

Chapter 113: My Genes Evolve Infinitely

SPACE GENE: FLASHING

Li Qinghe patted Lu Yuan on the shoulder and smiled:

‘Go, you will have one day off during the weekend, remember to go home when that time comes.’

Lu Yuan nodded: ‘Yes.’

The other three referees also gave a few words to Yang Ping.

Then, the four of Lu Yuan followed Feng Zhou out.

Feng Zhou first took Lu Yuan to an office and went through the enrollment procedures.

The enrollment procedures are very simple, similar to the membership of the Warrior Association.

Sweep the gene war pattern, then operate it on the instrument, input the information, record it in the file, and it will be done quickly.

For example, Lu Yuan’s student information is:

Name: Lu Yuan.

Student ID: 1410082

Credits: 100

School Year: 1

After finishing the process, the staff also gave them a black card.

‘This is your student card. Your credits are all stored in it. Credits are needed to use various training equipment in the school, purchase extraordinary genes and other items, and you can use the student card to pay. Please be sure to keep your own If you lose your student card, remember to reissue it.’

the staff reminded.

After receiving the student card, Feng Zhou left the office with four people.

Along the way, Feng Zhou introduced the information of the genius camp to Lu Yuan.

‘Our genius camp is a six-year system. It starts from the time you go through the enrollment procedures. After six years, you will be officially graduated when you reach the general level.’

Yang Ping asked: ‘Then what if you don’t reach the general rank?’

Min’er and Lin Wei also looked curious.

It’s not easy to reach the level of a warrior in six years. After all, the more difficult it is to refine the gene chain, and the more difficult it is to break the gene lock.

Feng Zhou smiled and said: ‘According to Yu Lao’s words, if he cannot reach the rank of warlord in six years, he is not a genius. Of course he cannot be admitted as a student of our genius camp. Withdrawal, no graduation certificate will be issued.’

Yang Ping and the three people suddenly felt a little stressed, but Lu Yuan didn’t feel much at all.

He thinks he must be fine.

Feng Zhou continued to speak: ‘You don’t have to worry too much. With your talents, as long as you work hard enough, graduation is not a big problem. Some students in our genius camp even reached the battle senior level before graduation.’

Speaking, Feng Zhou glanced at Lu Yuan and smiled: ‘Like Li Qinghe.’

There is no accident in Lu Yuan.

Judging from Sister Qinghe’s current cultivation base at the War King level, she must have already been War Master before graduation.

‘The teaching method of our genius camp is still very relaxed. After all, students are genetic warriors, and it will take a long time to enter the land of origin. The time to practice in it is several times longer than that in the real world. So no It will be mandatory for you to take any courses. But if a teacher starts a class, it will be notified in advance, and students who want to go can listen to it by themselves. My advice to you here is: You

can still go to the class. After all, the teachers are the kings of war. Even the Emperor of War, there is more than enough to teach you, and it should give you something to gain. In addition, the school will arrange a mentor for you at that time. If you have any questions about cultivation, you can go to your mentor to answer.'

Lu Yuan nodded.

'The most important thing to tell you next is credits. In the genius camp, credits are currency. Your referees should have told you that there are many precious treasures that are hard to find outside the genius camp, whether it is extraordinary genes or There are genius treasures, genetic weapons, physical skills, etc., but these all require credits to purchase. During your study in the genius camp, in addition to improving your cultivation, the most important thing you should think about is how to get credits.'

Feng Zhou paused, and continued to speak:

'I'm here to tell you some conventional channels for obtaining credits. First, improve your cultivation level. Every time you break the gene lock, you can get a certain amount of credits. During the study period, you can break through from the fighter level to the combatant level, and you will get 1,000 credits. Breaking from the division level to the warlord level is rewarded with 10,000 credits. From the warlord level to the war master level, there is a 100,000 credits reward.'

'Second, the battle power rankings. Every month, you have the opportunity to go to the simulation room for free battle simulation. According to your combat performance in the simulation room, we will rank the battle power list. The first place can get 1 Ten thousand credits, the 2nd and 3rd place can get 5,000 credits, the 4th to 10th place can get 3000 credits, the 11th to 100th place can get 1000 credits. The 101st to 300th place can get 500 credits, the 301st place To 500, you can get 100 credits, 501st to the end, you can get 10 credits. The list is ranked once a month, and rewards are settled at the end of the month.'

Upon hearing this, Lin Wei frowned slightly:

'Teacher, this is not fair. Our cultivation level is so low. We are definitely not the opponents of the senior students if we simulate combat with those senior students.'

