

MECHANICAL GOD EMPEROR

Chapter 7 – Killing a Knight Rank Powerhouse

Translator: Xaiomoge

Shen he saw Barry expel the six bullets out of his body, Yang Feng couldn't help saying: "Amazing! Even bullets can be expelled! Knights are really awesome! No wonder it's so difficult to succeed in cultivation!"

On Earth, after being shot six times, there was no one capable of expelling the six bullets out of their body. Barry was the first martial arts expert that Yang Feng has ever seen.

However, Barry was merely a Knight. There were still three higher ranks – Great Knight, Earth Knight, and Sky Knight. Besides, Knights weren't the strongest force in this world. Warlocks were at the summit of this world. A trifling Knight was already this powerful, then how strong would a Warlock be? This realization left Yang Feng more awed with this world.

In the Turandot Subcontinent, so long as you advanced to a Knight, you would possess extraordinary strength, you would possess power far beyond that of ordinary people.

With a bellow, Barry drew his great sword and rushed furiously towards Yang Feng.

Yang Feng said indifferently: "Bladed robot, go exchange some blows with him! Other than his head, you can attack freely!"

The sunglasses-wearing bladed robot standing beside Yang Feng drew its two super-alloy battle blades one after another, then blurred into motion and threw itself at Barry like a fierce tiger. It appeared before Barry and mercilessly hacked at him.

Barry raised his sword to parry.

Ding! An ear piercing, metal-striking-metal sound rang in the area. Barry's face turned pale, and he retreated briskly. Blood dripped from underneath his armor.

“A Knight! How can you have a Knight rank expert as a bodyguard?” Barry’s eyes flashed with shock, and he exclaimed.

It was very difficult to support a Knight. The set of heavy armor Barry was clad in cost over 400 gold coins. In addition, a Knight’s minimum wage was no lower than 20 gold coins per month. With equipment maintenance, the feed for the mount, and other necessities, it cost over 30 gold coins per month to support a Knight. A lesser aristocrat like Zhao Jiang couldn’t bear such expenses.

Yang Feng’s eyes flashed with excitement and he whispered: “To be able to block a robot’s all-out attack with the human body, truly impressive! Worthy of a powerhouse who surpassed the limitations of the mortal body.”

After injuring Barry with the blade strike, the bladed robot took a ferocious step, and continued to slash at Barry with its enormous alloy battle blades.

With an enraged roar, Barry erupted with a powerful life force, brandished his large sword, and exchanged a round of strikes with the bladed robot.

Barry could barely withstand the violent attacks of the blade robot after stimulating his powerful life force. But even so, he was still in a completely disadvantageous position, tottering. He soon would be unable to parry the bladed robot’s flurry of strikes.

“Follow me! You can kill and loot for 3 days after we breach the city wall!!” The eyes of the vice-leader of the Black Wind Bandits flashed with a fierce glint, and he roared.

“Kill!!”

“Kill!!”

“ ... ”

Eyes flashing with blood-thirsty radiance, the more than 100 Black Wind Bandits quickly reached the bottom of the city wall, grabbed the ropes, and climbed up.

Yang Feng swept the Black Wind Bandits at the bottom with a look and sneered: “Gunner robot, kill them all!”

With a 12.5 millimeter heavy machine-gun in each hand as well as an enormous bullets case on its back, the gunner robot quickly arrived at the edge of the city wall, and the two 12.5 millimeter heavy machine-guns in its hands spewed fierce tongues of flame at once.

The sound of heavy machine-gun bullets tearing cloth reverberated.

One bandit was shot in the head by a 12.5 millimeter bullet, and his head burst open alike a watermelon.

Another bandit was shot in the shoulder by a 12.5 millimeter bullet, and his arm was blown away.

Yet another bandit was shot in the chest, and a huge bloody hole appeared in his chest.

Faced with that terrifying hail of metal, the bandits lacked the ability to resist. Blood spilled everywhere and, one after another, they turned into corpses.

“Leader, let’s flee!!” When the vice-leader of the Black Wind Bandits saw his subordinates being torn apart by the hail of metal, he issued a miserable cry.

In the next moment, a dozen heavy machine-gun bullets slammed into the vice-leader and tore him to pieces in a flash.

In less than 3 minutes, the Black Wind Bandits, which used to terrorize the towns in the surroundings of the Giant Stone City, were butchered and minced.

History had proved countless times that resisting a hail of metal with the body was a moronic action.

“Zhao Jiang, you bastard, return my brothers!!” Barry’s eyes turned bloodshot, and he snarled.

Yang Feng coldly replied: “Bandits also value camaraderie? Gunner robot, go ahead!”

The gunner robot aimed the heavy machine-guns at Barry, and then the sound of heavy machine-gun bullets tearing cloth reverberated again.

The heavy machine-gun bullets easily ran through Barry's heavy armor. His lower body was torn to numerous pieces, and blood splattered about.

The bladed robot stepped forward, swung an enormous alloy battle blade downwards, and severed Barry's head.

Dumbstruck, the guards atop the Autumn Leaf Castle's city wall felt like this was a dream. The Knight Barry, an unparalleled demonic-like existence, to everyone's surprise, was easily killed by Yang Feng's two experts. The over 100 Black Wind Bandits were torn to pieces to a man, which was simply unbelievable.

The butler Liu's eyes flashed with excitement, and he said in a shaky voice: "Warlock, Alchemist! Master, have you obtained the power of an Alchemist?"

The guards atop the wall also looked at Yang Feng with awe and worship in their eyes.

Warlocks were pinnacle powerhouses of the Turandot Subcontinent, and they possessed all kinds of extraordinary abilities. Even if it was the Fernandro Principality's monarch, he would have to be respectful in front of an official level-1 Warlock, not daring to show any neglect. Only with the power of Warlocks was it possible to easily destroy such an armed force like the Black Wind Bandits.

Yang Feng responded indifferently: "That's right, I obtained the power of an Alchemist."

"Great!! That's great!! At last, the Zhao Family can shine brightly, and welcome great development." The butler Liu trembled, his eyes overflowed with turbid tears, and he muttered excitedly.

The Autumn Leaf Castle's guards also issued excited cheers. As the subordinates of a Warlock, they had a bright future ahead of them.

Yang Feng had the bladed robot carry Barry's severed head, and went to the munitions factory where 3796 was located.

Once he arrived at the munitions factory, Yang Feng handed 3796 Barry's severed head to have his memories read.

Before long, Barry's memories were read, enabling Yang Feng to become privy to the ins and outs of different matters.

The Black Wind Bandits were a criminal extension of the Tree Mountain City, a neighbor of the Giant Stone City. The master of the Tree Mountain City Earl Locky and Viscount Harley were mortal enemies locked in an endless struggle.

After Yang Feng borrowed a lot of gold coins from Baron Kirov, the Autumn Leaf Town was likely to be annexed by Barron Kirov, which would strengthen his power. Earl Locky dispatched the Black Wind Bandits to exterminate the Zhao Family. With the Zhao Family exterminated, the Zhao Family's fief would be taken away by the Fernandro Principality. By then, by adopting various means, Earl Locky could have a friendly aristocrat transferred to the fief, invading Viscount Harley's scope of influence.

"The enemy of my enemy isn't necessarily my friend. Weakness is sin, while strength is truth!" It dawned on Yang Feng.

If Yang Feng hadn't had the power of the xizu inheritance, he might have become a corpse by now, not even knowing why he died.
