

# Chapter 117: My Genes Evolve Infinitely

## STEEL WORLD, FLOATING CITY

The carriage went all the way, and soon came to the teleportation hall of Tianluo City.

Different from the initial city, large cities such as Tianluo City generally have a teleportation array set up, which can be teleported between cities in the Alliance or the Origin.

Of course, to open the teleport anchor, you need to pay a price.

Lu Yuan had learned about Tianluo City before. The Teleportation Hall of Tianluo City has only four teleportation anchors.

One of them is to go to the central giant city of Baiyunzhou, Baiyun City.

The remaining three are to Lion City, Red Maple City and Luoyue City.

Luoyue City is an ally city of Tianluo City. The other two cities represent the Lion Empire and the Red Maple Empire near the Lion Empire.

The Teleportation Hall of Tianluo City is a huge white building.

The carriage stopped in front of the building, and the three of Lu Yuan got out of the carriage.

Lu Yuan looked around and found that there were huge numbers of people outside the hall.

Amy was a little surprised: 'Many people.'

This is the first time Amy has come to the teleportation hall.

Wang Lingling explained with a smile: 'One of the entrances of the Aier Machinery Ruins is located on the outskirts of Red Maple City. Our Tianluo

City has no entrance, so these first-tier fighters can only go to Red Maple City through the teleportation array. Naturally there are more people than before. Many. Normally, there are not so many people.'

Amy nodded suddenly.

'Miss, let's go from the VIP channel, I have arranged the teleportation array.'

'What about Xixi and the others?'

'Xixi and the others are already waiting for us inside.'

Wang Lingling smiled.

She took Amy and Lu Yuan into the VIP passage guarded by Tian Luowei beside the main entrance.

did not go far, they came to a huge room.

There are more than 20 young women waiting at the edge of the room. The central area is a circular area with a radius of more than 20 meters, and the area is engraved with complicated patterns.

This is the teleportation array.

When these young women saw Lu Yuan's trio come in, they all greeted them.

Headed by is a pretty black-haired girl.

'Miss, you are here.'

Then she turned her head to look at Lu Yuan on the side, with a look of inquiry in her eyes.

Not only the black-haired girl, the others are also staring at Lu Yuan at the moment, their eyes flashing with curiosity.

Lu Yuan glanced at these young women and found that they didn't look very old.

I am afraid that the oldest one is only in his early twenties. If it is not a genius camp, it may be called a genius if it is placed in other genetic warrior academies.

As Amy's adventure group, these members can be said to be of high quality.

Amy smiled and introduced Lu Yuan:

'Lei Feng, have you seen it? This is my Amy's adventure group. They are all first-order consummate fighters! This is Lin Xixi, my deputy captain.'

Lu Yuan smiled at Lin Xixi and nodded: 'Deputy Captain Lin, hello.'

Lin Xixi looked at Lu Yuan and smiled:

'I heard the lady say that you are very strong, Mr. Lei, and I went to pick you up. My team members and I are very curious about your strength.'

Lu Yuan smiled and said, 'I'm going to the ruins soon, you will see it then.'

Seeing Lu Yuan's confident look, Lin Xixi's eyes flashed, nodded, and smiled:

'Then I will wait and see.'

Wang Lingling smiled and said: 'Okay, let's go, go to the teleportation formation and stand.'

A group of people came to the teleportation array.

Lu Yuan stood beside Amy and Wang Lingling, surrounded by girls.

He is a little embarrassed, why is he the only man here?

There is an illusion of standing in the country of my daughter.

Fortunately, Lu Yuan didn't feel embarrassed for long, the lines on the teleportation formation lit up, and a white light surrounded everyone.

Lu Yuan felt his body flipped a few times, and then the white light disappeared.

When the white light dissipated, Lu Yuan realized that the surrounding environment had changed.

The walls in the previous VIP room were all white, but here are gray walls.

The staff next to are different from those in the previous VIP room.

But they look at the respectful expressions of Lu Yuan and it makes no difference.

After all, those who can use the VIP teleportation array are all big guys.

‘Here, let’s go out.’

Wang Lingling took Amy and the others out of the teleportation hall, and soon came outside.

There were more people outside the Red Maple City Teleportation Hall than in Tianluo City before.

After all, human beings are not only a city in Tianluo City, but other cities will also be teleported here, entering the El Mechanical Ruins from the only entrance nearby.

