

Chapter 10: My Genes Evolve Infinitely

SANDSTONE CITY, GREY STONE FOREST

After , Lu Yuan talked to Fleming again about the genetic warriors, and it was night soon.

Lu Yuan said goodbye to Fulangming and returned to his cubicle.

He sat on the bed, turned his head and looked out the window.

Under the silent night sky, the neon lights in the distance flickered, outlining the bustling city of Xili.

Lu Yuan took a deep breath, let go of his nervousness, and then closed his eyes.

let's start.

His consciousness was integrated into the genetic war pattern.

The golden lines on the genetic war pattern flashed a faint light.

In Lu Yuan's consciousness, the white mist surged, forming a light gate on the edge of the gene chain.

Although he had never entered, Lu Yuan's instinct told him that it was the door to the place of origin.

Lu Yuan pursed his mouth, and his consciousness approached Guangmen.

The next moment, his consciousness went dark, and when Lu Yuan opened his eyes again, he saw a blazing sun, and his body felt the hot high temperature and dry air for the first time.

Lu Yuan looked around. He was in a huge square, and there were many khaki buildings outside the square.

The sky is a bit dim, covered with yellow sand.

There was a hint of shock in Lu Yuan's eyes.

This place of origin is really amazing, and it allows him to come to an unfamiliar place casually.

It is said that in the entire universe, all intelligent races can enter the land of origin.

In other words, the place of origin connects the entire universe!

No one knows where in the universe the place of origin is, and why it can be connected with all intelligent races.

The noisy voice drew Lu Yuan back from shock.

‘Come to a guardian warrior, go to the yellow sand insect’s lair! Just the elves!’

‘The elements of elite genes are soldiers leading the team and go to the Gobi to kill sand scorpions! Any race, except kobolds!’

‘Human Xiao Mengxin wants a personal team, is there a big guy with Mengxin~~’

Lu Yuan’s expression was a little weird when he heard the sound like a vegetable market.

Many creatures are gathering together in the square, shouting to form a team.

Lu Yuan discovered that besides the human race, there are other races here.

The elves that often appear in fantasy stories on the earth have a tall and slender body, pointed ears, and a handsome face.

There are kobolds with dog heads.

Lu Yuan’s eyes widened when he saw a beautiful cat with cat ears and a wagging tail behind his ass.

Kitty really came to pay back ? !

Which old-fashioned critic can withstand this cat ears and cat tail ? !

Lu Yuan was ecstatic in his heart.

This world is so wonderful!

On this square, there are only four races: humans, elves, kobolds and cats.

This initial city is a city of four races.

As for where this city is, Lu Yuan already knows.

The blazing high temperature, the yellow sand on the square, and the turbid air are all in the desert Gobi area.

Among the four initial cities of the Daqixing tribe, only Sandstone City is in the desert Gobi area.

When he thinks of Shayan City, Lu Yuan recalled the information he had seen before.

Sand Rock City is located in a desert area, surrounded by yellow sand and Gobi. The monster types are mostly rock, poison and wind.

Lu Yuan thought of the surrounding environment and monsters in his mind, suddenly someone patted Lu Yuan on the shoulder.

Lu Yuan frowned slightly, turned his head and looked over.

A handsome elf in yellow leather armor stood there with a smile on his face.

‘Human friends, alone?’

Lu Yuan raised his eyebrows and smiled:

‘What’s matter?’

‘Hahaha, we are going to hunt the graystone beetle, or together? The income is distributed according to the contribution.’

While talking, the elf man pointed behind him. There were three people not far away, a tall and thin elf, a kobold, and a human race.

Lu Yuan glanced at it and shook his head: ‘No, thank you.’

He turned around and planned to leave, but the elf man stopped Lu Yuan:

‘Hey, friends don’t go, it’s dangerous to take risks outside alone, right?’

Lu Yuan glanced at him, then smiled:

‘Who said I am alone? My friend is already waiting for me outside.’

Hearing this, the elf man smiled stiffly:

‘So you already have a partner? Okay. I won’t bother you.’

He stepped aside, and Lu Yuan walked over.

The elf man curled his lips: ‘It’s really bad luck.’

Three creatures not far away came over.

The head man smiled and said:

‘Boss, how is it?’

‘That person has friends outside.’

