

Merchant 751

Chapter 751: Titan Giant Boa

Master Hong Shen handed the Source Seed to Lin Yuan and said, “Young Master, if you’re interested in this Source Seed, I’m glad to give it to you. You’re free to study it as you please.”

He had noticed Lin Yuan’s eagerness toward this Source Seed from the moment it was mentioned.

However, Master Hong Shen could not understand why Lin Yuan would be interested in something as useless as the Source Seed.

When Master Hong Shen took out the Source Seed, Lin Yuan’s leaf-shaped Diamond fey storage box started acting erratically.

Through the blood contract, Lin Yuan could already sense Red Thorn’s longing for this Source Seed. It seemed to be thirsting to absorb this Source Seed and evolve itself.

Lin Yuan received the Source Seed.

He had initially planned on evolving it into a plant-type fey using his own means.

But since Red Thorn yearned for this Source Seed as much as it did, Lin Yuan gave up on the idea of nurturing the plant-type fey. Instead, he decided to give this faintly glowing Source Seed to Red Thorn to see what changes would occur after consuming the Source Seed.

When Red Thorn sensed this Source Seed, it started to strum its large red gill-shaped flower petals in the leaf-shaped Diamond fey storage box. It was like a mischievous child that was trying to pester its parent into buying it a toy.

Now that it had Lin Yuan’s promise that the Source Seed would be given to it, Red Thorn stopped moving its flower petals and started to play with the Acid Corrosion Queen Bee.

Red Thorn spat the Acid Corrosion Queen Bee out of the Mouth of Relinquish and swallowed it again playfully.

Lin Yuan turned back to Master Hong Shen and said, “During this active period of the dimensional rift, a few similar source-type lifeforms were discovered in the marsh dimensional rift near Wind Mist City.”

Master Hong Shen’s mouth parted slightly in embarrassment.

Back when his soul had been injured, he would experience random afflictions from his injury. Hence, he had been unable to log into Star Web.

Thus, he might have been a pinnacle Class 3 Creation Master, but he had not been up to date with current affairs.

Although his soul injury was now healed, he still had not cultivated the habit of logging into Star Web to check the news.

He had never heard of this news that several similar source-type lifeforms had been discovered in the marsh dimensional rift near Wind Mist City.

From Master Hong Shen's lack of reply, Lin Yuan knew that he did not know of the source-type lifeforms that Lin Yuan had spoken of.

To prevent Master Hong Shen from feeling further embarrassment, Lin Yuan went on to say, "10 Titan Giant Boas were discovered in the marsh dimensional rift near Wind Mist City. It's highly possible that more will be found soon."

Actually, Lin Yuan knew about these Titan Giant Boas not because he was up to date on Radiance Federation news, but because Gao Feng had told him during a call.

During the call, Lin Yuan had not paid much attention to this news.

But now, it seemed that the Titan Giant Boas would be well-suited to Zhang Xiaobai, Xin Ying, Tan Ran, and Lu Pinru's needs.

When Gao Feng had mentioned the Titan Giant Boas, he also talked about how stringent the conditions to contract them were. It needed a large amount of the Medusa Snake Demon's demon blood and a spirit fluid concocted from the Medusa Snake Demon's eyes.

The main function of the spirit qi was to prevent the spirit qi professional from becoming petrified.

When the contractor drank the spirit fluid concocted by a Class 4 Creation Master, they needed to combine their own tears with the Medusa Snake Demon's demon blood.

Under the activation of pure spirit qi, the Titan Giant Boa would be able to break through its shell.

Next, a blood contract and spiritual contract would be used to contract the Titan Giant Boa.

The contractor drank the potion to prevent petrification in order to shield against the Titan Giant Boa's natural petrification ability.

With so many difficult obstacles, it was no wonder that Gao Feng had been complaining about how difficult it was to contract the Titan Giant Boa.

Firstly, the Medusa Snake Demon was a kind of human being in the marsh dimensional rift that had the power of a Class 6 dimensional lifeform.

Although it had the power of a Class 6 dimensional lifeform that was akin to that of a Diamond fey, it only appeared in Class 4 dimensional rifts.

It was an extremely rare and mysterious dimensional lifeform.

At the same time, numerous high-grade dimensional lifeforms always accompanied the appearance of the Medusa Snake Demon.

After the Medusa Snake Demon died, it would quickly turn into a rock.

Hence, in order to obtain the Medusa Snake Demon's demon blood, one needed to go through hordes of marsh dimensional lifeforms first.

A Class 4 Creation Master was definitely needed for the Grade 4 potion and pure spirit qi.

It was challenging to find a Class 4 Creation Master in the Radiance Federation.

Wind Mist City was one of the middle-lower class cities amongst the 32 main cities.

But as the highest elite and only elite faction in Wind Mist City, the Gao family sat at the top of the hierarchy in Wind Mist City. Hence, the Gao family had obtained eight of the Titan Giant Boas that were found in the marsh dimensional rift near Wind Mist City.

According to Gao Feng, the Gao family had already hatched three Titan Giant Boas.

All of the Titan Giant Boas had the same Normal ability, Nest of Snakes Share Life.

Nest of Snakes Share Life allowed every Titan Giant Boa in a set area to share the burden of damage received, essentially sharing their lives.

No matter which Titan Giant Boa had been dealt with an injury, as long as it was within range of the other Titan Giant Boas, it would be able to share its recovery and injuries with them.

Gao Feng had also said that the newly born Titan Giant Boa was already at a length of seven meters, while one of the Titan Giant Boas that the Gao family had nurtured to Gold had reached a length of 40 meters.

It truly lived up to its name!

Its large strength was evidence of its high defensive skills.

If Zhang Xiaobai and the rest could really form contracts with the Titan Giant Boas, its original powers to sustain damage would only continue to climb.

Lin Yuan was certain that if Zhang Xiaobai and the rest could contract Titan Giant Boas, which Master Hong Shen would then evolve, no one besides Radiance Hundred Sequence members and A-level guild club members at their peak condition could kill off the four Titan Giant Boas.

Chapter 752: The Rapport of Partner Factions

The Titan Giant Boa's enormous size indicated that it relied on its physique as its main method of attack.

Despite its brutish attack technique, it did not lumber around because its eyes also possessed petrification abilities.

The petrification could be counted as a form of elemental damage.

When other lifeforms were petrified, the cursed earth-elemental energy would enter the lifeform to alter and mutate the other elements inside the lifeforms.

The combined effect of the Titan Giant Boa's enormous size and eyes made it adept at defense and attack.

As a boa-species lifeform, the Titan Giant Boa could also manipulate its body.

The Titan Giant Boa's ability to manipulate its body could be said to be its strongest method of attack and killing.

If Zhang Xiaobai, Xin Ying, Tan Ran, and Lu Pinru entered the S Tournament, any member of the main team would be able to work together with them.

The four Titan Giant Boas' large bodies could easily defend against physical and elemental damage, generating a solid defense.

Master Hong Shen had never heard of the Titan Giant Boa, so there was no way that he had any understanding of it.

