

Merchant 371

Chapter 371: Don't Learn to Be Unsophisticated!

In Mystic Moon's opinion, as the Moon Empress' disciple, Lin Yuan must have at least nine feys pulling the fey carriage. If Lin Yuan loved having more feys, having 12 of them would not be too much.

Although using more flying feys to pull the carriage would not speed up its flying speed, if these feys had defense abilities, the more feys there were, the more they could protect the carriage's safety.

Mystic Moon looked at the expression on Hu Quan's face and found that Hu Quan was quite serious at this time.

Mystic Moon cleared his throat and asked again, "Then how many species of feys do you think are more suitable to pull the carriage?"

Mystic Moon's words made Hu Quan interested. He replied without thinking, "If you want to show the grandeur, it is natural that the higher and rarer the feys pulling the carriage, the better it is. There's not so much attention on the species of feys."

Upon hearing Hu Quan say that, Mystic Moon lost the idea of communicating with him further. If he wanted to show the foundation of the feys pulling the carriage, he had to let them look uniform when they were flying.

Otherwise, if there were different species of flying feys pulling the carriage, wouldn't that become a killjoy meeting and messy?

Therefore, it would be best to have only one kind of fey pulling the carriage.

That way, he could ensure the same-species feys' flying speed. Also, high-grade feys of the same species would not have any conflicts while flying.

The fey carriage's owner couldn't contract all the feys pulling it. Since they were not contracted feys, there would be much weaker control over them.

If two species of feys were natural enemies and had conflicts while flying—although they were feys Creation Masters trained and would not cause any serious consequences—it would be a very troublesome matter to appease the feys' friction.

If rare feys pulled the carriage, it could show the grandeur. If a high-grade softshell turtle fey that knew how to fly was combined with a high-grade snake fey that knew how to fly, wouldn't it be like the Black Tortoise in the sky and telling people they should rate your fey carriage 10 points?

This was simply too unsophisticated!

After listening to Hu Quan's words, Mystic Moon was even firmer about telling the Moon Empress that Lin Yuan did not have suitable flying feys for his fey carriage.

At the same time, he was also a little worried.

Would Lin Yuan become unsophisticated by being with this Class 5 Spirit Craftsman?

It was really a question worth pondering!

Hu Quan was still caught up in the beautiful thought of wanting to build a fey carriage, but he did not know that Mystic Moon had labeled him as unsophisticated.

In fact, Hu Quan would have cried foul if he learned about it. Hu Quan was born at the grassroots level. He had dared to say that he would build the fey carriage's main body with completely jade-textured wood and rare metals because he knew that Lin Yuan had these spiritual materials.

If Lin Yuan had not broadened Hu Quan's horizons during this period, he would have never even thought about such a thing as a fey carriage.

Hu Quan could not be blamed!

When Hu Quan really became a Class 5 Spirit Craftsman, he would naturally have broad horizons after the promotion of his status and level.

Mystic Moon turned his head and looked at Listen, who was at the side. After chatting with him for a while, Mystic Moon became keenly aware that Listen's diplomatic talent was not inferior to Wen Yu's strategic talent.

Lin Yuan actually had internal and external helpers by his side, just like how the Moon Empress had Mystic Moon and Cold Moon.

If Cold Moon's and Listen's external talents were compared to a support-type spirit qi professional, then Cold Moon's way of supporting was to first kill everything that could threaten her team. She would use such a hardcore approach to support.

On the other hand, Listen would turn all the enemies that were hostile to his team into his own people. He would use a softcore approach to support.

There were pros and cons of such a support method, but Listen was still young and had plenty of time to grow.

After Lin Yuan washed the fruits, he cut them into bite-sized pieces. Then he placed them on a fruit plate with some fruit forks before carrying it out.

After sitting with Lin Yuan for a while, Mystic Moon then left. At this time, only Lin Yuan, Listen, and Hu Quan were left in the living room.

Lin Yuan became serious and said, "Listen, your Listening Heron Chamber of Commerce will still run as it is."

When Listen heard Lin Yuan's words, he nodded and replied very seriously, "Young Master, I brought all the 11 source-type items with me this time. The Listening Heron Chamber of Commerce and I have pledged our allegiance to you. Thus, all these source-type items are yours now, Young Master."

Lin Yuan waved his hand and said, "I'll still only take six source-type items as per the previous agreement. The remaining five source-type items are the Listening Heron Chamber of Commerce's existing resources. Do you want it to remain in its current state?"

When Listen heard that, he took his stand and answered, "No, I want the Listening Heron Chamber of Commerce to develop into a large chamber of commerce."

Lin Yuan shook his head when he heard that. Although Listen had a very outstanding talent in diplomacy, he was still inexperienced. He had always been in the Listening Heron Chamber of Commerce, after all.

He needed some guidance so that he could understand that the Listening Heron Chamber of Commerce could be more than just a large chamber of commerce.

Or he should not only focus on the Listening Heron Chamber of Commerce.

"Since you have pledged your allegiance to me with the Listening Heron Chamber of Commerce, I'll put my first batch of resources in it and give you the same goods."

Listen knew that Lin Yuan had not finished speaking yet. He seriously waited for Lin Yuan's next words. At the same time, he was also curious about the goods that Lin Yuan had mentioned.

At that moment, Lin Yuan turned around and looked at Hu Quan before saying, "Uncle Hu, after you become a Class 5 Spirit Craftsman, find a construction team and have them build the guild club's base in the open space behind the mansion."

Hu Quan took complete charge and replied, "Lin Yuan, don't worry. After I become a Class 5 Spirit Craftsman, as long as I say so, there'll be construction teams that will rush to build the guild club's base for us."

Lin Yuan said, "Uncle Hu, the powder of those completely jade-textured pieces of wood collected before can now come in handy."

As soon as Hu Quan heard that, he understood the meaning. Only those who had some foundation could afford such rare things as the completely jade-textured wood.

Thus, accessories and vessels with completely jade-textured wood powder as the glaze had become a luxury sought after by those who did not have a deep foundation in the Radiance Federation.

Any one of them could be sold at a high price of nearly 10,000 Radiance dollars.

In Hu Quan's opinion, the resources Lin Yuan had said he would put into the Listening Heron Chamber of Commerce should be the objects made of completely jade-textured wood powder.

Hu Quan could not help but sigh a little.

In this Return from Faraway mansion, it seemed like everything was different from the outside world. The things that were hard to find in the outside world were treated like garbage in this Return from Faraway mansion and could only collect dust inside the storehouse.

Listen was a smart person. He speculated what resources Lin Yuan was going to give from their conversation.

Chapter 372: 360,000,000 Radiance Dollars in Six Months

Listen was in an ecstatic mood. In fact, thanks to Listen's operation, this batch of goods alone would be enough for the Listening Heron Chamber of Commerce to expand its previously held online resources on Star Web by more than five times.

It would also allow the Listening Heron Chamber of Commerce to make a qualitative leap in its offline resources. This allowed Listen to see the bright future of the Listening Heron Chamber of Commerce.

After being backed by a big tree like Lin Yuan, Listen did not have to worry about other factions scheming against him and the Listening Heron Chamber of Commerce in the future.

The fact that Lin Yuan was willing to invest in him and the Listening Heron Chamber of Commerce was another matter.

Listen had never expected that he could get such preferential treatment when he just pledged allegiance to Lin Yuan with the Listening Heron Chamber of Commerce.

Listen had sworn a Willpower Rune oath and become Lin Yuan's person, so he would not rebel. But when he had sworn the oath, he had also been really helpless.

However, Listen now had a sense of belonging. At the same time, he could not help but sigh.

This feeling of relying on a big tree is really f*cking great!

Lin Yuan looked at the expression on Listen's face and smiled slightly before saying, "Listen, do you now think that the Listening Heron Chamber of Commerce can only develop into a large chamber of commerce?"

Upon hearing Lin Yuan's words, Listen hurriedly replied excitedly, "I feel that if the Listening Heron Chamber of Commerce deploys the objects made from completely jade-textured wood powder, I'm certain that it will develop into a rising faction."

Listen had begun to plan how to deploy these objects. Such resources, which were in short supply in the market, were good stuff for Listen to make money and consolidate connections. Such good stuff had to be used where it was needed the most.

At the same time, Listen also knew that Lin Yuan would not give him much of such good stuff. However, as long as there were a small number of such objects, Listen was confident that he would be able to get the Listening Heron Chamber of Commerce to the next levels.

