

Merchant 471

Chapter 471: Mother Spider's Sixth Sense?

The Mother of Bloodbath noticed Lin Yuan eyeing its injury. Its emotionless countenance was replaced with a warm smile.

The Mother of Bloodbath placed Jian Hanzhong's Diamond Fey storage box in Lin Yuan's hand and said, "Nightmare VI isn't dead yet. Its mind is just in pieces because of Sister Summer's attack."

Lin Yuan looked suspicious. The Mother of Bloodbath explained, "You can take Nightmare VI's current condition to be similar to that of a vegetative state in human terms."

The Mother of Bloodbath started to gesture as it continued. "I'm going to help Sister Summer with the Cold Snow Pine. The Cold Snow Pine's pine needles are rather valuable. I'll dissect the Nightmare VI later when I've regained my maximum power."

The Mother of Bloodbath saw that Lin Yuan's expression had shifted.

Lin Yuan had placed half his attention on the Ethereal Jellyfish and sensed it digging continuously on the ocean floor.

At that moment, he sensed that the Ethereal Jellyfish had already dug out all the Spatial Magnets in the ocean floor.

When added to the 100 pieces he already owned, the Ethereal Jellyfish had managed to dig up 500 Spatial Magnets.

However, what caused Lin Yuan to frown was not the large quantity of Spatial Magnets.

It was because there was something hidden behind the Spatial Magnets' magnetic field.

There was another more complex hidden technique underneath it.

Compared to the more complex hidden technique, the 500 Spatial Magnets were peanuts.

The Mother of Bloodbath saw Lin Yuan's tightly drawn together brows and asked, "Is something wrong?"

Lin Yuan relaxed his brows and responded, "I tasked the Ethereal Jellyfish with searching for Spatial Magnets in the ocean floor. It dug up a total of 500 pieces. However, below the Spatial Magnets lies an enormous net made of Floating Silver Strands."

The Mother of Bloodbath fell silent.

Who would go through the immense trouble of setting up such a project in the coastal sea so close to Indigo Azure City?

Floating Silver could definitely count as one of the extremely valuable spiritual materials. It had spatial characteristics, which were rare in metal spiritual ingredients.

Whoever had put the Floating Silver Strands in place had to have done so very early on.

At the very least, it had to be done before the carcinoma fey, Sea Burial Lotus Flower, appeared.

Otherwise, whoever had set up the Spatial Magnets and Floating Silver would have captured something as precious as the Sea Burial Lotus Flower.

Lin Yuan analyzed the chain of events.

If we didn't come to the Listening Heron Chamber of Commerce's coastal sea to investigate, we would not have stumbled upon the Sea Burial Lotus Flower. I would not have dove underwater and coincidentally experienced the unusual spatial tremors when the water world dimensional lifeform was spat out. It was after the unusual spatial tremors that I released the Ethereal Jellyfish to investigate. Soon after, the Ethereal Jellyfish found the first Spatial Magnet and discovered the complex hidden techniques below.

The Mother of Bloodbath was quiet for a while before speaking. "Floating Silver can perfectly divide spatial tremors, giving it countless applications. Who knows what lies under the net of Floating Silver Strands. Although we are only two days away from the dimensional rift, I think we should tear it down. With me and Sister Summer around, despite the dimensional rift, the losses will be minimized."

The Mother of Bloodbath kept a thought to itself.

The Radiance Federation did not produce the 500 Spatial Magnets. The fact that their origins are unknown is cause for concern. If not looked into thoroughly, there could be untold dangers.

The Mother of Bloodbath had a feeling that a prodigious secret was being kept underneath the net of Floating Silver Strands.

It shook its head, forcing the thought out of its mind.

As a Suzerain/Myth II fey, it was accustomed to using strength to establish the pecking order.

When did it start to become disillusioned by the Mother Spider's sixth sense?

The space beside Lin Yuan's started to distort vigorously. The Ethereal Jellyfish's silhouette started to glow bright red.

The Ethereal Jellyfish's silhouette solidified and landed expertly on Lin Yuan's neck.

It extended two strong feelers, waving them around.

The Mother of Bloodbath could not help but giggle at the sight.

The bright red Ethereal Jellyfish was hanging off Lin Yuan's neck, with its two feelers dangling and twirling.

It looked like two braids were protruding from Lin Yuan's head, dancing in the wind.

The braid was red, which used to be Endless Summer's favorite.

Lin Yuan hastily plucked the Ethereal Jellyfish from his neck.

Lin Yuan was already made aware of the conundrum the Ethereal Jellyfish had encountered when it tried to clear the Floating Silver Strands.

Due to the Sea Burial Lotus Flower's casual extraction of the energy from the ocean floor, the structure of the seafloor had undergone foundational changes.

As a result, a large volume of Floating Silver Strands was stuck in the rock crevices in the seafloor.

It could not pull out the Floating Silver Strands from the rock crevices even when using its two strong feelers.

The Ethereal Jellyfish would need help in order to clean out the Floating Silver Strands from the ocean floor.

Zhou Luo's contracted fey, Lava Dragon Lizard, would be the most suitable.

Lin Yuan instructed Zhou Luo, who was standing next to him.

Zhou Luo ordered the Lava Dragon Lizard to go underwater and randomly stomp around on the ocean floor, damaging the rocks which were holding the Floating Silver Strands down.

This greatly expedited the rate at which the Ethereal Jellyfish collected the Floating Silver Strands.

According to Lin Yuan's calculations, after the dimensional rift in two days, the collection of the Floating Silver Strands should have been completed.

It was then that they would find out what unsavory secrets lay under the complicated web.

The Ethereal Jellyfish needed constant assistance with the Floating Silver Strands. Moreover, the newly Suzerain/Myth II Snow Pine Chill and Nightmare VI, which was already at the peak of Suzerain/Myth II, had not been taken care of. The most optimal option was to stay on the island for two days.

Lin Yuan would be able to use the two days to rest.

Only after nurturing his sister into an iron bucket would the Vajra Butterfly and Obsidian Iron Wild Bull be able to establish a perfect connection.

He was going to start tempering the fairy source-type item Burning Sunflower he had traded.

Chapter 472: I Miss Him

South of Flame City, at the Scorching Volcano District...

Even in winter, the temperatures never dipped below 40 degrees here.

Temperatures could climb up to about 50 degrees in the summer.

It was comparable to the temperatures in the Class-2 abyss dimensional rift.

The difference was that the number of plants in Flame City's Scorching Volcano District trumped that of the Class-2 abyss dimensional rift manifold.

Numerous plants that thrived in hot weather took root here.

A large number of plant feys leached spirit qi from the constant flow out of the magma.

Thus, the spirit qi in the area was much thicker than in other places.

This resulted in many wood-type plant feys, which originated from other areas, evolving into wood-type and fire-type after spending time in the Scorching Volcano.

These wood-type and fire-type plant feys became Flame City's specialties.

A young girl wearing a Redbud Intermediate Spirit Qi Academy uniform stood next to a massive sienna-colored rock.

She was commandeering an all-black, metal-lined wild bull that was charging amongst a group of Silver Fire-Spotted Wolves.

The Fire-Spotted Wolves were covered with brown fur that was messier and sparser than other wolf-type feys.

