

Merchant 451

### **Chapter 451: Lin Yuan, Fish Meat, Delicious**

Apart from energy, how much protein was required to produce so many insect-species fey?

Liu Jie could really afford to support it.

At the same time, Lin Yuan's Source Sand was not idle. This was the shore. Although there were many reefs, the sandy beach at his feet was mostly sea sand. Therefore, it was very easy for the Source Sand to create sand.

However, Lin Yuan found that the sand on the shore was wet. After being soaked in seawater, the sand would become heavier. Thus, controlling the wet sand was far less comfortable than when controlling dry sand.

At this time, Zhou Luo, who Lin Yuan had informed earlier, had also arrived.

The Shield Ladybugs that Liu Jie's Insect Queen had spawned had now gathered at the shore and erected their back armor to form a solid wall. Only a few of them still remained around for protection.

When Zhou Luo saw the large group of insect-species feys at the shore, particularly the combination of the Shield Ladybugs, Lightning Gathering Moths, and Plasma Caterpillars, he immediately thought of a person—Liu Jie, the 'Heart of Insect Swarm', who had just returned to the Radiance Hundred Sequence and ranked #30 just a short while ago.

At first, when Zhou Luo had been interacting with Liu Jie, Liu Jie would wear a strange mask.

After that, although he had seen Liu Jie's true appearance, Zhou Luo, an inferior king-class expert who was always running around in order to improve his feys, rarely had time to be immersed on Star Web.

At first, Zhou Luo only felt that Liu Jie looked familiar as if he had seen him somewhere before. He only thought that Liu Jie might look familiar and didn't think much about it. But now, he didn't expect that Liu Jie was the Radiance Hundred Sequence #30 prodigy.

Zhou Luo had been afraid of attracting too much attention by riding on a flying fey to this shallow coastal sea and people keeping an eye on him.

The Guild Alliance branch that Zhou Luo had visited to ask for information was near this coastal sea, so he had jogged all the way over here.

Lin Yuan looked at Zhou Luo and asked, "Has the Lava Iguana been promoted to Diamond?"

Upon hearing that, Zhou Luo's eyes were filled with gratitude, and he answered, "Young Master, the Lava Iguana has now evolved into a Lava Dragon Lizard thanks to your Flawless Dragon's Mouth Orchid flowers and that tube of Diamond dragon-species blood.

"At the same time, it successfully promoted to Diamond with the energy of this bloodline awakening."

Zhou Luo then summoned the evolved Lava Dragon Lizard. It actually belonged to the Varanus genius and evolved from the six-meter-long Lava Iguana.

At present, the Lava Dragon Lizard was nearly 12 meters long. Even though it wasn't a very large lizard-species fey among the Varanus genus, it could be ranked in the upper class.

The Lava Dragon Lizard had two heads, one of the earth attribute, while the other of the fire attribute.

However, when the energy of the two heads clashed and the earth and fire attributes fused, it could turn into churning lava.

The Lava Dragon Lizard's intelligence was not low, and it knew that it could be where it was today thanks to its contractor and the grace of someone, so it lowered its two heads in front of Lin Yuan.

Fey with their dragon-species bloodline had always been proud, and the Lava Dragon Lizard's situation was not common.

Upon seeing the situation, Zhou Luo rubbed the Lava Dragon Lizard's two necks with both hands like a feather duster.

After watching his former partner, the Lava Iguana, mutate all the way into the current Lava Dragon Lizard, Zhou Luo couldn't help but think of Freezing Cold, who had insulted him in the Purchase With No Loss store.

Time had changed, and only less than ten days had passed. Zhou Luo's talent could now completely exceed Freezing Cold's.

Among the two lizard-species fey that had awakened their dragon-species bloodline, the Dark Snake Dragon Lizard had awakened its dragon-species bloodline at Bronze.

As long as there was enough time to grow and promote the grade of the Lava Dragon Lizard and the Dark Snake Dragon Lizard, he could go from the low-rank king-class expert to a high-rank one.

Lin Yuan could completely understand Zhou Luo's joy. He was also someone who had risen from the bottom, so he could feel the joy the metamorphosis had brought to Zhou Luo.

At that moment, the joy on Zhou Luo's face was replaced by a grim expression. "I managed to pry quite a lot of information without much effort in the Guild Alliance regarding this coastal sea.

"It's rumored to be a forbidden place in the Guild Alliance as quite a few spirit qi professionals have disappeared near this place.

"Since it'll soon be the dimensional rifts' active period, the Guild Alliance temporarily did not notify the Spirit Guards to deal with it.

"Instead, it intended to wait until after the active period before letting the Spirit Guards investigate this.

"The Guild Alliance has informed the spirit qi professionals not to come here to undertake missions."

Lin Yuan asked, "Did you inquire about the news regarding the frequent appearance of the decaying flesh of water world dimensional lifeforms at this coastal sea in the Guild Alliance?"

Zhou Luo organized what he had heard in the Guild Alliance branch and replied, "I heard from some adventurers that water world dimensional lifeforms' flesh would occasionally appear here, and many spirit qi professionals thought otherwise.

"But in the recent two months, more and more flesh of water world dimensional lifeforms has been appearing on the shore.

"Many people are speculating if there are some powerful feys in the sea or if it's related to the upcoming active period."

Lin Yuan dismissed the first guess.

If there were powerful feys in this water, would they frequently come to the shore and attack spirit qi professionals?

On the other hand, Lin Yuan felt it was reasonable that it was related to the dimensional rift's active period.

The breeze no longer carried the smell of decaying flesh of water world dimensional lifeforms.

Lin Yuan took the lead and headed to the shore. After walking to the shore, Lin Yuan saw many black rotting marks in many areas of the sandy beach that were precisely caused by the decaying flesh of the high-class water world dimensional lifeforms.

Lin Yuan pondered for a moment and summoned Red Thorn that was having a feast in the Spirit Lock spatial zone.

Red Thorn was unusually elated after Lin Yuan summoned it. Its huge flowers with partial gill-like petals produced the sound, "Lin Yuan, fish meat, delicious."

Lin Yuan was slightly stunned to hear Red Thorn's sound. He knew that it could rely on his huge flower to create the sound of his name. Although its grade and quality hadn't been promoted, its voice simulation ability had become stronger.

Was it related to the gilled petals in Red Thorn's flower? Lin Yuan realized what Red Thorn had meant immediately after that.

#### **Chapter 452: The Bottom of the Sea Where Life Is Cut Off**

Lin Yuan revealed a puzzled expression. As its father, he had to explain to Red Thorn what real fish meat was.

How could such smelly things like the Gold water world dimensional lifeforms' flesh be called fish meat?

Immediately afterward, Lin Yuan recalled that Red Thorn had seemed to have devoured the water world dimensional lifeforms' flesh of its own accord in the Spirit Lock spatial zone back then.

Apparently, Red Thorn's subconsciously found the water world dimensional lifeforms' flesh more to its taste.

Lin Yuan scratched his head. Did Red Thorn like to eat something more, the more smelly it was?

He saw that the red ribbon on its vines was a little dirty, so he untied it and replaced it with a new red ribbon specially made by Wen Yu, tying it into a delicate double bow.

Red Thorn was so happy that its 12 red flowers immediately moved. It was just like the sound of a naughty child playing on the keyboard. It seemed Red Thorn should interact with Chimey more to enhance its musical talent.

At that moment, the Acid Corrosion Queen Bee flew out of Red Thorn's Mouth of Relinquish. Just as it was going to land on Lin Yuan's shoulder, Red Thorn's vine squashed it onto the ground.

After being squashed, the Acid Corrosion Queen Bee hurriedly went far away from Lin Yuan. It landed on Red Thorn's corrosive cavity that had metamorphosed into a sac with an obedient look.

Previously, when Lin Yuan had summoned Red Thorn, Zhou Luo and Listen had felt that the fey he had summoned looked very strange.

However, after the Acid Corrosion Queen Bee flew out of its Mouth of Relinquish, and seeing what the Acid Corrosion Queen Bee looked like, their jaws almost dropped to the ground in surprise.

Wasn't this bee-like fey one of Black's many feys that were the hottest on Star Web?

