

Merchant 341

Chapter 341: Dragon-Phoenix Landscape Carps' Evolution

Even if Morbius' grade didn't increase, the Floating Island Whale would be able to hatch from the crystal egg next June.

As for the Twin Red Pagoda, it might have only been over a dozen days since the Lifeform Sacrificial Fire had been harvested, but Lin Yuan could already feel the Lifeform Sacrificial Fire's birthplace getting stronger. It seemed like the Scorching Elemental Shellfish's fire-elemental pearls were very beneficial for the Twin Red Pagoda.

Endless Summer had already used the previous matured Lifeform Sacrificial Fire, so Lin Yuan hoped that this Lifeform Sacrificial Fire would mature quickly.

Subsequently, Lin Yuan started his task to enhance his feys this time.

Firstly, Lin Yuan placed the three Dragon-Phoenix Landscape Carps in a giant water tank inside the Spirit Lock spatial zone. Afterward, he placed the giant water tank on his nurture table.

The three Dragon-Phoenix Landscape Carps were in extremely great condition. As compared to when he had enhanced them into Bronze/Epic, they were looking much better, be it physically or spiritually.

Furthermore, their tails and side fins were longer. With larger tails and side fins, the Dragon-Phoenix Landscape Carps were even nicer to admire. However, Lin Yuan realized that the three Dragon-Phoenix Landscape Carps looked a little stranger.

From the outside, the three Dragon-Phoenix Landscape Carps might look just as majestic as before. Still, when Lin Yuan carefully observed them, he realized that as their dragon and phoenix's bloodlines were constantly concentrating, they were also mutually assimilating.

The assimilation wasn't to devour each other. Instead, they were mutually accepting each other and slowly integrating into one.

Lin Yuan had already planned to allow these three Dragon-Phoenix Landscape Carps to freely evolve and not be stuck at Bronze once he upgraded them to Legend quality.

It seemed like these three Bronze X/Epic Dragon-Phoenix Landscape Carps wouldn't need too long to evolve to Silver I after their quality reached Legend.

The Dragon-Phoenix Landscape Carps were evolved from Myriad Form Carps, and their special trait was their significant evolution every time their grade increased.

Therefore, when the Dragon-Phoenix Landscape Carps reached Silver, they would certainly go through a significant evolution.

After evolving into the Dragon-Phoenix Landscape Carps, their foundation had already been settled. However, Lin Yuan was looking forward to seeing their transformation.

Subsequently, Lin Yuan took the Bronze/Epic Dragon's Mouth Orchid. Lin Yuan had harvested the orchid from the Dragon's Mouth Orchid previously, so it looked no different from a weed now.

The stalk that grew the orchid previously was now already withered. But once the Dragon's Mouth Orchid's quality was upgraded to Legend, it would naturally grow another stalk, producing another orchid.

Lin Yuan had enhanced the originally Normal I/Normal Wood Weaving House Centipede to Bronze X/Epic. At present, it was around 20 centimeters in length, and its dark green body had 100 feet. It was considered a multi-legged insect.

One had to admit that the Wood Weaving House Centipede had some resemblance to Cheng Rui's contracted source-type lifeform, Spine Gu. However, the Wood Weaving House Centipede was a very docile insect fey. Its diet merely consisted of wood, and it didn't have any offensive capabilities.

Even if you were to push it to the extreme, there would rarely be any incidents of a Wood Weaving House Centipede attacking a spirit qi professional because it was trying to protect itself. It was considered to have the motto of 'I am very ugly but very gentle'.

When Lin Yuan had purchased the Oath Lily of the Valley, he had chosen to purchase a Bronze/Flawless one. It wasn't because the market didn't sell any Bronze/Normal Oath Lily of the Valley. The reason was the Bronze/Flawless Oath Lily of the Valley's appearance, as it had a very layered structure, making it look like the shape of a pagoda.

It was filled with pure white bell-shaped lilies. This was the pot that looked to be in the best condition among the few pots that Lin Yuan had checked. It was also the one with the best trimmings.

It was the main reason Lin Yuan had bought this Bronze/Flawless Oath Lily of the Valley. Since he was going to upgrade it to Legend, it had to have a good base.

Once Lin Yuan upgraded this Bronze/Flawless Oath Lily of the Valley to Epic, he placed six Bronze/Epic feys in front of him and took out a spirit qi crystal.

Subsequently, he exerted strength to crush the spirit qi crystal.

Morbus, which was on Lin Yuan's wrist, immediately controlled and split the crystal's spirit qi into five portions. They were then channeled toward the Dragon's Mouth Orchid, Wood Weaving House Centipede, and three Dragon-Phoenix Landscape Carps.

Once the five feys absorbed the crystal's massive amounts of pure spirit qi, they were quickly upgraded and reached Bronze/Legend.

Morbus then channeled the crystal's remaining spirit qi into the Bronze/Epic Oath Lily of the Valley.

The Bronze/Epic Oath Lily of the Valley was truly living up to expectations as it was immediately upgraded to the Legend.

Lin Yuan looked at the six Bronze/Legend feys in front of him and revealed a sunshine smile.

It wasn't because of the rarity or value of these six Bronze/Legend feys that made Lin Yuan happy. Lin Yuan received two pleasant surprises when the six feys were upgraded to Legend.

The first pleasant surprise naturally came from the three Dragon-Phoenix Landscape Carps.

Previously, Lin Yuan had been withholding the three Dragon-Phoenix Landscape Carps from increasing their grade as he wanted their quality to reach Legend first. Therefore, they had already accumulated large amounts of spirit qi within their bodies.

The moment the three Bronze Dragon-Phoenix Landscape Carps reached Legend, they also evolved at the same time.

The evolved Silver/Legend Dragon-Phoenix Landscape Carps were considered a small surprise. But immediately after, the three Dragon-Phoenix Landscape Carps gave Lin Yuan a greater surprise.

When using Morbius' True Data, Lin Yuan noticed that the Silver carps' names had actually changed, and they were no longer called Dragon-Phoenix Landscape Carps.

Chapter 342: With the Bloodlines of the Dragon and Phoenix, The Eternal Mountain and Rivers Are Settled

At that moment, the three Silver/Legend Dragon-Phoenix Landscape Carps were emitting blinding radiance. The blinding radiance might only have two colors of black and white, but there was a stone, grass, flower, and tree within it.

Within the flow of radiance, they formed a house, a pavilion, a platform, and a residence. They then formed a city.

The city, forest, mountains, and rivers then formed an ever-changing world of black and white.

Just as this ever-changing flow was rising to the peak, the blinding radiance of the black and white world suddenly changed.

The originally black and white world turned into eight different beautiful colors.

These eight colors felt as though they were the most 'proper' colors.

Each color felt as though they were the colors of origin—pure yellow, red, indigo, green, blue, purple, orange, and black.

The universe's eight colors contain limitless energy, the eight colors set all life.

The eight colors were so bright and colorful that it felt as though the world was going through a life-changing transformation.

At present, Lin Yuan was only able to see the eight colors flowing down the mountains and rivers. He was still unable to see the appearances of the Dragon-Phoenix Landscape Carps after the evolution.

However, Lin Yuan had this abnormal shock just after seeing the Dragon-Phoenix Landscape Carps' post-evolution names.

With the bloodlines of the dragon and phoenix, the eternal mountain and rivers are settled.