Lu Yuan and the three also nodded.

Min'er said, 'I think Lin Wei is right.'

Feng Zhou said with a smile: ‘You don’t need to worry about this. The simulated opponent is determined based on the cultivation level, and the combat power ranking is for the combat power of the same level. As a genius, the same level can’t be weaker than others, right?’

Hearing Feng Zhou’s words, the four of Lu Yuan understood.

‘The third way to get credits is missions. The genius camp will release some missions from time to time. You can get variable credits for completing the missions. The difficulty of the missions is generally quite high. Of course, there are also missions that suit you. Can you grab them? It depends on your luck. In addition to irregular missions, the genius camp will release special missions during special periods. Generally, everyone will participate in such missions. The specific situation depends on the situation at the time.’

‘These three are the most conventional channels for obtaining tasks. There are also some less conventional, but you should be exposed to it soon, such as gambling and fighting.’

At this point, Feng Zhou glanced over the four people and smirked.

Seeing the smile on Feng Zhou’s face, Lu Yuan felt a bit cold behind his back.

Does this feel a bit ill-intentioned?

However, after listening to Feng Zhou’s introduction of credit acquisition channels, Lu Yuan thought about it. For him now, the easiest channel to obtain credits is probably the battle power rankings.

After all, at the same level, the stronger the burned genes, the stronger the combat power will definitely be.

As long as Lu Yuan can continue to evolve his genes, his combat power will only get stronger at the same level.

This power ranking is very advantageous for him.

In addition, the reward for the improvement of cultivation level can be expected first.

His current strength is already at the level of consummation as a warrior. As long as he breaks through, he will have 1,000 credits, which is not bad.

As for the task, Lu Yuan will go to see what it is when he gets it.

If you need to bother, then forget it. With this time, he might as well hunt down the beasts to obtain spiritual crystals in the land of origin, consider how to break through, and then evolve genes to improve combat power.

Feng Zhou introduced Lu Yuan and brought the four of them to the accommodation area.

The accommodation area is quiet, with small buildings neatly arranged, and Lu Yuan is a little surprised.

This environment can be compared with that of Sister Qinghe's house.

Feng Zhou smiled and said:

'Because there are very few students in our genius camp, plus the four of you, there are only 930 people now, so the accommodation environment is better. Four people live in a small building. Your dormitory is here. Come with me.'

Feng Zhou led Lu Yuan and the four of them all the way, and soon came to a small building.

'No. 112, this is a boys' dormitory, there are two vacant rooms, Lu Yuan, Yang Ping, you two live here. There are two more people here...'

He looked down at a screen in his hand.

'Well, one is McGonagall Clark, a third-grade student, and the other is Tingfeng, a fifth-grade student. Give me the student card, and I will set up the access control for you.'

Lu Yuan and Yang Ping handed the student card to Feng Zhou.

Feng Zhou took out an instrument and put the card on the electronic door lock to operate it.

Soon, he returned the student card to Lu Yuan and Yang Ping.

'Okay, you can go in. I will take them to the dormitory.'

'Okay, thank you, Teacher Feng.'

Lu Yuan smiled.

Feng Zhou smiled and waved his hand.

‘Practice well.’

After speaking, he took Lin Wei and the two and left.

Lu Yuan and Yang Ping stood at the door and looked at each other.

‘Ah, Lu Yuan, we will be roommates from now on, so take care. Don’t worry about what happened before.’

An awkward expression appeared on Yang Ping’s face. After all, his attitude towards Lu Yuan during the previous test was not very good.

Lu Yuan smiled: ‘I’m not that stingy.’

Yang Ping breathed a sigh of relief: ‘Then go in.’

He quickly put the student card on the door lock.

With a beep, the door opened.

Lu Yuan and Yang Ping walked in.

Entrance is a hall, and there are sofas, coffee tables and other daily furniture in the hall.

looks pretty clean.

‘Is anyone here?’

Yang Ping looked around and called out loudly.

Not long after, there was movement from upstairs, and a blond young man walked down.

After seeing Lu Yuan and Yang Ping, he frowned slightly, then as if thinking of something, he asked:

‘Are you freshmen who have moved in?’

Lu Yuan nodded: ‘Yes, senior, my name is Lu Yuan.’

‘My name is Yang Ping.’

Yang Ping also introduced himself with a smile.

The blond young man smiled: 'Hello, two schoolboys. My name is McGonagall. I am in the third grade. There is also a senior listener in the fifth grade. But he is out now. Teacher Feng should have briefed you on it?'