However, he completely trusted Lin Yuan's judgment.

Given Master Hong Shen's understanding of Lin Yuan, when the latter mentioned the Titan Giant Boas because he was already anxious to get his hands on them.

Zhang Xiaobai, Xin Ying, Lu Pinru, and Tan Ran sat on the water rhinoceros leather sofa, their eyes slightly damp.

The four of them had shown their Willpower Runes to Lin Yuan because they were just sharing their joy with their friend. Additionally, as future team members, they were also showing their improvement to the rest of the group.

However, they did not expect that after Lin Yuan found out about their Willpower Runes, he would immediately start to ponder over feys that could be suited to them.

Zhang Xiaobai and the rest were already friends that had already defied death alongside Lin Yuan. They were able to trust each other with their lives during such moments.

It could even be said that Lin Yuan was their savior.

If not for Lin Yuan's Red Thorn, the four of them would likely have died in the fight to protect Millstone Town.

If Lin Yuan had not extended invites to them a few days ago, the four of them would not have been able to gain a new goal and hope atop the mountain, which led them to comprehend the Willpower Runes.

Zhang Xiaobai, Xin Ying, Lu Pinru, and Tan Ran were all people who wore their hearts on their sleeves. They accepted Lin Yuan's kind gesture. They had already agreed that they would help Lin Yuan with some chores in the Dome Guild Club.

The four of them were veteran participants at the S Tournament.

Although they were always reserve team members, they were well aware of how a guild club was run.

A guild club did not just participate in the S Tournament.

The four of them were confident that they would be able to help Lin Yuan manage the nitty-gritty aspects of the Dome Guild Club.

Lin Yuan picked up his phone and was about to call Gao Feng, but he remembered that he was with his parents. Gao Feng would have to sneak out like a criminal to pick up the call, so Lin Yuan left a message for Gao Feng.

Lin Yuan: Gao Feng, I'm interested in the Titan Giant Boas that you mentioned. Please keep four for me.

After he sent the message, Lin Yuan set down his phone, which rang less than two minutes later.

Lin Yuan checked his phone and realized that Gao Feng had already replied to him.

Gao Feng's message read:

Gao Feng: No problem. I'll inform my family tomorrow to save four uncontracted Titan Giant Boas and send them to me. I'll hand them over to you at the Guard Ye Banquet.

Lin Yuan smiled as he read Gao Feng's message.

He realized that he had a sort of rapport with Gao Feng.

When Gao Feng was in need of a Class 5 Spirit Craftsman, Lin Yuan would help out Gao Feng without hesitation.

Now that he needed four dimensional lifeforms, he only gave Gao Feng a heads up before Gao Feng agreed without any questions asked.

This demonstrated the deep trust between both of them.

Otherwise, they would not have been able to agree on a million Radiance dollar deal so promptly.

Ever since Lin Yuan and Gao Feng worked together as rising factions, Lin Yuan handled the Creation Master resources while Gao Feng was in charge of the logistics.

Their territories did not cross, but when problems arose and solutions needed to be implemented, Gao Feng would always approach Lin Yuan for discussion.

Lin Yuan felt that he and Gao Feng were great partners that had a very good rapport.

At the thought of Gao Feng's power and fey compatibility, he felt that he might be able to invite Gao Feng to join his Dome Guild Club.

With Lin Yuan's understanding of Gao Feng's fey compatibility, it could be termed as the gospel of positional feys.

If Liu Jie's Insect Queen, his Red Thorn, and the Source Sand could achieve the support of Gao Feng's Breeze Hibiscus and Spirit Spring Lily, all of them would be able to produce explosive fighting power.

But Gao Feng's Yellow Spring Lily also had strong battle significance and could greatly increase its team's fault tolerance to ensure that the main feys would not be knocked off by the opponent.

Although Lin Yuan's main team still lacked two main members, his team was already more than capable of producing serious damage.

Lin Yuan was still the healing-type spirit qi professional in the main team and reserve team, while Chu Ci and Zhang Xiaobai were defense-type spirit qi professionals, and Lu Pinru was the support-type spirit qi professional.

Lin Yuan and Chu Ci were definitely going to work toward healing and defense directions, respectively.

As compared to their main roles, both of them were clearly much stronger at attacking.

Zhang Xiaobai and Lu Pinru stuck by their roles.

But when they formed contracts with the Titan Giant Boas, the Dome Guild Club would have brute force as its front.

Given this, the team sorely needed support from Gao Feng.

Initially, Lin Yuan had planned on waiting for the Radiance Hundred Sequence's exam to bring this matter up with Gao Feng.

Lin Yuan could tell that Gao Feng really wanted to join a guild club to participate in the S Tournament in their recent conversations.

Thus, he decided that he and Liu Jie would ask Gao Feng together at the Guard Ye Banquet. Otherwise, if Gao Feng spoke with other guild clubs and joined them, Lin Yuan would definitely have regrets.

Lin Yuan's high expectations for teammates made it difficult to find a member like Gao Feng.

Chapter 753: Lu Pinru's Spiritual Transformation

Lin Yuan chose the Titan Giant Boa for Zhang Xiaobai and the other three not only because it existed in abundance and could be paired with standard feys, but also because of its large size that made it highly compatible with Zhang Xiaobai's group's Willpower Runes.

Although no one could guarantee the exclusive skills that a fey would gain after it fused with a Willpower Rune and evolved to Fantasy Breed, Lin Yuan had evolved enough feys to Fantasy Breed to understand fey and Willpower Rune compatibility.

The hope Willpower Runes that Zhang Xiaobai's group had comprehended while under great stress was slightly similar to the new life one that Lin Yuan had sensed from plants.

Lin Yuan felt that it was likely for this hope Willpower Rune that was comprehended under great stress to result in the fey it fused with to gain revival exclusive skills.

This kind of exclusive skill was suited to feys that fought with brute force rather than by inflicting elemental damage.

Now that he had decided on the fey for Zhang Xiaobai's group to contract, Lin Yuan said to Master Hong Shen, "Master Hong Shen, there's still some time to go before the basement's construction is completed. I'll handle the Titan Giant Boas. You should spend the next few days evolving Zhang Xiaobai and the rest's feys to the maximum that they can be evolved to."

Zhang Xiaobai and the other three's feys were already at Gold. With Master Hong Shen's Class 4 Creation Master powers, he should be able to evolve their feys to Legend quality without any issues.

There were still six months before the S Tournament, but the Dome Guild Club was only freshly established.

To enter the S Tournament, they needed to join in the long round-robin competition season that took place right after the S Tournament season.

They could only join the S Tournament's elimination rounds if they did well in the round-robin competition season.

Lin Yuan, Liu Jie, and Chu Ci did not have the time to waste on the S Tournament's round-robin competition and elimination rounds.

After training Zhang Xiaobai and the other three, they would be sent to represent the Dome Guild Club at the round-robin competition and elimination rounds.

Master Hong Shen stood up and said firmly to Zhang Xiaobai and the rest, "Let's go. You can stay with me for now. I haven't cleaned up the new mansion that I bought, so while I'm helping you to evolve your feys, the four of you can clean up the mansion."