If so, wasn't this strange plant fey Black's fey that could spread a sea of flowers? The very one the many Scholars could not come up with a specific conclusion?

This strange plant fey seemed to have evolved and was completely different from its image on Star Web.

The mysterious Black on Star Web was none other than Lin Yuan!

Listen and Zhou Luo only knew that Lin Yuan was the Purchase With No Loss store owner, a powerful faction was backing him, and emperor-class experts surrounded him.

His outstanding foundation had made them ignore Lin Yuan's strength, and Lin Yuan had never taken the initiative to show it.

Now that they discovered Lin Yuan was the most mysterious, heroic youth Black on Star Web, the image of Lin Yuan in their mind changed. Not only was his foundation deep, but he was also powerful!

He didn't only win back-to-back on the Celestial Stairway with no defeats. It could be said that he had vaguely reached the standard of the Radiance Hundred Sequence in terms of combat power.

This sudden discovery of the secret mesmerized Listen and Zhou Luo.

At that moment, Lin Yuan gazed at the coast and commanded Red Thorn, "Red Thorn, spread the sea of flowers all over this sea."

After receiving Lin Yuan's command, Red Thorn sprinkled its spores toward the coast through the huge spore cavity on its Mouth of Relinquish.

The spores didn't grow vines but instead grew several child ramets that were like spore cavities. These child ramets constantly sprinkled spores.

Suddenly, several blinking Eyes of Relinquish on Red Thorn closed. The Eyes of Relinquish were channeled into the child ramets through the roots connected to these child ramets.

Then Red Thorn sprinkled a large number of spores into the sea with the child ramets.

Vines emerged on the shore one after another, growing toward the sea. They would use their sharp teeth to absorb seawater and inject the spore cavity's spores in the mud and sand at the bottom of the sea through the vines.

The sea of flowers composed of vines spread out in all directions at the bottom of the sea with these methods.

Lin Yuan sensed the speed Red Thorn was spreading the sea of flowers and couldn't help but frown slightly.

Red Thorn's spores were small and light to facilitate the dispersion in the air, but this had become a flaw in the seawater.

The turbulent waves would instantly sweep away the small and light spores. Even with the aid of the vines, the speed of spreading out was still slow. After all, the vines could only grab a small amount of the spores.

Lin Yuan thought, It seems that if I want to increase the ability of Red Thorn to fight under the sea, its spore cavity has to be enhanced again so that the spores can be divided into two states—one suitable for dispersing in the air, while the other in the seawater.

Red Thorn developed part of its spores into child ramets that were like spore cavities.

However, these child ramets were also releasing spores, and the spores were swept to the surface due to the surging currents at the bottom of the sea.

Since Red Thorn had yet to devour enough Gold water world dimensional lifeforms to impart the ability to breathe underwater well to the child ramets, the sea of flowers it spread in the sea was not as powerful as on land.

Nonetheless, the sea of flowers served as Lin Yuan's eyes and was undoubtedly enough.

Since this was a seemingly dangerous sea, Lin Yuan naturally wouldn't easily go into the water before he completely explored the sea.

In the sea of flowers that constantly spread, he was surprised to find that there was not the slightest bit of life in this shallow near-shore sea.

Red Thorn's sea of flowers range was not small, but Lin Yuan didn't see any traces of the shellfish feys, the Beak-Billed Spiny Fish, or the Shellfish-Eating Armored Turtles that Listen had mentioned.

Since he didn't even find the Beak-Billed Spiny Fish, then the Tail-Cutting Shadow Sharks that ate them could not stay in this sea.

However, he didn't know whether the school of Tail-Cutting Shadow Sharks left because there were no Beak-Billed Spiny Fish to feed on in this sea or some other thing had expelled or killed them in this sea.

Lin Yuan asked Listen, who was standing beside him with a shocked expression, "When you came to check on the coastal sea before you left, did you go into the sea to check the shellfish feys?"

Listen didn't understand why Lin Yuan asked him that. Was there something wrong with this sea?

"I caught the two Poisonous Water Sea Eels, which I brought to the Royal Capital for you to enhance, before leaving Indigo Azure City in this sea."

### **Chapter 453: The Retreating Vines**

Listen calendar and said once again, "There were many shellfish feys at that time. Those two Poisonous Water Sea Eels scampered into the large shellfish feys to hide their forms. Thus, when I sent people to capture them, it wasn't much effort at all."

When Lin Yuan heard Listen's words, he could determine that the life in this sea had been cut off, and it had happened within these three months.

Lin Yuan had always felt that Red Thorn's Eyes of Relinquish consumed too much. At first, he thought it was the normal consumption of spreading its sea of flowers in the sea. After all, he had never commanded Red Thorn to launch an attack in the sea before.

After sensing the state of the bottom of the sea through the sea of flowers, Lin Yuan suddenly discovered that the vine ramets were rooted at the bottom of the sea. Therefore, only those very close to the shore could draw energy from the bottom of the sea.

The further they were away from the shore, the less energy the vine ramets could absorb in the sea.

The energy at the bottom of the sea seemed to have been exploited thousands of kilometers away from the shore without a trace left, causing the entire sea bottom to become unusually barren.

Lin Yuan pondered while letting Red Thorn continue using its Eyes of Relinquish release spores in this sea. Its Eyes of Relinquish had gradually been used.

But one part of its sea of flowers had already exceeded the range of the coastal sea of the Listening Heron Chamber of Commerce. Lin Yuan's perception became extremely poor for this distant sea range.

However, he could sense Red Thorn's other vine ramets had absorbed some faint flesh energy in other seas. That faint flesh energy feedback could have been that the vine ramets captured a fish fey.

This meant that there were lives in the other seas, and there was no life just in the sea where the Listening Heron Chamber of Commerce was located.

The Zheng family had suddenly started to take action against the Listening Heron Chamber of Commerce three months ago.

The Zheng family, one of the three major affluent families in Indigo Azure City, would naturally investigate this coastal sea since they valued it so much.

Therefore, it was impossible for the Zheng family's third lineage not to know that there were no more abundant shellfish feys in the coastal sea of the Listening Heron Chamber of Commerce.

Since the Zheng family was so imperative to get this coastal sea that was completely barren and had no more shellfish feys, it meant that the third lineage must have a grasp of the secret of why it had become so barren.

Before Lin Yuan could think about it, he suddenly sensed a dramatic change of Red Thorn's sea of flowers at the distant sea, seemingly twined by a large number of things in a flash.

It was unknown what these things were. But, the moment the sea of flowers made of vine ramets were twined, Lin Yuan could sense a large amount of flesh energy being plundered by those things. He was a little horrified at the speed of the plundering of vitality.

Lin Yuan looked at Liu Jie, who was at his side and nodded at him with a very grim expression. Liu Jie commanded the Flesh-Mincing Blade Insects lurking in the sand, and they emerged one after another.

Under Liu Jie's commands, these Flesh-Mincing Blade Insects seemed to be heading home, happily lining up to walk into Red Thorn's Mouth of Relinquish. They were like a group of sows lined up to jump into the gutter, neat and orderly.

Red Thorn welcomed it, and its Tongue of Relinquish secreted a lot of acids to digest the flesh of the alien insects to help its Mouth of Relinquish digest these Flesh-Mincing Blade Insects before quickly extracting energy from their flesh.

Just like this, as the eyelids of Zhou Luo and Listen jumped wildly, Lin Yuan prompted the sea of flowers to counterattack through the energy obtained from digesting the Flesh-Mincing Blade Insects.

However, the more it counterattacked, the grimmer Lin Yuan's eyes became. Red Thorn's sea of flowers that had always been unbeatable was clearly not a match. Lin Yuan could feel that the things twining with Red Thorn were increasing.

However, he found that these things that were fighting with Red Thorn didn't seem to move or were very clumsy.

Red Thorn kept receiving attacks, and the flesh energy in the sea of flowers was also absorbed by those things more quickly.

The energy absorption of the sea of flowers from this unknown lifeform had affected Red Thorn's ortets connected to the child ramets.

Lin Yuan hurriedly let Red Thorn withdraw the remaining energy in the sea of flowers. Immediately afterward, he closed his eyes and pondered.

Through the perception of the sea of flowers at the bottom of the sea, there seemed to be countless thorns pierced into each vine ramets in the previous struggle.

