediately instructed Chimey to use New Sun Body.

Chimey flapped its wings and fluttered its tail feathers.

The 99 suns on Chimey's tail feathers fused together, and a sun rose above its head.

Soon, Chimey called the sun over into its body, and it was set alight with blinding orange-red flames.

Chimey turned into a sparrow with a 30-meter-long wingspan.

When Chimey let out a cry, the golden birds all turned orange-red.

They had the same orange-red light on their bodies that Chimey had.

When Lin Yuan read the description of True Data, he finally understood what it meant by not changing the original effects but only changing one's attributes.

Chimey entered the Non-Burning Nirvana Sound Sparrow state, and the Command Phoenix New Day Sparrow's type changed from light and sound to fire and sound.

All of its original light-type abilities became fire-type. This was considered an increase in its attacking power.

However, it also reduced Chimey's agility and range.

In a battle, deciding how one would adapt to the battleground's size would dictate the real consequences of what happened.

For example, the Command Phoenix New Day Sparrow would not be curbed by water-type feys, while the Non-Burning Nirvana Sound Sparrow would be extremely effective against plant-type feys.

Lin Yuan looked at Chimey, who had suddenly turned into a giant bird, and said softly, "Chimey, change back."

Usually, Lin Yuan did not use Chimey and Genius in battle.

However, now that this Radiance Hundred Sequence selection would involve the Freedom Federation's schemes, it would be a good chance for Lin Yuan to give Genius and Chimey exposure.

He had never exhibited Genius or Chimey before.

The evolved Genius and Chimey would become Lin Yuan's best secret weapons in any other situation.

Lin Yuan's fey evolution had reached its temporary limit until he was promoted to an A-rank spirit qi professional.

Until then, his feys would not be able to improve by much.

Nonetheless, Lin Yuan had reached the peak of what the young generation in the Radiance Federation could achieve.

He had five Diamond X/Fantasy V feys. This was already better than most members of the younger generation.

However, Zong Ze, Gu Lang, and An He were also advancing. Moreover, their feys with the Barren bloodlines had reached adulthood.

Shiny needed at least a year before it could reach adulthood.

After this, Lin Yuan just needed to wait for the Radiance Hundred Sequence selection to take place.

At that moment, at a certain corner of the main world, a pair of cold eyes flew open on the throne of a palace.

There were crimson and bronze circular totems behind the cold eyes.

Chapter 1584: Epoch God Palace!

At that moment, the clock in the palace started to ring sonorously.

The rings reverberated through every corner of the palace.

After the ringing was over, there was still the sound of the clock ticking.

The person stood up from the throne and turned to look at the crimson and bronze round totem behind him before he fell to his knees respectfully. He sternly kowtowed three times.

He stood up and mumbled, "Another epoch has started. Totem God, you haven't shown your spirit in almost 3,000 years."

The figure raised his head to see a pair of clear eyes looking back at him from the crimson and bronze round totem.

The figure hurriedly dipped his eyes as though he had just committed a crime.

He kowtowed another three times.

At that moment, someone knocked on the closed door of the palace.

This figure returned to the throne.

With a wave of his hand, someone opened the door, and a man dressed in black crystal armor walked in.

The man anxiously fell to his knees when he saw the figure on the throne and said, "Lord Palace Attendant, the natural scales have tipped toward the east. This time, the balance of the scales broke the link between Number Six and the natural scales. Number Six spat out a few mouthfuls of blood and fainted. He is being treated by Number Four now.

"Lord Palace Attendant, something that shouldn't belong in this world must have appeared in the east. Number Six sensed that the scales have tipped almost ten times in the past six months."

While he was talking, the man wearing black crystal armor could clearly sense the pressure around the figure on the throne drop, and a deadly air rushed out.

The figure seated on the throne ignored the man dressed in black crystal armor.

After a moment of silence, he said, "Go and wake up the other three palace attendants in Epoch God Palace. We will have a secret meeting in one minute."

UPDATE FROM novelB(i)n.NET

After hearing what the figure on the throne said, the man in black crystal armor suddenly released a sincere light of joy.

"Lord, ever since the last time, Epoch God Palace—"

Before the man in black armor could finish speaking, a light that resembled a root slapped him across the mouth.

This light left the man in black crystal armor staggering, and he knew that he had done something very wrong.

At that moment, the figure on the throne sneered. "Number 2, you've overstepped your boundaries. Don't you dare mention Lord Saint. The four palace attendants only get to mention Lord Saint one day a year. If Summer and Winter find out that you tried to utter Lord Saint, your birth horoscope will be destroyed. Don't forget your place. You're just a lowly servant under the Totem God. After being Number Two for so long, have you forgotten the rules?"

Number 2 displayed his birth horoscope and laid it on the ground before banging his head down on his birth horoscope as a way of expressing his regret for almost uttering the words 'Lord Saint'.

After 18 kowtows, his birth horoscope was covered in blood.

Finally, he stood up and bowed at the figure on the throne before heading in the direction of the tightly shut palace doors.

There were many clocks outside every palace that ticked away, counting down different sets of times.

The ticking was so ubiquitous that it would be so easy to let oneself be carried away by it.

From infancy to death, everything was but a passing slip of time.

Half a minute later, a fire lit up on the large round stone tables at the center of four palaces.

The stone tables were carved with messy lines.