Master Hong Shen sniffed in derision before adding, "My mansion is really too messy now. I can't even see where I'm walking."

He did not feel embarrassed to declare the messy state of his mansion so publicly.

When Zhang Xiaobai, Xin Ying, Lu Pinru, and Tan Ran heard what he said, their eyelids twitched violently.

If even Master Hong Shen was calling it messy, that place had to be nothing short of a sty!

Luckily, the four of them had helped Master Hong Shen clean up his treatment center over the years and were well prepared.

Lu Pinru stood up from the sofa but did not walk over to Master Hong Shen. Instead, she went to Lin Yuan and stared at him for a moment before saying, "Lin Yuan, I really want to thank you for healing my injured soul. Ever since you healed me, my spiritual energy has transformed. It's now three times more than it was before and is still rising."

Lin Yuan's eyes widened to the size of saucers.

Lu Pinru had always been a spirit qi professional with impressive spiritual energy. This was why she could contract so many Glowing Silkworm Weavers.

Lin Yuan quickly racked his brain to come up with a reason for Lu Pinru's spiritual energy's transformation. He felt that it had something to do with the blow that her spiritual energy had received when her five senses were stolen as well.

It could be said that her soul getting injured was a blessing in disguise, for it opened the door to such a huge opportunity.

If Lin Yuan had to guess, he did not think that many other people would receive such an opportunity because the combination of having one's five senses stolen on top of having a soul injury was a grievous attack on one's spirit.

No one could be certain of the consequences.

If there were even the slightest of missteps, it could result in a severe deterioration of intelligence to the point of becoming a vegetable.

In worst cases, death would follow.

Lu Pinru's spiritual energy was now three times stronger than what it was before, meaning that she could contract three times the number of Glowing Silkworm Weavers.

Since the various silk clothing was produced by the silk from the Glowing Silkworm Weaver, there would be a quantitative change in the production.

If Lu Pinru could form contracts with more than 10 Glowing Silkworm Weavers, she could easily toss out silk clothes.

The various silk clothing was all consumables. When one was damaged, it could be replaced with a new one.

Moreover, a fey could put on numerous clothes during a fight.

When Lu Pinru was weaker, the defensive abilities of the silk clothes were not noticeable.

But when she became stronger, the support she could provide had a similar defense to 100 of Shi Xu's Silent Thunder Armored Crocodile's Rapid Thunder Armor Protection.

As Lin Yuan looked into Lu Pinru's eyes, he did not immediately pick up on the significance of her resolute gaze.

"Lin Yuan, I'll be by your side from now on. Even after I pass the eligible age to participate in the S Tournament, I want to remain in the guild club as one of its employees," said Lu Pingru.

Lin Yuan immediately understood Lu Pinru's meaning.

A bright smile of resignation blossomed on Lin Yuan's face, and he stood up to take Lu Pinru's hand as he led her to Zhang Xiaobai, Xin Ying, and Tan Ran.

"We solidified our relationship back at Millstone Town. I won't say much more but let's do our best at the S Tournament together," said Lin Yuan to the four of them.

Lu Pinru stretched out his hand to them, just like what they did back at Millstone Town.

This time, the only difference was that Lin Yuan's palm was not placed on top of theirs but rather supporting their palms from below.

When their five hands were stacked tightly on top of one another, their radiant smiles almost blinded Master Hong Shen.

Their friendship and ambition to work toward their dream drummed up the fighting spirit in Master Hong Shen.

Master Hong Shen could not help but be amazed at their youth.

Chapter 754: Red Thorn's Body

After Master Hong Shen led Xin Ying, Zhang Xiaobai, Lu Pinru, and Tan Ran away, Lin Yuan wandered toward Submerged Flood Dragon Lake.

He had not seen Blackie in a few days and did not know how it was doing in Submerged Flood Dragon Lake.

Even before he reached Submerged Flood Dragon Lake, he spotted a sea of blue in front of him.

The Class 3 Spirit Craftsmen were building pavilions atop the Diamond X/Legend Sunlight King Lotus.

Each Spirit Craftsman was holding a blueprint that Hu Quan had especially drawn.

Every Class 3 Spirit Craftsman needed to perfectly adhere to the pavilion's design as they built it.

Lin Yuan looked down and felt that the view of Submerged Flood Dragon Lake resembled the sky.

The blue amazonite at the lake's bottom made Submerged Flood Dragon Lake appear bottomless, expansive, and pure.

Lin Yuan watched as a few Angelfish of Bliss swam by, leaving rainbow ripples in their wake.

At that moment, Lin Yuan saw a long black silhouette appear under Submerged Flood Dragon Lake.

He immediately recognized it to be Blackie, which had come to greet him.

Lin Yuan hastily backtracked by five meters. With how well he knew Blackie, he would have been drenched if he had not moved away.

His prediction was right as Blackie drew a fountain of water out with it.

Although Lin Yuan had moved backward by five meters, his shoes still became wet.

As he looked at the 18-meter long Blackie, Lin Yuan stroked its head helplessly. He ignored his wet shoes and jumped onto Blackie's back to allow Blackie to carry him a few rounds around the mansion.

Since Master Hong Shen's mansion was next to Lin Yuan's, and the forest and green mountain behind the mansion also belonged to Lin Yuan, Blackie flew Lin Yuan around the large perimeter.

Lin Yuan looked in the direction of the tunnel's construction and said to Blackie, "Blackie, go down and take a look."

The arrival of Lin Yuan at the green mountain drew the attention of all the Class 3 Spirit Craftsmen there.

Lin Yuan jumped down from Blackie's back and asked the Spirit Craftsman nearest to him, "Where's Master Hu Quan?"

This Class 3 Spirit Craftsman was apparently dazed as he was silent for a while. He then timidly replied, "Master went underground to check out the condition of the soil."

The dazed Spirit Craftsman went back to his work and started sanding down planks of Trickle Rock Metal.

The dazed man's reaction made Lin Yuan feel a little awkward.

The nearby Liu Tong, who was moving planks of Trickle Rock Metal, immediately noticed his awkwardness.

Liu Tong did not expect the legendary Young Master of the Return from Faraway Mansion to inspect their work and quickly ran up to Lin Yuan with a smile and said, "Young Master, you can ask me all your questions. If you're looking for Master, I'll go down and inform him of your presence now."

Lin Yuan was taken aback by the sudden appearance of this Class 3 Spirit Craftsman.

After confirming that he was not acquainted with this Class 3 Spirit Craftsman, he could not help but admit that his appearance had eased Lin Yuan's awkwardness.

Since Hu Quan was checking on the condition of the underground soil, Lin Yuan did not interrupt his work as he was just here on a whim.

"There's no need to fetch Master Hu Quan. Are there enough feys to supply oxygen in the basement?"

Liu Tong had approached Lin Yuan in order to leave an impression.

He did not expect Lin Yuan to entertain him, or rather he could not believe that Lin Yuan was as approachable as he was being.