Through these thorns, the flesh energy in the vines was rapidly and heavily plundered, and the counterattack of the vines didn't seem to have the slightest use. Lin Yuan didn't feel the vines absorb any flesh energy during the counterattack.

Lin Yuan thought, Could there be a large group of unknown lifeforms far from the shore, causing this coastal sea to become so barren?

But if this is the case, since this coastal sea has been so barren, why don't those unknown lifeforms migrate but remain in the depths of this coastal sea?

Lin Yuan could be sure that this group of unknown lifeforms' thorn attack was not considered strong through the fight just now. What was really powerful was the speed at which they devoured energy.

The level of this thorn attack shouldn't be able to beat the Tail-Cutting Shadow Sharks, and even the spines of the Beak-Billed Spiny Fish that fed on the shellfish feys could not be pierced.

Looking at the expression on Lin Yuan's face, Liu Jie asked with some concern, "Lin Yuan, did you discover something bad?"

Lin Yuan opened his eyes and first shook his head, then nodded his head again. The discovery through the sea of flowers at the bottom of the sea could not be called a bad discovery.

This was because those things that had devoured the energy from the vines should have nothing to do with the appearance of the flesh of high-class water world dimensional lifeforms on the shore.

However, the Listening Heron Chamber of Commerce's coastal sea destruction was definitely not some good news.

Suddenly, Lin Yuan thought of the speed at which those lifeforms plundered energy, the sea bottom becoming barren, and that lifeform's inability to move. He thought of a possibility.

If this possibility was really as he thought, he could only say that he was really the reincarnation of the God of Fortune. He had really encountered a true blessing this time.

Liu Jie was a little confused by Lin Yuan shaking his head and then nodding his head.

Immediately afterward, Liu Jie heard Lin Yuan say, "Big Brother Liu, let your Hurricane Owlet Moth take me to the sea 3,000 meters away from the shore to have a look."

The place where Red Thorn's sea of flowers had been attacked was exactly the location 3,000 meters from the shore. So whether it was a blessing or danger, Lin Yuan felt that he needed to go down to the sea to have a look to be sure.

#### **Chapter 454: Water from Eight Directions Gather**

Anyway, Lin Yuan knew that he was protected by the Mother of Bloodbath and had his Master's Extreme Token. Even if he was in danger, he could react at once.

This danger 3,000 meters away from the shore wouldn't be more powerful than the Suzerain/Myth II Mother of Bloodbath, right?

While speaking to Liu Jie, Lin Yuan was also slightly embarrassed. He, Liu Jie, Listen, and Zhou Luo seemed to have no flying feys that they could ride on.

He instead had to rely on the moths produced by Liu Jie's Insect Queen when he needed the flying ability now.

Although he could fly with the four Day and Night Spirit Silver wings, flying would rely on the Day and Night Spirit Silver's weightlessness as long as the four wings played a defensive role.

The sea breeze was currently very strong. Given Lin Yuan's spiritual power as a C-rank spirit qi professional, using the four wings would likely cause him to become a kite with broken strings thanks to the sea breeze.

The Insect Queen's Hurricane Owlet Moths could manipulate the wind and wouldn't be affected by flying in the great sea breeze at all. The sea breeze would even speed up the Hurricane Owlet Moths' flight.

The chaotic sea breeze was also one of the reasons why, in addition to the fear of attacks by marine feys, many spirit qi professionals with flying feys still didn't dare to fly above the sea.

Lin Yuan wanted the Hurricane Owlet Moths to take him over the sea because this coastal sea had been explored. It was also due to the protection of an expert like the Mother of Bloodbath.

After hearing Lin Yuan's request, Liu Jie did not ask any questions. Instead, he commanded the four Hurricane Owlet Moths to fly toward Lin Yuan.

Liu Jie knew that Lin Yuan was not a rash person. Lin Yuan must have discovered something with such a request.

Two Hurricane Owlet Moths grabbed Lin Yuan's shoulder, while the other two grabbed both sides of his waist. According to Lin Yuan's instructions, they took him into the air and headed in the designated direction.

When Lin Yuan was flying above the sea with the four Hurricane Owlet Moths manipulating the wind energy to take him into the air, he looked at the vast sea and was suddenly intoxicated by the blueness of the sea.

Lin Yuan could see the bottom of the sea that was 100 meters under the sea surface. The barren sea at the bottom was particularly vast. The silence of no life in this sea contained the beauty of vastness.

A hundred rivers flow east to the sea, and when will they flow back to the west?

The sea is vast, the rivers flow from all directions, and the water is gathered from eight directions.

At that moment, Lin Yuan seemed to have the feeling he had when he had first ridden on a flying fey and flown in the clouds all the way from the Xia Region to Redbud City.

All of a sudden, a glimpse of enlightenment appeared in his mind. It revealed a sense of inclusion and convergence.

It was just like how the water in the sea never flew back to the rivers. Even if the water would eventually return to the rivers, it was through other means.

When he returned to his senses, Lin Yuan couldn't help but shake his head.

Previously, there was a sense of enlightenment in his head when he was reading a book. However, it was stuck at a critical point, and he had been unable to figure it out.

Before he could fully understand the previous enlightenment, he had new enlightenment that was completely different. If he could fully understand both, that would mean two Willpower Runes.

In Lin Yuan's opinion, although he had two kinds of enlightenment, he couldn't understand any of them.

Rather than that, he would rather sacrifice one of the enlightenments and completely understand the other enlightenment to condense a Willpower Rune and not have both enlightenments divided and be unable to understand them.

At that moment, the Mother of Bloodbath's peculiar yet pleasant voice sounded next to Lin Yuan's ears.

"Congratulations, you have just entered a state of epiphany."

A bitter smile hung on Lin Yuan's mouth. He was just entering a state of epiphany and gaining a new understanding, not a Willpower Rune. What was there to congratulate him?

It was really sweet distress to be stuck with two enlightenments.

The Mother of Bloodbath sensed Lin Yuan's bitter smile and couldn't help but feel a little speechless.

"You're not taking this state of entering epiphany seriously!"

"Some people don't get such an opportunity even once in their lifetimes."

"Those spirit qi professionals have Diamond/Legend feys, but there are a few cases where they have been unable to promote their feys into Fantasy Breeds because they can't comprehend the Willpower Rune."

"They just lack entering a state of epiphany like this."

Upon hearing the Mother of Bloodbath's words, Lin Yuan was somewhat thankful that he hadn't spoken the true thoughts. Otherwise, the Mother of Bloodbath would probably transform into the Mother of Sarcasm again and make sarcastic remarks.

Lin Yuan retracted his thoughts, no longer thinking about the two kinds of enlightenment. "Mother of Bloodbath, I need your help when I get to the sea later."

The Mother of Bloodbath's peculiar yet pleasant voice replied, "If you need anything, just ask. My combat ability in the water is not much worse than on land."

"When I was still at Gold, it rained continuously for three years in the Endless Forest. All the bird feys disappeared, and the forest turned into a swamp."

“I sank into the swamp to catch fish, and I found that these fish feys were dumb and much better to catch than birds!

“But the taste of fish is not as good as the finger-licking chicken a few days ago!

“Of course, the birds I ate before were also raw and not as delicious as cooked finger-licking chicken!”

The Mother of Bloodbath obviously had some flashbacks when it talked about the finger-licking chicken.

When Lin Yuan heard the Mother of Bloodbath talk about what happened when it was at Gold, he thought it was long in the past.

Although the Mother of Bloodbath had talked about it very easily, the three years of heavy rain must have made it suffer a lot at Gold.

If it wasn't for the extreme lack of food, how would a bird-catching spider change the diet engraved in its genes and go underwater to catch fish?

The Mother of Bloodbath had never spoken before about what had happened to it when it was at low grade, and it happened to mention it to Lin Yuan this time.

Those memories that were left behind slowly surfaced before the eyes of the Mother of Bloodbath.

The Mother of Bloodbath remembered how it had suffered before taking its form and then recalled every bit about how it had now transformed into human form and was living in the mansion.

The red stingers on its spider legs couldn't help but tremble with happiness twice.

If the Mother of Bloodbath wasn't on Lin Yuan's head but a coconut, it would use its spider legs to crack the coconut shell to express the happiness in it.