If any line was touched, the totems on the line would start to play out.

Four figures shrouded in mist sat at a corner of each stone table.

There were 36 other figures grouped into groups of nine kneeling on the ground next to the tables.

The man in black crystal armor was among them.

A figure with brimming vitality swirling around him said, "Autumn, the four of us record the epochs. The epoch clock outside your palace rang, so it should be time for Winter to start recording. You interrupted our slumber before it was time for us to start recording. Why?"

The figure that had been sitting on the throne said, "Spring, nothing went wrong with the epoch I recorded. However, something has happened in the east. Many things that shouldn't appear in the world have appeared. We should remove it!"

The figure wrapped in frigid cold said, "Autumn, you could have settled this on your own. The epoch started 2,000 years ago, and you took over the recording from Summer. I should be awakening now, but you have also disturbed Spring. If Lord Saint doesn't descend and Totem God doesn't awaken 2,000 years later, how do you expect Spring to last 2,000 years without any rest?"

The figure who had been seated on the throne said solemnly, "3,000 years ago, Tower Canon's First Page Crimson, Second Page Warbler Candle, and Third Page Violet Light Green released an attack that interrupted the epoch clock's time. I sensed movement with Totem God."

The other three people seated at the tables started to tremble, and genuine respect appeared on their faces.

Spring, who was usually the picture of composure, looked at the people kneeling on the ground and said, "Pick three of you and immediately head to the east to investigate the situation."

...

Lin Yuan had no time to rest over the past few days.

Although the Sacred Sword Wielding Queen still showed no signs of increasing its Stars, it had absorbed World Crystals and generated several new Sword Skills for Lin Yuan.

All of these Sword Skills would become Lin Yuan's secret weapons.

After lunch, Lin Yuan fetched several songbooks and started to teach Chimey how to sing.

There was nothing that made Chimey happier than learning to sing from Lin Yuan.

Now that its dream had changed, Chimey was no longer obsessed with live-streaming.

Four days had passed since Chimey's bloodline transformed, and it had not held a live-stream on Star Web since.

Chapter 1585: The Meeting that Yin Lin Looked Forward to!

This alarmed Chimey's dedicated fans, who waited in its live-streaming room daily.

While Lin Yuan was teaching the songs to Chimey, he suddenly felt that he seemed rather cruel.

Chimey could use Speak Spirit Singer to bring the lyrics to life, and the enemy would have to suffer the torture of the curses.

However, Lin Yuan was aware that being merciful to one's enemies would only lead to brutal consequences for oneself.

Hence, Lin Yuan did not feel bad at all.

Genius had been using Highest Access Tail.

Its eight tails joined together and pierced the sky.

Genius did not immediately ask the sky what it should do to become a Class 5 Creation Master.

Genius was not stupid and knew that it would have to pay in spiritual energy to obtain an answer from the sky.

But now, Genius had not prepared a sufficient store of spiritual energy.

Although it could replenish itself with the fish coats, it would take a week for it to consume 5,000 fish coats to produce one substitute tail.

It did not plan to ask the heavens anything before producing five substitute tails.

Otherwise, it would have to use its original tails if it did not have sufficient spiritual energy.

This would cause his ability to weaken.

Genius knew that it was almost time for the Radiance Hundred Sequence selection.

It had never been able to help Lin Yuan during battle. As such, Genius was determined to perform with flying colors at the Radiance Hundred Sequence selection.

Lin Yuan had already contacted Li Xuan and told him about his plan to set up a phoenix-species fey breeding base.

Li Xuan had the same reaction as Long Tao and agreed immediately.

Lin Yuan had helped Coiling Dragon's Valley transform into one of the top three factions in the Radiance Federation.

Long Tao was grateful to Lin Yuan, and Li Xuan felt just as much gratitude.

Lin Yuan was the one who secured Li Xuan's place as the Young Leader of Dark Clouds Bird Shrine and gave Dark Clouds Bird Shrine Golden Lotus Brocade Pearls that enabled them to develop quickly.

Li Xuan had been trying to come up with a way to repay Lin Yuan.

Now, the chance was finally here.

There was currently no faction in the Radiance Federation that specialized in selling main-phoenix-species feys.

Li Xuan had the same idea as Long Tao.

Once this faction was set up, it would immediately be able to shake up the market.

The spiritual ingredients that came from phoenix-species feys were just as rare as the ones that came from dragon-species feys.

Even if one had the money, one would not be able to buy them without special connections.

Lin Yuan needed phoenix blood and souls so he could choose the ability that best suited Chimey.

Eventually, after much promotion from Li Xuan, Lin Yuan chose the Mystic Voice Luan, which was specially bred by Dark Clouds Bird Shrine.

The Mystic Voice Luan was a rare sound-type phoenix-species fey. It had the ability to hypnotize someone with a mystical voice.

This ability might not stand out on the battlefield and would only have a supporting effect.

Hence, Dark Clouds Bird Shrine had never paid special attention to the Mystic Voice Luan.

However, the Mystic Voice Luan was very compatible with Chimey's ability.

If the Mystic Voice Luan's soul was tempered and combined with Phoenix Cry, the controlling abilities of Phoenix Cry would be improved.

Chimey could temper more than one phoenix-species fey soul.

Lin Yuan would be able to choose more phoenix-species fey souls in the future.

