

# Chapter 109: My Genes Evolve Infinitely

## SMALL WORLD, GENETIC CONCEPTION OF SPACE SYSTEM

‘Okay, let’s go in.’

Li Qinghe smiled and patted Lu Yuan on the shoulder, leading him to the door.

Two doormen in black uniforms stood at the door.

Lu Yuan glanced over, and the breath of the two guards made him feel a little depressed.

is very strong.

is probably a war master, maybe even a war general.

The two guards also saw Lu Yuan and Li Qinghe.

After seeing Li Qinghe, they all shrank their pupils and said respectfully to Li Qinghe:

‘Master Li, why are you here?’

Li Qinghe smiled and said:

‘I will bring someone to the assessment.’

‘So that’s the case, please come in.’

The guard opened the door and let them in.

After entering the door, Lu Yuan discovered that the area of this genius camp was not small. But I didn’t see any figure, it was empty.

‘Why are there no one?’

Lu Yuan has some doubts.

Li Qinghe said:

‘This genius camp covers an area of 4 million square meters. The school is very large, but there are only 826 students, so it is normal to not see people.’

Lu Yuan was a little surprised when he heard this:

‘There are so few students here?’

‘Of course, the genius camp only accepts real geniuses. For example, at the first level, it has burned the boss gene, learned powerful physical skills and even spiritual skills. Of course, the genius camp is divided into two parts, one is the warhead and the other is The research department. The warheads are all combat geniuses, and the research department is the research geniuses such as genetic pharmacists and blacksmiths.’

Lu Yuan nodded suddenly.

The requirements are so high, no wonder there are fewer people.

The first genes that most people burn are ordinary genes. It is a rare genius to be able to burn elite genes.

Even if the second gene is a fighter with an elite gene, only a small part of it can burn the boss gene.

One can imagine how small this ratio is.

‘There are many high-level training places in this school, such as the gravity room, simulation room, spiritual power room and so on. It also contains many treasured extraordinary genes, as well as some powerful genetic weapons, physical skills, etc.’

‘There is also a gravity room and a simulation room? Is it free to use?’

Lu Yuan was a little curious.

In the place of origin, the rent of the gravity room and simulation room is expensive. If you use it for free, it is still quite profitable.

Especially the simulation room, the rental price is very high.

Li Qinghe squeezed Lu Yuan's face and smirked:

‘If you say it is free, of course it is free. But it depends on your ranking and credits... You can understand these after joining the genius camp. However, these training equipment is not the point, as long as the spirit crystals are enough, in the place of origin It can also be used. The focus is on the extraordinary genes, physiques, and some treasures collected by the genius camp. Some of them are extremely rare. Even if you have spirit crystals, you can't buy them. It helps a lot.’

Lu Yuan nodded when he heard the words.

If there is a particularly powerful transcendent gene, it will really help him.

Especially, he can also evolve extraordinary genes to a higher level.

.....

Soon, the two came to a room.

Li Qinghe knocked on the door.

‘Come in.’

Li Qinghe opened the door and walked in with Lu Yuan.

Lu Yuan glanced around and found that this was an office.

In addition to him and Li Qinghe, there are seven others.

One is a white-haired old man sitting behind the desk.

There are six other people, two middle-aged men, and one mature woman.

The remaining three are two young girls and one teenager.

After Lu Yuan and Li Qinghe came in, everyone turned to look at them.

Lu Yuan found that they looked at him more.

Especially the three young girls, looking at him with scrutiny and curiosity.

After Li Qinghe entered the door, he smiled at the white-haired old man:

‘Lao Yu, he is my recommended genius, called Lu Yuan.’

The white-haired old man looked at Lu Yuan and showed a gentle smile:

‘Since it was recommended by Qinghe, it can’t be wrong.’

This is, a burly middle-aged man said:

‘Old Yu, time is almost up, right?’

Yu Lao nodded: ‘Well, there are only four little guys taking the test this time. Everyone is here, so let’s go.’

Yu Lao got up, and a few people went out together.

Lu Yuan secretly asked Li Qinghe with his spiritual power transmission:

‘Sister Qinghe, where are we going?’

‘Take you to the test.’

‘Where to test?’

‘In the genius camp, there is a small world for newcomers to test, and there will be some beasts in it, and that small world is used for each test.’

‘small world?’

Lu Yuan looked stunned.

He knows that sometimes some space gates will appear on the planet.

These space gates lead to random places, some lead to planets of other races, and some lead to uninhabited planets.

There are even space doors leading to the stars.