The Dragon-Phoenix Landscape Carps were now named Mountain River Eternal Life Carps.

After a long period, the Bronze X/Legend Dragon-Phoenix Landscape Carps had finally completed the evolution into Silver I/Legend Mountain River Eternal Life Carps.

At that moment, the halo around the mountains and rivers that was produced from the eight colors finally dispersed.

Lin Yuan was finally able to see the Silver I/Legend Mountain River Eternal Life Carps' appearances.

The difference between the Mountain River Eternal Life Carps and the Dragon-Phoenix Landscape Carps wasn't that significant. However, the Mountain River Eternal Life Carps gave off an entirely different feeling to Lin Yuan.

Previously, the Dragon-Phoenix Landscape Carps gave off a feeling as though they were graceful, like the songs that echoed through miles of mountains. The Mountain River Eternal Carps gave off a feeling they were the blessings that protected the beautiful mountains and rivers.

Lin Yuan looked carefully at the eight colors, which replaced the black and white on the Mountain River Eternal Life Carps, causing his pupils to contract.

The patterns of mountains and rivers on the Mountain River Eternal Life Carps were now even more complex.

As the common saying went, "The four directions welcomed eight colors, while the eight colors produced six blessings."

Apart from the ever-changing painting on the Mountain River Eternal Life Carps' body, there were additional fortuitous patterns.

The carps' forehead had a 'joy bat blessed pattern', signifying a flood of good fortunes.

The carps' eyes had a 'common examining blessed pattern', signifying clear and direct.

The carps' fins had a 'key deer blessed pattern', signifying the arrival of spring.

The carps' abdomen had a 'golden pomegranate blessed pattern', signifying the abundance of offspring.

The carps' scales had 'zoysia blessed patterns', signifying ability for growth.

The carps' tails had a 'ginger sterculia blessed pattern', signifying boundless longevity.

Blessed patterns of the mountains and rivers were all prominent on the carps.

Lin Yuan carefully distinguished them and realized that there were a total of six blessed patterns, and they just happened to signify smooth sailing.

The six blessed patterns and eight flowing colors felt as though they were boundless blessings. They extended the life of mountains and rivers and gave off endless fortune and blessings.

The Mountain River Eternal Life Carps looked abnormally restricted inside the small water tank, so it wasn't possible to see their true brilliance.

However, even in this small water tank, just the swing of their tails was enough to showcase their bodies' magnificent colors, just like thousands of fragrant flowers. Any one of those flowers would be enough for a person to admire and enjoy for a long time.

Lin Yuan looked at the three Mountain River Eternal Life Carps and thought silently, If the three Dragon-Phoenix Landscape Carps were considered superior auspicious signs, then these three Mountain River Eternal Life Carps would be considered extreme auspicious signs. In fact, they are already beyond the range of auspicious.

Lin Yuan couldn't bear having the three Mountain River Eternal Life Carps being restricted within the water tank. Therefore, he stored them within the Diamond grade fey storage box. Once he exited the Spirit Lock spatial zone, he was going to put them back into the jade-textured red sandalwood fish tank.

The enhancement of six feys from Bronze/Epic to Legend gave Lin Yuan two pleasant surprises. However, as compared to the three Mountain River Eternal Life Carps' transformations, the other pleasant surprise was insignificant.

However, the insignificant surprise was probably enough for Hu Quan not to be able to sleep for three days and nights.

As a craftsman who worked more than ten hours a day, if Hu Quan was to celebrate, his happiness wouldn't be reduced by a hint even if he celebrated for an entire year.

When Lin Yuan had been enhancing the Wood Weaving House Centipede to Bronze X/Legend, a mutation accorded. Of course, this mutation couldn't be considered an evolution.

This mutation was actually referring to the Wood Weaving House Centipede's spinneret, which had split into two.

The splitting of the Wood Weaving House Centipede's spinneret and the transformations into bunches for the Jasmine Lily was roughly the same.

The Jasmine Lily's bunches mutation allowed it to form many flowers instead of a singular flower. The healing capability might not have changed, but the Jasmine Lily was now able to heal multiple targets instead of a single target. Furthermore, Lin Yuan could switch from single healing to multiple healing as and when he wanted.

It was the same for the Wood Weaving House Centipede's split spinneret.

The Wood Weaving House Centipede could eat the wooden materials and turn them into liquid within the spinneret, allowing it to spit out durable silk.

The Wood Weaving House Centipede's speed to break down the wooden materials didn't change, so even if the spinneret was split into two, the amount of wooden silk it could produce would still be the same.

However, having a split spinneret didn't simply save time and increase efficiency for the Spirit Craftsman. Two spinnerets that could produce silk allowed the Spirit Craftsman to create with increased speed.

It would save the Spirit Craftsman plenty of effort while also increasing the possibility of producing more products.

Moreover, if the Wood Weaving House Centipede's grade was high enough, its speed of breaking down wooden materials would be faster.

In fact, to a certain extent, the mutation of split spinnerets was indeed able to increase the Spirit Craftsman's creation capability by several times.

Hu Quan, who was already a top-class craftsman, was now even better.

Once Hu Quan fused this Bronze X/Legend Wood Weaving House Centipede with his Willpower Rune, along with the Fantasy Breed Jade Severing Blade Mantis, Hu Quan would possess two Fantasy Breed feys.

Since Hu Quan's Spirit Craftsman's standard was already at Class 5, if he went to the Spirit Craftsman Association to verify it, he would become a genuine Class 5 Spirit Craftsman.

Chapter 343: The Spirit-Gather Goldfish's Second Bloodline Stimulation

The Oath Lily of the Valley's appearance did not change much after evolving into Bronze/Legend. However, there was a layer of lustrous white stream of light among the white bell-like flowers that bloomed on the pagoda-shaped Oath Lily of the Valley the moment it reached Legend.

It was as if each of the white bell-shaped flowers lit up in a flash. It was like a tree of bells and nephrite with its bell-like shape. There was a feeling of wealth.

This pure white bell-shaped flowers' stream of light after reaching Legend was the reason Oath Lily of the Valley could carry an oath. Or maybe the light was actually a kind of curse.

The Legend Oath Lily of the Valley's flowers were both a container for an oath and a curse that sealed a betrayer's Willpower Rune.

Lin Yuan did not pay too much attention to this Bronze/Legend Oath Lily of the Valley and stored it in the amber-button-shaped Diamond fey storage box.

This Bronze/Legend Oath Lily of the Valley was not something he would usually use, so there was no need to put it in the Spirit Lock spatial zone.

The Spirit Lock spatial zone's resources were tight, so placing it there would undoubtedly take up space.

After Lin Yuan bought an area on Star Web to establish his faction, he could place this Bronze/Legend Oath Lily of the Valley into the room within his faction.

There was only one last Bronze/Epic fey that Lin Yuan had not yet checked. It was also the Dragon's Mouth Orchid that had been promoted from Bronze/Epic to Legend, which really gave Lin Yuan an eye-opener.

He did not know what changes would occur when the Dragon's Mouth Orchid was promoted from Epic to Legend.

The flowers bloomed at Flawless were light blue, while those at Epic were dark blue.

However, Lin Yuan did not expect the flower from this Dragon's Mouth Orchid would actually become black when it reached Legend.