Currently, the Mystic Voice Luan would be enough for Chimey.

Besides preparing phoenix-species feys for Chimey, Lin Yuan needed to prepare a space in the marsh world for Genius' army of cats.

The cats chosen to be stored there did not have to be picked out carefully.

UPDATE FROM novelB(i)n.NET

As long as the cat-species feys had strong talent, Lin Yuan would find them acceptable.

Lin Yuan called Listen.

The Listening Heron Chamber of Commerce had already become comparable to a top faction.

Although the Listening Heron Chamber of Commerce's role was centered on luxury resources, it had not abandoned its original management style.

They enhanced their management style and gathered many offline and online resources.

When Listen found out that Lin Yuan needed cat-species feys, Listen personally oversaw this task.

In two days, Lin Yuan managed to collect 500 exceedingly impressive cat-species feys.

However, all of these cat-species feys were Bronze grade and below.

Lin Yuan had specifically requested it.

He could only ensure the fey's strength and potential if he nurtured them from young.

The better the foundation that was laid for the cat-species feys, the more potential they would have.

Genius could use Crowded Cat to gain the bodies and elements with which the cat-species feys were affiliated. This was how Genius would become stronger.

After Lin Yuan was done teaching the songs to Chimey, Lin Yuan's phone started to ring just as he was about to evolve the cat-species feys.

He picked up the phone and saw that the call was coming from Listen.

Listen stammered, "Young... Young Master, you said that someone would come here to use strange water to trade for heavenly-maiden-grade elemental pearls. The person came, and the trade was completed. However, the person refuses to leave until she sees you. Young Master, I think she's an Azure Envoy from the Azure Federation. What should we do?"

Yin Lin was currently sitting in the Listening Heron Chamber of Commerce, filled with nervousness and anticipation.

It was the same hope she felt when she first regained her ability to see.

However, the longer she anticipated, the more nervous she felt.

She wondered what that person wrapped in thousands of laws and willpowers in the constellation-filled sky looked like in reality.

However, Yin Lin knew where the line was.

No matter how anxious she was, she did not rush to the Listening Heron Chamber of Commerce the moment she arrived at the Radiance Federation. Instead, she paid her respects to the Radiance Federation's members of royalty before she snuck away.

"Tell her to wait for me, and I'll be there soon," replied Lin Yuan.

Lin Yuan had already promised to meet with Yin Lin at the Astronomical Parliament parliamentary meeting.

Lin Yuan remembered the Firefly Demon Fetus that Yin Lin had mentioned.

It was considered an unlucky disaster by others.

But to Liu Jie, it could change his fate.

Liu Jie's fey system would become perfect.

Lin Yuan did not intend to use Faceless Paper to see Yin Lin this time.

Instead, he was going to meet with her as the disciple of one of the Radiance Federation's members of royalty.

The envoy group from the Freedom Federation had sought allegiance with the Azure Federation, and the Radiance Federation was going to do the same.

During this Radiance Hundred Sequence selection, Lin Yuan would go for the merciless lethal blow if the envoys from the Freedom Federation tried to pull any tricks.

Chapter 1586: Iron Angels, Fly!

Hu Quan had finished building Lin Yuan's fey carriage long ago. However, he had not found suitable feys to pull it.

As such, the fey carriage had not been used yet.

The Moon Empress had given Lin Yuan 12 Sky Fragrance Beauty Butterflies.

After Lin Yuan saw the Emperor Armored Martial God Insects, he decided that they would be the ones to pull the fey carriage.

He had managed to obtain a few of the Emperor Armored Martial God Insects during the opening of the pinnacle Class 4 dimensional rift at Coiling Dragon's Valley.

One of them had mutated and sprouted black iron wings.

This time, Lin Yuan was going to meet with Yin Lin as the disciple of a member of royalty.

Although he was not going to wear the imitation Moonbeam Coronation Costume that the Moon Empress had given him, he still needed to dress appropriately for the occasion.

Lin Yuan took out the completed fey carriage from the Diamond fey storage box.

Next, he released the Emperor Armored Martial God Insects that had been trapped inside a Diamond fey storage box.

All of them were controlled by the Sky Fragrance Beauty Butterflies.

The Sky Fragrance Beauty Butterflies ordered the Emperor Armored Martial God Insects to listen to Lin Yuan. As such, the Emperor Armored Martial God Insects were all obedient now. They would pull the fey carriage across the sky without putting up any protest.

IF YOU WANT TO READ MORE CHAPTERS, PLEASE VISIT [nOvElB\(i\).NET](http://nOvElB(i).NET) TO EXPERIENCE FASTER UPDATE SPEED.

However, Lin Yuan still needed to let out the Sky Fragrance Beauty Butterflies.

Otherwise, the Sky Fragrance Beauty Butterflies' control over the Emperor Armored Martial God Insects would weaken due to them being in different spaces.

The mutated Emperor Armored Martial God Insect had higher intelligence than the other Emperor Armored Martial God Insects.

However, the higher the intelligence, the more difficult it would be to control.

The Sky Fragrance Beauty Butterflies were Diamond grade. It would be a challenge for them to control the Myth III Emperor Armored Martial God Insects.

However, Rememberling was around. It could help the Sky Fragrance Beauty Butterflies to evolve to Myth Breed as soon as possible.