#### **Chapter 455: Sea Burial Lotus Flower**

The four Hurricane Owlet Moths stopped flying as soon as they brought Lin Yuan to the designation location, but he did not rush to go into the sea.

Instead, he summoned the Gold Green Oxygen Sea Anemone that he had purchased earlier from the amber-button-shaped Diamond fey storage box.

Lin Yuan had stored this Green Oxygen Sea Anemone in the Spirit Lock spatial zone and nourished it for nearly half an hour with the high concentration of spirit qi before putting it back into the amber-button-shaped Diamond fey storage box.

At this moment, the Green Oxygen Sea Anemone was in very good condition and lively as it constantly stretched its short light-green tentacles.

It buckled on his mouth and nose while being upside down, and Lin Yuan immediately felt the uniquely fresh smell of a marine plant.

Lin Yuan couldn't breathe under the sea, so he instructed this Gold Green Oxygen Sea Anemone to create oxygen in the water.

He took a deep breath and plunged into the sea. The cold seawater soaked Lin Yuan, causing him to shiver. Then he felt the Gold Green Oxygen Sea Anemone's powerful oxygen-producing function.

The large amount of oxygen it produced completely isolated the seawater from his mouth and nose, and he sniffed the oxygen that had the unique marine plant fragrance.

He felt that the Gold Green Oxygen Sea Anemone's oxygen seemed to be slightly more than the usual oxygen content in the air.

Higher-grade Green Oxygen Sea Anemone could probably be treated as an oxygen cylinder that released pure oxygen in the sea.

Lin Yuan looked down at the bottom of the sea. If not for the Gold Green Oxygen Sea Anemone protecting his nose and mouth after entering the sea, his coughing action could cause him to choke on a large amount of seawater and die.

When he was on the sea surface previously, due to the fine waves of the sea, Lin Yuan could only see that the barren sea bottom was almost the same color. However, he couldn't look closely at what was at the sea bottom.

When he looked at the sea bottom, he felt his scalp numb. He saw the sea bottom were endless bone-carved lotus flowers.

These lotus flowers were not the white color of ordinary bones but like the gray-white dead coral at the sea bottom.

The Bone Lotus Flowers were stacked layer upon layer and bloomed. Those at the top were whiter.

The Bone Lotus Flowers were endless, and this sea bottom seemed like a barren, beautiful bone lotus hell. The strange beauty of this bone lotus hell made Lin Yuan have goosebumps all over in the cold seawater. This strange natural scenery was beautiful.

Lin Yuan couldn't feel the presence of any living creatures in the endless sea at this moment. It was silent, and only these Bone Lotus Flowers were gently opening and closing in the sea.

The hearts of the Bone Lotus Flowers contained a cold flare. They must be the thorns that had pierced the vines in his perception.

Lin Yuan observed the endless Bone Lotus Flowers and understood why Red Thorn's sea of flowers hadn't absorbed the slightest flesh energy during the struggle.

Lin Yuan was currently feeling ecstatic. It seemed that he was really the reincarnation of the God of Fortune. He had actually guessed what was in this sea region correctly.

However, he needed Morbius' True Data to confirm it, so he used True Data to check the endless lotus flowers at the sea bottom.

[Fey Name]: Sea Burial Lotus Flower (Derivative)

[Fey Species]: Water Willow/Water Bone Lotus

[Fey Grade]: Silver (4/10)

[Fey Type]: Wood

[Fey Quality]: Elite

Morbius' True Data showed that these Bone Lotus Flowers were really the Sea Burial Lotus Flower. However, these endless Bone Lotus Flowers were not the Sea Burial Lotus Flower's original body. They were just the ramets the Sea Burial Lotus Flower used to extract the energy from the sea bottom.

The Sea Burial Lotus Flower was a famous carcinoma fey in the sea. The Sea Burial Lotus Flower's original body was extremely good at hiding and should be hidden among the endless Bone Lotus Flowers at the sea bottom.

Lin Yuan had heard from the Moon Empress that the Sea Burial Lotus Flower had appeared in the sea depths the last time.

At that time, the Sea Burial Lotus Flower had extracted all the energy at the sea bottom, turning the deep sea into a forbidden ground where no marine feys could live.

Thanks to the Bone Lotus Flowers' continuous expansion, the Sea Burial Lotus Flower had finally reached a large whale-fall area of a whale beast.

The Sea Burial Lotus Flower had not been polite at all. It had madly extracted the energy from this large whale fall area. As a result, four of the hatching Island Whale crystal eggs couldn't hatch due to the whale-fall area's energy loss.

This had angered many Suzerain/Myth Breed marine feys in the deep sea, causing them to attack and kill the Bone Lotus Flowers.

After clearing the Bone Lotus Flowers within 5,000 kilometers, many Suzerain/Myth Breed marine feys had finally found the original body of the Sea Burial Lotus Flower.

They had extracted the Sobbing Sea Crystal condensed by the energy of the large whale fall from the Sea Burial Lotus Flower's roots and returned it to the four crystal eggs and the barren sea bottom.

Under the Sobbing Sea Crystal effect, 5,000 kilometers of the deep sea had soon been revived.

Those four crystal eggs with the Floating Island Whales had also used the energy in the Sobbing Sea Crystal to successfully hatch.

Back then, the Radiance Federation had brought out very valuable treasures, showing their sincerity. They had wanted to make an exchange with the high-grade marine feys in the deep sea for the carcinoma fey, the Sea Burial Lotus Flower, which the Spirit Guards would take.

However, the high-grade marine feys had rejected them and annihilated the Sea Burial Lotus Flower, which was absolutely harmful to the sea, in front of the experts from the Radiance Federation that had gone to negotiate it.

They had jointly expressed the marine feys' attitude to the Sea Burial Lotus Flower.

Although the Sea Burial Lotus Flower was exceptionally harmful to the sea, it also produced the indescribably rare Sobbing Sea Crystal.

At that moment, the Mother of Bloodbath jumped out of Lin Yuan's hair in the sea and turned into its human form.

The Mother of Bloodbath, which was unusually calm and composed, couldn't help but swear, "Damn! It's actually the Sea Burial Lotus Flower! Your providence and luck are too amazing!"

Lin Yuan was just about to speak when he recalled that he was still in the sea at this time.

The Mother of Bloodbath, a Myth Breed fey, could breathe and speak freely in the sea, unlike him. He had to rely on the Gold Green Oxygen Sea Anemone.

Therefore, he stretched out his hand to give the Mother of Bloodbath a thumbs-up with a smile on his face.

#### **Chapter 456: The Lotus Flower's Original Body**

The Mother of Bloodbath couldn't help but roll its eyes as it saw Lin Yuan's smug appearance. Nonetheless, it immediately started to help Lin Yuan search for the true body of the carcinoma fey, the Sea Burial Lotus Flower.

Lin Yuan couldn't help but feel a little thankful at this point.

Fortunately, the Sea Burial Lotus Flower had appeared in the coastal sea, and its resources were far less than in the deep sea, resulting in the Sea Burial Lotus Flower's Bone Lotus Flowers' slow-spreading speed.

Furthermore, the coastal sea's resources weren't enough to help the Sea Burial Lotus Flower quickly spread its Bone Lotus Flowers to other sea regions. As a result, the Bone Lotus Flowers were hunted in other sea regions.

Since the Sea Burial Lotus Flower appeared in the Listening Heron Chamber of Commerce's coastal sea, and Listen chose to come to the Royal Capital to pay allegiance to Lin Yuan, the latter had the opportunity to find the Sea Burial Lotus Flower and have it for himself.

The feys living at the sea bottom, like the corals, marine plants, and shellfish feys, would suffer due to the Bone Lotus Flowers.

The Sea Burial Lotus Flower would empty the energy in the sea, and these corals, marine plants, and shellfish feys, which lived at the sea bottom and could not move around, would be devoured by the Bone Lotus Flowers.

Then the Bone Lotus Flowers would transfer the energy to the Sea Burial Lotus Flower, which would turn the energy into Sobbing Sea Crystal.

When the energy at the sea bottom had been emptied and all life had been cut off, the feys that could move would naturally flee this barren sea region and not stay there.