The large black dragon-mouth-shaped flower was much larger than Lin Yuan's palm.

If it were to be said that the Epic dark-blue Dragon's Mouth Orchid's stamen had a shiny, scaly wooden structure previously, there now seemed to be bright diamonds on this black Legend stamen.

This was a manifestation of wood crystallization.

After the Dragon's Mouth Orchid reached Legend, Lin Yuan smelled the fragrance it emitted. It was so fragrant that it stank. It was also kind of stimulating, like liqueur, and was unique to dragon-species feys.

Lin Yuan had a hard time breaking off this large black Legend Dragon's Mouth Orchid flower.

It had to be said that the flower grew quite sturdily on the stalk. If it was said that the previous usage of the spirit qi crystals to enhance these six Bronze/Epic feys into Legend was just small scale, Lin Yuan was now going to really enhance feys that belonged to him.

The one he wanted to enhance was none other than the Bronze X/Legend Spirit-Gather Goldfish within Morbius' Spirit Lock.

He walked over to the spirit pool and found that Blackie was leisurely eating the Butterfly Shell flowers at the bottom of the pool.

After it had reached Bronze, the Butterfly Shell flowers Lin Yuan fed it also reached another level.

The Butterfly Shell flowers that he previously fed it were from low-grade ones living in the shallow sea.

The Butterfly Shell flowers that Lin Yuan fed Blackie now were high-grade ones from the deep sea. Although such shell flowers were not priceless, they were very expensive.

Under normal circumstances, few people would be willing to use high-grade deep-sea Butterfly Shells to casually feed their feys.

After all, even though it could stimulate a fey's dragon-species bloodline, this effect was based on warm nourishment. The short-term effect could not be seen. This was why Lin Yuan had been feeding Blackie so many Butterfly Shell flowers.

In order to stimulate Blackie's dragon-species bloodline the first time, three drops of dragon-species blood essence had been used. This was the reason he intended to use this Legend Dragon's Mouth Orchid flowers for the second time.

However, he did not feel that it was a waste to feed the deep-sea Butterfly Shell flowers to Blackie.

In the past months of accumulation, Lin Yuan could sense that the hidden trace of dragon-species bloodline became more active in the Spirit-Gather Goldfish's body. It was due to consuming such expensive Butterfly Shells.

Although he could not see anything if he focused on Blackie's daily changes, he could still see the faint dragon-species fey's power constantly accumulating in its body if he looked once per month or two.

It was as though it was waiting for a complete metamorphosis.

Lin Yuan looked at the large black Legend Dragon's Mouth Orchid flower with great expectation.

He was prepared to feed it to Blackie. After that, Blackie would immediately undergo an earth-shattering transformation and become a dragon-species fey.

This Legend Dragon's Mouth flower could certainly let Blackie wash its bloodline and greatly strengthen its trace of dragon-species fey's bloodline. It might even fully suppress its fish-species bloodline, allowing the dragon-species bloodline to become its body's dominant bloodline.

However, Lin Yuan did not know about the Legend Dragon's Mouth Orchid flower's effect. In fact, he still placed his bet on the moment that Blackie became a Fantasy Breed fey.

When Blackie sensed Lin Yuan's arrival, it immediately swam to the spirit pool's side. It used its black velvet peony-like tail to smack the spirit pool's surface, creating splashes and greeting Lin Yuan.

Upon seeing the splashes, Lin Yuan only felt that Blackie had greeted him the same way as the three Dragon-Phoenix Landscape Carps. He felt that if he was at the pool's edge, the splashes would definitely be drenched in water.

At that moment, Lin Yuan fished the Bronze Five Fortune Ranchus out of the spirit pool and placed the female ones that played well with Blackie in the tank, where the three Mountain River Eternal Life Carp were.

This was the moment that Blackie would stimulate its dragon-species bloodline!

Chapter 344: Two Horns on the Head

Lin Yuan had now completely cleared the spirit pool, and only Blackie was left swimming without restraint inside. He looked at its cheerful appearance and felt a headache.

Although it was considered an animal, it was actually similar to the Jasmine Lily in terms of intelligence. Blackie looked quite humane, but it actually had a silly, cheerful nature, as if it could understand anything. When it had nothing to do, it would blow bubbles in the spirit pool.

This was like a student who understood nothing in class and was always nodding, contemplating, and interacting with the teacher with an expression that he understood. In fact, he was thinking of a simple thing such as eating potato chips and drinking Coca-Cola on a big bed alone.

Lin Yuan had completely overestimated Blackie's intelligence. Previously, he had always thought that something was going on between Blackie and the Five Fortune Ranchu, but it suddenly occurred to him that Blackie was... also a female fish!

Later on, Lin Yuan found out that Blackie was not interested in the Five Fortune Ranchu. The size of the Five Fortune Ranchu was not much different from Blackie's, and Blackie treated the female Five Fortune Ranchu as its playmate.

At that moment, Lin Yuan issued a command to Blackie. Then he threw the black Legend Dragon's Mouth Orchid flower into the spirit pool. This was the moment that Blackie would stimulate the metamorphosis of the dragon-species bloodline in its body for the second time.

Fish feys were not smart, and even high-grade ones were not too smart before they became Myth Breeds. This was why there was the common saying, "The memory of a fish lasts for only seven seconds".

However, if Blackie could evolve toward a dragon-species fey, then its intelligence would be raised to another notch.

Blackie swam toward the Legend Dragon's Mouth Orchid flower with Lin Yuan's command. Just as Blackie swallowed it, Lin Yuan could sense the accumulated dragon-species power in its body explode instantly.

Although Blackie was already a Spirit-Gather Goldfish, it still looked like a Telescope Spirit-Siphon Goldfish. The moment the dragon power burst out, Blackie immediately sank to the bottom of the spirit pool under the intense pain.

Immediately after that, it tossed and constantly slammed its body against the spirit pool's base with great force. Its black scales were considered hard, and it suffered no damage during the first few hits against the spirit pool's base.

However, after it constantly slammed against the spirit pool's base again and again due to unbearable pain, the black scales on its body had slowly loosened. Even its fish fins and tail had been damaged under the crazy slamming, causing an opening to form on them.

Through this opening, Lin Yuan could even see the golden disc and the deep-sea Butterfly Shell flowers at the bottom of the spirit pool filled with energy ores.

Although Blackie did not have high intelligence, a contractor and a fey could sense each other's feelings and thoughts. It was just like how Lin Yuan could completely sense the pain from the depths of Blackie's soul.

It was a process of destruction and renewal of all the cells in its body under its bloodline activation.

Lin Yuan naturally felt very sorry for Blackie's pain. However, he also knew that it was useless. He could not reduce a trace of the pain that Blackie had to endure.

A sword tip comes from sharpening, and the fragrance of plum blossoms comes from the cold¹.

If a person wanted to gain knowledge to become the best person, he would need endless hard work, let alone the metamorphosis of a species bloodline like Blackie's.

The red blood flowed through the ruptured scale armor from its body into the spirit pool and disintegrated into spirit qi by the spirit pool before being injected into the Spirit Lock spatial zone.

If it was not because Blackie's bulging bulb-like eyes were not damaged, Lin Yuan probably would never have recognized that this badly mangled fish in the spirit pool was actually Blackie.

There were no more scales on Blackie to be seen, and it was using the softest flesh to slam the spirit pool's base.