At that point, Lin Yuan would even be able to instruct the Sky Fragrance Beauty Butterflies to control Creation Breed insects to pull the fey carriage.

The Sky Fragrance Beauty Butterflies could change their targets extremely easily. All they had to do was get rid of one to swap in another.

The 12 Sky Fragrance Beauty Butterflies landed on the Emperor Armored Martial God Insects' foreheads and controlled them to put the shackles for the fey carriage on itself.

Soon, the fey carriage that had 12 iron angels pulling it took to the sky above the Return from Faraway Mansion.

Four pairs of large wings appeared on Lin Yuan's back.

When the wings moved, he appeared inside the fey carriage with a flash.

At that moment, a small crimson spider appeared behind Lin Yuan and crawled into the fey carriage.

Instead of changing into human form, the small spider jumped onto Lin Yuan's shoulder and said, "Little Yuan, I will follow you wherever you go from now on. This way, I'll be able to step in if you're ever in danger."

This small crimson spider was Blood New Moon in its true form.

Blood New Moon had already sworn on the sun to become Lin Yuan's Protector.

Now, it was fulfilling the duty of being a Protector.

Frankly, it did not need to cling to Lin Yuan at every moment to be his Protector.

However, Lin Yuan was too important to Blood New Moon.

Moreover, in these uncertain times, Blood New Moon could not rest easy knowing that Lin Yuan was out on his own.

Besides the arrival of the envoys from the Freedom Federation at the Radiance Federation, people from Tower Canon might have already infiltrated the Radiance Federation.

Both Tower Canon and the Freedom Federation were enemies of the Radiance Federation.

By making a spectacle out of this journey, it was likely that he would become targeted by those from Tower Canon and the Freedom Federation.

If any of these people tried to secretly attack Lin Yuan, Blood New Moon would be able to protect Lin Yuan.

Blood New Moon was afraid Lin Yuan would be in danger.

Now, Lin Yuan was key in enabling Jade Sundial to be revived.

Blood New Moon had never dared to dream that Jade Sundial would be revived.

But now, Lin Yuan had given it hope.

No matter what happened, Blood New Moon was not going to let go of this chance.

It was permitted to ride avian-type feys and fey carriages above the Royal Capital.

However, avian-type feys needed to register if they were above Gold grade.

If feys above Gold grade pulled a fey carriage, it also needed to be registered.

Normally, there were very few fey carriages that were pulled by Platinum feys.

Platinum feys were extremely expensive and required a large number of resources to be nurtured.

It would require at least three Platinum feys to pull a fey carriage.

This was different from just riding a Platinum fey.

Hence, the ones riding fey carriages were usually members of factions.

Nonetheless, even the members of top factions rode fey carriages pulled by Diamond feys at the very best.

Most of them were still using Platinum feys.

Hence, Lin Yuan's fey carriage was eye-catching when it took to the sky above the Royal Capital.

The 12 iron angels flew in a three-square-formation with four of them in each group.

In the blue sky, as they flapped their wings, they stunned anyone who laid eyes on them.

Today was the day that the envoy groups from the Azure Federation and Freedom Federation arrived at the Radiance Federation.

The entire Royal Capital was on edge, and Spirit Guards were patrolling every corner.

There was a specialized department for fey carriages and avian-type feys in the Radiance Federation, known as the Ride Transport Department.

The department consisted of Ride Transport Guards, and they were responsible for managing and registering the feys and fey carriages that flew every day.

The Ride Transport Guards on duty had already seen the iron angels and the fey carriage that they were pulling.

Most of the Ride Transport Guards were spirit qi professionals who had contracted Gold feys.

This level of power was sufficient to manage transport.

However, the iron angels in the sky were too remarkable.

Although the Ride Transport Guards did not know what the iron angels were, they could sense that they were far from ordinary and exceeded Diamond grade.

Nonetheless, the Ride Transport Guards who noticed this had already summoned their standard feys, Air Current Hunting Eagles.

They leaped onto the Air Current Hunting Eagles and rode them over to the fey carriage.

Besides being able to control the Emperor Armored Martial God Insects, the Sky Fragrance Beauty Butterflies could also use their spiritual energy to imitate exterior scenery in the fey carriage.

Lin Yuan immediately halted the fey carriage when he saw the Ride Transport Guards.

When the Ride Transport Guards drew near to the Emperor Armored Martial God Insects, they thought, *?If these iron angels didn't retract their aura, the Air Current Hunting Eagle would probably have been sent packing with fright, and I would be left plummeting to the ground.*

Chapter 1587: Are You Leo?

But even though these iron angels had retracted their auras, the Air Current Hunting Eagles were still trembling to the point that the Ride Transport Guards almost lost their footing.

The Ride Transport Guards coughed before saying in a low voice, "Did this fey carriage register with the Ride Transport Department? Who is inside?"

Lin Yuan opened the door of the fey carriage.

At that moment, a Ride Transport Guard immediately gasped. "Lin Yuan!"

This Ride Transport Guard was able to recognize Lin Yuan because of Lin Yuan's performance at the Allstar Match.

This Ride Transport Guard was a loyal fan of the S Tournament. He did not support any team, but he had to watch every match. He did not even miss any of the accompanying matches.

When the Ride Transport Guard called out Lin Yuan's name, Lin Yuan nodded at him and said, "This fey carriage was registered from the moment it was built. However, the fey pulling it had not been decided. I was just about to do the registration."