Liu Tong replied in a detailed manner, "Young Master, Master Hong Shen sent over 500 Gold Green Oxygen Sea Anemones that can each supply two hours of oxygen when removed from the water. There are about 150 Spirit Craftsmen that enter the basement to work at a time. Hence, there are more than enough feys to supply oxygen in the basement."

When Lin Yuan heard this Class 3 Spirit Craftsman's reply, he realized that his Class 3 Spirit Craftsman spoke conscientiously.

Seeing as Hu Quan would not be coming out anytime soon, Lin Yuan thanked the Spirit Craftsman that had informed him of the basement's construction process and went back to ride Blackie back to the mansion.

Lin Yuan's casual word of thanks stunned Liu Tong.

Liu Tong had joined the Heavenly Craft Pavilion to hone his Spirit Craftsman skills and would occasionally chat with Hu Quan to find out Hu Quan's impression of him.

As such, Hu Quan could place Liu Tong's name to his face now.

But there were more than 500 Class 3 Spirit Craftsmen in the Heavenly Craft Pavilion. The addition of the 300 Class 3 Spirit Craftsmen placed more pressure on Liu Tong's shoulders.

Since he had coincidentally run into Lin Yuan today, Liu Tong mustered up his courage to reply to Lin Yuan's question.

However, he did not expect to be overwhelmed by Lin Yuan's thanks.

He could tell Lin Yuan's polite demeanor from his thanks and sense that Lin Yuan did not regard anyone below him. Instead, he viewed Liu Tong as his equal who was also deserving of respect.

As he watched Lin Yuan mount the enormous flood dragon fey, Liu Tong gathered his courage and shouted, "Young Master, Liu Tong bids you goodbye!"

When Lin Yuan heard the Class 3 Spirit Craftsman bidding him goodbye, he turned and waved to Liu Tong.

He instinctively logged Liu Tong's name in his mind.

Liu Tong watched Lin Yuan disappear in the distance atop the flood dragon fey and balled his fists together to motivate himself.

His skills as a Class 3 Spirit Craftsman were relatively solid, and it was highly likely that he would become a Class 4 Spirit Craftsman.

Liu Tong worked hard and ensured that he did more than the other Class 3 Spirit Craftsmen. He believed that one had to be prepared to seize opportunities instead of laying back and waiting for the door to open to those who were talented.

Hence, he was always ready and waiting for the day where his opportunity to shine would arise.

...

Lin Yuan entered the Spirit Lock spatial zone when he returned to the mansion and summoned Red Thorn out of the leaf-shaped Diamond fey storage box.

After Red Thorn was summoned, it immediately wrapped its thornless vine around Lin Yuan's wrist.

Despite Red Thorn's gentleness, Lin Yuan's wrist still felt like an elephant's trunk was grabbing it.

The lethality of Red Thorn's ortet mutated when it evolved to Fantasy Breed and was no longer deadly.

However, the ortet became extremely strong after absorbing the flesh of so many dimensional lifeforms.

Red Thorn waved its vines at Lin Yuan and used its gill-shaped petals to produce a voice that said, "Yuan, I want a pretty bow and my body."

When Lin Yuan heard that Red Thorn wanted a pretty bow, he instantly took out a red cloth and tied it around Red Thorn's vines.

But at the mention of Red Thorn's 'body', Lin Yuan was confused.

He did not know what was the 'body' that Red Thorn wanted.

Chapter 755: In Broad Daylight! A Big Transformation!

Lin Yuan asked Red Thorn, "You're right here. What body do you want?"

Red Thorn immediately replied in a small voice, "It's the Source Seed you have."

Lin Yuan immediately took out the Source Seed.

When Red Thorn saw the Source Seed, Lin Yuan sensed Red Thorn's intense craving for the Source Seed through their connected bloodline.

It was as though Red Thorn was currently incomplete, and this Source Seed actually belonged to Red Thorn's body.

Red Thorn used its smooth vine to grab the Source Seed and placed it in the spore cavity of the Mouth of Relinquish.

At that moment, a change occurred, and Red Thorn's entire plant started to tremble violently.

Shortly after, Lin Yuan sensed strong plant energy flowing out of Red Thorn's spore cavity.

This strong plant energy quickly filled up the area just outside the Mouth of Relinquish.

After this plant energy flowed out, Red Thorn did not leave any lifeform traces before it fell asleep.

This sudden change in Red Thorn and its abrupt slumber did not cause Lin Yuan to panic.

It was obvious that Red Thorn was in the midst of a positive transformation.

Lin Yuan carefully contemplated what Red Thorn had said about its body but did not come to a conclusion.

Eventually, he used True Data to check on the sleeping Red Thorn.

True Data confirmed that Red Thorn was truly going through a transformation.

However, Red Thorn was not sleeping because it was transforming after absorbing the Source Seed's energy.

It was because the special energy needed for Red Thorn's transformation was not complete.

Hence, Red Thorn did not have any other choice but to remain frozen in a state of slumber.

If the special energy was not made up for, Lin Yuan would have to abandon Red Thorn's chance to transform in order to wake it up.

Lin Yuan was definitely not going to give up on the chance for Red Thorn to transform.

However, he needed to quickly solve the issue of Red Thorn's slumber because the Blood Brew Grapevine could not do without Red Thorn's Eyes of Relinquish.

The Blood Brew Grapevine grew numerous unripe Blood Brew Grapes, and every vine that the Blood Brew Grapes grew on also had two extra supporting vines growing out of it.

Without the energy from the Eyes of Relinquish, the Blood Brew Grapevine would quickly run out of nutrients and divert what little nutrients it had left away from the vines, causing the vines to wither.

This would reduce the production of blood energy.

If that happened, all of Lin Yuan's hard work would have been for nothing, and the Mother of Bloodbath's evolution to Myth III would be delayed.

Lin Yuan refused to let this happen.

He worked the gears in his head and made a wild guess. His eyes lit up.

Red Thorn was transforming because it had consumed the Source Seed. Evidently, Red Thorn's transformation was linked to the Source Seed.

It was highly likely that the special energy required by Red Thorn was the Source Seed's energy.

However, there were only three known Source Seeds. one had been evolved into Red Thorn by Lin Yuan, and the other had been placed in Red Thorn's spore cavity.

The last Source Seed had been evolved into a vine plant by a normal person.

After the normal person died, the vine plant was also wasted away due to the contract.

But the vine plant had been donated to the Fey Observer Association by the dead contractor's family.

It had been made into a specimen by the Fey Observer Association and was being kept in the Fey Observer Association's storeroom.

Lin Yuan could only retrieve the vine plant from the Fey Observer Association for Red Thorn.

He would feed it to Red Thorn to see if it would cause Red Thorn to transform. Otherwise, Lin Yuan would be rendered helpless.

Lin Yuan immediately left the Spirit Lock spatial zone and headed to the Fey Observer Association.

However, the Fey Observer Association was not a normal place, much less the Fey Observer Association situated in the Royal Capital.

This concerned Red Thorn's transformation and the Mother of Bloodbath's transformation, so Lin Yuan highly prioritized this matter.