Leaving the teleportation hall, Lu Yuan and his team left Red Maple City without stopping.

There is a plain outside the city of Red Maple.

The entrance of the Aier Machinery Ruins is to the southeast of Red Maple City, which is only about ten kilometers away from the city.

When Lu Yuan and the others came outside the entrance, there was already a crowd of people here, and it was a vast expanse of sight.

Lu Yuan didn't focus on the people around him, but looked up at the sky, with shocked eyes in his eyes.

In the clear blue sky, there is a huge city projection.

The city consists of tall steel buildings, and densely packed speeding cars are flying in it, as if bees are flying in a hive.

There are even huge floating cities above the steel city, and there are aerial elevators connecting the floating city and the steel city.

Lu Yuan's eyes were shocked.

The city in this projection looks much higher than the level of technology on Daqixing.

'Is this the world projection of El Mechanical Ruins? It looks amazing'

Amy widened her eyes and called out in surprise.

Not only Amy, Lin Xixi and others, and even the genetic warriors who came here, were all watching the projection at this moment.

Projection is not static. Lu Yuan discovered that this city can be said to be boundless. As the projection continues to change its position, there is still no end in sight.

The steel city with no boundaries on the ground, the large and small floating cities in the sky, superimposed on each other, forming a shocking picture.

Wang Lingling said: 'The entire world of Aier Machinery Relics is even larger than our Daqixing. The entire world is made up of machinery. You have also seen the steel city and floating city inside, and the level of science and technology contained is higher than that of Daqixing. We humans are much stronger. The entire mechanical world is not without danger. There are patrolling mechanical guards everywhere, and there are even various deadly traps. Of course, there may be various opportunities. It depends on your luck. Look at those steel buildings. The taller the steel building, the more likely it is

that there are treasures in it, and the treasures in the floating city are more and more precious than the cities on the ground.'

When Wang Lingling said this, a tall tower suddenly appeared in the projected steel city.

The top of the tower is connected to a huge floating city.

This floating city is bigger than all the floating cities Lu Yuan has seen before.

Lu Yuan's eyes widened in shock.

This floating city may have a radius of several thousand kilometers, which is unimaginable.

'Have you seen this high tower and that huge floating city? That is the central area of the entire El Mechanical World. The treasures here are the most and the most precious. If you have the strength, you can try to explore it.'

Wang Lingling explained at the right time.

She paused, and continued to speak: 'But safety is the first priority in everything.'

Amy's purple eyes are shining, looking at the huge floating city, her eyes are full of excitement and anticipation:

'This central area, we must go!'

is not just Lu Yuan, Amy and others.

All the genetic warriors waiting here saw the huge floating city in the projection.

There was a loud noise suddenly.

Everyone is looking forward to entering the mechanical world, entering this central city area, and finally obtaining a lot of resources, soaring into the sky.

Time passed, and suddenly the projection on the sky burst out with dazzling white light.

White light covers the entire projection area.

When the white light disappeared, all the genetic warriors of the first order disappeared in place, leaving only some genetic warriors above the first order.

Wang Lingling stayed on the spot, watching the projection of the El mechanical ruins in the air slowly dissipating before turning back to Red Maple City.

.....

In the remains of El Machinery.

A line of light beams descended from the sky, densely distributed in various steel cities on the ground.

A high-rise rooftop in a steel city, the beam of light fell.

As the beam of light dissipated, Lu Yuan's body appeared.

Lu Yuan glanced at his surroundings, and he saw a steel forest in his eyes, exuding an icy mechanical atmosphere.

In the air not far away, hovering vehicles are constantly flying, and a group of mechanical guards can be seen on the street in the distance.

Lu Yuan squinted his eyes slightly: 'Is this the Ayre machinery ruins? Let's see where Amy is.'

Lu Yuan took out the communication crystal and began to contact Amy.

The white light flickered, and after a while, Amy's figure emerged.

Behind her, there was a trail of Tianluo Wisteria spreading. Not far away, there was a tall but thin alien with purple skin, who was being \*\* by Tianluo Wisteria.

Baro people are also one of the races of Baiyunzhou.

‘Amy, are you okay?’

Lu Yuan retracted his gaze from the Barrow who had lost his vitality and looked at Amy.

Amy wrinkled her nose: ‘You underestimated this lady! How could something happen to this lady?’