Although the Ride Transport Guard was very excited when he saw Lin Yuan, he still had to follow the rules and said, "Only Creation Masters are able to do last-minute registrations. If you aren't a Creation Master, you'll have to go to the registration department. Normally, it would take an hour at most to verify a fey carriage. However, the feys pulling your fey carriage are a little strong. Hence, they need to be properly checked to make sure that they won't lose control."

While they were talking, the Ride Transport Guard started to guess Lin Yuan's identity.

He assumed that Lin Yuan had to come from a veteran or top faction. Otherwise, there was no way that he would be able to own such a powerful fey carriage.

Lin Yuan's identity had been a point of discussion on Star Web for some time.

The Ride Transport Guard felt that he could make a post on Star Web when he returned, and it would probably be able to gain many fans for him.

But at this moment, Lin Yuan said, "You don't have to go through all that trouble."

Lin Yuan handed this Creation Master crest over.

Initially, the Ride Transport Guard had been shocked by how Lin Yuan was a Creation Master despite being so young.

But when he saw the moon on the crest, his hand started trembling, and he almost dropped the crest.

He never expected Lin Yuan to be the Moon Empress' disciple and that he had actually stopped the Moon Empress' disciple's fey carriage.

Under normal circumstances, Lin Yuan just needed to reveal his identity, and he would be able to ride away in his fey carriage. Yet, Lin Yuan turned out to be so polite and completely lacked any hint of arrogance.

The Ride Transport Guard hurriedly handed the crest back to Lin Yuan and said, "Lord, please have a good journey!"

Lin Yuan bid the Ride Transport Guard goodbye and rode away in the fey carriage toward the Listening Heron Chamber of Commerce.

IF YOU WANT TO READ MORE CHAPTERS, PLEASE VISIT [nOveIB\(i\).NET](http://nOveIB(i).NET) TO EXPERIENCE FASTER UPDATE SPEED.

Normally, Lin Yuan kept his identity as the Moon Empress' disciple to himself.

But now, Lin Yuan felt that there was no point in hiding it because when he was faced with the Freedom Federation's scheme at the Radiance Hundred Sequence selection, he was going to show his true power.

Lin Yuan's fey carriage arrived in the sky above the Listening Heron Chamber of Commerce when he sensed a cold aura locking his fey carriage in.

This aura was very special and clearly belonged to a spirit qi professional. But at the same time, it had the untamed wildness of a fey.

This aura could only belong to an expert who had beast patterns.

Yin Lin was one of the Azure Federation's Azure Envoys.

Although she had secretly snuck out, she was instinctively tuned to protect.

When Blood New Moon sensed an aura targeting the fey carriage, he immediately unleashed his aura to retaliate against it.

Just as the aura was about to clash with Blood New Moon's aura, Lin Yuan jumped down from the fey carriage.

At the same moment, Yin Lin sensed the fluctuations outside the Listening Heron Chamber of Commerce and walked out.

She immediately spotted Lin Yuan jumping down from the sky, and her expression changed.

Yin Lin stared unblinkingly at Lin Yuan.

However, it was not his appearance that shocked her.

Many people in this younger generation of the Azure Federation had awakened their beast patterns.

Usually, none of the spirit qi professionals who unlocked their beast patterns were unattractive.

These spirit qi professionals' bloodlines were affected by the feys' bloodlines, and their features became as otherworldly and exquisite as the feys.

Yin Lin had been surrounded by such people ever since she regained her sight.

Although Lin Yuan's bone structure, features, and aura were all impressive, they were not enough to throw Yin Lin off.

Yin Lin had reacted in such a way because Lin Yuan felt way too familiar to her.

He was so familiar that she unwittingly felt a sense of affection and dependence on him.

This feeling was the same as how she felt toward the figure wrapped in countless laws and willpowers.

Yin Lin rushed up to him and looked besotted as she asked in a quivering voice, "Are you Leo?"

Lin Yuan nodded at Yin Lin.

Lin Yuan realized that Yin Lin did not lose out to Su Yiren at all in terms of looks.

However, Su Yiren's beauty was permeated by masculinity, while Yin Lin's beauty was scholarly and elegant.

Lin Yuan nodded at Yin Lin and said, "Yes, I'm Leo. What do you think about chatting inside my fey carriage?"

Yin Lin trusted Lin Yuan wholeheartedly and did not have any guard up with him.

Lin Yuan was the one who had saved her.

She anxiously nodded.

Although she had agreed, the expert who was protecting her from the shadows did not agree.

Yin Lin was an Azure Envoy from the Azure Federation, and the Azure Cloud Leopard beast pattern was too important.

Before the trip to the Radiance Federation, the Azure Federation had gathered all the information about the Radiance Federation.

Lin Yuan had made his debut at the Guard Ye Banquet. Hence, his appearance was no longer a secret.

From the moment they laid eyes on Lin Yuan, the expert recognized Lin Yuan as the Moon Empress' disciple.

This was the Radiance Federation's territory.

The elderly man felt that it was not safe for Lin Yuan and Yin Lin to travel together.

Moreover, there was also an expert with even stronger power on the fey carriage.

The elderly man rushed up to Yin Lin and said, "Lordess Azure Envoy, I sense that there's another expert in the fey carriage. I don't think it would be safe for you to be in the fey carriage."