Lin Yuan shook his head again as he did not expect that Listen had still yet to jump out of the Listening Heron Chamber of Commerce's framework. Thus, he said, "Besides the Listening Heron Chamber of Commerce, if you were to coordinate some other assets, how much do you think you could coordinate?"

Lin Yuan's words were like a heavy hammer that struck Listen's heart. This had broken the chains that were previously binding Listen's heart, causing the invisible chains to break inch by inch. It had also unleashed the beast in Listen's heart.

Listen's eyes seem to light up with two ambitious flames. His fists under the table had been clenched pale, but he pretended to be calm and said, "I can coordinate as much as there is."

Lin Yuan laughed and replied, "Alright. Since you can coordinate as many assets as there are, then you'll first develop the Listening Heron Chamber of Commerce into a rising faction for me to see."

Even if Lin Yuan only had an eye on Listen's talent and the Listening Heron Chamber of Commerce's function as a chamber of commerce, with the Listening Heron Chamber of Commerce, the basic supplies that Lin Yuan normally needed would only need to be taken from the Listening Heron Chamber of Commerce.

This could save Lin Yuan a lot of trouble, and the basic resources for Lin Yuan's development no longer needed to go through the Star Web.

Now that Lin Yuan's faction had the chamber of commerce, in a sense, Lin Yuan had become a channel for basic supplies at this time.

This allowed the development of Lin Yuan's faction to gain great convenience afterward.

However, since Lin Yuan had previously thought highly of Listen, the latter should be able to bring enough benefits to Lin Yuan. Otherwise, if Lin Yuan put in the resources, it would be equivalent to playing ducks and drakes.

If this really happened, it would prove that Lin Yuan's acceptance of Listen and the Listening Heron Chamber of Commerce's allegiance was a mistake.

The flame of ambition burned brighter and brighter in Listen's eyes at this moment.

Lin Yuan's words unleashed the ambition that had been locked up inside Listen because of the Listening Heron Chamber of Commerce.

Now that this ambition had been completely released, Lin Yuan could sense the fighting spirit brought about by Listen's ambition.

Lin Yuan found Listen's ambition very praiseworthy. The more Listen's ambition burned, the more beneficial it was for Lin Yuan.

The Listening Heron Chamber of Commerce was only the first wisp of dust under Lin Yuan's private faction, the Sky City.

Since this wisp of dust belonged to the Sky City, why not start with this wisp of dust to absorb more dust and set up a monstrous dust storm?

Listen said solemnly, "Young Master, I'll show it to you within a year."

Lin Yuan shook his head and answered, "A year is too long. I think six months is enough time."

After saying that, Lin Yuan did not bother about Listen, who had clearly been flustered by his words. Instead, he looked at Hu Quan and asked, "Uncle Hu, if you get people to create these objects from completely jade-textured wood, how many objects can be produced every day?"

Upon hearing that, Hu Quan pondered for a while and replied, "If I get people to do it, I think it would be better to make high-end products.

"I'll find Class 3 Spirit Craftsmen to do them. The completely jade-textured wood fragments you have there simply can't be finished.

"So, if I get 20 Class 3 Spirit Craftsmen, then the small and large objects every day would add up to 200 pieces."

Lin Yuan naturally would not let Hu Quan use the completely jade-textured wood fragments to make those objects mixed with completely jade-textured wood.

That was simply using a sledgehammer to crack a nut for Hu Quan. He could find Class 3 Spirit Craftsmen to help him out.

Hu Quan's words made Listen's previous worry and panic completely disappear. If there were 200 pieces of objects made of completely jade-textured wood powder every day, that would be 6,000 pieces in a month.

There would be 6,000 pieces of objects of all sizes mixed with completely jade-textured wood powder. According to the scarcity in the market, it was not a problem to sell them for 60,000,000 Radiance dollars.

There were six months in half a year, and that would be 360,000,000 Radiance dollars. Given Lin Yuan's resource worth of 360,000,000 Radiance dollars, Listen felt that he would simply be too useless if he could not develop the Listening Heron Chamber of Commerce into a rising faction.

Listen carefully calculated. If the resources were used properly, the Listening Heron Chamber of Commerce could have the capital to become a rising faction in more than three months.

The Listening Heron Chamber of Commerce could go the way of a veteran faction with resources and a large amount of Radiance dollars. He could use resources to take in spirit qi professionals to work for the Listening Heron Chamber of Commerce.

Lin Yuan once again looked at Listen and asked, "Are six months enough?"

Listen hurriedly replied, "Young Master, I am sure that I can complete the task you gave me within four months!"

After Lin Yuan briefed him, Listen left the mansion. The Listening Heron Chamber of Commerce had moved to the Royal Capital, and Listen still had a lot of things to do.

Hu Quan had also returned to his room to contract the Bronze/Legend Wood Weaving House Centipede. He was in a rush to let it fuse with his Willpower Rune so that it could become a Fantasy Breed fey.

The moment the Wood Weaving House Centipede became a Fantasy Breed fey, Hu Quan would transform into a true Class 5 Spirit Craftsman.

At that moment, only Lin Yuan was left in the hall. He was holding Genius and ready to go back to his room.

Suddenly, he furrowed his brows. Lin Yuan felt that Red Thorn, which had always been in the leaf-shaped Diamond fey storage box, had eaten a dimensional lifeform and suddenly underwent a mutation.

Chapter 373: Gill-like Petals

After Lin Yuan sensed Red Thorn's mental feedback, he immediately turned his gaze to the leaf-shaped Diamond fey storage box in front of his chest.

As Lin Yuan used his spiritual energy to feel the situation in the leaf-shaped Diamond fey storage box, he saw that Red Thorn was digesting the dimensional lifeforms' flesh.

Its Mouth of Relinquish was like a trembling furnace, accompanied by the sounds when disintegrating the flesh of dimensional lifeforms.

The Tongue of Relinquish in the Mouth of Relinquish secreted a special acid for the flesh of dimensional lifeforms and ensured that the Mouth of Relinquish, a flesh-devouring furnace, would never be overloaded.

The Acid Corrosion Queen Bee was comfortably lying on the large flesh-like flower above the Mouth of Relinquish. From time to time, it carried out the Acid-Swallowing Larvae it had produced through her Gold ability from the hive it had built inside the Mouth of Relinquish.

Then the Acid Corrosion Queen Bee fluttered, carrying the Acid-Swallowing Larvae like an offering into the huge opened mouth of Red Thorn's Mouth of Relinquish.

It was like a servant offering a treasure to the queen. However, the queen did not react to the treasure, nor did it show the slightest response.

Nonetheless, the Acid Corrosion Queen Bee was happy with it and even danced on the Mouth of Relinquish's flesh-like flowers.

Lin Yuan could not help but hold his forehead. Ever since the Acid Corrosion Queen Bee started living in a bigger house, it had been bootlicking Red Thorn so much that he could not stand it.

After Lin Yuan roughly checked Red Thorn's appearance in the Spirit Lock spatial zone, he found that Red Thorn had not changed much in appearance.

Lin Yuan looked at the large living room of his mansion and summoned Red Thorn.

The summoned Red Thorn was like a strange, hideous, and beautiful giant pumpkin-shaped sphere. Dozens of Mouths of Relinquish were opened on it.

The Tongue of Relinquish stirred in the Mouth of Relinquish, helping the Mouth of Relinquish to digest the remaining food.

60 terrifying Eyes of Relinquish blinked from time to time and revealed a strange luster appearing each time. The 12 useless flowers on Red Thorn's corrosive cavity that were nearly one meter large were gorgeous.

When Lin Yuan summoned Red Thorn and put his attention on the huge one-meter-long flowers, he saw where the change in Red Thorn's appearance had occurred.

Previously, these 12 large red flowers did not serve a single purpose. The only value of these flowers was roughly to increase Red Thorn's visuals. At the same time, Red Thorn could make sounds like a musical instrument based on these 12 flowers.

Unexpectedly, many thread-like membranes had grown on the layers of petals in the middle of these 12 large red flowers. It looked as if the large red flowers were composed of nearly 100 petals of dark-red gills in general.

Lin Yuan finally knew why Red Thorn had suddenly comprehended the ability to breathe underwater and had become an amphibious source-type lifeform from one that could only bloom on land.