The badly mangled Blackie was still crazily slamming the spirit pool's base to vent the pain that gushed throughout its body. Each impact must have caused a handful of blood.

Lin Yuan quietly accompanied Blackie as it walked its most difficult path in its life.

For Blackie, if this Legend Dragon's Mouth Orchid had not been found in the Endless Forest unexpectedly, it would have really been a blessing that could not be asked for.

Since it was a blessing, it had to endure no matter how hard it was. Fish belonged to the pool and would become dragons after encountering difficulties.

At that moment, the Legend Dragon's Mouth Orchid flower was the 'difficulty' for Blackie's transformation.

As Blackie's contractor, Lin Yuan had been standing at the spirit pool's side to accompany it.

He silently watched the second dragon-species bloodline metamorphosis. It was like after a Spirit-Siphon Goldfish awakened its dragon-species bloodline for the first time and became a Spirit-Gather Goldfish.

Lin Yuan clenched his fists tightly and watched the pain of his contracted fey growing and metamorphosing. He was both heartbroken and happy at the same time. Blackie would no longer have ups and downs in the future after crossing this path.

Although Blackie was still badly mangled, the red blood that flowed out slowly contained a gold color. However, Blackie's eyes that were as large as a light bulb seemed to be detached from itself. They were constantly pushing toward the top of the head.

A touch of gold appeared where Blackie's eyes were and was constantly deepening.

When the gold color turned completely dark gold, Blackie was quiet all of a sudden and sank to the bottom of the pool, lying there as if it had no strength.

Lin Yuan observed carefully and found that a thin layer of tough skin had grown out of Blackie's body. Immediately after that, its two big eyes formed two small black horns, seemingly containing dark gold with black on the top of its head.

Chapter 345: The Changed Spirit Qi Imprint

Layers of black crystal-like scales with dark gold patterns at the edge grew on Blackie's body. As its body trembled violently, it was continuously growing longer.

If it was said that it was only 50cm before, it had now reached one meter long, twice as long as before. It was no longer as round as before and had instead become longer and stronger.

However, what remained unchanged was its large tail that was like a black peony flower. It was no longer as elegant as before. Instead, a layer of bone-like structure grew inside and supported the tail completely.

At that moment, another pair of dark-gold eyes appeared at the area where its eyes had been pushed to the top of its head and had formed crystal-like horns.

It was like putting on the finishing touches, and Lin Yuan had now seen Blackie's evolution process. Its eyes were round and protruding, just like two large light bulbs, looking very cute.

However, its slender dragon eyes contained a kind of unique power and grimness of a flood dragon-species fey. After evolving at the bottom of the pool, Blackie had exhausted all its strength. Blackie's evolution just now seemed as though it had just been to the gates of hell.

However, it knew that Lin Yuan had been at the side of the spirit pool to accompany it. Blackie, which was at the bottom of the spirit pool, flung its tail and leaped out of the water into Lin Yuan's arms.

The one-meter-long Blackie was heavy now, but it was not a problem for Lin Yuan, who had been a C-rank spirit qi professional for some time now, to carry the Blackie that weighed 15 to 20 kilograms.

As Lin Yuan felt Blackie's silly affection in his arms, the corners of his mouth could not help but twitch. His clothes, which he had changed after the three Mountain River Eternal Life Carps had drenched before entering the Spirit Lock spatial zone, had gotten completely wet again.

Lin Yuan carried Blackie and channeled spiritual power to sense its changes. He could clearly sense that its body condition had improved drastically. At the same time, although it was still silly, its intelligence had also made great progress.

If it was said that Blackie was a student that pretended he understood, it was now a student that sort of understood.

When Lin Yuan used Morbius' True Data to check Blackie's attributes, he found that it was no longer called a Spirit-Gather Goldfish. It was a Spirit-Drawing Ichthyosaur.

Upon seeing this name, Lin Yuan's eyes shrunk. He had never thought that the Legend Dragon's Mouth Orchid would have such a strong effect on stimulating a dragon-species fey's bloodline.

Blackie was now no longer considered a fish fey.

If it was called the Spirit-Drawing Dragonfish under True Data after stimulating its bloodline, its fish-species bloodline would still be dominant in its body.

However, Blackie's name under True Data was now Spirit-Drawing Ichthyosaur, which meant that the dragon-species bloodline dominated its body. It could even be said that very little of the fish-species bloodline was left in its body.

Lin Yuan was very surprised at such a discovery. In other words, it could be a sure bet that Blackie would become a genuine dragon-species fey when it became a Fantasy Breed. It would no longer be an Ichthyosaur but a real flood dragon.

He was undoubtedly still lacking a suitable Willpower Rune for it to become a Fantasy Breed. Regarding Blackie's Willpower Rune, he still could not comprehend it yet.

Previously, when Endless Summer had used the Enlightenment Law Rune to make an oath to become his Protector, Lin Yuan had vaguely felt a touch of fuzzy comprehension in his mind. Unfortunately, it was simply too faint, so he did not fathom what exactly it was.

Even if he fully comprehended it and a Willpower Rune was produced, Lin Yuan felt that such a Willpower Rune generated from comprehension should not be suitable for Blackie. Therefore, there was no clue about Blackie becoming a Fantasy Breed.

Nonetheless, after it stimulated a trace of the dragon-species bloodline hidden in its body and evolved into a Spirit-Drawing Ichthyosaur, Lin Yuan discovered that the speed of spirit qi accumulation in its Spirit Qi Imprint had doubled.

Its Spirit Qi Imprint had also changed significantly after Blackie became a Spirit-Drawing Ichthyosaur.

[Fey Name]: Spirit-Drawing Ichthyosaur

[Fey Species]: Ichthyosaur/Flood Dragon

[Fey Grade]: Bronze (10/10)

[Fey Type]: Water

[Fey Quality]: Legend

Abilities:

[Spirit Injection]: Restore a certain amount of spiritual power at once and gradually restore the lost spiritual power.

Exclusive Skill:

[Spirit Qi Imprint]: The spirit qi that is constantly released to the environment will be stored within the Spirit Qi Imprint instead. It can also drain a small amount of the spirit qi released from other dragon-species feys within the surrounding area that do not exceed the fey's grade and inject it into the Spirit Qi Imprint. It will be branded on the contractor's body, and the contractor can release spirit qi contained within the Spirit Qi Imprint.

Upon seeing this change, Lin Yuan could not help but size up the spirit pool because he saw a very feasible path from this change.

It had to be said that the Spirit-Siphon Goldfish Lin Yuan had initially nurtured in the spirit pool within a very short period had indeed accumulated a lot for him at the early stage. However, that was only for his initial start.

The income that these Spirit-Siphon Goldfish could bring to Lin Yuan now was negligible. In fact, the Silver Usneas had tighter sales than the Elite Spirit-Siphon Goldfish.

The Spirit-Siphon Goldfish was nothing more than a fey to assist in cultivation, while the producing fey like the Usnea was a necessity in life.

Therefore, Lin Yuan did not intend to sell the nurtured Spirit-Siphon Goldfish in the spirit pool in his Purchase With No Loss store.

He had been supplying Zhou Jiabin's store with the Elite Spirit-Siphon Goldfish, but if he was willing to change them into Silver Usneas, she would be jumping with joy.