In order to easily get his hands on one of the Fey Observer Association's specimens, Lin Yuan needed to make use of something he had left untouched for some time.

Lin Yuan shook his hand, and a brocade box appeared in his palm.

This brocade box had a layer of moon silk on top that faintly glowed with moonlight.

Lin Yuan opened the brocade box and took out the Class 2 Creation Master crest with a moon engraved on it.

He removed the Class 2 Creation Master crest on his chest and replaced it with the one with the moon engraving.

...

The Fey Observer Association in the Royal Capital did not allow avian feys to stop there. Thus, they immediately directed the avian fey that Lin Yuan arrived on inside.

Lin Yuan saw an elderly man shouting from the entrance, "Fey Observers! Class 1 to 3 exam materials! Better than the information you find on Star Web! 5,000 Federation dollars for one! We're only selling ten today. First come, first serve!"

In spite of all the elderly man's yelling, few people in the Fey Observer Association paid attention to him.

The rare glance thrown in the elderly man's direction was that of anger, as though he was doing something utterly despicable.

Lin Yuan felt that if not for the people from the Fey Observer Association around the area, these angry people would have beaten this elderly man up.

The elderly man spotted Lin Yuan and was about to advertise his Fey Observer materials to him when he noticed the moon engraving on his Class 2 Creation Master crest.

The old man was stunned, and his expression shifted.

He softly murmured, "Thousand Faced Fantasy Moth, remove the thousand faces."

When Lin Yuan heard this voice, he was shocked because it was not the same raspy aged voice from before. Instead, it was the gentle and calm voice of a woman.

A black moth with a thousand metallic patterns on its body flew out of the elderly man's body, and the old man's body melted away like a mirror of foam.

In the old man's place was a woman who seemed to be about 40 years old and wearing a long light-green skirt.

Lin Yuan stared in astonishment at this transformation. He did not know or dare to ask how this elderly man had changed into a middle-aged woman.

It was a terrifying event to take place in broad daylight!

Chapter 756: Lan Qin

The transformed middle-aged woman dressed in a long light green skirt walked up to Lin Yuan and said, "Welcome, my name is Lan Qin, and I'm the head of the Royal Capital's Fey Observer Association."

While the middle-aged woman was talking, the Thousand Faced Fantasy Moth landed on her hair and looked like a hair ornament.

If not for the intermittent flapping of the Thousand Faced Fantasy Moth's wings, it would be imperceptible as a living being.

Lin Yuan was bewildered by the transformation. He did not expect this to happen at the entrance of the Royal Capital's Fey Observer Association.

He also did not expect that the elderly man who had been peddling Fey Observer materials would turn out to be the head of the Royal Capital's Fey Observer Association.

Lin Yuan bowed to the middle-aged woman and said, "Greetings, Madam."

As he spoke, he used True Data to check on the Thousand Faced Fantasy Moth and found out that it was only Platinum VIII/Legend.

When Lin Yuan became a B-rank spirit qi professional, the mist-like spirit qi professional condensed into a fluid, and his ability to sense spiritual power improved significantly. He could already sense the strength of other spirit qi professionals' spiritual power through circulating his own spiritual power.

This was the innate comprehending ability of B-rank spirit qi professionals.

Lin Yuan could tell that Lan Qin's rank was about the same as his.

However, Lan Qin had a much higher store of spiritual power than him. It far exceeded that of B-rank spirit qi professional.

Nonetheless, given that Lan Qin remained a B-rank at her advanced age, it was clear that she was not gifted at combat.

Nonetheless, Fey Observer skills were mutually exclusive from fighting power.

The knowledge about feys and source-type lifeforms that Fey Observer had was a type of lifestyle-class spirit qi occupation.

In this world where martial law ruled, Lan Qin had to be a Class 5 Fey Observer in order for her to become the head of the Royal Capital's Fey Observer Organisation with her weak fighting skills.

Moreover, she had to be at the peak level of Class 5 Fey Observers.

Although this was the first time that Lin Yuan had seen Lan Qin, he had heard of her.

When Lin Yuan had logged into Star Web, he had heard of Lan Qin's prodigious reputation.

Fey Observers were not Creation Masters and could not nurture feys, but they were revered as 'The Mothers of Main Dragons'.

By studying the triggers in dragon-species feys' bloodlines that allowed them to mutate into dragon-species feys and training the bloodline to evolve into the main dragon-species fey, Lan Qin confirmed the most important components that led to dragon-species feys' evolution.

It was because of Lan Qin's research that led to more main dragon-species feys appearing in Radiance Federation.

The knowledge that one could gain in life was endless. It was incredible for a person to be able to generate information that was imperative to the world.

Creation Masters needed to concoct spirit fluids to evolve feys. Thus, they needed to have a grasp on Fey Observer and spiritual ingredient information.

But every field had its specialists. The information that Creation Masters knew about Fey Observers and spiritual ingredient analyses could not compare to that of Fey Observers and Spiritual Ingredient Analysts of the same class.

It could be said that Scholars, Fey Observers, and Spiritual Ingredient Analysts shared in the glory enjoyed by Creation Masters.

Many spirit fluid recipes came from Scholars, Fey Observers, and Spiritual Ingredient Analysts.

However, Creation Masters were needed to test these recipes.

Lin Yuan was surprised that Lan Qin would address him with such respect.

But this respect made Lin Yuan more aware of the Moon Empress' status.

Lin Yuan carried the Creation Master crest that the Moon Empress had given him because he wanted to obtain the Source Seed from the Royal Capital's Fey Observer Association with ease.

Lan Qin had clearly seen the moon engraving on his Creation Master crest and figured out his background.

From the way Lan Qin addressed him with such respect because he was displaying his status as the Moon Empress' disciple, he could tell how much respect Lan Qin had for his Master. Otherwise, as the head of the Fey Observer Association, she could have pretended not to know of his arrival and come to escort him herself.

Although Lan Qin had greeted him with such respect, Lin Yuan did not put on airs as the Moon Empress' disciple.

Lin Yuan sincerely offered his respect to this Class 5 Fey Observer and her boundless knowledge.

Lan Qin quickly reached out and gently pushed Lin Yuan up from his bow and said, "My Lord, I can't have you bowing to me."

Lin Yuan's lips twitched awkwardly, and he replied, "Master, as your junior, I don't deserve to be called Lord by you."

Lan Qin smiled warmly. "I shall call you Young Lord then. You must have some business to attend to here. Let me take you in, and you can tell me what you need."

Lin Yuan nodded and bowed in thanks as he said, "My apologies for inconveniencing you."

When Lin Yuan followed Lan Qin into the Royal Capital's Fey Observer Association, the people at the entrance could not help but freeze and stare in shock.

Many of these people had come to participate in the Fey Observer exam.

The Fey Observer Association was not as strict as the Creation Master exam but still had intervals. If one failed a Fey Observer exam, they would still be able to try again in another exam one month later, unlike the Creation Master exam, which only allowed one try per year.