Those 12 large red flowers were now in this shape to allow Red Thorn to survive underwater.

When Lin Yuan had viewed the leaf-shaped Diamond fey storage box previously, he had found that among the flesh of the underwater dimensional lifeforms placed inside, the Gold ones had all disappeared.

They were in conjunction with the changes of Red Thorn's 12 large flowers.

It was conceivable that after eating these underwater dimensional lifeforms and digested the flesh of the Gold ones, a mutation had occurred in Red Thorn.

At that moment, Morbius' voice rang in Lin Yuan's mind.

"Yuan, it's a great thing that Red Thorn can breathe underwater because of its mutation."

Lin Yuan nodded. He was also very surprised by Red Thorn's mutation. He had never had a fey that could fight underwater.

Although the Spirit-Drawing Ichthyosaur was an aquatic fey, Blackie could not fight. It was a support-type aquatic fey that replenished spiritual power, after all.

But now that Red Thorn had completely mutated into an amphibious lifeform, it could completely show the same strength it had on land underwater.

Red Thorn's sea of flowers spread out at the bottom of the water and could indirectly control the body of water. Such a mutation gave a huge boost to Red Thorn's strategic significance.

At the same time, Lin Yuan was also secretly shocked at the greatness of the flesh of the underwater dimensional lifeforms.

Just like the flesh of the alien insects and abyss dimensional lifeforms that Red Thorn had devoured, one increased the acidity in Red Thorn's body, while the other increased its resistance and withering to fire.

However, the flesh of the underwater dimensional lifeforms opened up a new field of combat for Red Thorn.

Upon hearing Morbius's words in his mind, Lin Yuan said, "Unfortunately, there is simply too little flesh of the underwater dimensional lifeforms in the leaf-shaped Diamond fey storage box."

As he spoke, Lin Yuan touched Red Thorn's gill-like petals. Under Lin Yuan's careful examination, he found that the gill-like petals only appeared on the outer layer. Many of the petals in the inner layer still retained their shape as before.

Clearly, Red Thorn's ability to breathe underwater had not been completely mutated successfully. It still needed to devour more flesh of the Gold underwater dimensional lifeforms.

After Lin Yuan summoned Red Thorn again, it immediately weaved the thornless vine into a vine chair.

Red Thorn controlled its vine and sent the vine chair under Lin Yuan's buttocks. It even shook twice to indicate Lin Yuan to sit down. At the same time, its 12 large flowers blew in unison.

But this time, Lin Yuan was surprised to find that the blowing sound produced from Red Thorn's flowers sounded a bit like his own name.

Then he felt Red Thorn transmitting smug emotions to him. It was just like an eight-year-old child who had scored a hundred marks on her exam and was waiting for her father to praise her.

Lin Yuan was very happy that Red Thorn could actually make the sound of his name through its gill-like petals. It meant that Red Thorn could vaguely learn a language.

With the first signs of such an ability, as long as someone carefully taught it, Red Thorn could communicate with Lin Yuan like Genius after a period.

Of all Lin Yuan's feys, the highest intelligent one was undoubtedly Morbius, followed by Genius. After that, between Chimey and Red Thorn, Chimey should have higher intelligence.

However, Chimey still could not talk now. Its singing ability was very similar to the ability of a parrot to learn words.

Due to its Songstress Bird's talent, Chimey quickly remembered a melody and then sang it after memorizing it.

However, Lin Yuan believed that as long as Chimey's grade and quality improved, it wouldn't take long before it could speak.

As a plant source-type lifeform, Red Thorn could have such a high intelligence when it was at Silver/Fantasy I. This had to do with the enlightenment from Endless Summer's Enlightenment Willpower Rune.

On the other hand, in Lin Yuan's opinion, it should be related to the way Red Thorn had obtained energy.

Red Thorn grew by absorbing huge amounts of flesh energy, which could drive the development of its intelligence.

This was somewhat like the history of human development. Humans really began to develop civilization after eating meat and turned from herbivores into omnivores. In a sense, being carnivores was power.

Of course, Lin Yuan added another sentence in his mind. It's best to eat pork for meat! And it has to be the Black Back Mountain Boar meat made by Uncle Li!

Upon sensing Red Thorn's urgent need for praise, Lin Yuan sat down on its vine chair and praised it generously.

"Red Thorn is awesome! You can call my name so quickly.

"Red Thorn is the smartest!"

Treating a lifeform like Red Thorn, which was akin to having the intelligence of an eight-year-old child, was actually no different from human children of that age.

Chapter 374: Red Thorn's Underwater Domain

When Red Thorn was showing its superiority, Lin Yuan had to constantly give encouragement and acknowledgment. This would allow Red Thorn to have more drive when learning how to talk in the future.

Hearing Lin Yuan's praises, Red Thorn's 12 large flowers extended from 1 meter to 1.2 meter due to its joy.

As Lin Yuan sensed Red Thorn's happy emotions, he said, "Red Thorn, learn how to read from me, okay?"

"If you learn how to read, you will be able to converse with me like how Genius converses with me."

Red Thorn's 12 large flowers actually shivered for a moment. This was obviously Red Thorn using its own methods to show that it had accepted Lin Yuan's proposal and was rather interested.

Lin Yuan praised Red Thorn again.

When Red Thorn showed its willingness to learn, it was important to give timely acknowledgment.

At that moment, Genius jumped out from Lin Yuan's embrace onto one of the large flowers and said, "Red Thorn, I can teach you how to read every day too."

Red Thorn and Genius had an extremely great relationship. When Red Thorn heard Genius' statement, it turned its body and used the massive flower to play with Genius.

Morbus suddenly spoke in Lin Yuan's mind. "Yuan, the spirit qi crystal is ineffective toward Red Thorn. If Red Thorn can grow well, then we will be able to explore the sea region, obtaining some rare resources from the sea."

Lin Yuan could feel that Red Thorn already had the strength of a Silver/Fantasy fey. He said, "I have to experiment if Red Thorn's ramets are able to survive underwater. If they can survive, it is possible to explore the shallow sea region."

Subsequently, Lin Yuan carried Genius off the massive flower and placed it on the sofa before saying, "Genius, wait here for me. Once I return, I will bring you upstairs to sleep."

Genius let out a meow and used its little head to rub on Lin Yuan's hand. Lin Yuan used his hand to knead on Genius' head before he withdrew Red Thorn back into the Diamond grade fey storage box.

After exiting the mansion, Lin Yuan walked toward the man-made lake within the mansion garden.

As he was walking toward the man-made lake, he took a small piece of completely jade-textured wood out of the Diamond grade fey storage box. The completely jade-textured wood was emitting a gentle glow on Lin Yuan's hand.

It immediately illuminated everything within three meters from Lin Yuan. The glow was very gentle and made it very comfortable.

As the light emitted from the completely jade-textured wood blended with the bright moonlight, it gave the early winter's moonlight a refreshing feeling.

The mansion's man-made lake was five meters in depth. Wen Yu nurtured plenty of decorative aquatic feys on the surface of the man-made lake. Schools of fish in various colors were all swimming around in the man-made lake.

Lin Yuan walked in front of the man-made lake and summoned Red Thorn by the shore of the lake. He then asked Red Thorn to enter the water using its own conditions.

Lin Yuan might be able to sense Red Thorn's mutation, which gave Red Thorn the capability to breathe underwater, but Red Thorn had yet to complete its mutation.

Therefore, Lin Yuan was truly afraid that Red Thorn might not be able to adapt to the man-made lake, which was five meters deep.

This was also Red Thorn's first time encountering water. Perhaps after eating underwater dimensional lifeforms' flesh and blood, Red Thorn wasn't afraid of water. Therefore, it immediately leaped into the five-meter deep man-made lake.

Lin Yuan watched nervously as Red Thorn sank to the bottom of the lake. Immediately after, Lin Yuan noticed that Red Thorn's 12 large flowers were completely opened up at the bottom of the lake.

The gill-like petals were swaying, allowing Red Thorn to have a relaxed time within the water.

Lin Yuan's clothes were already completely drenched due to the splashes made when Red Thorn jumped into the man-made lake. Therefore, he simply jumped into the lake and dove down to the bottom.

He then used his thoughts to converse with Red Thorn, asking Red Thorn to summon a few ramets.

Be it the brutal vine ramet or the miniature spore cavity ramet, Red Thorn summoned a few of each.