After all, a thick coat of fur was disadvantageous to feys who lived in such a high-temperature environment.

Flecks of red were dotted all over the brown fur, and they emanated fire energy.

Suddenly, a Fire-Spotted Wolf larger than the rest howled.

Other than the Fire-Spotted Wolf, which had its head smashed in by the black rampaging bull, the red spots on the rest of the Fire-Spotted Wolves lit up simultaneously.

The scarlet flames jetted out of the Fire-Spotted Wolves' jaws toward the wild black bull.

The young girl dressed in the Redbud Intermediate Spirit Qi Academy uniform was Chu Ci.

When she saw the flames closing in on the Obsidian Iron Wild Bull, her eyes lit up, and she exclaimed, "Obsidian Iron Wild Bull, use Pain Buffer."

The Obsidian Iron Wild Bull's originally black body radiated a gem-like luminescence—the legendary rainbow black color.

The Fire-Spotted Wolves' flames descended upon the Obsidian Iron Wild Bull but failed to burn it. Instead, it seemed to be subsumed by the Obsidian Iron Wild Bull's glowing skin.

The Fire-Spotted Wolves' attack caused the ground around the Obsidian Iron Wild Bull to sizzle.

However, the Obsidian Iron Wild Bull appeared totally unaffected.

Flames wrapped around the Obsidian Iron Wild Bull as it charged toward the Fire-Spotted Wolves, whose red spots had dulled.

The Fire Spotted Wolves flew into a state of panic, having not expected their attack to fail.

Faced with the fire-covered Obsidian Iron Wild Bull, the Fire-Spotted Wolves knew they were in trouble.

The head of the pack bolted off in fright, despite the injury to its hind legs.

The ferocious Obsidian Iron Wild Bull suddenly let out a pained roar.

After the gem-like luminescence around the Obsidian Iron Wild Bull disappeared, the flames quickly started to consume its body.

When the Obsidian Iron Wild Bull was being burned, dots of green lights full of vitality appeared all over its body.

Chu Ci, who was standing off to the side, scrunched her face with worry and heartache.

The Vajra Butterfly that was on Chu Ci's shoulder fluttered its wings.

At that moment, a pair of white marble-like hands patted Chu Ci's shoulders.

A frost-covered woman carrying an air of immortality gently spoke to Chu Ci. "Don't worry. The ability Pain Buffer, which your Bronze/Fantasy Breed Obsidian Iron Wild Bull advanced to Silver, is equipped with Pain Absorption. It is more than capable of taking this amount of damage. Besides, because it often feeds on metal spiritual ingredients, it allowed it to build its tolerance against flames like this and increased its body's durability."

Chu Ci's worries seemed to be significantly alleviated. However, the same could not be said about the heartache she felt.

"The Obsidian Iron Wild Bull has already reached Silver/Fantasy I. I think my fighting abilities have improved considerably and will not be increasing anytime soon. It's about time for us to go back," said Chu Ci.

Cold Moon looked at Chu Ci in admiration.

In the beginning, she had only come to Redbud City because of the Moon Empress' order.

Cold Moon had long become resigned to the fact that Lin Yuan was Moon Empress's disciple.

Chu Ci was only riding on Lin Yuan's coattails.

However, after spending time with her, Cold Moon had realized that the ostensibly docile girl was actually extremely determined.

When she made her mind up about something, she was willing to put in more effort than anyone else in order to see it through.

She possessed a resilience well beyond her age of 15 years.

Cold Moon initially intended to take Chu Ci out on a training excursion during the holidays.

However, Cold Moon realized that when she trained Chu Ci, she was merely performing the responsibility of a guardian.

Chu Ci took care of every other aspect, even wilderness survival. She would even prepare Cold Moon's share.

Cold Moon thought back to when she had first glimpsed Lin Yuan's information, which included a section on Chu Ci.

The siblings support each other and remain steadfast despite the trials they undergo. It's heartbreaking to watch them.

Cold Moon reached out her arm and gently pressed down the two stray hairs on Chu Ci's head as she asked, "Do you miss your brother?"

Chu Ci answered honestly, "It's been four months since I last saw Lin Yuan. I miss him."

Cold Moon felt a pang in her heart. She could feel the deep sibling bond in Chu Ci's words. It was sincere and warm.

Chapter 473: Chu Ci's Master

The fire enveloping the Obsidian Iron Wild Bull had nearly dissipated.

Although the Obsidian Iron Wild Bull had managed to sustain the damage, its entire body had been charred black. It was clearly severely injured.

The Obsidian Iron Wild Bull snorted and stood its ground. It watched as the Fire-Spotted Wolves in the distance changed to a crimson red color.

A strong wave of energy shot out of the Obsidian Iron Wild Bull's eyes toward the Fire-Spotted Wolves.

The fleeing Fire-Spotted Wolves' heads exploded, and they collapsed on the ground, dead.

Cold Moon gasped in awe.

"The Obsidian Iron Wild Bull might only be Silver/Fantasy I, but after it takes enough damage, its exclusive skill Annihilation Gaze will be able to attain power comparable to a Gold/Fantasy Breed.

"Amazing!"

If there was someone around who recognized Cold Moon, their jaws would drop for sure.

Cold Moon was infamous for her arrogance. She even had the courage to speak her mind in front of the Moon Empress.

Obviously, Cold Moon greatly admired the Obsidian Iron Wild Bull.

Cold Moon could not help but be curious.

Where did Lin Yuan find such a treasure for his sister? It's so sturdy and strong. It's capable of handling a lot of hits and possesses impressive defensive abilities. Its abilities will exponentially boost Chu Ci's power once it improves its strength. All the Fantasy Breed feys counteract each other in terms of their differing talent, bloodline, abilities, and exclusive characteristics. This results in larger differences in their power. There are very few feys amongst Fantasy Breeds that can distinguish themselves.

The Obsidian Iron Wild Bull's exclusive skill, Pain Absorption, strengthened its other exclusive skill, Annihilation Gaze. The ability Pain Buffer, which the Obsidian Iron Wild Bull learned during Silver grade, requires it to get hurt.

However, during the time when the Obsidian Iron Wild Bull starts to buffer the damage, it can use the pain to strengthen itself.

When paired with Iron Horn, it combines the damage that the Obsidian Wild Bull is about to receive with its innate attacking power and focuses it on its target.

The Obsidian Iron Wild Bull does not seem like a regular defense-type fey. Although Pain Buffer is definitely a defensive ability, it turns into a whole new beast when utilized by the Obsidian Iron Wild Bull. Especially when directed by Chu Ci, its power becomes out of this world!

Cold Moon's praise elicited a wide beam from Chu Ci, who said, "Lin Yuan is the one who gave me the Obsidian Iron Wild Bull."

Cold Moon could feel Chu Ci's pride and joy from her words.

"Since we're here at the Scorching Volcano District, why don't I mine some Shining Ores for your Obsidian Iron Wild Bull? It might help the Obsidian Iron Wild Bull promote its grade," said Cold Moon.

She went on to explain, "Shining Ores only have efficacy when freshly mined from the Scorching Volcano. Once it cools, it turns into an ordinary ore and loses the ability to promote the Obsidian Iron Wild Bull's grade. It takes about two days to mine Shining Ore and promote the Obsidian Iron Wild Bull's grade. We can go back after two days."