Hence, the entrance to the Royal Capital's Fey Observer Association was always crowded.

Many people appeared every month to take part in the Fey Observer exam.

Although there were 12 chances to take part in the Fey Observer exam each year, the exam topics were always challenging. Many of the questions were extremely difficult. Even the best students that had consumed all of the Fey Observer information could fail if they were careless.

Every time these people came to take part in the exam, they would see an elderly man peddling Class 1 to 3 Fey Observer materials at the entrance.

Chapter 757: The Only Goal

The materials sold by the elderly man were truly cheaper than those sold on Star Web, and many people had purchased them.

However, when the people who purchased the materials brought them home and scanned through them, they would inevitably abandon them because there was more than three times the information offered on Star Web.

The Fey Observer information sold on Star Web was already difficult enough to understand, much less those sold by the elderly man.

Now, everyone knew that the elderly man was a facade.

Many people cursed out loud after they saw Lan Qin enter the Fey Observer Association.

"Crap, that stupid old man is actually Master Lan Qin! Thank God I didn't demand a refund from that old man."

"Oh my God, I can't believe my goddess Master Lan Qin has been right in front of me all along! I had no idea!"

"It's settled! I'm going to lock myself up for three months to carefully study the information I got from Master Lan Qin. Even if I still end up failing the Class 2 Fey Observer exam in three months, at least I won't get negative points."

A weak voice amongst the crowd peeped, "Hey, don't you guys find that young man next to Master Lan Qin familiar? He's the guy from the Allstar Match that..."

Before this weak voice finished, it was overshadowed by a chain of thunderous curses.

Although there were only 200,000 tickets to the Allstar Match, it had also been streamed live on Star Web.

Given that the Allstar Match was the precursor to the S Tournament, it generated a lot of buzz in the Radiance Federation. Thus, most people in the Radiance Federation had seen the live stream of the Allstar Match and remembered Lin Yuan's performance.

Lin Yuan had worn something different when he participated in the Allstar Match, which was why he had not been immediately recognized.

Most of the people had found Lin Yuan to be familiar, but this small reminder triggered the full memory about Lin Yuan.

As Lin Yuan walked alongside Master Lan Qin, he told her about the reason he had come to the Royal Capital's Fey Observer Association and said, "Master Lan Qin, I remember that the Royal Capital's Fey Observer Association has a rule. The feys or source-type lifeforms that have been made into specimens by the Fey Observer Association can be traded for an equally valuable specimen that has not been recorded by the Fey Observer Association before after six months of storage."

Master Lan Qin immediately knew why Lin Yuan had come and replied, "You're right. Young Lord, what would you like to trade for? I'll immediately get someone to arrange it for you. Many top factions have come to the Royal Capital recently. A lot of them will probably come to the Fey Observer Association to trade for feys or source-type lifeforms that have been turned into specimens. As such, there will be a lot of changes happening to the specimens in the association. Although the specimens are made public on Star Web, it's highly possible that many specimens will be taken during this time. But don't worry. There's still an abundance of specimens in the Fey Observer Association for now."

Lin Yuan could not help but feel anxious when he heard what Master Lan Qin said.

He knew that the Source Seed that had been nurtured into a vine plant had been stored as a specimen for a long time.

If the Source Seed had been traded away and ruined or used in research, it would be futile even Lin Yuan found out who the new owner was. He would have no choice but to give up on Red Thorn's chance at transformation.

"Master Lan Qin, the only goal I have of coming here is to obtain the Source Seed."

Lin Yuan's voice was solemn and sincere. Lan Qin could tell how important it was to Lin Yuan.

She raised an eyebrow when she heard that Lin Yuan was after the Source Seed.

Lan Qin frowned, not because she knew that the association no longer had the Source Seed, but because she could not remember much about Source Seeds.

As a Class 5 Fey Observer, she interacted with countless feys and source-type lifeforms every day.

She did not have a photographic memory, so naturally, a source-type lifeform like the Source Seed, which was already dead and did not have much potential left in it, had not left a deep impression on her.

If not for the Source Seed's special characteristics, it would not even be considered being made into a specimen by the Fey Observer Association.

"Young Lord, if the Source Seed is in the Royal Capital's Fey Observer Association, I'll definitely deliver it to you."

Lin Yuan nodded at Master Lan Qin's assurance and said seriously, "Master Lan Qin, the Source Seed is really important to me, and I hope that you'll be able to check if it's still here as soon as possible. Even if it has already been traded away, I hope you'll be able to tell me which faction traded for it so I'll be able to retrieve it."

Lin Yuan knew that the Fey Observer Association did not guard its specimens strictly.

Most of the people working in the Fey Observer Association had the authority to approve trades.

The Fey Observer Association even encouraged factions to exchange for specimens in bulk because it would ensure that the Fey Observer Association maintained fresh specimens. This would allow Fey Observers to have a stock of topics to study. They would not need to buy feys and source-type lifeforms to study.

Hence, Lin Yuan was really afraid that the Source Seed would have already been traded away.

The only thing that Lin Yuan could use to comfort himself was that the vine plant was not useful to most people. It was unlikely that there would be a person who was willing to trade resources for the Source Seed.

Lin Yuan and Master Lan Qin had already reached the top floor of the Fey Observer Association.

"Take a seat in my observer room first. I'll personally ask my assistant to check on the Source Seed for you," said Master Lan Qin.

Lan Qin had stopped walking as she opened a door on the other side of a wall and said to the woman cleaning up inside, "Xiao Fan, go to storage and check if there's a Source Seed."

Chapter 758: Only The Jasmine Lily

Lan Qin quickly added, "If you do find it, use the highest authority to bring it to my observer room."

The woman called Xiao Fan immediately set down her cleaning tools and lifted her head to see Lin Yuan standing next to Lan Qin.

Xiao Fan bowed to Lan Qin and then to Lin Yuan before saying, "Yes, I'll see to it immediately."

Xiao Fan walked out of Lan Qin's observer room.

Lin Yuan took in Master Lan Qin's observer room and noticed that it was very clean.

The design was minimalistic and did not have any unnecessary decorations.

Most of the space in the room was taken by the workbench, which currently had half the body of a dragon on it.

The dead dragon took up half the space on the workbench and was about 12 meters long.

This dead dragon's blood and bone marrow had been completely extracted, but its flesh and skin radiated immense might from its dragon-species bloodline.

The dragon-species fey's might mostly came from its blood and bone marrow.

It was clear that the dead dragon-species fey on the workbench was a main dragon-species fey.

Clearly, Master Lan Qin had been focusing on researching main dragon-species feys.

Besides the dragon-species fey, there was also a soft substance that had come from the body of a fey. This soft substance was stored in a crystal bottle.

Lin Yuan noticed that the crystal bottle was made of Blocking Crystal, a spiritual ingredient that could suppress power.

High-grade feys would still emit terrifying might after death which could harm weaker people.

It was just like how Lin Yuan had felt like his blood was concussed and that he would vomit blood at any time when he fought Nightmare VI on the island outside Indigo Azure City. This was in spite of him circulating his spiritual power to defend against Nightmare VI's might and the Lava Dragon Lizard using Lava Shield to shield him.