In the beginning, the brutal vine ramet twisted and turned uncomfortable in the water. After a period of time, even if Red Thorn transferred energy to the ramet, it was still far inferior in movements as compared to when it was on land.

As for the miniature spore cavity ramet, it lost its ability to release spores after a short period.

It was obvious that Red Thorn's capability to breathe underwater didn't get inherited by the ramets.

At present, it seemed like Red Thorn was able to live casually underwater, but the man-made lake was only five meters in depth. Lin Yuan was unable to test the depth limit of Red Thorn's underwater survival.

However, if Red Thorn could consume large quantities of flesh and blood from Gold underwater dimensional lifeforms when those 12 large flowers turned their stamen into gill-like organs, Red Thorn's underwater breathing capability would have a complete mutation.

By then, Lin Yuan reckoned that the brutal vine ramets and the spore cavity ramets should have inherited the underwater breathing from Red Thorn.

As such, the top priority now was for Lin Yuan to obtain more flesh and blood from Gold underwater dimensional lifeforms.

When Lin Yuan swam out of the man-made lake, he withdrew Red Thorn into the leaf-shaped fey storage box from the bottom of the lake while it was still having a good time. He then asked Red Thorn to continue consuming dimensional lifeforms' flesh and blood to increase its grade and quality.

Lin Yuan then swung off the excess water from his body and walked into the mansion.

At this moment, the Royal Capital's temperature was already below zero. But due to the heat emitted from Lin Yuan's body, his drenched clothes didn't turn into ice from the winds of the early winter.

However, when the cold wind blew across, it still quickly took away Lin Yuan's body heat, allowing Lin Yuan to feel a strong but refreshing chill.

It was fortunate that he had used the Silver Stamen Gold Luster Cassia nectar to cleanse his body's impurities and enhanced his genetic model. Therefore, Lin Yuan's resistance level was extremely high. Coupled with the fact that Lin Yuan was already a C-rank spirit qi professional, sickness like fever and cold had already been left behind by Lin Yuan.

After returning to the mansion, Lin Yuan noticed that Genius was already sleeping on the sofa. While Genius was sleeping on the sofa, its small head was still facing the direction of the entrance. It was obvious that it had been waiting for Lin Yuan to return.

However, as Genius had been waiting, it gradually entered its dreamland.

Lin Yuan looked at his drenched clothes and felt the warmth from his hands. He used his mouth to blow a few puffs of breath and noticed his hands were still rather cold.

Lin Yuan was afraid that he might shock Genius when he carried it with his cold hands. Thus, he returned to his room first to have a warm shower.

After changing to a set of clean clothes, Lin Yuan returned downstairs softly to carry Genius back to his room.

Lin Yuan then carefully covered Genius with a small blanket after placing it on the bed. Subsequently, Lin Yuan logged on Star Web.

Chapter 375: Play You? What Is There to Play?

Lin Yuan logged on Star Web this time to purchase some Gold water world dimensional lifeforms' flesh for Red Thorn.

According to the situation inside the leaf-shaped fey storage box, Lin Yuan's Master had actually put in enough dimensional lifeforms' flesh and blood. However, the water world dimensional lifeforms were too few.

When Lin Yuan had received the leaf-shaped fey storage box, there was an almost equal quantity of dimensional lifeforms from the alien insect, abyss, marsh, and subterranean dimensional rifts.

After all, these four dimensional rifts that opened on the land had almost equal quantities in the world too. But if a comparison must be made, alien insect dimensional lifeforms were slightly more in quantity.

However, there were about 300 carcasses of water world dimensional lifeforms in the leaf-shaped fey storage box. Among them, there were over 200 Gold ones, while close to 80 were Platinum.

Furthermore, Red Thorn had already consumed all the Gold water world dimensional lifeforms during this period. At present, there were only those 80 Platinum water world dimensional lifeforms left.

Given Red Thorn's current grade, it still wasn't possible for it to digest the flesh of Platinum water world dimensional lifeforms.

If Red Thorn was to consume forcefully, it wouldn't just waste the Platinum water world dimensional lifeforms' flesh and blood energy, but it would also give a huge burden to Red Thorn's Mouth of Relinquish.

Therefore, when it came to the remaining 80 Platinum water world dimensional lifeforms, Red Thorn could only watch but couldn't eat them.

As compared to the four dimensional rifts that opened on land, the water world dimensional rifts would only open in the sea.

The sea had always been a paradise for ocean feys. Human spirit qi professionals were seldom seen even in the coastal waters, let alone water world dimensional rifts that were opened within the sea region.

The water world dimensional rifts' lifeforms would normally be hunted down by ocean feys quickly. Therefore, a spirit qi professionals had an extremely small chance of finding a water world dimensional rift in the coastal waters.

Once Lin Yuan logged onto Star Web, he checked his Purchase With No Loss store first. He realized that the Purchase With No Loss store's fan club had new members.

They were probably some spirit qi professionals from some faction or the Creation Masters that had purchased the Flower Brocade Pearls during the blind trades.

Lin Yuan didn't bother about his store's fan club.

This time, Lin Yuan displayed another ten Flower Brocade Pearls on his Purchase With No Loss store and still used the blind trade to sell them.

Using the lesson he had learned previously from the blind trade for the Silver flood dragon essence blood, Lin Yuan asked for the same items as the first blind trade. He wanted to trade for strange flames.

There were 130 bundles of intermediate-class strange flames sealed up in the Phoenix Perching Chinese Parasol Tree, and they were being absorbed by both the Phoenix Perching Chinese Parasol Tree and Chimey. Half of them had already been absorbed.

Lin Yuan could clearly feel a trace of transformation within Chimey's bloodline. Therefore, he wanted to trade for more strange flames. They should allow Chimey's quality to reach Fantasy III before Lin Yuan competed for the Radiance Hundred Sequence.

By then, Chimey's innate bloodline would be immediately activated. It would then transform from a Twilight Starbird into a new kind of fey.

Lin Yuan would then be able to use all the spirit qi crystals that he had accumulated to help enhance Chimey's grade.

Once Chimey's grade was enhanced, the Fantasy III Chimey and the exclusive skill, Radiant Body, would be Lin Yuan's strongest singular attack move.

Thus, Lin Yuan was using the Flower Brocade Pearls as sickles to harvest intermediate-class strange flames. He would harvest all the strange flames and supply them to the Phoenix Perching Chinese Parasol Tree and Chimey.

Lin Yuan's display of ten more Flower Brocade Pearls on the Purchase With No Loss store was sending a message to the outside world: *I have plenty of Flower Brocade Pearls.*

Previously, Lin Yuan had never checked on the information on any factions before making trades with them because he was waiting for a suitable chance.

After this blind trade, the chance would be ready.

According to Lin Yuan's pace of selling the Flower Brocade Pearls, he would soon accumulate a huge batch of Flower Brocade Pearls. He wasn't planning to sell the accumulated Flower Brocade Pearls with the same blind trade method. He was planning to bundle them up and sell them with 10 Flower Brocade Pearls as a single unit.

He would then trade with factions and Creation Masters who were urgently in need of Flower Brocade Pearls, allowing for a trade of better resources.

Most factions and Creation Masters might not be suitable to trade with Lin Yuan, however, if anyone could obtain a large batch of Flower Brocade Pearls in a single trade, it would definitely save plenty of time and effort. Therefore, there would still be plenty of factions and Creation Masters who would be willing to make the trade.

After handling the matters with Purchase With No Loss store, Lin Yuan went to look for the merchant selling the flesh of dimensional lifeforms and feys that Zhou Jiabin had recommended to him a few months ago.

Once Lin Yuan reached his destination, he noticed a boor sitting at the front of the store with a frowning expression as he flipped through his accounts.

Lin Yuan greeted and asked, "Big Brother Feng, what are you fretting about?"

The boor, Big Brother Feng, lifted his head and looked at Lin Yuan. He only had a slight impression in his mind that he had seemingly met this youth before.

When Lin Yuan noticed that Big Brother Feng didn't recognize him, he immediately hinted, "Big Brother Feng, I am the one Big Sister Zhou Jiabin recommended previously."

The boor, Big Brother Feng, had a flash of enlightenment as he closed his accounts book and stood up to talk. "I remember now. Aren't I trying to celebrate New Year's? Recently, the fey flesh is selling well and earning good money! However, all the flesh of dimensional lifeforms is stuck, and I can't even sell it at discounted prices."