Due to the changes of the Spirit-Drawing Ichthyosaur's Spirit Qi Imprint, Lin Yuan felt that he could put the spirit pool to good use.

Chapter 346: Gray Is the Bravest

If Blackie could draw the spirit qi released by dragon-species feys within a certain range into the Spirit Qi Imprint, Lin Yuan had to strive for it even if only a trace of it was drawn. This was because every additional trace of spirit qi in the Spirit Qi Imprint would be Lin Yuan's trump card.

It could be said that almost all dragon-species feys could release spirit qi. The size of some rare dragon-species feys that could release spirit qi would certainly not be small.

Therefore, the most suitable for Lin Yuan was these Spirit-Siphon Goldfish that had a trace of the dragon-species bloodline.

He could nurture these Telescope Spirit-Siphon Goldfish with a trace of dragon-species bloodline, just like how he had nurtured Blackie from a Spirit-Siphon Goldfish into a Spirit-Gather Goldfish.

When these Telescope Spirit-Siphon Goldfish activated the trace of dragon-species bloodline within their bodies, Blackie could increase the spirit qi in the Spirit Qi Imprint with its exclusive skill faster.

Lin Yuan carefully sensed the range Blackie's exclusive skill could reach to absorb other dragon species feys' released spirit qi.

He found that the range was actually very small and not even half the spirit pool area, but he did not care.

The range would keep extending after Blackie became a Fantasy Breed.

After Morbius' grade increased, the spirit pool area would also become bigger, which could meet Blackie's constantly expanding range of drawing spirit qi.

There were many colors of Telescope Spirit-Siphon Goldfish, with the most common being the red ones. However, Lin Yuan intended to choose black for all the Telescope Spirit-Siphon Goldfish that he would carefully nurture in the future and activate their dragon-species bloodlines in the spirit pool.

This way, the spirit pool would have the feeling of a Black Dragon Pool.

After Lin Yuan and Blackie got close to each other for a while, he let it warm up properly in the spirit pool.

Although Blackie's bloodline had undergone a qualitative metamorphosis, its current mental state was not good. The pain it had endured would not disappear just because its bloodline had undergone a metamorphosis.

Thus, Blackie still needed some time to warm up before it could recover to its best state.

Since the dragon-species bloodline was dominant in Blackie's body, when Lin Yuan nurtured it, besides feeding it the Butterfly Shell flowers to warm its bloodline, he could also feed it some dragon essence blood every once in a while.

Previously, Lin Yuan did not dare to feed Blackie dragon essence blood because he was afraid that the dragon-species bloodline in its body was too thin.

Rashly giving it the dragon essence blood to enhance it would likely cause the trace of dragon-species bloodline in its body unable to suppress the energy in the essence blood. But now, the concentration of the dragon-species bloodline in Blackie's body was strong enough.

The bloodline of dragon-species feys was divided into ancient dragons and flood dragons. Regardless of which dragon-species bloodline it was, it could be called the main dragon species when it became a stronger bloodline.

Flood dragons were the rarest between the two dragon-species feys. Thus, it was not simple for Lin Yuan to feed Blackie flood dragon essence blood that it could take.

Although Blackie had reached Legend, it was still a Bronze fey. It would be the most suitable to feed it Silver flood dragon essence blood. However, most flood dragons' grades were rather high.

Blackie's situation was completely unexpected. The dragon-species bloodline in Blackie's body could never have reached such a level without the Legend Dragon's Mouth Orchid flower. Unfortunately, Silver flood dragon essence blood was very rare.

Where would Lin Yuan find it?

He could not just wait for the Bronze/Legend Dragon's Mouth Orchid to bloom a flower four months later, nurture a Silver flood dragon-species fey, and use its essence blood to feed Blackie.

Regardless of whether Lin Yuan could use the Dragon's Mouth Orchid flower to nurture a Silver flood dragon-species fey, he would not do so even if he could.

Therefore, this Silver flood dragon-species fey's essence blood would become his next target after he used ten Flower Brocade Pearls to exchange for 100 mid-grade strange flames.

When Lin Yuan was about to store Hu Quan's Bronze/Legend Wood Weaving House Centipede in the Diamond fey storage box and leave the Spirit Lock spatial zone, he realized that it was confronting the crane-species fey that had yet to develop its genetic model. It was that little gray fellow.

Lin Yuan glanced and understood what was going on. He had been accompanying Blackie in the purification of its bloodline and simply had not paid attention that this Wood Weaving House Centipede had targeted the Cinnabar Sweet Osmanthus.

The Phoenix Perching Chinese Parasol Tree was clearly more delicious than the Cinnabar Sweet Osmanthus for the Wood Weaving House Centipede.

However, it did not dare to have any ideas about the Phoenix Perching Chinese Parasol Tree. Chimey was lying in the Phoenix Perching Chinese Parasol Tree's nest while purifying its bloodline and raising its quality.

The strange flames sealed between the Phoenix Perching Chinese Parasol Tree's branches alone could make the Wood Weaving House Centipede feel deadly danger.

Among the 130 golden leaves sealed with the mid-grade strange flames on top of the tree, the Phoenix Perching Chinese Parasol Tree and Chimey had absorbed the golden flames in more than 30 golden leaves.

The Phoenix Perching Chinese Parasol Tree could burn the Wood Weaving House Centipede into ashes by releasing a mid-grade strange flame. Therefore, the Wood Weaving House Centipede had targeted the Cinnabar Sweet Osmanthus.

However, the little gray fellow had regarded the Cinnabar Sweet Osmanthus as its nest. It had never felt warmth since birth and would fight with its life to protect all the warmth it could feel. Hence, this little gray fellow had confronted the Bronze X/Legend Wood Weaving House Centipede.

The Wood Weaving House Centipede was docile by nature, and the Gold Wind Speed Rapid Antelope had been guarding at the side. As a result, the Wood Weaving House Centipede had not attacked.

Although this little gray fellow looked rather big, it was still a Normal I/Normal fey that had yet to develop its genetic model.

Lin Yuan looked at its fierce look and went forward to store the Wood Weaving House Centipede in the fey storage box.

When this little gray fellow saw that Lin Yuan had helped it chase away the bad guy, it trotted over to him and used its head and neck to rub against his palm.

Lin Yuan rubbed its head and said, "Good boy. Don't be afraid. Gray is the bravest!"

When he had left the Spirit Lock spatial zone last night, he had given this little fellow a name.

When he first saw it, it was all gray, so he thought that he would call it Gray.

Chapter 347: Approval From Spider Stomach

Gray seemed to half-understand Lin Yuan's words. Although it was not quite sure what he was talking about, this little gray fellow was very reliant on Lin Yuan as he had saved it.

All creatures had intelligence. Even though Gray had yet to sign a contract with Lin Yuan, its goodwill and love for him could be clearly felt.

Lin Yuan put Gray on the Phoenix Perching Chinese Parasol Tree's branch and played with it for a while before saying, "Gray, I'll come back to see you later. I'll bring you some White Cloud Mountain minnows to eat."

Even if the feys had low intelligence, Lin Yuan was usually used to interacting with them in the same way he treated his human friends.

Because he communicated with his feys with equal respect, within two years of only starting to raise Genius, which did not have a good foundation, it had become more spiritual than ordinary Hundred Questions Beast two years later.