As Lin Yuan watched the Mother of Bloodbath constantly unleash blood energy at the sea bottom to destroy the Bone Lotus Flowers, his eyelids jumped wildly, and he hurriedly told it to stop.

As a carcinoma fey, the Sea Burial Lotus Flower wreaked havoc in the sea, but its original body was very weak.

If the Mother of Bloodbath's blood energy spread, the Sea Burial Lotus Flower's original body would probably die.

Compared to the Sobbing Sea Crystal condensed from the energy of this coastal sea, Lin Yuan wanted the Sea Burial Lotus Flower more.

The energy the Sea Burial Lotus Flower extracted from the sea was not actually water-element energy. It was the sea bottom's flesh energy and the ley line spirit-qi deposit deep under the sea.

The Sea Burial Lotus Flower would absorb all the energy and condense the Sobbing Sea Crystal.

The Silver IV/Elite Sea Burial Lotus Flower was wood-type, so the Sobbing Sea Crystal it condensed was also wood-type.

The wood-type Sobbing Sea Crystal was a sacred item that could nourish wood-type feys but was life-threatening poison to other types of feys.

When feys of other types used the Sobbing Sea Crystal, its energy would burst in the fey's body. One could imagine the horror of the energy exploding in a fey's body.

However, when the Silver IV/Elite Sea Burial Lotus Flower reached Gold, it would get another attribute, which would broaden the uses of the Sobbing Sea Crystal.

The deep-sea Sobbing Sea Crystal that the Moon Empress had mentioned should be of the water-type and wood-type. Otherwise, it wouldn't have prevented the four Island Whales in slumber from hatching out of their energy eggshells.

In Lin Yuan's opinion, the most suitable place for the Sea Burial Lotus Flower to survive was his Spirit Lock spatial zone's spirit pool. His spirit pool had a never-ending abundance of spirit qi.

The Sea Burial Lotus Flower only needed to absorb the abundant spirit qi constantly and didn't have to plunder energy from the Bone Lotus Flowers.

It just needed to produce and condense the Sobbing Sea Crystal at ease. Thus, Lin Yuan didn't want the Sea Burial Lotus Flower to suffer the slightest damage.

When the Mother of Bloodbath heard Lin Yuan tell it to stop, it gazed at him in confusion.

The area covered by the Sea Burial Lotus Flower's ramets was extremely wide. If he didn't search within a certain range, it would not be easy to find the Sea Burial Lotus Flower's body that was very good at hiding.

Lin Yuan had been using Morbius' True Data.

Although True Data didn't have the function of locating and searching, Lin Yuan could rely on it to scan a large area of Bone Lotus Flowers while relying on the data to find the hidden Sea Burial Lotus Flower.

After Lin Yuan swam toward the sea surface and emerged, he waved at the four Hurricane Owllet Moths. They manipulated the wind energy to bring Lin Yuan back to mid-air and then blew dry his moon-white spirit qi clothes.

Lin Yuan observed the four Hurricane Owllet Moths' actions and confirmed that this was not their intelligence. Rather, Liu Jie had allowed the Insect Queen to impart its intelligence to the Hurricane Owllet Moths and control them to cooperate better with his actions, .

The Mother of Bloodbath surfaced from the sea, and Lin Yuan said to it, "I'll let the Hurricane Owllet Moths fly me around the sea twice and look for the location of the Sea Burial Lotus Flower from the surface."

When the Mother of Bloodbath heard Lin Yuan's words, it only felt like giving Lin Yuan some fruits and feeding him a few big hawthorns and jujube.

If Lin Yuan could find the Sea Burial Lotus Flower hidden among the Bone Lotus Flowers at the bottom of the sea, it would rather not eat the finger-licking chicken in the future!

Lin Yuan ordered the Hurricane Owllet Moths to slow down as they carried him in circles to search.

He found that looking at the vast blue sea with the sea breeze blowing while flying over the sea felt good. The dead silence of the sea seemed to carry a different kind of romance under this blue sky and breeze.

After searching for a long time, Lin Yuan locked on his target, and a happy smile emerged on his face.

Lin Yuan said to the distant Mother of Bloodbath with a wave of his hand, "Mother of Bloodbath, the Sea Burial Lotus Flower is just below this location!"

After saying that, Lin Yuan took the lead and jumped into the sea.

The Mother of Bloodbath rolled its eyes again, thinking that Lin Yuan wasn't really smart at this point. However, it also jumped into the sea.

The Mother of Bloodbath subconsciously explored the sea bottom. Although the Mother of Bloodbath was doubtful about Lin Yuan's words, it still subconsciously believed him.

In the middle of the search, the Mother of Bloodbath fixed its gaze on Lin Yuan like looking at an immortal, and thought, This is really something! You can see the Sea Burial Lotus Flower's body hidden so deep at the sea bottom from above the surface.

Are your eyes magnets that are specially made for attracting the Sea Burial Lotus Flower?

But right after that, the Mother of Bloodbath raged in its heart, Damn! Lin Yuan really found the Sea Burial Lotus Flower. Does that mean that I can't eat the finger-licking chicken anymore!?

**Chapter 457: 10,000 Times More Disgusting!**

While the Mother of Bloodbath was raging in its heart, it didn't hesitate with its actions. Three intersecting crimson blood-colored waves of energy blasted at the sea bottom full of Bone Lotus Flowers.

The bottom of the sea where Lin Yuan's gaze reached was blasted by these three crimson blood-colored waves of energy, forming extremely deep ravines.

The Bone Lotus Flowers turned into white shreds, and the pale-white powder drifted in the seawater like extremely cold snow in the sea.

The Mother of Bloodbath happened to enclose the Sea Burial Lotus Flower's body at the center of the three intersected blood-colored waves of energy. This disconnected it from the vast majority of the Bone Lotus Flowers.

Lin Yuan then saw a strange movement in that small area. The Bone Lotus Flowers suddenly danced at the sea bottom like spirit snakes that probed out in search of the enemy that had just attacked them.

Lin Yuan knew that carcinoma feys like the Sea Burial Lotus Flower were not intelligent. A lifeform like it only possessed the instinct of avoiding harm.

Its reaction was exactly the subconscious emergency response of a lifeform in the face of danger.

The Silver IV Sea Burial Lotus Flower couldn't do anything with a Myth Breed fey like the Mother of Bloodbath around.

The Mother of Bloodbath flew into those dancing Bone Lotus Flowers and ignored the attack from the Bone Lotus Flowers' center.

It stretched out its hand and pushed aside from inside the Bone Lotus Flowers.

Lin Yuan saw the Mother of Bloodbath grab a delicate lotus flower from the Bone Lotus Flowers. It was white in color, including its stem and leaves.

This white did not have a deathly pale feeling like the Bone Lotus Flowers. Rather, there was a glistening sense of sacredness, causing people to have reverent thoughts.

It was really hard to imagine that such a small thing would be the devil that swallowed the sea and made it barren.

What was under the sacred-like white lotus flowers were not the lotus roots but a green crystal smaller than Lin Yuan's thumb on the rhizome.

This green crystal must have relied on all the energy in this sea to nurture the wood-type Sobbing Sea Crystal that simply had too many uses.

Lin Yuan suddenly thought of the Jasmine Lily, but it was a bit too extravagant to give Jasmine Lily the Sea Burial Lotus Flower's Sobbing Sea Crystal to raise its quality. That's right. This was extravagant even in the eyes of people like Lin Yuan, who wouldn't hesitate to spend more resources to become stronger.

He still needed to think about how to use this wood-type Sobbing Sea Crystal.

After all, the Jasmine Lily could improve its quality from Fantasy I with many spiritual materials. It was not necessary to have this wood-type Sobbing Sea Crystal.

The Mother of Bloodbath flashed to Lin Yuan's side, with its hair dancing in the seawater. Its usually expressionless face betrayed a rare and obvious hint of joy.

"Lin Yuan, the energy contained in the wood-type Sobbing Sea Crystal is truly a sacred item for wood-type feys. This Sea Burial Lotus Flower can be considered the rarest item I've seen other than a sacred source lifeform."

The Mother of Bloodbath could not help but exclaim.