Lin Yuan originally wanted to give words of consolation, but just as he was about to speak, he held back. He didn't have any method to console Big Brother Feng.

It was nearly time for the active period of the dimensional rifts that happened once a decade. By then, a large batch of dimensional lifeforms' flesh would certainly enter the market. Therefore, if Big Brother Feng couldn't sell the current stock before the new year, it would be even harder to sell afterward.

Lin Yuan immediately spoke of his objective for today's visit. "Big Brother Feng, I wish to buy some dimensional lifeforms' flesh."

Big Brother Feng had a better expression as he immediately asked, "What kind of dimensional lifeform flesh? What grade? It is already the end of the year, so I will sell them at a discounted price.

"I can sell alien insect dimensional lifeform flesh for 70% off, marsh dimensional lifeform flesh for 50% off, subterranean dimensional lifeform flesh for 40% off, and abyss dimensional lifeform flesh for 30% off. Isn't it cheap?"

Lin Yuan didn't expect the prices to be really low. Unfortunately, he didn't wish to buy the flesh of those dimensional lifeforms.

"Big Brother Feng, I wish to buy the flesh of water world dimensional lifeforms."

Once Lin Yuan's statement ended, he noticed that Big Brother Feng's expression turned stern. He then spoke in an angry tone. "Kid, are you playing with me?!?"

Lin Yuan didn't understand why Big Brother Feng was speaking like this. He involuntarily muttered in his mind, Play you? What is there to play? I just want to buy dimensional lifeform flesh!

Chapter 376: Gold-Edged Skirtfish

The boor, Big Brother Feng, was originally worried about the active period of the dimensional rift that would soon arrive.

The moment he thought that he still had a large amount of dimensional lifeforms' flesh that he had not sold yet, he could not even eat his meal.

Big Brother Feng had been very happy since Lin Yuan had come over and wanted to buy the dimensional lifeforms' flesh. He had even deliberately given Lin Yuan a discount and sold at the base price.

He was even selling the alien insects' flesh at a 70% discount at a loss. However, he did not expect that Lin Yuan would actually ask for the water world dimensional lifeforms' flesh.

Was that something that people would buy?

Or how could anyone want to buy those?

Big Brother Feng saw Lin Yuan's puzzled face and aggrieved expression that did not seem fake, so he patiently asked, "Have you ever seen the water world dimensional lifeforms' flesh?"

Lin Yuan was now wondering why Big Brother Feng had been under the impression he was playing around with him.

Now that he had heard Big Brother Feng's question, Lin Yuan immediately replied, "Of course, I've seen the flesh of the water world dimensional lifeforms."

When Big Brother Feng heard Lin Yuan say that, he immediately said, "If you have seen the flesh of the water world dimensional lifeforms, you should know how it smells."

"Is that kind of stuff something that could be sold? Do you want me to stink everyone to death with the stench?"

Lin Yuan touched the back of his head. He thought about how he had previously viewed the water world dimensional lifeforms' flesh in the Diamond fey storage box. He had never taken it out to have a look.

The size of the water world dimensional lifeforms was not small. Most of the Platinum water world lifeforms in the Diamond fey storage box were over eight meters long, with the biggest one at 25 meters. It would be inconvenient for Lin Yuan to take out such a large thing.

However, the smell of the dimensional lifeforms' flesh was unpleasant. The alien insects' flesh contained an extremely strong foul smell, while the abyss dimensional lifeforms' flesh contained a strong sulfuric smell.

However, even if the water world dimensional lifeforms' flesh smelled bad, it was not to the point that it would stink the surrounding people to death, right?

Upon hearing Big Brother Feng's words, Lin Yuan knew it was certainly hopeless for him to buy the water world dimensional lifeforms' flesh on Star Web.

The dimensional lifeforms' flesh was not very useful, so the channels for sale had always been very few. For an unlicensed importer of dimensional lifeforms' flesh like Big Brother Feng, the supply of the water world dimensional lifeforms' flesh could be said to be a winning hand to him.

Big Brother Feng's current reaction indicated that he had never sold the water world dimensional lifeforms' flesh. It seemed that it should be hard for Lin Yuan to find a place that would sell that.

However, Lin Yuan was a bit confused regarding what Big Brother Feng had said just now, so he asked, "Big Brother Feng, why wouldn't anyone buy the water world dimensional lifeforms' flesh?"

Upon hearing that question, Big Brother Feng recalled that Lin Yuan had bought dimensional lifeforms' flesh from him before, so he wrinkled his nose and answered, "Firstly, it's because the flesh contains venom.

"Although the water world dimensional lifeforms contain nutrients that are good for water-type feys, the venom in their bodies will cause a large amount of foul-smelling mucus to appear on the surface of the fey that consumed their flesh.

"Then, the surface of the fey wrapped in mucus will constantly fester, so only a fool would want to buy such flesh.

"Of course, this is only the first point. The second reason is that if their flesh is not put into a fey storage box right away, it will immediately rot after leaving the seawater and being exposed to the air for a few minutes.

"After the decomposition, the water world dimensional lifeform's odor will immediately change from an unbearable fishy smell to the stench of decomposition.

"I believe no one can endure that kind of smell."

As he spoke, Big Brother Feng was still wrinkling his nose with lingering fear, which expressed that he would never want to recall that fishy smell again.

At this point, he suddenly had some doubts. Why would this cheerful youth in front of him want to buy the water world dimensional lifeforms' flesh? Thus, he asked, "Kid, why are you buying such flesh?"

"I have a lot of water-type feys' flesh here. I can also give you a 10% discount if you need it."

Big Brother Feng had a good impression of Lin Yuan because of his faint natural, cheerful aura. After getting along with him, it was easy to have a good impression of him.

Lin Yuan replied somewhat awkwardly, "I'm buying the water world dimensional lifeforms' flesh to feed it to my fey!"

After listening to Big Brother Feng's explanation, Lin Yuan could not help but sigh a little at the powerful digestive function of Red Thorn's Mouth of Relinquish. It could easily digest the toxic substances that the other feys were unable to and give itself a favorable mutation.

But after saying that, Lin Yuan noticed that Big Brother Feng's face was red. He was obviously going to go berserk soon.

Lin Yuan quickly added, "Big Brother Feng, do you have any Gold Gold-Edged Skirtfish here? I want to buy some."

Lin Yuan was really afraid that he would make Big Brother Feng angry to the point that he would suffer from some diseases, such as brain thrombosis, high blood pressure, gastric ulcer, diabetes, liver cirrhosis, and myocardial infarction.

After all, Big Brother Feng was someone who Zhou Jiaxin had introduced to him. If he really had any complications from being angered, it would be awkward when Zhou Jiaxin found out.

Endless Summer and the Mother of Bloodbath recently preferred to eat Gold ingredients, such as the Gold-Edged Skirtfish, so Lin Yuan thought of buying some from Big Brother Feng.

Big Brother Feng was actually so angry that he was going to curse.

When Big Brother Feng had seen Lin Yuan's perfectly guileless look, he thought he might have blamed Lin Yuan wrongly. But now that he heard that Lin Yuan wanted to buy the water world dimensional lifeforms' flesh to feed his fey, Big Brother Feng was sure that the youth in front of him, who had given him a good first impression, was playing around with him ruthlessly.

How could a sane person think of buying the flesh of the water world dimensional lifeforms to feed their fey!?

Wasn't it better to just feed it 'dung'?

Before Big Brother Feng could get angry, however, he heard that Lin Yuan wanted to buy the Gold-Edged Skirtfish. As a result, his eyes lit up.

Although Big Brother Feng was selling the flesh of feys and dimensional lifeforms, he could not sell much Gold feys' flesh.

Furthermore, the weight of one Gold-Edged Skirtfish was not even 500 grams, which made it an expensive ingredient. If he could see a few of them, he could definitely make a small profit.

Big Brother Feng had planned to close the stall at this time, but he did not expect to receive a large order before doing so.

Chapter 377: The World of a Literary Youth Is Too Hard to Understand

Big Brother Feng straightforwardly said to Lin Yuan, "Come with me to the storage room and take a look.

"I happen to have a few Gold-Edged Skirtfish. I prepared them for those big hotels. If you have any you fancy, take them away."

Big Brother Feng suddenly gnashed his teeth.