Although Lin Yuan could not pinpoint what kind of crane-species this little gray fellow was, it was a Grus fey after all. Grus feys loved to eat White Cloud Mountain minnows the most.

This little fellow was now recovering its genetic model and growing, so in addition to the huge amount of pure spiritual power in the Spirit Lock spatial zone, nutrition from food was also indispensable.

After leaving the Spirit Lock spatial zone, Lin Yuan immediately went to change a set of clothes. Previously, Blackie had jumped into his arms and drenched his clothes. Even though his clothing was not so wet due to his body temperature, it was really uncomfortable wearing wet clothes.

Lin Yuan went out of the room and saw the small basket placed in the doorway, with Wen Yu's carefully written planning and suggestions for the faction. He picked them up and looked at them carefully.

Lin Yuan had been living in the mansion with Wen Yu and Liu Jie. Now, with Hu Quan, the Mother of Bloodbath, and Endless Summer, the people living in his mansion consisted of two young men, a young girl, a middle-aged man, a plant, and an insect.

They respected each other's privacy with the minimum respect and care in the large family, so they would knock on the door when entering each other's room. If nobody responded after knocking on the door, they would put the prepared things in the basket at the door.

Hu Quan had skillfully created these baskets with those large pieces of remaining fragments from carving with all sorts of completely jade-textured wood. Each basket made of various jade-textured wood scraps was like a fine craft.

Lin Yuan stood in the doorway, looking at Wen Yu's newly written development and plans about the faction for an hour. The more he looked at it, the more he found that due to the abandonment of the previous sense of superiority, Wen Yu was extremely clear with the analysis of the major factions.

When he had come out of the king-class experts' squad's private auction, she knew that Gao Feng was from the Wind Mist City's Gao Family from the way he had spoken.

From that time onward, Lin Yuan knew that Wen Yu was very knowledgeable about all the major factions. It now seemed that it could no longer be described as an understanding.

Based on the analysis for each faction that was seven or eight pages thick, she had clearly summarized each of their advantages and disadvantages in a sentence.

It could be said that she was simply a living encyclopedia for the major factions. It also happened that Lin Yuan was weak in this aspect that Wen Yu was good at, and Wen Yu's ability made up for his shortcomings.

After reading this development and planning of the faction, Lin Yuan went down the primavera spiral stairs and went to Wen Yu's door before knocking lightly on it twice.

Wen Yu soon opened the door and came out. Upon seeing that it was Lin Yuan and that he was holding the proposal for the faction that she had written for the second time, she asked with some expectation and apprehension, “Young Master, what do you think about what I’ve written this time?”

When Lin Yuan heard that, he revealed a bright smile on his face and replied, “It’s great this time. Your insights about other factions happen to be what I’m not good at.”

Upon hearing that, a heartfelt smile bloomed on her face. At that moment, she suddenly felt that she was finally able to help him.

Meanwhile, Hu Quan, who had caught up on sleep, started to make all sorts of delicate things downstairs.

Although Lin Yuan did not intend to build the outside when he established his faction on Star Web, he still had to design the interior space well. Nevertheless, he was not in a hurry to do so.

Lin Yuan thought that after he gave Hu Quan the Bronze X/Legend Wood Weaving House Centipede a few days later to let him contract it and promote it into a Fantasy Breed, it would undoubtedly be much more convenient to let Hu Quan build the faction’s interior space.

Lin Yuan had agreed to give Hu Quan a Bronze/Legend Wood Weaving House Centipede within ten days. Although he had completed enhancing the Wood Weaving House Centipede within a few hours, he was not in a hurry to give it to Hu Quan.

After he gave Hu Quan the Wood Weaving House Centipede, he planned to put together the three Silver/Legend Mountain River Eternal Life Carps into the red sandalwood longevity fish tank.

A clear distinction between the main and secondary was needed for the various feys as an auspicious scene in the fish tank. In the past, the Bronze/Epic Dragon-Phoenix Landscape Carps had been the main, and now, it was the Silver/Legend Mountain River Eternal Life Carps.

However, the 99 Lustrous-Winged Butterflies, 99 Spirit-Containing Hibiscuses, and 99 Five Fortune Ranchus were still at Bronze I/Flawless. Therefore, these ‘secondary’ feys should also get a boost.

As an auspicious scene, only a complementary match could reflect the kind of harmonious atmosphere. Otherwise, it would seem a little unbalanced.

The Mother of Bloodbath and Endless Summer also returned when it was gradually getting dark. They carried things in their hands. They had clearly returned from the mall.

Endless Summer had mostly bought some spirit accessories and clothing, while the Mother of Bloodbath had bought all sorts of snacks and pastries. When it was dinner time, everyone was happier.

On the contrary, the Mother of Bloodbath, which had brought back all kinds of gourmet snacks, looked a little dejected.

During the meal, the Mother of Bloodbath had been harping on that Liu Jie’s cooking was better.

Lin Yuan could not help but think that one would have to get approval from a spider's stomach first in order to get its approval.

Chapter 348: Endless Summer's New World

In another two days, Liu Jie would be able to return to the mansion from the Radiance Sacred Hall. How would he be ranked in the Radiance Hundred Sequence after his three-year absence?

When Liu Jie returned, Lin Yuan would give him the source-type Cocoon of Evolution to celebrate his return to the Radiance Hundred Sequence.

After dinner, Lin Yuan thought there was nothing to do, so he went to Star Web to buy his faction territory.

During the day, Endless Summer and the Mother of Bloodbath had applied for Star Web Cards and could log onto Star Web at any time.

Lin Yuan then agreed to meet Endless Summer at the Star Web Center later.

He first logged onto his Purchase With No Loss store and found that Listen had returned to his previous self in his store's fan club.

Listen, who had not been interacting in the group for nearly a month, seemed to have become the crowd's focus in just a few hours.

No matter what the topic was, the 'center of the typhoon eye' was always Listen.

Even the eight Class 3 Creation Masters and two Class 4 Creation Masters that had joined the group afterward would also occasionally strike up a conversation with Listen.

Lin Yuan could not help but sigh at Listen's amazing diplomatic ability. When different people spoke the same thing, some people would seem righteous, while some people would make people think the wrong way. Listen's ability would be terrifying if used properly.

Besides letting Listen come to the Royal Capital to discuss in person and determine the Listening Heron Chamber of Commerce's value, Lin Yuan also appreciated Listen.

Compared to the Listening Heron Chamber of Commerce, Lin Yuan felt that Listen might have a greater role in his faction.

Indigo Azure City was not far from the Royal Capital. If he was fast, he would be able to reach the Royal Capital in three days.

Whether or not Lin Yuan helped the Listening Heron Chamber of Commerce get through the difficult time or pulled Listen to his faction would have to wait until they met before making a decision.

If Lin Yuan controlled the Listening Heron Chamber of Commerce and allowed Listen to continue managing it, he would certainly inject a lot of resources into the chamber of commerce.

Although Lin Yuan had a good impression of Listen, the Willpower Rune oath was still the most trustworthy.

If Lin Yuan could not control those small puzzles hidden in the shadows under his faction, he felt that he should abandon these small puzzles. He first put up 10 Flower Brocade Pearls in his Purchase With No Loss store.

After displaying them, he still intended to use the blind trade method. The mid-grade strange flames that he had exchanged last time could still be used for some time.