Lu Yuan nodded: ‘Share your location with me, I will come to you now.’

‘good.’

The communication crystal with the contact information has been added, so that you can know the location of the other party, which is the most convenient way to find someone.

Lu Yuan soon saw a white arrow appear on the communication crystal.

The direction of is directly in front of Luyuan.

Lu Yuan glanced at the endless steel jungle, then turned to open the rooftop door.

Inside the Tiantai Gate, there is a staircase inlaid with gears.

The stairs spread all the way down, leading to the ground.

Lu Yuan went all the way down the stairs, and soon he saw that the stairs branched out, and at the end of the branch was a door to the room.

Lu Yuan raised his eyebrows.

According to the information he knows, there may be treasures in each room, but there may also be steel guards stationed, or traps.

What exactly happened depends on luck.

Lu Yuan would naturally not let go of such a room door.

A crimson streamer flashed all over his body, turning on the red bronze light.

At the same time, he planted the seeds of nature in his body.

After making preparations, Lu Yuan walked over and opened the door of the room.

Inside the door is a room with a radius of about 500 square meters.

looks much bigger than outside.

Lu Yuan saw three blue potions lying quietly in the center of the room.

Lu Yuan raised his eyebrows, walked over, and picked up the potion.

The message appeared in Lu Yuan's mind.

Spiritual Power Gene Liquid (Level 1): Contains a large amount of spiritual power. After taking it, it can restore spiritual power and can also be used to temper genes.

Lu Yuan saw this, his eyes lit up and he smiled.

He is currently lacking spirit crystals.

He opened a bottle of spiritual power gene liquid and drank it, feeling the surging spiritual power.

The spiritual power contained in this gene fluid is about the same as 100 first-order spiritual crystals, and it is more gentle and easy to absorb.

Isn't this similar to the heavenly treasures like Moonstone Essence?

Lu Yuan remembered the Moonstone Essence he had obtained in Sandstone City. The only difference was that it was a technological creation.

Lu Yuan took a few breaths and absorbed the spiritual power in the spiritual power gene liquid, and then drank the other two by the way.

He looked at the room and found that there was nothing else left, so he had to leave with regret.

I hope there are good things like this in other places.

Lu Yuan licked his lips, looking forward to it.

If this is the case, then he can refine the 'seed of nature' gene to perfection in this world of El Ruins.

He walked out of the room and continued downstairs.

Just then, at the corner downstairs, a Kaman in black leather armor came up.

Lu Yuan saw the Kaman, and the Kaman naturally saw Lu Yuan.

The two stared at each other, both were taken aback.

Then the Kaman clenched the two daggers in his hand, and looked at Lu Yuan with a grin:

'Humans, you are bad luck when you meet me.'

A white light flashed above his body. The next moment, he turned into an afterimage and rushed towards Lu Yuan, very fast.

A hint of surprise flashed in Lu Yuan's eyes. This speed was comparable to an elite fighter of the first-tier pinnacle.

Still a strong one?

When Lu Yuan was surprised~[www.mtlnovel.com](http://www.mtlnovel.com)~ the Kaman had already appeared in front of Lu Yuan.

There was a grin on his grayish-white face that looked like a rock, and the two daggers in his hand pierced Lu Yuan.

Lu Yuan didn't move, the two short swords fell on Lu Yuan's neck.

Ding! !

The dagger seemed to be pierced into steel, and it made a crisp sound without even piercing the skin.

The hideous smile on the Kaman's face froze, his eyes widened, and he looked at his two daggers in shock. It seemed that he didn't even think that he could not even pierce the human skin.

At this moment, Lu Yuan had already thrown a punch, the strong wind was surging, and the Kaman felt a breath of terror.

His pupils shrunk, only before he saw a dark shadow flash by, he felt a sharp pain in his brain and lost consciousness.

Lu Yuan glanced at the Kaman corpse lying on the stairs, with a look of expectation in his eyes.

Soon, the body turned into white light and disappeared, leaving nothing behind.

A trace of disappointment flashed in Lu Yuan's eyes.

This guy found nothing.

Think about it, after all, they have just entered the ruins.

I'm afraid it's just entered the land of origin before.

After all, it takes twelve days to stay at the Aier Machinery Ruins. Generally, it is a good time for everyone to enter the land of origin.

Avoid getting out of the place of origin in the world of ruins.

Lu Yuan shook his head and continued downstairs.