"Kid, have you heard of Zhao Xiaochun, the one in the Radiance Hundred Sequence with the title Food Hater?"

Lin Yuan felt that Big Brother Feng's thoughts jumped far.

How come the topic shifted to Zhao Xiaochun?

Although Lin Yuan could not be said to be familiar with Zhao Xiaochun, he had met her with both his identities. Lin Yuan asked, "Big Brother Feng, do you like Zhao Xiaochun a lot?"

When Big Brother Feng thought of her, he gnashed his teeth in hatred. Upon hearing Lin Yuan ask if he liked Zhao Xiaochun, he slapped his thighs fiercely, his emotions out of control.

“What’s Zhao Xiaochun’s stomach made of? She can eat damn much!

“The primary sales channel for my high-grade ingredients is the Royal Capital, but now, most of the restaurants there have gone bankrupt because of Zhao Xiaochun.

“I really don’t know how a glutton can be called Food Hater!

“She’s obviously more like Critical Needle Girl. I’ve seen Zhao Xiaochun’s competitions several times. I really can’t see how such a thin little girl can put so many restaurants to bankruptcy.”

Big Brother Feng became a chatterbox at the mention of Zhao Xiaochun. Lin Yuan did not know how to comfort him. It was like how he did not know Shi Xu at the controlled Class 3 abyss dimensional rift.

Compared to what Big Brother Feng had said, it was obvious that Shi Xu was in a more terrible situation.

After thinking for a while, Lin Yuan said, “Zhao Xiaochun’s title is Food Hater. Maybe Food Hater means to wipe out all the food so that there is no more food.”

Lin Yuan’s words caused Big Brother Feng to choke and cough before a mouthful of air could come up.

Big Brother Feng told himself silently, Others are angry, but I’m not. There’s nobody to replace me if I get sick from the anger. I still have a store to run.

Big Brother Feng was thinking that he must quickly sell the Gold-Edged Skirtfish to this kid and let him get lost right away.

This kid’s words sounded more infuriating than Zhao Xiaochun causing the restaurants to go bankrupt!

Lin Yuan followed Big Brother Feng to the storage room, where the rare ingredients were stored. He found that Big Brother Feng really had a lot of good stuff!

Although there were no rare Platinum ingredients, there were many Gold ingredients.

Lin Yuan felt that these Gold ingredients were of good quality, so he made up his mind to buy some more.

Due to the mansion’s two big eaters, Endless Summer and the Mother of Bloodbath, Liu Jie had to buy a lot of food back every day. It was better to make a big purchase from Big Brother Feng and then store them in the kitchen.

Anyway, the White Jade Snow Orchids were placed on the kitchen cabinets, so he could put the ingredients there as long as he wished. Even some ingredients stored in the kitchen with Bronze/Epic White Jade Snow Orchids could be fresher than when they were first bought back.

Hence, Lin Yuan had a mindset of buying from Big Brother Feng.

Lin Yuan would buy some of Big Brother Feng’s Gold ingredients as long as the people in the mansion loved to eat them.

Lin Yuan’s mindset of buying everything exhilarated Big Brother Feng.

Big Brother Feng, who was in great sorrow and great joy, felt that his mind was spinning in pain.

This batch of Gold ingredients that Lin Yuan had bought this time was almost as much as the amount that his store usually sold in a month or so!

After he finished picking out the ingredients, he settled the bill. Lin Yuan did not expect to spend 700,000 Radiance dollars to buy this batch of Gold ingredients.

He felt that the Radiance dollars were getting less and less spendable now. How come it was similar to Federation dollars?

After settling the bill, Lin Yuan said to Big Brother Feng, "Big Brother Feng, if I need ingredients again in the future, I'll come back to buy them from you."

When Lin Yuan had bought the large batch of Gold ingredients, Big Brother Feng was beaming with joy.

Now that he heard Lin Yuan's words, the smile on his face was even more exaggerated.

Big Brother Feng looked a bit fierce. After beaming with joy, he actually looked a bit like an Anglerfish baring its teeth.

"Alright! Alright! If you need anything here, just call me. I promise to serve you well! It'll always be the same 10% discount."

After Lin Yuan left, Big Brother Feng could not help but say, "This kid is really nice, but it's a pity he's a dummy!"

Lin Yuan did not know that Big Brother Feng had labeled him like that.

Lin Yuan had yet to fulfill the purpose of his visit to Star Web, as he hadn't bought the flesh of Gold water world dimensional lifeforms.

He even learned a piece of bad news. The flesh of the water world dimensional lifeforms was not available for sale.

After logging off Star Web, Lin Yuan looked at his phone. At that moment, although it was late at night, he scrolled his cell phone and found Gao Feng had updated his friend's circle.

Gao Feng: "I'm in the wind! I'm in the waves! These are verses in the waves at night~ I'm also a little secret of the verses."

Lin Yuan did not expect that Gao Feng was a literary youth. It was too pretentious.

Since he knew that Gao Feng was still awake, Lin Yuan called him. The Gao family had been developing sea resources lately, so Gao Feng should know where to get the flesh of Gold water world dimensional lifeforms.

The phone rang for less than ten seconds before Gao Feng picked up the phone. Lin Yuan listened to the obvious sound of waves on Gao Feng's side. Clearly, Gao Feng should be currently listening to the waves at the beach.

Lin Yuan always thought that Gao Feng was just pretentious before posting on the friend's circle. He did not expect that Gao Feng was really listening to the sea at the beach.

The wind in Wind Mist City was still strong this winter. He simply had so many thoughts listening to the sea.

Before Lin Yuan could speak, Gao Feng's pretentious and surprised voice came from the other end of the phone.

"Brother, are you calling me because you miss me? Hehe."

Lin Yuan could hear that Gao Feng was tired through his voice over the phone.

Before Lin Yuan could speak, Gao Feng added, "Brother, I'm at the beach. Listen to the sound of the sea."

Then, Lin Yuan felt as if Gao Feng had put his phone's microphone toward the sea.

Lin Yuan could not hear the sound of the waves clearly, but the sound of the sea wind was loud in the phone's microphone.

Lin Yuan was in a mess. The world of this literary youth was simply too hard to understand!

Nonetheless, Lin Yuan had regarded Gao Feng as his friend. Upon hearing Gao Feng's tiredness in his voice, Lin Yuan asked Gao Feng instead of talking about himself first, "What's been going on lately? You've got yourself so tired."

Chapter 378: Curiosity Killed Lin Yuan

Gao Feng wanted to stroll at the beach because he was in a bad mood. Otherwise, it would be better to stay at home in winter. Why would he need to come out to be blown by the knife-like sea wind in early winter?

Upon hearing Lin Yuan ask himself that question, Gao Feng felt a warmth in his heart. At the same time, he was somewhat surprised.

When he went out, his father had told him not to have too much fun outside for too long and had not heard the fatigue in his voice. However, Lin Yuan could immediately hear the tiredness in his voice over the phone.

Gao Feng knew that even if Lin Yuan was meticulous and could immediately hear the exhaustion in his voice if he did not consider himself a friend, he would have never asked him what happened.

Gao Feng felt touched and sighed before replying, "Brother, you don't know those Class 5 Spirit Craftsmen are really too hard to hire. If I use Class 4 Spirit Craftsmen, I'm worried that the four pieces of completely jade-textured supreme-grade green elm will go to waste."

After Gao Feng finished, he thought that he would use the Gao family to invite the Class 5 Spirit Craftsmen if it still did not work out.

During this period, Gao Feng had been thinking of giving a gift to his grandfather, so he had not used the Gao family's status. Instead, he had been using his accumulated interpersonal relationships in planning this matter.

But he now found that without the Gao family, he could not hire a Class 5 Spirit Craftsman with his own strength alone.

When Lin Yuan heard that, he raised his eyebrows slightly. Lin Yuan had thought that it was because of those four completely jade-textured green elm boards.

It had been a month since he had traded that with Gao Feng, yet Gao Feng actually had not yet started making objects with the four completely jade-textured green elm boards.

Hu Quan had now become a Class 5 Spirit Craftsman and could totally help Gao Feng. Thus, Lin Yuan said, "If you can't find a Class 5 Spirit Craftsman at your side, I have one here.

"Send me the blueprint of the object you want to make and the four completely jade-textured green elm boards to me if you need to."

As soon as Gao Feng heard Lin Yuan's words, he immediately felt his gloominess go away. He finally found the early winter sea wind was too cold!