Chu Ci knew that this opportunity was rare. If they did not mine the Shining Ores now, they would need to return at a later date if they ever wanted to do so.

However, Chu Ci also had her doubts.

Using spiritual ingredients to improve a Fantasy Breed fey's grade required the help of a Creation Master.

It was because the elevation of Fantasy Breed feys' grade also needed pure spirit qi, which only a Creation Master could produce.

Could Cold Moon also be a Creation Master?

Cold Moon noted the conflict and quizzical expression on Chu Ci's face. Her frost-covered face split into a gentle smile.

Cold Moon usually could not be bothered to give others the time of day, but she was exceptionally patient with Chu Ci.

"Yes, I'm a Creation Master. Why don't you become my disciple?"

A blush bloomed across Cold Moon's cheeks.

Her face tensed as her expression grew cold.

Cold Moon was slightly embarrassed. Why did she spill her honest thoughts all of a sudden?

As someone who was not adept at expressing herself, she felt as anxious as someone with acrophobia that had just sat through a three-day cable car ride.

Cold Moon did not expect herself to become so nervous after blurting her true feelings.

Chu Ci smiled warmly as she took on an oddly serious demeanor and said, "Greetings, Master."

Cold Moon was instantly stunned!

Not once had she revealed her identity to Chu Ci, nor had she demonstrated her power as a pinnacle Class 4 Creation Master.

Although she did use her powers once in front of Chu Ci, she merely exhibited Platinum-level power to scare off the cheetahs from the field of fire.

Yet, Chu Ci agreed to become her disciple without hesitation.

Cold Moon was surprised and touched. She suddenly realized why the Moon Empress had taken Lin Yuan as her disciple.

She instantly felt like a different person. The urge to cook rose within her.

At that moment, Cold Moon was even willing to hand-make the pot.

Cold Moon solemnly but gently asked Chu Ci, "Why?"

Chu Ci's eyes shone.

"Because you're the only person in this world besides my brother, who I regard as family."

Cold Moon hung her head and was silent for a while.

When Cold Moon lifted her head, her eyes shone with the same brightness that was in Chu Ci's eyes.

When they arrived at the Scorching Volcano's entrance, Cold Moon waved.

Moments later, along with the flowing magma and intense heat, a layer of chilling frost covered the entire Scorching Volcano District.

Then a 100-meter-long enormous dragon emerged from the sky.

The gigantic dragon did not roar. But its silence carried the majesty and ferocity unique to dragon-species feys.

Cold Moon instructed the dragon, "Icy King Dragon, you stay here and protect my precious disciple."

The Icy King Dragon was visibly stunned for a second before it transformed into a young man wearing a light blue robe.

The young man had breathtaking features. His eyes resembled that of Cold Moon's.

Cold Moon leaped into the air and flew toward the Scorching Volcano's entrance.

Cold Moon suddenly realized something.

Now that both the Moon Empress and myself have disciples, isn't Mystic Moon the only one left without one? I'll have to share with her how wonderful it feels to have a precious disciple when I return.

Chapter 474: Specialty Suona

Lin Yuan, who was on the deserted island, felt the weight of the two small crystals resting in the center of his palm. A wave of distress washed over him.

It would be a waste if I did not make use of such a treasure.

Lin Yuan held up one of the crystals.

Flickers of azure swam inside blinding ivory, while flames of ice seemed to jump within the crystal.

The crystal's interior seemed to coalesce and dissipate continuously. Despite the enthusiastic leaping of the icy flames, it emanated a strange frigidness.

Two subtle streaks of gold revealed the identity of the crystal.

While the Mother of Bloodbath was busy handling the Cold Snow Pine, Endless Summer listlessly plucked pine needles nearby. It spotted Lin Yuan staring at the Icy Flames Law Crystal with a troubled brooding look.

Endless Summer could not help but say, "Lin Yuan, the Icy Flames Law Crystal might have laws, but it's only an unorthodox ice-type law. Yet, it contains a wisp of fire. It's the best plaything of fire- and ice-type Myth Breed feys."

Endless Summer whistled in approval.

It had mastered Enlightenment Law, so whether it was the Cold Snow Pine's Icy Flames Law Crystal or the Dead Dream Law Crystal, they were all useless.

Nonetheless, it could use the power of its own Law Crystal to commence melding and absorption to bolster its Enlightenment Law.

Although the discrepancy between Myth Breeds and Creation Breeds seemed similar to that between Fantasy Breeds and Myth Breeds, they were actually leagues asunder.

The distance between Myth Breeds and Creation Breeds was much further.

A Fantasy Breed would be close to death during their World Cleansing to become a Myth Breed.

Many seemingly all-powerful feys were reduced to ash during their struggle to rise from Fantasy V to Myth Breed.

Fantasy Breed feys could seek aid from others during their World Cleansing to increase their chances of surviving the process.

Unfortunately, when Myth Breed feys tried to elevate to Creation Breed feys, they needed to continuously strengthen their Law Runes.

Their Law Runes needed to be strong enough to create a genuine world of law using only the power of law.

Ergo, it was 100 times more dangerous for Myth Breeds as they had to go through the Trial of World Creation rather than World Cleansing.

The accumulation of the power of law required an unspeakable amount of power and training and usually took Myth III feys years to accomplish.

Class 5 Creation Masters' most enviable asset was their ability to activate a portion of the power of law from Law Crystals. This granted them the ability to make adjustments so that any Law Runes could absorb the pure law energy.

Despite this ability, they mostly used it to elevate the power of their contracted feys and source-type lifeforms.

Why would they bless someone else with something so precious?

The Mother of Bloodbath was swiftly tearing away the Cold Snow Pine's bark.

It also took out a crystal bottle and squeezed out the essence of the Cold Snow Pine's branches.

When it heard Endless Summer speak, the Mother of Bloodbath raised its head and said to Lin Yuan, "The Cold Snow Pine's Law Crystal might not be particularly impressive, but its tree sap is valuable. If you still have the fire heavenly-maiden-grade elemental pearls, their pure fire energy can be used to roast the Cold Snow Pine's tree sap. The tree sap will turn into rosin. But only the fire heavenly-maiden-grade elemental pearls can be used. If the fire energy isn't pure enough, the tree sap will turn into incense instead. The Cold Snow Pine's rosin has warming properties that can heal injured souls. Its incense will only be able to replenish energy."

The Mother of Bloodbath spoke with a strange seriousness. It valued the Cold Snow Pine's tree sap much more than its Law Crystal.

Lin Yuan was momentarily dazed. He did not expect Cold Snow Pine's rosin to have such effects.

He had heard from the Moon Empress about items that could heal souls. She had mentioned that they were counted as prized strategic-class resources.

There was an abundance of spiritual ingredients that could restore energy, but few had qualities that could really affect the soul.

Lin Yuan carefully noted down the Mother of Bloodbath's words.

Nevertheless, even the heavenly-maiden-grade elemental pearls did not possess fire energy as pure as that produced by the Twin Red Pagoda's Lifeform Sacrificial Fire.