Yin Lin looked at the elderly man and replied, "Uncle Lei, you don't have to be worried. Nothing will happen. Wait for me here. We will return once I exit the fey carriage."

Chapter 1588: This Damned Philanderer!

Yin Lin did not give the elderly man a chance to continue talking at all and just nodded at Lin Yuan.

This elderly man could tell that Yin Lin and Lin Yuan knew each other.

But when he saw the way Yin Lin looked at Lin Yuan, he immediately wanted to let out a string of vulgarities.

What the hell!? There's something very wrong with this gaze! No matter how you look at it, that is a loving gaze! Intimate love! Can it be that Lordess Yin Lin is in love with this young man? This shouldn't be!

Yin Lin had been blind since birth and had not left her home.

After she regained her sight, she also awoke the Azure Cloud Leopard and Spirit White Lion beast patterns.

She had not left the Azure Federation at all.

This was Yin Lin's first trip to the Radiance Federation.

There was no way that she could have become acquainted with the Moon Empress' disciple.

Can it be that Lordess Yin Lin fell in love with the Moon Empress' disciple at first sight? This damn philanderer! How can he have such mesmerizing looks!?

Yin Lin was innocent and did not have much experience with the world.

What would happen if she was blinded by love?

This boy was the Moon Empress' disciple and was very likely going to end up as a Radiance Envoy or a Radiance Knight, at the very least.

They were of comparable status, so they could end up in a relationship.

Did this mean that Yin Lin was going to move to the Radiance Federation to get married?

This time, Yin Lin was the only Azure Envoy on the trip to the Azure Federation.

Although Lan Xun was accompanying her on this trip, Yin Lin was the one calling the shots.

Yin Lin had rejected a partnership with the Freedom Federation and offended them. It would be best if they could maintain their neutral position.

But if she ended up establishing a partnership with the Radiance Federation, she would be making the Azure Federation enemies with the Freedom Federation.

The Azure Federation did have a good relationship with the Radiance Federation. However, they did not have any bad blood with the Freedom Federation either.

The instability of the world was caused by the Radiance Federation and Freedom Federation.

The Azure Federation was one of the three major federations, and any decision they made would affect the entire main world.

Hence, they had to proceed with utmost caution and seriousness.

But now, given Yin Lin's thoughts, was it even possible to maintain neutral?

The elderly man felt that he needed to report this to Lan Xun.

However, Yin Lin was an Azure Envoy and had the authority to make any decision.

This expert's mind was a mess.

The longer he looked at Lin Yuan, the more he disliked him.

But since Yin Lin had accepted Lin Yuan's invitation, the elderly man did not have the right to interfere.

Eventually, he just bowed and watched as the fey carriage pulled by the Emperor Armored Martial God Insects landed on the ground.

Yin Lin and Lin Yuan walked in, and the fey carriage took to the sky.

The expert inside the fey carriage used his aura to protect the fey carriage.

As such, the elderly man's aura could not penetrate the fey carriage or listen to the conversation that was taking place inside.

There was nothing the elderly man could do about this but wait.

Inside the fey carriage, Yin Lin said softly to Lin Yuan, "Leo, I looked through information about you before I came. However, I never expected that you would turn out to be Leo."

Yin Lin did not hold back at all in front of Lin Yuan.

She had not interacted with many people in her life, and there were very few people she acknowledged.

When you're just trying to make great content at NOvel(Bin.)Com

Besides her parents and the maid who had been with her all her life, the only person she truly acknowledged was Lin Yuan.

Lin Yuan was extremely important to Yin Lin.

The first thing she saw in the constellation-filled sky was Lin Yuan's figure wrapped in willpowers and laws.

Lin Yuan had saved Yin Lin and filled her world with color.

She had always seen him as an angel.

Thus, the first time they met and when she became sure that Lin Yuan was Leo, she did not feel foreign at all.

Besides affection and happiness, she was also extremely shocked.

Lin Yuan looked one or two years younger than her.

Yet, he had been able to clinch the championship of the Martial Arts Stage.

This showed how talented he was as a spirit qi professional and Creation Master.

Yin Lin flipped over her hand and took out the Azure Federation's spatial equipment, spatial skein.

She handed it to Lin Yuan and said, "Leo, there are six types of top-grade strange water in this spatial skein that I especially collected. Besides the strange water that I traded for with heavenly-maiden-grade elemental pearls at the Listening Heron Chamber of Commerce, these are a gift to you!"

Yin Lin found out during the Astronomical Parliament parliamentary meeting that Lin Yuan needed top-grade strange water, and she happened to have some.

At that moment, Yin Lin was not giving the top-grade strange water to Lin Yuan because she had a motive or to repay him but just because she wanted to.

During the call, Listen had told Lin Yuan that Yin Lin had traded for heavenly-maiden-grade elemental pearls with three types of top-grade strange water.

Counting these six types of top-grade strange water, Lin Yuan would have nine types of top-grade strange water.

A Class 6 water world dimensional rift had opened in the Azure Federation.

Ever since it opened, the 12 Class 5 families in the Azure Federation immediately took control of it.

Unlike the Radiance Federation, the members of royalty of the Azure Federation did not personally clear out the dimensional rift of powerful lifeforms and set up a space where any low-class spirit qi professional would have the chance to develop themselves.