When the Mother of Bloodbath mentioned the sacred source lifeform, Lin Yuan became a little curious and asked, "Mother of Bloodbath, you've seen a sacred source lifeform? How powerful is that?"

Lin Yuan had heard the Moon Empress talk about the sacred source lifeforms. Although he had learned about the sacred source lifeforms' origin, he never had the chance to see them.

So far, the sacred source lifeform that Lin Yuan knew was Ostrich Logistics' Spatial Mother Shellfish.

Upon hearing that, the Mother of Bloodbath's eyes flashed with longing.

"The sacred source lifeforms' true power never lies in their attack ability, but in the functionality of absolute authority.

"I also don't know if I'll have the chance to be promoted from Myth Breed to Creation Breed or obtain a sacred source lifeform to contract after becoming a Creation Breed."

The Mother of Bloodbath added, "Although the power of a sacred source lifeform never lies in their attack ability, none of them is weak at attacking."

Lin Yuan could feel the Mother of Bloodbath's longing for the sacred source lifeform.

Moreover, when the Mother of Bloodbath became a Creation Breed, it could contract a sacred source lifeform.

Lin Yuan asked softly, "Since feys can contract a sacred source lifeform when they reach Creation Breed and above, can they contract source-type lifeforms?"

The Mother of Bloodbath shoved the Sea Burial Lotus Flower in its hand to him, rolled its eyes, and said, "Feys naturally cannot contract source-type lifeforms, but both humans and feys can contract sacred source lifeforms.

"I mentioned striving to contract a sacred source lifeform after ascending to a Creation Breed because it's impossible to get a sacred source lifeform with Myth Breed strength."

The Mother of Bloodbath felt that Lin Yuan was getting less intelligent. How could he forget such common sense that feys couldn't contract source-type lifeforms?

Looking at the Mother of Bloodbath rolling its eyes madly, Lin Yuan touched the back of his head with some embarrassment.

When he was about to speak, Lin Yuan suddenly felt an energy fluctuation coming from the space not far above his head.

He and the Mother of Bloodbath looked up at the fluctuating space not far away, and he thought, Is a water world dimensional rift going to open before the active period of the dimensional rift?

But immediately after, Lin Yuan discarded this thought.

The spatial fluctuation in front of him was simply too weak. Even the energy fluctuation when the Class 1 water world dimensional rift opened was much stronger than the spatial fluctuation above his head at this moment. Therefore, this spatial fluctuation should have nothing to do with the dimensional rift.

Lin Yuan and the Mother of Bloodbath headed to the spatial energy fluctuation, ready for some reconnaissance. Unexpectedly, the spatial fluctuations suddenly became stronger when they got closer.

At that moment, numerous water world dimensional lifeforms' carcasses were spat out of this rift at Lin Yuan's face.

If the Mother of Bloodbath hadn't immediately pulled Lin Yuan out of the seawater and floated in mid-air, he would have fainted from the smell of the large batch of high-grade water world dimensional lifeforms' carcasses.

Lin Yuan had lingering fears.

If the smell had attacked his face, it would be no different than being pushed into a shithole. It might even be 10,000 times more disgusting!

#### **Chapter 458: Must Not Be Left Alive**

Lin Yuan finally discovered where the massive quantity of high-grade water world dimensional lifeforms came from.

This place was around 5,000 meters away from the shore. The water world dimensional lifeforms that were below the Gold grade would start to rot and submerge before reaching the shore. Only those above the Gold grade would have the chance to reach the shore through the wave before rotting on the shore.

Lin Yuan looked at the carcinoma fey, Sea Burial Lotus Flower, and understood why its ramets had appeared in this place.

It seemed like it was due to the massive quantity of water world dimensional lifeforms' flesh, which allowed the Sea Burial Lotus Flower to have a feast at the bottom of the seabed. Due to the problem with its mobility, the Sea Burial Lotus Flower had chosen to hide and lay roots in this place.

This scene was definitely a great discovery for Lin Yuan.

The Mother of Bloodbath's expression had turned serious too. She could sense a spatial wave that vanished after all the high-grade water world dimensional lifeforms were unloaded into the sea. She frowned and was contemplating the reason.

After a moment, once there weren't any other water world dimensional lifeform carcasses, Lin Yuan summoned the Ethereal Jellyfish.

As a spatial-type lifeform, the Ethereal Jellyfish could feel spatial nodes even from 1,000 miles away. It had a naturally high sensitivity toward spatial movements.

Lin Yuan was planning to scout with the Ethereal Jellyfish and find out how the spatial wave appeared and unloaded all the water world dimensional lifeforms earlier.

After summoning the Ethereal Jellyfish, it shifted between the spatial zones as it appeared and vanished from time to time.

Just as it wanted to land on Lin Yuan's head, it recalled Lin Yuan's stern warning. The Ethereal Jellyfish then quickly shifted down and landed on Lin Yuan's neck and was particularly satisfied.

When the Mother of Bloodbath saw the Ethereal Jellyfish, she immediately gulped down her saliva. She couldn't help thinking of the cold dish Liu Jie had previously prepared and that wonderful taste of the jellyfish skin and tentacle.

Lin Yuan said, "Ethereal Jellyfish, go and check on all the spatial energy waves in the sea and report to me."

Once the Ethereal Jellyfish received Lin Yuan's order, it immediately flickered on Lin Yuan's neck and produced an image as though it had broken through multiple dimensions as it vanished.

The Ethereal Jellyfish had already appeared in the sea before Lin Yuan and was vibrating the newly grown tentacle to sense the spatial energy waves hidden in the sea.

Lin Yuan used this moment to start handling the Sea Burial Lotus Flower. Lin Yuan didn't harvest the Sea Burial Lotus Flower's wood-type Sobbing Sea Crystals.

The grade of the Sea Burial Lotus Flower was actually determined by the energy contained within the Sobbing Sea Crystals.

If Lin Yuan were to harvest them now, then the Sea Burial Lotus Flower would immediately drop from the current Silver IV/Elite to Normal I/Normal.

Carcinoma fey might also be contracted by spirit qi professionals like regular feys and could even be spirit-locked by Morbius' exclusive skill, Spirit Lock. However, in Lin Yuan's opinion, the Sea Burial Lotus Flower wasn't suitable to be contracted and used for battle.

It was more suitable to be a production fey like the Elemental Shellfish.

The Sea Burial Lotus Flower didn't have intelligence and was only moving through instincts. Thus, Lin Yuan wanted to nurture it in the Spirit Lock spatial zone and restrict it.

The best method to restrict the Sea Burial Lotus Flower was to make it develop a reliance on Lin Yuan's resources.

After leaving the water, the Sea Burial Lotus Flower would constantly weaken. The Sea Burial Lotus Flower wasn't strong to begin with and was actually very frail. If it left the water for too long, it would start to wither, leaving behind the roots that wrapped around the Sobbing Sea Crystals and falling into a narcolepsy state.

Lin Yuan circulated his spiritual power at suitable timings to allow the Sea Burial Lotus Flower to absorb the pure spirit qi from his palm. Each time, Lin Yuan only released a small trace of pure spirit qi before he quickly withdrew it.

Before the Sea Burial Lotus Flower could taste the pleasure, it would immediately lose the pure spirit qi that was just like honey.

The Sea Burial Lotus Flower could absorb all sorts of energy at the seabed, but Lin Yuan's pure spirit qi was definitely an intoxicating attraction for the Sea Burial Lotus Flower.

Every time Lin Yuan stopped circulating the spiritual power in his body, the Sea Burial Lotus Flower would shake its sacred branches and leaves to show its sadness.

It threw tantrums and seemed to be telling Lin Yuan, "You are so bad, I want more spirit qi!"

Lin Yuan was acting just like the ultimate scumbag, causing the Sea Burial Lotus Flower to develop a reliance toward his spirit qi. He was using a withdrawing and giving method to make the Sea Burial Lotus Flower rely on him even more.

After a few repetitions, Lin Yuan placed the Sea Burial Lotus Flower into the Spirit Lock spatial zone's spirit pool.

After entering the spirit pool, the Sea Burial Lotus Flower looked as though it was drunk. It obsessively absorbed the pure and ample spirit qi in the Spirit Lock spatial zone.