“Would we get a better result if we used Lifeform Sacrificial Fire to calcify the tree sap instead?” Lin Yuan asked.

The Mother of Bloodbath firmly replied, “Of course. If Lifeform Sacrificial Fire is used to burn the tree branches, we’ll be able to preserve most of the properties of the tree sap. We’ll even be able to bring out the immense live-giving qualities of the Cold Snow Pine’s tree sap. Rosin made from the Lifeform Sacrificial Fire will be far stronger than that of the heavenly-maiden-grade elemental pearls.”

At the mention of Lifeform Sacrificial Fire, Endless Summer gently placed a hand over its heart.

In order to save it, Lin Yuan had placed the Lifeform Sacrificial Fire inside of it, which had become a tree core inside its body.

Endless Summer had re-absorbed its original tree core, which had been dug out.

Thus, Endless Summer now had two tree cores.

It was both an opportunity of a lifetime and a drastic change to possess two tree cores.

Endless Summer felt that it was a once-in-a-lifetime opportunity for Lin Yuan to have even one piece of something as valuable as Lifeform Sacrificial Fire.

Now that Lin Yuan no longer had any Lifeform Sacrificial Fire, Endless Summer felt rather guilty.

Gratefulness surged in the depths of Endless Summer’s heart.

Meanwhile, Lin Yuan was mentally calculating.

It’s best if we can use Lifeform Sacrificial Fire to calcify the Cold Snow Pine. Then I’ll be able to wait until the Spirit Lock spatial zone for the Twin Red Pagoda’s main flower to mature in order to use its Lifeform Sacrificial Fire to calcify the Cold Snow Pine’s tree sap.

Zhou Luo, who was standing nearby directing the Lava Dragon Lizard, heard the exchange between Lin Yuan, the Mother of Bloodbath, and Endless Summer and suddenly felt as though his master was too cruel.

His master and the Mother of Bloodbath talked about wanting to build a disco on this deserted island, but who knew when the plan could come to fruition?

The deserted island’s scenery was beautiful. They could also build a theater along with the disco.

When the time comes, I’ll be able to whip out my specialty suona again.

Chapter 475: Glad Wen Yu Did Not Come

Lin Yuan looked at the Dead Dream Law Crystal in his other hand. It was slightly larger and ashy black in color, with two gold streaks cutting through it.

The Dead Dream Law Crystal looked to be containing a mercurial dream realm. The foggy dream realm carried the strange feeling of joy intermixed with pain.

Lin Yuan’s hand quivered, and he fished out the black Law Crystal he had obtained from the Night Calamity Crow in Endless Forest.

Lin Yuan suddenly came to the realization that he was fated with dark-type feys.

Two of the three Law Crystals in his hands came from dark-type feys.

However, between those two dark-type Law Crystals, the one from the Night Calamity Crow was clearly better than the one from the Dream-Eating Bat.

Whether it was the laws in the crystal or the appearance of the Law Crystal itself, the Night Calamity Crow's Law Crystal came out a winner.

It was probably due to the fact that Nightmare VI had used its exclusive skill, Dark Night Tribute, causing the originally complete law crystal to break.

However, the Dead Dream Law Crystal was much darker than the black crystal.

As he fiddled with the three Law Crystals, Lin Yuan's concerns intensified.

Lin Yuan would never trade something like Law Crystals. As such, they would continue staying with Lin Yuan.

However, Lin Yuan was currently unable to use the Law Crystals. Due to the fundamental differences between the laws, not even Endless Summer or the Mother of Bloodbath would be able to absorb these Law Crystals.

There was a sort of sweet dilemma behind it all.

If Lin Yuan's thoughts were revealed to the members of the veteran factions, they would launch two slaps across his face.

They would then scream at Lin Yuan, "Wake up, you fool! How can this be a sweet dilemma? It should be a sweet delight!"

Liu Jie was standing to the side, feeding a Silver Protein Silkworm Chrysalis to the Insect Queen.

Liu Jie, who only had one contracted fey, made sure to replenish the Insect Queen's strength after every battle by feeding it source-type lifeforms.

When he was done, Liu Jie looked at the sky and commented, "It's getting dark. Since we're going to be on the deserted island these two days, why don't I head to Indigo Azure City and get the materials to build a temporary campsite? Later, I'll gather some metal spirit ingredients to make pots so I can cook up some seafood."

The Mother of Bloodbath's eyes lit up.

However, it was not the one that voiced out.

When Lin Yuan heard Liu Jie's suggestion, he fished several quick-building tents out of his button-sized Diamond fey storage box.

These tents had been added as a precaution when Wen Yu was helping Lin Yuan organize the fey storage box.

Lin Yuan had not had the chance to use them up until now.

Finally, they could be of use.

The Mother of Bloodbath saw Lin Yuan take out some fruit from the fey storage box as well.

Its sharp eyes also caught sight of some rations sandwiched between the fruits.

The Mother of Bloodbath hopped to its feet, raised its hand, and exclaimed, "I agree with Liu Jie's suggestion! Sister Summer will separate the Cold Snow Pine's component parts into spirit ingredients. I will go check out Indigo Azure City's fresh produce market with Liu Jie. According to Star Web, grilled soft-bone grouper is especially delicious."

The Mother of Bloodbath felt that Lin Yuan was practically a monster.

It was a magnificent and battle-worn spider!

How could he expect it to be satisfied with rations and fruits?

It needed to feast on a griddle of seafood!

When Lin Yuan heard the Mother of Bloodbath mention soft-boned grouper, his eyelids immediately started to twitch.

Which fairy on Star Web had said that grilled soft-bone grouper was tasty?

Did they try to use some high-level fire to grill the soft-bone grouper?

Soft-bone groupers were 4 meters in length when they were young.

Mature ones could grow up to 18 meters long.

It would take months to finish eating such a giant fish!

Despite this, Lin Yuan agreed to the idea.

It was because his stomach started to grumble the second that Liu Jie mentioned grilling seafood.

Grilled seafood was Liu Jie's specialty.

Liu Jie was capable of cooking a wide list of dishes, so he did not grill seafood often.

Lin Yuan suddenly sensed the Mother of Bloodbath looking at him with an accusatory glare.

Lin Yuan was instantly on edge. He glanced at the fruits he had taken out and hastily bent down to store them back in the fey storage box.

The 'Global Champion of Eating' Mother of Bloodbath sure got angry easily!

Lin Yuan had only taken out the fruits to use as sauces on the seafood. The bag of rations had just fallen out accidentally.

The corners of Listen's lips tugged upward, and he struggled to quench his sniggers. He quickly said, "There's a lot of seafood in Indigo Azure City that's indigenous to the area. Some of the shrimps and

scallops species are very suitable for charcoal grilling. I'm more familiar with the area and can act as a guide. I'll also pick up the basic rations we'll need for the next two days."

After the Mother of Bloodbath, Liu Jie, and Listen departed, Lin Yuan started juicing fruits.

He made sure to juice fruits according to each person's favorite.

Since he did not know what Zhou Luo fancied, he made extra of each type so Zhou Luo would be able to have his pick.

When he was done, Lin Yuan stored the juices in a crystal bottle and placed it in the cool ocean to maintain their freshness.