This was because the water world was not like the abyssal world, where it was possible for spirit qi professionals to build cities there.

In the water world, water was everywhere.

Although there were feys like the Oxygen Sea Anemone that would allow spirit qi professionals to breathe underwater, it would not enable spirit qi professionals to live there.

The spirit qi professionals would not be able to sleep or rest properly in the water world, and the water pressure would quickly drain their physical energy.

Thus, after careful consideration, the 12 Class 5 families in the Azure Federation decided to use the Class 6 water world dimensional rift as a well of resources that they would share and develop themselves.

This was the reason Yin Lin was able to bring out so many types of top-grade strange water so quickly.

Dark Blue needed to extract the characteristics inside strange water to awaken willpowers and evolve its quality.

Lin Yuan needed top-grade strange water badly. As such, he did not reject Yin Lin's gift.

Lin Yuan thought about it. Although Yin Lin had just traded for heavenly-maiden-grade elemental pearls, it would be impossible for her to have enough of them.

Chapter 1589: Talk to You as a Disciple of a Member of Royalty

Lin Yuan took out a large brocade box and gave it to Yin Lin. He did not tell her what was inside the brocade box.

He reached out and received the spatial skein from Yin Lin.

The spatial skein and fey storage box had the same functions, but the spatial skein could not preserve its contents as well as the fey storage box.

If something dead was placed inside the spatial skein, it would decompose quickly.

However, there was an advantage to the spatial skein, which was that top-grade spatial skeins were larger than Diamond fey storage boxes. Moreover, they could connect with the exterior environment.

!!

It could be said that the spatial skein could perfectly replace the Seven States of Darkness' disk-shaped spatial equipment.

Lin Yuan planned on asking for a few spatial skeins from Yin Lin.

As the Spirit Lock spatial zone evolved, the spirit pool's ability to break down energy ores had also improved.

If the golden discs were used to contain high-grade energy ores, Lin Yuan would have to refill them in a month's time.

The spatial skein did not take up as much space as the golden disc.

Lin Yuan could fill up a few spatial skeins with energy ores, so he would not have to worry about there being insufficient energy ores for a few months.

This would save Lin Yuan a lot of effort.

When Lin Yuan received the spatial skein, Yin Lin's face immediately broke into a smile.

Yin Lin did not stand on ceremony and opened the brocade box in front of Lin Yuan.

She was stunned by the light that came from the contents of the brocade box.

Watery-blue light poured out from inside the box.

In an instant, the interior of the fey carriage was illuminated blue.

Small light blue pearls shone with a light as though one was gazing at an ending from afar.

This feeling reminded Yin Lin of how she felt when she first laid eyes on him.

Blood New Moon had been keeping himself hidden.

After Lin Yuan returned to the fey carriage, Blood New Moon climbed into Lin Yuan's hair.

Blood New Moon was shocked by the thousands of water-type Over the Rail Coral elemental pearls inside the brocade box.

He was surprised by the Moon Empress' Creation Master level and Lin Yuan's haughtiness.

When you're just trying to make great content at NOvel(Bin.)Com

He was giving away such a treasure so casually.

Although six top-grade strange water was rare, any powerful force would be able to obtain them from Class 5 water world dimensional rifts.

However, even the Moon Empress would take some time and effort to produce thousands of Over the Rail Coral elemental pearls.

Yin Lin knew how precious this box of heavenly-maiden-grade elemental pearls was.

The higher the purity of the heavenly-maiden-grade elemental pearls, the more valuable they would become.

With the outer layers, the heavenly-maiden-grade elemental pearls would double in value.

The different classes of outer layers were Cloud Dream Lake, Defined Life, Over the Rail Coral, and Heavenly Maiden Sleet.

Heavenly Maiden Sleet elemental pearls were the stuff of legend.

Over the Rail Coral elemental pearls were considered the elemental pearls with the highest purity.

Yin Lin dared not accept this box.

Although she was an Azure Envoy, she still felt that the contents of the brocade box were too precious.

Normally, it would take one-third of the contents in the brocade box to trade for six types of top-grade strange water.

When Lin Yuan saw that Yin Lin was about to turn him down, he said, "Accept these heavenly-maiden-grade elemental pearls. Truthfully, the Firefly Demon Fetus is very useful for one of my friends. The 12 Firefly Demon Fetuses will be able to change his life. Let me thank you on his behalf."

Yin Lin hastily waved her hands dismissively and said, "Leo, I should be the one thanking you! I brought up the Firefly Demon Fetus to warn you that the envoy group from the Freedom Federation is definitely planning something big for this trip to the Radiance Federation. Since it will be useful to your friend, I will give all of them to you. However, nothing can be said for certain about it. You have to proceed with care and caution!"

Yin Lin's hand shook, and 12 mustard-colored fireflies appeared in her hand.

The 12 mustard-colored fireflies looked extremely plain.

Chapter 1590: Double-Win Collaboration

Lin Yuan raised an eyebrow.

He really liked Yin Lin's current attitude. She was very capable of separating personal from business, and this made it easier for Lin Yuan to discuss their collaboration.

This collaboration was too important. As long as she could maintain this attitude and not bring in any other emotions, he would be able to go through with the discussions without any worries.

"Of course! Since we're discussing a collaboration, the final result has to benefit both sides!"