Therefore, the target for this time's blind trade would be the Silver flood dragon essence blood. He could certainly exchange for it with the Flower Brocade Pearls, but he was unsure how much he could get.

The amount of flood dragon essence blood that could be exchanged with 10 Flower Brocade Pearls should be enough for Blackie to use for a period of time.

Lin Yuan did not bother about the commotion he created after displaying 10 Flower Brocade Pearls in his store again.

Although various factions and even many of the Creation Masters were no longer eyeing his Star Web store like before, their attention on it had not decreased.

Lin Yuan had taken out 10 Flower Brocade Pearls and displayed them in his Purchase With No Loss store, making the attention that had yet to die quickly surge.

This was because he had displayed a batch of 10 Flower Brocade Pearls twice now. This proved that the Purchase With No Loss store possessed many Flower Brocade Pearls. Otherwise, he would not have put up such resources that were useful for Creation Masters in his store in such a large number.

These factions had also noticed that Lin Yuan was still trading the Flower Brocade Pearls through blind trade, which secretly gave them a headache.

The blind trade was undoubtedly the most annoying of all trading methods and increased the losing chips. The number of chips one bet would likely be taken by other squanderers, who were not afraid of being at the losing end.

Lin Yuan had indicated the resources he wanted to exchange for, which was the Silver flood dragon essence blood.

This made the major forces and Creation Masters that wanted to exchange for the Flower Brocade Pearls feel dazed.

Silver flood dragon essence blood was rare, but there was no great use for it.

This was because when Creation Masters concocted spirit fluids, they would undoubtedly be more willing to use high-grade flood dragon essence blood than Silver flood dragon blood.

Therefore, many Creation Masters and factions did not keep such useless stuff like the Silver flood dragon blood.

Now, the factions and Creation Masters, who were focused on the Purchase With No Loss store's displayed Flower Brocade Pearls, started to buy large amounts of Silver flood dragon essence blood.

Of course, Lin Yuan was unaware of this situation. Anyway, he just had to exchange for the resources he needed.

Even if he knew, he would also feel that the more Silver flood dragon essence blood that these factions and Creation Masters got, the better it would be. He would reap the benefits eventually.

When Lin Yuan saw that it was almost time, he went to the Star Web Center to wait for Endless Summer. However, Endless Summer did not come.

At that moment, he heard a gloomy voice coming from his side.

“Lin Yuan, I reached here before you. I’ve been watching you for an hour, and you didn’t even recognize me!”

Lin Yuan immediately figured out that it was Endless Summer’s voice. However, as soon as he turned his head, Endless Summer’s clothing shocked him.

He only saw a figure wrapped in a Star Web figure costume, which had almost completely blocked his body, standing beside him.

Lin Yuan looked closely for a long time and determined the person in the figure costume was none other than Endless Summer through the two eyes exposed from the headgear.

Lin Yuan could not help but hold his forehead. He really did not understand Endless Summer’s aesthetics. In his opinion, even if it wanted to wear a figure costume, just like the braised egg head, it could just dress as a small bee. That would even look better than Endless Summer’s tree costume.

Endless Summer was dressed in green, so green that Lin Yuan panicked.

Just like this, he went to Star Web Center for the procedures with a moving tree. The staff member looked at Endless Summer as if it were an idiot, only for the latter to reveal its strength. Then, the staff member looked at Endless Summer as if it were a god and gave Lin Yuan the pass to start a Star Web faction.

After leaving the Star Web Center, he taught Endless Summer how to watch Star Web’s live streaming channels. Then he helped Endless Summer find fashion and beauty channels.

Upon seeing the numerous Star Web fashion and beauty hosts, Lin Yuan thought, If Endless Summer clicked on any of them, it should be able to understand that wearing this big tree doll costume is not aesthetically pleasing.

In the end, he chose a relatively simple channel of ‘simple women’s clothing matching’ for Endless Summer after some choices.

Endless Summer liked those accessories and fashion styles. When it saw this Star Web fashion and beauty live-streaming channel, it was as if a door to a new world was undoubtedly for Endless Summer. It was the first time ever since it had become a Suzerain/Myth III fey.

When Lin Yuan noticed Endless Summer was absorbed in the live streaming channel, he was relieved and left to purchase his faction territory.

Shortly after he left, when Endless Summer was watching with great interest, it found that the live-streaming channel Lin Yuan had found for itself was not broadcasting.

Thus, Endless Summer found two rather popular live-streaming channels at once after some search.

Endless Summer could not help but say, "The documentary of 107 days of becoming a big shot of women's fashion and heavy make-up lessons before the Spirit Qi Awakening. Which one of these two should I watch?"

After some hesitation, Endless Summer finally clicked on the latter. This made it feel that another new world had opened in the door of the new world. This new world was simply too fantastic.

Chapter 349: 50,000,000 Radiance Dollars Were Really Worth It

Lin Yuan did not need to think too much about the choice of his faction's territory on Star Web. This was because every faction could be directly teleported, just like when he went to the Radiance Sacred Altar.

This was also the reason Star Web was more convenient than in the real world. Establishing a faction on Star Web and buying a piece of territory to build a faction cost 50,000,000 Radiance dollars.

Due to how expensive it was, many rising factions without sufficient resources did not build a faction territory on Star Web, even if they knew it was convenient to do so.

In fact, some rising factions could take out 50,000,000 Radiance dollars.

Although these current assets would have a certain impact on his faction's development, the 50,000,000 Radiance dollars' effect was negligible compared to the convenience of building a faction territory on Star Web.

These rising factions did not build their factions on Star Web because they did not have money to do so.

It was better not to enjoy the convenience of building a faction on Star Web when one's foundation was lacking instead of other rising and veteran factions with some foundation laughing at you.

Dignity was sometimes the most important thing for a faction.

It wasn't difficult for Lin Yuan to come up with 50,000,000 Radiance dollars. His Purchase With No Loss store's accumulated wealth was almost enough to purchase the faction territory. He also had the Diamond fey storage box filled with Radiance dollars, the pinnacle Class 4 Creation Master Cheng Wu had contributed.

In fact, Lin Yuan had spent most of those Radiance dollars building the mansion and buying various spiritual ingredients during that period.

It was not cheap to purchase a Diamond fey storage box of mid-grade energy ores. The key was that the mid-grade energy ores in the Diamond fey storage box were simply too many.

At that time, in order to help Lin Yuan get enough mid-grade energy ores, Zhou Jiabin had requested to pick up the goods from the chamber of commerce that supplied her. This had consumed 1/3 of the chamber of commerce's mid-grade energy ore reserves.

Due to Zhou Jiabin's purchasing power, the chamber of commerce had ranked her store from a third-tier customer to a major one.

Lin Yuan had mainly been exchanging and collecting resources, rather than using his resources to exchange for Radiance dollars. This had caused Lin Yuan's main source of Radiance dollars to come from his Purchase With No Loss store.

Based on his current way of spending money, it would not be long before his Star Web store's and Cheng Wu's Radiance dollars would all be gone. However, Lin Yuan was not worried about this at all.

After building the Star Web faction territory, as long as Lin Yuan sent out the Fate Letters, king-class experts with Willpower Runes or major factions would be fighting to contribute their Radiance dollars for the 1% chance of obtaining the Angel Letter.