As night approached, the Mother of Bloodbath, Endless Summer, Lin Yuan, Listen, and Zhou Luo had filled their stomachs to the brim.

Zhou Luo's Lava Dragon Lizard had also snagged quite a few pieces of grilled fish.

Liu Jie was a masculine man that had managed to hold off the insect tide in Cold Frost City for half an hour all by himself, but he currently did not even have an ounce of strength.

An idea struck Liu Jie. He was glad that Wen Yu had not come.

Otherwise, they would need to grill at least two more fish, five more crabs, three more sticks of shrimp, another pile of scallops, and who knew how much more squid.

Chapter 476: The Invite and the Third Person

After they filled their stomachs, the group headed into the already set up tents to rest.

Zhou Luo called out the recently contracted Dark Snake Dragon Lizard. He wanted it for companionship as he stood watch, as well as to form a deeper bond with it in the meantime.

The Lava Dragon Lizard continued helping the Ethereal Jellyfish disturb the ocean floor to collect the Floating Silver Strands laying in the depths.

A thunderous yawn soon sounded out from Liu Jie's tent, signifying his exhaustion.

The Mother of Bloodbath and Endless Summer went back to tearing off the Cold Snow Pine's bark.

The Mother of Bloodbath handled spiritual ingredients very professionally.

The job was almost done, and the Mother of Bloodbath had been extremely thorough. It even turned the Cold Snow Pine's tree bark into hemp thread. It planned to give it to Wen Yu to make something for Lin Yuan.

Listen utilized the downtime to start training the Pain Illusory Fox and the Three-Tailed Crimson Fox. He used the resonance between the clashing of the Pain Illusory Fox and the Three-Tailed Crimson Fox to improve their battle compatibility.

Lin Yuan noticed that the way Listen was training the Pain Illusory Fox, and the Three-Tailed Crimson Fox partially encompassed his own special brand of understanding.

Lin Yuan had enhanced the Silver VII/Fantasy I Pain Illusory Fox, and it was deemed a rather exquisite spirit-type fey.

The Pain Illusory Fox used pain as a medium to control and harm its targets.

It was an intangible means of fighting.

Compared to the Silver VII/Fantasy I Pain Illusory Fox, the Silver III/Fantasy I Three-Tailed Crimson Fox was a step above.

Thanks to the compatibility of their abilities, they were able to form a good partnership.

Although its constantly burning three tails gave the Three-Tailed Crimson Fox the look of a fire-type fey, it was undoubtedly a spirit-type fey.

The fire, which burned atop its tails, could weaken its targets and lower their defensive ability if it made contact. This strengthened the Three-Tailed Crimson Fox's spiritual abilities, whether it was the damage it dealt or the level of control it could exert.

The Three-Tailed Crimson Fox also possessed a hypnotizing ability.

In solo combat, due to the fact that every spirit qi professional mostly had many feys, attacking power was key in securing victory.

Thus, a fey like the Three-Tailed Crimson Fox, which had controlling abilities, was not particularly helpful in solo combat.

However, when it came to team fights, the Three-Tailed Crimson Fox's abilities would have great efficacy on the opponent's main feys.

It was highly likely to be a key player in such fights.

When Listen heard Lin Yuan approaching, he stopped the fight between the Pain Illusory Fox and the Three-Tailed Crimson Fox.

The Three-Tailed Crimson Fox laid down by Listen's leg and nestled on the ground as its three large tails lightly rested on Listen's trousers, all in all looking very contented

The Pain Illusory Fox called softly to Listen, who nodded.

The snow-white Pain Illusory Fox darted to Lin Yuan with only a few steps. Its small claws landed on Lin Yuan's leg, wagging as though it was greeting him before it returned to Listen's side.

The Pain Illusory Fox clearly still remembered that Lin Yuan had helped it advance its grade and quality.

Listen assumed that Lin Yuan came over to issue an instruction.

"Young Master, does Big Brother Zhou need help?" he asked.

Lin Yuan shook his head and reached out to pat down the stray strands of hair at the back of his head.

“Listen, you’re of age and have enough power now. Do you have any plans to participate in the guild club’s S Tournament?”

Lin Yuan remembered that when Listen had mentioned his Star Web duel record, he had said his Star Tower level was just past level ten.

Given Listen’s power, he should have no problem reaching the Celestial Stairway.

However, Listen had never gone to fight, which could indicate that he did not like competitive fighting.

Even if Listen used a Willpower Rune to swear his undying loyalty to Lin Yuan, the latter would still be unable to force him to join his guild club.

Listen paused for a while. “Me?” he murmured unconsciously.

During his pause, Listen thought back to his childhood.

My elders always focused on preparing me as the sole heir to the Listening Heron Chamber of Commerce. My days were filled with lessons on managing the Listening Heron Chamber of Commerce and expanding its reach.

My elders might have been willing to part with half of the Listening Heron Chamber of Commerce’s resources so that I could have powerful feys and abilities, but they never allowed me to fight on Star Web. They always thought it was a waste of time that could have been spent on learning how to manage the business.

As time passed, I became used to setting aside the joy I felt when fighting on Star Web. Even after my family died at sea three years ago, I continued working hard to maintain the Listening Heron Chamber of Commerce. I didn’t have any time or energy to devote to fighting on Star Web.

However, I’ll admit that sometimes while training my feys, I take the opportunity to improve my own fighting abilities.

I never expected Lin Yuan to ask me to join his guild club...

Of course, I would love to join! I can’t believe he asked!

Ever since I pledged my and the Listening Heron Chamber of Commerce’s loyalty to him, he poured a lot of resources into the Listening Heron Chamber of Commerce. But I still haven’t made anything of myself. If Lin Yuan didn’t secretly protect me, I would have lost my life at the Royal Capital.

During this time, I’ve come to realize that he’s a good man who is easy to get along with. Being in his presence is relaxing. However, I’m constantly aware of my position as his subordinate. This said, he must be treating me like a friend rather than a subordinate since he’s willing to invite me.

Listen was touched beyond comprehension and chuckled at Lin Yuan’s question.

“Big Brother Liu and I started a guild club. We plan to join next year’s S Tournament. The name of the guild club is Dome Guild Club. As of now, we’re the two main members of the group. You’ll be the third if you decide to join.”

Chapter 477: Clouded Crane

After Lin Yuan's explanation and invitation, Listen bent down to pick up the Pain Illusory Fox and Three-tailed Crimson Fox.

"I'm in. I'll increase my own power while also furthering the Listening Heron Chamber of Commerce's success. It will be done in four months," said Listen.

Lin Yuan reached out his hand toward Listen and said, "Welcome, third member of Dome Guild Club."

Listen gently placed his hand on the back of Lin Yuan's as a symbol of their new bond as comrades.

Listen mentally came to a decision.

It looks like I'm about to fight on Star Web.

If Lin Yuan really takes part in next year's S Tournament, given his and Liu Jie's ability, they're sure to obtain a B-level standing for the guild club.

Our Dome Guild Club has Black and the Radiance Hundred Sequence member Liu Jie. They will definitely attract immense attention once the member roster is released. I know I can't be a Radiance Hundred Sequence member, but if I can reach Celestial Stairway, I won't be known as the black sheep of the team.