But what is the small world ?

Seeing Lu Yuan's doubts, Li Qinghe explained: "It is a world that can be opened up by the powerful warriors who have recorded the space gene. The scope is small, only a few hundred kilometers in size. It can be built with a little bit, and it is still possible to make a test space. of."

Lu Yuan was a little shocked when he heard this:

'Burning the space gene, can you build the world by yourself?'

'It depends on the quality of the space gene you are burning.'

Li Qinghe saw Lu Yuan look expectant, smiled and said:

'General quality spatial genes are definitely not good, but the genes of the space system are indeed extraordinary. Compared with most types of extraordinary genes, they are still very powerful. But these types of genes are very precious. As long as they are space genes. , Even if it is ordinary quality, there are many people vying for it.'

Li Qinghe has the gene of spatial type himself, so naturally he still understands a little bit.

After listening to Li Qinghe's introduction, Lu Yuan's heart pounded.

For him, the quality of genes is not a problem.

As long as it is a space-type gene, he can evolve to a sufficient height, and maybe he can create the world by then ?

Lu Yuan can't wait to get a space system gene to burn right away.

When it comes to space, Lu Yuan thinks of time again.

If he can find the genes of the time line and burn them, then wait for him to evolve the genes to the limit, can he travel through the long river of time ?

I heard from Sister Qinghe that there are many treasured genes in this genius camp. I wonder if there are genes related to time and space ?

Thinking this way, Lu Yuan looked forward to it more and more.

The group soon came to a hidden room.

Opening the door of the room, you can see a slight distortion in the center of the room, and you can see the plane of the forest and river.

is a bit like a mirror floating in the air.

This should be the entrance to the small world.

In front of this entrance, a black-haired man and a blond-haired man were waiting, and there were some instruments beside them.

Yu Lao asked with a smile:

‘Are you ready?’

‘Old Yu, I’m ready.’

The black-haired man said.

‘All the fierce beasts have been marked with special marks.’

Yu Lao smiled and nodded, then turned to look at Lu Yuan and the other three young girls.

‘Come here.’

The four of Lu Yuan walked over.

Yu Lao smiled and said:

‘The content of your test is to enter this small world, and then hunt down the beasts inside to obtain the marks on the beast. Each mark represents points. The stronger the beast, the higher the mark points on its body. I have to tell you that there are four second-tier bosses in it. Although they are all low-level bosses, they are still very dangerous for you. While hunting fierce beasts, be careful not to become prey. The small world is not the origin. The land will not be reborn after death.’

Lu Yuan recalled the previous battle in the slums of Xili City and nodded seriously.

The other three also nodded.

Seeing the four nodded, Yu Lao opened his mouth with a smile:

‘Next, I will tell you about the value of points. These four second-tier bosses also have the highest points. One boss has 50,000 points. For the other fierce beasts, the ordinary fierce beasts of the first order have 1 point, and the low-level elites of the first order. 10 points for fierce beasts, 20 points for intermediate elite fierce beasts, 30 points for advanced elite fierce beasts, 50 points for peak elite fierce beasts. The first-level low-level fierce beasts score 1000 points, the intermediate fierce beast leaders receive 2000 points, and the high-level fierce beasts score 2000 points. The beast leader scores 3000 points, and the peak fierce beast leader scores 5000 points.’

The low level here represents 0% hardening to 30% hardening.

Intermediate represents 30% to 60% hardening.

High-level represents 60% hardening to 90% hardening.

Pinnacle represents 90% tempering degree to 100% tempering degree.

100% gene tempering degree, it can be regarded as a consummation level.

Yu Lao took out four black instruments and handed them to four people.

‘After getting the mark, you can use this instrument to record and count the points. The final test results are ranked by the number of points.’

‘The test time is 10 hours, and the passing criterion is 10,000 points. The first place is awarded with 100 credits, and the second place is 80 credits. The third place is 50 credits.’

Yu Lao said with a serious face: ‘The test can only be completed by one’s own strength. Once cheating is found, the test qualification shall be cancelled immediately and it is forbidden to join the genius camp forever.’

‘Okay, is there anything else you want to ask?’

A girl with short hair asked with some doubts: ‘Then how many points are awarded for the fourth place?’

Yu Lao smiled and said, ‘There is no reward for the fourth place.’

Hearing this, Lu Yuan’s eyes flickered and looked at the other three people.

found that the other three were also watching others vigilantly.

Everyone wants to be the first, no one wants to be the last.

‘If there is no problem, then prepare to go in.’