Yang Ping nodded:

'Yes, Teacher Feng said just now.'

'That's okay. We lived with two sixth-grade seniors. They just graduated some time ago, and the room has been cleaned by Becky... Oh, Becky is the intelligent robot in our dormitory. It's upstairs. Come up, I will take you to your room.'

McGonagall is very enthusiastic.

'Trouble McGonagall senior.'

Lu Yuan and Yang Ping followed him upstairs.

'There are four rooms on the second floor. The rooms of the two of you are here. The rooms have separate bathrooms and balconies. The third floor is a training room, and there is a training room on the ground floor. However, there is no gravity room in the dormitory. , Just outside the dormitory area. Oh, provided that you have credits...'

McGonagall seemed to be talking a little bit, and said a lot when he brought the two into the room.

Lu Yuan and Yang Ping quickly allocated rooms.

McGonagall called Becky who was cleaning the corridor:

'Becky, make a big meal in the evening, and today I will pick up the wind for the two students.'

'Okay, master.'

McGonagall turned his head to look at Lu Yuan and Yang Ping, and smiled:

'I will notify the senior teacher of Sitingfeng, he should be back soon. By the way, you just came to the school, you can look at the light brain in the room, the admission notice inside has a detailed introduction about the school. What else You can also ask me if you want to.'

'Okay, thank you very much, senior.'

Lu Yuan is a little grateful, this senior person is quite nice.

‘You’re welcome, then I will go to practice first.’

McGonagall smiled and returned to his room.

Lu Yuan and Yang Ping also returned to their rooms.

Lu Yuan looked at his room.

The room is not too big, the furniture has a wardrobe, bed, desk, and a small bookshelf.

There is a door to the bathroom on the other side.

There is a black light brain on the desk.

Lu Yuan turned on Guangnao, entered the student number and password to log in, and found the admission notice.

He clicked on the admission notice and read it carefully, and found that Feng Zhou had basically said it, except for what he said, it was some school rules and disciplines.

In addition to the admission notice, there is also a school mall.

This is what Lu Yuan is most interested in.

According to the introduction in the admission notice, all the items collected by the genius camp can be bought in the mall!

He was a little looking forward to opening the school’s mall, which contained a dazzling array of goods, and the categories were similar to those of Battle.net mall.

He clicked on his most curious category of extraordinary genes, directly sorting from the highest price to the lowest.

Soon, Lu Yuan’s eyes widened and his breathing was a little short.

Combat Skills: All directions mirror image

Combat Skill: Instant Air Step

Combat Skills: Puppet Control

Combat Skill: Duankong Slash

Combat Skill: Cross Volley

Combat Skill: Petrified Eye

...

There are too many powerful combat skills, even the space system has several.

There are also puppet control techniques that force others to become your puppets, and petrified eyes that can make people petrify by seeing others, and so on.

But these rare and extraordinary genes all require a lot of credits.

The most expensive thing is the extraordinary gene of Bafang Mirror. This extraordinary gene is a royal-level gene, and it takes a full 10 million credits to purchase it.

You need to know that you get 10,000 in the battle list every month, 120,000 in one year, and less than one million in six years. UU reading www.uukanshu.com

How can I get 10 million credits while in school?

Not only that, it was also an extraordinary gene at the royal level, even if Lu Yuan wanted to burn it, he couldn't burn it.

Lu Yuan found that he should look for extraordinary genes below the leader level.

This way you can burn directly after the breakthrough.

After screening the conditions, Lu Yuan quickly found the extraordinary gene that matched it.

Combat Technique: Flashing

Combat Skill: Instant Shadow Sword

Combat Technique: Thousand Flower Phantom Art

Combat Skill: Ben Thunder Flash

.....

The first extraordinary gene, flashing is only a boss-level extraordinary gene, and the price is indeed the highest.

needs a full 2 million.

Lu Yuan looked a little dazed.

You know, this is just an extraordinary gene at the boss level!

After burning, the increase in physical body is far less than that of the leader-level, lord-level, and king-level genes.

2 million credits, if you change to other transcendent genes, I am afraid you can buy king-level or even royal-level transcendent genes.

One can imagine how powerful the combat skills attached to this extraordinary gene are.

Lu Yuan checked the introduction of this flashing combat technique.

After using spiritual power, it can flash and move within a short distance.

The specific distance depends on the spiritual power consumption, but the longer the distance, the more spiritual power is consumed.