Since I'm going to be a member of the team, I'll have to make sure I'm irreplaceable. I need to prove myself to be a valuable asset worthy of being in such an amazing team. Otherwise, others will look down upon me, or the Star Web bigshots will magnify my mistakes and laugh at me. I don't think my ego will ever recover.

When Lin Yuan and Listen were done talking, he returned to his tent.

Instead of hitting the sack, Lin Yuan entered the Spirit Lock spatial zone.

Once he was in, Lin Yuan immediately noticed that the Pure Land of Bliss was filled with many snow-white feathers.

Morbius' voice rang out in Lin Yuan's mind. "Lin Yuan, something is wrong with Gray."

Since Lin Yuan did not reply, Morbius continued speaking. "The Pure Land of Bliss is connected with the version of itself that's both inside and outside the Spirit Lock Spatial Zone. At that time, the Pure Land of Bliss was outside and absorbing the World Grace. Gray had just recovered the genetic model and woken up. But, it accidentally absorbed some of the World Grace as well. This caused Gray's genetic model to spike its promotion state."

Morbius' revelation delighted Lin Yuan.

Gray had been on the cusp of death, but now its genetic model was better than ever.

Who could have expected Gray to be granted such a prized opportunity for success?

It was an extremely rare chance for one's genetic model to be promoted. It mostly only occurred to young feys.

It preserved the fey's original genetic data while optimizing the genetic model, similar to the relationship between the Blue Flash Butterfly and the Blue Flash Purple Butterfly.

While the Blue Flash Purple Butterfly was in its cocoon, the Blue Flash Butterfly's genetic model was promoted.

Usually, the promotion of the genetic model was a natural result of development.

This was the first time that it occurred due to a fey absorbing the World Cleansing.

"Although the spirit qi in the Spirit Lock spatial zone is pure enough, it's not concentrated enough to fully support the promotion of Gray's genetic model. We'll need spirit qi crystals for that," Morbius added.

Lin Yuan shifted his gaze toward the pile of spirit qi crystals.

He had enough spirit qi crystals to feel comfortable using up some of them.

This was too good of an opportunity for Gray, and there was no way Lin Yuan was going to let it pass.

Lin Yuan walked over to the pile of spirit qi crystals below the small limestone bowl and took one spirit qi crystal out.

Looking at the pile of spirit qi crystals made Lin Yuan feel energized.

Lin Yuan did not keep count of the exact number of spirit qi crystals, but he estimated the number to be at least 300.

If the Bronze X/Legend Morbius tried to combine all the spirit qi crystals, it would take at least six years.

The World Grace stolen from the Cold Snow Pine could potentially greatly increase Lin Yuan's power.

He would not need to be thrifty like he was in the past when using the spirit qi crystals.

Lin Yuan held the spirit qi crystals and marched over to Gray.

Gray was still around the same size it used to be, but its mass had obviously increased.

Gray was slumbering soundly on the Cinnabar Sweet Osmanthus' branches, its weight causing the branches to bend.

Gray's impossibly white feathers, golden beak, and red crown were accentuated by the Cinnabar Sweet Osmanthus's red flowers.

It gave the sleeping Gray an aura of unspeakable charm.

Lin Yuan used true data to check Gray's attributes.

[Fey Name]: Cloud Crane

[Fey Species]: Crane species/Red Crane species

[Fey Grade]: Norma (1/10)I

[Fey Type]: Spiritual

[Fey Quality]: Normal

Abilities:

[Cloud Morph]: Turns its body into clouds. The cloud can obscure vision as well as block psychic abilities.

Gray's name was now recorded as Cloud Crane in True Data after its genetic model was repaired.

It was a spiritual support-type fey.

Lin Yuan carefully scanned through Grey's data.

When Lin Yuan saw Gray's Normal ability, he was stunned.

Gray's Cloud Morph appeared to be a defensive ability.

It could shield its user against attacks.

However, Gray also had the ability to block psychic invasions, allowing it to be used as a countersurveillance measure.

Cloud Morph would create a scene when used on land as the cloud coverage could only be used as a screen for the surroundings.

But what if it was used in the cloud-filled sky?

It could affect battles in a completely different way!

Especially if Gray's grade was raised and the Cloud Morph's range was increased. The screening ability would improve tremendously.

Until then, Cloud Morph might not be of much use to others.

However, it was incredibly useful to Lin Yuan. He had an unhatched Floating Island Whale, after all.

Chapter 478: Heaven and Earth Fey!

Lin Yuan was of the opinion that Cloud Morph and the Floating Island Whale was a perfect match.

The Floating Island Whale would rise to the sky after becoming a Fantasy Breed. The height it rose to was inconsequential given its immense size.

Even if Lin Yuan had the Ethereal Jellyfish, which had the spatial teleportation ability, it could establish a pathway between Sky City with Space Tunnel. It would essentially connect the land and sky.

Alas, it was not an infallible solution.

The Floating Island Whale was never regarded just as a floating piece of land in the sky. Its intention was always to be used as a formidable battle fortress.

Although its body was not strong, the Floating Island Whale would carry weapons and appliances which were necessary for battle.

The Floating Island Whale could also fly at rapid speed and was apt to become a method of transportation that could traverse the globe.

Lin Yuan could not keep such a battle fortress hidden in the sky forever.

It was disadvantageous for him to do so, and it would be a waste of its potential.

But now that he had the Cloud Crane, the Floating Island Whale could continue gliding in the sky and do so while remaining undiscovered.

Cloud Morph's shielding ability was impressive in itself, but its psychic-blocking asset was an added bonus.

The stronger the Cloud Crane grew, the more powerful Cloud Morph would become.

Eventually, the Floating Island Whale could become a legend and continue existing in the sky indefinitely.

The more Lin Yuan thought about the prospects, the more thrilled he became. His grip increased along with his excitement, and the spirit qi crystals in his hand shattered.

He instructed Morbius to direct the pulsing spirit qi into the body of the sleeping Gray so that it could absorb the energy.

Unexpectedly, Gray did not seem any different from before after absorbing one spirit qi crystal.

Lin Yuan frowned slightly and placed his hand on Gray's back.

He gathered the powerful spirit qi from the Spirit Lock spatial zone inside his body and channeled it into Gray.

The intense spirit qi traversed the surface layer of Gray's body. Lin Yuan could feel every cell in Gray's body gobbling up the spirit qi, akin to a starving Mother of Bloodbath that had not eaten for decades.

In the end, all the energy was consumed by Gray's surface layer. Not one ounce of it penetrated the rest of Gray's body.

Lin Yuan became certain that a large amount of spirit qi crystals would be needed for the promotion of Gray's genetic model.

Feys who had never undergone the World Cleansing usually did not experience the elevation of their genetic model.

This meant that the opportunity that had presented itself to Gray was a one in a million draw of luck. It was nothing short of a miracle.

However, the promotion of its genetic model could be severed, which would cause Gray to lose its once chance for success.

It would be the equivalent of Lin Yuan personally destroying a gift from god.

Since Lin Yuan had decided to form a contract with Gray, he would need to nurture it the same way he did with Chimey and Genius.