I'm a weak, pure support-type spirit qi professional!

Why should I be trampled by the sea wind here!

At the same time, Lin Yuan meant much more in Gao Feng's heart.

Even if Gao Feng's other friends could find a Class 5 Spirit Craftsman, they would never offer to help. No one would be willing to owe a favor to a Class 5 Spirit Craftsman for someone else.

"Brother, thank you so much. I'll mail it to you when I get home later."

When Lin Yuan heard that Gao Feng was fine and sounded much more relaxed, he told him the purpose of his call, "Gao Feng, do you know where to get the flesh of Gold water world dimensional lifeforms?"

Gao Feng was immediately surprised and asked, "Brother, what do you want that for? It's fishy and also poisonous. No one would keep that.

"Some time ago, a Class 2 water world dimensional rift opened at the coastal waters within our Gao family's control.

"The water world dimensional lifeforms that gushed out of it immediately turned into biochemical weapons after being killed.

"It was so smelly that after the person who went to deal with this Class 2 water world dimensional rift returned, he did not eat properly for a week.

"The flesh of those dimensional lifeforms was thrown to the bottom of the sea after they were killed."

When Lin Yuan heard Gao Feng say so, he was clear. It seemed that it was possible to get the flesh of the water world dimensional lifeforms.

It would be the dimensional rift's active period after a while. At that time, not only would the dimensional rifts on the land become unstable and have higher chances of opening, but it would also be the same for the water world dimensional rifts in the sea.

The Gao family had been developing the coastal waters and had controlled a lot of them.

As long as Gao Feng waited for the dimensional rift to become active and monitored the water world dimensional rift that opened in the coastal waters, Lin Yuan would certainly be able to get the Gold water world dimensional lifeforms' flesh for Red Thorn to devour. The flesh would help its 12 large flower petals to once again undergo gill-like mutation, allowing Red Thorn to have a stronger ability to breathe underwater.

"Gao Feng, when the dimensional rift becomes active, can you help me get some flesh of the Gold water world dimensional lifeforms?"

Gao Feng assured that there was no problem. After thinking for a while, Gao Feng added, "Brother, I should be able to get the flesh of the Bronze water world dimensional lifeforms. Do you think it'll help?"

Lin Yuan pondered for a while. Red Thorn was now a Silver/Fantasy Breed fey. Even if the Bronze water world dimensional lifeforms' flesh was useful, the effect would really be too weak. The effect on Red Thorn's mutation could be said to be negligible.

As such, there was absolutely no need for Gao Feng to bother looking for the flesh of the Bronze water world dimensional lifeforms.

"The flesh of water world dimensional lifeforms below Gold is of little use to me. I'll need Gold and Platinum ones."

In Lin Yuan's opinion, although Red Thorn could not eat the Gold water world dimensional lifeforms' flesh now, there was no harm in saving more.

After hanging up the phone, Lin Yuan was a little curious. Why did Big Brother Feng and Gao Feng have lingering fears about the water world dimensional lifeforms' flesh?

Lin Yuan's curiosity was overwhelming. He then went to the empty space outside the main residence and summoned the smallest Platinum water world dimensional lifeform from the leaf-shaped Diamond fey storage box. It was more than 8 meters long.

It looked like a strange fish that was covered with a layer of anemone-like tentacles. The color of these tentacles looked very bright, but black stingers that clearly were highly toxic could be seen hidden in these tentacles.

From its body structure alone, most of these water world dimensional lifeforms were tentacle-based lifeforms with strong combat ability.

When Lin Yuan just summoned this Platinum water world dimensional lifeform with strange tentacles, he almost fainted from the smell.

Since Lin Yuan was standing outside against the wind, he smelled a pungent, fishy smell that he had never smelled before in his life, even before this eight-meter-long strange tentacled fish landed on the ground.

He did not know how to describe such a smell. It was like putting dozens of sea fish guts in a sauce jar and covering them with a plastic sheet before exposing them to sunlight for ten days.

Then, when the guts of this mix of a dozen fish turned green, they would be rolled into a crepe to be eaten. It was roughly such a smell.

Of course, Lin Yuan's description might not be accurate. Perhaps the smell of those dozen fish feys' green guts was not as fishy and pungent as this water world dimensional lifeform's flesh.

Lin Yuan hurriedly took advantage of the fact that the Platinum water world dimensional lifeform had yet to fall to the ground to store it back into the leaf-shaped Diamond fey storage box.

Previously, he had heard from Big Brother Feng that it would easily rot when exposed to the air. Lin Yuan did not want to smell an even more fishy smell after it rotted.

Even though he had stored it back in the fey storage box, Lin Yuan's stomach was still churning. He looked at the large pile of fishy mucus in the empty space, and the corners of his mouth could not help but twitch wildly.

Lin Yuan hurriedly returned to the mansion, took out the cleaning tools, and cleaned up the mucus dripping from the Platinum water world dimensional lifeform's body.

If he did not have good endurance, he would have vomited while doing so. It took him three hours to clean up the courtyard under the cold wind of early winter. However, the fishy smell would probably be dispersed tomorrow morning.

At that moment, the Ostrich Logistics courier arrived outside the mansion and smelled the smell emanating from this mansion, so he could not help but speculate. Did the people in this mansion just poop in the courtyard!?

Chapter 379: I'm First-Class Among Flowers

Under the strange gaze of the Ostrich Logistics courier, Lin Yuan received the delivery with some uncertainty. Then, the Ostrich Logistics courier rode on his own flying fey and speedily left 500 meters from the Return from Faraway mansion as if he was escaping.

Lin Yuan looked at the Silver fey storage box of Gold ingredients that he had bought from Big Brother Feng and lowered his head to sniff the smell on his clothes.

He only felt his stomach churning again, so he hurriedly used Morbius' Calm Mind on himself. Only then did he save himself from ejecting a parabola from his mouth.

Since Lin Yuan was standing against the wind in the empty space outside the mansion, his clothes were also stained with the fishy smell of the flesh of the water world dimensional lifeform.

This fishy smell stayed on longer than the fragrance of perfume. If one did not wash it properly a few times, they would not be able to get rid of this fishy smell.

Lin Yuan hurriedly took this Silver fey storage box of Gold ingredients back into the mansion and put it on the table made of completely jade-textured wood. Then he went straight upstairs to take a shower and change his clothes.

After cleaning the fishy-smelling clothes he had just taken off, Lin Yuan thought that he should really change his name into Lin Suffering.

He had jumped into the man-made lake once that night, been cleaning the courtyard for three hours, taken two baths, and changed clothes twice.

What was this called if it wasn't suffering?

Lin Yuan suddenly paused. It was okay if he wasn't called Lin Suffering. He could be called Brother Bathe.

His biological clock had been changed, and he slept before 11 o'clock every night. Lin Yuan looked at the time now and realized that it was already past one in the morning.

However, he was not sleepy because of the fishy smell of the water world dimensional lifeform's flesh.

He went downstairs and took the Silver fey storage box of Gold ingredients to the kitchen. He sorted them on the huge kitchen cabinets that almost occupied one side of the wall.

After arranging the Gold ingredients, Lin Yuan carefully washed his hands before returning to his room.

After returning to his room, he thought of the beeswax box that Mystic Moon had brought to him on behalf of his Master, the Moon Empress when he had come earlier.

Lin Yuan summoned the not-so-large beeswax box from his amber-button-shaped Diamond fey storage box. After he leaned on his back, opened it, and saw what was inside, he sat up on the bed.

There were a total of three items placed inside. There was a delicate-looking openwork pendant made of Flowing Cloud Beeswax.

This pendant was engraved with layers of osmanthus patterns and looked to be full of a kind of 'pure' feeling.

Layers of osmanthus seemed to be dappled in the shade of the tree and growing. There was a small groove above the pendant. Lin Yuan looked at the size of this groove and took out the Extreme Token he had previously placed in the Spirit Lock spatial zone with a flip of his hand.

This Extreme Token contained the Moon Empress' one-time moonlight domain. It was also a treasure that she had left to him in addition to arranging a Path Protector, the Mother of Bloodbath, for him.

The moonlight domain sealed by this Extreme Token could not only protect him but also allow him to unleash a fatal blow when necessary.

This Extreme Token could be set in this openwork pendant made of Flowing Cloud Beeswax. Lin Yuan looked at its groove and found that it could fit perfectly.