Due to the inexhaustible spirit qi in the Spirit Lock spatial zone, the Sea Burial Lotus Flower didn't have to produce any Bone Lotus Flowers to help it absorb energy.

Lin Yuan asked the Gold Wind Speed Rapid Antelope to keep watch by the spirit pool. Once the Sea Burial Lotus Flower had any ideas of producing Bone Lotus Flowers, the Wind Speed Rapid Antelope would immediately use wind energy to disturb their production process.

Inside the spirit pool was the Spirit-Drawing Ichthyosaur, Blackie. It was only Bronze X/Legend and still unable to produce an absolute pressure toward the Silver IV/Elite Sea Burial Lotus Flower.

Once Blackie became a Fantasy Breed, it would be enough to have absolute control over the Sea Burial Lotus Flower.

All of a sudden, the spatial zone beside Lin Yuan shook gently. The Ethereal Jellyfish emerged from the spatial zone and appeared in front of Lin Yuan.

It handed over a black fist-sized ore to Lin Yuan. It felt as though the Ethereal Jellyfish was handing over a treasure as it was using its tentacle to gently stroke the black ore and was obviously fond of it.

Lin Yuan could feel the black ore's spatial energy. As soon as the Ethereal Jellyfish excavated the black ore from the seabed with its two strong and thick tentacles, the Mother of Bloodbath saw something in the sea that caused its eyes to turn still.

The Mother of Bloodbath said in a deep voice, "Someone actually used the Spatial Magnets to set up a magnetic field to hide a spatial zone!"

"The Spatial Magnet is something that only other continents can produce. Why is it here, the sea region governed by the Radiance Federation?"

After hearing the Mother of Bloodbath mentioning other continents, it was unknown why Lin Yuan immediately related it with the pinnacle Myth II crow feat that Mother of Bloodbath and Endless Summer had killed together.

Once the Ethereal Jellyfish handed over the Spatial Magnet, it shook its tentacle toward Lin Yuan to transmit some hazy information.

According to the information, Lin Yuan found out that there were plenty of Spatial Magnets in this sea region.

Lin Yuan said to the Mother of Bloodbath, "Why don't we let the Ethereal Jellyfish dig out all of the Spatial Magnets in this sea region? We will then be able to see what this magnetic field is trying to hide."

The Mother of Bloodbath nodded and said in a cold voice, "Since someone came to set up a magnetic field to hide a spatial zone in the Radiance Federation, they can be considered terrorists no matter what intentions they have.

"Such a person must not be left alive!"

#### **Chapter 459: Support Our Third Lineage**

As the Ethereal Jellyfish searched through the sea in detail, Lin Yuan's collection of Spatial Magnets increased and was already close to 100.

At present, Lin Yuan and the Mother of Bloodbath realized that the range of the magnetic field was truly too wide. As Lin Yuan followed the Ethereal Jellyfish in the air, they were getting further away from the shore.

Soon after, Lin Yuan saw an island that was around 4,000 to 5,000 square meters in size.

The island was abnormally barren, just like the seabed that the Sea Burial Lotus Flower ravaged.

Lin Yuan had heard Listen mention about this barren island before. It was already out of the Listening Heron Chamber of Commerce's territory.

Lin Yuan realized that the Ethereal Jellyfish found an extreme number of Spatial Magnets in the vicinity of the island. Lin Yuan then said to the Mother of Bloodbath, "Why don't we use this island as a checkpoint? I will ask Liu Jie, Listen, and Zhou Luo to come over too."

The Mother of Bloodbath responded. "When coming over to the shore, there were plenty of eyes that were staring at you. You have already been searching on the sea for almost four hours now. I believe that those people with motives wouldn't be able to sit still after finding out you went out to the sea, right?"

Lin Yuan narrowed his eyes and let out a smile. "If they cannot sit still, they will naturally reveal themselves. We shall respond to them by remaining calm."

...

A tall and skinny man was using a cloth made with spirit beast pelt to wipe the chess pieces that had distinct white and black color.

There was a black and white sable on the Creation Master robe of the tall and skinny man. The sable was drooling as it looked at the chess pieces in the man's hand. Its eyes were twisting and turning as it was abnormally spirited.

Zheng Jiangliu looked at the sinister-looking youth beside him and said with an impatient tone, "Wenbo, what are you saying? Is your Grandpa Jiao someone you can command as you please?"

Zheng Wenbo looked like a frozen eggplant. Zheng Wenbo's sinister eyes and vicious eyes would nearly ooze out as soon as he recalled what had happened during the day at the Indigo Azure Sea Market.

The elder with the straight back and cedar aura used his hand to rub on Zheng Wenbo's head and said, "I have watched Wenbo grow up from a baby, and I understand his temperament. If he hadn't suffered a great embarrassment, he would never have talked like that."

Zheng Jiangliu asked softly, "Uncle Jiao, are you sure that there isn't any emperor-class expert with the youth and Listen?"

Zheng Jiangliu was abnormally friendly and didn't act as sternly as he acted toward Zheng Wenbo.

The elder then said with a composed expression, "I didn't feel any powerful presence beside that youth. Unless the opposition's strength is significantly higher than mine, I will not be able to sense their presence.

"Even if my Cold Snow Pine isn't adept at sensing among the support-type feys, its exclusive skill has a certain level of detection. Therefore, my senses are normally correct."

Zheng Jiangliu was still a little apprehensive and was hesitating on how he should make his decision.

According to what Elder Jiao had said earlier, the youth with the mask wasn't someone simple. The mask he wore was made with threads of completely jade-textured wood.

But after thinking that Zheng Wenbo had actually had the intention to hide the opposition's foundation while asking him to send out people to kill the opposition to take revenge for his embarrassment, Zheng Jiangliu was a little anxious.

Why do I have an incompetent son that only knows how to act with his emotions?

When recalling the loss of Elder Niu, Zheng Jiangliu felt the rage building up in his heart.

Zheng Jiangliu turned to look at the tall and skinny man as he asked with a smile, “Second Young Master, I wonder if you think I shall make a move on the Listening Heron Chamber of Commerce’s Listen now and kill their group.

“I can then take control of all the coastal sea resources in Indigo Azure City and quickly give the 50% profit to Second Young Master.”

The skinny youth didn’t even look up as he was still wiping the chess pieces. He replied without answering the question, “Third Uncle, the chess pieces you brought me this time have some nice patterns. They’re rather good.”

When Zheng Jiangliu heard the reply, his smile froze. However, the skinny youth spoke again. “Since Third Uncle is so willing to split 50% of the coastal sea’s profit with me, then I cannot sit by the side without giving ideas while watching Third Uncle fretting.

“Actually, I feel that Wenbo is a good child and cannot be embarrassed like that.”

While speaking, the skinny youth noticed the sable drooling as it looked at the chess piece in his hand. He then let out a gentle smile as before and tossed the chess piece to the sable. “This little fellow, you are already hungry in less than two hours? I just fed you before we came, and you are already looking for snacks. Aren’t you afraid of getting fat?”

When Zheng Jiangliu saw the skinny youth tossing the completely jade-textured chess piece to the fey, his face twitched twice. After all, he had painstakingly obtained those chess pieces. At the same time, thoughts were rapidly flying through his mind.

The Second Young Master’s meaning was clear—he should make the move. However, the Second Young Master had only said to make the move, but he hadn’t said he would help.

At present, Zheng Jiangliu only had one emperor-class expert, Uncle Jiao, who he could mobilize.

Zheng Jiangliu was still worried about making Uncle Jiao move out alone as there might be risks.

After all, the death of Elder Niu, a pinnacle king-class expert, was already a strong warning. If Second Young Master could send an expert to move along with Uncle Jiao, it would be good.

The skinny youth looked up and saw Zheng Jiangliu’s serious expression. He raised his brows as though it was nothing.

Just as he was about to speak, there was a knocking sound at the door.

When Zheng Jiangliu heard the knocking sound, he yelled, “Elder Feng, Second Young Master is here, and you dare to knock and disturb? What are you doing!?”

While speaking, Zheng Jiangliu was a little puzzled. The housekeeper, Elder Feng, had been working with him for at least 20 years. Why would he knock on the door to disturb him now? Something important must have happened.

As expected, Elder Feng's anxious and hurried voice echoed. "Master, there is really something important to report."