Master Lan Qin was not powerful and needed to use Blocking Crystal to prevent herself from being hurt by high-grade feys' might when she was studying them.

Under normal circumstances, Blocking Crystal could block the might of Myth III feys flawlessly, but Lin Yuan could clearly sense the faint might coming from inside the bottle. It seemed that the substance in the Blocking Crystal bottle came from a Creation Breed fey.

Lin Yuan had yet to interact with Creation Breed feys personally.

Master Lan Qin caught Lin Yuan looking at the workbench and smiled. She reached out to point at the sofa next to the workbench and said, "This Fiery Red-eyed Black Dragon has been dead for too long and no longer has any research value. Take a seat first. Even if Xiao Fan uses the highest authority to claim the Source Seed, it will still take half an hour for the Source Seed to get here. If the Source Seed has been traded away, Xiao Fan will bring the details of the trade instead."

Lin Yuan nodded and sat down on the sofa relaxedly. He stopped worrying over whether the Source Seed was still in the Fey Observer Association.

Even if it was gone, Lin Yuan could find its new owner through the details of the trade.

If the Source Seed really could not be found, there was nothing he could do about it.

Lin Yuan had just sat down when he heard Lan Qin say, "Young Lord, I'm slightly curious about what fey you used during the Allstar Match. I saw your fight and can only guess that you used a healing-type fey. However, there isn't a healing-type fey that can match up to the fey you used."

A strong look of curiosity appeared on Master Lan Qin's face.

No healing-type feys could absorb a target's vitality, but some could gain limited manipulative abilities when they evolved to Fantasy Breed. Yet, the healing-type fey that Lin Yuan had contracted could cause the target to feel happy while they were being harmed. It was too special.

Lin Yuan replied honestly, "Master Lan Qin, the only healing-type fey I contracted is the Jasmine Lily."

He did not elaborate.

When she heard what Lin Yuan said, Lan Qin looked shocked with a hint of realization.

She had considered many possibilities but did not think of the Jasmine Lily at all.

The Jasmine Lily's initial power was just too weak.

But as a Class 5 Fey Observer, Master Lan Qin was well aware of low-grade feys' evolution potential.

The improbably Jasmine Lily turned out to be the actual one.

Although Master Lan Qin was not a strong combat-class spirit qi professional, she knew that spirit qi professionals were not open about their contracted feys.

Lin Yuan's answer had solved Master Lan Qin's question. Thus, she would not ask Lin Yuan to summon the Jasmine Lily for her to observe.

After Lin Yuan answered Master Lan Qin's question, he realized that Master Lan Qin's gaze was locked on him.

As a junior, Lin Yuan could not speak freely to Master Lan Qin. But from the way she was staring at him, it seemed that she did not have anything else to say.

This made Lin Yuan antsy.

A moment passed, and Master Lan Qin said, "Young Lord, you're the one who got full marks on the Class 1 Scholar, Class 1 Fey Observer, and Class 1 Spirit Ingredient Analyst exams, aren't you? The questions set by Elder Ning are much harder than those set by the Fey Observer Association. Among the many Creation Master Associations, there are only about two or three people out of 1,000 who can pass the lifestyle-class exams."

Master Lan Qin did not say anything more.

Lin Yuan might not be Master Lan Qin's disciple, but her eyes shone with admiration for him now.

Lin Yuan was surprised that Master Lan Qin had figured out that it had been him.

After all, he was the only person in Radiance Federation who knew that he had scored full marks in the three lifestyle-class spirit qi professional exams to gain the right to take the Creation Master exam.

Chapter 759: Dark Clouds Bird Shrine

Redbud City's Creation Master Association set their own questions, but the participants needed to submit their exam scripts and results to the various lifestyle-class associations after the exam.

They also needed to submit a photo of themselves when they handed in the exam materials. Hence, it was not strange that the head of the Royal Capital's Fey Observer Association would recognize him.

However, Lin Yuan was confused by the meaning behind Master Lan Qin's words.

While Lin Yuan was pondering over Master Lan Qin's words, Master Lan Qin stretched out her hand and gave him a Bronze fey storage box.

"I won't be selling these Class 1 to 3 Fey Observer information that I consolidated myself anymore. You can have a look at them. I might not be your Master, but I hope to see you pass the Class 2 and 3 Fey Observer exams with flying colors," said Master Lan Qin kindly.

Master Lan Qin's words of encouragement made a wide smile stretch across Lin Yuan's face. He solemnly received the Bronze fey storage box with both hands.

"Master Lan Qin, I will carefully look through all the Class 1 to 3 Fey Observer information inside."

Initially, he did not understand why Master Lan Qin would pretend to be an elderly man and sell Fey Observer materials at the low price of 5,000 Federation dollars.

When Lin Yuan had been working at the spirit-lifeform store in Xia Region, he had only managed to earn 5,000 Federation dollars after he worked himself to the bone for half a year.

5,000 Federation dollars was nothing to Master Lan Qin, but she had definitely spent a long time collecting these materials.

She was trying to give hope to the next generation.

It was hope that she had as a Fey Observer that wanted to train a competent next generation.

After Master Lan Qin handed Lin Yuan the Bronze fey storage box, she suddenly remembered how she had collected money in exchange for these Class 1 to 3 Fey Observer materials that she spent days and nights putting together.

A lonely shadow passed across Master Lan Qin's gaze as she sighed and said, "Young Lord, there is three times the amount of information here than what can be found on Star Web. It will come off as lengthy. I also added in some results about fey experiments. All this might take up a significant chunk of your time."

Lin Yuan noted Master Lan Qin's lonely expression, and his heart ached.

He quickly replied, "Master Lan Qin, I think the most important part of being a student is the rigor. This comprehensive information is a blessing to the other Fey Observers and me."

The age lines around Master Lan Qin's eyes softened as she smiled brightly.

She was about to strike up a conversation with him when someone knocked on the door.

After three knocks, Xiao Fan walked in and bowed to both of them before saying, "I have located the Source Seed. Since it did not stand out and could not be used as a spiritual ingredient, it has been left in the trash pile. However, the specimens in the trash pile were traded away yesterday as Class 3 materials."

Lin Yuan furrowed his brow. He was a step too late, after all.

However, he still let out a breath of relief because this also meant that the Source Seed would probably not have been used yet.

Master Lan Qin turned and said to Lin Yuan, "If it was traded away as Class 3 materials, it should still be in the association now and going through final processing. It will only be sent out at 5:00 p.m. tonight."

She checked the time and realized that it was almost 5:00 p.m.

Master Lan Qin said anxiously, "Young Lord, I'll go with you to retrieve the Source Seed from the pile."

When Xiao Fan heard Master Lan Qin address Lin Yuan as 'Young Lord', a look of astonishment crossed her face.

A quick glance at the Class 2 Creation Master crest on Lin Yuan's chest, and she immediately realized why he had been addressed as so.

This was truly one of the chosen ones and was unbelievably special.