Genius had started out as a mere housekeeping beast that had not even become a fey, while Chimey was a normal Songstress Bird that had failed to evolve its quality to Normal.

Despite it all, Lin Yuan was resolved to make the best out of their journey together.

He grabbed a fistful of spirit qi crystals and returned to Gray's side.

He ordered Morbius to fuse and direct the pure spirit qi from every crystal he shattered into Gray's body.

10 pieces...

20 pieces...

Only when they reached 25 pieces did the rate at which Gray devoured the spirit qi began to slow.

When the 30th crystal was used up, Gray finally stopped absorbing the spirit qi.

Suddenly, all of Gray's feathers molted and fell.

Instead of falling to the ground, the feathers floated next to Gray, sustained by energy.

Gray continued the cycle of growing and dropping feathers.

This was when Lin Yuan realized why the Pure Land of Bliss had so many of Gray's fallen feathers.

When he took a closer look at Gray's new feathers, Lin Yuan noticed that each new set of feathers was different from the last.

Each new set of feathers looked more intricate and exquisite than the last like they were handmade pieces of art.

Lin Yuan thought that Gray's feathers were far more daedal than the Divine Travel Black Swallow's feathers, which he had used as a blueprint to make the Source Sand's Metal Consume Manifestation feathers.

The last set of feathers that sprouted had subtle golden markings on them, giving Gray an even more mysterious appearance.

Lin Yuan felt that these new feathers were even better than Gray's original ones.

The feathers which had fallen from Gray were suspended next to its body and formed a large white egg.

The egg's shell gently throbbed as though it was incubating new life.

Lin Yuan used True Data to check Gray's attributes again. He was instantly stunned.

Gray used to be a fey, but after its genetic model was promoted, it turned into a Heaven and Earth Fey like the Floating Island Whale.

Gray was no longer called Cloud Crane but Sky-Clouded Crane.

Lin Yuan was frazzled by Gray's sudden transformation into a Heaven and Earth Fey.

Gray fell back into a deep sleep.

Only after it hatched from the egg would Gray gain a new life.

This was the difference between the contract-forming method of Heaven and Earth Feys and other feys.

Using True Data, Lin Yuan saw that Gray's contract method was similar to the Floating Island Whale.

Both of them needed to feel the bloodline of their contractor during the incubation period. After they hatched, they would decide whether or not to seal the deal.

Lin Yuan thought back to when Gray used to cling to him.

Even if I don't enhance the bloodline between Gray and me, it should still choose to form a contract with me. However, other than being able to enhance the bloodline between Heaven and Earth Feys and us, blood can also strengthen our bond. I can't skimp on the amount of blood I use.

Chapter 479: Enhancing the Elemental Shellfish

Lin Yuan couldn't help but put his hand on his forehead.

After each enhanced bloodline relationship with the Floating Island Whale, a large amount of blood in his body would be absorbed by the crystal eggshell of the Floating Island Whale, causing him to feel like his body was being emptied.

With Gray now, that was simply a double of being emptied and double the 'pleasure'.

Lin Yuan felt that he should really ask Zhang Xiaobai's care tips sometime later, and how he faced the Bloody Leech's destruction.

Otherwise, no matter how strong a youth's physique was, he couldn't withstand the two Heaven and Earth Feys, the Floating Island Whale and the Sky-Clouded Crane!

Although he was against the idea, his body was incredibly honest!

He had already started to enhance the bloodline with the Sky-Clouded Crane, Gray.

He deliberately used the blood from his tongue for the first time, just like the first time he had enhanced the bloodline with the Floating Island Whale. Nearly two hours passed before he completed enhancing the bloodline with Gray and the Floating Island Whale.

During this time, Lin Yuan relied on his Jasmine Lily as it used its main flower to release life force and restore the qi and blood in his body.

But given his current state of being like a faucet, he would be dried up even if he were a swimming pool.

After Lin Yuan swayed in place, he sat on the ground. He let the Jasmine Lily use its Heal on him for three minutes without bothering about its side effects.

Due to the dizziness from blood loss, that extreme comfort nearly made him fall asleep in the Spirit Lock spatial zone, but after waking up from that extreme comfort, he recovered from the dizziness due to the blood loss.

Previously, when Morbius had been channeling the spirit qi in the spirit qi crystals to Gray to strengthen its genetic model, there was still a portion of spirit qi left.

Morbius asked Lin Yuan, “Yuan, Gray only consumed a trace of energy in the 31st energy crystal.

“The remaining energy should be able to allow four to five Bronze/Epic feys to reach Legend.”

As soon as Lin Yuan heard that, he didn’t even hesitate to take one Scorching Elemental Shellfish, two Celestine Elemental Shellfish, and two Aquamarine Elemental Shellfish out of the Spirit Lock spatial zone.

These five Elemental Shellfish were currently Bronze X/Epic. If he promoted them from Epic to Legend, then the speed at which they produced the elemental pearls would undoubtedly become faster than before.

Lin Yuan now regretted not promoting these five Elemental Shellfish from Epic to Legend with the spirit qi crystals previously.

After such a long time, it was unknown how many heavenly-maiden-grade elemental pearls had been lost.

After channeling the remaining spirit qi in the 31st spirit qi crystals that Morbius controlled into the five Elemental Shellfish, they all immediately became much larger than before.

The elemental patterns on them also became more obvious, and the color of the flesh was closer to the color of the different types of elements. When they opened, they all exhaled elemental energy that was like a smoky haze.

This meant that the four Elemental Shellfish that had grown larger had successfully been promoted to Legend.

However, due to the lack of remaining spirit qi in the spirit qi crystals, one of the Aquamarine Elemental Shellfish did not get promoted.

This situation could let Lin Yuan find out how much faster were the elemental pearls produced by the Bronze X/Legend Elemental Shellfish than the ones produced by the Bronze/Epic Elemental Shellfish.

Since elemental pearls from different Elemental Shellfish were produced differently, Lin Yuan didn’t choose carefully and took out that Bronze X/Legend Scorching Elemental Shellfish for comparison.

During his two hours of observation, Lin Yuan found that it produced a total of eight elemental pearls, while the Bronze X/Epic Aquamarine Elemental Shellfish produced six.

Although such a ratio didn’t seem too shocking, it was enough to be called an amazing fortune after it quantified a quarter of the difference over time. Of course, other people couldn’t achieve this accumulation of wealth unless they had such an inexhaustible blessed land with a high concentration of pure spirit qi like Morbius’ Spirit Lock spatial zone.

Lin Yuan took out the two young Elemental Shellfish that he had obtained from Master Jing Liu in exchange for 200 fire-elemental pearls.

He already had a plan in his mind. What he needed to do was to induce their mutation and turn them into Thick Earth Shellfish.

First of all, between the heavenly-maiden-grade elemental pearls produced by different Elemental Shellfish, they could be circulated at a price of 1:1. Thus, there was actually not much difference no matter what kind of Elemental Shellfish he nurtured.

Lin Yuan wanted to evolve the two young Elemental Shellfish into Thick Earth Shellfish because the Source Sand wanted to improve its grade and rank.

Apart from relying on the spirit qi in the spirit qi crystals, the heavenly-maiden-grade elemental pearls produced by the Thick Earth Shellfish were also an excellent choice for enhancement. At the same time, the pure earth energy in those heavenly-maiden-grade elemental pearls could temper the Source Sand.