Immediately after, Zheng Jiangliu turned to look at the skinny youth seated beside him. The skinny youth took up another white chess piece to feed his sable as he said indifferently, "Third Uncle, please go ahead."

After receiving the skinny youth's permission, Zheng Jiangliu yelled toward the door. "Enter!"

After opening the door, the anxious-looking Elder Feng bowed to the Second Young Master first before he quickly walked beside Zheng Jiangliu and whispered in an extremely soft voice. "After the Listening Heron Chamber of Commerce's Listen left with the two masked youths, they headed for the coastal sea under the Listening Heron Chamber of Commerce's control.

"Our spies just came back to report that they have already visited the barren island that is at the coastal sea's outer borders."

Zheng Jiangliu's eyes widened.

Zheng Jiangliu turned around with an abnormally determined expression that had some anxiety.

Unlike the earlier hesitation, he was now like a changed person. "Second Young Master, if my third lineage moves out alone, there might be risks. I wonder if Second Young Master can send an emperor-class expert to support us in the dark."

#### **Chapter 460: Nightmare VI**

The tall and thin man ignored the sudden change in Zheng Jiangliu's attitude. He seemed to be a little sleepy, so he reached out to cover his mouth and yawn. "I can send someone to do it. I want 60% of the coastal sea resources that the third lineage controls, and you take 40%."

Upon hearing that, Zheng Jiangliu's eyes became increasingly gloomy, but he promised very quickly.

"We'll do as Second Young Master says!"

The tall and thin man chuckled and stood up to pick up the black-and-white sable before saying, "Since Third Uncle is so enlightened, I, Zheng Kaiyuan, am not a stingy person."

He then clapped his palm twice.

With that, a humanoid figure covered in a cloak suddenly appeared by Zheng Jiangliu's side, startling Zheng Jiangliu.

Zheng Kaiyuan said, "Nightmare VI, please go with Third Uncle."

The voice of Nightmare VI, who was clad in a black robe, was unusually hoarse as if he was speaking with a mouthful of sand.

"Yes, Second Young Master."

After saying that, he hid once again. It was as if he had never appeared before.

Zheng Kaiyuan raised his eyes and looked at Zheng Jiangliu as he stretched.

“Third Uncle, I’ll be waiting for a constant stream of income from your side of the coastal sea. I hope Third Uncle won’t have so many more accidents. What I, Zheng Kaiyuan, hate the most is accidents.”

After saying that, Zheng Kaiyuan left.

After he left, Zheng Jiangliu scanned the space in the house and felt appalled. Zheng Kaiyuan had called the cloak-wearing figure that had just appeared Nightmare VI.

Could he be a member of the Nightmare Squad that the Zheng family had spent half of its resources to nurture to protect its direct descendants?

Rumor had it that the Nightmare Squad had a total of nine members. They all had emperor-class strength, each with superior abilities.

I to III protected the Eldest Young Master, IV to VI, and VII to IX protected the Second Young Master and Third Young Master, respectively.

He didn’t expect that Zheng Kaiyuan would actually use a member of the Nightmare Squad to provide support to the third lineage.

At this moment, Zheng Jiangliu felt greatly settled and didn’t have the slightest worry.

However, at the thought of the extra 10% of coastal sea resources that Zheng Kaiyuan wanted after the development, Zheng Jiangliu felt that his heart, liver, spleen, lungs, and kidneys all hurt.

...

Liu Jie, Listen, and Zhou Luo arrived on this deserted island all the way from the sea. When they passed by the sea, they naturally felt its desolation.

Be it Liu Jie, Listen, or Zhou Luo, none of them knew what had happened in the sea that had caused it to be so desolate.

After the Mother of Bloodbath had removed and taken the Sea Burial Lotus Flower out of the water, the Bone Lotus Flowers that spread across the sea bottom had all withered and turned into a dead frost and snow that offered their final elegy for the creatures of the sea bottom.

Although Liu Jie was a Radiance Hundred Sequence member and could go to the Radiance Sacred Hall to go through information from time to time, he didn’t have much understanding of carcinoma feys.

If Lin Yuan hadn’t happened to hear the Moon Empress mention the Sea Burial Lotus Flower, he wouldn’t have guessed that he might have encountered a Sea Burial Lotus Flower from a single encounter between Red Thorn’s vine ramets and the Bone Lotus Flowers.

It had to be said that he had a master with extraordinary insight and knew everything, which really allowed him to widen his horizon.

If the Moon Empress, who was far away in the Radiant Moon Palace, heard Lin Yuan’s thoughts at this moment, she would definitely be rendered speechless and say to him, “Disciple, compared to insight and knowledge, I’m powerful and rich.

“So can you stop being so independent!

“Isn’t it good to rely on your Master?”

At present, the Ethereal Jellyfish was happily working hard at the sea bottom. However, it didn’t give the Spatial Magnets to Lin Yuan immediately after finding one.

Instead, it piled all of them in a specific location on the sea bottom.

As the Ethereal Jellyfish dug out more and more Spatial Magnets, the magnetic force field became weaker and weaker. It was more difficult for the Ethereal Jellyfish to discover the Spatial Magnets buried at the sea bottom.

Fortunately, the Spatial Magnets could attract each other, and the large number of Spatial Magnets piled at the sea bottom could help the Ethereal Jellyfish dig for other Spatial Magnets. This made the Ethereal Jellyfish’s search for Spatial Magnets more efficient.

Zhou Luo commanded his Diamond I/Fantasy I Lava Dragon Lizard, trying to get it to go in the water. When the Lava Dragon Lizard had been a Lava Iguana, it used to find water repulsive because it had been an earth-type fey.

Furthermore, it had not been good at fighting in the sea. However, it had awakened its dragon-species lineage and turned into a Lava Dragon Lizard.

All dragon-species feys were amphibious feys that could deal with fighting in the water and on land at the same time.

The Lava Dragon Lizard clumsily descended into the sea under Zhou Luo’s command and was somewhat reluctant at first. It lowered its head and also whipped the ground with its tail from time to time, just like using a hammer on a burly man, but Zhou Luo hurriedly coaxed it.

“Good boy. Don’t wheedle. Dive into the sea. You should be very skilled.”

After being forced to dive into the sea, the Lava Dragon Lizard was obviously a little panicked. After all, it was its first time diving into the sea. However, it found that the sea was so much fun after a few swimming attempts.

It was unwilling to go to the shore after playing in the sea. The Lava Dragon Lizard’s change stunned Zhou Luo.

Liu Jie was about to let the Insect Queen set up the insect swarm on the desolate island, but Lin Yuan stopped him.

The Insect Queen’s sea of insects was not good at fighting in the sea. Its core unit was the Flesh-Mincing Blade Insects, which would drown in the seawater within a few minutes and was completely unable to survive in it.

It could be said that Liu Jie was a non-swimmer and was only suitable for land combat. Previously, Liu Jie had created a lot of Lightning Gathering Moths and Hurricane Owlet Moths, which he had also brought over when he came to this island. These Lightning Gathering Moths and the Hurricane Owlet Moths were enough.

When Listen saw Zhou Luo let the Lava Dragon Lizard play in the sea and recalled that there were no living creatures in this sea, meaning there wouldn't be any danger, he summoned his two contracted feys.

Lin Yuan saw the Bronze X Pain Illusory Fox that he had previously exchanged with Listen had reached Silver VII/Fantasy I. In addition to the Pain Illusory Fox, Listen actually had a Silver III/Fantasy I Three-Tailed Crimson Fox.

The Three-Tailed Crimson Fox's aptitude was actually better than the Pain Illusory Fox's.

It would grow a new tail with every huge promotion in its grade and was considered to have an extremely noble bloodline among the fox feys.

Lin Yuan realized Listen's aptitude could really be called excellent. Moreover, Listen was only 24 years old this year and was a dazzling presence in the younger generation.

Lin Yuan couldn't help but think about recruiting Listen into his new Dome guild club. After all, the guild club's main team for the S Tournament consisted of only him and Liu Jie.

At that moment, the wind suddenly picked up above the sea. The freezing sea breeze blew Lin Yuan's moon-white spirit qi clothes, and an eagle cry suddenly resounded above the sea.