Lin Yuan's words made Yin Lin smile even wider.

!!

But at the same time, she started looking at him in a different light again.

Yin Lin had been afraid that Lin Yuan would use his identity as Leo to discuss collaborations between the Radiance Federation and Azure Federation.

She was personally willing to help him unconditionally to repay him.

However, she was still an Azure Envoy and had all the responsibilities of the Azure Federation's glory on her back.

If this matter went beyond her individual and family's ability and would require the strength of the Azure Federation, it would put her in a difficult position.

If she used the Azure Federation's power to help Lin Yuan, she would be failing her responsibility as an Azure Envoy and contaminating the Azure Federation's glory.

It might even result in her family becoming humiliated and shunned in the Azure Federation.

From what Lin Yuan said, Yin Lin could sense his graciousness and attitude toward how he handled his affairs.

She already felt affectionate and reliant on him.

But now, she was suddenly struggling to tear her eyes away from him.

She forcibly composed herself to avoid Lin Yuan's gaze and said, "If we can achieve a mutually beneficial collaboration, I can make a decision on behalf of the Azure Federation's envoy group to agree to your offer."

Lin Yuan's eyebrow twitched.

Yin Lin knew what Lin Yuan was about to ask. Thus, he did not bother to waste any more time and immediately brought up the main topic.

Yin Lin was also indicating to him that she called the shots in the envoy group and that her wishes represented theirs.

However, she was only able to represent them and not the entire Azure Federation.

Nonetheless, Azure Envoys held absolute power in the Azure Federation.

However, the Azure Federation was controlled by the 12 aristocratic families. Each head of a family could be seen as a member of royalty.

Hence, Yin Lin, who had only just become an Azure Envoy, had not yet participated in the Major Federation Meeting.

She had not made any accomplishments yet.

As such, she could only give suggestions regarding important decisions involving the Radiance Federation and Freedom Federation.

Lin Yuan did not immediately mention his goal. Instead, he said, "Although you rejected the offer of an alliance from the Freedom Federation's envoy group without even going into a detailed discussion with them, I'm sure you know what their goal is."

Yin Lin nodded without hesitation.

The Freedom Federation could not make any big waves yet.

They would not dare to release the Firefly Demon Fetuses into the Radiance Federation because if they did, the Radiance Federation would immediately investigate the situation and link it to the Firefly Fantasy Earthworm disaster that took place in the Freedom Federation.

This would only cause the royalty from the Radiance Federation to seek revenge on the Freedom Federation.

When you're just trying to make great content at NOvel(Bin.)Com

Suppose the Radiance Federation's royalty was angered. In that case, they might not be able to put a stop to the disaster, but they would be able to use their 10 Stars sacred source lifeforms to activate celestial phenomena to attack the Freedom Federation.

Every member of royalty of the Freedom Federation was solely concerned with their own benefits.

The Radiance Federation's retaliation would cut into these benefits, and none of them would want this to happen.

But even if they could not make big waves, they could still unleash deadly attacks during the friendly spars at the Radiance Hundred Sequence selection.

Yin Lin had received secret information that besides there being one Freedom Envoy amongst the members of the Freedom Federation's envoy group, there were also three new members of the Freedom Hundred Sequence who were also favored by the Freedom Federation's members of royalty.

The Freedom Federation had not chosen their newest batch of Freedom Envoys. They did not add new members at any time like the Azure Federation did.

The three of them would definitely become part of the new batch of Freedom Envoys.

After contemplating for a moment, Yin Lin decided to tell this secret information to Lin Yuan.

When she found out how old Lin Yuan was, she felt that he was either participating in the Radiance Hundred Sequence selection or was going to spectate as a disciple of a member of royalty.

Given that three top young experts from the Freedom Federation had come, the Freedom Federation was definitely up to more than just attacking the ten new members of the Radiance Hundred Sequence.

Their real goal had to be to lure the members of royalty's disciples into battle.

Only the deaths of the disciples of the members of royalty who were the true cream of the crop of the Radiance Federation would be worth sending out three of the Freedom Federation's potential Freedom Envoys.

Suppose they killed one of the disciples in such a public setting. In that case, the Radiance Federation's members of royalty could not jump into action immediately to protect the pride and reputation of the Freedom Federation.

They also had to protect the safety of the Freedom Federation's envoy groups while they were in the Radiance Federation because if they were hurt due to an accidental kill, no envoy groups would be willing to visit the Radiance Federation in the future.

If Yin Lin could find out about Lin Yuan becoming champion of the Martial Arts Stage, so could the Freedom Federation's envoy group.

Thus, as the top member of the Radiance Federation's younger generation, it was natural that he would become the one that the Freedom Federation's envoy group would aim to kill.

The Freedom Federation and Radiance Federation had a two-year agreement, and the stakes were much too high.

The Freedom Federation could not afford to lose one of their pathways to becoming a Class 5 Creation Master, and the Radiance Federation was unwilling to help set up Star Web within the Freedom Federation.

In such a circumstance, deteriorating the power and quantity of their top young experts would undoubtedly be the best way to deliver a serious blow.

Hence, they needed to do this.

Lin Yuan was definitely going to become the Freedom Federation envoy group's target.

Yin Lin had a personal motive for telling Lin Yuan this piece of information.

She wanted him to be prepared. This was the only reason she would tell him such a secretive piece of information.