Now that Lin Yuan had this pass to build a faction on Star Web, he spent 50,000,000 Radiance dollars from his Star Web Card without hesitation. At that moment, Lin Yuan received a message from the Star Web officials.

Based on the messages, Lin Yuan only needed to wait for a moment before a special Star Web staff member informed him on the matters related to establishing a private territory.

Lin Yuan waited for less than five minutes until he saw a short-haired middle-aged woman in a competent professional outfit walk over.

When she got near and saw him, her expression clearly froze. This middle-aged woman had been explaining territory-related matters to the factions that had purchased land on Star Web for a long time.

However, she had never seen a young man, who looked obviously less than 20 years old, purchase a Star Web faction territory.

Most of the rising factions had been developing for a long time in the real world and accumulated a lot of resources before purchasing Star Web faction territory.

The minimum requirement to do so was to have pinnacle king-class experts behind the faction as martial support.

This half-grown youth had purchased a Star Web faction territory, meaning that he did not only have pinnacle king-class experts behind him as martial support. He could even take out a circulating fund of 50,000,000 Radiance dollars at once.

The competent middle-aged woman could not help but sigh. A youth actually had such unfathomable power.

Although some successors of veteran factions with deep foundations also possessed such energy, the deeper their foundations were, the more they would not let their successors be on their own outside.

This was because each faction had its own direction of development. It would be good if the people of the faction worked together toward this direction of development and did their best to develop it.

Rashly moving in other directions of development would mess with the areas that their factions had not ventured into. If it infringed on other factions' interests and their development direction, they would receive severe suppression.

After all, in the areas that each development path corresponded to, there would be veteran factions at the absolute apex and with advantage in that direction.

After Lin Yuan saw this middle-aged woman walk over, he hurriedly welcomed and greeted her. This competent middle-aged woman only froze for a moment before she immediately recovered to her best state.

She began to seriously complete her job and introduced Lin Yuan to faction-related matters skillfully.

Lin Yuan could not help but secretly nod his head after listening to the middle-aged woman's introduction.

Although it cost 50,000,000 Radiance dollars to purchase a Star Web faction territory, in his opinion, he had not spent it for nothing!

Once he purchased the Star Web faction territory, he would be able to get three kinds of rights.

The first right was that after establishing a faction, the Star Web officials would issue an invitation letter to the veteran or rising factions that had a private territory on Star Web. He could invite other veteran and rising factions on Star Web to visit his faction territory.

In fact, this right was an excellent way to present his faction's foundation to the other factions. At the same time, he could also interact with many rising factions and veteran factions that he could not get in touch with in the real world through the Star Web channel.

Chapter 350: The Reason for Being the Center of the Typhoon Eye

It could even lead to some cooperation during the exchange. It could be said that with such a right alone, one could not even achieve a similar outcome by forking 50,00,000 Radiance dollars in reality at some point.

The second right was that before his faction territory was officially established, he could block his territory from outsiders.

In fact, outsiders could not enter a Star Web faction territory without the owner's permission. However, they were usually free to visit its external part.

This second right was entirely to ensure some rising factions' dignity without a sufficient foundation that had just built their Star Web faction territory.

The third right was the most useful one for Lin Yuan. This was because he could issue a message to all the Star Web-established factions.

The third right was unlike the first one, which was to increase contacts with other factions while showing one's faction's depth.

Instead, it was to announce his faction's development direction to all other factions.

If the first right was to manifest the faction's foundation, then the third right was to manifest his faction's role.

Due to the different development directions, each faction had completely different roles. Some private factions were composed of experts who could be hired to complete tasks in exchange for resources.

Factions mainly sold rare spiritual ingredients, searched the world for rare feys, or relied on selling information to obtain resources.

Different factions played different roles, and Lin Yuan could use the third right after establishing his private Star Web faction territory to declare his faction's role to other factions.

The role derived from Lin Yuan's faction's development direction was to customize Bronze/Epic feys that perfectly matched the spirit qi professionals' different Willpower Runes.

Lin Yuan only intended to use the third right, as it was enough to highlight his private faction's vainglorious name.

At that moment, the middle-aged woman with ear-length hair said, "These three rights must be used carefully. Except for the second one, the first and third one can only be used once.

"After using them, you can't buy the rights even if you spend another 50,000,000 Radiance dollars."

She spoke very seriously, and Lin Yuan nodded and expressed his gratitude.

After this middle-aged woman left, he teleported to his private faction territory. Lin Yuan found that his private faction territory was built exactly like a B-level guild club.

The outside environment was done with extremely simple greenery and was planted with some flowers and plants, which was rather elegant. The interior was like a standard house.

The shape of this house could not be changed, but he could freely change the private faction space.

After entering the house, Lin Yuan found that the interior area was nearly 2,000 square meters in size. Only a long table was placed in such a large area without any other things.

The long table inside and the flowers and plants outside could be modified. Any items he had scanned with his Star Web Card and placed inside or outside his private faction could be modified.

As the private faction owner, Lin Yuan could change the internal layout at will. After establishing his private faction, the first change in the rooms' layout was free of charge. After that, he would have to pay 100,000 Radiance dollars to the Star Web officials for every change.

Lin Yuan had to sigh. Who knew how to make money?

The Star Web officials knew how to make money!

The 2,000 square meters inside the private faction were like an office space. There were a total of three floors and many rooms.

Lin Yuan erased all these structures and turned the 2,000 square meters into a separate space. This was exactly his intention. He wanted to make the interior into a grand hall.

Since he did not intend to change the exterior, the interior certainly had to leave the other factions in awe.

Lin Yuan did not take the rising factions' foundation to heart. The key was to leave the veteran factions backed by Class 4 Creation Masters in awe.

Although the 2,000-square-meter hall was not yet decorated, he could feel a magnificent aura from looking at the huge empty area alone.

Since Lin Yuan would develop his private faction on the Floating Island Whale's back, he planned to call it Sky City. The Star Web private faction's main hall should be designed like it was in the sky.

However, Lin Yuan was not in a rush to immediately start the construction of this hall.

He took out the pagoda-shaped Bronze/Legend Oath Lily of the Valley, which was flickering with lustrous white light, and placed it on the long table that Star Web had given him for free.

After that, he logged off Star Web. When he did so, he did not use his second right.

Thus, after establishing his private faction, besides not being able to enter the main hall inside the territory, the external environment was displayed to all other factions, regardless of whether they were rising or veteran factions.

Lin Yuan did not care that much. Not long after he logged off Star Web, his phone rang. He picked it up and found that it was an unfamiliar number.

When he picked up the call, he heard that the caller was Listen.

"Expert, I might have to postpone my trip to the Royal Capital."

Listen paused slightly when he said this.

Before Lin Yuan could ask why, Listen added, "Expert, I plan to take advantage of the time before I go to meet you in the Royal Capital to clean up the Listening Heron Chamber of Commerce's interior. After that, I'll transfer it from Indigo Azure City to the Royal Capital.

"Anyway, most of the Listening Heron Chamber of Commerce's resources are some of the resources on Star Web. There will be no effect even if those offline resources are moved to the Royal Capital."

While listening to Listen, Lin Yuan could hear his firmness and sincerity. This made Lin Yuan raise his eyebrow.

This might be the reason why Listen could become the 'center of the typhoon eye' in his Purchase With No Loss store's fan club!