Upon hearing this, the three creatures all showed disappointment:

‘It’s a pity, that person’s reaction is that Mengxin just came in, but I didn’t expect someone to bring it.’

‘Change your goal.’

The elf man sighed: ‘Nowadays newcomers are getting more and more difficult to deceive. Do we have to change?’

‘Transformation is too difficult. Why don’t you find a chance to hold a meeting and upgrade your deception?’

‘That’s okay, this time it really doesn’t work, just go out and kill the graystone beetle.’

‘Um.’

.....

Lu Yuan left the square and looked around.

The streets of Sand Rock City are covered with yellow sand. On both sides of the streets are buildings made of yellow rocks. There are rock giants walking on the streets.

This Lu Yuan has seen it in the previous post.

Each initial city has its own structure to maintain the minimum operation of the city.

This rock giant is the structure of Sandstone City, used to maintain law and order.

You can't fight in the city.

Sand Rock City is very big. Because of the tight time, Lu Yuan trot all the way. It took two hours before he saw the city wall.

The city wall is also made of yellow rocks and is about 30 meters high.

Unknown giant cannons are placed on the wall of the city, and there are structures on patrol.

Lu Yuan came to the city gate. There were two constructs guarding them, but no one checked them. All genetic warriors left Sandstone City directly or entered the city.

Lu Yuan walked out of the city gate and saw a desolate Gobi. The wind was howling and the sky was full of yellow sand.

Lu Yuan was holding his nose, feeling a little uncomfortable.

The four initial cities of the human race, each has its own harsh environment, just like storms around Stormwind City, people will be blown into the sky if they are not careful.

The air pollution in Shayan City is too serious, and half of a breath of air is sand.

is a bit difficult.

Luyuan discerned the downward direction and moved to the right of Sandstone City.

The place he is going to is an area called Grey Stone Forest.

The main beast in that area is the graystone beetle, which is also a very weak beast in the trainee level.

The probability that the Greystone Beetle will drop the Soul of War is almost zero, but its stone armor is a material for forging genetic weapons, which can be sold for money.

is a safe choice for Lu Yuan.

Because the fierce beasts of the land of origin have not signed the mount, Lu Yuan can only run on his legs.

Two hours later, Lu Yuan entered the Land of Origin for four hours, and finally a Gobi area full of gray rock and stone pillars appeared in front of him.

This is Grey Stone Forest.

This Gobi area can't be seen at a glance. In the posts I checked before, there are boring genetic warriors who have specifically measured the size of these areas.

Grey Stone Forest has a radius of nearly 100 kilometers, which is very outrageous.

Lu Yuan sighed, took a sip of the bottled water, and ate some energy bars.

was running all the way, he felt that people were drying out.

After replenishing his stamina, UU read www.uukanshu.com Lu Yuan slowed down again, recovered, and then entered the gray stone forest.

Not long after entering the Grey Stone Forest, Lu Yuan heard the sound of fighting in front of him.

He glanced at the front. Two cats, one holding a long sword and the other holding a bow and arrow, were attacking a gray beetle the size of a puppy.

There are five or six corpses of graystone beetles on the ground.

The cat man with a bow and arrow is very good at archery. He draws the bow and shoots the arrow. The long arrow turns into streamer and sinks into the graystone beetle's eyes.

Instant kill.

Lu Yuan's pupils couldn't help but shrink.

There are no precious resources in this area, and the strong will definitely not come to such a place.

, most of the people who came here were genetic warriors who had just awakened and had no ability to explore other areas.

However, even so, there is still a difference in strength.

Lu Yuan felt that he might not be able to beat that archer one-on-one now.

I'm still a cute new person, I have to work hard, only in this way can I become the pillar of the human race!

Lu Yuan sighed for himself, then quietly left.

This is not in the city, fighting is not forbidden, let alone different races, even if the same race encounters, they might fight.

It's too bad if you die.

In order to be safe, Lu Yuan deliberately looked for a direction where there was no fighting movement.

After another twenty minutes, his surroundings have become very quiet.

At this moment, Lu Yuan saw a graystone beetle lying under a stone pillar in front, with a huge mouthpart gnawing at the rock.

quack quack, it seems to be eating with relish.

Lu Yuan looked around, his eyes lit up.

I didn't expect to encounter the graystone beetle alone, wonderful.

Get on it!