A pattern of a half-moon at the bottom and top was revealed from the hole of the Flowing Cloud Beeswax pendant. The osmanthus pattern on this pendant was like a quietly growing osmanthus under the moonlight night.

It had the feeling of ‘The osmanthus flowers bloom in the evening, and the faint shadow reflects in the curtains. They fall with the wind, and the fragrance lingers at night.’

They did not compete and were quiet, but they had become the most beautiful scene under the moon.

There is no need for green foliage and red flowers, for I’m the first class among flowers.

Lin Yuan somehow suddenly thought of this line of poetry. This verse might be considered a kind of encouragement!

After another look at the Flowing Cloud Beeswax pendant, Lin Yuan stood up and put a black string through the hole before hanging it on his neck. Then he put the pendant close to his chest, inside his clothes.

The Flowing Cloud Beeswax was a kind of spiritual material that could quickly channel spiritual power and was very sensitive to spiritual power.

Since he had placed the Extreme Token inside the pendant, as long as Lin Yuan circulated the spiritual power within his body slightly and channeled it into the pendant, then the Extreme Token inside would immediately be activated and release the moonlight domain sealed within.

As he looked at the three star-shaped stamens on the osmanthus engraved on the Extreme Token, Lin Yuan immediately recognized it as the Silver Stamen Gold Luster Cassia. The Moon Empress should have carved out this pendant by herself stroke by stroke.

As for the other two items in the amber box, one of them was a light-greenish liquid in a crystal bottle. When Lin Yuan took a look at it, he saw a line of words engraved on the walls of the bottle.

“Disciple, this source-type item is a spatial source-type item. This bottle of spirit fluid is a spirit fluid with Hollow Crystal Shellfish’s shell powder.

“As for how to use the spirit fluid in this bottle and that source-type item, consider it as a test from me.”

After looking at the words on the bottle, Lin Yuan suddenly felt that his Master wanted to give him something but had to find an excuse because of the independence he had always been talking about.

This made Lin Yuan feel very ashamed, and this was the first time he wondered if he was too overly independent!

However, if he wanted to make a career, he could not rely on the Moon Empress for everything, even if he could do so for a lifetime.

After a careful study of the test that she had given him, even if a Class 2 Creation Master could not necessarily see the effect of this source-type item after contracting it, they could also see how a source-type item should actually be contracted.

At a glance, the light-green spirit fluid in the bottle was related to the method to contract this source-type item. If he knew how to contract that spatial source-type item, he naturally would know how to use that light-green spirit fluid.

The Moon Empress had always known that he was a Class 2 Creation Master, so this was not considered a test at all.

The moment Lin Yuan opened the stopper of that bottle of light-green spirit fluid, pure spirit qi mixed with medicinal properties assailed him.

Chapter 380: Ethereal Jellyfish and the White-Clothed Followers

Lin Yuan discovered that the light-green spirit fluid in this bottle contained an extremely high concentration of spirit qi. However, in comparison, it was still a little lesser than in his Spirit Lock spatial zone.

Although the spirit qi in this bottle of light-green spirit fluid was not as concentrated as the one in his Spirit Lock spatial zone, its majestic medicinal properties were something that Lin Yuan could never get, no matter what.

The majestic medicinal properties floated out of the bottle and made Lin Yuan feel as if the space before him was torn and distorted by the medicinal properties in the bottle containing spatial energy.

The medicinal properties that contained spatial energy should be the result of the addition of Hollow Crystal Shellfish shell powder to this spirit fluid.

The Hollow Crystal Shellfish was a big name in the Radiance Federation. Such feys was the reason why Ostrich Logistics could deliver goods within three hours, no matter where they were.

The Hollow Crystal Shellfish were claimed by the Ostrich Logistics to be cultivated by themselves. It was considered one of Ostrich Logistics' core feys.

At the same time, Ostrich Logistics was extremely strict with their own cultivated Hollow Crystal Shellfish. They simply would not allow the Hollow Crystal Shellfish to circulate outside.

Lin Yuan wanted Ostrich Logistics' Hollow Crystal Shellfish, but he had no way to obtain it.

The shell powder of Ostrich Logistics' treasure had been added to this bottle of light-green spirit fluid.

Given Ostrich Logistics' control of the Hollow Crystal Shellfish, only an expert of such a level like his Master, the Moon Empress, would probably be able to get the Hollow Crystal Shellfish's shells from a semi-official power like Ostrich Logistics.

Lin Yuan glanced at the third item in the beeswax box. It was the spatial source-type item that the Moon Empress had mentioned.

The Radiance Federation had announced hundreds of source-type items, but none of them were spatial source-type items. However, this did not mean that spatial source-type items did not exist.

On the contrary, spatial source-type items were fought over by the major factions whenever they appeared, as they had always been the rarest existence among all source-type items.

At the same time, there were quite a few types of spatial source-type items. Some were good at combat, some were good at defense, and some had special functionalities.

Even some factions had compared one type of spatial source-type item with the Island Whale and raised it to the point of it being a strategic treasure.

Such special spatial source-type items were akin to obtaining the qualification of spatial teleportation. This spatial source-type item in front of Lin Yuan could perform spatial teleportation.

It could be said that although spatial source-type items that could perform spatial teleportation were not as precious as the Island Whale, its role was not much smaller than the Island Whale for factions.

If a faction could obtain the ability for spatial teleportation, it would be akin to ignoring the obstacles to the faction's development caused by distance.

One could imagine how important this spatial source-type item was for the development of a faction.

Such a spatial source-type item that could perform spatial teleportation was something that Lin Yuan could not obtain, no matter what, with his current foundation.

Lin Yuan had been able to exchange with the Gao family for a strategic treasure like the Floating Island Whale because the Gao family could not hatch it even after spending great resources.

Since the Floating Island Whale's and the Island Whale's crystal eggs were different, this had made the Gao family treat this unhatched Floating Island Whale as a product of a failed mutation.

Such a Floating Island Whale was a useless thing in the Gao family and would instead consume many of their resources.

Nonetheless, Lin Yuan had still taken out three Bronze/Epic feys to exchange for the Floating Island Whale that had been treated as something useless by the Gao family.

One of the Bronze/Epic feys that Lin Yuan had exchanged was the rare Yellow Spring Lily, and thus he managed to exchange for the 'useless' Floating Island Whale.

It could be seen how much importance the major factions attached to the control of strategic-level treasures.

Lin Yuan knew that if the Moon Empress had not given him this spatial source-type item that could perform spatial teleportation, he could not exchange for such a treasure given his current resources and foundation. Even if he could take out numerous Bronze/Legend feys to exchange, the outcome would be the same.

After all, no matter how precious Bronze/Legend feys were, they could only allow a spirit qi professional to have a Bronze/Fantasy Breed fey.

However, a spatial source-type item that could perform spatial teleportation was a strategic treasure that could benefit a faction and allow it to develop rapidly.

Even if Lin Yuan could exchange for it with many Bronze/Legend feys, how could he let such feys circulate in the market easily?

Lin Yuan had been checking this source-type item with True Data.

It was like a transparent glass ball, but if one looked carefully at it, they could see that there seemed to be something transparent floating faintly inside.

This source-type item was also called Ethereal Jellyfish. The way to contract such a source-type item was to break the transparent outer shell. Then within a minute, it would be fed with the spirit fluid containing highly concentrated spirit qi, which was highly mixed with spatial energy. If he did not feed it the special spirit fluid every minute, the Ethereal Jellyfish would die.

When the Ethereal Jellyfish became a Normal I/Normal fey, a large amount of the contractor's blood would be dropped to stimulate the Ethereal Jellyfish, causing it to spit out the three gastric pouches from its body.

At that time, a large amount of the contractor's blood would be injected into its body to help the Ethereal Jellyfish grow three gastric pouches again. At that point, it would be considered being successfully contracted.

Lin Yuan looked at the contract method of the Ethereal Jellyfish displayed under True Data and couldn't help but feel that it was a really strange method.

He touched the Ethereal Jellyfish in the glassy sphere that he could not see how it looked like, and he couldn't help but say, "With this Ethereal Jellyfish, it's possible to perform spatial teleportation. Then I can start to implement the plan of white-clothed followers under the Sky City!"

Lin Yuan's eyes lit up. The Sky City was not only going to collect resources from now on, but it was also going to develop its martial force!