With some inducement from Lin Yuan, the two young Thick Earth Shellfish were easily nurtured into Bronze X/Epic.

After that, he summoned the three Red Water Blood Snakes with the hornless dragon bloodline that he had gotten in a trade at the Indigo Azure Sea Market from the amber-button-shaped Diamond fey storage box.

They were the raw materials that the Mother of Bloodbath's third exclusive skill, External Blood Bone, needed.

The Mother of Bloodbath's exclusive skill and strength improvement couldn't be sloppy. Therefore, Lin Yuan had asked the Mother of Bloodbath about the choice of the three Red Water Blood Snakes' exclusive skills.

Their exclusive skills were not important for the Mother of Bloodbath. After being fused with the Mother of Bloodbath's chelicerae, these three Red Water Blood Snakes would be equal to a part of its body. Hence, they would be dominated by it and become the same as its exclusive skill.

When Lin Yuan enhanced them, he didn't need to consider the choice of their exclusive skills when they were promoted to Bronze.

Chapter 480: Not a Self-Destructing Bucket!

Lin Yuan couldn't help but sigh as he looked at these three Red Water Blood Snakes. They indeed had the hornless dragon bloodline in them.

Half a day ago, they had been sprinkled with realgar powder but seemed unharmed now. All of them were spirited.

Lin Yuan enhanced the three Red Water Blood Snakes with the hornless dragon bloodline, and they were promoted to Bronze X/Epic a few hours later.

Even though their exclusive skills when they were promoted to Bronze were not important, Lin Yuan still promoted them to Elite/Epic before promoting them to Bronze.

From the three exclusive skills that appeared, he picked out the one that he thought was the most powerful.

Lin Yuan then took out a spirit qi crystal and crushed it. Under Morbius' guidance, the three Bronze/Epic Red Water Blood Snakes, two Thick Earth Shellfish, and the Aquamarine Elemental Shellfish that had failed to raise its quality before were all enhanced.

Because the Aquamarine Elemental Shellfish had previously absorbed the high pure spirit qi from the spirit qi crystals, it was on the verge of breaking through to Legend. So this time, all six Bronze/Epic feys were promoted to Legend thanks to one spirit qi crystal.

Lin Yuan stored the three Bronze/Legend Red Water Blood Snakes into the Platinum fey storage box and was going to give them to the Mother of Bloodbath when he returned to the Royal Capital.

Immediately after that, he placed the Aquamarine Elemental Shellfish and Celestine Elemental Shellfish back into their original positions.

Although the Floating Island Whale, a Heaven, and Earth Fey, could devour the spirit qi, water energy, and wind energy in the Spirit Lock spatial zone, there was a limit to it.

Previously, the Aquamarine Elemental Shellfish and Celestine Elemental Shellfish were just enough for the Floating Island Whale's consumption when they were at Epic.

After having their quality promoted now, Lin Yuan had two wind-type heavenly-maiden-grade elemental pearls produced by the Celestine Elemental Shellfish and two water-type heavenly-maiden-grade elemental pearls produced by the Aquamarine Elemental Shellfish every hour.

Since the immature Lifeform Sacrificial Fire in the Twin Red Pagoda's main flower could not finish absorbing the fire-type heavenly-maiden-grade elemental pearl produced by the Scorching Elemental Shellfish, the gathering speed had become a lot faster than before.

Coupled with the two earth-type heavenly-maiden-grade elemental pearls produced by the Thick Earth Elemental Shellfish, the Source Sand could only consume one over a period. Therefore, the earth-type heavenly-maiden-grade elemental pearls basically equated to being an appetizer.

Lin Yuan felt that although he had spent all the resources he could in the Indigo Azure Sea Market, he would soon get rich based on the current rate of resource accumulation.

Given the production speed of the heavenly-maiden-grade elemental pearls in his hands, it wouldn't be too much for him to be called the prince of elemental pearls!

Lin Yuan looked at the time and found that it was already five o'clock in the morning. He had stayed up overnight in the Spirit Lock spatial zone again.

Looking at the Elemental Shellfish constantly producing the heavenly-maiden-grade elemental pearls, he didn't feel tired but fulfilled.

It was still early, as the agreed time to wake up with the others last night was 7:30. There were still nearly two hours left for him to continue enhancing the feys.

He first took out the fairy source-type lifeform, the Burning Sunflower.

When looking at this thumb-sized cactus-shaped Burning Sunflower, his expression paused when he was about to enhance it. Then he stored it back into the amber-button-shaped Diamond fey storage box.

Chu Ci was now outside with Cold Moon for training and must have become stronger. Lin Yuan didn't know how strong she was now. Thus, it would be better to wait for her return and have some understanding of her feys before he took her Bronze/Epic Vajra Butterfly over and promoted it together with the Burning Sunflower to Bronze/Legend.

Chu Ci had grown up. As her brother, even if he wanted to be good to his sister, he had to respect her. Lin Yuan intended to let Chu Ci choose the Burning Sunflower's exclusive skill.

She was now also a combat-class spirit qi professional and was even clearer about her own path than others.

He now only hoped that after the Burning Sunflower was nurtured, it could let her combat style be less rough!

His Iron Bucket Sister Plan 3.0 was nurturing a solid iron bucket!

Not a self-destructing bucket!

If he raised her into a self-destructing bucket, Lin Yuan felt he would be simply letting down his identity as her older brother.

After putting away the Burning Sunflower, Lin Yuan took the Heaven and Earth Fey, the Blood Brew Grapevine, out of the amber-button-shaped Diamond fey storage box.

The Platinum IV/Epic Blood Brew Grapevine that he had traded in the Indigo Azure Sea Market was a mature Heaven and Earth Fey. For such a fey, it only needed to be supplied with enough blood.

The Blood Brew Grapevine could absorb the energy from blood to produce Blood Brew Grapes. It had a very high demand for the quality and quantity of blood.

If the Platinum Blood Brew Grapevine wanted to grow a bunch of Blood Brew Grapes, it at least needed the blood energy from 1,000 Platinum feys that couldn't be supplied by ordinary blood. It must be the essence blood obtained after purification.

The Blood Brew Grapevine also had very demanding requirements for essence blood. If the quality of the essence blood was not up to par, the produced Blood Brew Grapes would be small.

Lin Yuan had previously speculated about Red Thorn's Eyes of Relinquish and the Blood Brew Grapevine.

He was now a bit apprehensive and didn't know whether the Blood Brew Grapevine could absorb the Eyes of Relinquish to produce Blood Brew Grapes.

Lin Yuan summoned Red Thorn from the leaf-shaped Diamond fey storage box. After Red Thorn saw him, it immediately became cheerful. It played with its huge flower that had obviously evolved more gill-shaped petals.

"Yuan... Red Thorn... misses you!"

Although its words from its gill-like flower were broken, Red Thorn had obviously shown what it wanted to express!

During this time, it could be said that Genius' contributions couldn't go unnoticed.

Ever since Genius had agreed to teach Red Thorn to speak, it had been going to the leaf-shaped Diamond fey storage box to guide Red Thorn dutifully.