Li Qinghe smiled and patted Lu Yuan on the shoulder:

‘Come on, brother, if you are the first, sister will have a reward.’

Hearing what Li Qinghe said, the other three referees were taken aback, then turned to look at Lu Yuan, and then at Li Qinghe, a little surprised.

The burly middle-aged man who spoke before grinned:

‘Li Xuemei, this kid is your brother? I have never seen you have such a good relationship with other men.’

Li Qinghe raised his eyebrows and glanced at the burly middle-aged man:

‘Who do I have a good relationship with and want you to worry about it?’

The middle-aged man smiled stiffly and curled his lips.

He patted the brown-haired teenager he recommended:

‘Give the labor and management the first to come back! Otherwise, it depends on how the labor and management clean up you!’

Brown-haired boy: ‘???’

He looked dazed.

Why are you deflated by others and want to put your temper on me?

The brown-haired boy twitched the corner of his mouth, glanced at Lu Yuan, and nodded vigorously.

‘Liu-sama, don’t worry!’

Lu Yuan looked innocent. He obviously didn’t do anything. How did this person feel like he was angry with him?

The middle-aged man touched his nose. The other two recommenders didn’t want to talk anymore. They both patted the girl they recommended and encouraged a few words.

Then, the four of Lu Yuan crossed the space gate.

The space fluctuates, and Lu Yuan’s line of sight changes.

He found himself appearing on a grassland. The grass was half a person high and very lush.

Next to him are three other young girls.

Lu Yuan looked behind him.

It was the space door, obviously an exit.

After exit, there is a mirror-like border, which should be the end of this small world.

At this time, the brown-haired boy looked at Lu Yuan and coldly said:

‘The number one this time is mine!’

Lu Yuan nodded, and gave him a thumbs up: ‘Oh, come on. I am optimistic about you!’

The two girls who were watching the show were stunned.

Then he couldn’t help but raise the corners of his mouth, holding back his laugh.

Brown-haired boy: ‘???’

He was flushed with Lu Yuan’s perfunctory attitude, angrily wanted to do it.

is used as a punching bag by his own adult outside, and is still popular inside. Why? !

But when I thought that I just came in now, the test has just begun.

He took a deep breath and endured it.

He snorted coldly, and a breeze circulated around his body, turning into an afterimage and disappearing in place.

soon went deep into the grassland.

There are two girls beside , one is a cute girl with a little baby fat, and the other is a girl with short hair.

Seeing nothing, they chose different directions to leave.

Lu Yuan also chose a different direction from the other three, turned it into an afterimage, and disappeared.

.....

Outside the small world.

After the four of Lu Yuan entered, Yu Lao smiled and said:

‘Look at the situation of the four little guys.’

A man nodded: ‘Yes!’

He operated in front of a bunch of instruments, and soon four light curtains appeared.

are the four of Lu Yuan.

Li Qinghe’s eyes lit up, and he looked at Lu Yuan’s light curtain for the first time.

Inside the light curtain, Lu Yuan was running fast on the grassland.

At this moment, a huge yellow lion rushed out of the half-person tall grass.

Lu Yuan didn’t seem to react. The prairie lion opened his blood basin and bit on Lu Yuan’s armor.

Click.

A crisp sound rang~[www.mtlnovel.com](http://www.mtlnovel.com)~ The teeth of the prairie lion shattered, and a trace of blood spurted out.

‘嗷~~’

The prairie lion suddenly let out a scream.

Everyone in front of the light curtain saw this scene, their mouths twitched, and they felt a bit of toothache.

And Lu Yuan in the light curtain casually punched the grassland lion’s head.

Boom!

The prairie lion died on the spot and fell to the ground.

Seeing this, Li Qinghe smiled slightly and raised the corners of his mouth.

The mature woman in the recommender smiled and said:

‘Li Xuemei, the little brother you recommended has very strong defensive ability. This prairie lion should be a high-level ordinary beast, but it was directly broken.’

The other tall, thin man and the burly man did not speak.

Who is not a genius who came here to take the test ?

Any warrior who has burnt guardian genes can do this.

In the face of the battle of Tier 1 ordinary fierce beasts, there is no gold in it.

Only when you keep going backwards and your opponent becomes stronger can you see the difference.

In the small world, Lu Yuan easily found the mark on the back of the prairie lion.

That is a black metal piece the size of a thumb.

Put the metal piece in the black instrument, and with a beep, 1 point is displayed on the screen of the black instrument.

‘There are so few points...’

Lu Yuan raised his eyebrows and moved on.