Why did a person like him come to the Royal Capital's Fey Observer Association personally?

Regardless of what she was thinking, Xiao Fan said softly to Lan Qin, "Madam, the specimens were ordered by the Li family's Dark Clouds Bird Shrine."

Xiao Fan had used Master Lan Qin's highest authority to retrieve the Source Seed from the pile of specimens.

However, this pile had been ordered by Dark Clouds Bird Shrine, and they had already negotiated a price with the Fey Observer Association.

The pile was already as good as belonging to Dark Clouds Bird Shrine.

Although it did not seem to be a serious matter to snatch one of the items, it could be seen as a sign of offense to Dark Clouds Bird Shrine.

This was why Xiao Fan had decided not to use the highest authority after much hesitation.

But now that a person of Lin Yuan's status wanted the Source Seed, there was no longer any need to consider Dark Clouds Bird Shrine's feelings.

Dark Clouds Bird Shrine could only smile and accept the situation as this person snatched an item from them.

Master Lan Qin frowned slightly at Xiao Fan.

When Xiao Fan came in empty-handed, Master Lan Qin knew that Xiao Fan was bothered by something.

Thankfully, the Source Seed was still in the association. If the Source Seed had been taken and used by Dark Clouds Bird Shrine during the time that Xiao Fan came to report to them, Master Lan Qin would not be able to face Lin Yuan.

Lan Qin could tell that the Source Seed was extremely important to him from Lin Yuan's attitude.

Lin Yuan's expression relaxed when he heard the exchange between Xiao Fan and Master Lan Qin. Now, he knew that the Source Seed was still in the Royal Capital's Fey Observer Association.

This matter concerned Red Thorn's transformation, and Lin Yuan would do anything to obtain this last Source Seed.

Chapter 760: The Unexpected Familiar Face

When Lin Yuan and Master Lan Qin went downstairs and headed toward the Fey Observer Association's storeroom, he listened as Master Lan Qin explained to him the process of converting feys and source-type lifeforms to specimens.

Lin Yuan found the process to be too convoluted.

Even elite factions only had Class 3 authority, while Master Lan Qin had Class 5 authority.

Master Lan Qin wanted to give Lin Yuan Class 4 authority, and he did not reject her or show overt excitement.

He had never needed to obtain specimens from the Fey Observer Association before.

The feys and source-type lifeforms that were made into specimens by the Fey Observer Association were all dead.

These dead feys and source-type lifeforms could be useful if they were nurtured but did not have any especially valuable use to them.

The dead feys and source-type lifeforms that contained valuable spiritual ingredients had already been separated and sent to the Spiritual Ingredient Analyst Association when they first arrived at the Fey Observer Association.

Most of these specimens that factions had traded for were also used in Fey Observer-related research in the hopes of gaining a better understanding of feys.

However, Lin Yuan had no need to study feys because True Data already contained flawless information about all entities.

True Data could provide more comprehensive information as Morbius evolved.

Lin Yuan used his own abilities to evolve feys. His method completely differed from that of normal Creation Masters because he did not use many spirit fluids.

After Genius evolved to the Beast that Connects Everything, its spiritual energy increased so much that it did not need to worry about running out of spiritual energy when it picked up new knowledge.

Genius' knowledge developed from an intangible source to tangible power.

When it combined Precise Memory and Knowledge Analysis, Genius had already created many different spirit fluid recipes.

These spirit fluid recipes were mostly unfeasible, but there was one regarding the Soldier Ration Radish that had already succeeded.

Genius used the Soldier Ration Radish's vines as spiritual ingredients and combined the Soldier Ration Radish's separation ability with the spirit fluid with the help of the Lifeform Sacrificial Fire.

This spirit fluid was named Luxuriant Spirit Fluid, and it could be used to increase the growth of plant-type feys.

There had been no obvious effects when Genius used the Luxuriant Spirit Fluid on the Soldier Ration Radish's old roots, but when it was poured on the Golden Lotus Brocade Pearls, many new Golden Lotus Brocade Pearls grew out.

After being showered with the Luxuriant Spirit Fluid, a week's worth of Golden Lotus Brocade Pearls grew out within a few hours and were ready to be removed from the ortet.

Now that Lin Yuan had the information that Genius had accumulated, it was like he had gained numerous top Fey Observers, Spiritual Ingredient Analysts, and Scholars.

The information from these top Fey Observers, Spiritual Ingredient Analysts, and Scholars was also perfectly combined and working in unison.

Genius used his creativity and knowledge to generate a kind of wealth for Lin Yuan that was far more precious than the heavenly-maiden-grade elemental pearls.

Lin Yuan saw a large metal door at the end of the corridor.

"Young Lord, that's the storeroom," said Master Lan Qin.

Lin Yuan walked through the large metal doors to see towering stacks of Gold fey storage boxes.

Every Gold fey storage box had a form attached to it that detailed the fey or source-type lifeform inside.

Four or five staff members in long robes were moving the Gold fey storage boxes around, while an elderly man with a loud voice was talking to two youths in front of the Gold fey storage boxes.

Lin Yuan saw that the elderly man's long Fey Observer robes had five gold circles on it and knew that he was a Class 5 Fey Observer.

The Royal Capital's Fey Observer had one President and five Vice Presidents.

This elderly man was either one of the Vice Presidents or in the upper echelons of the Fey Observer Association.

When Lin Yuan saw the faces of the two youths, he was stunned.

One of the young men had large eyes, a stocky body, and very short hair. He was wearing white half armor that radiated fridity, and it looked to be made of Winter Crocodile skin.

The man next to the man in the white half armor was wearing a simple light-colored long robe. His eyes resembled that of a dragon, but his lips were thin. He looked distant and cold.

Lin Yuan knew this person. He was Sequence #3 in the Radiance Hundred Sequence, Long Tao.

He was well-acquainted with Long Tao.

Lin Yuan and Long Tao had experienced the Class 3 dimensional rift battle and had become friends.

However, Long Tao was friends with the combat-class spirit qi professional Black and not the Creation Master Lin Yuan.

Long Tao's head was lowered as he used his phone while the man in white half armor conversed with the elderly man.

The man in white half armor saw the approaching Lin Yuan and Lan Qin.

Although the man in white half armor did not recognize Lin Yuan, he recognized Lan Qin, who was the President of the Royal Capital's Fey Observer Association.

The man greeted Lan Qin and said, "Hello, Master Lan Qin. I was going to visit you once we settled this batch of specimens. My father brought three kinds of mandarin ducks that Dark Clouds Bird Shrine has evolved with us. We hope that you can take a look at them."

Lan Qin's eyes lit up.

Dark Clouds Bird Shrine specialized in nurturing avian-type feys.

The Gray Rapid Pigeon, Divine Travel Black Swallow, and Rainbow Clouds Swan that were used as transport in the Radiance Federation mostly came from Dark Clouds Bird Shrine.

The Li family nurtured new types of avian-type feys every once in a while.. These avian-type feys were largely used as modes of transport and were immediately sought after by the entire Radiance Federation when they were released.
